In electronic publishing, on the other hand, McClatchy has stepped back a bit. Last year, McClatchy and Time Inc.'s cable subsidiary, American Television & Communications Corp. (ATC) jointly ventured into videotex experiments. The first step was to secure the cable franchise in Sacramento. But Time Inc. withdrew from the bidding, forcing McClatchy to reevaluate its own position. McClatchy also ultimately withdrew.

The company still plans to be active in the young field in the same way in which it acquired cable rights in Fresno—by buying existing franchises when opportunities arise. But for the present, "We want to see where electronic publishing's headed," Erwin Potts, McClatchy's corporate vice-president, said. "There are a lot of false starts in the business over-all, so no one really has a clear picture of it yet."

Newspapers have been, and continue to be, McClatchy's primary emphasis. The *Sacramento Bee* moved into its new $42 million facility last year, which houses, among other

RE: Ad for Computerweek
Congratulations! What for? you may ask. Well, for having the best read ad in the February 8th 1982 issue of Computerworld, the newsweekly for the computer community.
As you undoubtedly were not aware, that particular issue of CW was studied by Becker Research Corporation in a Starch-like readership study, and the two-page spread you did for Computerweek was among the ads studied. It attained the following scores among all subscribers interviewed:
Noticed 81%
Began Reading 55%
Read More than Half 35%
Issue averages (including all ads studied in that issue) were 53%, 22% and 12% respectively. A couple of other ads did as well or better among subscribers with purchase decision influence for the product or service in question, but no ad did as well for all subscribers in the Noticed and Read More than Half categories.
I am enclosing a copy of the studied issue for your perusal (I looked that up in my Funk and Wagnall's). Please be sure to pass along my congratulations to everyone who was involved with the project.

things, 27 new Goss metro offset presses, and a new mailroom.

The *Anchorage* (Alaska) *Daily News* continues to grow, with circulation now numbering in excess of 40,000, according to Mr. Potts. The paper is still operating in the red, but circulation for the first time has passed that of the main competitor, the *Anchorage Times*, a long-time Anchorage institution.

For two of McClatchy's smaller papers, however, the news is not as good. Although the *Gilroy Dispatch* began publishing five days a week last year (up from three times weekly), the financial results have not been spectacular. According to Mr. Potts, that's because the general recession has affected the market in this southern Santa Clara County community, particularly in real estate.

The *Tri-City Herald*, a daily paper in Richland, Wash., for which McClatchy had held great expectations, has taken a beating as expected growth of the nuclear industry, prominent in the paper's market, has not taken place. The short-term prospects, at least, remain unfavorable. Layoffs are expected to continue while the community slowly orients itself to a secondary industry. The area is increasing its involvement in agribusiness, which may become the community's, as well as the newspaper's, foothold for survival, Mr. Potts said.

San Joaquin Tv Services, (an MDS Co.).

McGraw-Hill

McGraw-Hill, New York, is the country's 13th largest media company, with revenues of $732.4 million from media operations in 1981, or 66% of total revenues of $1.11 billion.

Business magazines, trade magazines and newsletters, including such publications as *Business Week* and "Nuclearfuel," provided 30% of total revenues last year. A variety of information services including "Dodge Reports" for the construction industry, Standard & Poor's debt-rating service and computerized economic data bases provided another 31% of revenues. Broadcasting operations, consisting of four tv stations, contributed 5% to revenues.

Each business segment contributed operating profits somewhat in proportion to revenues: Publications, 30%; information services, 34%; broadcasting, 11%. Total operating profit in 1981 was $204.1 million. Net income totaled $98.1 million.

The company got off to a good start in 1982, extending its string of year-to-year quarterly increases to 28 consecutive quarters. However, according to the company, operating profits for the publications division failed to move ahead in the first quarter, due in part to the company's investment in electronic editing and circulation systems.

Last year, although revenues from McGraw-Hill's flagship publication *Business Week* grew 3% to $133.3 million, the business weekly slipped from fourth to sixth place among leading ad revenue producers. The two publications displacing *Business Week* were Time Inc.'s *Sports Illustrated* and *People.*

Early this month, McGraw-Hill named James R. Pierce publisher of *Business Week* and a vp of subsidiary McGraw-Hill Publications Co. Mr. Pierce had been publisher of McGraw-Hill's *Aviation Week & Space Technology.* He succeeds R. Bernard Alexander, who will be in charge of special projects for the publishing subsidiary until he retires later this year.

The company denied persistent reports of an internal power struggle over the naming of Mr. Alexander's successor. The reports indicated some serious differences within the company about the direction of the magazine. McGraw-Hill had said only weeks before the new publisher was named that Mr. Alexander had no plans to step down as publisher. The official who said that was Daniel A. McMillan III, a McGraw-Hill Publications executive vp who resigned a few days before Mr. Pierce's appointment was announced. Mr. Alexander had been scheduled to retire next March.

In seeking to attain the goal of being the "preeminent supplier of information to business and the professions through both print and electronic media," McGraw-Hill increased capital spending 81% last year to $37.9 million. This figure, the publisher said, does not even provide a full picture of the investment in the future it is making since product enhancement and development of new services can't be capitalized.

Management believes that technology holds tremendous promise not only for delivering information services electronically but also for enhancing traditional printed products through electronic editing and production systems. That effort prompted the company to purchase Edutronics Systems International, London, marketer of multimedia training programs in several fields.

Four years ago, M-H purchased the U.S. and Canadian subsidiary of Edutronics.

M-H also is planning to syndicate a weekly half-hour tv program based on *Business Week* magazine. The project is viewed as a first step in reaching specialized markets through tv for many of the company's publications. A second step could be the production of business news briefs to be inserted in local newscasts.

The publications division also launched several new ventures, "Federal Lands," "Biotechnology Newswatch," *Nikkei Computer, Nikkei Biotechnology* and two new daily wire services, Steelgram and Solventwire. *Medical World News* was sold to Hospital Equities Inc. The editorial content of eight magazines became available electronically through the NEXIS system of Mead Data Central, and by the end of this year, all magazines will be included.

To upgrade its broadcasting operations, M-H installed earth receiving stations at KGTV, San Diego; WRTV, Indianapolis, and KMGH-TV, Denver, enabling them to receive programing directly from satellites.

Among new information systems offerings was Datapro, a directory of microcomputer software for the personal computer market. Also made available to users of personal computers were Standard & Poor's stock reports and stock guide. The Data Resources Inc. subsidiary introduced a forecasters' package, consisting of daily on-line data, commentary and a monthly econometric model.

The big question at the company today is who will succeed Harold McGraw as chairman and chief executive officer when he retires early next year. Although Joseph L. Dionne's appointment as president and chief operating officer last year makes him the likely successor, there has been no official word from the company.

Media General

Media General, Richmond, Va., is the nation's 41st largest media company, with revenues of $197.1 million from media operations in 1981, up 18% from the previous year's $167.4 million.

Media revenues accounted for 53.8% of the publicly held company's total revenues of $366.5 million, which were up from the previous year's $332 million. Total earnings were $31.6 million for 1981, up from 1980's $28.3 million.

Alan S. Donnahoe, Media General chief executive officer, told shareholders at the annual meeting last month that the company "considers the chances very good" for another record year in earnings and revenues in 1982.

Last year, newspapers contributed $173.8 million in revenues, or 88% of total media revenues, and broadcast operations contributed $23.4 million in revenues, or 12%.

Acquisition remains the key word at Media General with attention now concentrated on broadcasting.

Earlier this month the company purchased William B. Tanner Co., Memphis, which buys and sells radio and tv commercial time and also places commercials. Tanner is said to be the country's largest barter/media placement company, with 450 employes in six offices and annual revenues of about $100 million.

In 1980 Media General purchased Highlander Publications and Herald Press Newspaper Group, both Los Angeles area newspaper chains, consolidating them into one group—Highlander Publications. It also purchased Southern California-based Golden West Publishing later that year. The two chains of weeklies publish some 30 newspapers.

In 1981 the company agreed to buy Ziff-Davis television station WJKS, Jacksonville, Fla., for $18 million. Completion of the purchase is expected mid-year, Mr. Donnahoe said. The purchase will give the company two tv stations, the other being WFLA-TV, an NBC affiliate in Tampa, Fla. Both were ranked third in their markets in the most recent A.C. Nielsen ratings.

In conjunction with the tv purchase, Media General is selling its two radio stations in Tampa, Fla.—WFLA (am, fm)—to John Blair & Co. for $14 million. Mr. Donnahoe described the pending sale and purchase agreements as a "kind of tradeoff even though it involves two different companies. It is just that we wanted to get into Florida's second-largest television market and the purchase of WJKS gives us that opportunity."

In cable tv, Media General is awaiting word on its application for the franchise in Fairfax County, Va., which would cover some 200,000 households. It currently holds a franchise for three cable tv systems in the Fredericksburg, Va., area.

On the print side, Media General is keeping a careful eye on the Southern California market where its newest properties, Highlander Publishing and Golden West Publishing, are located.

Mr. Donnahoe did not rule out the possibility of some of the weekly properties going semiweekly or daily.

"We're watching it [the Southern California market]. There are no immediate plans for turning any of the papers into semiweekly or daily. But there is always that possibility. A lot depends on population growth in that area," he said.

Primary contributors to Media General's newspaper operations are the *Richmond Times Dispatch*, a morning and Sunday edition paper; the *Richmond News Leader*, an evening paper; the *Tampa Tribune*, a morning and Sunday paper, and the Tampa Times, an evening paper.

Mr. Donnahoe said 80% of the revenues of Media General's newspaper division comes from advertising and 20% from circulation.

Personnel changes in 1981 included the appointment of Mr. Donnahoe vice-chairman and ceo and James S. Evans president, a position formerly held by Mr. Donnahoe. Mr. Evans was formerly executive vice presi-

dent and chief operating officer of the company.

Meredith Corp.

Meredith Corp., Des Moines, Ia. is the nation's 23rd largest media company, with revenues of $330.5 million from magazine publishing and broadcasting operations, out of total corporate revenues of $403.4 million for the fiscal year ended June 30, 1981.

Meredith, however, has already topped revenues of 1981 in the first nine months of fiscal 1982. Revenues in this period have risen 13% to $340.6 million from $302.6 million in the year-earlier period. Assuming that media operations contribute the same percentage of total revenues as last year, Meredith's media revenues this year would be about $372 million.

Net earnings for the nine months rose to $21.5 million from $20.5 million. Total profits last year were $25.6 million, with most of the 20% gain over fiscal 1980 coming from broadcasting and book publishing. Magazine earnings were down.

Magazine publishing accounted for about 65% of total revenues and broadcast properties for 17% in fiscal 1981. Book publishing, the largest nonmedia segment, contributed $66.5 million in revenues, or 16% of total revenues. The company also operates financial and real estate services.

Like other media companies, Meredith faced a sluggish economy and difficult operating environment during fiscal 1981 and through the first nine months of fiscal 1982. In addition, the company's exposure in the depressed real estate business via its real estate franchising arm has proven to be a continuing drag on revenues and profits. The company's third quarter report acknowledged the real estate problem and attributed the improved operating profits to the magazine publishing and broadcasting. It said magazine advertising and subscription revenues and broadcasting revenues had increased, despite some softness in ad pages.

Throughout the year, Meredith's operating strategy remained constant, centering its various publishing interests on its mainstay, *Better Homes and Gardens.* The company eschewed new ventures not closely related to its core businesses of publishing and broadcasting. In January, 1981, it started Meredith Video Publishing, a new unit formed to appraise ventures in cable and satellite programming. At press time, Meredith was negotiating the purchase of San Joaquin Communications Corp., owner of KSEE-TV, Fresno, Cal., an NBC affiliate.

Rather than acquire cable systems, Meredith Video has moved into the software end of the burgeoning cable industry. During its first year, the subsidiary co-produced "The Better Homes and Gardens Idea Notebook," a series of half-hour programs on home decorating, improvement and landscaping. The series is shown on the USA Network.

In another new media category, Meredith and VHD Programs are producing "Understanding Your Body: A Woman's Guide from *Better Homes and Gardens,*" for use on interactive videodiscs. The program was produced and scheduled to be introduced this June. Its release date is now "uncertain," according to a company spokesman, who said VHD Programs will determine the distribution of the program.

The industry verdict was still out on the company's most significant change in 1981: The conversion of *Apartment Life* to *Metropolitan Home* in April of last year. Meredith said the magazine broke ad page records in nine of the first 12 issues. The magazine's circulation rate base remained at its initial level of 700,000, but publisher Harry Myers said the magazine delivered "significant bonuses" during 1981.

Metromedia Inc.

Metromedia Inc., Secaucus, N.J., is the country's 20th largest media company, with revenues of $390.5 million from media operations in 1981, or 85% of total revenues of $461.8 million. Broadcasting accounted for 59% of total revenues, and outdoor advertising about 26%. Operating income for the media businesses last year was $132.2 million.

For some years, advertising revenues from tv, radio and outdoor divisions have contributed the lion's share of operating income. In fact, last year other Metromedia divisions showed losses. But management still maintains that other fields offer greater potential for the growth-minded company.

Part of that belief is reflected in the company's move into the mobile radio communications field. In May, Metromedia agreed to purchase Radiofone Corp. for about $55.8 million. This month, it agreed to pay $86.5 million for companies in Chicago, Boston and Philadelphia that provide radio paging service.

As in the past, Metromedia is expected to grow perhaps as much through acquisition as from within. Largely producing the funds to pay for this growth are the company's broadcast operations, consisting of seven tv stations and 14 radio stations.

As part of a program to improve its station holdings, Metromedia last month completed its purchase of WCVB-TV, Boston, an independent ABC affiliate, and sold KMBC-TV, Kansas City, to Hearst Corp. for $79 million in cash. Metromedia paid $220 million in cash and notes for the Boston station, a record for a tv station. It sold KMBC to comply with Federal Communications Commission regulations that limit the number of tv stations owned by one company to seven.

Robert Bennett, who is credited with making the Boston station No. 1 in ratings in its market, last month was named Metromedia senior vp-television broadcasting and production and the fourth member of Metromedia's office of the president. He will continue to be based in Boston, where he has been WCVB-TV general manager since leaving Metromedia's New York tv station, WNEW, in 1971.

With the consummation of these deals, the reach of Metromedia's tv stations increases to 25% of U.S. tv households from 20%. The company claims that the 1981 Nielsen Station Indexes show Metromedia stations third after those owned and operated by ABC and CBS in terms of net weekly circulation.

There were also some shifts in the radio station ownership as Metromedia acquired WWBA-FM, Tampa/St. Petersburg, for $7 million in an exchange transaction that also involved the sale of KSAN (fm), San Francisco. Metromedia also acquired KHOW (am), Denver, for about $15 million.

Metromedia expanded its Foster & Kleiser outdoor advertising business last year with the acquisition of outdoor companies in Atlanta and Savannah, Ga. The company owns and services over 42,000 structures in 18 U.S. markets.

The company completed its divestiture of its Figi's subsidiary, removing itself from the mail order business.

The company's strong performance in recent years has been attributed to the direction of chairman John W. Kluge, who owns 18% of the company. He and several associates gained control in 1959.

Reflecting the company's performance, Metromedia stock has grown by an average annual rate of 70% compounded since 1974, making it the fastest-growing stock on the New York Stock Exchange in that period.

Morris Communications Group

Morris Communications Group, Augusta, Ga., is the country's 69th largest media company, with ADVERTISING AGE-estimated media revenues of $115.8 million in 1981, nearly all from newspapers in the South and Southwest.

Total revenues for the company were an estimated $118.4 million, up from $89 million in 1980. The increase in revenues came primarily from increased circulation prices.

The privately held company publishes the *Amarillo Globe-Times, Amarillo Daily News* and *Lubbock Avalanche-Journal* through its Southwestern Newspaper Corp. Revenues from this operation account for nearly half of the company's total media revenues.

A second division, Southeast Newspaper Corp., also contributes almost 50% of total media revenues. Southeast Newspaper includes the nearly 200-year-old *Augusta* (Ga.) Chronicle and *Herald* and the *Sunday Chronicle-Herald*; the *Savannah* (Ga.) *Morning News* and *Evening Press*, and the *Juneau* (Alaska) *Empire.*

Athens Newspaper Inc., another subsidiary, owns the *Athens* (Ga.) *Banner Herald* and the *Athens Daily News.*

In the fall of 1981 Morris bought the *Quarter Horse News*, a bimonthly based in Fort Worth, Tex., with approximately 3,000 subscribers.

Morris is experiencing some softness in classified and retail advertising, according to president and publisher William S. (Billy) Morris III, a second-generation newspaperman in Augusta. "Business has always been cyclical," he said. "We're just going through a cycle now."

Mr. Morris said the company is in the midst of a long term project to update equipment in its newspapers.

Morris Communications publishes five weekly papers. The company also owns Southwest Publications, which is primarily a book and magazine printer.

Multimedia Inc.

Multimedia Inc., Greenville, S.C., is the country's 42nd largest media company, with revenues of $195.3 million in 1981, all from media operations. That's up 19% from 1980's revenues of $163.6 million.

Broadcasting accounted for $97.4 million, or 50% of revenues, newspapers $78.5 million, or 40%, and cable tv $19.4 million, or 10%.

The company includes program production and distribution in its broadcast revenues.

In 1981, Multimedia completed 10 years as a public company. Revenues have increased more than five-fold from $36 million in 1971.

The company publishes 13 daily and 22 nondaily newspapers; owns and operates six television stations and 12 radio stations; operates over 60 cable tv franchises, and produces and syndicates tv programing.

With the population growth and trade influx to the Sunbelt markets, Multimedia's papers tend to be less recession-sensitive than other newspaper markets.

According to *Sales Management,* consumers in Multimedia daily newspaper markets spend an average of 14% more of their discretionary incomes on retail goods and services than consumers spend nationwide.

In February 1982, Multimedia started a service at the *Asheville Citizen-Times* on one leased cable channel, delivering local news and weather supported by both retail and class advertising. Encouraged by early results, the

State _____ Zip _____

Feudor

Feudor Incorporated, 50 Campus Plaza, Edison, N.J. 08818-0994

company plans to expand this service into other markets.

In the broadcasting division, Multimedia is still awaiting an FCC approval to trade WFBC-TV in Greenville and WXII-TV in Winston-Salem for Pulitzer Publishing Co.'s KSDK-TV in St. Louis. This exchange is expected to be official in the fall and will give Multimedia ownership of the NBC affiliate in the 14th largest market in the U.S.

This year is proving a busy one for Multimedia's WBIR-TV in Knoxville, Tenn., the site of the 1982 World's Fair. Along with airing live daily news programs and a weekly magazine program from the fair, WBIR-TV will be involved in a tv special produced for the fair by Multimedia Program Productions of Nashville (formerly Show Biz).

Multimedia became the largest producer/syndicator of country music programing in the world after acquiring Show Biz last year.

After only two years, Multimedia Cablevision is faring well in cable company rankings. It rose to 30th in *Television Digest*'s ranking of Oct. 1, 1981 and was ranked 29th by *Broadcasting* in Nov. 1981.

The division has grown to 160,000 subscribers from the 66,000 at the beginning of 1981 and now operates more than 60 franchises in Kansas, Oklahoma, Illinois and North Carolina.

In 1981, Multimedia bought 20% of Tar River Communications and has an agreement to acquire one-fifth of the company each year until 1985 when it will have full ownership. All of Tar River's cable operations are located in North Carolina. The company plans to increase its cable business through greater subscriber penetration and increased revenue per subscriber.

Multimedia will continue its basic reliance on its newspaper and broadcasting division, Walter E. Bartlett, president and chief operating officer, said. But, he added, Multimedia is positioned to take advantage of the program needs for both commercial tv and cable tv and the expanding possibilities in cable ownership.

"In the next five years, we expect our programing production division and cable division to develop a solid, profit base matching the profits now produced in our newspaper and broadcasting divisions," he said. "We believe this will structure Multimedia to meet most of the changing economic conditions in the next five years."

Mr. Bartlett was among a number of management changes last year following the death of chairman, J. Kelly Sisk, in November 1980. Wilson C. Wearn became chairman and chief executive officer, and Mr. Bartlett, former president of Multimedia Broadcasting, moved up to replace him as president and chief operating officer. Donald J. Barhyte, former vp finance and administration, was named vice chairman and chief financial officer.

Multimedia also named James T. Lynagh, former vp of the Post-Newsweek Co., as president of the broadcasting division, and E.B. Chester, a principal in Tar River Communications joined as vp for development.

National Enquirer

National Enquirer, Lantana, Fla., is the 57th largest U.S. media company, with 1981 revenues estimated by ADVERTISING AGE at $145 million, all from the company's two tabloids, the *National Enquirer* and *Weekly World News*.

In 1980, the company had estimated media revenues of $129 million.

The National Enquirer is the company's mainstay and remains the undisputed leader of the weekly tabloid market. Its most recent circulation figures—5.1 million—make it the "largest circulation newspaper" in America, the company says. The tabloid had experienced sharp declines in circulation between 1978 and mid-1981, when ABC figures showed a circulation of 4.8 million. The new figures suggest that the decline has been arrested.

The company's other publication, *Weekly World News*, had another disappointing year. Its total circulation hovers around 600,000 and the company's optimistic projection of a circulation of 1 million by mid-1982 will not be reached.

The *Enquirer* has raised its cover price to 65¢ from 45¢. However, that seems to have had little effect on circulation. "Not only didn't the price increase hurt circulation, but sales increased significantly," said Enquirer spokesman Martin O'Farrell.

Last year was a turbulent one for the *Enquirer*. It lost its first libel suit when a Los Angeles judge awarded actress Carol Burnett $1.6 million in damages—an award that was later halved in another court. Mr. O'Farrell claimed that the libel suit has had no material impact on the activities of the *Enquirer*. "We are just as careful and meticulous about our reporting and fact-checking as ever," he said.

The tabloid continues with its successful formula of celebrity gossip, medical and personal advice, cheesecake and cute kids. The multipicture cover, however, has been replaced by one dominant cover photo and smaller insets.

The *Enquirer* has launched a major network tv campaign through Compton Advertising, its new agency. It plans to spend $30 million for a total of 300 gross rating points, according to Neil Carey, senior vp, marketing.

Mr. Carey said the tv campaign follows the pattern of the highly successful *People* commercials—weekly spots that will highlight the current issue's feature articles and the week's psychic predictions. The commercials have been appearing on prime time hours and during daytime soap operas. Cable networks and satellite-distributed superstations such as WTBS, WOR and WGN also have been used.

The purpose of the campaign, according to publisher Generoso Pope, is to double circulation to 10 million in the near future. "We want to make the *Enquirer* a household name," Mr. Carey said. "We are trying to position ourselves against *TV Guide*, not the other tabloids," he added.

Within the *Enquirer* there is a growing belief that its readership has begun to change. Advertising director Ralph Gallagher said that two recent reports clearly indicate that the tabloid has developed a readership beyond its traditional middle-income, middle-aged woman. A Simmons study has found that the *Enquirer* has considerable following within the teen age group, while another study reported that the median income of the *Enquirer* reader has risen to $19,294 from $16,570.

The new ad campaign and the apparent change in demographics are aimed at helping the *Enquirer* break out of its current advertising mold—running mostly cigaret and mail-order ads—and luring some of the big advertisers not traditionally associated with tabloids, such as Procter & Gamble and Sears, Roebuck & Co.

In order to do so, Generoso Pope has assembled a veteran sales team and recruited Arthur Sloat, a former president of Liggett & Myers, to head it. Also joining the team were Richard Sears as vp, advertising sales, and Vince Robinson and Gibson McCable as consultants. Mr. Sears was a former vp, ad sales with CBS, Detroit. Mr. Gibson, a former publisher of *Newsweek*, and Mr. Robinson, a former marketing director with Johnson & Johnson.

The *Enquirer* also has been looking into the possibility of a video magazine, according to Mr. Carey, but none of the proposals have yet proved satisfactory.

Mr. Carey said the magazine hopes to move into video in the near future.

Amidst all the new approaches in advertising and marketing, the company's management structure remains firm. Owner-chairman Mr. Pope and editor-president Iain Calder remain atop the management structure and Michael Hoy continues as the *Enquirer*'s executive director.

National Enquirer, Weekly World News.

National Geographic Society

The National Geographic Society, Washington, is the nation's 47th largest media organization, with advertising and circulation revenues of $170.7 million, or 66% of total revenues of $257.7 million. Media revenues increased 19% last year and total revenues 24%.

The society publishes the monthly *National Geographic*, and "National Geographic World," a children's magazine that doesn't carry ads.

The society also is a major book and map publisher, a marketer of globes, film strips and films for schools, and co-producer with WQED-TV, the public tv station in Pittsburgh, of the highly acclaimed "National Geographic Specials."

Despite its good 1981 performance, said National Geographic president Gilbert M. Grosvenor, the nonprofit society is feeling the pinch of the national recession this year. Ad volume in *National Geographic* dipped 2.2 pages last year, to 387.9, but has swooned in 1982's first half, running 24% behind the 1981 pace through June, with 138 pages of advertising vs. 181 in the year-ago period.

Society officials attribute at least part of the ad decline to fast changing ad tactics in the auto industry, a major category for the *Geographic*. As the auto companies fence with short-term rebate and extended warranty offers, publications with long lead times, such as the *Geographic*, which has an eight-week close, are said to be at a disadvantage compared with newsweeklies.

While renewals remain high (84.6% in 1981), Mr. Grosvenor said efforts to sell new memberships in the society are facing tough resistance this year. "I deliberately pulled back our direct mail promotions because the results we've been getting have been poor," he said.

The difficult economic conditions are postponing further experimentation with television to promote membership sales, Mr. Grosvenor said.

He said the society was pleased with a recent test of tv to promote "National Geographic World" and "we'll test it again."

But he predicted the society will be "cautious" about any major shift from its traditional direct mail sales program.

Likewise, changes to make the *Geographic* more attractive to advertisers are being made gradually. Mr. Grosvenor said the magazine is unlikely to change the longstanding policy that has kept its editorial sections free of ads, but that it has added "appropriate editorial-type copy" to its front "bank" of ads to draw more readers to that part of the magazine. The front ad section now features a "Members Forum" letters section and an "On Assignment" article about *Geographic* writers and photographers.

The magazine also continues to exclude ads for tobacco products, alcoholic beverages and proprietary drugs from its pages.

Whatever its present challenges, the *Geographic* remains one of the most successful magazines in modern publishing history. At the turn of the century, the society began developing a mass market for general interest magazines on science and geography. Alexander Graham Bell not only invented the telephone, but, as president of the society, also put together one of the most

successful magazine marketing strategies ever developed: Coupling subscription to the magazine with society "membership," giving customers a sense of participation in the stories being covered.

Over the years, the society's approach to magazine marketing has made the *Geographic* one of the biggest sellers in the entire publishing industry. Its worldwide circulation last year stood at 10.7 million; in the U.S., the society counted 8.8 million members.

Advertisers invested $29.1 million in the *Geographic* in 1981, up 10.2%. The society raised the magazine's 1982 page rates 9% to $95,575 for a four-color page in the full-run U.S. edition and 10.6%, to $73,520, for a b&w page. The U.S. rate base remained unchanged at 8.4 million. The 1983 rates are to be announced late this summer. The magazine offers seven regional and five metro editions within the U.S. and Atlantic, Pacific and Latin American English-language editions.

Circulation revenue from the *Geographic* last year was $129.7 million, up 22%. Circulation revenue from "National Geographic World" reached $11.9 million, up 9%.

The success of the *Geographic* has attracted many other publishers to the popular science, geography and culture field. Among the notable entrants is the Smithsonian Institution's *Smithsonian* magazine, which in 12 years has built circulation to 1.9 million and ad revenue to $23.8 million.

While rivals offer smaller, more upscale readership, Mr. Grosvenor said the society is committed to reaching a mass audience with the *Geographic*. "We don't feel that committed to a specific [readership] profile," he noted.

"National Geographic World," the society's entry in the children's magazine field, has developed circulation approaching 2 million since its 1975 debut. While the no-advertising policy remains in effect, Mr. Grosvenor said the society is "investigating the possibility of institutional type ads."

"If a manufacturer of space hardware wants to participate in some kind of special section on spacecraft, I could see where that might be appropriate," the society president said.

Mr. Grosvenor took over the presidency in 1980, the fifth in his family and the third carrying the Grosvenor name to hold that post. He had been editor of the *Geographic* for 10 years. He remains fascinated by the video revolution changing the face of tv, but said the society has yet to make firm plans on how it may benefit.

"It's exciting what's out there," he said, explaining that the society has a potential role as a supplier of programing for the new tv services that are popping up. Among the possibilities are participating as a program source for the new direct broadcast satellite networks envisioned by Comsat and others.

The society has an inventory of previously shown specials and educational films, Mr. Grosvenor said. And, he added, "I don't think you have to spend a bundle to make a program that's interesting to view."

Magazines:

National Geographic, "National Geographic World."

New York Times Co.

New York Times Co., the country's 11th largest media company, had revenues from media operations—newspapers, magazines and broadcast facilities—of $796.6 million in 1981, up 17% from 1980 revenues of $679 million. Media accounted for 94% of the company's total 1981 revenues of $845.2 million. Remaining contributions came from the company's books, information and education division and interest income.

Over-all, the company had $61.9 million in operating income. The Times Co. newspaper group, which includes the *New York Times* and 18 regional papers, brought in revenues of $607.5 million last year, 71% of the company's total. Its operating income of $54.1 million represented 87% of the over-all company figure.

At a time when newspapers have been folding in Washington and Philadelphia, merging to stay alive in Atlanta and Minneapolis and struggling elsewhere, the New York Times Co. is almost indecently healthy. The company's flagship paper carried the most advertising in its 130-year history in 1981 and widened its share of the New York market to 60% from the 57% it pulled in the year before.

The *New York Times Magazine* once again ranked second behind *Business Week* in total ad pages among weekly magazines last year, increasing 3% to a record 4,512 pages.

Average weekday circulation at the *Times* climbed to 912,500 copies, while Sunday circulation grew to 1,485,000. What's more, these extra readers were paying more for their *Times*: The price of the daily paper went to 30 cents from 25 cents, making it the most expensive paper in the city; the Sunday $1 *Times* also continues to hold that distinction.

Despite its success—or perhaps because of it—the *Times* continues to evolve into more of a national newspaper. A second printing site for the paper's national edition was added in Florida last year and plans are to open one in California this year. They join the Chicago plant, which has been producing close to 75,000 weekday and 190,000 Sunday copies since 1980.

The *Times* also broadened its coverage in two key national areas in recent months. It added a page of Washington news and features soon after the *Washington Star* folded and also has redesigned its travel section.

The company's magazine group—consisting of *Family Circle*, *Golf Digest* and *Tennis*—reported an operating profit of $13.1 million in 1981, down 6% from 1980. *Family Circle* continued to dominate this group, with its average paid circulation of 7.4 million making it the fifth largest selling magazine in the country. Advertising also held up well last year, considering the problems plaguing most of the women's service magazines. Ad pages increased by almost 5% to 1,666, and revenues were up 5% to $95.4 million.

New York Times Co. entered the cable field in 1981 with the purchase of two cable tv systems in New Jersey, and many industry observers expect the company to continue expansion in this area. There have been reports of discussions between top-level Times Co. executives and their counterparts at RCA/NBC about the possibility of some joint venture between the two communications companies.

Profits of the broadcasting and cable group declined last year to $3.5 million from $3.8 million, a drop of 8% that the company attributed to costs associated with the cable operation's development.

S.I. Newhouse & Sons

Advance Publication Company, the corporate umbrella for the company otherwise known as Samuel I. Newhouse & Sons, New York, is the country's seventh largest media company, with 1981 media property revenues estimated by Advertising Age at $1.25 billion, up from an estimated $1.1 billion in 1980.

Media revenues accounted for 89% of total revenues of $1.4 billion in 1981, with the non-media revenues coming from Random House books. Total company revenues in 1980 were $1.25 billion.

Conde Nast's GQ had a 44% increase in ad dollars.

About 75% of the company's media revenues came from newspapers and the remainder from magazines, radio stations and cable tv.

The country's largest privately owned media company currently is completing the divestiture of its broadcasting properties. It previously sold its tv properties in Syracuse, Elmira and Birmingham, N.Y., Harrisburg, Pa.; Portland and St. Louis to the Times Mirror Co. It now is awaiting Federal Communications Commisssion approval for the sale of all its existing radio stations.

Assuming approval is granted, WAPI (am, fm), Birmingham, Alabama, will be sold to Bernard Dittman, owner of WABB, Mobile; WSYR (am, fm), Syracuse, to Katz Communications and WTPA (fm), Harrisburg, Pa., to Foster Management.

Outsiders believe the company is forsaking traditional broadcasting properties, and will use the proceeds from their sale to fund expansion in other media operations, specifically cable. Management claims, however, the current divestitures do not preclude acquisitions of other broadcast concerns at a future date.

The company's cable operations are ranked as the eighth largest in the country and said to be among the fastest growing. But the company has publicly kept a low profile on its cable/video operations, purposely downplaying its cable involvement per orders of company head Samuel I. Newhouse Jr., some say.

Last year, the company was reported to have bought a system in Lake County, Fla. but that deal apparently was not consummated. Its Vision Cable Communications does have in place, however, a teletext operation with Dow Jones & Co. in Clearwater, Fla., that is considered one of the most advanced text and graphics systems in the country.

The company has anounced no major acquisitions since those of Vision Cable Co. and Danieis Properties—CATV Interests. But Mr. Newhouse is expected to continue to expand in cable and in time may use the company's magazines as a springboard into cable programing.

In the first six months this year, the Conde Nast Publications division has been actively promoting its coming revival of *Vanity Fair*, the repositioning of *House & Garden* and the makeover of *Mademoiselle.*

Conde Nast reportedly is investing $10 million in *Vanity Fair*, which will be relaunched next spring. Cultural coverage is the publication's focus, with culture broadly defined as anything from music to politics to sports. The magazine's prototype graphics seemed a blend of *Interview* and *Glamour*, designed to attract an upscale reader.

The high-income reader is also the target of Conde Nast's repositioned *House & Garden.* The 81-year-old magazine will now take on a more esoteric approach to decorating and design as well as the arts *a la Architectural Digest*, the presumed competition for the new *House & Garden.* Its cover price will be increased from $1.50 to $4 and the 1 million rate base will be cut.

Last year Conde Nast tested the waters for this repositioning when it made some visual and editorial changes in the publication. The changes appeared to help circulation, but *House & Garden's* advertising pages were down 11% in 1981 from 1980, while ad revenues rose only .3% to $26.6 million.

Other Conde Nast advertising results last year included increases for *GQ*, up 14% in pages and 44% in ad dollars to $7.3 million; *Vogue*, up 16% in pages and 31% in dollars to $40.4 million; *Glamour*, up 7.3% in pages and 26% in dollars to $36.1 million; *Mademoiselle*, up .9% in pages and 21% in dollars to $17.1 million.

Self pages increased 14% and its ad dollars rose 37% to $50.9 million. However, Conde Nast insiders still feel that *Self* is in need of more advertising categories. A survey commissioned by the publication may result in an aggressive effort to lure more advertisers.

Last February, *Self* said that liquor, beer and wine advertisers are ignoring women and reported that its survey showed that more than 90% of American women now drink some form of alcoholic beverage.

Because of Conde's current plans for *Vanity Fair*, *House & Garden* and *Mademoiselle*, which graphically now resembles *Self*, observers do not expect major developmens from the division in the next year.

If anything, they say, Conde Nast may buy a small publication along the lines of a *Gourmet*, if it came up, but would not start a new book from scratch nor invest in a large-circulation publication.

Conde Nast executives indicated there was some truth to the "smaller property" theory when they said they had never looked at Charter Co.'s *Redbook* when it was for sale, despite rumors that Conde Nast was a potential buyer.

The company's Random House division earlier this year bought part of Fawcett Publications book division from CBS Inc. The six lines purchased were: Crest, Gold Medal, Pre-

mier, Columbine, Coventry and Juniper.

News America Publishing

News America Publishing, New York, the U.S. branch of Rupert Murdoch's international publishing company, is the country's 36th largest media company, with estimated U.S. revenues of $210 million for the fiscal year ended June 30, all from print media.

In New York, the story brewing at the tabloids is now tabloid material itself, and, as can be expected, Rupert Murdoch is playing a leading role in the melodrama.

Mr. Murdoch's *Post* is in one corner, squared off against the *Daily News,* and the combatants claim they are fighting not just a sparring match but a gladiator's duel.

"Both of us are engaged in a dance of death which must end in the disappearance of one or both newspapers," Mr. Murdoch observed recently.

In April, Mr. Murdoch broke a longtime silence about the *Post's* financial ledger to reveal that the publication would lose some $20 million during a two-year period ending this year.

Previously, Mr. Murdoch had said only that the *Post's* losses would exceed the profits from the rest of his American media holdings, which, at this point at least, are in the black.

Mr. Murdoch's admissions about the Post's losses came under duress. The *News,* which could lose as much as $40 million to $50 million this year, was on the sales block and optioned off to media magnate Joe L. Allbritton. After a series of on-again, off-again negotiations between the *News'* 11 unions and the media executive, Mr. Murdoch entered the picture when the unions invited him to match his own bid for the paper. Later, Mr. Allbritton dropped out of negotiations.

Mr. Murdoch proved to be more than compliant. At a press conference, he talked openly about the faltering state of both dailies and he declared his intention of becoming the patriarch for both papers. His offer: He would buy the *News* and run it jointly with the *Post,* and, in doing so, he would try to preserve the integrity of both of them. He sweetened his proposal with the promise that he would build a $150 million, high technology plant in Queens capable of printing 2.5 million newspapers a day.

The response from the Tribune Co., the Chicago-based owner of the *Daily News,* was quite literally, "Drop dead," and the company made sure Mr. Murdoch knew it by printing it in headline-size type.

Yet it doesn't appear that the book is closed quite yet on this story of the battling tabloids. They still take potshots at each other, in news stories and in editorial columns, and the bitterness that has fueled the newspaper war is still there.

While the *Post* continues to get most of the attention, it is Mr.Murdoch's other American holdings that are bringing in the income. *New York* magazine, for instance, is now solidly in the black and is recording an all-time high this year in advertising pages and revenues. Ad pages will total about 2,600 this year, and will gross about $30 million for the fiscal year ending in June.

Automobile advertising, weak at the end of the year, is rebounding, with both domestic and foreign companies contributing to the till. Two other major growth categories are banking and retailing. Liquor and cigarets continue to hold up well, according to Martin Singerman, president of the News Group magazines subsidiary. "There is no real soft category," Mr. Singerman says.

The sturdy *Village Voice* is registering a record-breaking year in display and classified advertising. It will pull in about $14 million on 2,700 pages of advertising. At a time when the book publishing industry has been soft, the *Voice's* young literary supplement continues to grow. It is slated to appear in 10 issues of the *Voice* during its first year of existence. So far, there have been at least seven pages of advertising in each issue.

Circulation at the *Voice* remains at 145,000.

News America's most profitable publication is the weekly tabloid *The Star,* which is projected to bring in about $60 million in revenues. Mr. Singerman sees what he describes as a "healthy" move on the part of national advertisers into the tabloid, but he concedes the advertising community is "uncomfortable" with the "tabloid format."

"It's an image situation," he asserts, stressing that national advertisers will join the *Star's* fold in good time.

The Star offers 17 pages of ads 52 times a year, and usually books a full house.

Oak Industries

Oak Industries, Rancho Bernardo, Cal., is the country's 60th largest media company, with estimated revenues of $130 million from media operations in 1981, or 26% of total revenues of $507.1 million, compared with media revenues of $76 million and total revenues of $386 million in 1980. Oak's subscription tv (stv) operations accounted for nearly all media revenues.

Oak's subscription tv operations—using the ON TV consumer trade name—are the over-the-air pay tv industry's largest, claiming 596,000 subscribers of the entire stv industry's 1.3 million homes as of February, 1982.

The publicly owned company's major business continues to be equipment manufacturing for electronic, cable tv and other industries, but Oak has been diversifying into tv media and software. Pay-per-view programing is one major thrust of Oak's tv software efforts.

In 1981, Oak had five ON TV stv operations: Los Angeles (388,000 subscribers as of February, 1982, the world's largest), Chicago (115,000 subscribers), Miami/Fort Lauderdale (38,000 subscribers), Phoenix (37,000 subscribers) and Dallas/Fort Worth (16,000 subscribers). Los Angeles and Miami/Fort Lauderdale are wholly owned while the others are joint ventures. In September, 1981, Oak bought out partner Chartwell Communications Group's 49% interest in ON TV Los Angeles for $55 million.

The Chicago operation has the distinction of being the industry's fastest growing, becoming profitable only eight months after its September, 1980, start. On the other hand, in Dallas/Ft. Worth, growth "has been less than expected" because ON TV competes with two other stv services, so Oak is considering a "combination with other parties" there, the company said.

Separately, Oak licenses the ON TV trade name to stv operations in Cincinnati, Portland and Philadelphia.

Oak has new stv starts, both joint ventures, planned for Houston and Baltimore/Washington in late 1982. The company also has said it may launch stv ventures in other, unspecified areas.

Consistent with industry practice, Oak markets ON TV using mass media advertising. About 85% of ON TV's estimated $11 million in ad spending (for five markets) is spent on tv commercials. Oak consolidated its entire consumer stv account at Admarketing, Beverly Hills, last January. The account previously had been split with Foote, Cone & Belding, Chicago.

Consumers pay about $23 monthly for ON TV service, which consists of uncut, commercial-free movies and special events. Delivery is via an ordinary, over-the-air uhf tv signal that is scrambled with Oak equipment.

ON TV offers local professional and collegiate sports events on an exclusive basis, a key local selling point that differentiates ON TV from national pay cable networks.

Oak's stv decoder equipment, with which its first stv operation was started in 1977 in Los Angeles, is addressable, *i.e.,* subscribers can be individually tuned in or out. That capability makes possible pay-per-view events in which subscribers are tuned into a special program when they pay an extra fee. Major such ON TV events include a September, 1981, Leonard-Hearns boxing match ($15 extra; 52% of the subscriber base participated) and a December, 1981, Rolling Stones rock concert ($10 extra; 10% of the subscriber base participated). Both were presented live via satellite.

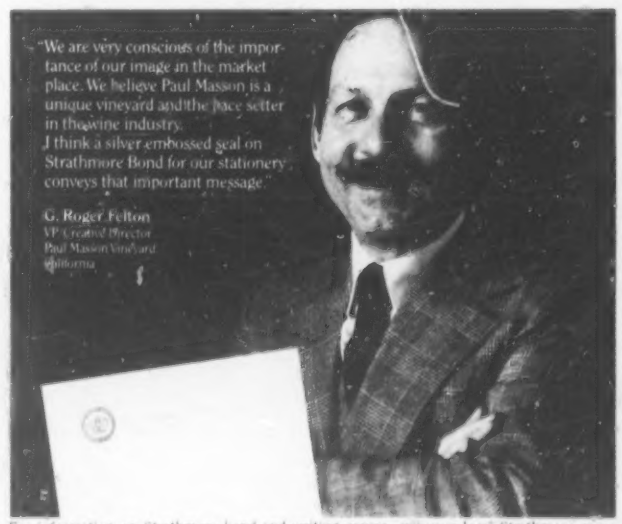
In another pay tv media venture, Oak hopes to operate in mid-1983 a direct broadcast satellite network reaching the northern part of the U.S. Consumers receive a dbs (direct broadcast satellite) signal directly from a satellite with a special antenna at their home. Oak plans to offer ON TV-like programing and in mid-1982 will file for Federal Communications Commission authorization to start the service.

In a joint venture, Oak plans to field test in 1982 a tv service bringing special programs to college campuses. Students will pay an admission fee to view the programs on large-screen tvs in theaters.

Program production activity, handled by the Oak Media Development subsidiary, includes a joint venture with Universal Pictures to make four movies for a total cost of $16 million. Oak

STRATHMORE

The quality people respond to.



"We are very conscious of the importance of our image in the market place. We believe Paul Masson is a unique vineyard and the pace setter in the wine industry.
I think a silver embossed seal on Strathmore Bond for our stationery conveys that important message."
G. Roger Felton
VP Creative Director
Paul Masson Vineyard
California

For information on Strathmore bond and writing papers, call your local Strathmore paper merchant or write to: Strathmore Paper Company, Dept. BW Westfield, MA 01085

Media Development is also producing pay tv pilots and programs, in some cases with partners sharing the risk.

In a short-lived media thrust, Oak acquired cable tv systems in Oxnard, Cal., and Castro Valley, Cal., in 1981. But in February, 1982, Oak said it will sell off the cable systems, which have 40,000 subscribers combined, apparently because the company is unwilling to enter the now-competitive cable system acquisition and franchising arena.

In 1981, Oak acquired 81% interest in VideoNet, a Woodland Hills, Cal., company that markets closed-circuit tv services.

Oak's 31% increase in revenue and 51% increase in operating profit in 1981 were due largely to growth in stv operations and tv communications equipment. Oak's communications equipment order backlog at the end of 1981 stood at $168.7 million.

Oklahoma Publishing Co.

Oklahoma Publishing Co., a privately held enterprise owned by the Gaylord family in Oklahoma City, is the nation's 30th largest media company, with 1981 media property revenues estimated by Advertising Age at $266.8 million.

Last year's estimated revenues represent a 16% increase from 1980's estimate, which has been restated to $229 million to reflect the unusually large advertising-to-circulation revenue volume of about eight to one at the company's Oklahoma City newspaper operation. AA's original estimate of 1980 revenues was $170 million.

Oklahoma Publishing derives all of its revenues from media operations. The Gaylord family, however, has oil and gas and real estate interests as well.

Estimated 1981 revenues reflect normal revenue growth of about 15% in the seven tv markets of subsidiary Gaylord Broadcasting Co., and about 12% in Gaylord's two radio markets; a slight ad volume increase for *Farmer-Stockman* magazine, and revenue-increasing moves at the morning *Daily Oklahoman* and evening *Oklahoma City Times*, Gaylord's flagship papers in Oklahoma's capital city.

The Oklahoma City papers increased daily circulation prices from 20 cents to 25 cents and Sunday prices from 50 cents to 75 cents in April, 1981, and boosted retail linage rates several times during the year, resulting in rates at yearend that were 38% higher than at the end of 1980.

The company, which saw its morning, evening and combined Saturday editions lose circulation while the Sunday issue gained circulation, took steps to butt heads with competitors in the market that it has all but dominated for years.

The *Oklahoman* has beefed up editorial content in its two distribution zones—defined basically by U.S. 66—to combat territorial encroachment by suburban papers, particularly in the affluent northern part of Oklahoma City. The paper contains an interior r.o.p. broadside section of about 36 pages carrying part-run rates to attract smaller advertisers. The sections are off-limits to the bigger advertisers.

The rates, of course, are much cheaper than the full-run rates. A weakness of the special sections may be that they appear only on Monday and Thursday afternoons and Tuesday and Friday mornings. Only the special sections in the *Daily Oklahoman* Tuesday morning and the *Oklahoma City Times* Thursday evening are flagged as special editorial sections and given their own cover page along with more extensive coverage of social events.

These two editions have been distributed only in the north zone. Launched in April, they are slugged as the West and North sections of the north zone edition. The two sections carry the same advertising and editorial, although page one of each section is replated to designate West or North. Line rates are structured to encourage advertisers to buy all four sections appearing in the two morning and two evening papers.

Editorial in this north zone, especially in the Tuesday and Thursday papers, concentrates on parties and other items on the social calendar, an editorial thrust that has given the local competitor and suburban *Friday* newspaper a circulation of 14,448 in the city's far north region since founded by local entrepreneur Leland Gourley eight years ago.

"We call, the *Oklahoman*'s section *Friday Jr.*," chuckled Mr. Gourley, referring both to the sections' coverage and appearance. Mr. Gourley, who says *Friday* next to the *Oklahoman* is a "gnat on an elephant's rump," said the special sections "scared me a bit" when launched. "If they [the *Oklahoman*] do me dirt, it is to one of their good friends," he quipped, noting that *Oklahoman* news executives and families are a big part of the social register covered by *Friday* and like to read about themselves in his paper. Mr. Gourley said that *Friday* is running 32% ahead in dollar volume this year than last, but then "we were holding a 30% to 35% increase each month before the *Oklahoman* special sections came out."

The *Oklahoman* also faces increased editorial competition from *The Journal Record*, which has been transformed from a legal-notice broadsheet with a daily circulation of 600 several years ago into a full-fledged business daily with 4,500 subscribers. The paper offers themed sections on oil and gas (Tuesday), small business (Wednesday), executive living (Thursday) and real estate and construction (Friday). In an effort to improve its own business coverage, the *Oklahoman* this year hired the business daily's editor as the *Oklahoman's* business editor.

Observers said the *Oklahoman's* dominance of the local print media market has enabled it to retain the loyalty of advertisers, especially larger clients, even while levying higher-than-usual rate increases.

But "they've gotten loud cries from their advertisers," said a local advertising man, who noted that many advertisers have stayed put because there is no place else to go. He added that he expects a fallout if such increases continue: "They [the *Oklahoman*] have dipped their hand into the cookie jar and so far have come out with whole cookies. Sooner or later if rates continue to rise, they'll come out with broken ones."

The *Oklahoman* also does a thriving business in pre-print inserts, traditionally setting its prices just below postal rates and discounting for multiple contracts, a local adman said.

Oklahoma Publishing's lone venture in magazines, *Farmer-Stockman*, recorded a flat year for advertising with total ads nudging upwards from 82,848 to 82,856 for a slight linage gain, according to Agricom monitoring service. The subsidiary includes the *Texas Farmer-Stockman*, the *Oklahoma Farmer-Stockman* and their various territorial issues. The ad performance at the Dallas-based operation was a reflection of both the general economic climate and the 1980 drought that killed crops across the Midwest and Southwest, according to Hal Mayfield, ad director at the Dallas-based magazine. Mr. Mayfield noted that if interest rates would drop and commodity prices rise, so would ad linage at the *Farmer-Stockman*. Its monthly circulation in 1981 was 209,722, primarily in Texas, Oklahoma and New Mexico.

RADIO: WKY (am), Oklahoma City, KYTE (am, fm) and KLLB (fm), Portland, Ore.

Outlet Co.

Outlet Co., Providence, R.I., is the country's 87th largest media company, with media property revenues of $75 million.

Revenues were roughly divided in a five-to-one ratio between Outlet's tv and radio stations. The company owns five television and seven radio stations. Each television station is in one of the nation's top 50 markets, and the radio stations, some observers believe, are "well placed." Total revenues for the company were $142.8 million.

Outlet began as a small retail store in Providence in 1894. By 1924, the company owned a radio station, WJAR, in Providence, also with a large retail store. That year, WJAR and WEAF, a radio station in New York, formed the beginnings of the National Broadcasting Co. radio network. In the early days of radio, many retail stores established radio stations to encourage sales of crystal sets and broadcast commercials about themselves.

A decade ago, Outlet owned a chain of retail stores and several tv and radio stations. But in the mid-'70s, Outlet began to withdraw from retail operations. In 1980, it sold most of its department stores to United Department Stores of Trenton, N.J.

Last year, Outlet was almost acquired by Columbia Pictures Industries, but the deal fell through early this year when Coca-Cola Co. and Columbia agreed to merge. Reports suggested that Coca-Cola first agreed to buy Outlet as part of the Columbia transaction, but had second thoughts because of Outlet's retailing operations (which lost $544,000 on net sales of $66.9 million in 1981), and possible contingent liabilities connected with the sale of its stores to United, which filed for Chapter 11 bankruptcy late in January.

Outlet's broadcasting operations have been and remain healthy. According to Howard Kay, the company's director for corporate affairs, 1981 was an excellent year. "We saw very significant growth in commercials," he said.

"KSAT-TV in San Antonio was a very strong performer, along with KOVR-TV in Sacramento and WDBO-TV in Orlando. Our radio stations WIOQ [fm] in Philadelphia and KIQQ [fm] in Los Angeles were also good. Some others have not performed at that level. It's a mixed bag, but on the whole, we've done very well," he added.

Mr. Kay said that, while Outlet has no immediate plans to purchase additional broadcasting properties, "our long-term objective is to acquire more stations." He also indicated that an agreement has been reached to sell the last 69 stores in its retail operations to the management of the stores. In addition, Outlet is selling its radio stations (WDBO fm and am) in Orlando to Katz Broadcasting in Florida for $9.5 million, of which $2.25 million is in cash, with the rest secured by a $7.25 million seven-year note. The sale is to be final today.

Other merger plans are not in the company's immediate future, "But if someone came along with a legitimate position, we would listen," said Mr. Kay.

Park Broadcasting

Park Broadcasting, Ithaca, N.Y., is the country's 86th largest media company. Net operating revenues from media operations in calendar year 1981 were $75 million, a 15% increase from 1980 revenues of $65 million. Media operations represent 94% of total revenues in 1981 of $80 million.

Roy H. Park, 71, is sole owner of the company, which in 1962 bought its first broadcast station, WNCT-TV in Greenville, N.C., Mr. Park's home state. By 1977 the company owned seven television stations, seven am and seven fm radio stations, the maximum the Federal Communications Commission allows.

Mr. Park began buying newspapers in 1972. Today his company owns 53 dailies, weeklies and shoppers, many located in the South and Southeast. Combined circulation is 582,320, and no single paper reaches more than 50,000.

Park's most recent acquisition has been the *Robesonian*, a 112-year-old afternoon paper founded by a Baptist minister who served in the Civil War. It is based in Lumberton, N.C., and serves 16,000 readers. It dovetails nicely with Mr. Park's other properties; he has said he believes in sticking to what he knows best, and that means papers and broadcast stations that operate in smaller markets. It has also been his policy to promote growth by reinvesting all company earnings back into the company.

Mr. Park received degrees in business and journalism in 1931 from the University of North Carolina, and worked several short stints at editing and writing. But he got the capital he needed to found his own media company from a joint venture with Duncan Hines in the food business. Procter & Gamble acquired Hines-Park Foods in a 1956 merger. Mr. Park continued at P&G as an executive until he bought WNCT-TV in 1962.

Mr. Park's son, Roy Park Jr., runs another family venture, Park Outdoor Advertising, which operates in Ithaca, Jamestown, Binghamton and Utica, N.Y., and Scranton, Pa.

Penthouse International

Penthouse International, New York is the country's 55th largest media company with estimated 1981 media property revenues of $150 million, or 94% of total revenues of $160 million.

Since its founding in England in 1965 by Brooklyn-born Robert Guccione, 51, it has remained a private company. All the stock is owned by Guccione and Guccione family trusts. As chairman, president and chief editor, Mr. Guccione presides over every facet of his diverse holdings. Among them: Four magazines, two Atlantic City, N.J. properties, films, a syndicated television show, a mail order house for sexual aids, a heavy investment in a nuclear fusion research company and a meager book division. His ambition, stated repeatedly: "To own the largest privately held company in the world."

Toward this goal, he has continued to use profits from his highly successful *Penthouse* to fund various interests and support his litigious personality. The namesake magazine provides 80% of $124 million to the organization's yearly coffers. About 94% of *Penthouse*'s 4,051,969 monthly copies are sold on newsstands. This is in contrast to arch rival *Playboy* which sells 52% of its 5,013,941 copies on newsstands. *Playboy*, though, compensates for reduced subscription prices with extra ad pages.

In 1981, both *Penthouse* and *Playboy* sustained substantial drops in ad pages; *Penthouse* lost 51 pages, *Playboy*, 45. *Penthouse* also had a 6% drop in circulation. Industry sources attribute this to the economic crunch as well as a lessening interest in skin magazines. A high level former *Penthouse* insider, however, said he felt the *Penthouse* reductions were caused by a lack of promotional efforts by the company in view of the fact that the cover price increased from $2.50 to $3.

Three other media properties are money-makers. *Omni*, a newsstand science magazine, brought out in 1978, has recouped its $6 million start up costs and is now making a profit, with monthly circulation at a healthy 785,000. A syndicated spin-off television show, "Omni—The New Frontier" was shown in 68 markets (mostly on ABC affiliate stations) last season. The program may be extended into hour-long specials and children's shows, said Penthouse executive vice-president, David Myerson.

Forum, a digest-size monthly started in 1967 to handle the overflow of letters from *Penthouse*, has had a steady circulation of 620,000. And the harder core, *Variations*, has a steady following of 200,000.

Despite these successes, three other magazines started by Penthouse failed, taking millions with them. After five years and $14 million in losses, Guccione folded *Viva* in 1978. After only a year and reported losses of $1 million each, *Lords*, a men's fashion quarterly started in 1967, and *Photoworld*, published in 1970, folded.

The company was recently embroiled in a $522 million libel suit brought against it by the owners of Rancho La Costa, a California resort that *Penthouse* alleged in a 1975 article to have ties to organized crime. After a five-month trial, which yielded 23,000 pages of testimony and involved 100 witnesses, the magazine was exonerated on all counts by a Compton, Cal., superior court. The verdict was an expensive one for Penthouse, nonetheless, as it cost the company nearly $10 million to defend itself. Penthouse regularly spends nearly $8 million a year to defend and prosecute a host of other lawsuits, according to Mr. Myerson.

Last year, a Wyoming judge awarded Kimberli Jayne Pring $26.5 million (later reduced to $14 million) in damages. Ms. Pring, a former Miss Wyoming claimed she was libeled by a *Penthouse* story about a fictional holder of the same title. The case is on appeal. "An unfavorable judgement in either La Costa or Pring could bring the company down," said a Penthouse insider before the La Costa decision.

While Penthouse is deemed financially healthy, according to a Dun & Bradstreet credit report, new interests are threatening to strain its resources. Two Atlantic City properties bought in 1978 for about $50 million in cash have lain dormant awaiting $100 million in funds from private investors to finish what will be a hotel-casino. "They [Penthouse] are losing the earnings they could have made if they had invested properly," said a Penthouse financial source. Mr. Guccione himself has claimed in the press that the investment is troubling his company. Playboy has said it intends to appeal a decision that would terminate its own relationship with a New Jersey casino.

Penthouse also contributed at least $40 million to California-based INESCO, International Nuclear Systems Organization for research and development into an alternate energy source. The company plans to give INESCO $12 million this year even though it is not expected to produce any revenues for years to come.

What was expected to be a large asset for Penthouse, PET Network, has yet to get off the ground. The cable channel, which was to be a 12-hour, seven-day-a-week tv version of the magazine was billed to start last October. Playboy's "Playboy on Escapade," a similar idea but with monthly programing, started in January, 1982.

Still another draw on company funds is a $30 million film now in pre-production, "Catherine the Great," the second in a trilogy following "Caligula." Penthouse is considering the release of a film, "The Making of Caligula." "It's in a negative cash flow position. It can't sustain those interests," said the financial source.

All of these projects were supposed to be managed by the first reported president the company has ever had, other than Mr. Guccione, Mark Meagher. Mr. Meagher, former president of the Washington Post Co., signed on with Mr. Guccione in April, 1981, and left eight months later, giving weight to the company's reputation as a "revolving door." "I left because I didn't have the freedom to do what I was assured I'd have the freedom to do," says Mr. Meagher. David Myerson, an attorney, who is executive vp and who has had a 10-year relationship with Mr. Guccione has assumed day to day operations.

Frequent staff changes have led to an internally troubled organization. "Everyone lives in mortal fear they will be fired, every minute of the day," said a former editor who asked not to be named. However, several members of the Guccione family remain. Mr. Guccione's father is secretary-treasurer, his sister, Jeri Winston, is a senior vp and his daughter runs the West Coast ad sales office. His eldest son, most recently circulation director, periodically wafts in and out of the company.

Though no site has been selected, Penthouse plans to move from its mid-Manhattan headquarters when the rent doubles at the end of the year.

Petersen Publishing Co.

Petersen Publishing Co., Los Angeles, is the country's 67th largest media company with media property revenues of $120 million, a 9.1% increase over media revenues of $110 million in 1980. Total corporate revenues are not available, although company officials say media operations account for something less than 90% of total revenues. Petersen said last year was the best in its history.

The company's media revenues come primarily from special-interest magazines.

The privately owned company, which has interests in real estate, restaurants and art galleries, as well as media, is seriously considering its first expansion into broadcasting and the new video technologies.

In 1981, Petersen formed a six-member corporate development committee to guide company expansion into broadcasting and the new video technologies. Included on the committee are company president Frederick Waingrow and several Petersen publishers and executives.

So far in 1982, Petersen is pursuing an expansion strategy of adding new titles in subject areas in which it is already entrenched. It is doing this through acquisition and internal development.

In January, Petersen acquired *Pick Up, Van & 4WD* from CBS Publications. The first issue under the Petersen banner was published in April.

In the fall, Petersen is slated to introduce two new monthly special-interest publications—*Petersen's Video World* and *Circle Track.*

Both magazines were conceived as one-shot magazines through Petersen's specialty publications division, but because of strong response the company decided to launch them as monthly publications.

Petersen's Video World is to cover a wide range of subjects within the home video field, including videocassette recorders, videodiscs, cameras, games, personal computers, software and accessories. The first issue is scheduled to have a December cover date, and should be on newsstands Oct. 26.

Circle Track is designed to

appeal to oval-track racers and enthusiasts. Its first issue is to feature an October cover date and be available Sept. 14.

In addition, Petersen plans to increase the number of one-time issues it publishes. New one-shots would include all areas of Petersen interest, plus others.

Mentioned in the past as possible subjects for single issues are audiovisual, home entertainment and home computers. Petersen is also interested in the sports field, particularly baseball, football and hockey, for possible one-time issues.

Petersen's Mr. Waingrow has indicated that the company has received numerous inquiries from public and cable tv operators concerning the possibility of using Petersen-generated material for programing.

While Detroit's troubles triggered a sales slump in 1980 for Petersen's two biggest titles, *Hot Rod* and *Motor Trend*, 1981 was different. Advertising sales for Petersen's auto group increased in 1981.

So far in 1982 Petersen has experienced a 20% increase in total advertising revenues over the strong 1981 figures.

There were several key personnel shifts among Petersen's top management over the past year.

Don Williams, former head of advertising at B.F. Goodrich's tire group, who became publisher of *Motor Trend* in 1981, left the company after only a few months to join Campbell-Ewald, Detroit, on the Chevrolet account. Brian Van Mols, former publisher of CBS Publications' *Cycle World*, succeeded Mr. Williams. Also moving at *Motor Trend* was former executive editor Tony Swan, who became editor. Mr. Swan took the place of John Dianna, who was promoted to publisher of Petersen's *Car Craft*.

Harry Hibler, former *Car Craft* publisher, became publisher of *Hot Rod*.

Dick Van Cleve, former *Hot Rod* publisher, moved to national ad director of Petersen's specialty publications division. Lee Kelley, former editor of *Hot Rod*, became publisher and editorial director of the specialty publications division.

Following the acquisition of *Pick Up, Van & 4WD*, Mike Anson, publisher of *Petersen's 4-Wheel & Off-Road*, was given the additional responsibilities of publisher of the acquired magazine.

Petersen is continuing efforts to build circulation of its automotive titles in 1982 with a sweepstakes in which the grand prize is a DeLorean sports car.

Despite the uncertain future of the U.S. auto industry, Petersen's automotive group is considered by some to be in a strong position if Detroit shifts from a mass-marketing strategy to a more targeted one. Some experts expect the U.S. auto makers to place more emphasis on wooing the hard-core auto enthusiast through special-interest media in the future.

Magazines

Car Craft, Guns & Ammo, Hot Rod, Lakeland Boating, Motor Trend, Motorcyclist, Petersen's 4-Wheel & Off-Road, Petersen's Hunting, Petersen's Photographic, Pick Up, Van & 4WD (effective January, 1982), *Rudder, Sea & Pacific Skipper, Skin Diver, Teen.*

Pittway Corp.

Pittway Corp., Northbrook, Ill., is the country's 80th largest media company, with 1981 media property revenues of $86.3 million, all from the company's Penton/IPC subsidiary, headquartered in Cleveland.

Media accounted for 75.9% of Penton/IPC's total revenues of $113.7 million. The remainder comes from graphic services (5.2%), marketing and editorial services (18.9%).

Penton/IPC's revenues accounted for 28% of publicly owned Pittway's total revenues of $403.6 million in 1981. The subsidiary published 27 trade magazines in 1981.

Last year was the best ever for Penton/IPC, said Thomas L. Dempsey, Penton/IPC chairman and ceo and Pittway vp. "Twenty-six of our 27 magazines were up in advertising dollars and 25 were up in profits," he said. Mr. Dempsey's figures do not include the company's new *Computer-Aided Engineering*, which was launched last fall.

Mr. Dempsey added, "When business is off, companies must advertise to compete more effectively. Most of our magazines are the leaders in their fields. When advertising dollars are tight, most people will concentrate on the No. 1 publication."

Nineteen magazines recorded gains in ad pages and ad revenues in 1981. The best performers were *Used Equipment Directory, Machine Design, Material Handling Engineer, Progressive Architecture, Heating/Piping/Air Conditioning, Industry Week* and *Precision Metal.*

Advertising dollars continued up in the first quarter this year, but total ad pages were down by about 1%, Mr. Dempsey said. He said he sensed a further softening in ad pages for the rest of the year. "When the squeeze gets too tight, it affects everyone," he said.

In spite of slightly fewer ad pages, Penton/IPC anticipates a strong year in 1982, with the help of the new Computer-Aided Engineering, which began regular bimonthly publication in February, 1982.

"We expect an excellent year," Mr. Dempsey said. "But the economy is too mixed to predict specific results."

Playboy Enterprises

Playboy Enterprises, Chicago, is the 53rd largest U.S. media company, with media property revenues of $156 million in fiscal 1981, ended last June 30. This amounted to 41% of total revenues of $388.9 million. Nonmedia revenues came from gaming, clubs and hotels and other businesses. Total profits for the year were $14.34 million.

Media revenues for the 1980 fiscal year were $162 million out of total corporate revenues of $363.2 million.

Playboy is in a tumultuous period of transition. Once a "leisure time" company built around a successful magazine, in recent months it has been stripped of virtually all interests but that magazine.

Denied the revenues from its United Kingdom gaming operations (sold in November following a long licensing battle) and its application for licensing of its Atlantic City hotel and casino (though it is appealing this ruling) and currently divesting itself of a number of unprofitable properties (such as several resorts and its book division), Playboy is reshaping itself as a communications company.

Also gone from the company is former president and chief operating officer Derick J. Daniels, who a few months ago turned over the reins to chairman Hugh Hefner's 29-year old daughter, Christie. With the company in various capacities for seven years, most recently as corporate vp, Ms. Hefner is now president. Appointed to a newly created office of the president along with Ms. Hefner were executive vps Marvin Huston and Richard Rosensweig.

Now heavily dependent for cash on *Playboy* magazine, the company is expected in fiscal 1982 to report its first loss since 1962.

Earnings for the magazine division fell more than 50% in fiscal 1981 to $6.02 million, from $14.74 million in 1980. The company attributed the decline to $4 million in losses from *Games*, a decline in *Playboy's* newsstand sales, thanks to a lack of sell out covers, and losses from *Oui*, which was sold for a reported $2 million just before the end of the fiscal year.

The company has projected a 20% increase in earnings for the magazine division in fiscal 1982, which ends June 30.

In its new form, Playboy is focusing its attention on expanding its publishing base and pursuing the video industry with a stable, if mature, Playboy magazine as the core. On the lookout for acquisitions, magazine division group vp Nat Lehrman said he is interested in small "life style" magazines with loyal followings which could benefit from Playboy's distribution strengths and financial resources.

Mr. Lehrman pointed to *Games* as an example of the type of property he is interested in. *Games*, which had a circulation of 200,000 when it was acquired in 1978, now has newsstand distribution of 675,000. It will go from every other month to monthly in September, and is expected to become profitable in 1983.

The division also continues to experiment with the *Playboy Guides*, one-shot magazines with expanded coverage of topics of interest to *Playboy* magazine. Thus far the *Guides* have met with mixed success, but the company believes they are a good way of exploring publishing opportunities without heavy upfront investment.

Mr. Hefner's personal interest in the publishing business, as opposed to his relative lack of interest in nonpublishing ventures, is expected to help the magazine division.

In the video area, Playboy is an equal partner with Rainbow Programing Services Co. in an adult programing service called Escapade, slated to become the Playboy Channel when Playboy-produced material exceeds 50%.

The company so far has produced four one-hour video versions of *Playboy* magazine, complete with interviews, movie and music reviews and Playmate segments. It is planning to produce four hours of programing a month by the end of the year.

While even Hugh Hefner is said to be disappointed to date with the company's efforts to transfer the quality of *Playboy* magazine to the screen, Escapade, according to the newsletter, "Cable TV Programming," has an edge over competing adult-oriented cable ventures. Escapade has more than 200,000 subscribers, compared to 125,000 for Private Screenings and 100,000 for Eros.

Playboy also has an agreement with ON TV, through which the subscription television service will distribute one hour of Playboy programing a month beginning this month.

Post Corp.

Post Corp., Appleton, Wis., is the country's 88th largest media company, with revenues of $73.2 million in 1981 from its media properties. The company's commercial printing operation, which was its brightest performer in 1981 and in the first two quarters of 1982, accounted for an additional $9.98 million, bringing total corporate revenues to $83.2 million.

Revenues for the company were up slightly compared with 1980, but earnings in the first quarter of 1982 are below earnings in the first period of 1981. V.I. Minahan, president of the publicly held company, attributes the tough going to the sluggish economy.

In 1981, the broadcast division had a particularly difficult struggle as advertising revenues fell. Although the company doesn't break out revenues from each of the divisions, Mr. Minahan characterized the broadcasting division results as "sharply lower" than in 1980.

Selling of a 12-paper suburban newspaper chain outside Milwaukee in May, 1981, and the settlement of a 10-month strike at Transcript Newspapers in suburban Boston helped the earnings of the publishing division. The *Post-Crescent* of Appleton, Wis., was the lead performer in Post's stable of newspapers.

There was relatively little action in terms of acquisitions during the past year. As Mr. Minahan said, "we've adopted a wait and see attitude until something moves in the economy." Post Corp. has been cautious because of small profits during the past two years.

In the first quarter of 1982, the newspaper's operating profit dropped 20% below that of first-quarter, 1981, because of poor advertising revenues and stiff competition in a few key markets. Commercial printing played a critical part in maintaining the company's over-all financial health and stability. In the first quarter of 1982, the division posted a 164% increase over last year's first quarter.

The Post Corp. appointed three new general managers of company properties. Thomas L. Gagnon became the general manager at WLUK-TV, Green Bay, Wis; Guy Spitsberg joined WLUC-TV as general manager; and Roy F. Valitchka II was named general manager of the *Twin City News-Record*, Neenah-Menasha, Wis.

Providence Journal Co.

The Providence Journal Co., Providence, R.I., is the nation's 66th largest media company, with estimated 1981 revenues from media operations of $121 million. The remaining operations of the company added $141 million for a total of $262 million.

The privately owned company publishes two daily newspapers and has substantial broadcasting and cable tv interests. Beginning in June, it plans to publish two electronic newspapers.

The combined circulation of the dailies—the morning *Providence Journal* and the *Evening Bulletin*—is 219,440, according to March, 1982, Audit Bureau of Circulations figures. The *Sunday Journal*, one of the oldest Sunday publications in the region, has a circulation of nearly 239,000. The total circulation of the three places them second only to the *Boston Globe* in the New England market.

The three newspapers employ a staff of 125 out of Providence, a Washington bureau and 12 other regional offices. During the last year they have been honored for their national as well as international reporting and have received numerous national and regional awards.

The broadcasting operations of the company are served by Providence Journal Broadcasting, a fully owned subsidiary. The company operates the all-news WEAN-AM as well as the top-40 WPJB-FM in Providence. WEAN employs the largest broadcasting news staff in southern New England and is one of the top-rated news stations in the country. The company also owns WPHL-TV, an independent tv station in Philadelphia that has the broadcast rights to the Philadelphia Phillies baseball games.

The Journal Co. has also established a firm presence in the cable tv field through its ownership of Colony Communications, the 29th-ranked multiple systems operator in the industry. Colony operates 52 franchises in seven states—Rhode Island, Massachusetts, Vermont, New York, Pennsylvania, Florida and California. It has 151,000 basic service subscribers and another 150,000 who subscribe to its pay offerings. Colony also operates a multipoint distribution system—over-the-air pay unit—which transmits Home Box Office programs to more than 21,000 subscribers in Boston, Springfield and Providence.

During the last year, Colony has increased the variety of entertainment and nonentertainment services offered through its systems. The most prominent addition has been "Movietime," a 24-hour, advertiser-supported movie channel that is offered free to cable subscribers in the Providence-New Bedford ADI. "Movietime" is also offered free to other cable operators in the area. The channel currently reaches 40,000 subscribers, reports Roger Turner, Colony's vp and director of operations. He expects nearly 200,000 subscribers to be receiving it by the yearend.

Many of Colony's cable systems produce their own news programs, including several in Spanish and Portuguese. A few have been nominated for and awarded the cable industry's ACE awards.

In the nonentertainment area, the Hialeah franchise has started to offer a security channel, while Play-Cable, a video games channel, is being offered in Beacon, N.Y. Play-Cable is received by nearly 40,000 subscribers.

Colony is making an aggressive attempt to develop additional revenue streams out of its experience with the new communications technologies, reports Mr. Turner. The company has begun to design institutional networks for clients such as IBM, Wang Laboratories and the Woods Hole Oceanographic Institute, including communications and teleconferencing systems.

Beginning in June, Colony Electronic Information Systems, a subsidiary of Colony Communications, will publish two 24-hour electronic newspapers, using the Telidon Videotext technology. The newspapers will be available on Colony cable systems as well as contiguous ones in the Providence-New Bedford area.

The company has also established a new division of broadcast sales to actively pursue cable advertising sales. The division sells local time on advertiser-supported channels such as CNN, ESPN, MTV and USA, as well as some of the locally produced channels, and received more than $1 million in revenues in 1981.

During 1981-82, Colony had a number of significant personnel changes. Donald M. Olson, formerly with Newhouse Broadcasting in Birmingham, Alabama, was appointed director of broadcast sales, while Dave Donnelly became director of Colony Electronic Information Systems. Another appointment was that of Doug Truckenmiller as director of engineering.

Pulitzer Publishing Co.

Pulitzer Publishing Co., St. Louis, is the country's 40th largest media company, with 1981 revenues estimated by AA at $197.4 million, all from media sources. The company is privately owned, with the majority of stock held by the Pulitzer family.

Revenues from Pulitzer's two radio stations, five tv stations and two newspapers reportedly held steady in 1981.

Pulitzer Productions, a fledgling electronic information subsidiary, took a cautious step into video software. "Right now we're just dipping a toe in," a company official said.

The *St. Louis Post-Dispatch*, Pulitzer's largest revenue producer, is still the company centerpiece and seems destined to remain so, although it has been hurt financially by labor troubles and stiff competition from a thriving suburban press.

It leaped one of these hurdles in 1981 when the paper moved last fall to get its unions to sign 42-month contracts agreeing to an 18-month wage freeze followed by incremental raises for the remainder of the contract period.

In addition, it won a long-running battle with unions over mailroom staffing. As a result of the concessions gained and the need to compete more effectively with Suburban Newspapers of Greater St. Louis, a powerful free-weekly publisher that blankets most of the market, the *Post-Dispatch* recently rolled out the first phase of a blanket-coverage program that drops advertising supplements on 486,000 doorsteps on the Missouri side of the Mississippi River every Tuesday. Officials expect to distribute up to 600,000 supplements weekly on both sides of the river by yearend.

The supplement, called "Wednesday Bargain," is delivered with the *Globe-Democrat* to that paper's subscribers and separately to nonsubscribers. Currently, the *Post-Dispatch* offers 12 separate market segments to advertisers and plans to offer 40 to 50. A broadsheet usually carrying 16 pages and containing seven inserts, the supplement "has been a success, although marginally profitable," said Nicholas Penniman, Pulitzer assistant general manager.

The paper leaned hard on its unions to get the favorable settlements, but company officials claim the wage freeze and other cost-cutting measures have begun to put the paper on a more solid footing. Industry observers generally agree that the paper is in better health than it was a year ago.

Mr. Penniman called the guarantee of labor peace through early 1985 "an enormous benefit for a paper with the history of labor problems we've had." Strikes closed the paper for several weeks in 1973 and 1978-1979, resulting both times in substantial losses of circulation and advertising.

After the 1979 strike, the afternoon *Post-Dispatch* and morning *Globe-Democrat*, owned by Newhouse Newspapers, merged business functions. Editorial departments continue to operate separately, with the editorial pages often espousing opposite political views.

Pulitzer controls the operating agency and handles accounting, circulation and advertising for both papers. It also owns the presses on which the papers are printed. Advertising for the two papers often is sold in combination, and the papers split profits and losses equally.

The biggest problem facing the *Post-Dispatch*, as well as the *Globe-Democrat*, still festers: St. Louis' weak economy. "Our want ad index indicates the depth of the problem," Mr. Penniman said. At last count, he said, it was down to half of what it was in 1967, the steepest falloff outside Detroit.

In response to the economic problems in its home base, Pulitzer is trying to balance its St. Louis newspaper holdings with media properties in more prosperous locales. Several years ago, it swapped its St. Louis radio station for an am-fm combination in Phoenix.

Now it's trying to swap its St. Louis tv station for a couple of Sunbelt stations. Pending Federal Communications Commission approval, Pulitzer will trade KSDK-TV to Multimedia Inc. for WFBC-TV in Greenville, S.C., WXII in Winston-Salem, N.C. and $8.5 million in cash. Pulitzer would then own six tv stations and would have to divest one under current FCC rules.

The company's entry into video technology remains quite tentative. Pulitzer Productions is making the *Post-Dispatch's* classified ads available to subscribers with home computers, but demand so far is light.

In a joint venture, a Pulitzer Productions subsidiary and multifaceted Indian Head Inc., New York, acquired Washington-based States News Service, which produces stories from the capital for client newspapers, currently about 70 in 16 states. The *Post-Dispatch* is essentially the news arm of States News Service while Indian Head provides the technical expertise.

"We're not going to leap far beyond our traditional lines of business, but this is a logical evolutionary extension of the kind of thing we already do," Mr. Penniman said.

RCA Corp.

RCA Corp., New York, is the third largest media company, with media revenues of $1.62 billion in 1981—all from National Broadcasting Co.—out of total revenues of $8.004 billion. In 1980, RCA had media revenues of $1.52 billion and total revenues of $8.011 billion.

In the last year, there has been speculation that RCA isn't in the broadcasting businesss to stay, but Thornton Bradshaw, RCA chairman, assured NBC-TV affiliates at their annual convention in Los Angeles in May that NBC is "not for sale." Besides its tv network and owned-tv stations, NBC owns two radio networks and several radio outlets.

Speculation about RCA's possible move out of broadcasting has been fueled partly by the company's profit woes. Net income plummeted 83% last year to $54 million from $315.3 million. National Broadcasting Co.'s profits fell 36%. The NBC decline was blamed on write-offs of shows and made-for-tv movies from the Fred Silverman era, lower prices due to sluggish ratings, chiefly in prime time and daytime, and higher program production costs. In addition, news division expenditures were higher than usual because of coverage of the hostages' return from Iran, the attempted assassinations of President Reagan and the Pope and other unexpected events. The royal wedding in England was another costly event to cover, although one that posted higher ratings for NBC than for its rivals, NBC claimed.

Mr. Bradshaw told shareholders earlier this year that broadcasting was one of three company businesses suffering "major declines" in profits last year, along with picture tube production and transportation services. Despite the earnings slump, Mr. Bradshaw said that not only is NBC not on the block, but "I don't know how RCA could get on without NBC, or vice versa," as the parent sets out to become "the lead company in communications, entertainment and electronics" within the next few years. RCA, he added, plans to reach that goal by "staying on the main road" and avoiding "side roads," the latter referring to such diversifications as Hertz Corp. and Coronet Carpet Co., both of which Mr. Bradshaw now plans to "get rid of."

Past RCA management failed

to recognize that "RCA's future is right in our own backyard, the electronics, entertainment and communications business," he added.

Grant Tinker, NBC chairman, said that sports, news, late night, early morning and as of this past season Saturday morning children's fare are "not part of the problem," since "in all those areas, we are solid and competitive." NBC-TV's third-place prime time and daytime offerings, on the other hand, are not only "not competitive" but "just plain dismal."

Robert Mulholland, NBC president, added that NBC has "a long way to rebuild" in both of these time periods. Part of the network's problem has been the past policy of "jerking around the schedule," so Mr. Tinker promised affiliates and, indirectly, sponsors, "a stability of schedule" not seen at NBC for many years. Network president Raymond Timothy and NBC entertainment chief Brandon Tartikoff emphasized the small amount of time shifting there will be among series returning this September.

This stability also is meant to appeal to the creative community, since Mr. Tinker wants the best talent available. Toward that end, he already has expressed interest in any new series concepts from the creators of the series,"Taxi," canceled by ABC and picked up by NBC, and of the "Lou Grant" CBS series.

While describing NBC's report card as "not all straight A's" and the 1981-82 prime time season "less than dazzling," Mr. Timothy saw encouraging signs, including the fact that NBC finished second in the prime time Nielsens for Monday through Thursday, edging CBS (which then went on to clobber NBC the remaining nights). For the 28-week season ended April 18, NBC averaged a 15.2 homes rating versus frontrunner CBS' 19 and No. 2 ABC's 18.1.

With regular series as its "backbone," NBC also plans a steady, virtually once-monthly diet of miniseries in 1982-83, with Mr. Tartikoff having penciled in "Little Gloria" for October, "The Executioner's Song" for November, the repeat of "Shogun" for January (leading into the February sweeps, instead of into the fall season, as initially planned) and "Princess Daisy" for the May sweeps.

NBC's most popular program last season, "Real People," ranked 22nd with a 19.7 rating and 30 audience share, followed by longtime NBC leader "Little House on the Prairie" at 24th; "Little House" drew top dollar last fall on NBC, $135,000 for a 30-second spot, followed by "CHiPs" and "Diff'rent Strokes." The other big NBC prime-time hits in the just-ended season were "Facts of Life," the NBC Monday movie, "Strokes" and the freshman "Love, Sidney," all within the top 40. NBC's most popular newcomer, "Maverick," was not renewed because it was deemed too male-oriented, NBC said.

In daytime too, NBC faces quite an uphill battle to catch No. 2 CBS. "Days of Our Lives" remains NBC's top-rated show, now that "Search for Tomorrow" has lost some of its momentum since Procter & Gamble switched it to NBC from CBS earlier this year. Come fall, NBC will bank on "Fantasy," an escapist game show hosted by Peter ("Hollywood Squares") Marshall, bridging the 3 to 4 p.m. (ET) gap between the end of the network afternoon block and local stations' newscasts.

In evening news, NBC is closer to CBS than it has been in five years, according to Mr. Timothy, with the Tom Brokaw/Roger Mudd co-anchor team improving on John Chancellor's scores as CBS' Dan Rather dips. The network president hopes to keep that momentum going through the summer, aided by an 11-week promotional push, using $35 million in network air time in all dayparts as of June 1. That will be followed by another local/national news push in March/April.

The network's prime-time promotional surge, using the theme "Just Watch Us Now," will begin July 15, with NBC offering greater than ever localization of the national theme for affiliates.

Also in news, NBC News boss Reuven Frank indicated "a willingness to experiment" in both use of technology and show scheduling, since "our audience is changing." On July 5, NBC will begin "Early Today" as a lead-in to "Today" (with stations able to carry it either at 6 a.m. or, preferably, 6:30 a.m.), "NBC News Overnight" at 1:30 a.m., and also Affiliate News Service (or A-News) as a news capsule feed five days weekly starting in September (and seven days eventually). All this activity should make NBC more competitive vis a vis Cable News Network and CNN2, industry sources said. However, to help defray the costs involved in providing A-News, NBC is taking an additional 30-second spot in each evening newscast starting in September, something which the affiliates only grudgingly approved.

The network, moreover, has been notching gains among young adult viewers for "Today," "Tonight," daytime shows and "SportsWorld," which NBC described as the fastest-growing sports anthology. While "Today" is down slightly from a year ago, it still is attracting the second largest number of homes in its history, Mr. Timothy added.

NBC boasted that the local newscasts of its owned stations score highly with viewers with annual incomes of $30,000 and up. The tv stations division posted record sales and profits last year.

The company reported that its eight owned radio outlets scored ratings gains; in New York alone, WNBC (am) and WYNY (fm) are high on the ratings lists, quite a turnaround from their cellar-dwelling days of just a couple of years ago. The 369-affiliate NBC Radio Network outdelivered its competitors in listeners, NBC continued, and The Source, its young adult net, is scoring well among 18 to 34 year olds via 183 affiliates.

Like ABC and CBS, RCA and NBC are exploring the new technologies, with parent RCA most actively involved at present.

Mr. Tinker indicated that, as a matter of priorities, he is more interested in putting NBC-TV back on track than in being diverted by catv and home video ventures.

Reader's Digest Assn.

Reader's Digest Assn., Pleasantville, N.Y., is the country's 27th largest media company, with 1981 media property revenues estimated by ADVERTISING AGE at $300 million, or 25% of estimated total revenues of $1.2 billion. U.S. media revenues came from the U.S. edition of *Reader's Digest* and from the company's short-lived *Families* magazine.

RDA also derives revenues from foreign editions of the *Digest*, book publishing and mail order sales of records and other products.

The company, whose voting stock is controlled entirely by Lila Wallace, widow of founder DeWitt Wallace, had estimated media revenues of $270 million in 1980 out of total estimated revenues of $1.1 billion.

In its sole media business of magazine publishing, RDA once again finds itself with only one product, the *Reader's Digest*, started by Mr. Wallace and his wife in a Greenwich Village basement in 1922. *Families*, the company's first new magazine, started as a monthly amid high hopes and enthusiasm last October. It was called by RDA officials the most-tested new magazine the industry had seen and was considered by company insiders as well as many outsiders to have very little chance of failing.

But after running an average of 53 pages of advertising for the first three issues, Families managed only 14 pages of advertising in the January, 1982, issue, giving stunned RDA officials the first solid indication that the new magazine wasn't a sure winner after all. Advertising rebounded from January, and the February through May issues averaged 35 pages of ads, well down from the late 1981 showing and below expectations.

The greatest problem, however, was attracting readers. The magazine consistently fell short of its guaranteed circulation of 600,000, with single-copy sales, a key early barometer of the magazine's chances, running at half of RDA projections. The poor readership reflected, in the view of some industry followers, *Families*' too-broad target audience and the resulting wide range in editorial matter. In any case, RDA pulled the plug on *Families* with this month's edition.

The experiment with applying the old *Digest* formula—called a "fail safe formula for success" by Richard McLoughlin, publisher of both the *Digest* and *Families*, —cost the company about $15 million, industry sources believe. The failure also helped raise anew doubts about RDA's ability to publish a successful magazine other than the *Digest*, which remains something of an anomaly in an industry where many general-interest magazines give way to specialized magazines with narrower target audiences.

Company followers had speculated that the post-Wallace era (Mr. Wallace died at the age of 91 in April, 1981) at RDA would be characterized by greater willingness to launch new publications. Mr. McLoughlin said last year that the company had a number of new magazines in addition to *Families* under consideration. Now, however, shaken by its *Families* experience, RDA will become even more cautious on expansion, some observers believe. RDA officials have refused to discuss *Families* or their current thoughts on new publications.

The *Digest* itself appears to have peaked in U.S. circulation. Though a company official in 1980 predicted circulation would average 18.5 million copies a month in 1981, circulation is averaging about 17.9 million a month, according to Audit Bureau of Circulations figures for the second half of 1981. Advertising pages in the *Digest* rose 3.5% to 1,271 last year, but thanks to a 9% increase in rates, total ad revenues rose 13% to $112.9 million, placing the *Digest* seventh among all magazines in ad revenues, according to the Publishers Information Bureau.

Through May of this year, the *Digest's* ad pages were down 8.6% to 418.

Last month, RDA named Lynn C. Mapes ad sales manager of the *Digest*, replacing James T. Sheridan, who is taking early retirement as ad sales director July 1. Mr. Mapes had been ad sales director of *Families*.

How much growth the magazine can continue to derive from ad rate increases is debatable, according to some industry analysts. The *Digest's* current rate of $97,700 for a four-color page is already the highest in the industry, and there is speculation that some advertisers might balk at *Digest* attempts to break the $100,000 barrier for an ad page.

RDA recently has made some minor moves into other media forms. With Telecom Entertainment, production arm of Benton & Bowles, it has agreed to produce "The *Reader's Digest* Do-It-Yourself" show for the USA Cable Network. In late 1980, RDA acquired 51% of The Source, a computer software company that transmits information by telephone lines to home computer owners. In the middle of last year, the company also formed Syndicated Newspaper Services to syndicate newspaper features based on *Digest* material.

Earlier this year, the company made news in court when the Supreme Court refused to review lower court findings that the *Digest* had broken a 1971 agreement with the Federal Trade Commission not to use simulations of checks or other items of value in sweepstakes promotions. The Supreme Court's refusal to consider the case means that the company must pay a $1.75 million fine assessed by a U.S. District Court. The fine reportedly is the largest ever assessed stemming from an FTC civil action.

Rogers UA Cablesystems

Rogers UA Cablesystems, Westport, Conn., is the nation's 85th largest media company, with 1981 revenues of $77.8 million and operating profit of $26.7 million, all in cable operations, compared with revenues of $54.9 million and operating profit of $14.3 million in 1980. With 569,000 pay subscribers, Rogers-UA ranks as the ninth largest multiple systems operator in the U.S.

Alan Elliott

(213) 506-1988 CA Residents **(800) 423-2323**

Rogers UA, formerly UA-Columbia Cablevision, was acquired Nov. 19 by a joint venture of Rogers Cablesystems of Toronto (51%) and United Artist Theater Circuit (UATC), the latter buying 49%. Rogers Cablesystems had total revenues of $109.6 million in 1981. Revenues from Rogers UA-Columbia were not absorbed into Rogers Cablesystems because the U.S. company closed its fiscal year before its purchase.

The Rogers and UA-Columbia merger followed a bitter battle in which UATC (UA Columbia's largest shareholder—27.6%) fought repeated takeover attempts by a group led by Dow Jones & Co. and the Knight-Ridder Newspapers. Initially, UA-Columbia had approved a Dow Jones-Knight Ridder $265 million offer to purchase all of the company's stock at $85 a share. In June, however, the offer was terminated and replaced by another merger agreement with a joint venture of UATC and Rogers Cablesystems. UATC contributed another $63 million to bring its holdings in the company to 49%. Rogers paid a total of $152 million for its stake of 51%. The price paid for all outstanding stock was $90 per share.

Before its acquisition, UA-Columbia was a leading cable program supplier. Its USA Network, a joint venture with Madison Square Garden Production, broadcast more than 400 sports events as well as "Calliope," an offering of children's programs, and the "English Channel," a potpourri of British programing. USA Network was available on more than 1,400 cable systems serving 8 million cable subscribers. On Aug. 27, 1981, UA-Columbia entered into an agreement with Time Inc. to sell its joint venture interest for $15 million.

UA-Columbia, at the time of its purchase, also was preparing to spend $5 million to $7 million over the next five years to upgrade all its systems to accommodate at least 35 channels.

The UA-Columbia acquisition comes at an appropriate time for the Canadian parent, Rogers Cablesystems. Even though it is the largest mso in Canada, with 1.4 million basic subscribers, its growth in that country has slowed. Cable in Canada has reached a saturation point, and the potential for rapid subscriber or revenue growth is considered minimal. "The potential revenue per subscriber in the U.S. is far higher than in Canada," explains Bob Francis, senior vp-finance with Rogers. The company has no pay tv license in Canada, which has just opened up to pay tv. Rogers, in fact, lost out in its bid to win the first pay tv license when the Canadian Radio-television and Telecommunications Commission (CRTC) awarded the license to another Canadian company, appropriately named First Choice Canadian.

Rogers, initially known as Canadian Cablesystems, had been active stateside before its purchase of UA-Columbia. Its name was changed when trade relations between the U.S. and Canada began to sour in the later 1970s, adversely affecting the company's hunt for franchises stateside. Another Canadian mso, Maclean-Hunter Cable TV, has faced similar hostility in the U.S. The name change has quelled some of the unfavorable gut reaction attracted by its Canadian base.

The past few years have seen successful franchise expansion on the part of the Canadian parent. In 1979, it acquired a 50% interest in three unbuilt franchises (105,000 households in Southern California). In October, 1980, a partnership in which Rogers had a 50% share was named the winner of the 126,000 home Portland, Ore., franchise. Recently, another partnership with 75% Rogers interest won the 60,000 household, southwest suburbs of Minneapolis.

The company has also bid successfully for a 12,000 household franchise in Orange County. In June, 1981, a subsidiary of Rogers, US Cablesystems, was designated as the successful franchisee in a six-county Southern California franchise. The six cities are contiguous and contain 90,000 households.

The Canadian operation has a wholly owned engineering subsidiary, Cablesystems Engineering, which, among other things, engages in basic research and development on behalf of the company and the cable industry. Another company, Cableshare Ltd., in which Rogers has a 50% interest, provides cable-related data-processing service to Rogers and others.

Rogers Cablesystems also operates several operations peripheral to cable. It provides closed circuit pay tv to approximately 13,500 hotel rooms in Toronto and 1,450 hotel rooms in Vancouver. It also has an ownership interest in a number of noncable pay tv systems in the western U.S.

Graham Savage, vp/investment planning, expects Rogers-UA Cablesystems' revenues to exceed $125 million in 1982. Of this the UA-Columbia systems is expected to have contributed $100 million and the Rogers' U.S. systems another $25 million. The $25 million revenue estimate for the Rogers' cable franchises represents a sharp increase over the revenues from that same segment in 1981 of $10 million. "The reason is that we were still building systems in 1981 and they were not contributing to revenues," says Mr. Savage. Many of the systems under construction are expected to come on line in 1982.

Rollins Inc.

Rollins Inc. of Atlanta, whose primary business is in termite and pest control and oil and gas servicing, is the nation's 95th largest media company with operating revenues in 1981 of $62.1 million derived from outdoor advertising, tv, radio and cable.

Total operating revenues of the publicly held, family-controlled company were $455 million. Net income was $44.4 million. Although Rollins' media group represents only 13.7% of total operating revenues, it generates 24% of the corporation's operating income. Media also has the highest profit margin at 29% of Rollins' business segments.

Growth in catv contributed largely to the media segments' own growth in revenues of 13.4% from $55 million in 1980 and the division's increase of 13% in operating income.

Until 1981 Rollins cable activities had been concentrated in Connecticut and in Delaware where the Rollins CableVision system in Wilmington ranked 17th largest in the nation with 61,237 subscribers serviced, according to the National Cable Television Assn.'s October, 1981, statistics.

But during 1981 and early 1982, Rollins won franchises in the smaller cities of Northeast Massachusetts, and in the border region of Southeast Massachusetts and Rhode Island. Under construction in Massachusetts are cable operations in Andover, Dracut, Franklin, Plainville Somerset and Swansea.

In Rhode Island construction is under way at Central Falls, Cumberland, Lincoln, North Smithfield, Smithfield and Woonsocket.

Construction has yet to begin on contracts awarded by city governments in Danvers, Millis, North Reading and Norton in Massachusetts, and in Narragansett, North Kingstown and South Kingstown in Rhode Island.

As these systems mature in Rhode Island/Southeast Massachusetts corridor and in northeast Massachusetts, another 110,000 homes passed will be added to Rollins' 170,000 homes passed in its more mature Delaware and Connecticut markets, says H. Tim Crow, vp-secretary.

The *modus operandi* at Rollins is to solicit franchises in small contiguous markets. This economizes in systems construction because only one head-in is needed per market cluster. Smaller markets also have "more reasonable entry requirements" than the larger cities, says Mr. Crow.

Rollins, unlike many cable operators, has steered clear of joint ventures which often are marriages of necessity, putting expertise with capital. "As a company, our growth philosophy has been to strike a balance between cash users and generators," says Mr. Crow. This philosophy, however, does not rule out any joint ventures that market conditions might require in the future, he said.

However, small markets can be as thorough in their disclosure demands as their larger counterparts. Last year, Rollins came under scrutiny when a local lawyer attempted to bribe a Danvers city official to vote for the Rollins franchise package. The lawyer and a local car dealer

Where are they now?
(Or, is there life after CBS and NBC?)

were subsequently convicted in a trial late last year in a Boston federal court. Rollins has maintained its innocence all along, claiming the attorney operated independently of company designs. The company had hired a broadcast consultant to represent it in the Danvers bidding, but the broadcast consultant had procured the services of a cable consultant who then hired the lawyer.

"The people of Danvers know us better than that," says Mr. Crow, noting that even with the "bad publicity" accompanying the trial, the Danvers city leaders voted unanimously (in late April, 1982) for the Rollins package. North Reading and Millis, other Massachusetts cities, also gave the nod to Rollins when the case was still fresh in the public mind.

The Danvers package is typical of Rollins services: 52-channel capability, including four cultural channels, three family-oriented channels, distant signal capabilities to bring in independent stations from New York City and Atlanta, three sports channels, five movie services, 12 information channels and 15 local channels. One unusual offering in the package is a channel from Canada for the large number of French-speaking residents who have moved to the area from Quebec.

Cable, because of its rapid growth, is quickly pressing other media groups within the Rollins Media division for leading revenue segment honors. However, outdoor advertising remains the leader in media group revenues.

Plants are located in Delmarva Peninsula area of Delaware and Maryland, Philadelphia, Washington, Wilmington, Del., Austin, Corpus Christi, Laredo, San Antonio and Victoria, all in Texas. The television group, composed of three vhf stations in major markets, is Rollins' next breadwinner.

Cable holds down the third rung in media revenues followed by radio, with five am stations and one fm station.

A number of Rollins' radio stations underwent format changes in 1981. WAMS (am), Wilmington, changed from top 40 to country; and WCHS (am), Santa Monica/Los Angeles, fine-tuned its programing to reach a more upscale audience. "Our philosophy is to meet the single greatest unmet need in each of our radio markets, and that need is in constant change," says Mr. Crow, justifying the modifications.

Sammons Communications

Sammons Communications, Dallas, is the nation's 98th largest media company, with 1981 revenues of $59.9 million. The company is a fully owned subsidiary of the privately owned Sammons Enterprise.

Virtually all of Sammons revenues are generated by income from cable system ownership. However, the company also operates Sammons Information Service, to sell Dow Jones' information service to cable subscribers, and Sammons Productions, for the creation of programing for pay-per-view cable.

Sammons is the nation's 13th-largest multiple systems operator and operates 54 cable systems in 21 states. With 462,022 basic subscribers out of 647,823 homes passed, it has the highest basic penetration—71.3%—of any cable company in the country. The majority of Sammons systems, however, are 12 channels and in urgent need of technological upgrading. The company also has 240,475 pay subscribers.

Last year, a joint venture of Sammons (60%) and 14 local investors (40%) was awarded the 160,000 home Fort Worth franchise. The 15-year contract for Fort Worth could be worth $500 million.

Winning Fort Worth wasn't easy. Sammons had to compete against six other applicants and fight off charges of its "rent-a-citizen" strategy. Competitors and critics charged that the company had recruited some of Fort Worth's most powerful citizens, white and black, for leverage in the franchise contest. None of the local partners had any expertise to offer in the field of cable tv, nor did they make any financial investments, claimed the critics.

The system will cost more than $50 million to build and will not become profitable until the sixth year of its operation. It will consist of 61 channels, of which seven will be reserved for institutional use.

The Fort Worth victory was a welcome one for Sammons, a company that has few major urban franchises to its credit. "We have had to pull our horns in," explained Jim Polk, vp-marketing. "Franchising has gone out of control and the returns are just not enough to be really attractive for us."

But Tony Hoffman, a media analyst at Warburg Pribas Becker, had a different explanation. "Sammons Communications is part of a company that doesn't see cable as anything but another source of revenue," he said. "They have been unsuccessful at winning franchises because their bids have been unrealistic. They are looking at high rates of return and are offering fewer services than their competitors."

Undoubtedly, the company has a rather conservative and stodgy image in the cable industry—an image that has prevented it from being innovative or aggressive. Nonetheless, Mr. Polk contended, the company is making strides in the development of software.

Through Sammons Information Service it currently offers the Dow Jones Information Service to a few of its system subscribers. If the response is encouraging, it will begin offering the service on more systems and add other information sources as well.

Sammons Productions plans to continue to develop and produce programing for pay-per view, one of cable's major directions in the next decade. Currently, the programing includes special sports events, concerts and dramatic productions. It will gradually be expanded to include other premium events, said Mr. Polk.

Amidst the mad scramble for franchising and the high costs of construction, Sammons is not abandoning the idea of expansion, said Bill Strange, vp-corporate development. It will continue to expand through acquisition rather than new construction. Recently, Sammons acquired the Morristown, N.J., system—a 12-channel operation that has 7,431 subscribers.

Schurz Communications

Schurz Communications, South Bend, Ind., is the nation's 97th largest media company, with 1981 revenues estimated by Advertising Age at $60 million, all from media. Schurz estimated 1980 revenues at $52 million.

Schurz listens to merger opportunities "that come our way," said Franklin D. Schurz Jr., chairman. Offers to buy out Schurz come along every few months but Schurz hasn't been interested, preferring to remain independent and grow internally, he said.

Nor is Schurz interested in becoming publicly owned. Mr. Schurz noted the company has a management and employe stock option plan.

"We're fairly happy with our current mix of newspapers, radio and tv and we have no shifts in mind," Mr. Schurz said. But profits in the recession haven't been up to expectations, he said, adding that electronic media have shown more strength than print. Revenues are running ahead of last year but "inflation might be a factor there," Mr. Schurz said.

There have been job freezes at some operations and others have been trimmed through attrition.

Jack McGann was promoted to become editor and publisher of the flagship *South Bend Tribune*. He had been vp and general manager.

An expansion of the mailroom and press facilities at the *Bloomington* (Ind.) *Herald-Telephone* and *Bloomington Herald Times* neared completion. Also, the transfer of WAGT-TV operations from the outskirts of Augusta, Ga., into the city was completed.

Schurz is still studying electronic information systems in tandem with the newspapers but that and other expansions hinge on economy, Mr. Schurz said. "We had thought the economy would have turned around by now. Now, our forecasts are cautious or conservative," he said.

E.W. Scripps Co.

E.W. Scripps Co., Cincinnati, is the 18th largest U.S. media company, with media property revenues of $500 million in 1981, 91% of total revenues. Media revenues rose 5% from $475 million estimated by Advertising Age for 1980. Total revenues for 1981 and 1980, respectively, were $550 million and $525 million.

The privately held company is owned largely by the Scripps family trust. It has some 40 subsidiaries, including Scripps-Howard newspapers.

In addition to daily newspapers, the company has among its holdings community weekly newspapers, area business publications and Media Enterprises feature services.

The company also owns 75% of Scripps-Howard Broadcasting Co., a publicly held company in Cincinnati. *(See separate listing.)*

The biggest news for Scripps this year is the sale of its UPI wire service to a newly formed company, Media News Corp. UPI, the nation's second largest wire service, was owned 95% by Scripps and 5% by Hearst Corp.

Talk of selling the financially troubled wire service was reported for the last year. Then on June 3 it was announced that UPI had been sold to Media News for an undisclosed sum.

Media News Corp. has interests in cable and subscription television and newspapers. UPI's new owners said they intended to accelerate the news service's changeover to satellite delivery of news reports and improve services to customers.

When only the best will do.

Forum Personnel Inc.

In the last fiscal year, UPI reversed a trend of growing losses, lowering its deficit by 30%. *Editor and Publisher* reported UPI had reduced its operating losses by $3.7 million in 1981 and expected to trim more than an additional $1 million in 1982.

In March, 1982, UPI and Dialcom Inc. of Silver Spring, Md., announced that they were forming a new computerized information service called Newstrack. The service would scan millions of words of copy from the full UPI national and international news files seven days a week, 24 hours a day, for items of interest to each subscriber. At the start, Newstrack would be available only in the Washington area.

Scripps-Howard entered into area business publishing in February, 1980, when it acquired the Cordovan Corp., Houston. At the time, Cordovan had four regional business weeklies and four monthly magazines. It now has 12 business weeklies, including the recently launched *Washington Business Journal*, and its latest acquisition, the Rocky Mountain Business Journal. The 12 weeklies have an approximate circulation of 111,000.

In February Cordovan withdrew 11 of its 12 business journals from the Assn. of Area Business Publications (AABP). According to Dexter Hutchins, editorial director for Cordovan Business Journals, the decision was made because of a rule change requiring all associate members to have circulation figures audited. He said "we don't feel a trade association should dictate the timing of important business decisions. Most of our papers are new and we're in the middle of a change in our accounting system. We're not in a position to set up for an audit." However, Mr. Hutchins said that ultimately all the publications will be audited. Cordovan's oldest publication, the *Houston Business Journal*, has been audited and will remain in the association.

E.W. Scripps has 15 daily newspapers. The five morning papers have a combined average circulation of 750,000 and the 10 evening papers have a combined average circulation of 800,000. The seven Sunday editions put out by the dailies have a combined average circulation of 1.6 million.

Competition between Scripps' *Rocky Mountain News* and Times Mirror's *Denver Post* remains heated. The *Post*, once an afternoon paper that began publishing as an all-day paper last September and recently announced that it will soon be morning only, has a daily circulation of 258,376 and Sunday circulation of 356,372. *News* circulation figures show that it remained ahead of the *Post*—a feat it achieved for the first time in its history last year. Daily circulation at the *News* stands at 312,873, with Sunday circulation at 335,665.

In the nondaily area, the company in early March acquired the *Jupiter* (Fla.) *Journal* from Hammel Newspapers and merged it with its *Jupiter Courier* creating the *Jupiter Courier-Journal*. Published three times a week, the newspaper now has a combined circulation of 16,500. James L. Overton, formerly business manager of Scripps' *Stuart News* in Florida is general manager of the *Courier-Journal*.

TV Watch/DIP, the Atlanta-based affiliate of Scripps' United Media Enterprises, has entered into an agreement with Chattanooga, Tenn.-based Commercial Cable to expand "Shopper's Guide of the Air," a format of local advertising, public service and promotional announcements, to program local advertising on network cut-ins. As a result of this agreement, subscribers will be provided with a combination of local shopping and cable programing information.

OTHER OPERATIONS

Berkley-Small, a circulation supply company; SCW, an advertising art and feature service; Scripps-Howard Supply, a purchasing company; United Media Enterprises, parent of United Features Syndicate and Newspaper Enterprise Assn. news features syndicate (subsidiaries of United Features include TV Data and TV Watch).

Scripps-Howard Broadcasting Co.

Scripps-Howard Broadcasting Co., Cincinnati, is the nation's 79th largest media company with revenues of $87.3 million in 1981, representing a 13.4% increase from 1980. Net income before the cumulative effect of a change in depreciation method increased 6.3% to $17.5 million.

Television broadcasting services contributed 90% of the publicly owned company's revenues in 1981, down from 93% in 1980 and 95% in 1979. A company official explained this trend is the result of the company's growth in other areas, particularly cable.

In the first quarter of 1982, Scripps-Howard had revenues of $20.8 million, up 15.6% from 1981. Net income was $4.4 million.

Inflationary cost increases, endeavors to enhance the quality of programing and services to communities and the costs associated with building its cable television operations were responsible, the company said, for the modest increase in 1981 net income.

Beginning in 1935 with a Cincinnati radio station (no longer part of its operations), Scripps-Howard became a public company in 1963 and is the only public subsidiary of E.W. Scripps Co. (*See separate listing.*) Scripps-Howard Broadcasting Co. is 75% owned by E.W. Scripps Co.

A new am and fm radio station combination, KUPL in Portland, Ore., was acquired by Scripps-Howard from Tracy Broadcasting Co. for $4.8 million in September, 1981. This marked the company's expansion into still another geographical area.

Effective March 31, 1982, Scripps-Howard sold its WNOX station, Knoxville, Tenn., to Mac Sanders, owner of several radio stations, including WJRB, Nashville, Tenn., and WVOK, Birmingham, Ala., for $1.2 million. The company said the sale was made to facilitate the investment of both funds and management into its newly acquired radio markets.

Altogether, the company has six tv stations, four am and four fm radio stations and four cable television systems.

As part of its rapid expansion in cable, the company established a subsidiary, Scripps-Howard Cable Services, Wellesley, Mass., in early 1981.

Scripps-Howard said the most significant event in developing its cable tv operation in 1981 was the award of the cable franchise for an area of 120,000 homes in Fairfield County, Conn., to Cablevision of Connecticut, a partnership in which Scripps-Howard has 49% ownership. The efforts of four competing applicants to appeal the franchise were rejected by the Connecticut Department of Utilities Control. The case is now in the superior court of Connecticut. However, construction of the system is under way and Scripps-Howard expects its first subscribers to be enjoying cable tv by early this summer.

Also during 1981 Scripps-Howard acquired from TOTAL TV of Janesville, Wis., systems with 12,500 subscribers in Lake County, Fla. The company anticipates a total subscriber count of 17,000 from these systems in 1982. Construction in the company cable system in Volusia, Fla., is near completion and construction of a new system in Tulare County, Cal., has begun.

Directly or through companies in which it has holdings, Scripps-Howard Cable now serves approximately 70,000 subscribers. Plans are to continue to examine application and acquisition possibilities in the cable field.

Seattle Times Co.

The Seattle Times Co., is the nation's 68th largest media company, with 1981 revenues estimated by Advertising Age at $118.3 million. All of the company's revenues are generated by two media properties: The *Seattle Times* and the *Walla Walla* (Wash.) *Union-Bulletin*. The company is owned by Seattle's Blethen family (50.5%) and the Knight-Ridder Newspaper chain (49.5%).

Revenues in 1981 are up from total 1980 revenues of about $93.5 million for two reasons: Circulation improved somewhat at the *Seattle Times* (climbing to 261,432 daily and 344,724 Sunday for slight increases of 0.6% and 0.8%, respectively, from September to September Audit Bureau of Circulations reporting periods). In addition, unit prices rose from 20 cents to 25 cents daily and 60 cents to 75 cents on Sundays for the Seattle paper, which accounts for 97% of the company's total revenues.

The Times Co.'s 1982 position is unclear at this moment, pending a decision by the U.S. Attorney General on the company's proposed merger of the all-day *Seattle Times* with that city's other daily, the morning *Seattle Post-Intelligencer*. At presstime, the government's decision was expected "at any moment."

The merger plan was announced early last year, when Hearst Corp., owner of the *Post-Intelligencer* (or *P-I*), declared that the morning paper was in "probable danger of financial failure."

Hearst presented evidence to the Justice Department indicating that over the previous dozen years the *P-I* had lost $14 million, and future projections indicated an even greater rate of loss. Thus, said *Times* and Hearst officials, the papers should be allowed to merge under provisions of the 1970 Newspaper Preservation Act.

Under terms of the agreement, the two papers would combine essentially all operations except editorial functions under the *Seattle Times* banner. The Times Co. would get 6% of the joint operation's profits as a management fee. Of the remaining profits, *Times* would get 60% and the *P-I* 34%.

Strong, vocal opposition to the merger has come from area advertisers (who fear a unified rate structure), other local publishers (suburban and alternative press) and the two papers' staffs, particularly in the noneditorial "back shop" unions that stand to lose positions if the merger takes place.

Perhaps the most significant opposition comes from within the Justice Department, where antitrust chief William Baxter criticized the merger by saying, "It would grant an unnecessary windfall to the applicants, and

impose an unnecessary burden upon newspaper readers and advertisers." He also suggested that the merger is tantamout to "price-fixing."

In addition Justice Department antitrust attorneys filed a 40-page report with U.S. Attorney General William French Smith asserting that the *P-I* is making money, not losing, as Hearst contends.

However, after public hearings were held, administrative law judge Daniel H. Hanscom (who was appointed by Mr. Smith) came to the conclusion that the merger did not violate the provisions of the Newspaper Preservation Act.

At this time much hangs on Mr. Smith's decision. One highly placed source said it is inconceivable that he will not agree to the merger. Still, the longer he takes, the more anxious everyone involved becomes. One *P-I* staff member summed up the situation by saying, "If I had a nickel for every time I've heard, 'We'll get a decision this week,' I'd be rich."

MEDIA OPERATIONS

Newspapers

WASHINGTON: *Seattle Times, Walla Walla Union-Bulletin.*

Southern Progress Corp.

Southern Progress Corp., Birmingham, Ala., is the country's 83th largest media company. Its 1981 media property revenues were estimated by ADVERTISING AGE at $80 million. Total corporate revenues were not available, although corporate officials say revenue contributions of other properties are minimal compared to media.

The company's two major breadwinners are the *Progressive Farmer*, a monthly magazine published since 1886 and the leading farm publication in 16 southern states from Texas to the Carolinas; and *Southern Living*, a slick monthly that offers readers a melange of recipes, travel notes, home decorating tips, gardening advice and profiles of southern cities and towns.

Southern Progress also publishes *Decorating and Craft Ideas*, a how-to magazine distributed nationally, and *Delta Report*, a monthly newsletter aimed at farm suppliers and others in farm-related businesses. Two smaller magazines are directed at specialized audiences: *Destinations* is targeted at travel agents in the South, and *Southern Supermarketing* is a regional trade publication. Oxmoor House, the company's book publishing division, also is included in media. It primarily offers special publications on a subscription basis to subscribers of *Southern Living*.

In 1981, the privately owned Southern Progress had the best year in its history, according to Emory O. Cunningham, president. The company's three major magazines, *Southern Living, Progressive Farmer* and *Decorating and Craft Ideas*, increased ad pages and circulation. *Southern Living*, according to Publishers Information Bureau, increased its gross advertising revenues (prior to agency commissions) to $35.3 million, up 15% from 1980 when it hit $30.6 million. "Subscriber income is the best it's been," said Mr. Cunningham. "Revenues are up mainly because of increased circulation."

In spite of the shaky economy that has hurt many farmers, "we project 1982 to be a very good year," he said. *Southern Living* and *Progressive Farmer* were up in ad pages for the first six months. *Progressive Farmer* added 12 ad pages. "That's on top of 1981, which was an all-time record high," said Mr. Cunningham.

Mr. Cunningham believes that *Progressive Farmer's* strong showing stems from the magazine's policy of publishing separate issues for farmers producing different crops. Advertisers are able to target soybean, cotton, peanut, beef, pork and tobacco products, and subscribers also seem to prefer the specialized treatment.

In a recent management change, Jerry Vehle was promoted to publisher in April. He was the magazine's advertising director and has been with *Progressive Farmer* for 20 years. Mr. Cunningham, who had been publisher, retains his role as president of the magazine.

Southern Progress also owns the Progressive Farmer Radio Network, a syndicated radio program offering farm market news on 40 southern stations. Revenues from the Starkville, Miss.-based network make up only a small part of the corporation's total.

The company's book publishing division, Oxmoor House, had the best year in its history in 1981, publishing 10 titles of general interest to southern readers. The corporation also operates the "Southern Living Cooking School," classes devoted to southern-style cooking held in approximately 50 cities and towns in the Southeast and Texas each year. Southern Progress is diversified into several other areas related to its publishing business.

Stauffer Communications

Stauffer Communications, Topeka, Kan., is the country's 100th largest media company, with media property revenues of $59.2 million in 1981, or 90% of total revenues of $66.1 million.

Media revenues in 1980 were $55.6 million and total revenues that year were $60.4 million.

Newspapers accounted for 73% of the media revenues and 65% of total revenues last year. Net profits were $3.8 million, the same as in 1980.

Stanley Stauffer, president, said the publicly held company suffered from high interest rates on corporate debt and the generally soft economy.

The *Topeka Capital-Journal*, which had combined its morning and evening editions to form a single all-day paper in 1980, last year dropped the late editions and became a morning-only paper.

From March, 1981, to March, 1982, the *Capital-Journal's* average daily circulation increased less than 1% to 69,600, and Sunday circulation rose slightly more than 1% to 75,200.

Stauffer publishes 18 other daily newspapers in midwest markets extending from Michigan to Oklahoma and ranging in circulation from 6,000 to 30,000.

Circulation for Stauffer's 19 dailies was flat in 1981. The 12-month average totaled 250,738 at the end of March, up just 20 papers from the previous year.

The papers in Shawnee, Okla.; Pittsburg, Kan.; Holland, Mich., and Beatrice, Neb., reported good profits for the year, as did radio stations in Amarillo, Tex., and Shawnee, Okla.

WIBW-TV in Topeka did well, too, largely because it commands a big share of the market. But Mr. Stauffer said both WIBW and the *Capital-Journal* would be performing better if Topeka's economy weren't in such bad shape.

The city's two primary employers, Santa Fe Railway and Goodyear Tire and Rubber Co., have reduced their work forces. The agricultural economy of northeast Kansas is also depressed. "All three factors are adversely affecting our Topeka operations," Mr. Stauffer said.

The company's last acquisition was the CBS tv affiliate in Santa Maria/Santa Barbara, Cal., in 1980. Stauffer apparently plans to continue to expand in both publishing and broadcasting.

"There are no plans to add a seventh am radio station," said Mr. Stauffer, "but we'll be looking in the future for good tv stations and cable delivery systems."

While Stauffer would be more aggressive if interest rates were lower, "we're not exactly in a holding pattern," an official said. "In fact, we're looking at two target acquisitions right now."

He refused to disclose details, but said the properties were in markets smaller than Topeka.

Several Stauffer newspapers have total market coverage programs in various stages of development, and two papers—in Shawnee, Okla., and York, Neb.—have started electronic newspaper operations in their communities, providing news and advertising on cable tv.

Stauffer owns 50% interest in Total Television of Amarillo, Tex., and its *Capper's Weekly*, a regional newspaper, has 420,000 circulation in six midwest states.

The founder of the company, Oscar Stauffer, died in February at the age of 96. His sons, Stanley, president, and John, senior vp, now head the company. Oscar Stauffer incorporated the company in 1930 with six small newspapers and a radio station.

Storer Broadcasting Co.

Storer Broadcasting Co., Miami Beach, Fla., is the 29th largest U.S. media company. Revenues in 1981 were $276.4 million, all generated by media operations. This total marks an increase of 40.1% over last year.

Broadcast stations accounted for $143,673,000 or 52% of 1981's total revenue. Cable communications systems revenues were $132,764,000 or 48%. On March 1, Storer divested itself of its last radio station—WLAK-FM, Chicago—when the station was sold to Viacom International for $8 million. Storer has now committed all of its resources to its tv and cable operations.

Storer owns and operates seven tv stations. The tv broadcasting division as a whole turned in a record year of revenue and operating profit, although economic conditions in several of the company's markets dependent on the auto industry—Detroit and Toledo—have been less than favorable.

The company placed continued emphasis on improving local news and information programming in reaction to the public's dependence on tv as a primary source of news and information. Storer continues to invest in the latest technology to enhance its newsgathering capabilities. For example, STORSAT, the Storer satellite uplink, was placed in full service in the Washington area. It is used by Storer's stations to provide news coverage from the capital instantaneously on an exclusive basis.

Storer vowed to become a leader in the cable field in 1978 and its growth has been spectacular. It is currently the fifth largest cable operator in the world and owns in excess of 104 operating cable systems serving 930,000 basic subscribers in 20 states. As of March 31 it had more premium subscribers—1,033,300—than basic subscribers. As of that date it counted 1,860,800 homes passed by cable; 3,143,000 homes are in Storer's franchised areas. Statistical projections by the company through the end of 1982 call for a total of 1,282,800 basic subscribers, 1,663,800 premium subscribers and 3,231,984 households in the franchised areas.

Communities in which new franchises were obtained during 1981 and early 1982 are located in Arizona, California, Colorado, Florida, Kentucky, Maryland, Minnesota, Oregon, South Carolina and West Virginia.

Storer Metro Communications was awarded the franchise for Washington County, Oregon, in December, 1981. It executed a contract with Metro-West Cablevision to merge into Storer Metro. (Metro-West holds additional franchises in the suburban Portland area.) Also in 1981, Storer joined with other major cable operators as joint venturers in Spotlight, a premium entertainment service.

In January and March, 1982, the company purchased cable communications systems in the suburban Dallas-Fort Worth area and in Phoenix, with approximately 7,800 current subscribers. It also sold a small system in Illinois.

Storer has cable communications subsidiaries in which local investors own not more than 20%. The company's policy is to continue to investigate areas of potentially profitable cable communications operations, even in light of the current economy. As one company executive said, "Storer plans on meeting all of its commitments this year" and into the future.

On April 5, 1982, Storer officials announced the completion of a $460 million financing program with the signing of a $325 million revolving credit and term loan facility arranged through a consortium of 13 banks with Chase Manhattan Bank as agent. Prior to this, in February, 1982, the company had announced the signing of a $125 million 10-year term loan with Continental Illinois National Bank and the Mellon Bank, N.A.

The funds provided by the Chase consortium were used to repay $126 million outstanding under the company's 1980 revolving credit agreement which was terminated. The remainder is available for continued expansion of Storer's cable operations.

According to Terry H. Lee, president and chief operating officer, "if construction of cable

communications systems for which the company holds franchises is completed on schedule, the cost of such construction programs is estimated to be $230 million in 1982; $163 million in 1983 and $94 million in 1984.

An important change in the company's hierarchy took effect April 27, 1982, when Peter Storer, formerly vice-chairman of Storer, succeeded to the position of chairman and chief executive officer. He replaced William Michaels, who is now chairman of the executive committee.

Another change that will be taking place this December will be a change in the company's name, from Storer Broadcasting to Storer Communications, to reflect the company's belief that the cable system will be used in ways far beyond tv programing, for uses not yet on the drawing board.

It will also move its headquarters from Miami Beach to North Miami.

Playboy turns from smut to smarts

By Jennifer Alter

The November, 1975, cover of *Playboy* was graced by a fetching young lady with her hand stuck deep into her bikini panties.

It was, one might say, the lowest point *Playboy* had reached in what now is seen as its panicky reaction to the pubic wars launched by aggressive competitors like *Penthouse*. Hugh Hefner, the magazine's founder, saw the "popcorn" cover—so described at Playboy Enterprises because the young lady had a box of popcorn in her other hand—and decided that enough was enough. From then on the mandate was clear: The 23-year-old magazine that had created a genre with great flair, and then watched its franchise disintegrate as competitors rushed in, had to clean up its act.

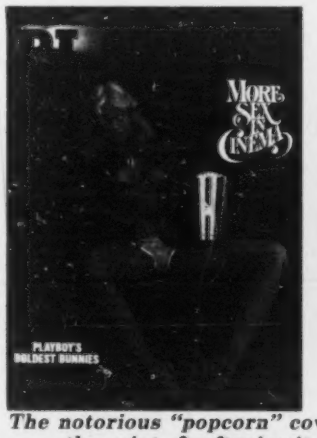
Today *Playboy* is light years away from such graphic titilation, having opted instead for a more tasteful approach to sex. And what may have been an instinctive reaction on Mr. Hefner's part has turned out to be a sound business decision as well. *Playboy* has reversed its circulation erosion, bolstered its advertising volume and, with annual earnings in the range of $20 million, is far and away the largest profit maker for the troubled Playboy Enterprises, as well as one of the healthiest of the men's magazines.

"We've become a magazine people are not embarrassed to keep on the coffee table," says Nat Lehrman, who was appointed associate publisher in mid-1976.

One of the tasks assigned Mr. Lehrman was to help pull *Playboy* out of a long period of misguided attempts to outraunch *Penthouse*, launched in 1969 by Robert Guccione.

Terrified as its rate base began to drop (from a high of 7 million in 1972 to an alltime low of 4.5 million in late 1977), *Playboy's* first instinct was to fight smut with smut.

Meanwhile, *Playboy* launched *Oui* in 1972 to "come up behind *Penthouse*" and attract the readers making a mass exodus from *Playboy*. But Mr. Hefner and other company officials felt uneasy with the extent of sexual overtness necessary to make a go of *Oui*. As a result, *Oui* was positioned hazily, and wound up competing for readers with *Playboy*, which simultaneously



The notorious "popcorn" cover (left) pushed* Playboy *to the point of softening its approach today (right).

was becoming increasingly explicit. When the "popcorn" *Playboy* cover appeared, the company finally sounded its retreat.

"We became uncomfortable with the explicit level of sex," recalls Mr. Lehrman.

Mr. Lehrman had been associate publisher of *Oui*. His appointment as associate publisher of *Playboy* was one of the first indications that Playboy Enterprises was willing to invest in independent management for its flagship magazine. "Previously the magazine was serviced by the corporate apparatus," explains Mr. Lehrman. "We brought unity and teamwork to an outfit that was kind of splintered."

By renewing its focus on "tasteful sex" and "literary quality," the magazine consciously sacrificed a sizable chunk of newsstand sales; as a tamer book, it took itself off the impulse buy list of an established audience segment.

But positioned as "the gray-haired old man of the crowd," as one observer has labeled it, *Playboy* came into certain privileges.

Significantly, it won access to a whole different world of advertisers. Under new management, the ad sales staff was able to sell a more conservative magazine.

Indeed, it is now sold against the newsweeklies, playing on its strength as a vehicle with which to reach men.

In the past five years, it has made headway into nearly every corporate category outside of Detroit (which it continues to woo). At the same time it has raised its standards on the so-called "back of the book" ads, refusing to accept material it feels is of "sexual ghetto" definition.

Aware of the new approach's possible impact on newsstand sales, *Playboy* executives also launched an organized plan to "manage" circulation. The magazine increased subscription solicitation activities and stepped up discount offers.

It now maintains what it considers an optimum 50-50 balance between subscription and single copy sales, (subscriptions previously accounted for only 30%). The present mix, executives contend, makes it easier to maintain the rate base, now fairly steady at 5 million.

Penthouse circulation, meanwhile, has fallen to 4.1 million from a peak of 4.7 million in 1979, and the magazine last July lowered its rate base to 4 million from 4.5 million.

Playboy's increased percentage of subscriptions also leaves circulation less vulnerable to the appeal (or lack thereof) of blockbuster covers—which Mr. Lehrman claims are unpredictable anyhow.

For example, he notes, it would have been impossible to know in advance that Ace Hardware Corp. would fire spokesperson Suzanne Somers for appearing in *Playboy*, an incident that generated enough excitement and publicity to rate a sell-out cover.

Despite the emphasis on subscriptions, the magazine didn't ignore the need for single-copy sales.

During the "turnaround" period, *Playboy* formalized various promotional programs, assigning one staff member fulltime responsibility for booking playmates on tours and another to capitalize on promoting the hard news angles of the magazine's editorial material.

As *Playboy* has settled into its more conservative form, its circulation has leveled off at approximately 5 million, its contents fat with some 1,400 ad pages a year.

"Its maturing strategy is not a bad one," says J. Kendrick Noble, a publishing analyst at Paine Webber Mitchell Hutchins. "It's become the sedate conservative member of the group."

Nevertheless, the magazine has much to fear from complacency, industry analysts believe. Undeniably past its prime, they say, *Playboy* should be viewed a a mature product in a flat, if not declining, field.

Its best bet, confides one *Playboy* executive, is to focus on market share. To bank on growth in the total men's magazine field in the 1980s would be as naive as trying to outsmut the smut books was in the 1970s, he says. AA

Jennifer Alter is an Advertising Age *reporter in Chicago.*

Taft Broadcasting Co.

Taft Broadcasting Co., Cincinnati, is the nation's 62nd largest media company with media property revenues of $125.1 million for the year ended March 31. Television stations generated a total of $95.7 million—up 12% from last year—and radio produced $29.4 million, a 9% increase.

Broadcasting accounted for all of the media revenues, or 34.9% of the company's total revenues of $358.2 million. Taft's net earnings for the fiscal year were $38.8 million.

Taft's entertainment group, which produces and distributes tv and theater programing, contributed revenues of $102.3 million or 28.6% of total revenues.

The company has three divisions—broadcasting properties, entertainment group and amusement parks. All of them posted record gains within the fiscal year, but the amusement parks showed the most dramatic growth.

Taft got into the cable market last year by hooking up with Tele-Communications Inc., Denver, to buy several cable systems in Michigan and New England.

The partnership, TCI-Taft Cablevision Associates, now has 88,000 subscribers in 32 communities, and the company says it will continue to focus on the acquisition of existing systems in those two geographic areas. Its goal is to have 200,000 subscribers by 1984.

A second partnership between Taft and TCI was formed to develop programing for both basic and pay cable, and Taft-TCI Programs recently purchased 20% equity in Black Entertainment Television, the satellite-delivered cable service that reaches 9 million subscribers.

In addition, Taft-TCI Programs is producing pilots of children's and public affairs programs for sale to cable operators.

Taft owns its full complement of five vhf stations—in Birmingham, Buffalo, Cincinnati, Columbus and Kansas City—along with independents in Washington and Philadelphia.

It has six fm stations and six am stations, which are located in Buffalo, Cincinnati, Columbus, Kansas City, Pittsburgh and Tampa.

The company said its independent stations and fm radio showed "excellent performance" in recent months, while am stations and some of the network affiliates reported only modest revenue gains.

Taft tv stations tend to put local programing in high priority. For example, four of them have one-hour local evening news shows, and WBRC in Birmingham telecasts 29 hours of locally-produced programs each week.

In December, Taft purchased 47.5% interest in the Philadelphia Phillies baseball team, and with the acquisition came rights to broadcast the team's games for nine years beginning in 1984.

WDAF in Kansas City and WBRC in Birmingham soon will begin to provide regional news feeds for Satellite News Channels, the cable news service of ABC-Westinghouse. Satellite uplinks are being installed at both stations.

This summer Taft plans to begin conducting a teletext experiment using the British Context system at WKRC-TV in Cincinnati.

It would place decoder-equipped televisions in 40 homes and at several public locations. The system allows viewers to call up information to see alone or with other programing on a split screen.

Taft would be the first to experiment with teletext in its markets. It hopes to determine the kinds of information viewers want and how much they will use it.

Taft has been in radio since 1939 and tv since 1949, and it got into the programing business much earlier than most competitors. In 1966 it acquired Hanna-Barbera Productions, its first step to becoming a supplier of software for the video industries.

Taft's entertainment group owns several production companies, as well as Worldvision Enterprises, an international distributor of tv programing.

With 70% of all Saturday morning children's programs now coming from Taft enterprises, the company has become the world's largest producer of animated tv programing.

Hanna-Barbera is the largest maker of animated programs, and Ruby-Spears, another Taft subsidiary, is the third largest. Last season's top-rated Smurfs were a Hanna-Barbera creation, and the company now is creating a Pac-Man special for ABC that it hopes may eventually become an animated series.

"Heidi's Song," an animated movie by Hanna-Barbera, is scheduled to be released in December.

Taft's entertainment group also produces live-action tv programing, which last season included "Skokie," starring Danny Kaye, and "My Body, My Child," starring Vanessa Redgrave.

Worldvision Enterprises has domestic and foreign distribution rights to several television series. It has sold reruns of "Little House on the Prairie" in 110 domestic markets and 100 foreign markets.

Tele-Communications Inc.

Tele-Communications Inc., the nation's 48th largest media company, is playing its own version of Pac-Man. The publicly owned Denver-based cable tv and microwave common carrier company recently jumped from third place to the No. 1 multiple systems operator in the country, gobbling up cable systems or parts of them, at such a rate that the company itself sometimes has trouble keeping records of its properties up to date.

Total revenues for the company are up 46%, from $124.4 million in 1980 to $181.4 million in 1981. Of that total, revenues from media properties—all cable tv—amounted to $167.7 million, or 92% of the total. Revenues from microwave operations were up 7.6% from 1980, to $13.7 million. Net income in 1981 was $12.8 million, compared with $8.2 million the year before.

TCI's cable tv business is handled through its subsidiary, Community Tele-Communications Inc. (CTCI). Its microwave division is operated though another wholly owned subsidiary, Western Tele-Communications Inc. (WTCI).

A major accomplishment during 1981 was the quantum leap in subscribers. During the year, cable subscribers increased from 1,100,000 for basic to 1,594,000, and pay subcribers went from 469,000 in 1980 to a 1981 yearend total of 921,000, a leap of 96.6%. The combined growth of both basic and pay subscribers went up more than 58% in 12 months. TCI, at the end of 1981, represented some 249 systems in 45 states, systems either owned, partially owned or managed by TCI.

And a postscript on yearend statistics shows that there has been no lull in the company's momentum. According to the National Cable TV Assn., in a special *TV Digest* publication—*Cable Business*, as of March 22, 1982, TCI broke the 2 million mark for basic subscribers served. With that number, the company swept past its major competitors of the last few years to become the nation's cable king. In that same special publication, Time Inc.'s American Television & Communications Corp., previously the No. 1 mso in the U.S., is listed as having 1.9 million subscribers and Westinghouse Electric Corp.'s Group W Cable (formerly Teleprompter Corp. and No. 2 mso) is listed with 1.7 million, now coming in as No. 3.

From its beginnings in 1963, when Salt Lake City-based Bob Magness (now chairman of TCI), Kearns-Tribune Corp. and KUTV merged their cable systems in Utah, Nevada, Montana and Texas, TCI has pursued its philosophy of going after the "mom and pop" operations rather than the larger franchises in major cities. TCI has zeroed in on rural communities, winning subscribers in such locations as Horse Cave, Ky.; Knob Noster, Mo.; Ypsilanti, Mich., and Jal, N.M.

"TCI is a small systems operator and we're proud of it," says J.C. Sparkman, executive vp of CTCI, who praises the "cluster" approach of the company—buying systems located near existing properties—as effective both from a financial and management point of view.

Despite the success the company has enjoyed, certain cable industry analysts (and critics) have reacted to the company's quick growth with a certain wariness.

For one, there has been criticism about sluggish development of certain franchises, notably in Boulder, Colo., a city currently engaged in a legal franchise tussle with TCI and often mentioned when the company is criticized for apathy in upgrading its systems. In a *Business Week* article (Nov. 23, 1981), Richard S. Varnes, the city's director of media and programing, was quoted as saying, "They have done nothing in 13 years."

According to CTCI's Mr. Sparkman, however, the sluggish growth of the Boulder franchise was a result, he said, of Federal Communications Commission restrictions, not any lack of enthusiasm of TCI's part.

Another source of speculation revolves around the "minimal capability" of many of TCI's systems. Because many are older—offering only 12-channel capability—subscribers, say analysts, will eventually want the multi-channel (up to 108-channel) capability of the more sophisticated systems. This would have a real impact when TCI's franchises, granted for 10- and 15-year increments, come up for renewal.

But, counters Mr. Sparkman, only 20% of TCI's holdings have 12-channel systems. The remaining 80% have capability for 30 channels and more. In addition, with more than 850 franchises in its system, TCI is constantly renewing franchises. And, according to David Humphrey, director of corporate reporting for TCI, the company—to date—has not lost one.

Meanwhile, some of the major developments in 1981 include the purchase of Horizon Communications Corp. (previously based in Evansville, Ind.) for $70.5 million. Horizon was only one of 17 acquisitions, whose total purchase price came to $145.1 million. In addition, TCI reached a joint venture agreement with Knight-Ridder Newspapers to form TKR Cable Co. to "acquire, develop and operate cable tv systems." As a result of the TKR partnership, TCI gained control of Cross Country Cable, Bound Brook, N.J., serving 43,000 of a potential 116,000 subscribers.

Also in early 1981, TCI joined Cincinnati-based Taft Broadcasting Co. in another joint venture. Its agreement to buy 100% of Cape Cod Cablevision in Barnstable, Mass., was completed in early 1982. So the additional 28,000 Massachusetts subscribers are now on the TCI roster.

Also during the year, additional stock was purchased in Athena Communications Corp. As of early 1982, more than 80% of the company is now owned by TCI.

More recent acquisitions include Six Star, a cable group in Pomona, Cal. (36,000 subscribers), and Key West, Fla. (27,000 subscribers). In April of this year, TCI acquired the Plains Cable Group, including systems in Michigan, Indiana, Pennsylvania, Wisconsin and New York, bringing in an additional 100,000 cable customers.

One final major accomplishment for TCI this past year was the development of a satellite service package—through the efforts of TCI president John C. Malone and Mr. Sparkman. The package, when it becomes available, would enable any TCI subcriber to choose from a "menu" of services and be charged for only what they see.

As to the future of TCI, what happens once you have made it to the top?

Keep on going, say company executives.

"We are the only pure cable tv company left," says Mr. Sparkman, who says TCI will continue its acquisition strategy. "Size gives you strength in negotiating power."

OTHER OPERATIONS

Tele-Communications Inc. owns a 50% interest in Taft-TCI, which in turn holds interest in Black Entertainment TV. Also, it operates National Telefilm Associates (74% interest).

Thomson Newspapers Ltd.

Thomson Newspapers Ltd., Toronto, Ont., is the 34th largest media company in the country, with operating revenue from U.S. newspaper properties of $232.4 million in the fiscal year ended Dec. 31. The company's only business in the U.S. is newspaper publishing and printing. Operating income from that business, headquartered in Des Plaines, Ill., last year totaled $90.5 million.

At the end of its fiscal year, Thomson Newspapers' U.S. holdings included 83 newspapers. The company also owns 54 Canadian daily and weekly newspapers, bringing total revenues of $303.8 million and income of $75.9 million. Consolidated revenues from U.S. and Canadian properties were $536.2 million; net income, $83.7 million.

At yearend 1981, total daily circulation in the U.S. was 1,181,200; in Canada, total circulation was 1,171,100. The company's sole U.S. purchase in 1982 (to date) has been the *Daily Mining Gazette* in Houghton, Mich.

At the company's annual meeting in May, Kenneth Thomson, chairman and president, told shareholders the company is expecting continued earnings growth in 1982, but at levels "well below" last year. The company said it will not acquire additional Canadian properties, and is continuing with its U.S. acquisition program. "Additional acquisitions are in prospect," Lord Thomson told the meeting.

Thomson Newspapers Ltd. is a part of a vast worldwide conglomerate controlled by the Thomson family, which owns 71% of the Canadian newspaper company. International Thomson Organisation Ltd., Toronto, is a separate, 81% family-owned company with interests in business publications and book publishing in the U.S., United Kingdom and the Continent; national and regional newspapers in the U.K.; U.K. consumer magazines; package tour operations and travel agencies in the U.S. and U.K.; and substantial operations in North Sea oil fields and other petroleum-related businesses.

Both Thomson Newspapers and the International Thomson Organisation are headed by Lord Thomson, who holds the title of Lord Thomson of Fleet. Mr. Thomson's father, Roy H. Thomson, started the Canadian newspaper company in 1934 with the acquisition of the *Daily Press* in Timmons, Ont. He first migrated into the U.S. market in 1952, when he bought the *St. Petersburg* (Fla.) *Independent* (subsequently sold). Since its founding, Thomson Newspapers has been unflagging in its business goals: It purchases noncompetitive newspapers in small- and medium-size communities.

Represented nationally by Sawyer Ferguson

While Thomson Newspapers and ITO operate separately, the Thomson family's control links the two companies. Industry analysts believe the fate of the larger ITO in 1981—a year in which oil profits dropped and the U.K. economy worsened—could ultimately affect Thomson Newspapers' U.S. growth plans this year. In 1981, for instance, the company purchased six newspapers: *Tifton* (Ga.) *Gazette, Sikeston* (Mo.) *Daily Standard, Thomasville* (Ga.) *Times-Enterprise, Florence* (S.C.) *Morning News, Enterprise* (Ala.) *Ledger* and *Kokomo* (Ind.) *Tribune.*

Though the company had purchased only the *Houghton Daily Mining Gazette* through the first five months of 1982, last year it said it was setting a goal of six to eight U.S. acquisitions annually for the next several years.

In its shareholders report, the company predicted soft consumer spending in both Canada and the U.S. in 1982, but said, "We are confident that the results . . . will continue to be satisfactory." The ongoing recession in both the U.S. and Canada could hit Thomson particularly hard because of its concentration of newspapers in the industrial northern states of Ohio, Pennsylvania and Michigan and throughout Canada.

Robert Duncan, communications analyst, Wood Gundy, Toronto, said the general state of the economy may hamper the company's expansion plans. But, he added, "They have been extremely careful in their bidding. I have a feeling that Thomson is riding out the slump now and looking for papers affected by the economy that might be available at a lower price."

At presstime, Thomson was still embroiled in Canadian government antitrust actions resulting from its acquisition of Southam Inc.'s F.P. Publications. In May, 1981, the company was charged under the Combines Investigation Act with respect to its closing of the *Ottawa Journal.* Alleged improprieties surfaced during a government investigation of the acquisition and, in May, 1982, both companies were ordered to stand trial on seven counts of violating competition laws.

Time Inc.

Time Inc., New York, is the country's fourth largest media company, with $1.51 billion in revenues from media operations in 1981, a 28% increase from 1980. Media operations—made up of the company's extensive magazine and video holdings—represented 45.8% of Time Inc.'s total 1981 revenues of $3.3 billion. The company earned $297 million in 1981, a 12% increase from 1980.

Magazines contributed $870 million in revenues, video $618 million and Pioneer Press about $25.4 million.

Magazines and video accounted for $102 million and $123 million, respectively, in earnings. Pioneer Press earnings are not broken out.

Other income came from its book publishing operations, its forest products division and a variety of smaller enterprises.

Magazines performed spectacularly in 1981, as three of the company's weeklies—*Time, Sports Illustrated* and *People*—dramatically increased their revenues and dominated the industry's top 10.

Time elbowed *TV Guide* out of the No. 1 spot in ad revenues, with a 13% increase to $253 million while *TV Guide* ad revenues were flat at $239 million.

Sports Illustrated and *People* both moved up a notch in the rankings, to Nos. 4 and 5 respectively, displacing McGraw-Hill's *Business Week.*

Time's other magazines also performed well. *Fortune* ad revenues were up 27% to $70.4 million, Life was up 20% to $23.2 million, *Money* was up 48% to $22.9 million and *Discover,* Time Inc.'s newest publication, was up 333% to $5.2 million.

While magazines were contributing record-high revenues, Time Inc. video operations were also setting impressive records. That fast-growing division,

which includes American Television Communications, Home Box Office, Cinemax and a one-third ownership in USA Cable Network, last year matched the earnings—but not the revenues—of all of Time Inc.'s publishing operations, including its magazine and book holdings. It is expected to surpass the publishing earnings in 1982.

"Not bad for a business that barely showed a profit only five years ago," president J. Richard Munro told the stockholders.

In a move that joins the two growing branches of magazine and video operations, Time Inc. is close to deciding whether it will go ahead with its planned cable magazine. In the testing stages for the last year, the magazine seemed close to the go-ahead point when Time Inc. announced in February that Dan Zucchi, formerly ad sales director at *Money*, would take over the newly created post of publishing director of the task force in charge of the cable magazine project.

Insiders say the proposed magazine is still a likely possibility, but a decision may have been delayed when a prototype reportedly got a mixed reception at this May's convention of the National Cable TV Assn.

Mr. Munro said in a recent interview that Time Inc. executives "very much want" to go ahead with the new magazine, but added that starting a new publication would not be an easy task. Alluding to the problems of producing a national cable magazine encompassing the almost mind-boggling number of cable systems around the country, Mr. Munro said: "It is a very, very difficult thing to pull off. If it wasn't, *TV Guide* would have already done it."

The cable magazine project neatly summarizes what many

'It was the death of a family'

By Nancy Tait

August 7, 1981: The final edition of the *Washington Star* is published. One hundred twenty-nine years of newspaper tradition ends. Washington, the nation's capital, is now a one-newspaper town. And 1,830 employes of the *Star*, some of whom have spent their entire working lives at the paper, find themselves out of work.

It was worse than a death in the family, Mary McGory, 1975 Pulitzer prize winner and 34-year employe of the *Star*, wrote in her farewell column: "It was the death of a family."

There was no formal funeral for the *Star*. People who wanted to say a final farewell did so in the Aug. 7 paper. Some chose the opportunity to advertise a 25%-off merchandise sale—in memory of the *Star*.

The end had come swiftly and painfully. The paper's owner, Time Inc., made its announcement July 23, 1981. The *Star*'s last day of publishing was just 15 days later.

The noble cause that had been their consuming passion and had dominated their daily routine of many at the *Star* was gone. What now faced them was a mundane, but overwhelming question: Where would the next paycheck come from?

The *Star* employed many talented writers and reporters. Ten were Pulitzer prize winners. For these people the transition was quick, although not necessarily easy.

A Time Inc. spokesman says the company isn't able to offer any insights into what happened to the *Star*'s 1,830 employes: No numbers on how many had landed new jobs and where, no idea of how many might still be looking for work.

No matter what its financial condition may have been, it had been inconceivable to many *Star* employes that the paper would close, and that "the family" would have to scatter. Here are the thoughts and circumstances of some of them:

George Beveridge was at the *Star* for 40 years. He was, at the end, the paper's ombudsman and associate editor. In 1958, he won the Pulitzer Prize, the first *Star* writer to do so.

"I was shocked when I heard the *Star* was closing," Mr. Beveridge recalls. "I didn't expect it. The *Star* was in deep financial trouble, but the timing shocked me.

"It's tragic that Washington is now a one-paper town."

Of Time Inc.'s handling of the closing, Mr. Beveridge would make no comment. Of the *Washington Times*, Washington's new paper, which is financed by businesses of Sun Myung Moon's Unification Church, he also had no comment.

Mr. Beveridge today is an assistant to Joe Allbritton, the banker and newspaper publisher who sold the *Star* to Time in 1978.

Mary Lou Forbes was at the *Star* for 37 years, at the end as associate editor of the Commentary section. She won the Pulitzer Prize in 1959, a year after Mr. Beveridge won his. She was the first female editor at the *Star*.

"At the end," Ms. Forbes said, "working at the *Star* was a labor of love. The financial erosion was so evident, all you had to do was to pick up the paper to see how few ads were there.

"I wasn't surprised the *Star* folded, although I admit I harbored an inkling of hope that someone would rescue us at the last minute.

"The only thing that wasn't done that might have been the answer was to go with the *Star* as a morning paper," she said. "But that would have been a very expensive commitment."

Of Washington's new paper, the *Washington Times*, she says, "It's a bright, readable paper. So many of my friends are there."

Ms. Forbes today is the executive editor of The Source, a telecommunications company in West Virginia.

Sidney Epstein was associate publisher of the *Star* when it closed.

"In the last year," Mr. Epstein says, "it was obvious the *Star* was in terrible financial trouble. There was no reassuring Time that things could be turned around. The $60 million they had given the paper had been used up. Still, the paper closed a little faster than I thought it would."

This was the second time Mr. Epstein had lived through a major newspaper's closing. He had been city editor at the *Washington Times-Herald* when the *Washington Post* bought it in 1954.

"The *Star*'s closing was a personal disaster for a lot of people," he said. "A lot of them are working at Moon's paper—thank God, 'cause they need jobs. They have to eat."

Mr. Epstein is now vp-electronic newspaper publishing for Malarkey-Taylor Associates, a telecommunications company in Washington.

Stephen Aug, a 13-year *Star* employe, was the paper's business editor.

He says today of the paper's closing the same thing he was saying in those bitter days nearly a year ago: "The merchants of the District wouldn't support us, and now they're getting what they deserve [a reference to *Post* advertising rate increases]. Personally, I'm delighted. If I had been a substantial retailer in Washington, I would have wanted to keep an advertising alternative."

Mr. Aug had nothing to say about Time Inc.'s handling of the paper's closing. By his estimate 60% of editorial staff had new positions the same day the paper announced it was folding.

Mr. Aug is now a Washington correspondent for ABC radio and television.

John Heyd was a relative newcomer at the *Star*, having been there only 2½ years when it closed. He was the paper's marketing ad director. The news to him was perhaps more shocking than it was to others.

"The first time I realized we weren't going to make it was when Time made the announcement we were closing on July 23," he recalls.

To suggestions that it was perhaps Time's lack of expertise in the newspaper business that significantly contributed to the *Star*'s demise, Mr. Heyd replies: "The things we did may have been unusual to the newspaper industry, but we were facing an unusual situation."

Mr. Heyd is now sales promotion director with *Sports Illustrated*, a Time Inc. publication.

Carol Khan was another latecomer. She was at the paper for 1½ years and was its retail ad manager.

Ms. Khan still clings to the belief that the *Star* had a chance."Just before the paper closed, Hecht's department store was seriously considering committing one-third of its advertising linage to the *Star*," she said. "Right up to the end, the *Star* was making plans to increase its share of the advertising market. We had begun SuperStar, a weekly ad listing that was sent out to all nonsubscribers, and plans for a marriage mail program [a direct mail marketing program for advertisers] was in the works. But they didn't have a chance to really work. "We had terrific plans, but it was all too late."

She remembers the last day, starting from the sterile modern plant—but an extremely efficient one, everyone was reminded at the time—in Southeast Washington that the paper had moved to in 1959:

"I'll never forget watching people as they lined up on the street. I was on the fourth floor. They were waiting to collect their final paycheck. People from editorial were putting their arms around and hugging people in circulation, trying to comfort each other. It was a very sad day."

Ms. Khan is now general manager for Donnelly Publications in St. Louis.

Other *Star* employes and where they now are working:

- George Hoyt, *Star* publisher during Time's tenure, from 1978 to 1981, is now corporate production manager for monthly magazines, Time Inc.
- Mary McGory, columnist, now writes a syndicated political column for the Washington Post three times a week.
- Edwin Yoder Jr., editor of the editorial page and Pulitzer Prize winner, is a syndicated columnist for the Washington Post Writers Group.
- Jeremiah O'Leary, most senior employe—he had worked at the *Star* for 44 years—and the paper's White House correspondent, is White House correspondent for the *Washington Times*.
- Harry J. Kelly, associate managing editor, is a national writer for Time Inc.
- Pat Oliphant, Pulitzer Prize-winning cartoonist, is a syndicated cartoonist for Universal Press Syndicate group. His cartoons appear in 400 papers nationwide, including the *Washington Post*.
- Phil Evans, managing editor, is assistant managing editor at the Washington Times.
- John McKelway, writer of the paper's "Rambler" column, is a reporter on the *Washington Times*' national staff.
- Anne Crutcher, editorial writer, critic and columnist, is editorial page editor at the *Washington Times*. AA

The Staff of The Washington Star

Pulitzer Prize Winners

FULL-TIME EMPLOYEES

The Star's staff: The noble cause that had been their consuming passion was gone.

observers see as the direction of Time Inc. in the 1980s. The company will keep its historic commitment to print operations, but much of its growth will probably come from the video business. One Wall Street analyst has estimated that by the middle of the decade, video operations will account for 50% of the company's operating income. Its contribution jumped to 41% from 35% over the last two years.

American Television & Communications is expected to sign up its two millionth subscriber this year and the Time Inc. division recently won a coveted cable franchise in Denver.

Times Mirror Co.

Times Mirror Co., Los Angeles, is the country's fifth largest media company with media operations accounting for $1.37 billion in revenues out of total 1981 revenues of $2.16 billion.

Media revenues rose 21% from last year's $1.13 billion. Total revenues were up 16% from 1980, while net income rose 8% to $150.3 million.

Newspapers accounted for $1.07 billion in revenues, broadcast and cable for $190.6 million and magazines $112.3 million. Newspapers, which represent 51% of total company revenues, recorded a 22% increase in revenues from 1980's $874.3 million. Broadcast and cable revenues increased 36% from $139.9 million, but magazine revenues dropped 1.6% from $114.1 million.

In 1981, Times Mirror stuck with its long-time strategy of expansion within the communications area in which it has developed expertise. The publicly held company continued efforts to upgrade newspaper properties and also made major steps into cable tv and electronic information services.

The *Los Angeles Times* marked its 100th anniversary in 1981 with revenues of $580 million, its best ever. For the 26th straight year, the *Times* recorded more total ad linage than any other newspaper in the world—164.2 million lines. Daily circulation for the six months ended last March 31 averaged 1,062,707 copies, up 3.6% from the same period a year earlier. Sunday circulation also rose 3.6%, to an average of 1,317,817.

During the year, the *Times* made several editorial and technological advances. It opened a foreign bureau in Warsaw, Poland, and a financial bureau in Detroit. In a drive to strengthen the paper's presence in markets where *Times* penetration is low, the paper expanded business coverage in both the Orange County and San Diego County editions.

The *Times* continued its $215 million expansion program. Included in that is the expansion of its Orange County plant, the installation of two new offset presses and the conversion of existing presses to offset. Construction of a second satellite plant in the San Fernando Valley is under way and expected to be completed by 1984.

Times Mirror's *Newsday* on Long Island became the U.S.' largest evening newspaper in 1981—a distinction of note, given the rate at which evening newspapers are folding these days. It also made circulation gains and increased its total ad linage by 8% to 72.1 million lines.

While in 1981 *Newsday* achieved the position of the country's largest p.m. paper, it made moves that may indicate a conversion to a.m. delivery is under consideration. During the year *Newsday* experimented with morning home delivery in the Queens community of Bayside. In July, it introduced a morning newsstand edition which was available two hours earlier than previously.

The *Denver Post*, which completed its first year as a Times Mirror newspaper in 1981, also made moves in the a.m. direction in 1981. It started an a.m. street sales edition in September and later converted subscriber areas to a.m. home delivery on weekdays.

During the year, the *Post* was overhauled graphically and editorially as part of a drive to reverse a trend of declining circulation and ad linage. In addition to making design changes and reorganizing sections, the *Post* added new local news, fashion, automotive, travel and daily business sections. It also introduced a separate tv guide.

The *Dallas Times-Herald* became an all-day newspaper in 1981. The conversion was completed under Thomas R. McCartin, named publisher and chief operating officer in March 1981. Readers in Dallas County now have the option of subscribing to either a morning or afternoon edition. Following the switch, the paper's morning circulation increased to 50% of its total circulation. Circulation averaged 251,003 daily and 341,787 on Sunday.

At Connecticut Newspapers, Times Mirror introduced Sunday editions of the *Advocate* in Stamford and the *Greenwich Time*, plus the first zoned editions of the newspapers, in an attempt to provide readers with local coverage and pull in local retail advertisers.

Times Mirror continued efforts to reach the Los Angeles-adjacent Orange County market by upgrading the *Orange Coast Daily Pilot* technologically and editorially (this is in addition to expansion of the Orange County edition of the *Los Angeles Times*). The Orange Coast Publishing operating unit also introduced a new weekly free newspaper in the area, the *Irvine Mirror*, in October. In March, 1982, it started the *Mission Viejo Mirror*.

Times Mirror's broadcast and cable tv group's 36% increase in revenues was matched by an increase in operating profit for 1981 to $64.2 million. Much of the improvement is attributed to the tv operations, including five tv stations acquired in 1980.

Broadcasting president John McCrory has said that the seven-station tv group may at some time consider starting a cooperative programing venture, probably in the news area.

Times Mirror expanded its cable operations in 1981 beyond traditional cable tv services to include a 24-hour-a-day premium movie service, Spotlight. Times Mirror has entered into an agreement with other multiple system operators who have become partners. The company's hope is that Spotlight will eventually become one of the nation's major premium services.

Times Mirror's regular cable operations grew, too. In 1981 its basic subscribers grew to 641,000, while pay tv subscribers increased to 343,000. At the same time, there were 26,000 basic subscribers and 33,500 pay tv subscribers in systems in which the company has a minority interest.

In May, Times Mirror Satellite Programming made plans to purchase two satellite transponders on Hughes Galaxy I satellite, scheduled to start operation in 1983.

In addition to growing in cable tv, Times Mirror spun off a new subsidiary to conduct a field trial of a two-way home information delivery system, Times Mirror Videotex Services. The trial started in early 1982 in 350 Southern California households in Mission Viejo and Palos Verdes, Cal., two affluent Los Angeles suburbs.

Long-range plans call for expansion into teleshopping, home banking, ticket reservations, airline schedules and delivery of information from newspapers and magazines. If the Southern California test is successful, Times Mirror will probably introduce the service in other American markets.

The company's ski magazines contributed to the magazine group's revenue decline in 1981. They recorded circulation and ad linage drops, which Times Mirror attributed to poor snow conditions.

Advertising increased, however, in *Golf*. Elsewhere, *Popular Science* joined Diamond Publishing in producing *Diamond Popular Science* for the Japanese market.

There were no major management shifts at Times Mirror in 1981. Five senior operating officers were elected corporate vps.

They are the following: Lee J. Guittar, president, publisher and ceo of the *Denver Post* and chairman of the *Dallas Times Herald*, who now also oversees the *Orange Coast Daily Pilot*; Tom Johnson, publisher and ceo of the *Los Angeles Times*; David Laventhol, publisher and ceo of *Newsday*, who is also responsible for the *Hartford Courant* and Connecticut Newspapers; John J. McCrory, president of Times Mirror Broadcasting, and Ralph J. Swett, president of Times Mirror Cable Television.

Times Publishing Co.

Times Publishing Co., St. Petersburg, Fla., the 72nd largest media company in the U.S., had revenues estimated by ADVERTISING AGE at $110 million in 1981, all from media operations.

Revenues increased by 35% from an estimated $81.9 million in 1980. The increase stemmed largely from continued circula-

tion and advertising growth of the increasingly regional *St. Petersburg Times* and *Evening Independent*, in addition to growth in the company's other media operations, *Florida Trend* magazine and "Congressional Quarterly."

The privately held company said an increase in 1981 in part-run advertising, continued penetration of regions north of St. Petersburg and continued editorial innovation contributed to a 10% to 12% increase in advertising linage, despite an across-the-board 9% increase in ad rates.

For the six months ended last March 31, circulation of the morning *Times* averaged 259,715 daily, up 6.3% from the year-earlier period, while Sunday *Times* circulation rose 5.9% to 321,935. Circulation of the *Evening Independent* fell 9.3% to 37,985 copies daily.

Times Publishing Co. outpaced all other Florida papers for the reporting period in morning circulation growth, combined circulation growth for a.m. and p.m. and Sunday circulation growth. Leo L. Kubiet, Times Publishing ad director, said the *Evening Independent*, which has increased circulation every year since the company bought it 19 years ago from Thomson Newspaper Group, would have achieved circulation gains as well had the company not increased its price from 10 cents to 15 cents, and cut back circulation by 4,000 in the Largo, Clearwater and Seminole area north of St. Petersburg to concentrate on city zones.

Times Publishing has been harvesting part-run advertising for years via market segmentation to the north. "Advertisers encouraged us several years ago to publish city-zoned and regional editions," Mr. Kubiet said, "and this has led to extensive rate breakdown for part-runs based on contract size and amount of circulation on a cost per thousand basis."

The company splits St. Petersburg into zones at 49th St., which runs through the center of the peninsular city. The eastern edition, City Plus Bay, takes in the downtown area and some sizable shopping districts and fronts Tampa Bay. The western zone edition, City Plus Gulf, abuts the Gulf of Mexico. These zoned editions are published Thursdays and Sundays and were responsible in 1981 for more than 2.2 million lines of part-run retail advertising, or 50% of the newspaper's total part-run retail linage.

The remaining part-run linage is generated by the five daily regional editions reaching into counties north of Pinellas County (St. Petersburg) and bordering the Gulf. Selling part-run linage allows the paper to compete with the myriad of weeklies and several dailies in those counties.

These editions include, in order northward, the *Largo-Seminole Times* with circulation of 54,060 and *Clearwater Times* with circulation of 47,202, which together contributed 16.5 million retail ad lines in 1981. Continuing north are the *Pasco Times* with 40,477 circulation, *Hernando Times*, 7,206 circulation, and *Citrus Times*, 6,635 circulation. The latter three contributed 4.9 million retail lines in 1981.

In 1981, the company moved into its first satellite printing plant, a $6 million facility housing an eight-unit Urbanite press, in New Port Richey north of St. Petersburg. The plant is expected to minimize distribution problems associated with circulating editions up to 100 miles north of the city.

Penetration in those markets already is heavy. The company has achieved a 45% penetration of the 80,900 households in Pasco County, bordering Pinellas County to the north; 36% penetration of the 15,700 households in Hernando County, and 23% penetration of 23,100 households in Citrus County to the far north.

Times Publishing's *Tv Dial* quarterfold magazine, appearing each Sunday, introduced a coated stock wraparound cover last year and offered three four-color ad positions. Only a few of the cover spots have not been booked for the remainder of 1982. The product offers 72 pages (newsprint) of advertising, tv listings and editorial inside the slick cover.

Florida Trend executives were pleased with the magazine's 823 paid ad pages in 1981, but have greater expectations for 1982. In the first five months this year, the magazine sold 387 pages, up 19% from 324 pages in the year-earlier period.

Triangle Publications

Triangle Publications, Radnor, Pa., is the nation's 17th largest media company, with 1981 revenues estimated by ADVERTISING AGE at $502.2 million, all from print media. Triangle had estimated revenues of $461.6 million in 1980, an AA revision of company estimates supplied in 1980.

The privately held company publishes *TV Guide, Seventeen* and the *Daily Racing Form.* The company folded its 16-month-old *Panorama* magazine in June of last year.

Reports circulated last month that Triangle was selling *TV Guide*, the company's dominant property. Triangle president Walter Annenberg denied the reports, saying that the company "was not open to any offers —certainly not at this time."

At that time, ADVERTISING AGE quoted sources as saying Mr. Annenberg had begun talks with potential buyers, possibly including Getty Oil, about selling the magazine for $750 million to $1 billion. Getty also denied the speculation.

The company considers continued growth in cable and electronic media the most promising aspect of its future. During March, *TV Guide* expanded its New York metropolitan edition with five additional cable listings; similar expansion was said to be planned for other regional editions as demand grows. All 108 editions of *TV Guide* now carry cable and pay tv listings. The company said that *TV Guide* now reaches 28% of all cable tv households—an even higher percentage than regular tv households.

Nonetheless, with increased competition in cable listings from both new cable magazines and local newspapers, *TV Guide* ad revenues remained flat last year at $239 million, allowing *Time* to edge it out of its three-year position as the No. 1 magazine in ad revenues, according to Publisher's Information Bureau. *TV Guide* ended the year with a circulation of 17.7 million, according to the Audit Bureau of Circulations, representing a 2% drop in the last half of 1981.

The static ad sales were said to be partially responsible for a series of high-level personnel changes that took place during the first half of the year, including the appointment in late January of former national advertising director, Eric Larson, as *TV Guide's* first publisher in 13 years.

Brian Bradfield, general manager, took early retirement, along with several other executives, and Thomas McDonough, previously advertising manager, was named to succeed Mr. Larson as ad director; Robert G. Baumler, formerly eastern regional advertising manager, was promoted to advertising manager. C. Robert Brooks, previously Los Angeles ad manager, was named in December to succeed Richard Cook as West Coast advertising manager when Mr. Cook retired.

Mr. Larson said that certain managers were let go in order to eliminate "redundancy" of some positions that had resulted when the publication combined the national and local sales staff into one force to increase efficiency.

At Triangle's *Seventeen*, ad revenue was up during 1981, despite a slight falloff (0.2%) in advertising pages. Advertising revenue jumped to $22.4 million, up 9.1% from 1980; the magazine's total revenue reached slightly more than $40 million.

Though *Seventeen* has suffered in recent years from a decline in the numbers of its teen age audience, magazine officials said the audience has become "more affluent" and fashion-conscious than teens of the recent past.

Victoria Peslak, formerly editorial art director at *Brides*, was named to the same post at *Seventeen*, succeeding Tamara Schneider, now art director at *Ladies Home Journal.*

Tribune Co.

Tribune Co., Chicago, is the nation's 10th largest media company with revenues of $1.17 billion from media operations in 1981, up from $1.05 billion in 1980. Newspapers accounted for $1.02 billion in revenues and radio and tv operations $154 million.

Total operating revenues for 1981 were a record $1.41 billion, a 14% increase over the previous year's $1.2 billion. Net income was $89 million in 1981, compared to 1980's $78 million.

In the first quarter this year, Tribune Co. profits plummeted 97% to just $468,000 from $14.6 million in the year-earlier quarter. The company blamed higher interest expense, reduced interest income and earnings declines in most operations. It said full-year earnings should be "well below" those of 1981.

Late last month, the U.S. Justice Department sued Tribune Co. and its Sentinel Star Co. subsidiary to force them to divest five weeklies serving the Orlando, Fla., area. The action is believed to be the first Justice Department challenge of a daily newspaper's purchase of weeklies in its market. The government said the purchase lessened competition for advertising in the market.

A Tribune Co. attorney called the suit "a test case in terms of shoppers" and said the company will contest the suit "with vigor." Sentinel Star Co., publisher of the daily *Orlando Sentinel*, bought the five weeklies for $4.1 million two years ago. According to the Justice Department the daily and weekly papers of Sentinel Star Co. accounted for 100% of all print advertising in Osceola County in 1979, with the weeklies accounting for 36% and the daily 64%. The papers as a group accounted for 60% of all advertising in the market, according to the suit.

Tribune Co., a privately held company, continues to chisel out new corporate directions as it inches away from newspapers and moves more toward broadcast and cable operations.

This year witnessed an unsuccessful, at times embarassing, attempt to sell the ailing *New York Daily News*—and then a recanted decision to keep it; an ongoing struggle to improve profits at the flagship *Chicago Tribune*, and a bolstering of broadcast operations by forming Tribune Co. Broadcasting Inc., a new subsidiary.

As these changes take shape the Tribune Co. is increasing its grip on cable-tv and other diversification ventures—including baseball via last year's purchase of the Chicago Cubs.

The troubled *News* had a $12.6 million operating loss last year, and Tribune Co. has said the paper will lose up to $30 million this year.

Throughout the winter the company attempted to sell the *News* to Texas finanacier Joe Allbritton, former owner of the *Washington Star* and present owner of smaller newspapers. Yet, that sale was thwarted when the newspaper's 11 unions could not reach contract agreements with the potential buyer. As negotiations sputtered Tribune Co. president Stanton Cook labeled Mr. Allbritton the "buyer of last resort" and warned unions the *News* would fold if the impasse was not broken.

Nevertheless, talks between the unions and Mr. Allbritton broke off in April and the Tribune Co.'s hardline position was reversed when it reclaimed the *News.*

Still, Chicago-based Tribune Co.'s commitment to keeping the paper viable is being questioned by the unions and local advertisers. Some contend the company's credibility has been destroyed because of the *News* episode, and they suspect the Tribune Co. braintrust's only plan is to buy out the various labor contracts and lower operating costs to make the paper more attractive to potential buyers.

Tribune executives contend a plan is on tap that will keep the *News* afloat well into the 1990s. Last month it said it plans a two-year staff reduction of 1,340 jobs—a fourth of the payroll—and that it will spend $44 million to improve printing facilities and $48 million in early retirement pay to union workers. *News* publisher Robert Hunt said the moves would reduce costs by $55 million a year by 1984.

The flagship *Chicago Tribune* continues to lose circulation despite spending heavily on its "Zingo Bingo" game to attract customers. Daily circulation for the six months ended March 31 averaged 770,798, down from 790,475 for the year-ago period, according to most recent figures from the Audit Bureau of Circulations. *Tribune* operating profit last year was higher than in 1980, however, because of an in-house austerity program and increases in both circulation and advertising rates.

Changes are also under way at Tribune Co.'s *Fort Lauderdale* (Fla.) *News* and *Sun-Sentinel*, where a merger of the editorial staffs is near completion. Fort Lauderdale management recently stated it will soon have to confront the possibility of merging both papers into a single 24-hour daily.

The *Orlando Sentinel*, with a daily circulation of 200,000, is in the thick of a central Florida circulation war and appears to be holding its own.

Attempting to cash in on the lucrative video programing market, Tribune Co. created a broadcasting subsidiary to acquire, produce and distribute tv programing for tv stations, cable tv systems and other video technologies.

Sheldon Cooper, former president and general manager of Tribune-owned WGN-TV, has been named president of the subsidiary.

In broadcasting, WGN-TV and WGN-AM in Chicago have received the bulk of the media concern's attention lately. WGN-TV has pumped up its coverage of local news and has added the Tribune Co.'s Independent Network News show to the roster. Also, it has added popular local sportscaster Harry

Caray to the Cubs broadcast team and has accelerated its already extensive sports coverage. It has also hired film critics Gene Siskel and Roger Ebert away from the Chicago PBS station and will feature them in a movie review show similar to their syndicated "Sneak Previews," shown on PBS stations.

WGN-AM has also undergone some on-air changes. It has added talk show host Eddie "Chicago" Schwartz to the all-night program, potentially giving the talk-news station a powerful one-two punch in the form of Mr. Schwartz in the late night and the Chicago ratings leader Wally Phillips during morning drivetime.

Even the Chicago Cubs—considered by many to be the company's future cable draw—have undergone a facelift. For the first time in the club's existence a marketing plan is emerging. Tribune Co. hired former Philadelphia Phillies manager Dallas Green to be the Cubs' general manager and he has installed the slogan, "Building a new tradition," for the team that has not won a pennant in more than 30 years.

Turner Broadcasting System

Turner Broadcasting System, Atlanta, is the nation's 82nd largest media company with 1981 revenues from media operations of $83 million out of total revenues of $95 million. In 1980, it had media revenues of $42.7 million out of total revenues of $54.6 million.

Turner is a public company made of several separate but interrelated operating segments. The operations include broadcasting as well as a cable production company.

The broadcasting operations consist solely of WTBS-TV (Channel 17), a UHF station in Atlanta. Even though the station broadcasts out of Atlanta, most of its viewers are located outside. WTBS is known as a "superstation"—one of the few tv stations in the country whose signals are transmitted across the country by satellite and received through cable systems.

The company estimates that WTBS was available in approximately 19 million cable tv households and an additional 1 million households at night. The total represents 66% of the nation's cable households and approximately 25% of broadcast tv homes. Ted Turner, president of Turner Broadcasting, estimates that WTBS will reach 30% of all tv homes by the end of 1982.

WTBS' audience has not gone unnoticed by national advertisers. In 1981, the station earned $55.3 million from ad revenues—an increase of nearly 59% over the 1980 revenues.

The prospects look even better for 1982. According to BAR Cable Advertising Service, national advertisers spent $16.2 million on WTBS, in the first quarter of 1982. Local ad spending was not counted.

WTBS' success has led other tv stations to attempt a similar satellite-transmitted distribution service. Among the imitators are Chicago's WGN-TV and New York's WOR-TV.

Turner Broadcasting's cable production segment is composed of CNN and CNN 2—two 24-hour news channels available to cable tv systems throughout the nation.

CNN commenced operations in June, 1980, to approximately 1.7 million cable subscribers. Since then it has grown rapidly. As of Dec. 31, 1981, it was reaching 10.6 million cable tv households in all 50 states. CNN's programing consists of comprehensive and up-to-date reporting of domestic and international news, sports, business and weather, plus analysis, commentary and reports by a staff of experts and reporters. The network has established its own news bureaus in New York, Washington, Chicago, Los Angeles, San Francisco, Dallas, Rome, London and Atlanta.

On Jan. 1, 1982, Turner Broadcasting launched CNN 2, a second all-news network. The new network is already available in 1.1 million cable homes. However, it is not expected to reach its projected yearend goal of 4 million.

CNN receives its revenues from monthly fees per subscriber household as well as the sale of national advertising. CNN 2 is provided to subscribers free of charge and will receive its revenues primarily from advertisers and the sale of syndicated programs to over-the-air television and radio stations.

Advertising for WTBS and CNN is sold by the company's own advertising sales force located in New York, Chicago, Detroit, Los Angeles and Atlanta. At the end of 1981, the company also signed an advertising agreement with Warner-Amex Satellite Entertainment Co. (WASEC). Under the agreement, WASEC will sell advertising on CNN and CNN 2 and receive 10% of the net sales.

Cable revenues for the company increased to $27.7 million in 1981 from the 1980 figure of $7.2 million. However, it continued to show an operating loss. The 1980 losses for the cable operations amounted to $16 million. In 1981, the amount had been reduced to $11 million.

Starting June 21, CNN and CNN 2 will have a new competitor—Satellite News Channels. The service is a joint venture of Westinghouse and ABC and will initially reach about 1.5 million cable subscribers.

Within a very short span of time, Ted Turner and his Turner Broadcasting have acquired the reputation of media mavericks. Turner pioneered the idea of a satellite-transmitted tv station and transformed a lowly-rated uhf station into one of the nation's most visible.

The idea of an all-news cable network also went against the grain of expert advice. Nonetheless, CNN and CNN 2 are in operation and highly competitive with network newsgathering operations.

Soon, Turner plans to broadcast 17 hours of daily CNN programing to the Far East via a Pacific satellite.

The year has seen some major personnel changes at Turner Broadcasting. CNN president Reese Schonefeld has resigned and will be replaced by vp Burt Reinhardt and another CNN vp, Ed Turner.

In addition, a number of the network's experts—psychologist Joyce Brothers, movie reviewer Christian Williams, satirist Mark Shields and gossip reporter Rudy Maxa—have not renewed contracts.

United Cable Television Corp.

United Cable Television Corp., Denver, the nation's — 94th largest media company, reported revenues of $62.8 million and operating income of $24.9 million in fiscal 1981, all in media. This financial performance was outstripped by the first three quarters of fiscal 1982, which closed May 31.

Through the first nine months of the new year, the publicly held United Cable had amassed revenues of $68 million and operating income of $25.5 million. At an annualized rate, year-end figures will be in excess of $95 million and operating income more than $35 million, the company estimates.

During the nine-month period, United Cable increased its homes passed from 752,820 in fiscal 1981 to 860,000. Another 340,000 homes passed are expected to be added in the final quarter bringing yearend 1982 homes passed under franchise to about 1.2 million.

Much of the increase in homes passed came from hookups in the Denver suburbs and Boise, Ida., area. More will come online in the next fiscal year through new franchises awarded by Alameda (28,000 new subscribers expected) and Hacienda Heights, Cal. (40,000); Scottsdale, Ariz. (51,000); Oakland County, Mich. (a joint venture with the Tribune Co. of Chicago that is expected to bring in 105,000 subscribers), and Chaska and Shakopee, Minn. (8,000). The company is pursuing hotly contested franchises in Sacramento, Cal., and Montgomery County, Md. The Alameda, Hacienda Heights and Oakland County franchises each will have more than 100 channels. (Although 54 channels is the state of the art, many of the newer-bid systems double that by running dual cable to get 108 channels.) Scottsdale will have 54 channels.

Fiscal 1982 includes a quarter's result from Home Entertainment, a subscription operation United Cable purchased Feb. 12 from Buford Television of Tyler, Tex., which retains a minority position. The stv operation, which services Cincinnati, Dayton and Chicago, and is to begin servicing Minneapolis-St. Paul in the fall, has more than 110,000 current subscribers. With subscribers paying an average of $21, the service was expected to add $7 million to total revenues by the end of the fiscal year. United Cable owns 80% of the stv service through its infusion of $20 million, a financial package of debt and equity.

Capital spending, a byword for active cable operators, totaled $52.5 million in the first nine months, with contributions coming from the $26 million in cash flow from subscribers during the period.

Last year, the company had $60 million in capital expenditures, a good part of that coming from two common stock offerings generating $53.5 million for equity investment, and much of it going toward outfitting the Denver suburban area for cable. The company had hoped to add the city of Denver franchise to its suburban service this past

Entrepreneurship: It's in the blood

At an age when many executives at the top would be enjoying the view, Monroe M. Rifkin, 51, has abandoned the corporate suite to launch his own business.

Not that Mr. Rifkin, former head of Time Inc.'s cable television operations, is stepping out into unknown territory. He founded American Television & Communications Corp. in 1968, and had helped build ATC into one of the largest cable systems in the country when Time acquired it 10 years later.

But Mr. Rifkin grew restless, and not because he's a lover of the unstable life—he's a director at two different Colorado banks, has holdings in real estate and is an "avid, but not crazy, skier."

Rather, he has joined millionaire oilman Marvin Davis to form Rifkin-Fox Communications, Denver, because "I'm an entrepreneur by nature." That, he says, is the basic difference: "Ownership—the fact that I'm a partner—makes it very personal.

"An entrepreneur craves ownership," he adds. "At Time or some other large corporation, you can't have that."

Like Marvin Davis, Mr. Rifkin enjoys working with his enterprises, but doesn't like to talk about them.

Rifkin: Another venture

"I don't like a lot of visibility," he says. "Let the companies speak for themselves."

He will say that he first started working with cable as an executive vp at Teleprompter Corp. (now Group W Cable) in 1959. He was in charge of closed-circuit prize fights, and a contact of his led to Teleprompter's first cable buy—three small systems.

These days, Mr. Rifkin is staging other kinds of battles. As vice-chairman of the National Cable Television Assn., Washington, he has been a strong backer of a House bill that would protect cable's interests in sports from such things as the contention by powers in professional sports, especially baseball, that any kindred game in a community should be blacked out when the local professional team is playing at home.

At Rifkin-Fox Communications, Mr. Rifkin is the managing partner and will make the key decisions along with Mr. Davis, who bought Twentieth Century-Fox Film Corp. for $725 million last June and made it a privately owned company. Mr. Rifkin says he and Mr. Davis are longtime acquaintances. AA

year, but lost out in the bidding to Mile High Cablevision, a joint venture of Daniels & Associates and Time Inc.'s American Television & Communications Corp.

United Cable continued to experiment with pay-per-view and cable advertising in the 1982 fiscal year. United Cable sees the addressable converter as the "real boon" to pay-per-view, according to treasurer Bill Elsner, who says the company's use of the disposable filter in the past is an inconvenience to the customer, compared with the converter. With the disposable filter, the customer must pick up the filter at the cable headquarters and install it for the one-time telecast. The company is investigating different types of addressable converters. The converters can be activated at the cable head-in for the market. Such converters are to be made available in construction of the Scottsdale system.

Meanwhile, United Cable generated $250,000 in advertising during fiscal 1981 from its Tulsa franchise and was expected to top $660,000 for fiscal 1982 there. The company was also expected to gain $400,000 more through franchises in Carpentersville, Ill.; Hammond, Ind.; Plainville, Conn., and Bellevue, Neb., says Dave Walstrom, director of ad sales, who was hired away from General Electric's broadcast division during the year.

"The business is changing so rapidly that it is hard to get a fix on advertising. Advertising on cable has started out like tv, but cable is beyond tv, having the segmentation and target ability like radio and magazines," Mr. Walstrom says.

Mr. Walstrom notes United Cable is building a prototype for cable advertising in Tyler, Tex., which will be "up and running in a couple of months." The prototype would help determine station equipment needed for advertising insertions, trafficking and marketing and promotion of cable advertising. Advertising in Tulsa and elsewhere is based on rather traditional tv-type sales, although "considerable creative mixing and matching is required to support satellite nets," he says.

Once the Tyler experiment is completed, Mr. Walstrom expects advertising to be initiated into systems, among others, in Tyler; Boise; Abilene, Tex.; Casper, Wyo.; the Denver suburbs, the Bay Area of California; Bossier City, La.; Ocean City, Md., and Grand Junction, Colo.

U.S. News & World Report

U.S. News & World Report, Washington, is the 61st largest media company in the country, with revenues from media properties of $127 million, 94% of total revenues of $135 million, according to the company.

The weekly news magazine accounts for $115 million total revenues. The remaining media revenues come from newsletters, interests in radio programing and electronic publishing services. A book division is not included in media.

Company president James McIlhenny said 1981 brought two pleasant surprises and a disappointment. The first success comes from the company's newly created subsidiary, Publishers Services International (PSI). According to Mr. McIlhenny, after six months in operation PSI is operating as a network. The division has sales commitments of more than $10 million annually, offices in three states and contracts for transmission services and computer typesetting with more than 50 publishers.

Mr. McIlhenny said the company is "proceeding optimistically" with the venture, but can't be expected to come full-blown into such a costly business.

The other area of strength came from the "Washington Newsletter," the four-page weekly circulated to business and professional people with investment interests. Circulation increased by 18% between 1980 and 1981 and editor Paul Hencke said the reason is threefold: The company increased the newsletter's direct-mail promotion, it enjoys a ruboff from *U.S. News & World Report* and "in times of uncertainty people look for information to dispel that uncertainty." However, Mr. Hencke said the newsletter still has some distance to go before reaching its circulation goal of 100,000 to 150,000.

The company's book division provides the soft spot. Mr McIlhenny said there has been a slack in all book business and U.S. News has slowed down its movement in this division, with only seven titles released in 1981.

There is also a new face in the chairman's seat, former vp of circulation, Samuel Kecker. He replaced John Sweet, who retired after serving as the guiding force at U.S. News for more than 35 years.

While *U.S. News* still trails *Time* and *Newsweek* in circulation, the company continues to solidify its image among both readers and the advertising community. Since moving its advertising account to North Castle Partners in 1981 the company has "significantly increased its advertising outlays," said Mr. McIlhenny.

The first part of the campaign aims to get readers to understand the personal side of the magazine by profiling editors who are "news buffs." Mr. McIlhenny said the second part is directed toward the ad community and deals with efficiency and cost-per-thousands. He also said the magazine has a "vast" special advertising and promotional budget targeted for specific industries.

In an earlier interview, publisher William G. Dunn touched upon some of the challenges that are facing the magazine industry today. He said the competition posed by the cable industry should not be viewed as a threat, but turned into a collaboration; with cable benefiting from a magazine's ability "to get stories and get the news," and magazines taking advantage of cable's immediacy.

Dunn's parent company has done just that through its association with Parkway Communications Corp., a major producer and distributor of fine arts radio programing. *U.S. News* hired Nat Kingsley prior to purchasing Parkway to develop the magazine's resources on a cable format.

Neil Currie, president of Parkway, said *U.S. News* was looking for a partner with the same image and demographics as the magazine. Parkway's ventures into network and satellite technology will allow *U.S. News* to develop "thoughtful interviews," Mr. Currie said, drawing upon the magazine's imprint. Currie said Parkway has experienced a 20% annual growth over the past six years and hopes the relationship with *U.S. News* will strengthen that number.

The company also broke ground in June on the development of some of its downtown Washington land. The site will be used for a major hotel, office building and high-rise condominium complex. The center is expected to be completed in 1983, at an estimated cost of $2 million.

Viacom International

Viacom International, New York, is the country's 49th largest media company with media revenues of $164.5 million, 78.2% of total revenues of $210.4 million.

The company increased total revenues 31% from $160.2 million in 1980. Its earnings increased from $28.3 million in 1980 to $31.3 million in 1981 for a 10.6% increase.

Cable tv contributed the largest share of revenues, with $85.2 million gleaned from basic and pay subscribers in 548,632 homes.

Adding $83.5 million were the company's broadcast services, which include 50% interest in Showtime Entertainment, the nation's second-largest pay-tv network, owned jointly with Westinghouse's Group W Cable (formerly Teleprompter). Viacom consolidates 50% of Showtime's revenues.

Broadcast also includes revenues from two tv and four am and four fm stations in five major markets—New York, Washington, Memphis, Houston and Oakland/San Francisco.

Amid the tempest at the *Daily News*

When Robert Hunt left his position as president-chief executive officer of Chicago Tribune Co. in 1979 to become president and publisher of the *New York Daily News*, also owned by the Tribune Co., associates said the former ad salesman was attracted to the challenges offered by the New York paper.

It now appears, as Tribune Co.'s embarrassing, suddenly retracted, attempt to sell the *News* suggests, that Mr. Hunt walked into a problem whose dimensions neither he nor the Chicago braintrust fully appreciated.

According to Tribune Co. sources, other company executives had argued that the "challenges" posed by the *News* might be too complex and difficult for anyone to meet and warned that they were clearly beyond the ken of Mr. Hunt.

"Bob Hunt is an amiable, jolly man, but I don't think anyone who knows him well would call him very intelligent or deep," says one former Tribune Co. executive, who claims he was among those asking if the company was sending the right fireman to New York.

But even those who doubted Mr. Hunt's—or anyone's—ability to reverse the slide of what was at the time the country's largest daily newspaper give him credit for realizing that something drastic had to be done, and doing it. In an attempt to capture the "upscale" audience so beloved by advertisers, Mr. Hunt in 1980 started *Tonight*, a magazine-style afternoon edition that folded a year later and cost the company an estimated $11 million.

"Bob Hunt's answer was to start *Tonight*," says the former Tribune Co. executive. "It wasn't a good plan, but at least it was a plan, which was more than other people had."

The failure of *Tonight*, regarded by some as an impossibly schizophrenic attempt to capture an elite readership at the same time the *News* hoped to hold on to its traditional work-

Hunt: An image problem?

ing class clientele, apparently triggered the Tribune Co.'s later decision to sell the paper. That decision was reversed when a buyer could not be found.

Many *Daily News* insiders, even those who admire Mr. Hunt, believe that the 54-year-old publisher has an image problem that has contributed to the *News*' difficulties, particularly in the months after the folding of *Tonight* and during and after the five months when the *News* was on the block.

His penchant for privacy—surprising for a man remembered by some as a glib backslapper—during a period when the media world, New York community leaders, advertisers and, indeed, the very public that the *News* was courting were keenly interested in the paper's fate, was particularly nettlesome to some. He adamantly shunned interviews and contact with the media, even going so far as to refuse to hold a press conference when the Tribune Co. decided it was going to keep the paper, leading to increased speculation about his control of the situation. Was he still around? Was he about to be fired? Had he become overwhelmed by it all and given up the fight?

When the inevitable stories did leak out, they tended to be unflattering. One told of a meeting that Mr. Hunt called with *News* staffers at which, apparently in response to internal mutterings about the "turkeys from Chicago" who had screwed things up, he staged a flustered and awkward defense of himself.

But despite his image problems, the still-real financial woes of the *Daily News* and the numerous predictions that his days at the *News* were numbered, Mr. Hunt remains as publisher. And from all reports—he continues to avoid the press—he remains optimistic both about the paper and his future there.

In May, he and other *News* executives outlined a plan to make changes at the paper that Mr. Hunt called a "workable, realistic blueprint" to assure the survival of the *Daily News*. AA

Showtime, formerly a CBS-owned entity, was forced to spin off in 1971 after the Washington regulators ruled domestic syndication and cable systems ownership out of bounds for the Big Three conventional tv networks. (Now CBS has taken the lead to muscle the major networks back into part of this field, having established a new foothold in cable ownership through a Federal Communications Commission waiver for 90,000 cable homes.)

Not counted by AA as media was tv programing and distribution with $45.9 million in revenues. Sales of $4.2 million between Viacom units also were recorded and appear as an "elimination" on the balance sheet.

The last decade has been a period of steady growth for Viacom, where top management has remained constant. The company has increased its holdings in cable systems, expanded in network and syndication programing and moved into broadcast station ownership. Like all the other major multiple systems operators, this company has won some and lost some in the franchise infighting at city halls around the country.

Victories have come in Wisconsin, California and Ohio. In San Francisco the mso was awarded a 20-year contract extension on the basis of an ambitious plan for modernization and improved services. Currently, Viacom systems scattered across the country list about 600,000 basic subscribers, nearly 70% of whom buy at least one premium pay service. Pay-per-view has been tested in Nashville, Tenn., and San Francisco.

In the Seattle-Everett area, all the Seattle SuperSonics professional basketball games are being offered live to Viacom subscribers. Fans are charged a flat fee of $120 for the season.

Meanwhile, Viacom has not been putting its name in as many franchise pots as, say, Warner Amex, but there were several applications pending in 1982, enough to almost double the company's homes list, according to the annual report, which promised "to continue to seek new franchises in economically sound areas and maintain the growth of our present systems through a constant program of innovation and improvement."

Viacom has been in the vanguard of pioneers who are organized and staffed to sell local advertising for its largest systems. In some cases reps help with this assignment, and on-the-wire ads are sold in combination with print ads in the local cable guides.

There was speculation after Westinghouse Electric Corp. bought Teleprompter Corp. that either Westinghouse or Viacom would try to acquire the other's half of Showtime. But so far neither seems inclined to bow out as a partner in an in-the-black, growing network.

Showtime reaches more than 3 million homes via 1,500 systems. It is the only profitable national cable network, other than Time Inc.'s Home Box Office. Showtime is talking an additional service, presumably to counter HBO's Cinemax.

Chairman Ralph Baruch and president Terrence Elkes obviously are bullish on cable programing. As one example, Viacom owns a big chunk of the new advertiser-supported Cable Health Network.

Viacom Enterprises reported revenues of $45.9 million in 1981 from sales to network tv, pay cable and local tv. Viacom claims this makes it "the world's leading independent distributor of tv programing." The syndication vault includes such durable off-network favorites as "All in the Family," "The Mary Tyler Moore Show," "I Love Lucy" and the "Bob Newhart Show." Among the latest additions: "Hawaii Five-O" and Clint Eastwood in a 1982 rerelease of "Rawhide."

The company seems to do well with syndication and other ancillary rights to more than 100 feature films. Merchandising rights to Mighty Mouse and other Terrytoons characters date back to the CBS-ownership era.

In the broadcast ownership division, the Viacom sales curve has been up for tv and radio. WVIT-TV, an NBC affiliate in New Britain-Hartford, Conn., reported its best year ever, despite the network's rating troubles.

WNYT-TV, Albany-Syracuse, another NBC affilate, put up an earth station to take shows off the satellites, as did WVIT, and enlarged its studios and newsroom, hoping to attract more viewers and advertisers.

WLAK, an fm radio station in Chicago, joined the Viacom group through acquisition early in 1982, and, like the other three fm and four am stations, is being programed to appeal to the 25- to 49-year-old market. Some of the stations are skewed toward blacks; others, including WKHK, New York, run country and western music.

Viacom gave WWRL, New York, to the United Negro College Fund.

Warner Communications

Warner Communications, New York, is the country's 71st largest media company, with media property revenues estimated by ADVERTISING AGE at $110.5 million, or 3.4% of total revenues of $3.24 billion in 1981. Warner had estimated media revenues of $76.5 million in 1980, or 3.8% of total revenues of $2.06 billion.

The worldwide communications and entertainment conglomerate drew media revenues from its 50% share in Warner Amex (a joint cable venture with American Express Co.), and from E.C. Publications ("Mad" magazine) and DC Comics in its publishing division.

The joint venture, which consists of Warner Amex Cable Communications and Warner Amex Satellite Entertainment Co., produced total revenues of $177.2 million last year (half of which is allocated by AA to Warner's media revenues).The company said heavy development costs caused the joint venture, formed in December, 1979, to lose money. The number of Warner Amex cable system subscribers increased by 17% to 863,000, while total pay subscriptions nearly doubled to 545,000. Warner Amex expects "well over" 1 million subscribers by the end of this year.

The number of homes under Warner Amex franchise grew by 675,000 with the addition of 26 franchise awards during the year, bringing total homes under franchise to 3.4 million, a 91% increase in the past two years. The system got its biggest boost during the year when New York City's Board of Estimate voted to grant Warner Amex franchises including about 580,000 homes in the boroughs of Queens and Brooklyn. The 50/50 partnership also was awarded franchises for more than 50,000 homes in five suburban Chicago communities.

Revenues from tv series and theatrical films in tv distribution, not included in media revenues, rose 5% in 1981 to $315.3 million. Licensing feature films to tv showed gains in all markets, with revenues hitting $160.3 million, up 12% from 1980. Tv series and other programs decreased from $156 million to $155 million. Revenues from films in theatrical distribution were $439.9 million, bring-

A window to Knight's empire

By John Sugg

After the largest marriage in newspaper history, the 1974 union between Knight Newspapers and Ridder Publications, executives of both companies began jockeying for office space on the sixth floor of the *Miami Herald* building.

The only sure way to tell who was important in the new bureaucracy, it was said, was to count the number of windows an executive had facing Biscayne Bay. Someone with an inside office and no bayside windows was an underling. Prestige and power could be reckoned as the horizontal expanse of glass overlooking the water increased.

James K. Batten has three windows on the bay, which is quite good. His title, since last April, is president of Knight-Ridder Newspapers. He has become that by taking the proverbial trip up through the ranks, from foot-sore reporter on the Charlotte Observer, to harried editor and then through the Knight-Ridder corporate ranks.

Mr. Batten still has a way to go. There are other offices on the sixth floor with more windows.

There also is the person of Alvah Chapman, 61, the almost legendary media business wiz who inherited the mantle of power from John and James Knight, and who has guided Knight-Ridder to its position as an industry superpower, with revenues more than tripling in the last decade to $1.24 billion last year while profits soared to $100.4 million from $27 million in the same period.

Since becoming executive vp of Knight Newspapers in 1967, Mr. Chapman has been the company's pivotal figure. Upon assuming the chairmanship in April, he transformed the position from a largely honorary sinecure to an active command post. Illustrating that, he retained the title of chief executive officer he had held as president; in addition, several key vps will bypass Mr. Batten in the new corporate structure and report directly to Mr. Chapman.

"Jim's role is very much that of the understudy," says another Knight-Ridder executive. "His promotion [to president from senior vp] confirms him as the Prince of Wales. It does not make him king."

But Jim Batten, a rolled-up-shirtsleeve executive whose informal manner contrasts with and balances the austere formality of Mr. Chapman and other Knight-Ridder executives, has emerged as the clear successor to the throne, and already commands a regal amount of respect in Knight-Ridder's far-flung empire. Reporters and editors in several newsrooms express admiration, loyalty and occasionally affection toward their new president. Newspeople perceive him as one of their own in the perpetual intramural warfare between newspapers' editorial and business operations.

But executives in the company's business operations are no less reluctant to praise him, invariably noting that he has been the point man in the development of Knight-Ridder's technological marvel, the Viewtron project.

"I still have a strong interest and responsibility on the news side," Mr. Batten says. "But I have many other responsibilities. News is only part of this new job."

Despite his gray hair, Mr. Batten looks years younger than his age of 46. His manner remains that of an editor accustomed to making on-the-spot decisions, with quick, forthright answers to questions. His management objective, he says in an interview, is to "stay on the right side of the line between stupidity and wisdom."

In his southern-bred manner, Mr. Batten laces his conversation with a string of anecdotes. In explaining why he feels the company's newspapers need more "mini-news," he recalls that for him the most important story in the *Herald* one recent morning was about a filling station being torn down to make room for a fast-food restaurant.

"That garage was where I took my car," he says with a smile. "It had taken me a long time to find a good mechanic."

From that personal experience, Mr. Batten builds some observations on newspapers in general. "Newspapers 20 or 30 years ago got away from small-bore news," he says. But "people really live in their kitchens and at PTA meetings. We have gravitated away from readers at our own peril."

Historically, when Knight-Ridder has perceived a threat, it has chosen to absorb it. That is most evident at the *Herald*, which contributed 19% of Knight-Ridder's $1.23 billion in revenues last year.

For example, while its editorial functions remain independent, the business operations of the *Miami News*, owned by Cox Newspapers, are controlled by the *Herald* through an agency agreement.

Moreover, despite the *News'* astounding circulation slide—perhaps one of the longest in American newspaper history—

Batten: A VIP at K-R

the *Herald* helps maintain distribution of the *News* at a level of 60,905 copies daily for the six months ended March 31—sufficient to keep another afternoon newspaper such as the *Fort Lauderdale News* from entering the market.

Knight-Ridder management has attempted to protect its newspaper franchises partly by delivering a quality editorial product featuring, in many cases, innovative sections that attract specific audiences, enabling advertisers to make more efficient buys.

One problem facing newspapers, Mr. Batten notes, has been their "horizontal" distribution—they measure "success" by the amount of circulation. However, the ailing and failing newspapers have not lacked large circulations. What the weak papers have starved for is "vertical" appeal to a specific audience.

Mr. Batten points to the *Herald's* highly successful Business/Monday section as an example of the company's attempt to appeal to a definite, affluent readership. The company has since launched similar business sections in Detroit; St. Paul, Minn.; San Jose, Cal., and Charlotte, N.C.

Mr. Batten says such sections will become increasingly important, and increasingly refined. He cites, as another example of "demographic zoning," *El Herald*, the Spanish-language section inserted into the regular *Herald*. "*El Herald* is an interesting precedent," he says. "We may well build on it."

Indeed, there has been talk at the *Herald* for years—as well as at other newspaper companies—of a newspaper that would expand on the philosophy of El Herald and the separate business sections to produce a "newspaper" with sections that are bought separately by readers.

In some of its markets, Knight-Ridder has consolidated operations. A case in point is Wichita, where the two company papers have been combined into one. "We felt we could do a better job with one very good paper in that market," Mr. Batten says, "than with one fairly good paper and one paper that no one really cared about.

In Charlotte, where Knight-Ridder publishes the *News* and the *Observer*, the company shut down the Saturday *News*. "What we have now is a better five-day paper," Mr. Batten asserts. "These things are not a sign of weakness, but of a need to adjust."

All this, says Mr. Batten, who admits to regarding newspapering as akin to a religion, underscores his and Knight-Ridder's faith in the business. "Newspapers overwhelmingly are very successful," he says. "Their fundamental health is good. You ought not to confuse problems of a few big city papers with the industry as a whole."

Knight-Ridder most assuredly will not relax its vigilant stance toward competition, present or prospective, however. As it has done in some cases with rival print media, the company has reacted to the threat from electronic media by joining it. Although newspapers continue to account for nearly three-fourths of its revenues, the company now owns four tv stations and, probably more important, has invested more than $100 million in cable tv operations.

The largest threat to newspapers looming on the horizon, Knight-Ridder and others believe, is the possible loss of retail and classified advertising to developing telecommunications technology. The newspaper industry is battling to keep giant American Telephone & Telegraph from offering an electronic version of its Yellow Pages.

Knight-Ridder has joined the fight. But it also has joined with AT&T in one of the most advanced video information ventures, Viewtron, a two-way videotex system personally directed from the Knight-Ridder side by Mr. Batten until his promotion to president.

Last year, Knight-Ridder decided to move Viewtron out of test and into a full-scale commercial development in Southeast Florida. By the middle of next year, when it is scheduled to become generally available, the company will have invested about $18.5 million in the project, 70% of which will have been expended as the project develops and the remainder of which is in hardware that could be sold or reused by Knight-Ridder if Viewtron is scrapped.

Its long-range thinking notwithstanding, Knight-Ridder hasn't hesitated to respond to its current problems. A 26% decline in first quarter profits this year, to $15 million from $20.1 million in the year-earlier period, did not sit well with company executives unaccustomed to dips in corporate profit. They ordered up hiring freezes and other cost-cutting measures almost as fast as the computers tallied the profit decline. About 35% of the decrease was attributable to Philadelphia, where the Knight-Ridder papers, the *Daily News* and the *Inquirer*, spent heavily to expand following the demise of the *Bulletin*.

Recession explains much of the rest of the decline, Mr. Batten says. The *Detroit Free-Press* has been the hardest hit of the company's papers, losing as much as $1 million monthly, according to industry speculation. Mr. Batten says the figure isn't that high, but acknowledges that it is "substantial."

Over-all, classified advertising, a sensitive barometer of the economy, fell 6.6% in revenues and 15% in linage at Knight-Ridder newspapers last year. "The economic waters have been choppy for a couple of years," Mr. Batten says. "We've had to tighten down hard on costs."

That tightening has not been universally popular in the rank and file. One section editor of a medium-size daily complains, "Knight-Ridder is like working for a strip mine. It's not that our productivity is cut 25% because our staff is 25% smaller. Our productivity is off more than that because people are demoralized."

The cuts are being made "sanely and humanely," Mr. Batten responds. "As the economy gets worse," he adds, "people will see a plus in being with a company that is economically strong." AA

John F. Sugg is an ADVERTISING AGE correspondent in Miami.

ing the filmed entertainment division's total revenues to $755.2 million, up 13% from 1980. However, operating income from filmed entertainment plunged 59% to $24.7 million from $60.8 million. A slowdown in box office attendance, increased expenses in motion picture making and a decline in tv syndication brought about the decline.

The company, however, is taking heart in its projection that revenues from the pay tv market by 1984 or 1985 could exceed total domestic theatrical rentals in its traditional aftermarket of tv syndication.

E.C. Publications and DC Comics ("Mad" magazine and "Mad" specials), part of the publishing division that as a whole generated $84.2 million in revenues in 1981, contributed an estimated 30% of total publishing revenues. Of the total operating income of $14.9 million, DC Comics' operating income increased substantially during 1981 as a result of licensing fees from the worldwide release of Warner's "Superman II."

Consumer electronics and toys, recorded music and music publishing, direct-response marketing, filmed entertainment.

Washington Post Co.

Washington Post Co., Washington, is the country's 12th largest media company, with 1981 revenues estimated by ADVERTISING AGE of $753 million from media properties, more than 99% of total revenues of $753.4 million for the publicly held company. Media revenues were up 14% from 1980's $659 million.

Net income fell 4.7% to $32.7 million from $34.3 million.

Newspaper publishing and related operations, primarily the *Washington Post*, accounted for 49% of total revenues; magazine publishing and related operations, primarily *Newsweek*, 39%, and broadcasting, consisting of the four Post-Newsweek tv stations, 12%.

Included in total revenues are small revenue contributions by nonmedia units, including Newsweek Books and Newsweek Video. The company does not break out revenue figures for these subsidiaries.

The question for Post company executives is where to move next. It has built the *Post* newspaper into one of the most influential publications in the nation and a robustly successful advertising vehicle. *Newsweek*, though being pinched in ad sales by the recession, is a respected and solidly entrenched weekly. Its four tv stations, despite lagging profits at Detroit's WDIV-TV, are solid money makers.

But some of its biggest new ventures have gone sour. In a brutal pruning, the *Trenton* (N.J.) *Times*, a money loser since 1978, and *Inside Sports*, the well written but loss-plagued monthly launched by *Newsweek* in 1980, were sold last year. Other sales disposed of Top Market Television, its advertising sales agency, and its 24% interest in Publishers Phototype.

With the balance sheet cleared up, and major investments in new plant and equipment for the *Post* largely complete, company president Richard D. Simmons has the cash flow to plot some major new moves. Since joining the Post last September from Dun & Bradstreet, where he had been vice-chairman, Mr. Simmons has assembled a new business team. Allan Spoon, a vp and partner at the Boston Consulting Group, was brought in to coordinate new business planning. With an eye on electronic publishing and information products, Mr. Simmons recruited as Post company vp-information systems Ed Van Gombos, who is credited with being the architect of Dun & Bradstreet's successful effort to automate its information resources.

Two weeks ago, the new management team announced its first significant diversification move. Along with several other media companies, the company applied to the Federal Communications Commission for licenses to operate cellular radio telephone services, a new technology that permits wireless telephones to be widely available for the first time. The Post filed for licenses in five markets, estimating that it would spend $170 million to establish the new service in those markets.

At the *Post*, former *Trenton Times* editor Lawrence C. Kramer was named assistant to publisher Donald Graham and executive editor Ben Bradlee and assigned to explore electronic publishing.

Post company chairman Katharine Graham pledged this year that the company will be "actively involved" with any electronic publishing ventures in the Washington market, but she is less certain about taking the company into cable tv or expanded tv station ownership. Mrs. Graham told stockholders this spring that the Post company is ready to move only "at the right price and in the right geographic area."

Tv station prices are "high" and "may be high for some time," according to Mrs. Graham, who suggested she is willing to wait and see if cable penetration brings costs down.

In print media, a bid to acquire the Des Moines Register & Tribune Co., though unsuccessful, showed that Post company executives are not wary of big-ticket investments despite their costly disappointments in Trenton and with *Inside Sports*. But the Des Moines move appears to confirm that the focus of Post company attention has shifted from small- or medium-size papers to well established, larger publications. The company's last newspaper acquisition, in 1978, was the *Everett* (Wash.) *Herald*, with circulation of 60,000 daily and Sunday.

"These opportunities are rare," chairman Graham said of the prospects for a major newspaper buy. "But we are prepared to seize an opportunity when it is presented."

At *Newsweek*, division president Mark Edmiston, appointed last year, was joined in January by exec vp-general manager, Steve Price, formerly a corporate vp at General Foods. This month William D. Broyles Jr. was hired to replace Lester Bernstein as editor-in-chief, assuming the post when Bernstein resigns Sept. 7. Mr. Broyles is the editor of *Texas Monthly* and *California*.

Without serious competition in the Washington newspaper market since Time Inc. closed the *Washington Star* last August, management at the *Washington Post* nevertheless added new opinion features, 30 additional reporters and $3.5 million to the budget. At the close of last year, more than 400 reporters, editors, correspondents and photographers were employed by the paper.

The *Star* closing sent Post daily circulation soaring 23% to 760,950 daily and 17% Sunday to 986,024. The company purchased the former *Star* printing plant to handle the extra load, triggering an unexpected side effect: Federal Trade Commission questions about the effect of the acquisition on potential newspaper competition in the Washington market. Since the sale of the *Star* plant, a new a.m. daily, the *Washington Times*, published by an affiliate of the Rev. Sun Myung Moon's Unification Church, has begun publishing at its own plant.

Months of inaction by the *Post* have dampened speculation that it might move into the *Star's* p.m. time slot with an afternoon edition of its own. But *Post* editors are testing a prototype *Washington Post Weekly*, a tabloid concentrating on the best of the paper's Washington political and governmental reporting and meant for nationwide subscription sales.

At *Newsweek*, refinements included a new demographic edition, *Newsweek Executive Plus*, which started in January and is aimed at top business executives. In the fall, a new college edition will be added. *Newsweek* this spring also boasted that it had sold the largest single ad in its 49-year history: A 34-page insert that will be Waldenbooks' four-color catalog for the Christmas selling season.

Post-Newsweek Stations, which brought in 12% of the company's total operating revenue last year but 32% of its operating income, remained the company's most profitable operation.

The outlook for the company's major media properties in 1982 was mixed: Early results for the *Washington Post* and the tv stations were promising, but *Newsweek* was suffering.

Ad volume in *Newsweek's* key domestic edition was off 12 pages in the first quarter of 1982, and executives predicted a down second quarter as well. The 1981 ad page total for the domestic edition, 3,106, was up only eight pages over 1980's depressed level. Ad volume in Newsweek's international edition fell last year to 2,529 pages from 2,555.

The *Washington Post* turned in a strong fourth quarter last year, and first-quarter ad linage in 1982 was reported up 2%. Revenues climbed 21% as strong travel and real estate advertising offset declines in classified volume. The company predicted an "excellent" second quarter.

Likewise, the Post-Newsweek tv stations—in Miami and Jacksonville, Fla., Hartford and Detroit—turned in a 13% revenue increase in the first quarter with predictions for a good second quarter.

For 1981, the company reported *Washington Post* ad revenues (after commissions) of $263.5 million, up 22%. Ad linage climbed 4% for the year to 100.8 million lines. At *Newsweek*, estimated gross ad revenues were up 13% (before commissions and other discounts) to $237 million.

(30% owned), Bowater Mersey Paper Co. (49% owned), Robinson Terminal Warehouse (newsprint warehousing, 92% owned).

Westinghouse Electric Corp.

Westinghouse Electric Corp., Pittsburgh, is the country's 24th largest media company, with revenues of $319 million from its Westinghouse Broadcasting and Cable Inc. operations in 1981. Total operating profits from media operations were $78 million. Media represented 3% of total Westinghouse sales of $9.37 billion.

In 1980, Westinghouse had media revenues of $266.5 million, or 3.1% of total revenues of $8.51 billion.

Last year was one of significant growth for the company's media business. In July, it completed the acquisition of Teleprompter Corp., the second biggest U.S. cable tv company, for $646 million. That, and the formation of Group W Satellite Communications, led to name changes for the company. Westinghouse Broadcasting Company became Westinghouse Broadcasting and Cable Inc. and Teleprompter became Group W Cable.

Westinghouse is expected to sink at least $300 million into its Group W Cable operation this year, much of it for upgrading Teleprompter systems.

This month, Group W Satellite Communications and ABC Video Enterprises launched the Satellite NewsChannels, a 24-hour all-news cable tv service. The channel, which will battle Ted Turner's Cable News Network for subscribers, is designed to provide news updates every 18 minutes. The service says it also will provide in-depth looks at the news.

Group W Satellite has taken over advertising sales and affiliate representation of Black Entertainment Television (BET). The agreement marked the division's fourth arrangement with a programing unit, placing Group W Cable behind only Warner Amex Satellite Entertainment Co., which owns or represents a total of five cable networks. Under the terms of the agree-

ment, Group W, in conjunction with BET's own sales effort, will represent BET in the placement of programing on cable systems around the country. It will also be responsible for representing BET in the sale of advertising.

Group W Satellite will also be the marketing arm for the Nashville Network. The network's programing will be produced by Opryland Productions from the Grand Ole Opry House in Nashville.

Group W Cable named a new president, Chris Derrick, who moved into the position when William Bresnan was elevated to chairman.

Mr. Derrick, who came from Pennsylvania-based Comcast, said he was "the luckiest" man in cable because he was at the helm of a progressive company that will be spending heavily to expand.

Daniel L. Ritchie, chairman and chief executive officer of Westinghouse Broadcasting and Cable, said the company will strive to provide its audience with a wide variety of programing.

"Other developmental efforts now underway will keep Group W on the leading edge of technology, programing and marketing," he said.

In its traditional broadcasting business, Westinghouse last year purchased KOSI, a Denver fm station, and sold WBZ-FM, Boston.

MY FRIEND BAILEY

To my friend Bailey Anderson, life was a supremely welcomed and beautiful mystery.

One way Bailey tried to find answers to that beautiful mystery was to argue. I even heard him tell a man once that he'd come to talk, not to listen.

He and I used to argue a lot. Mostly about anything that came to mind.

Neither one of us ever won one of those arguments but we kept on, time after time. Both loved it.

One subject that came up occasionally was the nature and existence of miracles.

I was reading a book by the poet e. e. cummings today and realized that my friend Bailey was a miracle . . .

To quote Mr. cummings:

"With you i leave a remembrance of miracles: they are by somebody who can love and who shall be continually reborn, a human being; somebody who said to those near him, when his fingers would not hold a brush — tie it to my hand —."

My friend Bailey is now a citizen of immortality.

I will miss him very deeply.

Tom Worrell

Mr. Worrell is chairman of Worrell Newspapers. Bailey Anderson was a Worrell vp and had been publisher of a number of Worrell newspapers, which ran this tribute upon his death from cancer last November.

Wometco Enterprises

Wometco Enterprises, Miami, is the country's 64th largest media company, with revenues of $122.7 million from media operations in 1981, or 28% of total revenues of $434.2 million. Media revenues increased 29% from 1980 media revenues of $95.4 million.

Broadcasting accounted for $65 million in revenues, or 15% of total revenues, while cable and subscription tv combined for revenues of $57.7 million, or 13% of the total.

Net income rose 17% last year to $24.4 million and, like total revenues, was the highest in Wometco's 57-year history. Aside from media operations, the publicly held company's other divisions include soft drink bottling, vending and entertainment.

Wometco plans to continue serving the leisure-time market, an approach that has enabled the company to do well despite the general economic slump. While people may cut back on expenditures of higher-priced leisure items, the company contends that its newest ventures, cable and subscription tv, fall into the category of economical leisure-time spending.

Wometco owns 85% of Wometco Cable TV, its formerly wholly owned subsidiary that began trading independently after a public offering of a portion of its stock in May, 1981. At year-end, Wometco Cable TV operated or had under construction 42 cable systems in 135 franchised communities and served 195,000 basic subscribers, an increase of 53,000, or 37%, from 1980.

Premium/pay subscriptions totaled 162,000, an increase of 62,000, or 62%, while homes passed jumped 83,000 to approximately 357,000, a 30% increase. (These figures don't include the 6,000-subscriber Freeport cable system, which is 75% owned by Wometco.)

Wometco Home Theatre (WHT) is a subscription television service that has been providing over-the-air pay tv since 1977. At the end of 1981, WHT operations had a combined total of about 106,000 subscribers.

Although WHT did not show a profit for the year, losses were below those of 1980, the company said. To combat the losses, Wometco hired new management which has since cleared up some operating problems, lowered costs and improved the subscriber connection rate.

In the broadcasting division, Wometco owns and operates six tv stations, including four vhf outlets. The company said it expects revenues and profits for the division to improve over their record 1981 levels.

Wometco is especially optimistic about its tv business. "If present trends continue, as we expect they will, the use of the tv set—already an almost indispensable part of life in the American home—will witness a dramatic expansion," said Mitchell Wolfson, president and chairman of the board.

Mr. Wolfson, 81-year-old founder of the company, suffered a mild heart attack in February but was back on the job in May, the company said.

Worrell Newspapers

Worrell Newspapers, Charlottesville, Va., is the country's 81st largest media company, with revenues of $84 million estimated by ADVERTISING AGE from media operations in 1981. All of the private company's holdings are in media.

After years of hectic acquisition activity and efforts to diversify, Worrell took something of a year off.

The only acquisitions were three newspapers in Broward County, Fla.—the *Broward Tribune*, the *Jewish Journal* and the *Hi Riser*.

Worrell took over management of all three newspapers in 1980 and then hinted that the next step would be acquisition, which it concluded in 1981.

These three have a combined circulation of 80,000.

Worrell newspapers posted a 3% gain in circulation during 1981. Advertising revenue, however, dropped 2% primarily because of a decrease in advertising by real estate interests and automotive-related companies.

Most of the papers had no format changes, although the company's flagship newspaper, the *Charlottesville Daily Progress*, altered its format from eight columns to six. The *Lynchburg* (Va.) *News* also made the format alteration.

The Charlottesville newspaper and corporate headquarters plans to move into a new plant in the spring of 1983, and the present building is to be given to the local United Way. The three broadcast interests have maintained stable advertising revenues. The company's Virgin Islands outlet, WBNB-TV installed a $100,000 transmitting dish that allows the station to be heard in Puerto Rico and throughout the Caribbean.

In one major management change, J.D. Schwartz became president of the family-owned operation, while former president Thomas E. Worrell Jr., 37, took over as chairman.

Ziff Corp.

Ziff Corp., New York, is the country's 28th largest media company, with media property revenues estimated by ADVERTISING AGE at $300 million in 1981. Consumer and trade publications accounted for about 89% of that total, and six tv stations the remainder. Media revenues in 1980 were conservatively estimated at $200 million. Total revenues for Ziff were not available.

Ziff began in the 1920s as a partnership of William B. Ziff Sr. and William Davis, two young publishing and humor enthusiasts. The company has been a special-interests publisher from the outset; indeed, one of its first magazines, *Popular Aviation*, now *Flying*, was launched largely because of Mr. Ziff's belief—pioneering at the time—in aviation.

The company's strategy has largely been to construct, primarily through acquisitions and spinoffs, a network of consumer and special-interest magazines geared to a wide range of markets—from photography to yachting to electronics.

Ziff-Davis Publishing is divided into two basic units: Consumer publications division, with such hobbyist and outdoor magazines as *Boating, Flying, Modern Bride, Popular Photography* and *Stereo Review*; and the business and trade publication unit, with such entries as *Aviation Daily, Meetings & Conventions* and *Travel Weekly*.

Over the past few months, the company has divested several publications that for one reason or another didn't "fit," said Richard Friese, president of the publishing division. Included were the in-flight magazines *Pan Am Clipper* and *U.S. Air*, which were bought by New York-based East/West Network.

In addition, *Fly Fisherman* was sold to Historical Times, a Harrisburg, Pa., publisher, mainly because it was "just too small a publication for us," Mr. Friese said.

Among its more visible trade properties is the Ziff-Davis Magazine Network, which targets the young, affluent—or getting there—male with these titles: *Boating, Car & Driver, Flying, Photography, Skiing* and *Stereo Review*.

There are, however, some other interesting standouts in the Ziff stable. One is *Psychology Today*, which the company has been promoting as the special-interest magazine of the future. Some magazine analysts say *Psychology Today* has been floundering for lack of a niche and that its editorial focus seems peculiar in relation to the other Ziff-Davis properties. Its ad pages dropped 22% last year to 563, while ad revenues fell 14% to $12.1 million.

Reports that the magazine will be sold keep popping up, but *Psychology Today* is said to be something of a pet interest of William Ziff Jr., who bought out William Davis in 1953 and has headed the company since. Reportedly shy and very guarded about his personal and business life, the younger Ziff did not inherit his father's extroversion and love of the limelight. He did inherit, however, his father's fascination with an idea that can be catered to in a magazine, which may be why Ziff continues to put money and energy into *Psychology Today*, sources suggest.

Another Ziff entry is *Unique Homes*, which the company acquired in August, 1980, when its name was *Uniques* and its headquarters were in San Diego. Since then, Ziff-Davis has moved headquarters to New York, and increased cover price and frequency.

According to Mr. Friese, the company is always on the lookout for "books for enthusiasts in various categories. This is really where our expertise lies."

Ziff's magazine division has bucked the soft economy and is posting consistent revenue and linage gains this year, Mr. Friese said.

Although clearly committed to special-interest and business magazines, Ziff has also shown an inclination toward database publishing, and has studied the application of current business publications to a database.

The company also has launched a new quarterly, *Data Sources*, which provides data on software and equipment geared to the information-processing industry.

The company also has moved into economic theory and consulting businesses. In 1980 it acquired Wharton Econometric Forecasting Assn., a think tank previously associated with the University of Pennsylvania's Wharton Graduate School of Business. Earlier this year, the company acquired Barr Rosenberg & Associates, San Francisco, an investment consulting company.

Elsewhere, Ziff has agreed to sell two of its six television stations: WRCB in Chattanooga, Tenn., and WJKS in Jacksonville, Fla.

The debate heats up

Cable vs. Networks

"... Life, Look, The Saturday Evening Post *all went within a five-year period .... They're all gone within their original massive forms. I think the same thing will happen with mass television networks."*

—Paul Klein, former NBC executive

"We seem to be in an era of 'Cable, how quickly can you build in my area? I'm tired of waiting.' "

—Charles Dolan, chairman of Cablevision Systems

"Cable is revolutionary. History will see this as some sort of watershed."

—Gustave Hauser, chairman-ceo, Warner Amex Cable Communications

"It become increasingly clear to me that the potential impact of cable has been substantially overstated .... As the first hard ratings numbers emerge we see some serious reviews ahead for the industry."

—Thomas H. Wyman, president, CBS Inc.

"Cable is at best an interim technology .... Before this decade is over, those companies that have made heavy, long-term financial commitments to cable will be out of business or struggling for survival."

—Gershom Clark Morningstar, president, Wolverine-Morningstar Broadcasting

"We know that cable is not going to be a mass medium, ever ...."

—Nancy Clott, vp-media director, Ted Bates & Co.

IN WAKE OF IBM SCANDAL

Mitsubishi, Hitachi mull ad pullback

By ROBERT RAISSMAN

Mitsubishi Electric Corp. and Hitachi Ltd. are expected to suspend all print and tv advertising in Japan indefinitely in the wake of the U.S. scandal involving employes of each company, who are accused of purchasing computer secrets stolen from IBM.

A U.S.-based Mitsubishi executive, who declined to be identified, said the decision to pull the advertising will be made strictly to save face. "It is just a theory among the Japanese. There is no admission of guilt by pulling advertising. But when your name is linked to something like this, you are not going to flaunt it in front of everybody," he said. The move comes during one of the heavier buying seasons in Japan.

The exec said the decision to suspend advertising would not extend to the U.S. However, sales representatives at various electronics magazines said that if the adverse publicity continued, they expected both companies to pull computer and computer-related advertising.

Kazuya Hanazuka, a spokesman for Hitachi in New York, declined comment on the company's advertising situation. But in Compton, Cal., Hitachi Sales Corp. of America exec vp Robert J. O'Neil said that although his unit had no involvement in the computer scandal, executives at the consumer electronics unit were still pondering whether or not to pull U.S. ads.

"We are part of Hitachi Ltd. and this thing could affect us," he said. "We are making no moves in terms of our advertising plans or budget at this point. We're trying to determine the most appropriate reaction." Hitachi Sales' agency is Keye/Donna/Pearlstein, Beverly Hills.

Mr. O'Neil said consumers have not reacted to the scandal. "In terms of active response, there has almost been nothing," he said, "but that doesn't mean there won't be."

An executive at Mitsubishi International, the conglomerate's trading arm, likened the situation to when an airline temporarily pulls advertising following a plane crash.

Neither Hitachi or Mitsubishi spends heavily in this country. According to Leading National Advertisers, Hitachi spent approximately $2 million and Mitsubishi $3 million in measured media in 1981. The majority of the companies' ad dollars are spent on consumer electronic products, not computers, according to LNA.

In Japan, the two companies' ad

PepsiCo kneads bakery plans

By JENNIFER PENDLETON

The people that bring you Pizza Hut and Taco Bell may seek to use their fast-food expertise to expand the popularity of sourdough bread.

PepsiCo's foodservice division, which in March purchased the then three-location San Francisco Boulangerie retail bakery chain, has plans to open from eight to 12 new locations in high-traffic shopping malls throughout northern California by the end of the year, sources say. Purchase, N.Y.-based PepsiCo declined to discuss its plans, but this expansion is said to be the first in long-range plans to make the bakeries a national chain.

San Francisco Boulangeries (*boulangerie* means bakery in French) specialize in original San Francisco sourdough and other variety breads that are prepared in a central bakery, then delivered to individual bakeries and baked fresh daily. At present, the business is entirely take-out; the Boulangeries do not have seating, and sources say there are no plans at this time to convert them to cafes.

PepsiCo recently named Lynch & Rockey, San Francisco, as the chain's first ad agency. Initially, the Boulangeries are using some local newspaper and direct-mail advertising emphasizing the bread's quality and variety, but plans call for expansion into radio and tv later in the year.

No doubt, PepsiCo's decision to enter the retail bakery business follows careful study of the U.S. bread market. White bread sales have been declining steadily as variety bread sales are rising 15% annually (AA, May 25, '81). The popularity of sourdough bread is said to be growing at a similarly swift pace.#

Taking broker exec, Amway distributors to court

P&G sues over satanism

By JENNIFER ALTER

Making good on its pledge to halt the spread of rumors linking it with satanism, Procter & Gamble is enlisting the aid of the law.

The company last week filed suits in Atlanta and Pensacola federal district courts against Mike Campbell, employed at an Atlanta-based grocery brokerage company, and William and Linda Moore, Pensacola-based distributors for Amway Corp., the direct marketer of household and personal care products.

The suits charge the individuals with "libeling the character" of P&G by circulating "false and malicious" statements about the company and calling for a boycott of its products. They ask the court to stop the defendents from further activity and for unspecified compensatory and punitive damages.

P&G has contracted with local attorneys to litigate its case. Former U.S. Attorney General Griffin Bell is handling the Atlanta suit, and Patrick G. Emmanuel, a senior partner in Emmanuel, Sheppard & Condon, filed the Pensacola action.

A P&G spokesman said the individuals were located by reports from consumers and others. He noted there is no evidence that Amway is involved with the spread of the rumors. Amway has more than 750,000 distributorships in the U.S., a spokesman said, and it is not inconceivable that one might be helping spread rumors.

■ The rumors, spreading primarily through churches in "Bible Belt" states, often are propogated on 8½-by-11-in. handouts, distributed in locations such as supermarkets and banks. While it varies slightly, the message on a handout headed "Dear Pastor," notes that recently "the owner of P&G" appeared on (either "The Phil Donahue Show," "The Merv Griffin Show" or "60

FDA block of diet aid faces suit

WASHINGTON—The Food & Drug Administration last week issued an ultimatum to 125 marketers and distributors of "starch blocker" diet aids: Halt distribution within 10 days or produce proof the products are safe and effective. The warning followed a government investigation (AA, June 21).

At least one marketer, BioTech Laboratories, Batesville, Ark., said it plans to challenge FDA in court, contesting the agency's determination that starch blockers are "drugs." Federal law requires proof of safety and efficacy before drug products can be marketed.

BioTech president J. Robert Lemon said he expected to file in U.S. district court in Chicago.

Starch-blocker products claim to help weight control by impeding starch digestion, but FDA said manufacturers have not provided proof to support the claim.#

Nimslo mounts broader 3-D roll

By GAY JERVEY

Contrary to a previously announced gradual rollout, Atlanta-based Nimslo Corp. has decided to leapfrog from Florida to the entire East Coast with its new 3-D camera.

When introducing the camera in Florida this past March, Nimslo had talked of a gradual market-by-market expansion along the Eastern Seaboard. Now, it seems, as Florida goes, so goes the East Coast—in September, and all at once.

Ad plans have not changed substantially, however, although the company will produce some new radio and newspaper spots to support its tv campaign created by Ogilvy & Mather.

These developments surfaced last week immediately after the news that Nimslo had acquired 12.1%—an investment of 601,170 shares—in Berkey Photo, thus becoming the principal shareholder of the White Plains, N.Y.-based film processing company.

The shares were acquired for about $2.2 million in a privately negotiated transaction principally involving Benjamin Berkey, the company's founder and current chairman; other stockholders and trusts; a major shareholding company, and other transactions.

Sources suggest that the move took Berkey insiders somewhat by surprise, despite the fact that Mr. Berkey reportedly has been looking to sell for some time. "It's true, we really didn't know anything until the day it was announced, but I don't see what difference that makes," a company spokesperson said.

Although indicating that no plans are in the offing to seek control of Berkey, Nimslo is leaving the door open for additional stock purchases. "The acquisition clearly

B&W sues FTC, asks new cigaret listing

By RICHARD L. GORDON

WASHINGTON—Brown & Williamson Tobacco, battling in court to save the 1mg-tar rating of its Barclay cigarets, disclosed last week it has proposed a revamp of the Federal Trade Commission's tar reporting system that would halt the reporting of specific tar content numbers entirely.

After winning a court order that temporarily halts FTC's plan to strip Barclay of its 1mg status (AA, June 28), B&W officials let loose a June 9 memo it sent the commission urging that the various cigaret brands be lumped into four tar categories: Ultralow (under 6mg), low (6mg to 10mg), medium (11mg to 15mg) and high (above 15mg).

Barclay, whose eventual tar rating could be changed from 3mg to 7mg if B&W court efforts fail, would have a good shot at qualifying as an ultralow-tar brand under its proposed category system. Since its lower tar competitors would carry the same ultralow designation, the impact of the loss of its 1mg rating would be cushioned.

Meanwhile, however, B&W and FTC are preparing for a July 23 hearing in the U.S. district court in Louisville, the cigaret marketer's home base. The company hopes to convert a temporary restraining order, issued June 25, into a preliminary injunction that will extend the prohibition on FTC action against Barclay while the judge examines the dispute.

B&W attorneys won the temporary restraining order by arguing that FTC had violated its own procedural rules. FTC, the company said, should not have acted without first publishing its decision as a proposed "rulemaking" and inviting public comment. The company also said FTC acted on insufficient evidence.

In its June 9 memo, B&W complained that FTC's present method of reporting tar content, down to hundredths of milligrams in the case of the lowest of low-tar brands, encourages cigaret marketers to "exploit" the testing program and "mislead" consumers.

Brown & Williamson's memo said the current reporting system suggests to consumers that "there is a measurable difference between cigarets of 0.01mg and 0.5mg tar when, in fact, differences that small cannot accurately be measured by the test machine, and [that] tar differences of 1mg or less

Paddington liqueur gets heavy ads

By ROBERT RAISSMAN

NEW YORK—Paddington Corp. will introduce a new liqueur, Demi-Tasse, in three markets next month, supported by the heaviest spending a liqueur has ever received in three introductory areas, the company said.

Demi-Tasse will be sold through wholesalers in Southern California, New Jersey and Wisconsin, according to Russ Goyette, brand director at Paddington. The introductory marketing and sales promotion budget is about $1 million.

"We'll get good geographical dispersion in these areas," he said. "We know the distributors we've picked will be able to do the job for us."

Mr. Goyette said Demi-Tasse's competition is the entire cordial market. He said the company has not determined when it will expand into other markets.

■ The drink is a combination of coffee, cream and cognac with a suggested retail price of $17 per bottle. Paddington execs are hoping Demi-Tasse will experience the same success enjoyed by Baileys Original Irish Cream.

Baileys took the Irish liqueur

Flying those not-always-so-friendly skies

By Robert Reed

John Q. Businessman uncomfortably shifts in his seat as the airplane hums along at 37,000 feet above ground.

For Mr. Businessman the time has come to kill time. Having completed the day's paper work, exhausted the airline's meager supply of reading material and rejected the chance to watch a movie, he yearns for diversion. Slowly reaching into the seat pocket before him amid the motion sickness bags and used earphones, he retrieves an inflight magazine. Enthralled by its crisp design, provocative articles and panoramic photography, the executive eagerly digests it from cover-to-cover.

Upon arrival, Mr. Businessman phones the home office and decrees: "This inflight magazine is so good that I will never fly any other airline." In addition, he encourages the marketing department to begin advertising in it on a regular basis.

Such are the fantasies of some of the folks who produce inflight magazines. Alas, reality is much different.

"Nobody flies an airline because of the magazine," says Robert Pool, inflight manager for Webb Co., St. Paul, which publishes three inflight books. "But, if we can get a passenger to take it out of the pocket and read it, then we've accomplished the most important part of the job."

"We compete with everything on the plane—from looking out the window to drinking a double martini," says Jack Dunn, executive vp for New York-based East/West Network, the largest inflight publisher with 10 airline books and the *Amtrak Express* for train riders.

There are four major players vying for the passengers' attention and a larger cut of advertisers' budgets. East/West Network and Webb Co. are the two largest, with Miami-based Halsey Publishing, with two magazines, and American Airlines' solo effort bringing up the rear. American is an anomaly in that it is the only major carrier producing an airborne publication inhouse.

Executives of these publishing concerns agree the term "inflight" may still conjure up a generic raft of negative impressions—including the lethal perception the magazines are still primarily the airlines' house organs and have little consumer pulling power. But, they contend, the initial credibility troubles the industry suffered during their formative years of the late 1960s and early 1970s have been put aside.

Yet, as old problems pass, new ones arrive. Included among these are some very strong pockets of advertiser apathy, increased magazine competition and the challenge of taking more editorial risks while still appeasing the client airline, say publishing executives and observers.

Making the skies even bumpier is that all these shifts must come amid an economic climate that has already dismantled Braniff Airlines and promises further assaults on the air travel industry.

Photo by The Image Bank/Morton Beebe

Frontier *has a regional editorial flavor, while* United *and* American Way *are more national.*

Legend has it that inflight magazines were spawned as a means of threading together the various packets of information and advertising materials that were periodically stuffed in the passenger flight pockets. Coupons, rate cards, flight information and other travel-related data overflowed from the seats, prompting Pan American and United Airlines to conceive the tidy idea of consolidating all materials into one book.

Seeing a chance to tap into a fledgling but potentially lucrative market, publishing executive Jeffrey Butler persuaded officials of San Diego-based Pacific Southwest Airlines (PSA) in 1968 to grant him the contractural rights to produce *California* magazine. Soon, Mr. Butler obtained agreements with United's *Mainliner* and subsequently added Continental Airlines to his inflight roster. Other airlines followed and within a few years the majority of major carriers, including TWA, Eastern and Northwest, contracted with publishers and set forth with their own magazines.

For the airlines it proved to be a no-lose situation—a means of generating extra cash while improving their images with passengers. Then, as now, the contracts called for a number of options. Some publishers agree to produce the magazine at no cost to the airline and in turn receive distribution services and a set audience. Others set up a sliding scale where a certain percentage of the magazine's profits are returned to the carrier.

In the early going, the inking of airline agreements proved to be merely half the publisher's battle because the magazines were greeted, for the most part, with yawns from advertisers. Few media buyers, except those from travel-related industries, were willing to chance their dollars on a magazine segment of dubious editorial quality and unproven advertising worth.

"In the beginning, it was common to hear them labeled as car rental catalogs," says Mr. Dunn, referring to the industry that was initially the magazines' heaviest advertiser.

"In the early days we couldn't even get appointments [with advertisers]," says Bob Halverson, ad manager of Webb's inflights. "Now, they come to us."

Indeed, times are changing. Emerging from adolescence, the magazines shucked their "house organ" status and became slick, general interest monthlies. Now, ad directors boast about "upscale" readership demographics, and editors tout their books as forums for wit and creativity.

The combination of better editorial work and an affluent audience, suspended in the air with time on their hands, is proving to be an effective drawing card, say inflight executives. Still while most of the credibility battle has been won, there are other areas left to conquer.

"Things are better but we still have a way to go toward selling ourselves to the people we want," says James Kennedy, president of East/West and former United public relations officer.

Talk to an inflight executive and be prepared to hear one of the most overworked words in marketing—"upscale." Overemployed or not, the inflight salespeople consider the term to be the spine of their sales pitches. It is also a source of mild animosity between Air Group One, which represents Webb, Halsey and American, and East/West—because both have different ways of gauging their "upscale" audiences. While Air Group One represents those companies, each of their magazines also has a separate sales force and can sell ads on an individual basis.

The demographic profile of a "frequent flyer" reads like a blueprint of corporate America—predominately male, holding managerial positions and affluent, according to research figures supplied by publishing concerns.

Air Group One, according to Mendelson's Media Research's "Spring 1982 Survey of Adults and Markets of Affluence," prints an estimated 1 million copies monthly and yields 4.8 million readers with incomes of more than $40,000. A total of 71% of the readers are males in professional/managerial posts. East/West also prints about 1.3 million copies per month and tallies a monthly readership of 6.6 million, with each copy being read on the average by five persons. A total of 59.6% of the readers are men and 61.1% have incomes of more than $35,000, according to the latest figures from Media Mark Research Inc. (MRI).

East/West management contends that any comparision with Air Group One's numbers should take into account that Mendelson's counts only people in the more-than-$40,000 bracket, while East/West's MRI numbers include all readers—therefore giving a more accurate accounting of the company's total readership. Air Group One says that by keying in on the affluent, it allows for a clearer picture of the market its airlines serve.

Whatever the numbers, both groups have been reaping the benefits of advertising placed by the nation's office supply and computer manufacturers. Each publishing company attributes these combined segments with providing between 50% to 60% of the total revenue take. Xerox Corp., Hewlett-Packard and a bevy of office suppliers advertise in the magazines as they attempt to attract those high-flying readers.

Next come the travel staples of rental car companies and hotels, but from there the advertiser demand begins to taper off. While inflights have made some inroads in attracting the men's fashion business and jewelery companies, these items are relatively new to the landscape.

The list of advertisers not using inflights is more impressive. Liquor, beer, cigaret, automobile and insurance companies are the most glaring absences.

For example, Anheuser-Busch—which would advertise on the humps of camels in the Sahara if it would sell Budweiser—does not schedule a regular inflight buy.

Airline politics is the reason for the cigaret and liquor embargos. Many liquor companies will not advertise on an airline if they know that carrier will be serving a competitor's product and cigaret makers continue to be miffed about nonsmoking areas, according to publishing and ad executives. "We can't buy a cigaret ad, and the same is true for the beer companies," says Hank Thurnhorst, director of advertising for *American Way*. "It doesn't make any sense. I can go on the subway for 90 cents and see a Winston ad but not if I spend a couple hundred dollars to be on an airplane. It would seem people on the plane can afford cigarets the same as the subway rider."

Undaunted, the inflights are stepping up their own marketing salvos. No longer content at jousting with each other both East/West and the Air Group One are taking on business magazines such as *Forbes*, *Barron's* and *Fortune*.

"They are our real competition," says Webb's Mr. Pool. "If any new advertiser buys inflight then it is good for all inflights."

That corporate civility accepted, it should be noted

Robert Reed, an Advertising Age *reporter in Chicago, covers media operations.*

that for a relatively small industry a considerable number of competitive broadsides are hurled.

One recent example is a minor brouhaha over Continental Airline's magazine. Continental, long a client of East/West, apparently jumped to Webb, but the St. Paul-based company dropped the airline before producing its first issue. Webb says the airline's economically unstable condition did not merit the substantial startup costs the magazine would have needed.

East/West's Mr. Dunn contends Continental never signed a contract with its competitor, while Webb's Mr. Pool says not only was a contract signed, but a settlement was reached because of the episode. Whatever the details, Continental's magazine is still printed by East/West.

Such scuffling is minuscule when compared with the contract raids that periodically are conducted between the inflight companies. Publishers jealously guard their holdings while at the same time keeping a wary eye out for any signs that another client airline is becoming disenchanted with its publisher.

"We know the competition has made bids for our magazines and at times we have negotiated for some of theirs," says Mr. Pool. "But you have to be careful. There are some airlines you can't go after because current clients would object." He adds that TWA, a major client, has indicated it would frown if Webb linked up with a carrier with heavily overlapping air routes.

Raiding reportedly hit a zenith in 1980 when publishing powerhouse Ziff-Davis entered the inflight fray. Having already obtained *Pan Am Clipper*, *USAir* and *Republic Scene*, the company began making serious overtures to major clients at East/West and Webb, say executives at both companies.

Ziff-Davis' attacks were rebuffed and ultimately the publishing concern bailed completely out of the segment. Ziff-Davis officials said they abandoned inflights because they did not comfortably fit with the rest of its publishing business.

Competitors have taken Ziff-Davis' explanation a little further, saying the New York-based media concern failed because it was uncomfortable serving a client. Having made a success of its special interest publishing business by totally controlling its products, the company was unable to tailor its decision to serve an airline. Flavoring that dilemma was that Ziff-Davis could not sell its magazines as a package because there was little marketing synergy between the three.

East/West eventually picked up the pieces and acquired the Ziff-Davis properties.

Finally, the financial yield for Ziff-Davis, with annual revenues of about $200 million, was not enough to merit sustaining interest in the market. By contrast, East/West totaled an estimated $20 million in sales last year, down slightly from the previous year, and the inflight group contributed approximately $20 million of Webb's $134 million sales figure for last year.

Another victim of the ailing airline industry is Halsey Publishing, which published Braniff's *Flying Colors*. When Braniff declared bankruptcy May 15, the publishing company had already closed the June issue.

"We had to eat 210,000 copies. They were already printed and distributed but we couldn't bill advertisers so we had to take the loss," says Hal Winter, vp-advertising with Halsey.

The inflight segment has undergone other changes, some cosmetic and others of more substance. A notable change in the inflight business is United Airlines May retirement of the age-old *Mainliner* title in favor of a simple *United* logo. In a way the name switch can be viewed as an interesting barometer of changing times. During the 1930s, the *Mainliner* title was used to promote United's first DC-3 aircraft, which flew the air carrier's first East to West coast routes. Today, "mainliner" is considered a street term for heroin users and not exactly the thought United wants popping out at passengers when they pick up an issue, according to executives of East/West.

That public perception is all-important. Business managers believe a positive public image is the key to keeping the client happy and editors espouse a philosophy that the "warmer" the editorial image the easier it is for the passenger to relate to the magazine.

Warmth can be generated in different ways. While all inflights profess to be of general editorial interest the means each employs is quite different. A layman's guide to inflights could break down into three categories—national, regional and digest forms.

Allowing for some geographical overlap the categories are as follows:

- National books: *United, Pan Am Clipper, Ambassador, Delta Sky* and *American Way.*
- Regional books: *Northwest Orient Passages, Frontier, Ozark, PSA, Republic Scene* and *USAir.*
- Digests: *Continental Extra* and *Eastern Review.*

Editors bristle at the suggestion that the editorial content of all inflight magazines is basically the same. But, while the forum is different, the ideas revolve around many of the same topics with stories on personalities, travel, business trends and those "upscale" life styles adding to the majority of coverage.

What they do they do well. A spot check of recent inflights showcases some professional and insightful work. *United* recently scored with a story on Barbara Proctor, a black advertising executive making gains in Chicago; *Ambassador* countered with a cover profile of Paige Rense, editor-in-chief of *Architectural Digest, Geo* and *Bon Appetit. Northwest Passages* opened its pages to a charming pictorial story on Montana, and *Pan Am Clipper* featured an interesting montage on Japan.

Other examples: *Republic Scene's* portrait of Chicago's Second City comedy troupe and *American Way's* report on some Xerox corporate desk jockeys who braved "Outward Bound," a vigorous outing in the wilds.

"We like to surprise readers, give them stories with wit and also educate them about certain developments," says Dave Martin, editor of *Ambassador*, considered by even the competition to be the best of the inflights.

Witty they may be, but hard-hitting and provocative they are not. Inflights are not the forum for tough-minded journalism. They will happily run a profile of a corporate magnet but will never cross-examine and challenge. Instead, the formats provide more softball interviews with chief executive officers and an occasional "pro and con" piece on an issue of the day.

"I find it hard to tell the inflights apart now—they are more homogeneous than in the past, less willing to take a chance," says James Morgan, articles editor with *Playboy* and former editor of *Ambassador.*

"We are not going to do stories that say, 'All lawyers are shysters,'" asserts Fred Smith, East/West editor-in-chief and a former Time Inc. editor. "We don't see a need for it and it's not going to work."

In the final analysis, the airline is the court of last resort and has the right to spike any story. That is rare, but then the editorial perimeters have already been set, and one knows not to go beyond them, say editors.

But one question remains: Have these magazines peaked as advertising and editorial vehicles? Managers and editors do not believe the mountain has been conquered and it is all downhill from here. Although they concede that times are harder and occasionally grouse that new editorial directions are fewer, they believe inflights are poised and ready to blossom.

"The only problem is the airlines. Some don't want a thick book because of the added weight to the plane and the extra fuel that it would consume," says Halsey's Mr. Winter. "But I don't see a cap to the potential—even in today's tougher economic climate." AA

Comparing the largest circulation U.S. inflight magazines

	Publisher	Copies distributed monthly*	B/W page rate	4/C page rate	1981 total ad pages

Coke, Pepsi try extended-family concept

Coca-Cola Co. is putting new Diet Coke into a full range of containers, including its famous shaped bottle. Pepsi-Cola will offer Pepsi Free caffeine-free cola in regular and diet versions. Both products hit the market in August, with massive ad spending behind them.

Spending pace quickens

Cola giants offer brand extensions

By NANCY GIGES

The two major cola marketers, agreeing that the coming months will bring change such as the soft-drink business has never before experienced, are each betting their brand names on different market segments. Both Pepsi-Cola and Coca-Cola, introducing different drinks, vow to support them with some of the heaviest advertising ever.

Despite its strong protests against Seven-Up Co.'s anti-caffeine advertising earlier this year, Pepsi-Cola now finds itself introducing Pepsi Free caffeine-free cola. The drink, in regular and diet varieties, reinforces Pepsi's notion that caffeine-free soft drinks should usher in a new era of cola marketing. Pepsi acknowledged that Pepsi Free was in the works for years, leading industry observers to make the point that its anti-7UP outburst may have been an attempt to protect more than regular Pepsi-Cola (AA, March 1).

Pepsi said Pepsi Free will receive advertising and promotional support at a $100 million annual national rate in its eight test markets, with no cutbacks on its other major brands. Coca-Cola, spending more

FCC may let nets into cable

By MAURINE CHRISTOPHER

The Federal Communications Commission methodically is moving toward reconsideration of all the major rules that have restrained tv's Big 3 in program production, syndication and cable systems ownership.

Next up on the heavy summer schedule and expected to be authorized for a rule-making procedure this week are the strictures against conventional network tv ownership of domestic cable systems and the ban against cross ownership of cable systems and over-the-air tv stations in the same markets by any company.

A rule-making notice means only that the commission will at least vote again on a crucial issue. It doesn't necessarily mean the regulators will vote to open cable to conventional telecasters without limitations.

However, FCC chairman Mark Fowler makes no secret of his desire to rip down as many barriers as possible. He wants to let the new and the old electronic media fight it out in the marketplace for the viewers' time and the advertisers' dollars. And he advocates a minimum of government interference.

While CBS already has moved back into limited cable systems ownership on a waiver permitting up to 90,000 homes, ABC pushed for revocation of the 12-year-old rule banishing networks from wired tv system operation. ABC's request was filed in support of an earlier petition from Marsh Media Ltd., which called for elimination of the cable/tv, same-market rule and an end to the ban on network cable ownership.

All three conventional networks argue that the competitive picture has changed radically in the past decade. Consequently, they say they should be allowed to compete freely in all the video

Federal fuels war in packet delivery

By ROBERT RAISSMAN

Federal Express Corp., facing increasing, big-buck competition in the air freight field, is making another commercial assault on the U.S. Postal Service, which protested against an earlier derogatory spot.

The 10-second spot, which began running July 1 in 15 major markets, shows a man shaking as he prepares to lick an envelope. An off-camera voice says: "You've got a lot riding on that letter and you're going to turn it over to the post office?" The spot is slated to run through August. A spokesman for the U.S. Postal Service would not comment on the spot, adding, "I'm not going to compare this commercial to the first one."

The ongoing Postal Service flap is probably of minor concern to Federal execs. The company finds itself operating in an environment where advertising dollars are being spent at an increasingly accel-

Low-cost 35mm line debuts

Canon invades Kodak turf

By GAY JERVEY

New York—Canon U.S.A. plans to cross into Kodak country with its new automated 35mm camera, which comes in two brightly colored models and should sell in that magic price range—$100 and under.

The subsidiary of Tokyo-based Canon thus becomes a full-fledged proponent of the "point and shoot" school of amateur photographers, largely the domain of American marketers and their non-35mm lines.

Called the Snappy, the new camera line will carry suggested prices of $145 for the higher-brow Model 50 and $115 for the more rudimentary Model 20. However, given discounting trends, they are expected to retail for $100 and $80, respectively—and probably lower. As such, they would be priced somewhat competitively with Kodak's new, highly touted disc camera that reached retailer shelves in May. The existing disc models list for between $67.95 and $142.95 but are reportedly selling for much less.

According to Canon U.S.A. president Fujio Mitarai, the company will spend $3 million on advertising between September and Christmas, with the budget probably escalating to some $8 million next year.

However, industry sources suggest that a four-year blueprint calls for spending $40 million over the

DUMPS PROPOSED SETTLEMENT

FTC bows out of ad rate foray in 'Times' case

By RICHARD L. GORDON

WASHINGTON—The "free market" in newspaper ad pricing weathered its worst scare in years last week when the Federal Trade Commission changed course and freed the *Los Angeles Times* from precedent-setting restrictions on retail advertising discounts.

The unanimous decision signals FTC disenchantment with the theory that annual volume discounts offered by newspapers give big retail advertisers an unfair advantage over their smaller competitors. And it recognizes that a government order that would force costs up for a newspaper's major advertisers could injure newspapers' ability to compete with other media.

The commission action scraps a tentative settlement with the *Times* (AA, Sept. 28) that would have pressured the newspaper to use an FTC-sanctioned cost formula to determine future retail ad linage discounts. Under the FTC formula, the maximum discount for the *Times*' biggest retail advertisers would have been 26.765%, compared with discounts at the paper that FTC said have ranged as high as 40%.

Rate-card discounts using the FTC-sanctioned formula would have been accepted by the commission as nondiscriminatory and cost justified. *Times* ad executives would have been free to use other methods for determining discounts, but these rates would have faced scrutiny and possible challenge by FTC antitrusters.

The case settles for the time being the controversy over whether FTC should apply the principles of the federal anti-price discrimination law, the Robinson-Patman Act, to advertising rates. In statements released Friday, FTC's Republican chairman James C. Miller III said "it seems quite clear that the intent of Congress was to leave advertising rates outside the reach of the Robinson-Patman Act."

Democratic commissioner Michael Pertschuk, FTC chairman when the *Times* case was brought in 1977, and who tentatively supported the *Times* pact last year, said he is now convinced that its benefits to competition "are much more uncertain than we had believed."

Commissioner Pertschuk said there is no "repudiation" of Robinson-Patman principles, a subject of controversy among economists and lawyers, involved in the commission's decision. It is "only a decision that it is inappropriate to apply to them in this case," he said.

He added that it made no sense to apply anti-price discrimination

The look of satin for Satin cigarets

Luxurious is the look of advertising for Lorillard's new Satin low-tar cigarets, testing in Denver and Milwaukee (AA, May 31). Available in regular and menthol, Satin has a "satin tip." This spread is part of a four-page newspaper insert. MCA Advertising, New York, is the agency.

Fritts gets back in NAB race

WASHINGTON—Mississippi radio broadcaster Edward Fritts has changed his mind and joined the race for the presidency of the National Assn. of Broadcasters. Mr. Fritts, currently NAB's elected chairman, and five other candidates, including American Advertising Federation president Howard Bell, were interviewed by a search committee last week.

Mr. Fritts only recently said he wasn't interested in competing for NAB's presidency (AA, June 21), and had agreed instead to chair the search committee created to find a replacement for retiring NAB president Vincent Wasilewski. He surrendered that job when he announced his candidacy.

Mr. Bell had served as director of the NAB code authority in the 1960s before moving to the AAF presidency more than a dozen years ago. AAF chairman David Keith said Mr. Bell has told him he is a candidate for the NAB job. "It's Howard's decision," Mr. Keith told ADVERTISING AGE last week. "He will make the decision on what he feels is best for him, best for the AAF and best for NAB."

Rounding out the list of candidates under review last week: Thomas Sawyer, exec vp, Ohio Assn. of Broadcasters; former NAB board chairman Donald Thurston, president of Berkshire Broadcasting, North Adams, Mass.; NAB exec vp-general manager John Summers, and former Federal Communications commissioner Robert Wells, chairman of Broadcast Music, New York. Mr. Fritts heads Fritts Broadcasting, Indianola, Miss.

Additions to the candidate list are possible, but the search committee hopes to have a selection made by Aug. 9 when NAB's tv and radio boards of directors are scheduled to meet in Chicago.

Replacing Mr. Fritts as co-chairmen of the search committee are NAB tv board chairman Gert Schmidt and radio board chairman William Stakelin.#

Pay tv to try series programing

By SUSAN SPILLMAN

NEW YORK—Pay tv, spawned by following the movie theater approach, is now hoping to capitalize on the formula that propels commercial tv: Series programing.

With more pay networks turning on, and studios turning out fewer flicks, proponents of the new medium are looking to new and old series in an effort to differentiate themselves from one another, create viewer loyalty and fill 24 hours of airtime economically.

This winter Home Box Office will premiere "Fraggle Rock," its first original half-hour series featuring a new family of Muppets created by Jim Henson. In addition, this year pilots for three other possible comedy series will air, with at least one expected to debut in 1983. Pilot scripts for three dramatic series are also under way.

Showtime, which pioneered such pay tv series as its "Speak up America" magazine program and the "Bizarre" comedy show, recently premiered two adult soap operas and is trying to redevelop commercial tv's short-lived "Paper Chase." Plans for the network call for a total of seven series to be run-

Cliff gets Seagram post

NEW YORK—Michael P. H. Cliff has been named president of Seagram Wine Cos., the recently announced unit directing all activities of the company's U.S. wine businesses. Mr. Cliff, formerly exec vp-operations and development, succeeds Stephen Herbits, earlier president of Browne Vintners, who resigned. Prior to the formation of the umbrella unit, Mr. Cliff had been president of Seagram's Gold Seal Vineyards.

In addition, Samuel Bronfman, the son of Seagram chairman Edgar M. Bronfman, has been named exec vp-sales of Seagram Wine, succeeding Elliott A. Fine, who resigned. The younger Bronfman had been northern California state manager for Seagram Distillers.

Other people on the move:

Richard T. Miller to vp-general manager, Six Flags Magic Mountain, Valencia, Cal., from director of general services. Mr. Miller succeeds **Dan Howells**, who becomes exec vp, Six Flags Corp., Los Angeles. Also, **Robert Bennett** to new post of director of special projects, Six Flags Corp., from director of marketing, Magic Mountain. **Cheryl Derbyshire**, Magic Mountain advertising/research manager, assumes Mr. Bennett's previous post.

Seymour Morgenstern to vp-executive assistant to president-chief operating officer Linda Wachner, Max Factor & Co., Hollywood, from senior vp-marketing and purchasing administration. Also, **Lin Stinson** to senior vp-U.S. sales, from vp-food division. Both are new posts.

Meredith A. Young to director-advertising and sales promotion, a new post, Singer Co.'s U.S. consumer sewing products division, Elizabeth, N.J., from account manager, Compton Advertising, New York. Also at Singer, **Frank E. Bray** to vp-marketing support, a new post, from director-product management, where there is no successor yet.

Richard G. Burton to vp-marketing, Alco Standard's paper products group (Unisource), Valley Forge, Pa., from vp-sales, Mead's fine paper division, Dayton, O. He succeeds **James J. Swearingen**, who is now exec vp.

P. Richard Hughes to director of marketing, Boorum & Pease Co., Elizabeth, N.J., marketer of office supplies, from marketing manager, Pendaflex Systems, Esselte Pendaflex Corp., Garden City, N.Y. Also at Boorum & Pease, **Robert B. Grove** to manager-advertising and sales promotion, from director of marketing services, Bates Mfg. Co., Hackettstown, N.J.

Garrett S. Hart to vp-research, Paramount Pictures, Los Angeles, from director.

Sanford G. Weiner to group vp in charge of food and paper products, Procter & Gamble Co., Cincinnati, from vp, food products division. Named manager, food products division, is **Ben L. Bethell**, formerly associate manager, food products.

Bruce W. Simpson to vp-marketing and sales, a new post, Fisons Corp., Bedford, Mass., pharmaceutical company, from director of marketing.

Barbara Royce to advertising manager, Redken Laboratories, Canoga Park, Cal., a new post, from manager-marketing communications, Pertec Computer Corp., Chatsworth, Cal.

Angela Murphy to director of marketing and pr, Seaport Village, San Diego, a new post, from marketing director, University Town Centre, La Jolla.

Ellen Pensky Owens to advertising-pr manager, ComPath, Oakland, telephone systems company, a new post, from advertising-pr coordinator.

David B. Lentz to director of advertising and sales promotion, U.S. Ordinary Marketing Operation, Pan-American Life Insurance Co., New Orleans, from manager-advertising and sales promotion.

Anthony Meade to vp-marketing, a new post, Parfums Stern Inc., New York, from vp-worldwide marketing, Scannon Ltd.

Robert Friedman to exec vp-marketing, PolyGram Pictures, Culver City, Cal., from president, domestic distribution, Columbia Pictures, Burbank. He succeeds **Mike Bisio**, who became vp-general sales manager, Columbia.

Richard Pollick to senior marketing manager, a new title at Toro Co., Minneapolis, from vp-marketing, Arctic Enterprises, Thief River Falls, Minn.

Joseph Flannigan to group product manager, established products, Beech-Nut Nutrition Corp., Fort Washington, Pa., from business unit manager, cranberry drinks, Ocean Spray Cranberries, Plymouth, Mass. He succeeds **Tim Britt**, who left.

Bernard (Buddy) Golden to vp-general sales manager, MGM/UA Entertainment Co., Culver City, Cal., from vp-assistant general sales manager. He succeeds **Jerry Esbin**, who earlier became president-motion picture marketing and distribution.

Also:

Robert B. Tarkington to product manager-retail breakfast products, Kitchens of Sara Lee, Deerfield, Ill., from associate product manager...**Steven Kendall** to product manager-Ralston Hot Cereal and new ready-to-eat cereals, a vacant post at Ralston Purina, St. Louis, from assistant product manager...**Lois Mateus** to vp-corporate communications, Brown-Forman Distillers, Louisville, from commissioner, State of Kentucky Department of the Arts...**Mike Russell** to advertising manager, Florida Food division of Lucky Stores, Tampa, from assistant advertising manager, midwestern division, Milan, Ill.#

Needham & Grohmann forms southern unit

FORT LAUDERDALE, FLA.—Needham & Grohmann/Southern Division has been formed here. The new unit will operate as a wholly owned subsidiary of the New York-based Needham & Grohmann, under the supervision of Charles M. Edgar, division president and chief operating officer.

The new company will handle the P.G.A. Sheraton resort in West Palm Beach; the Sheraton at St. John's Place in Jacksonville; the Palm Beach Social Review, and Resorts International Bahamas Ltd. The N&G division is located at 1620 S. Federal Highway, 30062.

Ciba-Geigy readies new otc drug move

By NANCY GIGES

In what appears to be a case of history repeating itself, Ciba-Geigy has formed a new unit, Ciba Consumer Pharmaceuticals, as it again attempts to become a factor in the over-the-counter drug business.

The U.S. subsidiary of the large Swiss drug company has toyed with nonprescription products, but has never seemed wholeheartedly committed to the support of such an effort.

The new division is headed by Jeff Lyle, formerly division vp-proprietary products. Gerald Ostrov, formerly group product director, Johnson & Johnson wound care products, has been named vp-marketing of the new unit, which is based in Edison, N.J.

According to a spokesman, the first products moved to the division are Vioform antibacterial ointment, Privine nasal spray and Nupercainal anesthetic ointment. Ciba has named Ogilvy & Mather Partners as one of two agencies that will handle the brands. The company said the other shop has not been named since it still must decide on how the advertising assignment will be divided.

Retailers begin advertising new herpes drug—Page 10.
Timex jumps into healthcare marketing—Page 68.

Last year, Ciba was one of the first clients of Sudler & Hennessey's new consumer group, but the nature of the assignment was never disclosed. Sudler is a subsidiary of Young & Rubicam. The Ciba spokesman said ethical promotion of those products will continue to be handled internally.

Another group of products that eventually could be marketed by the new unit is the Transderm line, which currently is sold only by prescription. One of these products, Transderm-Scop, a drug to prevent motion sickness, is packaged as a thin disc that is placed behind the ear and intended to last for three days. It avoids the side effect of drowsiness sometimes caused by the most popular medication, G.D. Searle & Co.'s Dramamine.

Ciba was expected to apply earlier to the Food & Drug Adminis-

Hershey befriends extra-terrestrial

By JOSEPH M. WINSKI

About those little bits of candy used by the young protagonist in "E.T." to establish rapport with the title character:

They look like M&M's. They're not.

They apparently could have been M&M's, if somebody at Mars Inc. had made the right decision. He didn't.

So what they are, instead, are Reese's Pieces, made by Mars' archrival Hershey Foods. And Hershey is reaping a promotional bonanza from the record-setting Universal Pictures film.

According to the company:

- Sales of Reese's Pieces, which apparently are not confused with M&M's by candy cognoscenti—*i.e.*, the same youngsters who are seeing "E.T." in droves—were up 70% in June from May.
- Not sold in movie theaters before "E.T.," Reese's Pieces are now carried, and promoted with appropriate "E.T." point-of-sale material, in at least 800 theaters, with more orders from theater operators coming in daily.
- Hershey is offering "E.T." T-shirts, posters and stickers, all avail-

Brands face budget trims; Erlanger may go

Stroh studies Schlitz cuts

By ROBERT REED

A series of dramatic marketing options concerning the acquired Jos. Schlitz Brewing's brands are being considered seriously by Stroh Brewery Co., including significant cutbacks in advertising support for Schlitz and Schlitz Light and the discontinuation of the failing Erlanger superpremium.

Also, Stroh has redesigned its marketing department via a bevy of personnel promotions and additions, which did not encompass some key Schlitz executives. One of those excluded is Anthony Amendola, exec vp-marketing for Schlitz. Mr. Amendola will remain in an advisory capacity during the Schlitz/Stroh transition period but will leave by the summer's end, according to brewery sources.

In addition, the Detroit-based brewer has begun its divestiture of Schlitz holdings by placing Geyser Peak Winery, a California subsidiary, on the block with an asking price of about $30 million.

So far, however, there has been no apparent progress in selling the Milwaukee brewer's canning factories or a Southeast brewery.

Stroh is considering paring down ad support for the Schlitz brand; new ads that were ready to go from J. Walter Thompson USA have been killed. Sources say it intends to make Schlitz a lower-priced brand behind a premium—and national—Stroh's.

Schlitz Light, which has recently undergone a reformulation, redesign and a new ad campaign, is expected to have much of its marketing support withdrawn, say industry sources. There is a possibility the new Schlitz Light campaign that features the theme, "Schlitz

(Continued on Page 71)

Anacin's fighting with Neal

NEW YORK—The first advertising for Anacin from William Esty Co. is quite a departure from the hard-hitting superiority claims American Home Products has been accustomed to making against the leading pain reliever, Tylenol.

New tv spots feature actress Patricia Neal—who recovered from a serious stroke—saying she's always been a fighter and has played many different roles in her life. But she's never talked on tv about painkillers for headaches. And Anacin blocks the pain of headaches, she states, urging: "Fight back with Anacin."

Anacin knows about fighting back. The brand has been fighting to regain millions of dollars of business it has lost as Johnson &

No-caffeine pitch working for Seven-Up

ST. LOUIS—As Pepsi-Cola Co. prepares to launch its no-caffeine entry, Pepsi Free (AA, July 12), Seven-Up Co. is building up steam with Like, its no-caffeine cola entry that has been testing in eight markets since the end of March.

In Dayton, O., Like has obtained over a 4% market share, as has Royal Crown's Decaffeinated RC, sources report. A buyer for a major grocery chain there said Like "started out more slowly than [Seven-Up] expected," but that it has been "picking up in the last two or three weeks. More people are coming in looking for it now."

In the company's home market here, Jim Moss, soft drink buyer for the Schnuck's chain, confirmed this assessment. In addition, he said, sales of regular 7UP are increasing, up as much as 15% to 20%. Although Mr. Moss said there is no way this growth could continue, he expects sales to stay at this plateau.

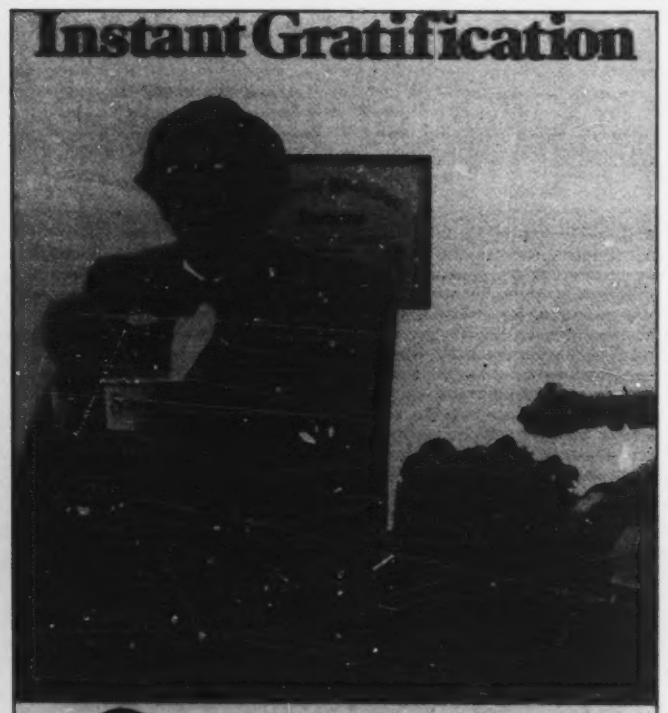
The 7UP brand's controversial no-caffeine ad campaign apparently is netting results nationally, as well. Industry analysts report the previously ailing soft drink has seen a boost between 8% and 10% during the past four months, when compared to last year's figures from that time.

If sales continue to increase, the Seven-Up Co. could see its first market share rise within the past four years.

Joe Doyle, beverage analyst with Smith Barney Harris Upham, New York, stated the 7UP brand could jump 7% in market share by the close of the year.

Still, analysts are uncertain the jump can be attributed to the "no-caffeine" push. "There has been an awful lot of money pumped into the product and it has generated attention," said Mr. Doyle. "But, if that can sustain interest in the product remains to be seen."

N W Ayer, New York, handles the 7UP business and conceived the estimated $35 million "no-caffeine" campaign. Backer & Spielvogel, New York, is the agency for Like cola.#



Staff still mulls local cross-ownership issue

Tv nets keep cable plans quiet after FCC decision

By RICHARD L. GORDON

WASHINGTON—Cable strategists for ABC, CBS and NBC were keeping their future plans under wraps after the Federal Communications Commission took the first step toward eliminating its 12-year-old ban on network ownership of cable tv systems.

All three nets expressed satisfaction after FCC, as expected (AA, July 12), proposed a rule change last week that would permit them to take a position in cable ownership. Proposals to permit tv stations to own cable systems in their local markets, more controversial than the network issue, are still being worked on by the staff.

CBS, which already has FCC experimental approval to own cable systems serving as many as 90,000 subscribers, said through an official it has no plans for wider cable ownership "at this time."

An NBC lawyer in Washington said the network has been holding "internal discussions about possible ownership of cable, but isn't prepared at this time to announce anything." At ABC, which had publicly attacked the prohibition on cable ownership as discriminatory, a spokesman would say only that officials are "very pleased."

While agreeing to consider officially changing the network cable ownership ban, the commissioners also invited advice on writing new ownership "concentration" guidelines that would help them determine how large video conglomerates should be permitted to grow. These concerns are likely to surface again when and if FCC chairman Mark Fowler pushes proposals to drop such restrictions as the local over-the-air/cable tv cross-ownership ban and the policy that bars ownership of more than seven tv stations.

John Quale of Kirkland & Ellis, counsel for Marsh Media, Amarillo, Tex., said his client was pleased that the FCC has started a rule-making procedure to eliminate the network cable ban, and hoped it will move promptly to take up the local tv-cable cross-ownership issue as well. Marsh's petition for local relief predated ABC's request for action on the network front.

The National Cable Television Assn., whose members include companies with holdings in both broadcast and cable tv, said it is not opposed to FCC's decision to reconsider the ban on network ownership of cable systems because support is not "conclusive." But it expressed more serious reservations about changing the policy that currently prevents tv stations from acquiring cable systems within their local viewing areas, contending there is "substantial" evidence to justify the restriction.

NCTA also vigorously supports government policy that prevents local telephone companies from entering the cable tv business within their monopoly telephone service areas.#

Couched promise

Subway posters in New York take a humorous look at the psychiatrist, his couch and the pleasures of indulging in Schrafft's ice cream. The agency is Fisher/Feld.

'News' sets deadline for union talks

By STUART EMMRICH

NEW YORK—The Tribune Co. has set another deadline—Aug. 6—for reaching staffing cutback agreements with the 11 unions at the company-owned *New York Daily News*.

Although *Daily News* publisher Robert Hunt stopped short of saying a failure to reach an agreement would mean a shutdown of the paper, he told employes that such an impasse would mean circulation cutbacks that could eventually lead to a closing.

Mr. Hunt called the cost-saving tactic of shrinking the paper's circulation in various parts of New York a "distasteful" measure that could force a closing of the paper by 1984.

As an incentive to avert that possibility, Mr. Hunt said he was offering the unions a three-year extension of all labor agreements—including those that contain job guarantees—beyond their present 1984 expiration date. He also proposed "substantial" termination bonuses for eligible employes in unions whose contracts do not provide for job guarantees.

"If the survival plan is implemented, the *News* can reach the

Top 30 national ad performers in 1981

Newsday *tops list of newspapers that scored highest gains*

Among newspapers, the scramble for national advertising has its share of winners.

To find out just who they are, ADVERTISING AGE asked Media Records in New York to help determine the newspapers that performed the best in 1981 when it came to getting general and automotive national advertising.

What follows is a ranking of the top 30 papers scoring the largest gains in national advertising, 1981 vs. 1980.

Each listing carries the following information:

- A performance index, noted below the paper's name. The index was determined by adding the paper's increase in the number of national ad pages and the percentage increase. This sum was then compared with the average performance of all 203 papers that Media Records measured. For instance, *Newsday* had an increase of 804 ad pages, or a rise of 15.95%. The sum of those two figures, 819.95, was then divided by 95.41%, or the performance index for all 203 papers, resulting in a performance index of 859.4.
- Number of national ad pages recorded in 1981.
- Gain in national ad pages, 1981 vs. 1980.
- Percentage gain in national ad pages, 1981 vs. 1980, rounded off to the nearest tenth of a per cent.
- The newspaper's daily and Sunday circulations, according to Audit Bureau of Circulations. The figures are based on the six-month period ending March 31.
- Percentage gain in circulation, based on the March 31 ABC figures of 1982 and 1981.
- The national ranking of the paper by circulation, based on the March 31, 1982, ABC figure.

The rankings do not include the *Wall Street Journal*, which, if counted, would rank No. 1 in daily circulation.

The study on these pages has been compiled by Media Records Inc. for exclusive publication by ADVERTISING AGE. This data may not be duplicated, reprinted or republished in whole or in part without explicit permission from Media Records Inc.

IT'S TIME TO STOP CALLING US "ONE OF THE BEST SMALL PAPERS IN AMERICA."

The truth is the St. Petersburg Times is one of the best big papers. The biggest newspaper between Washington and Miami ... with a morning daily circulation second only to the Miami Herald in 12 southern states.

What's more, the Times is the fastest growing newspaper in Florida — daily and Sunday. And the readership of the combined St. Petersburg Times and Evening Independent is going up more quickly than that of any other newspaper combination in the state.

So if you want to reach decision makers in one of the healthiest markets in America, reach for the phone and call your Times and Independent representative. Our circulation is good.

St. Petersburg Times
& Evening Independent

Time out with the editors

Views on what it takes to keep healthy newspapers healthy

What is the mix that makes a successful newspaper successful? We quizzed a group of editors on this subject and all agreed that a topnotch editorial product is the prime ingredient. Here are their comments:

William Thomas, editor, *Los Angeles Times*: Probably the greatest strengths of our paper lie in its diversity, in the quality of its writing and in the range of its story reach. This paper, of all the metropolitan newspapers, includes in its daily menu of information more stories outside the ordinary, outside the usual definition of a newspaper story, than any other paper.

William Thomas,* Los Angeles Times: *"...the greatest strengths of our paper lie in its diversity...."

The quality of writing is perhaps the first thing we look at in an applicant, unless, of course he's a writer in a very specialized field, in which case there are other qualities that may be even more important than writing. Every writer doesn't have to be a poet, but we certainly love to get the poets.

James Gannon, executive editor, *Des Moines Register*: What makes us good is our effort to provide comprehensive statewide coverage. The Register is close to unique in the country for a city newspaper in that its circulation and news focus are statewide. We attempt to cover Iowa, from east to west and north to south, in a way that will give people who live here a sense of the state.

We have six bureaus scattered around the state, and we have a very large state desk operation and a number of roving reporters. Since so many people who live in Des Moines grew up in Alogona or Council Bluffs or some small town in the far corners of Iowa, there's a great deal of interest among people here in the capital city in what goes on out there.

Thomas Winship,* Boston Globe: *"The key is... being on the cutting edge of the significant issues...."

Anthony Insolia, editor, *Newsday*: The word we use here a lot to describe the paper is essential. We're a very essential newspaper. We are regional in that we cover a disparate geography in which one of the few central links is Newsday. There's the Long Island Lighting Co., the Long Island Railroad and Newsday.

If anybody really wants to know what is going on in Long Island over-all, we provide that information. We're the only ones who provide that information. At the same time we give a good foreign and national report. People out here don't need another newspaper if they choose not to read another one.

Eugene Patterson, editor, *St. Petersburg Times*: We try to report, write, analyze and illustrate the news intelligently, and to offer unexpected pieces regularly. Our foreign editor was reporting from Riyadh (Saudi Arabia) the day our sports editor was covering the Indianapolis 500. We spend a lot of energy departmentalizing the news so the reader can comfortably find what he's looking for.

Robert Ingle, executive editor, *San Jose Mercury News*: We try to give, in addition to a comprehensive regional

Of all advertising print media, a newspaper lives the shortest life. Read and discarded in one day, its ad-packed pages hardly ever get seen more than once. But for about the cost of just 1,500 lines of newspaper space in a typical Metro market, *Outdoor Advertising* provides 30 days of exposure reaching 70% of adults better than 7 times.* Now that's a campaign! So to find out how your sales message can be seen by a crowd instead of in a crowd, call the Institute of Outdoor Advertising at (212) 986-5920.

THE NEWSPAPER INSERTION VS. THE OUTDOOR CAMPAIGN.

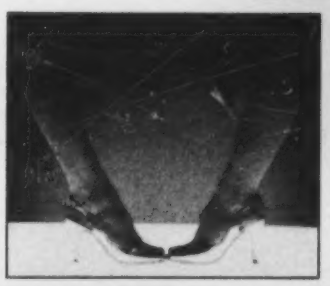
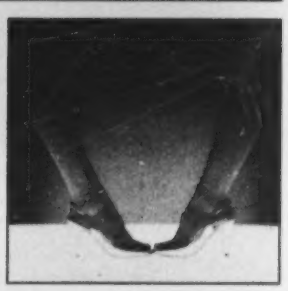
Pulling some legs

No Nonsense Fashions claims its new Ultra Sense sheer pantyhose won't pull out of shape, as stressed in this tv commercial set for network tv this fall (AA, Jan. 25). Theme is: "With Ultra Sense, I've got pull." Grey Advertising handles.





Cash-discount sales get big Exxon drive

By ROBERT RAISSMAN

In an effort to convince motorists to reach for their dollars rather than their plastic, Exxon U.S.A. will back its new discount-for-cash program with a national tv campaign.

Exxon would not reveal budget figures, but industry sources estimated Exxon would be spending in the $6 million-to-$8 million range for what is believed to be a monthlong campaign.

The nation's largest oil company—and largest corporation—will begin cutting prices to dealers next month to enable them to give discounts on cash purchases. This move by Exxon fits in with a pattern that has seen gasoline marketers return to pitching products and services rather than image.

Gasoline marketers and refiners have faced shrinking profits and are now trying to cut costs. One major area they have centered on has been their credit card operations. Amoco Oil said last month it would be starting a discount-for-cash program, and other major oil companies, including Mobil and Texaco, have tested discount-for-cash or charging fees for using credit cards in various cities.

■ Their efforts are targeted at staying competitive with companies such as Atlantic Richfield and Pennzoil Co., which have dropped credit card operations, and independent retailers (*i.e.*, Southland Corp.'s 7-Eleven outlets), who traditionally charge less at the pumps.

Although Exxon has not decided the exact discount dealers will receive, in a recent test of the program in

SINGER'S AD ROLE NOT IN JEOPARDY

P&G rumor hits Loretta Lynn

By JENNIFER ALTER

The rumors linking Procter & Gamble with satanism are affecting more than the company and its reputation.

Country singer Loretta Lynn, the celebrity spokeswoman for Crisco, received enough calls and letters about her connection with the P&G brand that she became quite upset and, at first, questioned the association.

David Skepner, exec vp of Loretta Lynn Enterprises, said Ms. Lynn had received "just bags of mail" during the past several months. "If it had only been one or two, we could throw those out. But when you start getting those in sacks you have to look into it," he said in a telephone interview. He noted that a lot of the letters came from Texas.

In an earlier letter to Advertising Age, Mr. Skepner said "the effort directed against Loretta had reached such proportion that she was genuinely concerned." He noted that Ms. Lynn "has been doing commercials for Crisco for almost four years. . .and I hate to admit that this kind of a situation could have put the relationship in jeopardy."

Elaborating on this letter, Mr. Skepner said that once Ms. Lynn learned the problem was of a corporate nature rather than something directed at her personally, she felt better. She never seriously considered severing the P&G relationship, he added.

Some of those contacting Ms. Lynn reportedly have threatened to stop buying her records. However, MCA, under whose label she records, said sales have not been hurt.

Although Ms. Lynn initially was to have been made available for an interview with Ad Age, P&G apparently put a stop to any such ar-

Final 'M*A*S*H' eyes tv record

By COLBY COATES

New York—It looks as though CBS will air next year's two-hour "M*A*S*H" finale on Sunday, Feb. 27. And there is a strong feeling at both CBS and producer 20th Century-Fox that the final episode will rack up "Dallas"-sized viewer numbers.

Sources familiar with the scheduling hedge a bit, indicating that in network tv nothing is ever set in stone. Nevertheless, the Feb. 27 airdate has been tentatively agreed upon. In view of the competition's sweeps plans, the date makes additional sense. The major event of the February sweeps period, aside from the "M*A*S*H" finale, will be ABC's multipart epic, "Winds of War." But that blockbuster is scheduled to run Sunday to Sunday Feb. 6 to 13, throughout most of prime time every night except Saturday.

The famous "Who-shot-J.R." episode in November, 1980, was the biggest single-series episode in tv history, notching a 53.3 rating and 76 share. The final "Fugitive" episode (August, 1967) ranks second; the feeling is that "M*A*S*H" will top that program's 45.9 rating. "M*A*S*H's" final curtain call will probably approach the record viewers level, also set by "Dallas,"

Church's Fried Chicken confirms BBDO split

San Antonio—Church's Fried Chicken chain and BBDO/Chicago apparently are parting company, after only 10 months. Church's confirmed the split, declining further comment; BBDO said late Friday there were discussions set for this week. The estimated $6 million advertiser stopped its new BBDO-created campaign this spring, and apparently has no ads planned for the near future.

Judge delays decision in Barclay cigaret case

Louisville, Ky.—The federal judge in the Barclay cigaret case Friday indicated it might be another 30 to 45 days before he decides whether FTC can take action against the Brown & Williamson brand's controversial 1mg tar rating. His June 25 temporary restraining order (AA, July 5) remains in effect, permitting B&W to continue the 1mg claim while blocking the release of FTC documents that suggest the brand really delivers between 4mgs and 7mgs of tar.

Kraft tries 11-item line of Salad Bar toppings

Glenview, Ill.—Kraft is testing Salad Bar toppings, an 11-item line of packaged salad ingredients, in Houston and possibly other markets. Tv via JWT is set to break this week. *(See related story, Page 3.)*

P&G to test value-price Merit paper towels

Cincinnati—P&G is entering the value end of the paper towel market with the test of Merit towels in Washington, D.C., Maryland and parts of Virginia, Delaware and Pennsylvania. In 99-sheet jumbo roles, the two-ply product is priced 15% below P&G's Bounty and 16% above its unadvertised Summit. It will be shipped Aug. 16, with ads breaking in late September. WRG, New York, handles. Merit joins Banner toilet tissue, another P&G test item positioned in the value segment (AA, May 31).

MPA pick slips from its grasp

By CHRISTY MARSHALL

New York—Sometimes it is hard to pin a good man down.

The Magazine Publishers Assn. thought it had found the man to succeed retiring MPA president Kent Rhodes. Assisted by recruiter Frank Farrell of Neumann International, the five-member executive search committee spent months interviewing prospective candidates (AA, May 3). In fact, sources say the headhunters queried 225 candidates.

They settled on John Crittenden Sawhill, 45, former deputy secretary of the Department of Energy; former president of New York University; former administrator of the Federal Energy Administration; former associate director of the Office Management Natural Resources, Energy & Science, and currently with McKinsey & Co.

RETAILER OFFERS PERIL USEFULNESS

Cash for coupons in U.K.

By HOWARD SHARMAN

LONDON—New moves by several of the U.K.'s largest grocery retailers are throwing doubts over the future usefulness of coupons as a promotional tool for marketers.

Late last month, Tesco, the second-largest supermarket chain with 13% to 14% of the market, announced publicly that it would accept manufacturers' cents-off coupons as if they were cash. The chain said it was waiving the normal obligation of a given product.

This Tesco lead now has been followed by ASDA, Safeway and Waitrose. Sainsbury, the leading supermarket chain in the U.K. with a market share of about 15%, apparently has followed the same policy—unannounced—for several years, but its adoption by the other chains means that stores handling over 40% of the U.K. grocery business are now treating the marketers' coupons as if they were cash.

"I believe this is one of the most serious single developments in brand marketing techniques," says Peter Hood, managing director of the leading sales promotion consultancy, Triangle. "It will make it very hard to get new products quickly established. Manufacturers will have to find other techniques, but regrettably there is nothing quite like a coupon for creating instant brand demand."

A top executive from one leading grocery marketer commented: "Manufacturers will have to be much more careful in the future in how they issue coupons." He predicted that over the next 12 months there would be a considerable increase in the number of coupons which were limited to a named retailer.

Colin Chamberlain, general manager for marketing at H.J. Heinz here, says: "We tend to use on-pack coupons fairly exclusively, and we have shied away from using newspaper coupons because of the recognizably high level of misredemption. Tesco's initiative is really a coming out into the open. There are a number of retailers who have done this openly or covertly for a number of years.

"If the coupon idea dies, the publishers of newspapers who have allowed the value of the coupons printed to rise above the cost of the paper will be at least as guilty as the retailers who misredeem the coupons."

According to the A.C. Nielsen Coupon Clearing House, there were 324 million coupons redeemed in the U.K. in 1981, with an average face value of 15¢. These

Wensberg to head Polaroid marketing

By GAY JERVEY

Peter Wensberg, the Polaroid veteran who will assume the worldwide marketing responsibilities vacated by Ted Voss' recent move to Atari, says that the company's 1983 ad budget should increase—probably substantially—and that Polaroid will be looking for ways to make instant photography a little more dashing.

"We will try to find ways to impress the emotional impact of using instant cameras," said the executive, who some say has become decidedly less of a dark horse in the canter for the Polaroid presidency, to be vacant in the not-too-distant future through the retirement of William McCune.

■ Sources close to the company, including a former employe who knows Mr. Wensberg well, praise his appointment as top marketing exec. "A very, very capable marketing guy," observed an executive at a major competitor.

"There are so many benefits to instant photography," said Mr. Wensberg in an interview. "The relationship between the taker and the subject; the emotional impact of having the picture right there versus seeing it later—these are the kinds of things we will want to

Print ads included in Jovan Inc. sales material for the introduction of Glacier aftershave (AA, March 8) emphasize the time-release capability of the "long lasting" aftershave. J. Walter Thompson USA, Chicago, is the agency for the Beecham unit.

New liquid soap positions against Lever's Dove

Armour-Dial rolling Liqua 4

By JENNIFER ALTER

Armour-Dial is getting ready to make the first national move in the liquid soap segment by a major soap company, introducing its Liqua 4, which has been testing in Orlando for the past 10 months.

In going into the field heretofore dominated by Minnetonka's Softsoap, the Phoenix-based marketer of Dial deodorant soap is positioning its entry against bar soaps rather than liquid soaps—specifically Lever Bros.' Dove.

Although A-D would not comment on its plans, it is telling retailers that Liqua 4 will be "the No. 1 advertised soap during the balance of 1982," with tv and magazine support and 180 million coupons being dropped. Trade literature states that "marketing support" will be "at a $32 million level" this year. Foote, Cone & Belding/Honig, San Francisco, is the agency.

The product is currently being sold in bath and personal sizes; shipment is scheduled for mid-August.

Dubbed a "skin cleansing system," Liqua 4 comes in a plastic squeezable container shaped like a bar of soap. It is positioned as a cosmetic brand and said to contain "4 special skincare ingredients impossible to harden in bar soap." They are said to be a "unique" moisturizer, a "special" conditioner, a "superb" smoother and a "deep" cleanser.

In its quest to distinguish itself from other liquid soaps, Dial is emphasizing to the trade the fact that Liqua 4 comes in a box the shape and size of a bar soap package, which means "no stocking problems like bottled liquids." Sales material claims the brand achieves 17% higher ounce sales when stacked in the bar soap section vs. the liquid section. It also is said to have a purchase cycle similar to that of bar soap, *i.e.*, shorter than liquid.

■ The sales force is recommending in particular that the product be set next to Lever's Dove—which has a similar attribute of one-third cleansing cream—on the shelf.

Designed for use in both the

Boosterism in star role at INAME

By STUART EMMRICH

SAN DIEGO—Two years ago, many in the newspaper industry would have bristled if their business had been compared to that of Chrysler Corp., a seemingly anachronistic auto maker that appeared to be headed toward bankruptcy.

But last week, at this year's summer conference of the International Newspaper Advertising and Marketing Executives, it was somehow fitting that a featured speaker was the vp-marketing of Chrysler, who came to tell the story of how that company had rebounded from near financial ruin to make the front page recently with news of its best quarterly performance in six years.

The unspoken parallels between the phoenix-like Chrysler Corp. and the often-beleaguered newspaper industry set the tone for this year's conference, which was designed partly as a workshop and partly as a gathering of cheerleaders for the newspaper business.

When Jack Givens, vp-marketing of Chrysler, told the gathering, "At Chrysler, the worst is behind us. We are over the hump and we can start looking to the future and not to the past," few of the 300

Comparative ads out at Uniroyal—for now

By JAY McCORMICK

Uniroyal has pulled in the claws of its comparative ad campaign because of a government agency proposal, but the company is getting ready to fight its competitors with a different breed of tire.

The National Highway & Traffic Safety Administration's proposal to suspend tread-wear ratings has scratched Uniroyal's campaign, which compared its Steeler brand's tread life with Michelin tires. The Uniform Tire Quality Grading system met with criticism from almost every tire company except Uniroyal, which fared best in tread-wear ratings.

The NHTSA is reviewing the system "to avoid dissemination of potentially misleading tire grading information to consumers."

Uniroyal believes the system is salvageable but will not use the rankings while the NHTSA proposal is being reviewed. "As long as the system is somewhat tainted at the moment, I have no intention of using it," said Robert Horning, vp-marketing at Uniroyal.

■ Uniroyal will eventually return to comparative advertising, even if it has to do the testing itself. "We were pleased to compete with our competitors using a government standard, but if there will not be a government standard in the future, we'll have to substantiate our claims in some other way," said Mr. Horning.

For the time being, New York-based Uniroyal will shift strategies as it introduces its new all-season Tiger Paw tire. Tv commercials for the Tiger Paw will emphasize traction and safety rather than long tread wear, even though the new tire beats Uniroyal's previ-

Cable discovers marketing

By SUSAN SPILLMAN

CHICAGO—Executives of the cable tv industry have made a major discovery. More than 1,000 of them meeting here for 2½ days last week came to the conclusion that in order to sell their product, they'd best start marketing it.

The industry's twofold-plus growth, spurred by the expansion into dozens of new markets since 1979, was tempered with some disheartening statistics at the Cable Television Administration & Marketing Society's sixth annual meet.

In the past three years some 13 million cable subscriptions have been canceled. During this period, the top 20 multiple systems operators have failed to capture more than 55% of their potential markets, despite the advent of some 40 new cable programing services.

■ "We need to approach the video market the same way Procter & Gamble approaches the supermarket," said Tom Wheeler, president of the National Cable Television Assn., the industry's lobbying arm. "As surprising as it may seem, consumers don't know who we are, what we sell or why we're different."

Preoccupied with the billion-dollar bidding and building of America's cable franchises, industry executives, now confronted with an alphabet soup of competing technologies, admittedly just have stumbled on the concept of marketing. As Mr. Wheeler put it, "When we were the only wheel in town, the consumer had no choice if he or she wanted expanded television service. In that kind of environment it is not difficult to let consumer relations slip."

But determined to repent, cable

Ventures into hydroponics after Gen. Mills retreats

Kraft seeks salad stability

By JANET NEIMAN

Kraft Inc. is taking a conservative approach in its entry into the marketing of hydroponically grown, branded produce.

Under the new Sun Seasons label, Kraft entered butterhead, limestone and bibb lettuce, European cucumbers and cherry tomatoes into Tucson tests late last month, and is now beginning Phoenix tests (AA, July 12).

Glenview, Ill.-based Kraft has entered the arena of growing produce indoors in nutrient solutions without heavy financial investment in production facilities or energy costs. Its venture contrasts sharply with the experience of General Mills, which recently said it plans to divest or license out the assets of its Kitchen Harvest hydroponics unit.

General Mills' multi-million-dollar facility in DeKalb, Ill., still in operation, was built in 1980, when the company was intent on experimenting with production that would compete with traditional produce to "serve northern markets competitively," a company spokesman explained. "If done successfully, it would be in proximity to markets where transportation costs and distribution make it possible to do it," he said.

General Mills marketed Kitchen Harvest in limited tests, with advertising from Dancer Fitzgerald Sample, New York. But the experiment, primarily with leaf lettuce, apparently proved too expensive; in its announcement of the sale or license, the company noted that "there are faster growing areas of business that need investment immediately and show better return on investment."

Industry sources point to energy

world news roundup

GENEVA—Procter & Gamble is planning to fight the Swiss government's prohibition on advertising phosphate detergents on radio. P&G's biggest worry is that the ban will extend to tv as well.

AMSTERDAM—Philip Morris, R.J. Reynolds, British American Tobacco and three Dutch companies are considering an appeal of EEC fines totaling $1.5 million for offering unfair discounts to dealers.

PARIS—The French government's new tax on drug ads may be as high as 8%, to balance the Social Security deficit.

MEXICO CITY—Mexico's private tv monopoly, Televisa, last week announced early rate increases ranging from 29% to 56%.

TOKYO—Hitachi has resumed advertising in newspapers and magazines after an hiatus due to indictments charging it with conspiring to purchase confidential computer secrets in the U.S. (AA, July 5).

LONDON—Harrison McCann won the $1.8 million Dutch Dairy Bureau account for Edam and Gouda cheeses.

New product drives boost Bud, Kodak

By JOSEPH M. WINSKI

Anheuser-Busch's Budweiser beer, in the midst of an aggressive introductory campaign for Budweiser Light, jumped to fifth place among all advertisers in consumer awareness in June, as measured by adWatch, a continuing survey of advertising awareness conducted by ADVERTISING AGE and SRI Research Center, Lincoln, Neb.

Budweiser didn't rank among the top 10 in awareness in May. It was No. 9 in April, the first month of the survey.

In addition, Budweiser increased its awareness lead over Miller in the beer industry, being named by 14.5% of consumers as the beer advertising that first came to mind, compared to the 10.8% who named Miller. Budweiser had wrested the lead from Miller in May, with 14.2% of the responses to Miller's 12.2%. In April, Miller had received 17.1% of the responses to Budweiser's 12.8%.

In June, 1.36% of the 1,250 consumers 18 years of age and over polled said Budweiser advertising first came to mind among all advertising they had read, seen or heard in the previous month. The top four in awareness in June were the same as in May: Coca-Cola (5.30% of all responses in June), Pepsi-Cola (2.30%), Miller beer (1.70%) and McDonald's (1.44%).

Joining Budweiser as a newcomer to the June top 10 was Procter & Gamble's Tide detergent, which ranked No. 10. Tide, like Budweiser, had been on the first month's top 10, having ranked No. 7 in April.

In another notable move that, like Budweiser's, may have been related to a new product push, Kodak gained 5.7 points in awareness, the most of any advertiser in June, and solidified its hold on No. 1 in cameras. Kodak has been backing its new disc camera with heavy advertising. Polaroid lost two points and fell to No. 3 in the group behind Canon, with whom it had tied for second in May. Kodak received 21.4% of all category responses in June, Canon 11.5% and Polaroid 9.4%.

adWatch

Dropping from the top 10 in June were Toyota (No. 6 in May) and General Motors (tied for No. 9 in May). Rounding out June's rankings were No. 6 Ford (No. 5 in May); No. 7 Chrysler (from No. 9), and Dr Pepper and Chevrolet, which tied for No. 8 after having tied for No. 7 in May.

There were six new leaders in June among the 20 product categories monitored. In airlines, United replaced Eastern in the top spot; United's awareness score increased by 5 points in June, one of the largest gains recorded. In coffee and tea, General Foods' Maxwell House suffered a decline of 6.8 percentage points, by far the largest June drop, and dropped to No. 3 in the category, yielding the top spot to Folger's, while

Source: SRI Research Center Inc., Lincoln, Neb.

New product boosts Bud

(Continued from Page 3)

Sanka moved to second place.

Avon replaced Chanel as the leader in cosmetics and fragrances, as Chanel dropped out of the top three in the category. Scott took over No. 1 in paper products, replacing Charmin. Two industry leaders in April regained their top spots in June: Purina supplanted Alpo, the May leader, in pet food, while Gallo reclaimed the top spot in wine and liquor from Riunite.

In the continuing cola wars, Coca-Cola closed in on category awareness leader Pepsi, narrowing Pepsi's lead to just one percentage point (27.6% to 26.6%) from its 3.4 point lead in May. Coke had led the category in April.

Retaining the top spots in their industries in addition to Budweiser, Pepsi and Kodak were Kellogg (breakfast foods), Ford (cars/trucks), McDonald's (fast-food restaurants), Wrigley (gum/candy), Atari (home electronics), Tide (laundry products), Tylenol (medicine and drugs), Birds Eye (packaged, canned, frozen foods), Prell (personal soap and shampoos), Charmin (personal toiletries/hygiene) and Marlboro (tobacco products).

■ New among the top three in their categories were GF's Fruit 'n Fibre, No. 3 in breakfast foods; Maybelline, No. 3 in cosmetics and fragrances; Sony, No. 2 in home electronics; P&G's Coast, No. 3 in personal soap and shampoos; White Cloud (P&G), No. 3 in personal toiletries/hygiene; Brown & Williamson's Kool cigarets, No. 3 in tobacco products, and Jos. Garneau Co.'s Cella Italian wine, No. 3 in wine and liquor.#

Tide did it

April's listing of the top 10 advertised products in over-all consumer awareness incorrectly ranked Swift & Co.'s Peter Pan peanut butter No. 7. Procter & Gamble's Tide actually was No. 7 that month. Peter Pan did not make the top 10.

Advertising Age wants your reactions to adWatch. We are particularly interested in hearing from agency and advertiser personnel directly involved in advertising for the brands frequently mentioned in the survey. German marketers feel generics' heat

By DAGMAR MUSSEY

Duesseldorf—German marketers are facing a growing threat from unbranded generic products, which are rapidly increasing their market shares.

Dismissed three years ago by the German branded goods and food industries, generics have grown to where they are now a peril to the major brands.

One of the biggest impacts is in detergents, where the latest numbers show generics have grown to a 23% market share, nearly as much as Henkel's famous Persil detergent. Henkel is frantically trying to cut down its stockpiles in a detergent market that shrank by 1% last year.

Yet both Henkel and Procter & Gamble, whose Ariel is battling with Persil, say emphatically that they will not stoop to making their own generic products. But at a recent press conference, Henkel officials acknowledged that generics are biting into their business.

Juergen Schrader, chairman of the German Unilever group, points out that the consumers' switch to generics has cut the average return on sales to 1%, compared with 1.3% two years ago. "The housewife no longer values the quality and presentation of branded goods as we think she should," he said.

German Nestle AG, Frankfurt, not quite so hard-pressed by generics, is taking the classical route of new products and—almost alone in the Germany industry—boosting its ad appropriation by 20% to hold its own in shrinking markets.

Things are tougher for Nestle's Munich subsidiary, Allgaeuer Alpenmilch, the largest German producer of canned milk, which is under heavy pressure from box store giant Aldi's house label. An improved product range and heavier advertising will be called on to hold market share, but Allgaeuer Alpenmilch chief Hans D. Kalscheuer thinks it conceivable the company would step up its now-small generics business if competition grew too fierce.

The Sinus research institute study for Ted Bates, Frankfurt, shows that disposable paper products with weak brand identification are up against tough competition. PWA (Papierfabriken Waldhof-Aschaffenburg), Mannheim, has seized this opportunity and by 1981 already was channeling one-third of its output into generics, with excellent growth rates.

Even VPW (Vereinigte Papier Werke), a Schickedanz company, producer of hard-to-copy products like Camelia sanitary pads and elastic-leg diapers, and also active in the tissue field, frankly admits that it too already is turning out cut-price products, though on a smaller scale. This will probably increase in the future, seeing that VPW showed its first loss in 1981.

It is no secret that keen competition, rising costs and declining population are forcing manufacturers to turn out no-name brands, particularly in the dairy and yogurt sector. Klaus Wiegandt, general manager of the Rewe-Leibbrand group, believes that within two years at most, even the most embittered foes of generics will be producing their own instead of leaving the business to the competition.

Only in cigarets have the generics failed to frighten the major marketers. Though the leading retail groups—Aldi, Leibbrand, Tengelmann, Edeka—have off-brand or no-brand cigarets, priced about 25% below regular brands, they have not been a great threat to the majors so far.

Three reasons are given to explain the German success with generics. Aldi began 10 years ago to divert customers from the big chains with its cut-price merchandise; in the end, even the biggest could only respond by offering their own low-price assortments. Another reason is the great power of the German food retailers, who can dictate to the industry what products shall be supplied at what prices.

Also, declining population, recession and unemployment are forcing Germans to be thrifty.

Bernd Michael, head of Gramm & Grey, Duesseldorf, commented: "Not until the buzz about cut prices disappears from the newspapers will the no-names and generics revert to their old inconspicuous position. After all, the trade cuts off its nose to spite its face with generics, because you can't make money on them."#

Money couldn't buy market share

The sad tale of Cycle's 12-year quest for success

By Jack J. Honomichl

The pet foods division of General Foods Corp. had an operating profit of $35 million on established brands in fiscal year 1974, I've been told by a former top-level GF executive who was there at the time. In fiscal 1981, the division had an operating loss of $12 million, as estimated by a prominent financial analyst in Chicago. Lots of things, of course, contributed to that dramatic reversal, but the most conspicuous—and probably most important—was Cycle dog food.

This is an insider's story of Cycle's development, marketing strategy and the miscalculations that haunt GF's marketing management to this day. The moral: Having an enormous amount of money to spend doesn't mean you can buy marketing happiness in the pet food industry. Or, from an advertising agency's point of view, the client can hand you a dandy, built-in copy platform and huge budgets, but that doesn't necessarily mean you can advertise him out of a hole he dug for himself (in Topeka, Kan.).

Let's start by positioning Cycle canned, which has been in national distribution since spring, 1976. (A dry, bagged version was rolled out two years later.) The concept is that a dog's diet should be adjusted according to its position in the life cycle. So there were four Cycle products: Cycle 1, "specially balanced for puppies up to 18 months of age"; Cycle 2 for adult dogs 1 to 7 years old; Cycle 3 for less active (read: overweight) dogs, and Cycle 4 for older dogs (more than 7 years old).

The original Cycle canned line that was taken national had two varieties, beef and chicken, so for the concept to be fully expressed on the shelf, a store had to stock a minimum of eight items. Two facings on each meant 16 items, and so on. And, obviously, if one of the items (or Cycles) was taken off the shelf because of slow movement, the whole concept started to unravel. We'll come back to that.

The canned Cycle product is a formed product, common in the dog food packing industry; it's meant to convey the impression of a meatball, such as humans might eat, say, on spaghetti. These balls are packed in a gravy-like sauce, and through time such products have been promoted as "the dog food that doesn't look like dog food."

It should be noted that, historically, other packers who have gone the meatball route have had, at best, lackluster success in the marketplace, and many died aborning. It's a long list, but here are a couple of prominent examples: The original Skippy Premium line from National Pet Food and—ironically—Gaines Supreme, a GF brand test marketed before Cycle. Neither Alpo nor Kal Kan, the leading brands in the canned dog food market, carries a meatball item in its extensive line. The reason: Slow movement.

And, finally, Cycle canned from the beginning was priced significantly higher than Alpo's Beef Chunks, the leading premium-priced canned item, then and now.

One of the main characters in Cycle's passion play is a 150,000-sq.-ft. canned dog food plant GF started to build in Topeka in November, 1971. The new facility adjoined a plant it had built there two years earlier on a 110-acre plot to produce dry dog food.

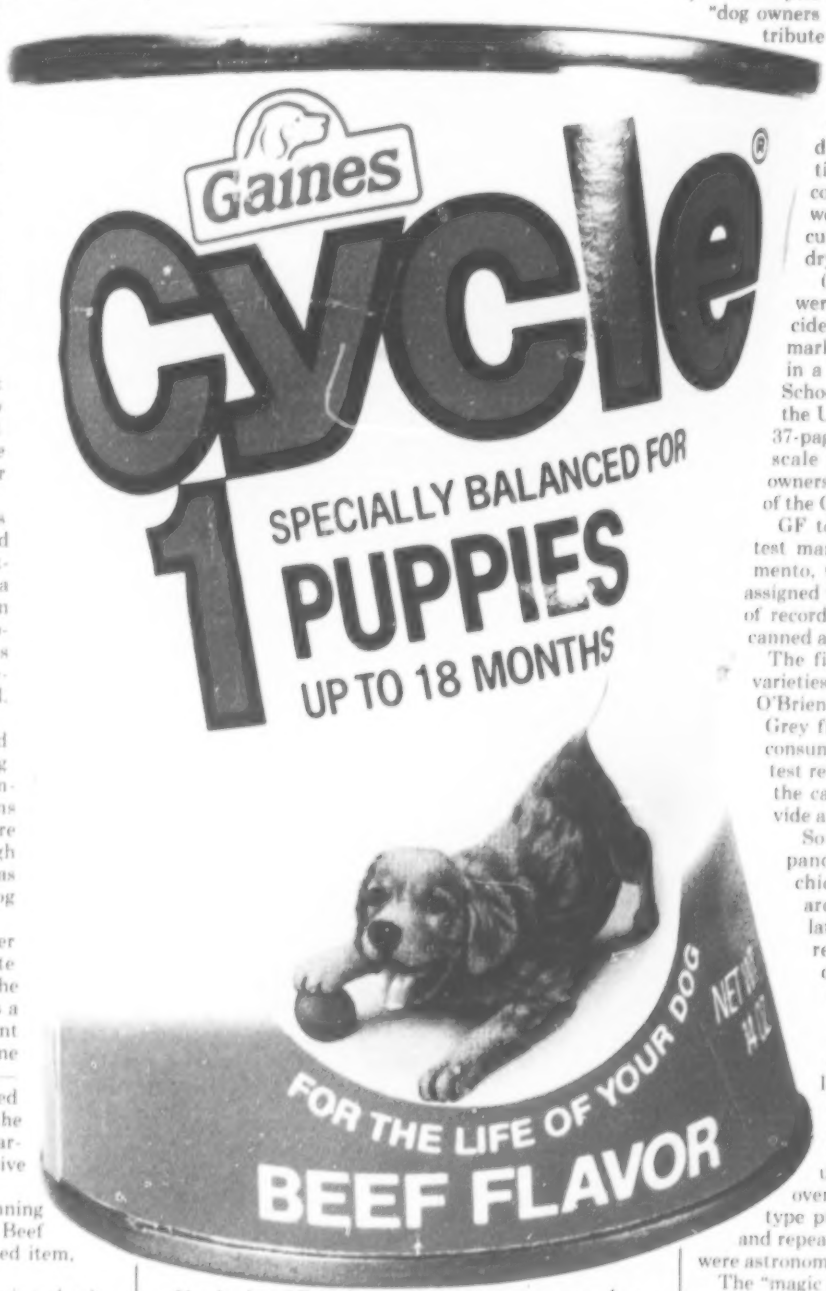
This can plant, which was put into operation in line May, 1973, was a classic example of putting the cart before the horse. At the time the Topeka investment was authorized—circa summer, 1971—GF's pet foods division did not have a proven canned product for the plant to produce.

What it had instead was a product concept in test and, in retrospect, a lot of wishful thinking.

Jack J. Honomichl writes a monthly marketing research column in the news pages of ADVERTISING AGE.

The original hope was a meatball line called Gaines Supreme, which GF put into test market in Buffalo and Albany, N.Y., in March, 1970, with Ogilvy & Mather as the agency. Gaines, of course, is an old and esteemed name in the dog food world. GF attained it through the acquisition in 1943 of a regional dry packer in Sherburne, N.Y., and GF still markets a line of dry products under the Gaines name (which, incidentally, will surface again later in our story).

Gaines Supreme didn't do well in the Buffalo and Albany test, so two years later two new test markets—Miami and Denver—were opened.



No doubt, GF had grandiose plans for Gaines Supreme. At first, the company used Arlene Francis as product spokesperson, but later (AA, Dec. 24, 1973), it reportedly cut a deal with singer/actress Doris Day, "a well known dog fancier," that called for $1 million over five years to tout Gaines Supreme.

There was a hangup, however: Gaines Supreme died in test market (with less than 5% share of canned pounds), and that left a big capital investment in the foothills of eastern Kansas gathering dust.

But, across the plains of Kansas and the Plains—White Plains, that is—in Westchester County, N.Y., another concept came barking: Cycle, "every day, for the life of your dog."

The name and concept originated with a small advertising agency, John Rockwell & Associates, which was brought into GF and its White Plains headquarters by William E. Rawlings, president of the pet foods division from 1971 to January, 1974, at which time he left after a much publicized wrangle with James L. Ferguson, the president of GF. Mr. Rawlings reportedly was pushing for a faster expansion of GF's pet food business and believed top management was sluggish in approving new moves.

Mr. Rockwell, who had been executive vp of Needham, Harper & Steers before setting up his own shop, specialized in new products. He was on retainer to GF from October, 1969, to April, 1971.

The Cycle concept, according to research, showed that "dog owners are highly anthropomorphic—quick to attribute human traits to their pets—and would respond to a canned line that delivered nutrition specially formulated to the dog's age and 'life style.'" If it succeeded, it would be a good market segmentation and differentiate the Cycle brand from competition—and it was something agency creatives could really get their teeth into. Mr. Rockwell told me he envisioned the concept executed in all three forms of dog food—canned, dry and semi-moist.

(The deliberations GF marketing people were going through in early 1970 trying to decide how best to approach the canned dog food market are documented, apparently factually, in a case study used at the Harvard Business School and the Wharton School of Business at the University of Pennsylvania. Included in the 37-page manuscript are the findings of a large-scale GF market segmentation study of dog owners, which sets the framework for execution of the Cycle concept.)

GF took its first version of Cycle canned into test market in Grand Rapids, Mich., and Sacramento, Cal., in early 1973, and the product was assigned to Grey Advertising, which was the agency of record until this year, when the account (both canned and dry) was moved to Benton & Bowles.

The first test had four Cycle products but no varieties. "That's what we learned," says Richard O'Brien, who was the Cycle account executive at Grey from the beginning. "You have to give the consumer flavor variety." They also learned that test results projected out to about 4.5% share of the canned market, not enough volume to provide a reasonable payout on the brand.

So it was back to the drawing board. An expanded Cycle line—this time with beef and chicken varieties—was put into a new test area—Syracuse, N.Y.—in April, 1974, and later that year it was expanded to a GF sales region that encompassed Boston; Providence, R.I.; Hartford, Conn., and Portland, Me. There it sat until April, 1976, when the national rollout started.

I've been told by a GF executive who was deeply involved that between $2 million and $3 million was spent on marketing research alone in those markets. One reason was the length of the test, and another was the low incidence of target populations—households with puppies, with overweight dogs, etc. Since continuous, diary-type purchase panels were set up to track trial and repeat purchase rates, the screening costs alone were astronomical.

The "magic number" several GF executives have told me was 6%; that was the share of canned pound market that seemed necessary to jell the payout plan on Cycle. I've been told that the Syracuse test did project out to a 6% national share. I have also seen data that suggest that in the larger New England region, Cycle got only about a 4.7% share in the first year. Also, the pet foods division's market research department believed that test results were "minimally acceptable." The department thought that the brand, in national distribution, would achieve only about 50% of the volume anticipated.

The marketing research department's conclusion: "Don't go national." ("I doubt that," one former GF pet foods executive told me. "The system would have flagged such a recommendation from the market research department, and I didn't know about it.")

Trial in New England seemed good—about 40% of

SOURCE: Advertising Age Survey

*Effective with September, 1982 issue
**Estimated

pointed out that ad pages have grown dramatically, from 508 last year to an estimated 725 for 1982. For the first six months, ad pages are up by 64%. "Advertisers are happy to see a magazine that does exciting stories," Mr. Greenberg said.

Rolling Stone, too, is having one of its best years ever, with ad pages up by 10% and revenues up by 33%. That comes on top of a 1981 page increase of 11% and revenue increase of 30%. Much of that can be attributed to a switch to a higher quality paper stock in January, 1981, which succeeded in bringing in 50 additional advertisers, according to William S. David, vp and advertising director. Mr. McDonell, the managing editor, believes that Mr. Greider and other writers will make *Rolling Stone* an even more attractive advertising vehicle. "I would think that advertisers that did not think about us as an obvious buy are going to very soon," he predicted.

Advertisers have thought of the *New York Times Magazine* as an obvious buy for years, although the magazine is expected to be down this year by more than 80 ad pages from last year's figure. But the drop comes upon impressive numbers, nevertheless. In 1981, the magazine produced the industry's second largest number of ad pages—4,512—and revenues for the first six months of this year are up by $2.3 million over the same period in 1981.

Yet there is no doubt that the economy is affecting the magazine. "This is a very, very tough year out there," said marketing director Philip Du Val. During the last six weeks, several new ad schedules, including one for 20 pages, have come in, and Mr. Du Val is hopeful that the magazine may be able to recoup in the second half. He believes that the magazine's recent political coverage has helped a great deal.

According to "Hall's Editorial Reports," which measures the editorial content in the nation's top weekly magazines, the *New York Times Magazine's* coverage of national and foreign affairs has increased from 20% of total editorial in 1979 to 25% in 1981. "It makes the magazine more lively, more current, more interesting and more visible," said Mr. Du Val.

Not to be left out, the Washington Post Co. intends to launch a new weekly magazine in the fall. So far two prototypes of *Washington Post National Weekly Edition* have been distributed in selected areas of the country. Apparently, the readers who evaluated the first prototype wanted a larger dose of politics than the first issue included. "The second prototype is even more focused on Washington government and political events," said a Post Co. source.

One Post official involved in planning the magazine is not concerned about competition: "No one can touch us in terms of the national political scene, the access we have because of who we are. There is an intense interest among readers outside of Washington for the kind of coverage done by the *Washington Post*, but it has been difficult reaching those people.

"You can order the *Washington Post* by mail and it comes four days late and it's enormous and you don't want to read all of it," he said. The *Post* does syndicate a good percentage of its editorial product, but the official said that many of the local papers do not have the space or a large enough audience to justify the longer stories.

The tabloid-size magazine will run articles that have already run in the *Washington Post*. Included in the prototypes were image and corporate advocacy advertisements, those for upscale consumer products and several direct response ads. Ad rates have not been set, and plans call for circulation to be highly targeted. "We're looking at a small but select group of readers to make this a viable business," said another Post Co. source.

Indeed, the audiences of these politically oriented magazines are small, a veritable drop in the bucket compared with the millions that tune in CBS every night to watch Dan Rather read the evening news. Still, each magazine believes it is the quality of readership, not quantity, that attracts advertisers. Christine M. Rothenberg, corporate advertising manager at Hartford, Conn.-based United Technologies, agreed.

"We like to be in publications that are read by thinking people who are aware of the issues facing the country and the world," she said. "These people are often influential, well educated, opinion leaders." United Technologies runs corporate advocacy ads dealing with a variety of economic and social issues in both *Atlantic* and *Harper's*. The corporation also runs corporate image ads in the *New York Times Magazine*.

At Ford Motor Co., a sizable proportion of the company's ad budget is devoted to magazines, including these political publications, according to Robert Gillooly, national advertising manager. "The average income of new car buyers has gone up considerably," he said. "To be able to afford a car at all you have to have more money and be somewhat upscale. We're confident that these magazines do the job. We're aware of the kind of people who read them."

The editors know their audiences, too, and recognize

Playing politics

(Continued from Page M-3)

they want more than they get from daily newspapers or tv news. That helps to account for the manner in which most of these publications approach the task of covering politics. There is little—if any—interest in who is running for office.

"How can you work up much enthusiasm for whether Carter or Reagan is President when you haven't answered the larger question of what we should be doing in social welfare, foreign affairs and all these different areas?" noted *Harper's* Mr. Kinsley. "Where is this country going? Where ought it to go?"

The majority of the articles strive to analyze those larger questions. Many of the pieces are retrospective in nature, assessing how past leaders handled their powers and responsibilities. The stories can be hard-hitting. One sample from Seymour Hersh's piece on Kissinger: "More and more subservient, even fawning, to his patron [Nixon], Kissinger was increasingly vicious and outspoken outside the Oval Office. The backbiting grew intense by the end of the year. Secretary of State [William] Rogers was a 'fag' who had some strange hold over the President; Mel Laird was a megalomaniac who constantly leaked anti-Kissinger stories to the press, and Richard Nixon was a secret drunk of dubious intelligence."

Or this selection from Mr. Greider's first column in *Rolling Stone* on the budget cuts: "Last month when the latest unemployment numbers were announced, the President was on the South Lawn, dressed in that ridiculous riding outfit that makes him look like a Hollywood director from the 1920s. Reporters asked how he felt about 9.4% unemployment; the Gipper said he felt bad. He blamed the Democrats. Then, with a wave and a smile, he went horseback riding."

The magazines are not afraid to ruffle the feathers of special interest groups. A case in point is *Harper's* May cover story on the immigration of Soviet Jews. "The aspirations of the Jews now leaving Russia, natural and commendable though they may be, have little to do with any desire to embrace the Jewish religion and cultural heritage, even though this is ostensibly why we let them into the U.S.," wrote author Joseph Nocera.

Such stories often provoke angry letters to the editors. The magazines love such response, viewing it as definite proof that they are sparking a lively debate, getting people thinking, having influence—in short, doing their jobs.

Virtually every magazine has examined the threat of nuclear war, sensing the enormous public interest, underlined most recently by the march in New York attended by more than 500,000 people. *Esquire* claims to have been first with its March, 1982, cover story, titled, "If You Survive the Coming Nuclear War . . . Don't Worry, Our Leaders Have a Swell Plan." The report, by Ed Zuckerman, who is writing a book on nuclear war preparedness, received a good deal of publicity in other newspapers and magazines. The article dealt in a straightforward manner with the observation that 61 million Americans could be expected to survive a nuclear war and be faced with the task of rebuilding the country. But the piece ended on a pessimistic note, quoting the head of security at the National Archives, who would be in charge of safeguarding the Declaration of Independence, the Constitution and the Bill of Rights, in the event of a nuclear attack. "As for me," the security official was quoted as saying, "I hope the first bomb falls right on my head, because I wouldn't want to be around anymore."

The nuclear freeze was the topic of Mr. Greider's second Rolling Stone column, and he laid out what the movement must do to succeed and even included a list of organizations that readers could contact to get involved in the protest. Such advocacy journalism is typical of *Rolling Stone*'s style, and apparently was one reason Mr. Greider was so eager to sign on. "The people who read *Rolling Stone* are still forming their ideas about a lot of political issues, whereas the audience of the *Washington Post*, to a greater extent, already has its mind made up," Mr. Greider observed.

Harper's ignited a debate on Jonathan Schell's book, "The Fate of the Earth," which advocates complete disarmament. Mr. Schell's thesis had been widely accepted in some corners as the wisest course, but a column in *Harper's* dismissed Mr. Schell's ideas as both naive and pretentious. "The basic balance of terror cannot be dismantled without perfect trust between the world's greatest enemies—an unlikely development," wrote Mr. Kinsley. Mr. Kinsley's column was cited in *Time*'s May 3 press section, titled "Second Thoughts on Schell."

That was not the first time that a *Harper's* article sparked discussion in another publication. The magazine's June cover story, "Cardinals are people too," which detailed the political influence such clergy wield in their communities, brought a fiery blast from Catholic New York. Father John Reedy, a columnist with the newspaper, called the piece "a shoddy, cheap shot."

If anyone is keeping score, the record for newsclips and tv appearances at this point probably belongs to *Atlantic*. The December, 1981, cover on David Stockman appeared on national television 40 times in five weeks, according to Mr. Zuckerman. And so far the magazine has collected 2,000 newspaper and magazine clippings on Mr. Hersh's Kissinger piece, in addition to mentions on most national news programs. "Incredible media attention has been given to *Atlantic*," Mr Zuckerman said.

In fact, Mr. Zuckerman would like to believe that *Atlantic* is responsible for much of the current rush to cover politics. *Rolling Stone*'s Mr. McDonell, while admitting that he too is constantly looking for that big important piece, derides Atlantic's penchant for spending large sums on book excerpts, like the Hersh piece. "We're not talking about enterprise editing at the *Atlantic*," said Mr. McDonell. "We're talking about buying the most expensive stuff around."

Harper's Mr. Kinsley agreed. "Buying a chunk of something that someone else has edited, someone else has commissioned, someone else has worked on for years is not as creative as producing or generating something yourself," he said. "I'm not after scoops because I think it's a better function of a magazine to have these articles that influence real policy questions."

In some ways, *Harper's*, *Atlantic*, *Esquire* and *Rolling Stone* have a serious disadvantage competing with the huge resources of the *New York Times*, and soon, the *Washington Post*. Mr. Klein, the editor of the *New York Times Magazine*, said one-half of the magazine's pieces are staff-written, and with a news staff of more than 900, that is power. "If something is happening in a remote part of the world, it is very likely that there will be a *Times* person there," said Mr. Klein.

Even though the *New York Times Magazine* pays only $1,500 for free lance articles, compared with $2,500 at *Rolling Stone* and *Esquire*, the prestige of being in the *Times* still lures the big names.

The magazine received a jolt recently, however, when it discovered that its Dec. 20, 1981, cover story, "In the Land of the Khmer Rouge," by Christopher Jones, had been fabricated. "All of us in journalism have to be a hell of a lot more rigorous in the way we go about doing our business, especially in the way we choose the people we assign and check the material that comes in," said Mr. Klein. As a result of the incident, the magazine has instituted safeguards. Mr. Klein said that authors who have never worked for the magazine before are required to submit newsclips of their work. The magazine also may check with the writer's current or previous employer. In certain cases, if magazine officials believe it is warranted, the writer may be asked to produce his or her original notes and tapes.

Still Mr. Klein believes that his magazine has done some outstanding political stories recently. Those he cited included: "The New Asian Immigrants," by Robert Lindsay; "The Neo-conservative Anguish over Reagan Foreign Policy," by Norman Podheretz; "The Failed Mission," on the attempt to rescue the Iranian hostages, by Zbigniew Brzezinski, and "Thinking About Nuclear Morality," by Herman Kahn.

Faced with such competition, Mr Zuckerman does not apologize for *Atlantic*'s policy of bringing in top stories regardless of the cost. "We will be competitive with any magazine to bring in these pieces, because we believe that's what the reader wants editorially," he said.

To those who wonder what *Atlantic* will do next to top the Stockman and Kissinger covers, Mr. Zuckerman has an answer. "The 125th anniversary issue [November] will contain some of the best pieces by some of the best writers in the world today on some extraordinary subject that I guarantee will get a lot of attention," he said. There also will be more revelations on Lyndon Johnson by Robert Caro (one excerpt from Mr. Caro's book ran in last October's *Atlantic*). "We have other pieces scheduled for next year that will continue to make it clear that this is the leading magazine in public affairs in this country," Mr. Zuckerman said.

At *Rolling Stone*, Mr. McDonell said readers can soon read the definitive piece on the Weather Underground. "That's going to shock some people," he said. Future columns by Mr. Greider will look at labor, the Equal Rights Amendment and the Catholic church. *Rolling Stone* also is planning a retrospective piece on President Kennedy, and another on the Vietnam War.

Mr. Moffitt said *Esquire* will be monitoring the environment in its outdoors column. "In the 1970s we had worked out a certain environmental value that was set into law, so a radical change always creates a great deal of interest—and there has been a radical change," he said. In addition, Adam Smith (the pen name of George Jerome Goodman) will continue to cover money issues, while Jerold Schecter will begin to write and assign stories from Washington.

Despite this renewed effort to cover politics, veteran Washington watchers remain unfazed. They have seen it all before. "If you go back in history, there's always a David Stockman, there's always an issue like the budget, there's always something going on," said Richard Scammon, head of the Elections Research Center, who has been a political observer for more than 40 years. "Anything that's really dramatic still gets maximum time, like Watergate, or if you go all the way back to the Roosevelt regime, the court packing plan of the late 1930s." Speaking with some of the authority of his years polling the American public, Mr. Scammon noted, "Again and again in politics, it is the actual event that influences people, rather than the interpretation of it."

These magazines are betting against those odds, and each has a lot riding on the outcome. Perhaps the biggest challenge is faced by the Washington Post Co., which has been on a losing streak lately with new magazines. It was forced to sell its money-losing *Inside Sports*. Another magazine, *Focus*, a single-topic monthly, never got off the ground. But Post officials no doubt hope that a magazine on the Washington political scene, which the *Washington Post* regards as its turf, has a better chance of succeeding.

It will not all be smooth sailing for the other magazines, either. *Atlantic* and *Esquire* need to keep up their momentum so that they can get into the black and stay there. *Harper's* must become self-supporting so as not to dip into foundation savings. *Rolling Stone*, which has seen many of its record advertisers drop out ("The record industry is suffering," Mr. McDonell noted), should continue to add new accounts, particularly in the area of motion pictures and the electronic media.

"This is not a terrific year for magazine advertising in general," observed Joseph Ostrow, executive vp and director of communications services at Young & Rubicam. "Some of these magazines tend to be low on the advertiser's list, and if that list gets pared down, they get chopped off."

The editors believe, however, that the public's interest in political issues is more than just a passing fancy. They believe that concerned citizens have more questions than are being answered by the daily press or tv news. As long as that continues, these editors say, readers will look to their magazines to provide that insight. "There's an awful lot going on beneath the surface that may be mentioned in the papers, but not examined very deeply," observed Mr. Greider. "There are a million opportunities for that kind of reporting. I think it's going to be very exciting." AA

The Washington Post

Congressional Perks: Dubbing Rostenkowski On The Hill's Hob/P.7

William French Smith: Angry and Confused, He Toughs It Out/P.24

Post's prototype

With a cover date of June 11, 1982, the *Washington Post National Weekly Edition* introduced itself in prototype form.

The editorial content of the 48-page issue focused heavily on national and world affairs and on politics, with most of the articles reprinted from the *Washington Post*. Included were a major cover feature on golf junkets taken by U.S. Rep. Daniel Rostenkowski (D.-Ill.); a report on the spring primary elections, and articles on the Middle East, unemployment, the Haig-Kirkpatrick dispute, President Reagan's slipping popularity, stripmining and the tribulations of Atty. Gen. William F. Smith.

A sampling of advertising in the prototype, printed on heavy-grade newsprint, included full pages for BMW, Sperry, Exxon and GTE; partial pages for Brooks Brothers and J&B scotch, and almost two pages of classifieds.

Behind the wheel of a quiet revolution

By Lori Kesler

"We all know young women who are planning careers, women who are postponing parenthood, women who are independent, who are running their lives and their families with competence. Perhaps we know women who are running companies. These may seem like small changes because we have become familiar with them, in the way a parent observes the growth of a child. Our close vantage point has allowed change to creep up on us in a most disarming way.

"We are living every day with the elements that will turn our world upside-down. We are those elements."

—Elizabeth Nickles, "The Coming Matriarchy: How Women Will Gain the Balance of Power"

Lori Kesler is a St. Louis-based business writer and a frequent contributor to Magazine/Special Report.

It may not seem like a revolution to you.

But sociologists, economists and media observers are telling us to watch closely, because we've got front-row seats for one of the great socioeconomic happenings of the century.

During the last 20 years, women have rushed into the labor market in unprecedented numbers, with the movement reaching high gear during the 1970s.

That decade started with about 31 million women, or 43% of all U.S. women 16 and older, in the labor force. By the end of the decade, 43 million working women accounted for 60% of the growth of the entire U.S. labor force.

And the tide continues to rise. Last year nearly 47 million women took home paychecks, which means they now constitute about 43% of the nation's work force.

Government statistics tell us 52% of all American women are working right now. That number doesn't really tell the whole story. For example, employment

(Continued on Page M-12)

Working women

(Continued from Page M-11)

among women 18 to 45 is well above 60%, and in the 20-to-24-year-old age group, the figure is nearly 70%.

"When I began looking at the numbers in 1972, it was absolutely mind-boggling to discover that, even then, almost as many women in the active age groups worked as kept house," said Rena Bartos, senior vp and director of communications at J. Walter Thompson USA in New York.

When "school girls and grandmothers" were dropped from the figures, she said, the ratio of working to nonworking women in 1972 was about 50/50 and now has climbed to about 60/40. In fact, the U.S. Bureau of Labor Statistics says only 37% of all women today are fulltime homemakers.

Woman are migrating to the workplace with such speed that the consequences won't be fully known for a long time to come. But to Ms. Bartos, one thing

"They always used to be someone's wife or someone's mother. This is not their only identity anymore. Women want to be someone in their own right."

seems indisputable: Women—including even those who aren't working—think about themselves differently than they once did.

"I call it the seeking of individual status as compared to derived status," she said. "This doesn't mean they don't love their husbands and families. They are not rejecting the emotional side of life; they are just not letting emotional or personal relations define them as people.

"They always used to be known as somebody's wife or somebody's mother. This is not their only identity anymore. Women want to be someone in their own right. For some this takes the form of working, but it doesn't have to. Being a full person—that move away from the derived status—is the attitude change. And on that issue there's no turning around."

Ms. Bartos, whose book, "The Moving Target: What Every Marketer Should Know About Women," was recently released, continued: "Someone said, rather inelegantly, that once you squeeze the toothpaste out of the tube, it can't be put back. That describes what has happened with women's self-perceptions and aspirations."

The idea that a woman's place is in the home was a fairly widely accepted notion until the last decade or so, noted Elizabeth Nickles, senior vp of D'Arcy-MacManus & Masius, Chicago. In 1967, 60% of women agreed with that statement, but by 1977, that percentage had dropped to 25%.

Wives and mothers of children under 18—once the steadfast keepers of home and hearth—currently are the ones leading the march into the workplace. The number of working wives has tripled during the last few decades and the Labor Department recently reported that more than half of the nation's children have mothers who work away from home.

It said 58% of all mothers with children under 18 had jobs in 1981 compared to 28% in 1950 and only 9% in 1940. And the participation of married women in the work force with children under six advanced from 30% in 1970 to 48% last year.

Government officials expect another 11 million to 14 million women to go to work during this decade, and some observers predict by 1990 the work force will be 46% female, with two out of three women employed.

Others are skeptical, said Ms. Bartos. "Scarcely a day goes by that I don't hear someone explaining that the biological clock will move all those young female careerists of the baby boom generation back into the home." But she insists it's not going to happen, and most experts agree.

One reason simply may be those attitude changes. "Regardless of any other consideration, young women expect to work," said Martin Letscher, marketing research manager at Racine Wis.-based S.C. Johnson & Son. And he said well educated women tend to approach their careers in the same way men do.

"For them, work is part of life. It gives them self-satisfaction," he said. "They expect to have other obligations, but work is very important and other things just have to battle with work for priority."

Experts say role models, too, will affect women's employment patterns as working mothers raise daughters who will follow in their footsteps.

Another reason women aren't likely to retreat to the kitchen is the close correlation between education and women's presence in the work force.

Studies show the more education a woman has, the more likely she is to go to work. And women today are entering colleges, graduate schools and MBA programs in unprecedented numbers.

In 1960 women received one-third of all bachelor's degrees; in 1980 it was nearly 50%. According to Mr. Letscher, 54% of current undergraduates are women; this figure includes many older women who are returning to college. Fully one-third of all business students are female. The percentage of female engineering graduates has gone up from 1% in 1970 to 10% in 1981.

Perhaps the most compelling reason for women to keep working, however, will be sheer economic necessity. One out of every six families today is headed by a female. The divorce rate has soared and many women are marrying later or not at all. So for those who must support themselves or their families, a job is an unquestioned necessity.

When asked why they work, most women say it's primarily for the money. Such questions, however, touch a tender nerve. Said Judith Langer, head of Judith Langer Associates, a New York-based opinion research company, "Of course women work for money. Don't men? They want the money as compensation and reward, if not simply for survival, but this doesn't mean they are working *only* for money."

In reality, both money and self-esteem usually are at stake. "The yearning for an identity beyond their traditional family roles is so deeply intertwined with economic motivations, they can't be separated," said Ms. Bartos. "Gaining a sense of self is a fundamental part of all of it."

Is the working woman, then, different from the nonworking woman? Absolutely, says Ms. Nickles. She and market researcher Laurie Ashcraft drew that conclusion in their book, "The Coming Matriarchy," after studying the opinions of 2,400 women nationwide.

"There is a statistically definable difference between women who work outside the home and those who do not," declared Ms.

A whole new industry seems to be springing up to take advantage of women's new roles and responsibilities, and disposable incomes.

Nickles. "Employed women are more self-confident and ambitious. They feel more attractive physically. They actively seek the limelight to a far greater degree." And, she added, as a woman's income goes up, "these characteristics increase proportionately."

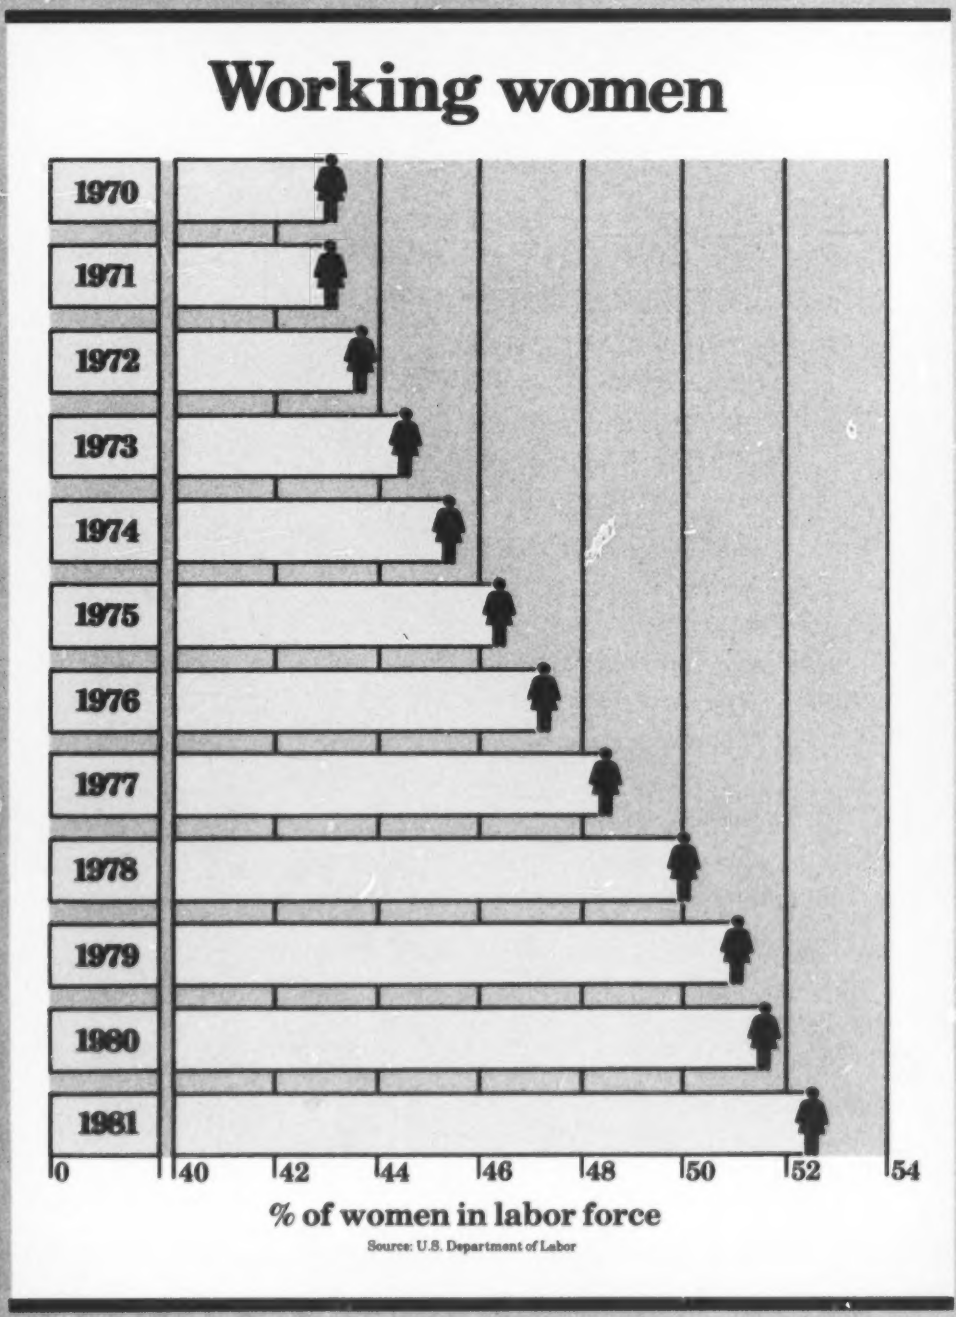
Working women's greater assertiveness shows up in their responses to products, too, said Mr. Letscher.

If a product isn't performing satisfactorily, he said, the working woman assumes it's the product's fault. The nonworking woman, on the other hand, is more likely to assume she isn't using it correctly.

Demographic studies find working women, on the whole, are younger, more affluent and better educated than their stay-at-home sisters. They also watch tv less, travel more, read more magazines and newspapers and listen to the radio more often.

However, some observers warn against applying the "working" and "nonworking" labels too broadly.

"Advertisers often are content to address the women's market in terms of those two groups," said Linda Robinson Rutz, vp-account service with Lincoln, Neb.-based advertising, marketing and public relations agency Miller Friendt Ludemann. Ms. Rutz, who is in the process of earning a graduate degree in journalism from the University of Nebraska, recently completed



a research study on how women perceive advertising directed to them.

Most women, she says, do not fit into a working or a nonworking category.

For example, many women who stay at home with their young children shouldn't be classified as nonworking. "They are temporarily interrupting their careers," she said. In fact most women see their lives as a combination of work roles with movement in and out of different roles at different times, said Ms. Rutz.

The Yankelovich Monitor, a tracking study of consumer values that New York-based Yankelovich, Skelly & White publishes annually, began asking working women back in 1971 whether they thought of their work as "just a job" or a "career." That distinction has since become recognized as one way of further segmenting the working woman's market. Yankelovich also began asking housewives if they ever planned to work, a question designed to segment the housewives group.

Ms. Bartos based her recent studies on those four demographic groups—the stay-at-home housewife, the plan-to-work housewife, the "just-a-job" working woman and the career-oriented working woman.

As might be expected, her research indicated that the plan-to-work housewives have a great deal in common with the working women, but each group has its own distinctive set of characteristics.

All of which poses problems for marketers trying to zero in on the *real* Ms. America. Is she the woman trudging through the grocery store with three kids and a fistful of coupons? The middle-aged lady behind the cash register? Or the young female executive in the red sports convertible?

In truth, she is all of these, and that makes life difficult for marketers accustomed to thinking of the women's market as housewives, 18 to 49. Indeed, while women's attitudes have changed dramatically during the last decade, advertising has lagged.

Advertisers took a bad rap from the Commission on the Status of Women at the United Nations in the early 1970s. They looked at advertising from 28 countries and concluded that women almost always were portrayed either as dependent housewives or passive glamor girls.

In 1975, the National Advertising Review Board reported almost the same thing. "In the advertising of household products," it said, "women too often are portrayed as stupid—too dumb to cope with familiar everyday chores unless instructed by children or a man, or assisted by a supernatural male symbol."

However, even during the early 1970s, change was creeping in. Commercials started to show women in new roles, such as jockeys, pilots and newscasters. Admittedly, the female with an unusual occupation was usually stuck into advertising for that surprise twist. Still, it was a beginning.

"It wasn't the kind of fundamental change that might have happened if advertisers had taken the changing role of women seriously and built it into their marketing procedures," Ms. Bartos said in "The Moving Target." But she added that creative people were responding intuitively to a changing atmosphere and apparently their hunches worked.

In testing women's attitudes toward advertising, Ms. Bartos found that virtually all groups—housewives as well as working women—responded most positively to contemporary commercials and contemporary imagery and most negatively to traditional ones.

And things are changing.

In a Stouffer's commercial, for example, a professional-looking woman in an office tells us she won't have to cook that evening, thanks to the sponsor's product. And now men are even showing up in tv commercials, washing dishes and diapering babies. A Campbell Soup Co. spot shows a young husband in the kitchen preparing dinner for his working wife. "This type of advertising would not have been dreamed of 10 years ago," Ms. Bartos said.

Marketers of automobiles, financial services and life insurance have discovered the working woman, too, and they're beginning to produce commercials for her attention.

Ms. Bartos blames "lazy" ad people for creating the old (and some new) stereotypes. "Once they identify their target group, they tend always to show a prototype of that person in commercials," she said. "That's just creating a cliche."

Advertising, however, almost always lags behind trends in the real world, said Ms. Langer. Conventional advertising often seems to show women as lazy. It has taken a long time for advertisers to realize that they're dealing with people who are trying to achieve a lot, who want products that will save them time.

Yet Ms. Langer, too, notes change. Commercials for household cleaners, for example, are just now beginning to show people who say right off that they hate to clean. "I've been hearing women say that for five years without any trace of embarrassment at all," she said.

A whole new industry seems to be sprouting up to take advantage of women's new roles and responsibilities—and disposable incomes. Ms. Bartos calls it "the woman industry."

Magazines targeted to the working woman have found a secure niche on the newsstands. In addition, there are the "head hunters" and personnel experts who specialize in placing executive women.

There are also the career counselors who help women "track their way through the corporate jungle," said Ms. Bartos, and of course the seminars, training programs, financial courses, classes to develop "reentry skills" and how-to books by the dozens.

"Many of these programs are extremely productive," Ms. Bartos said.

She does add that "frankly, some of them strike me as somewhat exploitative." But the fact that some sharp promoters have joined the pack actually may be a good omen.

"Such people don't cling to unprofitable or lost causes," she said. "Ironically, the very presence of these opportunists is evidence of the inevitability of the quiet revolution." ■

Change in one area tends to reinforce change in another. The charts indicate the increased percentage of working women, women who work who have small children and women who are going after traditionally male degrees.

An informal poll

More traditionally male products are being marketed to women; more convenience products are being advertised; and older women are showing up in commercials.

These were some of the responses that female advertising executives gave to questions Advertising Age Magazine asked in a poll on how advertising geared to women is changing.

Although the responses differed on some points, on one there was almost total agreement: There is a growing percentage of advertising targeted to the working woman. Also, according to Joan Rothberg, executive vp-general manager of Ted Bates Advertising/New York, "formerly male-oriented products—cars, travel, banks and brokers—now also target to women."

Magazine also queried the female executives whether they thought that there was a change in the products themselves being advertised.

"Yes," they said. More convenience foods, more frozen foods and more high ticket items such as liquor, cars and jewelry are showing up in advertising.

To the question, "If you do not see advertising to women changing, why not?" Jackie Silver, senior vp-director of research and strategic planning with N H & S/New York, answered, "Marketing management is primarily over 40 and out of touch. They have stereotypic impressions of women's roles and attitudes."

But the question sparked a different response from Ms. Rothberg, who wrote: "A high percentage of advertising has changed very little for two reasons: One, 'it still works,' and, two, 'advertising follows rather than leads the market.' "

Some of the executives had strong responses to some of the questions. "What are some ads that you consider obsolete?" we asked.

The ads that portray the "new wave of air freight services," wrote Joanne Kaufman, vp-account supervisor, Doyle Dane Bernbach. "Only male managers are portrayed," she said. Also obsolete are most coffee ads. "The woman always brews, the man always drinks."

To the final question: "What other areas of advertising are being affected either by changing demographics and/or the working woman phenomenon?" several respondants noted media selection, advertising to males as decision makers for package goods, more mature models in the ads and more men shown in a parenting role.

Actual commercials cited as examples of the changing trends included a Tab commercial in which the girl being whistled at is both a wife and a mother. "Very refreshing," said one respondant.

Another was the Skippy peanut butter ad in which the little football player turns out to be a little girl. ■

MICKELBERRY BOSS SAYS:

Buying agencies profitable hobby

By CHRISTY MARSHALL

NEW YORK—Some people call James Marlas, president-chief executive officer of Mickelberry Corp., a modern-day Renaissance man. He was educated at Harvard, the University of Chicago and Oxford. He has practiced law in London and at the world's largest international law firm, Baker & MacKenzie in New York.

He plays the piano, paints, used to sculpt and has written an unpublished novel. He personally redesigned his Fifth Avenue apartment. He appreciates vintage wines.

And he collects things, like antiques, fine art—and advertising agencies. In fact, the multifaceted Mr. Marlas, who became a large shareholder in publicly owned Mickelberry in 1970 and its president the following year, has transformed the company from a faltering meat processor and baker into an aggressive acquirer of ad agencies that stands out even amid the current rampant acquisitiveness in the advertising business.

JAMES MARLAS

Mickelberry acquired its first agency, New York's Daniel & Charles, in 1972. The company digested and assessed that acquisition until March, 1980, when it went on a buying spree that so far has added five other New York agencies to the fold, the most notable and by far the largest being the highly coveted Cunningham & Walsh, acquired last March.

Prior to Cunningham & Walsh, Mickelberry snapped up Nadler & Larimer, in March, 1980; Landis & Landon, the following month; David, Oksner & Mitchneck, in April, 1981, and F. William Free & Co., in December, 1981.

Last year, Cunningham &

RJR/Heublein giant in consumer goods

By ROBERT RAISSMAN and CHRISTY MARSHALL

R.J. Reynolds Industries' proposed $1.3 billion acquisition of Heublein Inc. creates an advertising Goliath that will easily spend well over a half-billion dollars annually.

Their combined 1981 advertising spending last year—$508,279,600—would have ranked RJR third in ADVERTISING AGE's annual 100 Leading National Advertisers survey. In 1980, RJR was ranked seventh with total spending of $298.5 million, and Heublein ranked 26th with spending of $170 million.

Those advertising dollars may not be going through some of the current ad agencies, however; several client conflicts may be created by the giant combination.

With Reynolds backing, Heublein's foods, spirits and wine units are expected to receive added spending muscle, stunned competitors speculated after last week's announcement.

"This does not relate to any specific category such as liquor or fast-food," said one distilling industry executive who declined to be identified. "It's an evolutionary phenomenon of American business whereby mergers of large, disparate companies are part of a larger scheme that will insure economic survival by having one's eggs in many baskets."

In Reynolds' case, those eggs will be apparent whenever a consumer leaves the house. At the grocery store the company will be represented by cigarets, chewing tobacco, pipe tobacco, frozen foods, canned vegetables and fruit, fruit juices, wine, steak sauce, mustard and condiments. Step out on the street and RJR will be into fast-foods with Kentucky Fried Chicken. Move to the corner bar for a splash of Smirnoff or a shot of Jose Cuervo tequila or any of several distilled spirits soon to be in the Reynolds family—all barring any regulatory objections to the merger.

It will be Heublein's beverage division that, according to trade sources, will be Reynolds' No. 1 priority. The divison accounted for

Phony coupon draws 6,000 redemptions

Another postal ad sting

By BRADLEY JOHNSON

The U.S. Postal Service revealed last week that it put coupon ads for Attract shampoo, a bogus product, in the *Detroit Free Press*, *Detroit News* and *Flint Journal* in a coupon fraud operation.

An estimated 6,000 coupons were sent in for redemption. The redemption rate of 0.5% compares with a rate of 5% to 7% for a legitimate product, according to George F. Valassis & Co., Livonia, Mich., which printed Attract coupons for the Postal Service.

The Postal Service investigation appears to be continuing. The sting operation is similar to one in New York that used another fake product, Breen detergent (AA, Dec. 18 '78). That postal service investigation brought a number of indictments of retailers and others.

Valassis said it agreed last fall to put the Attract ad into its coupon insert that goes into Sunday papers. The ad went into its Jan. 24 insert, but only in the *Detroit News* and *Flint Journal*; about 160 papers in other markets received regular coupon inserts without the bogus ad. Valassis says it didn't tell the newspapers about the ad. It said the Postal Service was responsible for targeting those particular markets and papers.

The *News* and *Journal* said they do not verify preprinted coupon fillers. "We expect Valassis to check it," a Journal spokeswoman said.

The *Detroit Free Press* ran the ad r.o.p. on Jan. 20 and 27 after receiving copy and a check from a bogus ad agency in Iron River, Mich. "If there hadn't been cash with copy with this thing, we certainly would have checked that one out," said Ken Swaim, director of national advertising for the *Free Press*.

The 25¢ coupon instructed retailers to mail the coupons to an Elm City, N.C., redemption center operated by Donnelley Marketing,

Separate ABC/Cox venture readied

ABC/Getty pay-view net may join with Cox, Oak

By SUSAN SPILLMAN

New York—ABC and Getty Oil's proposed joint pay-per-view network has been named RSVP Sports and could soon have two additional equity partners—Cox Cable and Oak Communications.

If part of the venture, Cox would likely provide interactive software and Oak the hardware.

According to Stuart Evey, vp-diversified operations of Getty, no agreement has been made with Cox or Oak, although discussions have been held. Mr. Evey also stated that no launch date or specific events have yet been secured for RSVP Sports. Original plans for the network called for about six major events per year.

With Cox in the fold on the RSVP venture, the ppv effort would presumably have some inherent advantages. For example, Cox, as a major multiple systems operator with more than 1 million subscribers, has a reputation as one of the more aggressive cable marketers. At this point, five of Cox's systems are addressable, with several others being built. Oak, meanwhile, is the leading subscription tv operator with more than 600,000 subscribers. All of these homes could conceivably receive RSVP, since they already have the necessary addressable hardware.

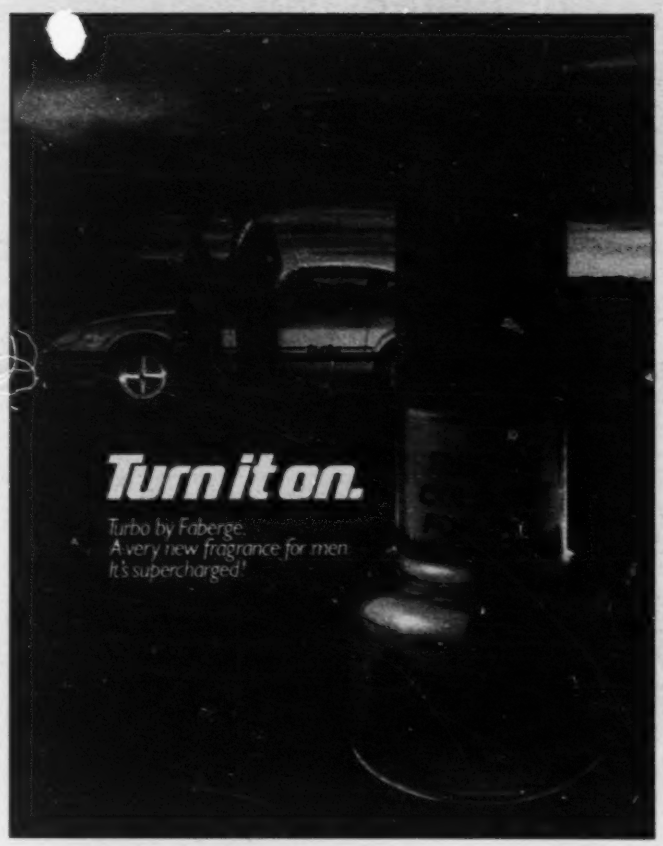
ABC's separate ppv joint venture with Cox Cable, however, Advertising Age has learned; is slated to begin in October. The ABC/Cox partnership, announced in May, will turn on in Cox's 170,000-subscriber San Diego and 43,000-subscriber Santa Barbara systems. Two other systems may also be included, said Art Dwyer, vp-marketing for Cox Cable.

Subscribers in these systems will be offered eight to 10 events per month including major motion pictures, live theater, sports and specials, Mr. Dwyer said. Events will vary in price but by no more than $1 or $2, and various payment schemes will likely be tried.

ABC joined Cox in the venture when it had learned the multiple systems operator was planning to fund similar ppv research to that which it was already intending to conduct.

Questions the two hope to answer are: What interactive programing do consumers want? What equipment will work best and price sensitivity.

It is estimated that the ppv business, still very much in its infancy, could generate well over $2 billion in revenues by the end of this decade.



Faberge is driven

Turbo, the European men's fragrance being introduced in the U.S. this fall by Faberge, will get print ads (via Nadler & Larimer) plus a sweepstakes offering the Datsun 280ZX. The two companies will sponsor the Caesars Palace Grand Prix (AA, July 26).

Late 'Cleveland Press' still makes news

By JIM MARINO
Crain News Service

Cleveland—The *Cleveland Press* died after 103 years of publication last month, but it did not go quietly. What at first blush seems to be the story of yet another afternoon newspaper succumbing to the economy and tv and changing demographics increasingly seems to be far more.

Indeed, the *Press* is generating as much controversy and mystery a month after its demise as it did with some of its best exposés during its heyday as one of the most powerful—and according to *Time* magazine 20 years ago, one of the ten best—newspapers in the country. The controversy centers largely on the circumstances leading up to the paper's folding, and it is mounting:

- According to reliable sources, the Cleveland office of the U.S. Justice Department is investigating whether the *Press* sale of its subscriber list to the rival *Plain Dealer* may have violated antitrust law by contributing to the creation of a newspaper monopoly in the market. *Press* publisher Joseph Cole reported the sale of the subscriber list in a June 17 story on the paper's closing that day.
- The Justice Department probe may be expanded to consider reports, first published by *Crain's Cleveland Business*, that Mr. Cole and Newhouse Newspapers, publisher of the rival *Plain Dealer*, struck a deal under which Mr. Cole agreed to fold his paper in return for an estimated $6 million to $16 million payment. Nominally, this payment was for the subscription list, but observers here say the list couldn't be worth anywhere near the amount said to have been paid. The *Plain Dealer's* real motivation, it is suggested, was to eliminate the possibility of the *Press* becoming a much stronger paper if, as appeared possible, the *Plain Dealer* were to undergo a labor strike.
- In the latest development, Mr. Cole last week sued *Crain's Cleveland Business* for the return of confidential *Press* memos and documents and to block the weekly's further use of the materials in stories on the *Press*. (*Crain's Cleveland Business* is published by Crain Communications Inc., which also publishes Advertising Age.)

Mr. Cole claims the memos and documents, which he says were stolen from the *Press* and given to

SelecTV will expand to 24 hours

By MAURINE CHRISTOPHER

SelecTV, Los Angeles, one of the country's leading subscription tv programers, expects to go head to head with premium pay cable services soon by expanding to a 24-hour schedule on Westar IV, according to the company's president, Lionel Shaen.

The Federal Communications Commission paved the way for such stv/pay cable confrontations recently. Stv station licensees were told they no longer are required to program at least 28 hours of free-to-the-viewer programing weekly.

John Calvetti, senior vp-general manager, SelecTV, said almost all the stv operators now carrying SelecTV's shows are considering going subscription fulltime. This includes KWHY-TV, Los Angeles, and WCGV-TV, Milwaukee, which the company runs itself on a time lease basis. SelecTV pays between $300 and $500 an hour for time in Los Angeles, for example.

- Discussions about full stv operations are in progress now with the licensees of both stations. Among those waiting eagerly to go all—or nearly all—stv for one of his two stv outlets is Ed Taylor, president

A game of hide-and-seek

By B.G. Yovovich

The youth market seems bent on not behaving the way its elders—and especially marketers—expect it to.

It is easy to recall the many ways that the baby boomers' life styles confounded marketers as the bulk of that generation rumbled through its teens and college years a little more than a decade ago, and today's under-25 crowd is proving to be just as perplexing.

Advertisers are finding, for example, that the mass media have become less and less effective in reaching teens and college students. Preteens, on the other hand, may spend a great deal of time watching television, but research suggests that they are becoming significantly more skeptical of, and inured to, commercial messages.

And even the strength and vitality of today's youth market has surprised the marketing community, many of whose members abandoned younger consumers during the middle and late 1970s.

"In the mid-1970s considerable attention was focused on the declining demographics of the youth market," recalls Lester Rand of the Youth Research Institute, who has been polling the youth market since the early 1950s. "The number of teen agers reached an alltime high in 1975," and projections of the decline in the number of teens caused "varying negative comments on the viability of the market" within the business community. Projections that the 13-to-19 population would fall roughly 7% from 1976 to 1980,

(Continued on Page M-6)

B.G. Yovovich is a Chicago-based business writer and frequent contributor to Magazine.

BEST AVAILABLE COPY

Playing hide-and-seek

(Continued from Page M-5)
and that the teen population would fall another 20% by 1990, provoked particularly harsh assessments of the prospects for the youth market.

Such population projections, however, did not take into account a variety of social and economic developments that in recent years have helped refocus interest on the under-25 crowd. For example, the increase in the number of working mothers: More than 52% of mothers with children under 18 worked in 1980, compared with less than 39% in 1970. This has helped increase the importance of the teen market, as this group has begun to take over more and more of the family shopping.

A comparison of surveys of *Seventeen* readers in 1959 and 1979 provides evidence of the change, with respondents in the more recent survey reporting that they took care of 35% of their families' food shopping, compared with 25% in the older study.

Advertisers are finding that the mass media have become less and less effective in reaching teens and college students. Preteens may watch tv, but research suggests that they are becoming skeptical of commercial messages.

A comparison of 1981 and 1960 Rand Youth Poll results yields similar findings, with the percentage of teens reporting involvement in family food shopping having grown from 49% in 1960 to 68% in 1981.

The increase in the number of two-income households—particularly when combined with the decrease in the average number of children per household—also has meant that today's teens are likely to have more money spent on them by their parents.

"Young people have been the prime beneficiaries of the [growth in the number of] two-income households," says Mr. Rand, who adds that "the amount of money spent on gifts for young people is enormous."

When the funds received from parents and the money teens earn from jobs are combined, Mr. Rand estimates that they spent roughly $40 billion last year—more than 50% higher than in 1976, despite a decline of more than 7% in the teen population.

Today's teens also have endeared themselves to marketers by showing far more interest in grooming, fashion and personal care than did the youth of the 1960s. For example, according to a recent *Teen Magazine* survey, teen agers now spend more than $1 billion a year just on jewelry, and spending on clothing, cosmetics and personal care products is on the rise.

Not all is rosy on the teen marketing scene, however, and some of the same things that have helped make the teen market more attractive also have made it harder to reach. Teens traditionally have played hide-and-seek with the mass media, and their assumption of increased household duties and the increase in the number of teens with parttime or fulltime jobs mean that the mass media are finding them even busier and less accessible. The booming popularity of videogames among teen agers has further cut into the mass media's 13- to 19-year-old audiences.

An even more fundamental problem further complicates efforts to reach this group: The fragmented nature of the teen market.

"The interests and concerns of a 13-year-old are very different from those of a 17-year-old, which are very different from those of a 19-year-old," observes one marketer. "That complicates any effort to reach the entire teen market."

The "trickle-down" benefits of two-income households that have bolstered the teen segment also have helped make preteens a more attractive market, as have some promising population projections. With members of the baby boom having begun to form their own families, the number of births in the U.S. has risen from a low of 3.1 million in 1973, to 3.6 million in 1980, and demographers project that, by the mid-1980s, U.S. births will exceed 4 million a year and will help spur demand for such products as toys, candy and breakfast cereals aimed at preteens.

Just as with the teens, however, the good news for marketers is tempered with some bad: The youngsters are becoming disillusioned with advertising.

"By the time kids are 8 years old, they have gotten very suspicious of advertising," explains an executive who used to be involved with McDonald's Corp. ads directed at preteens. "Kids feel as though all the ads want to do is get them to buy, buy, buy —that advertisers don't care about kids at all."

As a result of such findings, McDonald's ads aimed at preteens generally use a very "soft sell," stressing the adventures of Ronald McDonald and hardly mentioning products.

Undoubtedly the most attractive part of today's youth market has to be the college segment, and it's easy to understand why:

- It is growing, currently 12 million strong and expected to increase by roughly 200,000 a year through the 1980s.
- It is affluent. The Rand Poll estimates that after college expenses are paid, the average student has roughly $2,200 a year that is almost entirely disposable income.
- It is relatively recession-proof. As one ad executive points out, "When money gets tight, parents will make every effort to keep it from affecting their kid who is away at college."

Recent surveys of the college market not only document the collegians' expected proclivity for such things as hi-fi equipment, electronic calculators, beer, and airline travel, but, says Mark W. Rose, vp-marketing with CASS Student Advertising, "It has gotten to the point today that the college student actually comprises a mini-household. We're beginning to see interest from [companies that market] those kinds of general products that are necessary for consumers who are trying to set up their own households."

College market insiders point to Tylenol and American Express cards as examples of products that have become more aggressively marketed to college students, and they claim that a number of companies—including Armour, Eastman Kodak, and Ralston Purina—are about to begin addressing the college market.

As attractive as the college market may be, efficiently delivering the advertising message to it is another matter.

"College students are hard to reach [with advertising] because they are more active than other people," says Jeffrey Dickey, president of Alan Weston Communications, a diversified college marketing company in Los Angeles that publishes *Ampersand*, a magazine aimed at college students. "They're single, and they socialize more. They go out to parties, to concerts, to football games, to movies. They're out and around a lot, and they're not penned into situations where they can be reached by conventional media."

"The interests and concerns of a 13-year-old are very different from those of a 17-year-old, which are very different from those of a 19-year-old. That complicates any effort to reach the entire teen market."

Several market research studies conducted in the last few years, for example, have found that college students watch about a third of the tv watching that the general population does, putting them in the lowest quintile of tv viewing audiences.

"In the next two or three years they are going to get even harder to reach because of all the alternative media they'll have available," adds Mr. Dickey, who predicts that videogames will cut into college students' already meager tv-watching time.

Given such difficulties and the growing interest of marketers in reaching the college market segment, it is not surprising that a number of efforts are under way to improve old vehicles and develop new ones that can deliver collegiate audiences.

Alan Weston Communications, for example, is developing a college-oriented soap opera series for radio syndication starting this fall. Set on the campus of fictional Upstate University, the five-day-a-week, four-minute show is expected to premier in January, 1983, and will be syndicated to album-oriented rock stations around the country and will be promoted via college newspapers. Weston officials also mentioned ambitious plans for an innovative way of reaching college students with tv programing, but they said that de-

tails would not be released until later this summer.

On-campus marketing and promotion efforts also are getting more attention.

"The campus life style is one that encourages camaraderie and interaction, and is a fertile area for word-of-mouth to get going. It's a great place for promotion," says Mr. Rose, whose Evanston, Ill.-based company established a Campus Resources division last January for the express purpose of helping those marketers who want to sponsor such on-campus events as concerts or film series. CASS also is looking for growth in its main line of business as a national sales representative for college newspapers, a division that will reach $16 million in sales this year, an eight-fold increase over the last decade.

The newsmagazines also are increasing their efforts to bolster their college audiences. *Newsweek*, for example, will not only be offering advertisers a college demographic edition this fall, but also will begin publishing a quarterly *Newsweek On Campus* special supplement with editorial content distinctly different from that found in the national edition.

"We will be devoting our full editorial resources to *Newsweek On Campus*—the same editorial staff and campus correspondents that put out our national edition—but the coverage will be personalized for college students," explains Jeffrey A. Stern, *Newsweek's* manager of student marketing, a position created only last fall. "In the national magazine we may be reporting about the national budget problems, but in *Newsweek On Campus*, our emphasis might be on how the budget cutbacks will affect funds for students. We also will have regular columnists whose names are recognized in the college market," including Eddie Murphy of "Saturday Night Live" as a humor columnist and University of Georgia halfback Herschel Walker as the first "My Turn" columnist.

Archrival *Time* also has been increasing its effort to cultivate the college market by supporting the "College Bowl" intercampus competitions and by bolstering its program to make *Time* easier for college instructors to use as a classroom supplement.

Yet, even if such efforts improve the ad vehicles available to marketers to reach the youth market, advertisers still will be faced with the challenge of communicating effectively with the under-25 crowd, of bridging the generation gap.

"Marketers are afraid of the youth market," maintains Mr. Dickey, "because they don't understand youth. It has been that way forever. They [marketers] are from a different generation, and they can't relate to it. So, when the economy is going good, they stay away from it [the youth market]. When the economy goes in the crapper, then all of a sudden everyone starts looking for new market niches, and advertisers start saying that they are interested."

Media cool—but not to college crowd

Marketers take a hard look at a choice group

By Belinda Hulin-Salkin

Today's college student is the quintessential consumer—educated, brand selective, image conscious and somewhat materialistic. According to college marketers, college students have more disposable income than ever before, and they're spending it on themselves.

"Very often advertisers think that because they do a lot of advertising on youth-oriented radio or tv, they're hitting the whole market. But in focus groups we recently questioned, tv viewing was very low . . . ."

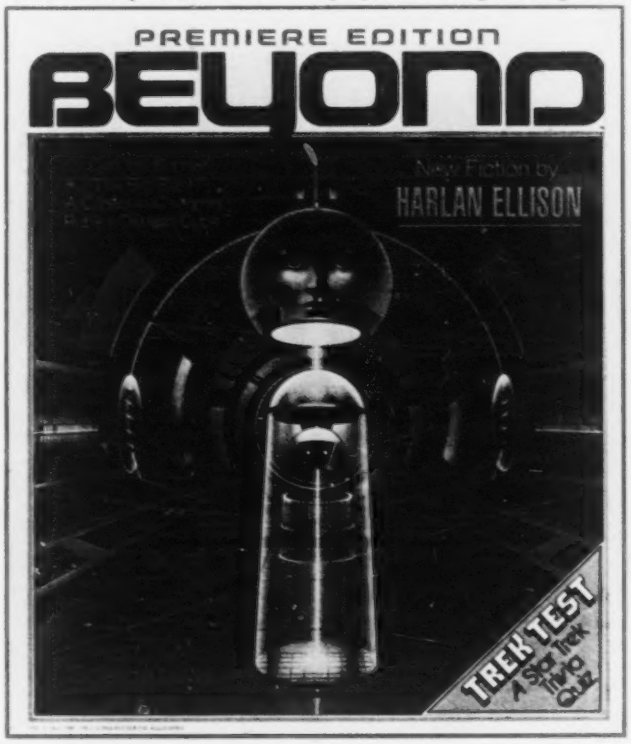
The problem is reaching them. The $26 billion (some estimates are as high as $40 billion) college market doesn't watch televison, buys mass market magazines erratically and spreads itself very thin across the radio dial. But research shows that students do read the college newspaper, and they can be counted on to stroll into the campus store with some regularity. Armed with these facts, a number of marketing companies are helping manufacturers reach students—quite literally—where they live.

University Communications, owned by Ziff-Davis Publishing Co., New York, publishes the *Directory of Classes*, which finds its way to 1.5 million students at over 75 major colleges and universities in the U.S. three times during the school year. The *Directory*, a source for college course listings and summaries, ran "in excess of 70 pages of national advertising . . . and hundreds of pages of local advertising in the various editions in the 1981 to 1982 academic year," noted Jerry Koffler, director of advertising with University Communications.

Mr. Koffler, whose *Directory* is the only major college advertising medium that is an official publication of its schools, pointed out an interesting fact about college today: Although there are fewer people of college age, enrollment is at an alltime high. He looks to the current economic scene for the reasons behind this.

"First of all, society has placed a higher priority than ever before on education in order to get jobs," he said. "And with the country currently in a recession —with the rate of unemployment as high as it is—being in school provides a way of buying time" before an individual has to step out into the working world.

While students are buying time—and getting some breathing space—on campus, Alan Weston Communications in Los Angeles has been making the moves on them since 1977. The company offers advertisers a four-color, college newspaper feature-supplement called *Ampersand*—an entertainment-oriented insert that boasts close to a million circulation, cutting across the top Areas of Dominant Influence in the country. The magazine looks a bit like *Rolling Stone* in format, has an irreverently upbeat editorial slant, and provides a four-color backdrop for product promotion through the campus paper six times per school year.



Alan Weston Communications publishes* Beyond, *which is targeted to science, technology and engineering students.

"Surveys that have been done in the last 10 years show that 87% of the sample have read the college paper within the last seven days," said Durand W. Achee, publisher of *Ampersand* and executive vp of Alan Weston. "Little else compares with that.

"Very often advertisers think that because they do a lot of advertising on youth-oriented radio or television, they're hitting the whole market. There's no question that buying 'Saturday Night Live' or 'Friday' or time on certain radio stations has some impact on the market, but in focus groups we recently questioned, television viewing was very low, maybe an hour a day; and while they listen to the radio, students switch the channel a lot. They listen to a lot of different stuff . . . everything from jazz, to AOR [album-oriented rock] to punk rock to classical."

Because of the divergent music interests in today's college market, Mr. Achee said, *Ampersand*, a five-year-old publication, has changed its editorial focus somewhat in the last couple of years to concentrate on life style-oriented features, motion pictures and "annual special sections on travel, on hi-fi and stereo systems, on photography.

"The mass college audience is much more diverse than it once was—they're older and their purpose for being in college is to be better prepared for life. There is a strong emphasis on being an individual. Music is still very much a part of their life style, but it's not as important as it once was. For *Ampersand*, a cover with a major music artist is not going to get picked up as fast as a cover with a major comedian or a major film star on it."

In addition to the 74 colleges that receive *Ampersand*, an additional 48 schools began receiving another Alan Weston publication, *Beyond*, in the fall of 1981. According to Mr. Achee, the new four-color supplement has an editorial focus on science news, science fiction and technological development. It has a circulation of around 400,000 and is targeted to engineering and technical science majors.

"We were aware that there is a tremendous demand for engineers, and engineers are the people who are now walking out of college with $27,000-a-year jobs," he said. "The first thing that a graduate is going to do when he gets that job is start buying furniture, clothes for business, a car, a better stereo. So we had a sense that if we could expand to the technical market with a narrowly targeted publication, the response would be good. As it happens, the response has been tremendous."

If marketers are aware that there is a big demand for engineers, today's college students are certainly not hiding from the economic facts of life. Both entry-level students and older students who have come back to school for new career training are pursuing the degrees that will give them the most promising future: Computer sciences, engineering, math, business. According to Jeff Dickey, president of Alan Weston, today's college students are very pragmatic: Recent history has not allowed for the nurturing of dewy-eyed idealists.

"Right now, the average college student is 22 years old. He was born in 1960," explains Mr. Dickey. "By the time he was three years old, Kennedy was assasinated; when he was five, the country had major racial problems.

"From the time he was 8 until he was 12 he had the Vietnam war, and the kid saw body counts on tv every night. In 1973, we had a president kicked out of office. From 1973 to 1975 economic times were terrible and in 1979, it was the same thing again—'Dad's out of work and I have no job prospects.' This is the kid your dealing with —we're not talking about an eternal optimist here."

Today's college students are certainly not hiding from the economic facts of life. Both entry-level students and older students are pursuing the degrees that will give them the most promising future.

In addition, Mr. Dickey said many of today's college students have personally experienced the breakdown of the single family unit; they don't know whether they'll ever afford a house and, if they're 22, they are probably sitting next to someone in class who's 35 and going back to school so he or she can get a job.

"But on the flip side," he added, "today's college students tend to be more affluent than ever before because 58% of them work part or fulltime during the school year and another 30% have jobs during the summer. Also, college has become so expensive that the lower income students have dropped out of the market. So disposable income in the market is higher. Today's college students are

Estimates of '81 advertising to sales and advertising to gross profit margin by industry

A sixth annual study of advertising and promotion expenditures of U.S. corporations and industry sectors has been completed by Schonfeld & Associates, a Chicago-based consulting company.

The study forecasts advertising and promotion expenditures of more than 4,200 individual companies in 224 industry sectors. Ratios of advertising and promotion to net sales and to gross margin (sales minus cost of goods sold) are also calculated. The accompanying table from the study contains average 1981 industry ratios that are commonly used for ad budgeting. However, Schonfeld cautions that within many of the industry sectors individual companies may spend significantly more or less than the average shown here.

The raw data for the study were compiled from 10-K reports filed by publicly owned companies with the Securities & Exchange Commission. Therefore, advertising and promotion expenditures often include media and nonmedia spending such as collateral literature, production, etc. For this reason, these figures are often substantially larger than figures from media auditing services such as Leading National Advertisers.

"In some categories, such as alcoholic beverages, there is substantial point-of-purchase advertising. By subtracting media spending estimates, it is interesting to see how much nonmedia spending there is," commented chairman Eugene Schonfeld.

The study is particularly useful to industrial and business-to-business advertisers since these companies are not well covered by other reference works. For example, the Schonfeld study contains data on over 100 electronic computing companies in SIC 3573 alone. While data for the study were compiled from published financial statements rather than surveys, cautious interpretation is required for several reasons. First, companies may vary in what they include under advertising and promotion expenditures. Second, many large companies are in several fields, yet are listed in only their primary industry sector. Distortion may result because a large subsidiary may not be included in the industry in which it competes. Third, a few large companies are privately held and their figures are not included.

Besides ratios, the study forecasts 1982 and 1983 expenditures for each company, including their advertising growth rates, a measure of advertising and promotion spending stability and Schonfeld's rating of advertising and promotion effectiveness. A copy of the 335-page study is available for $275 from Schonfeld & Associates Inc., 120 S. LaSalle St., Chicago, Ill. 60603, (312) 236-5846, or $250 if prepaid.#

Legend: A&P = Advertising & Promotion. SIC = Standard Industrial Classification. N/A = No data available for this value. NEC = Not Elsewhere Classified. A&P as % Sales = A&P Expenditures/Net Sales. A&P as % Margin = A&P Expenditures/(Net Sales-Cost of Goods Sold).

Shops' expenses at record high as profits hit new low

NEW YORK—Operating expenses of member agencies are at an all-time high and profits have hit a record low, according to a study of the American Assn. of Advertising Agencies.

Tracking costs and profits since 1972, the Four A's found net profit averaged 3.55% of gross income in 1981. In 1980, it was 3.95%. Net profit as a percentage of billing for incorporated agencies has slipped to 0.83% in 1981, from 0.92% in 1980.

While rent, light and depreciation costs were up to a record high of 8.3% of gross income (from 7.95% in 1980), total payroll expenses were down to 60.8% in 1981, from 61.3% in 1980. However, agency employers are kicking more into retirement and insurance plans.

In the wake of Reaganomics, taxes are hitting new highs. Other than income tax, taxes rose from 4.3% of gross income in 1980 to 4.4% in 1981.

The study noted: "In some agencies, such taxes are greater than rent." The accumulative state, county and municipal taxes, Social Security and federal taxes now rank as the third-highest expense in agency operations, behind rent and payroll.

Income tax accounted for 1.33% of the gross in 1981, compared with 1.25% in 1980.

Total expenses for agencies are also at a record high—95% of gross income in 1981, compared with 94.8% in 1980. In 1972, total expenses accounted for 94.6% of the gross.#

KENNETT HINKS

BALTIMORE—Kennett W. Hinks, 85, a former director of J. Walter Thompson Co., died here July 22 at Johns Hopkins Hospital. He resided in Cockeysville, Md.

Mr. Hinks began his career at JWT's Chicago office in 1921 as director of research.

In 1925, he was appointed Pacific Coast manager of JWT's then new San Francisco office. From 1929-1932, he managed the company's Berlin office and supervised the Vienna and Warsaw offices.

Mr. Hinks returned to the U.S. in 1932 as an account rep in the Chicago office. He was elected a vp in 1936.

After taking a leave of absence to serve in the Office of Strategic Services during World War II, Mr. Hinks joined the agency's New York office in 1946.

In 1952, he was elected a director of J. Walter Thompson Canada. He was appointed to the executive committee in '55, named a senior vp in '61 and retired in '64.

JOHN McQUIGG

STUART, FLA.—John L. McQuigg, 74, a former director of J. Walter Thompson Co., died at his home here July 8.

Mr. McQuigg joined JWT's Detroit office in 1955 and was named vp later that year. He was elected to the board in 1957 and appointed to the executive committee in 1959. He retired in 1964.

Before joining JWT, Mr. McQuigg served as an exec vp at Lennen & Newell, a manager at the Geyer, Cornell & Newell agency in Detroit and as an assistant ad manager at Frigidaire. He began his advertising career as ad manager for West Texas Utilities.

MIKE McGOWAN

WILLINGBORO, N.J.—Mike McGowan, 61, a retired sales rep for the *Pittsburgh Press*, died of cancer here July 16. Before moving to the *Press*, Mr. McGowan was manager of the Scripps-Howard Newspapers' Philadelphia office. His previous sales jobs included posts at two now-defunct New York newspapers, the *New York World Telegram* and *New York Herald Tribune*. He also worked for San Diego Newspapers; Moloney, Regan & Schmitt, and Story & Kelly-Smith.

Four A's agencies' costs and profits

(Per cent of gross income unless otherwise stated)*

Number of agencies represented	1972 240	1978 242	1979 265	1980 272	1981 279

DANIEL E. SHEA JR.

MEDIA, PA.—Daniel E. Shea Jr., 49, former publisher of Chilton Co.'s *Instruments & Control Systems*, died of a heart attack on June 24 while in Boston on a business trip.

At his death, Mr. Shea was president of the instrumentation and controls division, Technical Information Distribution Service, a direct-mail service.

He also founded and published *Control Equipment Master*, a catalog service, and helped introduce *Food Engineering Master*. Earlier, he served at United Technical Publications in a number of publisher and management positions. He started his career at McGraw-Hill, and held posts at *Architectural Record*, *Electronics*, *Modern Hospital* and *Nation's Schools*.

WILLIS T. SMITH

CHICAGO—Willis T. Smith, 50, assistant manager of the Chicago office of *National Geographic*, died July 6 after suffering a stroke in the offices of N W Ayer. He was pronounced dead at Northwestern Memorial Hospital. Mr. Smith, who lived in suburban Deerfield, was with *National Geographic* for 16 years.#

the advertising market place

MEDIA RESEARCH

Major consumer magazine, NYC headquarters, has excellent opportunity for research analyst with 3-5 years of media research experience. Candidate must have thorough knowledge of audience research syndicated services, computer operations, and IMS on-line systems. Heavy sales staff contact. Outstanding company benefits. Send resume with salary requirements to: Anna F. Savitt, U.S. NEWS & WORLD REPORT, 45 Rockefeller Plaza, New York, N.Y. 10020

P&G rumor blitz looks like a bomb

Procter & Gamble Co.'s massive national publicity campaign to defuse rumors that it is in league with the devil—a campaign of perhaps unprecedented scope in U.S. marketing—was largely unnecessary and ineffective in reaching people who might believe the rumors, according to a national survey commissioned by Advertising Age.

The principal effect of the campaign, the survey suggests, has been to increase awareness of the rumors—and of P&G's vigorous denials of them—among people who were disinclined to believe the "devil worship" stories anyway.

The survey, and concurrent Ad Age interviews with dozens of grocery-products retailers, wholesalers, buyers and others, also indicates that, contrary to P&G allegations in the five lawsuits it has filed against alleged rumormongers, the rumors have had minimal effect on its sales and reputation.

The "costly public relations campaign nationwide" that P&G says it has undertaken may be in itself harmless; there appears to be little danger of the strategy backfiring and causing more people to believe the rumors, for example. Yet the whole affair does raise the question of whether the usually cooly analytic marketer overreacted to a rumor that all but a small minority of Americans seem to dismiss on its face. The lesson for other marketers, the data and some observers of the P&G reaction suggest: Look to P&G to write the rules on selling toothpaste and disposable diapers, but not necessarily for guidance on dealing with rumors.

There is one facet of the matter that some people suggest could yet make it something other than a bizarre footnote in the annals of marketing. That is what the P&G reaction might portend about the leadership of John G. Smale, P&G's chief executive since early last year, who supposedly is injecting a new aggressiveness into the company. "The decision to go public sounds to me like a John Smale special," said Hercules Segalas,

Southwest Media's Allison to run new N.Y. unit

New York—Wick Allison, 34, president of Dallas-based Southwest Media Corp., is moving here to head a new, as-yet-unnamed division. Mr. Allison's primary responsibilities will involve SMC's *Sport* magazine and the possible acquisition of other national magazines. Mr. Allison leaves the presidency of SMC and the management of its other magazines (*D, Houston City, Texas Homes*) to Bernard Kraft, 40, exec vp. Reports that Mr. Allison is being eased out after a power struggle were denied by Mr. Allison and SMC director Carl Sewell. "It was a personal decision," Mr. Allison said.

Ad hoc net if players strike NFL

Turner plots grid league

By SUSAN SPILLMAN

New York—Flamboyant opportunist Ted Turner struck again last week, this time capitalizing on the possibility of a National Football League Players Assn. strike.

In the event of a players' walkout, Mr. Turner's superstation WTBS plans to form an ad hoc network and hopes to distribute games to stations in every tv market. Between six and eight regional teams would be formed by top NFL players.

The accord reached with the NFL Players Assn. calls for the telecast of a prime time Monday night and a Sunday afternoon game weekly throughout the season. Mr. Turner, optimistic of clearing 100% of the country with his offer, expects to get $150,000 per 30-second spot, the same price charged by ABC for its Monday night games and $50,000 more than the going rate for NBC's Sunday afternoon football coverage.

If the union does form its own teams for telecast on WTBS, the NFL will sue the players, said league spokesman Jim Miller. He said individual player contracts, prohibiting them from playing football for any other club, are binding despite a strike.

Agency executives contacted by Advertising Age were amused by Mr. Turner's expectations and feel a strike may not occur.

Some agency executives contacted by WTBS salesmen said the superstation was hoping to work out package deals for spots on its National Collegiate Athletic Assn. football series, reportedly due to disappointingly sluggish ad sales.

In February, WTBS paid a whopping $17.6 million for the first live cable coverage of NCAA football.

At press time, details of the deal between the players and Mr. Turner had not been finalized but were supposed to be ironed out during the weekend. A press conference tentatively is scheduled in Washington for Tuesday.

Ed Garvey, NFL Players Assn. executive director, however, said WTBS would guarantee the players a yet-to-be determined rights fee in addition to a percentage of the ad revenues.

Unaware that Mr. Turner had

In Del Monte, Libby vegetable lines

Salted items take a licking

By CHUCK REECE

New York—S.S. Pierce Corp. and Del Monte Corp., seeking to capitalize on Americans' growing concern about sodium consumption, are rolling out lines of canned vegetables without added salt—and without test market experience.

While Del Monte, according to president Robert Fox, aims for its No Salt Added line to "complement rather than compete with" its regular canned vegetables, S.S. Pierce's Libby's has made a more drastic move: It is converting its entire line of canned vegetables to no-salt and no-sugar-added products called Libby's Natural Pack. The only exceptions are items such as pickled beets and sauerkraut, which require sugar and salt in their recipes. These will be called Libby's Deli-Pack.

Libby's Natural Pack line has 12 products in 35 styles and unit sizes, including peas, corn, green beans, wax and lima beans, beets, mushrooms, carrots and spinach.

Del Monte's No Salt Added line has five products—corn, peas, green beans and tomato sauce and paste—in 14 varieties or sizes, each, except the tomato products, with less than 10mg of sodium per half-cup serving. Typical canned vegetables have around 350mg of sodium per half-cup.

The company's vp for corporate research and technical services, D.L. Meggison, said the No Salt Added line would have a lower

FULL BOARD ACTS TODAY

NAB committee picks Thurston

By MAURINE CHRISTOPHER and ROBERT COOK

At stake is the presidency of the National Assn. of Broadcasters, potentially one of the most influential and high-profile positions in the communications industry.

If the 48-member board of the $9 million lobbying outfit endorses the work of its search committee, Donald Thurston, owner of Berkshire Broadcasting, North Adams, Mass., will capture the prize today at a meeting at the O'Hare Hilton outside Chicago.

Last week, the 52-year-old radio executive, who learned trade association politics as NAB chairman in 1977-78, took the preliminary contest when the search committee, led by Gert Schmidt, Harte-Hanks Communications, Jacksonville, and William Stakelin, Bluegrass Broadcasting, Orlando, chose Mr. Thurston over another small-market broadcaster, Edward O. Fritts, 41, head of Fritts Broadcasting, Indianola, Miss. Mr. Fritts, the incumbent joint board chairman, temporarily gave up that $50,000 short-term chairmanship July 23 to bid for the $200,000 fulltime presidency.

The Thurston forces emerged victorious from the search committee after a long, tiring session and two crucial votes. First, the committee voted to recommend a single candidate to the board from a list of seven finalists. Then the 12 members wrote their choices for the person to be recommended on another ballot.

Mr. Thurston won this ballot by

Cuts spur grumbling on Gannett papers

By STUART EMMRICH

New York—While Gannett Co. pushes toward the Sept. 15 introduction of *USA Today*, a national newspaper that will cost the company an estimated $20 million this year and $35 million the next, papers throughout the Gannett chain are being told to slice their operating costs and improve profit margins.

Hiring freezes have been imposed, staffs have been stretched thin, travel budgets have been cut, news holes have been reduced, raises are becoming scarcer and less generous and papers are being asked to cut corners any way they can, according to a number of Gannett staffers in New York, Indiana, New Jersey, Florida, Mississippi and Ohio.

"We are being asked to be lean and hungry again," an editor at a Gannett paper in New York recently told his staff.

Although Gannett staffers say they would be reluctant to state that their papers are being "bled" to provide financing for *USA Today*, the juxtaposition of the cutbacks throughout the chain and the very visible millions of dollars being pumped into the new national paper have caused substantial morale problems at Gannett.

"I'm not sure that some of these cuts aren't just coincidental—what with the economy the way it is—but the more cynical of us believe that the emphasis is on *USA Today* and the rest of us be damned," one Gannett staffer said.

Feeding that suspicion are the resources that are being diverted to *USA Today* at the expense of the chain's other papers. Of the about 220 editorial staffers who have joined the national newspaper, 75% have come from Gannett papers. And those papers' execs say they are being asked to "eat" those positions; the lost staffers cannot be replaced and the individual newspapers must continue to pay their salaries for up to six months, they complain.

The papers also are being asked to contribute a share of their newsprint to provide a supply for the new paper, a contribution that further is reducing a sometimes skimpy news hole, staffers say.

"If you look at any Gannett paper these days, there is not much of a news hole, but ours was small to begin with and getting smaller all the time," said an editor who just left an upstate New York paper.

"Our news hole just shrunk this spring and has stayed that way ever since," echoed a reporter on a Gannett paper in New Jersey, who worried that staffing and news hole cuts could lead to a loss of readers who might never be won back.

Gannett executives deny that reductions in operating costs at the chain's newspapers are related directly to *USA Today*, but say they are tied more closely to the economy and financial conditions at individual papers. They acknowledge, however, that the introduction of *USA Today* might have made those budget cuts a bit more urgent.

"The over-all financial strength of a company is important when you are starting up a new enterprise. Everyone is trying to maximize revenues and minimize expenses," a Gannett spokesman said. "Trying to cut expenses wherever possible is an ongoing process at Gannett that perhaps has been

Kellogg to try upscale yogurt line

By JANET NEIMAN

Kellogg Co. is about to shake up the yogurt industry once again with the introduction of what is being touted as the highest quality yogurt available.

Whitney's yogurt, now entering test markets in the Baltimore/Washington area, is a an upscale nine-item line of yogurt with real fruit in its own juice. The product will sell around 65¢ for a 6-oz. serving. The product and its name were internally developed by Kellogg, according to the company.

Area retailers see Whitney's potential for expanding the $371 million yogurt market.

One retailer noted that Whitney's "may not take the place of [No. 1-ranked] Dannon for people who really like the Dannon-type of bite. This is more like a custard. People who don't like yogurt normally will love this."

Buyers say they don't intend to eliminate any existing brands from their shelves to add Whitney's. The new line, one source noted, "isn't replacing anything, it's bringing in new users." He likens the entry to that of French-style yogurts, which debuted after the yogurt

Ad Age poll tallies active shoppers

Amid gloom, many hot prospects

By LEO J. SHAPIRO and DWIGHT BOHMBACH

Coming into the last half of 1982, our Advertising Age National Poll finds consumers generally wary about committing to major purchases. But they are far from panicky. Even though the per cent of those who feel secure enough to plan to buy new cars, housing, appliances, carpets, color tvs and other major goods in the year ahead is low, it's still within limits of the range we've seen these last three years.

The most positive news for business, easy to miss amid the general gloom, is that, sifting through the mass of consumers across the nation, very large numbers of prospects actively are shopping for major goods today. For example, during a typical month in the first half of 1982, as many as 6 million Americans actively shopped for new cars, read ads, compared models and prices or visited dealers. As many as 12 million actively shopped for other big-ticket items for their homes: Major appliances, color tvs, stereos, carpeting.

These "liveliest prospects"—the consumers who can turn the economy if they go ahead and buy—are not only different from the mass of Americans in terms of demographics; they also are different in how they view their own finances and the nation's economy.

Selling in a buyer's market

In gauging the direction of an economy where many consumers have resources but have mislaid their urgency to buy, it's prudent to focus on those consumers who are the hottest prospects. Consumers who plan to buy in the coming year can be separated into:

ACTIVE PROSPECTS: Already shopping; reading ads, comparing prices, features and models, visiting dealers.

PASSIVE PROSPECTS: Planning to buy in the coming year but not doing anything now.

What is significant about the figures on consumer purchase plans and shopping for new cars, housing, furniture and other major items in the accompanying chart is this: They indicate a potential market large enough to support explosive growth in the economy.

It should be emphasized that these data show only the degree of consumers' willingness to buy. They don't show sellers' ability or willingness to shape deals that will convert willing prospects to buyers. It takes "two to tango"—a prospect willing to buy and a seller with the right product and deal. These figures on consumer purchase plans and shopping activity are not estimates of future sales. In the last analysis, sales always depend on sellers.

Start with demographics

To see what sort of people are the hottest prospects, let's take the widely watched market for new cars as a case in point.

Demographics clearly can help locate the active car prospects.

It probably won't come as any great revelation to learn that consumers planning to buy a new car (whether active or passive planners) are differentiated from the general population on bases of occupation, income, age, sex and the demographic data. For example, planners are almost twice as likely to be professionals than the average consumers. Active planners include almost three times the national norm of people with income over $40,000. Also, people planning to buy a new car are likely to have children under the age of three; but, this same group of parents with young children is overrepresented among active planners and underrepresented among passive planners.

Focus on emotions

The key differences between passive and "hot" prospects are not only demographic but are also largely emotional. It's how consumers feel—about themselves and about the world—that separates passive from active new car prospects.

Let's look at how these active shoppers for new cars view themselves and the world in the midst of the current recession.

Active planners are more confident: Basically, active new car planners are full of optimism about both the national economy and their own financial outlook. They are much more likely to expect the economy to improve in the year ahead (53%) than are members of the general population (38%). And *active* planners are even more likely to be optimistic for the economy (57%).

As for their own finances, active planners are much more likely to expect more real income for saving or spending in the year ahead (50%) than are passive planners (36%) or Americans generally (28%). And why shouldn't "winners" be this optimistic? Half of the active planners (50%) say they're better off financially now than they were a year ago. Is it any wonder that these are the consumers most optimistic about their prospects in the year to come? Seven in 10 active planners expect to be better off in 1983, compared with only about four in 10 Americans on average. Success breeds dreams of more success.

Active planners worry less about inflation: People who are actively planning to buy a new car also take a different view of the nation's major problems from that of other Americans. Forty-one per cent of all Americans spontaneously name inflation as a "major national problem." Among those planning to buy a new car, only 36% are concerned about inflation; even fewer (33%) among the active planners. Advising new car prospects to "buy now while the prices are down," and offering "low, low interest," may tell these prime prospects about something that doesn't concern them a great deal unless they feel the car offered has the features they want. Otherwise, as Honda advertising advises, they can conclude that it "pays to wait."

Active planners are more ready to spend, borrow, buy: Even in today's recessionary economy, active planners are not only freer about planning for major purchases, but also freer in spending than either Americans generally or passive planners.

For example, while most Americans (51%) cut back on family spending for consumables in the first half of 1982, only 35% of active new car planners cut back. In terms of big-ticket expenditures, they also are more likely than most Americans to believe "now is a good time to make some major purchases" and more likely to have something specific in mind to buy at current prices.

Since they take a positive view of the future for both themselves and the nation's economy, it's not surprising to find that people actively planning to buy a new car are more than twice as ready to use their credit or borrow money for a major purchase as the average American; also they are much more inclined to borrow now than are passive planners. In the year ahead, one in three active planners (33%) expects to take on additional debt, a proportion almost twice as high as Americans generally (16%).

These optimistic, expansionistic active new car prospects not only have a new set of wheels in mind—they want a *lot* of the "good things of life," as they see it. Active new car planners also are more likely than Americans generally—even passive planners—to be planning and actively shopping for other big-ticket goods: A house, used car, furniture, major appliances, stereo, color tv, air travel and carpeting.

When you're a "winner," even in a recession, all things seem accessible and possible. Active new car prospects, for example, are more than twice as likely as consumers nationally to be shopping actively for a house, while the per cent of passive new car prospects actively shopping for a house is exactly at the national norm. But the reality is that the buying power of "actives" has limits. If they buy one item, they are not likely to buy another as well. So, in projecting sales, remember that active shoppers spend their money twice or three times in their imagination before actually committing to a purchase.

Looking ahead

America has massive unused production capacity; millions of trained workers eager to go to work again; a huge backlog of needs and buying power in households that have been holding back too long.

In spite of the economic gloom across the country during second quarter 1982, there are enough consumers actively rehearsing major purchases to spark enormous sales increases—not only for individual companies, but for the national economy.#

Consumers' willingness to buy

Item	Per cent who plan to buy	Per cent who are actively looking	People actively looking as a per cent of people who plan to buy
House	7.4%	4.9%	66%
New car	13.5%	6.6%	49%
Used car	16.4%	6.6%	40%
Furniture	16.2%	7.0%	43%
Major appliances	8.4%	3.6%	43%
Stereo/hi-fi	5.7%	2.8%	49%
Color tv	5.7%	2.3%	40%
Air travel	21.3%	10.5%	49%
New carpeting	9.7%	4.7%	48%

Six companies honored for marketing motivation

Union, N.J.—National Premium Sales Executives has selected six companies as winners of its Marketing Motivation Awards to be presented at the National Premium/Incentive Show in Chicago Oct. 11.

Castle & Cooke Foods, San Francisco; Hunt-Wesson Foods, Fullerton, Cal., and Union Trust Co. of Connecticut are the winners in the consumer promotion category. In the trade incentives category, the top awards go to Fram Corp., East Providence, R.I.; Fuller Brush Co., North Kansas City, Mo., and Home Box Office, New York. NPSE has given the awards, previously called the Incentive Showcase Awards, since 1962.

California agencies join to form Anderson/Miller

San Francisco—California Foods Communications, a foodservice advertising agency, and sales promotion agency Miller Communications have merged to form Anderson/Miller Communications. California Foods president Norm Anderson has been made president-chief executive officer of the new company, and Frederic S. Miller has been made exec vp and general manager.

Anderson/Miller Communications is located at the former California Foods offices at 846 California St., 94108.

Second-quarter poll results

Recession, unemployment cause greatest concern to consumers

Why are consumers in the second quarter of 1982 generally so wary about committing to major spending? Concern over the national economy, for one thing. Regardless of hopeful sounds emanating from high places, two in three Americans believe "things are getting worse for the nation." Six in ten don't expect the economy to get any better in the coming year. Four in ten expect it to get even worse.

Worry about employment also is making consumers wary. When we ask people to name the nation's major problems, nearly half (47%) now spontaneously mention "unemployment and recession." This is not academic: As the second quarter ended in June, more than one-third of the people we talked with nationally (38%) were expecting that they, or someone else in their family, would lose a job, be laid off or have hours, pay or commissions cut in the next few months. This is the highest level of individual concern about jobs we've seen since starting these national measurements seven years ago.

On the other hand, in spite of these worries, most Americans feel themselves in pretty fair financial shape personally. They also are encouraged by the fact that, by careful managing, they've kept their own financial balance so far, even in an increasingly shaky economy. Seven in ten have seen their financial balance improve (28%) or at least hold even (40%) in the past year. As they look ahead, eight in ten expect to be in better financial shape (44%) or at least as well off (36%) a year from now.

More than nine in ten Americans (92%) still expect to have as much income (43%) or even more (45%) next year. Only 8% expect to have less. And even though the annual inflation rate crept up again as the second quarter ended, the over-all easing of inflation has been a tonic for consumers. Four in ten (42%) now find themselves with money left over for saving at the end of the month. About three in ten (27%) expect to increase family savings in the year ahead.

Creating a buyer's market

As we contrast how Americans feel about their own finances in the second quarter of 1982 with how they felt in the same quarter last year, it's striking to see relatively little change in their confidence about managing their finances in the face of a troubled economy. The number of consumers who, in the second quarter of 1981, expected to maintain or improve their financial balance (85%) is roughly equal to the number (83%) feeling the same way in the second quarter of 1982.

Both in 1981 and 1982, when consumers think about the nation's problems, three in four spontaneously talked about economic troubles. The big difference is that in the past year, consumers have replaced fear of inflation with fear of recession and unemployment. Asked to name the major problems facing the nation, sharply fewer spontaneously name inflation in 1982 (35%) than in 1981 (52%) and sharply more spontaneously name recession/unemployment (46%) as a major problem in 1982 than in 1981 (20%).

Consumers exchanging fears of inflation for those of unemployment have been ruinous for retailers and manufacturers of major goods. Consumers' strategy for managing during inflation is to buy housing, cars and other major goods before prices and interest rates go higher and the buying opportunities are lost. Their strategy in time of recession is to "sit tight and don't stick your neck out." As a result, the great mass of consumers have been playing a "waiting game" on major purchases for the past year.

By now, most consumers seem to accept troubled economic times as a way of life. They're settling in to live with recession as comfortably as possible while deferring major purchases. Only 16% say they expect their total indebtedness to grow in the year ahead.#

Deep beliefs move anti-Satan groups

In a small town in the Southwest, an area of high plains, corn and cattle, the Fundamentalist Christian movement is as strong as the thousands of sunflowers waving in the hot dry breeze.

Some people in this community feel deeply enough about the alleged connection between Procter & Gamble's logo and Satan to print and distribute copies of a leaflet warning their neighbors not to buy P&G products. A young woman there, a member of a family that has engaged in this activity, defied the warnings of her elders to talk about her religious beliefs, Satan and Procter & Gamble.

She herself had been a member of a religious cult, which she now believes to be satanic, before she became a "good Christian." She said God spoke to her and told her to be interviewed. The reporter, not being a believer, presented an evangelistic opportunity.

"I don't know if Procter & Gamble is a satanic company, but I know their logo is satanic. That's no man in the moon, that's a ram's head," she said. The ram, these Christians believe, is one form Satan takes when he shows himself on earth. The stars in the logo have been connected with lines to show the "666" symbol, which is "the mark of the beast" according to their interpretation of a verse in the 13th chapter of the Book of Revelation.

"People who are into satanism use symbols to conjure up Satan as a living being," the young woman explained. "I've seen it done."

The main point for this articulate, bright-eyed young woman and others of her belief is, "You either work for one or the other." Or as she stressed later in the conversation, "There are two forces, that's it!" The forces, as she sees them, are God or Satan.

Some official of P&G, she believes, really did go on the "Merv Griffin Show" and tell of his deal with Satan. She didn't see it, but she knows someone, whose name she wouldn't reveal, who did. She feels a company like Amway, "a Christian company run on Christian principles" is more appropriate for her support.

But Procter & Gamble is not the only institution Christians are being directed to shun. Widely read books and newsletters available in Christian bookstores reveal a doctrine that warns believers to steer clear of any connection with the symbol "666."

The basis for this theme, according to a woman who operates a Christian bookstore in this southwestern town, lies in the belief that Jesus is coming back. Before this can happen, believers say, there will be a seven-year period of adversity, brought about by the Antichrist. In a melding of religious and secular philosophy, the doctrine is being communicated in this way: The Jews, because they did not accept Christ as the Messiah, will be deceived by Satan in the form of a person who will be heralded as the Messiah. This person eventually will become the leader of a unified world, and is referred to in some writings as "the World Dictator."

Basing their belief on a very literal interpretation of Revelation, the doctrine says the World Dictator will require people to carry the mark "666" either on their right hand or their forehead in order to buy food and other necessities. But Christians are told in the Bible not to accept the mark, or they cannot be saved, the believers feel.

A book "When Your Money Fails" by Mary Stewart Relfe, a best seller in the religious market, spells out the scenario. The book opens with the quotation from Revelation 13:18: "Let him that hath understanding count the number of the beast: For it is the number of a man; and his number is six hundred threescore and six."

A scenario for satanism?

"The poignant question facing us is how long will it be before we in the United States and the world must use his number "666" with which to buy and sell? . . .This is no gimmick! We are already using it," it says.

It advises that "all commerce will be conducted in the near future with a number, a name or an identifying mark in the hand or forehead," and that Christians "cannot take the mark."

This author and others like her contend that the "666" mark is already being used, in preparation for this time, by many companies, governments, etc. A few of the examples (there are 40 instances cited) include the World Bank code number; Australia's national bank code; the prefix to J.C. Penney Co. charge account numbers, and the overseas telephone operator number for Israel. The Universal Product Code is found to be extremely suspect by the author, who in her second book, "The New Money System," analyzes UPC bars so that believers may avoid any products that bear a "666."

"People who are into satanism spiritualize negatively almost everything in the world with which they don't agree," Rev. Jerry Falwell said in commenting on these ideas. "They are sincere, but very deceived."

Procter & Gamble and other companies who may find themselves in a similar situation will have a tough time persuading these Christians they are innocent of satanism. As the young lady in the Southwest said, "A company could put something [such as a logo] together and not know it is satanic. Satan could be working through them and they wouldn't necessarily know it. But I'll tell you one thing. What's happening to Procter & Gamble now was going to happen one way or the other because of that symbol."

P&G rumor campaign

(Continued from Page 1)

senior vp at Drexel Burnham Lambert and probably the country's foremost P&G watcher. In previous P&G administrations, such a "gutsy move" probably wouldn't have been made, Mr. Segalas said.

Whether the "gutsy move" was called for, and wisely executed, is another matter. Mr. Segalas said his retail contacts tell him the company has suffered no loss of sales due to the rumors. He also notes that he has received only one phone call on the satanism rumor, and that was before P&G took its battle public. "Generally," he said, "when P&G burps, I get phone calls."

P&G says the strategy was necessary, claiming that phone calls to the company's toll-free number (listed on all P&G products, usually near the moon-and-stars logo that is the genesis of the rumors) concerning the rumors reached 15,000 in June.

The company also claims the strategy is working, citing, primarily, a sharp falloff in calls in July, to about 6,000. Authorities on company rumors differ on whether a decline in phone calls is an accurate indication of a rumor's strength.

"The problem is that the phone calls are from 'friends.' " said Frederick Koenig, Tulane University professor of social psychology. "They're not a direct count of people who are hearing the rumor, but it's an indicator." Ralph Rosnow, Temple University psychology professor, said his "guess" is that P&G had handled the rumors "intelligently," but he doesn't put much stock in phone calls as a barometer. "The fact that phone calls aren't coming in doesn't mean a damn thing," he said.

Numerous grocery-trade sources interviewed by AA expressed doubt about P&G's strategy, saying they had detected no decline in sales of P&G products and that the rumor was so far-fetched it could have easily been ignored. "I don't think people are that naive," said the manager of an Alabama Piggly-Wiggly. "I don't think people with any intellect would believe it. There have been no returns at our stores."

"I think it's ridiculous," said a store manager in Mississippi, echoing what appeared to be a clear majority opinion. "If they'd keep quiet, it'd go away."

Analysts from SRI Research Center, Lincoln, Neb., which at AA's request conducted a telephone survey of a random sample of 1,264 Americans 18 or over, say their results indicate P&G indeed may have been better advised to avoid a national publicity campaign to counter the rumor, or, at most, to confine its public efforts to refute it to the South, where awareness of the rumor and belief in it—though slight—are clearly higher than they are in the rest of the country. Other companies afflicted with rumors typically have fought them on a regional basis.

In the poll, conducted from July 29 through Aug. 3, SRI found that 32% of all Americans are aware of the rumors versus 42% of people in the South who are aware of them. About 3% of all the respondents said they believed the rumors; 5% of those in the South believe them. Nationally, 21% said they weren't sure whether they believed the rumor, compared with 27% who felt that way in the South.

Of those who believe the rumor or said they aren't sure if they do, 17% said they were curtailing their purchases of P&G products. But only 5% of all those aware of the rumor—equal to only 1.6% of all the respondents—said they are buying fewer P&G products. (This was offset, moreover, by 1% who said they are buying *more* P&G products.) Some 94% of those aware of the rumor said it hasn't caused any change in their buying of P&G products.

In what is probably the most stunning finding of the survey, the vast majority of Americans don't know what P&G makes anyhow: 79% said they couldn't name a P&G product. Another 6% said they didn't think they ever buy any P&G products. In addition, a number of those who thought they could name a P&G product incorrectly named that of a competitor.

The surprising lack of awareness of just which products are P&G's suggests that people who do believe the rumor and would like to organize a P&G boycott would have an enormous task on their hands.

It also suggests that P&G's rumor-fighting approach, which emphasized the corporate name and identity and downplayed individual products, was a questionable one that was inconsistent with the company's longtime marketing strategy.

Though in recent years the P&G name has been more prominently associated with company products—"New from Procter & Gamble" often appears on new product packages, for example—"we're a company that believes in marketing individual brands," a spokesman said. "The company name and logo are downplayed."

Rumored symbolism

Connected to one another, the stars form the number 666, a symbol of the Antichrist. Curls in the "sorcerer's" beard also form 666 when the logo is held up to a mirror.

P&G's explanation

The man-in-the-moon was "a popular decorative fancy" adopted in an early version of the logo in 1859. The 13 stars represent the original United States colonies.

One of P&G's goals in its publicity campaign presumably was to tell people who might believe the rumors that the company vehemently denies them. But according to the SRI poll, P&G has been far more effective in getting its denials to people who already feel that P&G has nothing to deny. Of those who said they don't believe the rumor, 83% said they had read, seen or heard of the company's denials. But nearly half—46%—of the people who said they believe the rumors or aren't sure whether they believe them also said they weren't aware of any company denials.

While P&G seems primarily concerned with the satanism rumors, there is evidence that P&G might have some other pr brushfires to douse. In an early question in the poll, before interviewers brought up satanism, respondents were asked simply if they were aware "of anything about Procter & Gamble being involved in a controversial issue?" Of those who said yes, a surprisingly low 53% said it was satanism, devil worship or anything similar.

The 47% who were aware of *other* controversies most often mentioned the company's problems with its Rely tampons or labor disputes, particularly a strike at a P&G Kansas City plant. (In a development related to that strike, the 6.5 million-member International Chemical Workers' Federation said last week its worldwide boycott of P&G brands in support of the Kansas City strikers "is beginning to hurt" and called on affiliated unions in 68 countries to run newspaper ads supporting the boycott.)

P&G launched its public campaign on June 24, when it issued a press release in which religious leaders, including the Rev. Jerry Falwell and the Rev. Donald E. Wildmon, vocal critics last year of P&G's alleged sponsorship of undesirable tv programs, were quoted as refuting any P&G connection with satanism.

The rumors had started about two years earlier; the company previously had fought them with "backgrounders" mailed to newspapers on the West Coast, where the rumor had surfaced in Action Line-type columns, and by sending letters to 67 national religious leaders and, later, to 48,000 religious organizations, alerting them to the problem. P&G decided it had to go public, it says, after the number of phone calls soared in June.

The SRI poll found that people aware of the rumor were almost as likely to have become aware of it after June 24—the big campaign's kickoff date—as before: 43% said before and 46% said after. However, 50% of the people in the South who were aware of the rumor heard of it before June 24, compared with 34% in the Northeast and 33% in the central northern states.

Word of mouth has been a far more potent medium of the rumor in the South than elsewhere; there, 32% of those aware of the rumor heard it by word of mouth in church, more than learned of it either in newspapers or on tv. In all other parts of the country, newspapers were the primary source of awareness of the rumor.

Given the apparent impact of face-to-face communications on the rumor in the South, some observers suggest that P&G would have been wise to dispatch company representatives to specific rumor hotbeds to meet personally with community groups, as

McDonald's Corp. did with the worms-in-the-hamburgers rumor a few years back. P&G did none of this, a spokesman said.

Instead, P&G, as is its wont, decided to handle matters in its own way. The company chose to rely on the mass media. It did so by issuing press releases, first about the ministers' debunking of the rumors, and then by getting stories in certain newspapers.

The company called in reporters for the *Chicago Tribune* and the *New York Times*, both of which ran prominent stories on P&G's battle.

The company also vetoed the idea of running advertisements refuting the stories, as other rumor-plagued companies have done, usually in areas where the rumors were particularly hot. "The people who are asking questions would not put a whole lot of credibility in ads coming from us," a spokesman said. "That's why we've gone to a third party."

Asked if the company was pleased with the *Tribune* and *Times* stories, a spokeswoman said, "Yeah, we liked them." The company added that it has received "pages and pages" of press coverage, as well as substantial network tv coverage.

A company pr executive appeared on "Good Morning America" after the media storm broke, but P&G hasn't gone on the Phil Donahue show yet, because that's where most of the rumors say a P&G "owner" or executive first came out of the closet with the company's supposed support of satanic cults.

By not going on "Donahue" a spokeswoman explained, "We could still say no P&G official has ever appeared" on the show. Company salesman have been passing out letters, mostly to store managers, in which "Donahue" producer Multimedia confirms that nobody from P&G has appeared on the show.

P&G occasionally touched base with McDonald's on handling its problem, but for the most part it eschewed the use of any of the outside authorities frequently summoned by other companies. (The company has hired private investigators in various cities to track down rumor spreaders.) Neither Tulane's Mr. Koenig nor Temple's Mr. Rosnow, perhaps the foremost independent authorities on company rumors, were consulted by P&G.

The filing of lawsuits accompanied by heavy publicity is another P&G innovation. Most observers assume that the company is using the suits as a combination pr ploy and scare tactic. Pressing the suits, it's suggested, would merely keep the rumors alive and possibly stir up potentially embarrassing publicity for the company. One of the defendants sued by P&G, for example, has said that he will demand the company prove in court that it does not worship the devil.

P&G claims to be serious about the litigation. "We're interested in stopping these people, and we're hoping that by taking legal action it will make people stop and think before passing the rumor on," a spokeswoman said. "We intend to pursue those [lawsuits] to the end." She added that the company is "still investigating leads" for possible additional suits.#

Why religious leaders aided P&G

If the events of the past six weeks are any indication, the maxim about strange bedfellows holds true for religion and business as well as politics.

That the Reverends Jerry Falwell and Donald Wildmon came to the side of Procter & Gamble to battle the rumors of its link with devil worship is an ironic chapter in the saga of their crusade to purge tv of sex and violence.

It was only a year ago that Rev. Falwell, leader of the Moral Majority, and Rev. Wildmon, exec director of the National Federation for Decency, were waging war on major advertisers and threatening to boycott their products. More recently their efforts have focused on combatting sex, violence and profanity and on promoting Christian values.

Revs. Falwell and Wildmon, who called for a stop to the spread of the rumors in P&G's June 24 kick-off press release, independently contacted the company to offer their assistance, P&G said.

In a March 30 letter to chairman Owen Butler, Mr. Wildmon offered his services in halting the spread of the rumor and enclosed a copy of a notice he had run in the *NFD Informer* headlined, "Procter & Gamble Rumor Not True." The letter was unsolicited, P&G said.

Mr. Falwell discussed the problem with Mr. Butler personally last April when the P&G chairman spoke to students at the Lynchburg, Va.-based Liberty Baptist College. Mr. Falwell is affiliated with the college; Mr. Butler hails from Lynchburg.

Aware of their interest and support, P&G later contacted the two ministers and several other religious leaders and asked for the statements it was to use in its press release.

According to P&G, there is no relationship between the cooperation of Revs. Falwell and Wildmon and a speech given by Mr. Butler in June, 1981, in which he reiterated P&G's commitment to cleaner programing—a cause which the two religious leaders espouse vehemently. That speech is widely credited with getting the company—and to some extent the industry—off the hook as far as a boycott was concerned.

"I don't see any connection," a spokeswoman said. "This [Mr. Butler's speech] was last year, before the satanism thing became such an issue." Although the rumor was around at the time of the June, 1981, speech it was not a significant problem, she said. She noted that a relationship existed to the extent that contact had already been established between the company and the two ministers.

According to P&G, the church representatives received no monetary compensation for their help. Rev. Falwell has held press conferences and discussed the rumor on radio and tv and at pastoral conferences; Rev. Wildmon's letter has been circulated widely by the P&G sales force.

■ Frederick Koenig, professor of social psychology at Tulane University, New Orleans, who is writing a book called "Rumor in the Marketplace," had another insight. "I suspect a minor reason [for their help] is P&G has been more than cooperative about sex and violence in tv," he said. "This makes people like Falwell regard them [P&G] as decent people."

Mr. Koenig also suggested that Revs. Falwell and Wildmon "don't need this satanism thing. They don't want to be associated with this lunatic fringe."

Ralph Rosnow, a psychology professor at Temple University, Philadelphia, and author of "Rumor and Gossip," commended P&G for enlisting the aid of the religious leaders. "I think it was a good idea," he said. They have credibility. They're not associated with the company."#

Ideal Publishing seeking a buyer

By STUART J. ELLIOTT

NEW YORK—Operating under federal bankruptcy court protection since September, Ideal Publishing Corp. hopes it soon can arrange to repay its creditors by being acquired by another publishing company.

If current negotiations are successful, said Ideal's attorney, James Beldner of Siegel Sommers & Schwartz, Ideal would become a subsidiary of the other publishing company after it obtained the funds needed to settle with its creditors. Mr. Beldner declined to identify the prospective buyer.

He estimated it would cost the other company between $700,000 and $750,000 to fund Ideal's settlement with creditors, which include World Color Press, Goshen Litho, Kimberly-Clark Corp. and Boise Cascade-Canada.

■ When Ideal filed for reorganization last Sept. 28 under Chapter 11 of the Federal Bankruptcy Act, it listed $950,000 in assets and $1.9 million in debts owed to about 280 unsecured creditors. Chapter 11 enables a company to continue in business while it arranges a plan to repay its creditors.

Ideal published more than 24 monthly, every-other-monthly, quarterly and annual magazines, including *Country Music, Day Time Stars, Hair Styles, Intimate Stories, Personal Romance, Soap Opera* and *Teen Beat*.

At one time, Ideal was one of the largest publishers of romance, teen, fan and movie magazines. But it has not escaped the slump that has hit most books in these categories.

Shortly after going into Chapter 11, Ideal discontinued all but 11 publications, Mr. Beldner said, "to try to get rid of unprofitable situations." About seven or eight still were being published when operations were suspended with the magazines' August issues, Mr. Beldner said. If the other publishing company agrees to fund Ideal's creditor settlement, Mr. Beldner said, it would buy those titles, which include *Teen Beat* and some of the romance magazines.

Ideal and its parent company, International Enterprises, are owned by John Krach and Jeffrey Stein, each of whom has 50% of the stock.

Last May, one of Ideal's creditors, Colorscan Services, filed a motion to convert the Chapter 11 proceedings to Chapter 7, which would require Ideal's immediate liquidation. A hearing on the motion was scheduled for July 29, but was adjourned to Sept. 30.#

Foote tells of bizarre FCB birth

In an exclusive interview in this week's Advertising Age Magazine, Emerson A. Foote for the first time publicly discusses his colorful and controversial advertising career.

The 75-year-old adman—whose ad exploits were fictionalized in the popular book and movie of the late 1940s, "The Hucksters"—had a career that included time at the top with Lord & Thomas' Albert D. Lasker, the bizarre birth of Foote, Cone & Belding, its voluntary resignation of the then-huge American Tobacco account, Mr. Foote's own struggle against mental illness, his ouster from FCB and his eventual climb back to the executive suite at McCann-Erickson, alongside Marion Harper. See Page M-2.

Pillsbury tries soft ice cream

By JANET NEIMAN

Pillsbury Co. will attempt to broaden its stake in both the dessert market and frozen foods with a soft-serve dairy dessert, set to begin testing in September under the name Spooners Soft Serve.

The company has been researching the potential for the product for about two years (AA, June 14). Spooners, in vanilla, chocolate and strawberry flavors, will be sold in rectangular half-gallon cartons.

Test markets are said to be Erie, Pa., and Fort Wayne, Ind.

Soft-serve frozen desserts typically contain between 2½% and less than 10% butterfat, qualifying as ice milk; ice cream must contain at least 10% butterfat.

Spooners' primary ingredient is skim milk, and is considered mellorine (which substitutes vegetable fat for animal fat). The product has the nutritional value of ice cream. Pillsbury said it "approximates the texture of soft-serve" desserts sold primarily through foodservice outlets.

Though frozen desserts represent a new category for the Minneapolis company, Pillsbury is entrenched in both the frozen food (Green Giant, Totino's) and dessert (cake mixes, etc.) segments.

One food industry observer noted that the company's Burger King unit, which now offers no soft-serve items to compete with McDonald's cones and sundaes, "would be a natural outlet for them." So, he speculated, might the company's Poppin Fresh Pie Shops. A Pillsbury spokesman, however, insisted the consumer food and restaurant groups—and their respective products—are kept "very separate."

■ According to an executive of Taylor Freezer Co., a unit of Beatrice Foods that markets soft-serve equipment, many small foodservice stands that specialize in soft-

Yellow Pages, info service affected

AT&T pact revised

By ROBERT RAISSMAN and STUART EMMRICH

Federal Judge Harold H. Greene offered some good news to the newspaper industry and to local telephone companies last week. He said American Telephone & Telegraph should wait seven more years before starting any electronic information service and proposed that the $3 billion Yellow Pages business should remain with local phone companies.

The impact of this proposal on Yellow Pages advertisers and their agencies is at this time "hard to evaluate," according to James Mooney, chairman of the Yellow Pages committee of the American Assn. of Advertising Agencies. "We were looking forward to some standardization of procedure under AT&T," Mr. Mooney said. National advertising, which makes up $380 million of Yellow Pages total sales, would be affected more than local and regional advertising. Regulations in this area "have been getting a little loose," and could get looser, indicated Mr. Mooney, vp-director of corporate services at Al Paul Lefton Advertising, Philadelphia.

Under the current system, although AT&T has been prohibited from issuing directives to its subsidiary companies on how to handle national accounts, it could still make suggestions that most companies would follow, Mr. Mooney said. The seven Bell publishers of Yellow Pages handle about 86% of the national business, he said. If these companies now operate "with their own rules and regulations, I don't know what's going to happen."

The National Yellow Pages Service Assn., whose members include 146 publishers of telephone directories and 106 sellers of Yellow Pages advertising, is one vehicle for standardizaton of national advertising regulations. But the question is still open as to whether the Bell companies, which are not now members of this group, would join, Mr. Mooney said.

Judge Greene, in federal district court in Washington, accepted the framework of a proposed Justice Department-AT&T antitrust settlement insofar as it permits AT&T to spin off its 22 local telephone subsid-

FCB may be on way out; Saatchi in?

British Air reviews ad plans

By HOWARD SHARMAN and DENNIS CHASE

London—British Airways, faced with soaring losses of up to $500 million annually, last week canceled all ad placements in *Time* and is re-examining all of its advertising and marketing plans, probably including its relationship with Foote, Cone & Belding.

"This is highly unusual," said a source at *Time*. "Companies may switch agencies but they usually keep their advertising program intact, especially in the second half of the year, which is an important time."

The cancelation of advertising is adding to rumors flying that the troubled state-run airline is going to change ad agencies. Last week, sources at both FCB and Saatchi & Saatchi Compton refused to comment about reports that Saatchi had won the entire worldwide BA account, estimated at about $80 million total. If Saatchi did get the account, it would probably have to resign its $5 million British Caledonian and $1 million Air New Zealand accounts.

Late last week FCB officials had been told nothing about it. "Everything is being looked at, including advertising," said a BA spokesman. The airline has not officially called for presentations from other agencies, but London agency sources contend there have been several agency presentations.

Early this month the new chairman of BA, Sir John King, seemed to demote longtime advertising executive Gerry Draper (AA, Aug. 9), after a previous review of the ad program, including scrutiny of

No miracle in Small Miracle: Story behind Clairol failure

By NANCY GIGES

In the late 1970s, researchers at Bristol-Myers came up with what they believed to be a breakthrough in hair-conditioning products.

Like other conditioners, it left hair soft, shiny and manageable. But "Duco," as the product was code-named, also had a characteristic that seemed to make it unique: It could last through several shampoos, or would work just as well if it was used every day.

Company executives were thrilled. Bristol-Myers' successes with new consumer products were rare in recent years; moreover, the company's Clairol haircare line was slipping. With this one product, they thought, the company could break out of its new product slump, pump new life into Clairol and, with Condition II, its other conditioning product, eventually dominate the fast-growing conditioner market, which this year should reach $640 million in sales.

The final brand name chosen for the product aptly reflected its apparent characteristics as well as management's hopes: Small Miracle. It was launched with one of the heaviest advertising and promotion budgets in the category's history.

Today, Small Miracle languishes on store shelves without any ad support. New York-based Bristol-Myers will say nothing about its status except that,

Macro preparing end for famed 'Saturday Review'

By STUART EMMRICH

NEW YORK—Macro Communications, which over the last two years had charted ambitious growth plans for its stable of three magazines, now looks as though it might be getting out of the publishing business.

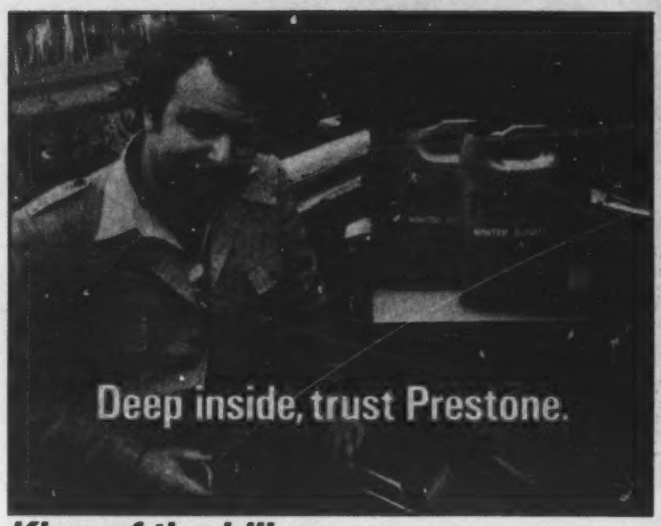
Saturday Review, the company's best-known publication, reportedly will announce its folding today. Staffers have been laid off in recent weeks; the last issue is more than a month late in reaching newsstands, and efforts to find a buyer apparently have come up empty.

Financial World, the company's money-maker, also is being shopped around, according to industry sources, with the asking price reportedly set between $4 million and $6 million. At least two publishers, including the Boston-based Goldhirsh Group, have been approached, but there have been no takers. Goldhirsh president Norman Raben confirmed that he had been contacted by the investment banker Veronis & Suhler about *Financial World*, but said Goldhirsh was not interested in acquiring the biweekly publication.

And *View*, the company's 2-year-old entry in the fast-growing cable industry field, was sold recently to its founder, Jonathan Banner, for a mostly cash deal that could have brought Macro as much as $400,000.

Robert Weingarten, Macro president, was on vacation last week and did not respond to phone calls about the company's future. Other executives at *Saturday Review* and *Financial World* also were either out of town or declined to discuss the financial status of the magazines. And Mr. Banner, publisher and new owner of *View*, declined to talk about the over-all financial state of Macro, a company that Mr. Weingarten acknowledged several months ago was experiencing some cash flow problems because of the losses at *SR* (AA, May 10).

A little over a year ago, Macro completed a $1 million-plus financing agreement with American Financial Corp. that Mr. Weingarten said would provide capital for expansion. But a Dun & Bradstreet analysis this spring called the company's financial condition "unbalanced."



King of the hill

One competitor in the antifreeze market estimates it would take between $10 million and $15 million to match Union Carbide's Prestone II in ad spending. That No. 1 brand's network tv campaign breaks in late August. Leo Burnett U.S.A., Chicago, is the agency.

A LEANER NORTON SIMON INC.

Mahoney hones game plan

By NANCY GIGES and PAT SLOAN

NEW YORK—As Norton Simon Inc. sets out to sell its U.S. truck leasing operations and its wine business, which produces San Martin wines and distributes a number of French and Italian wines, Wall Street analysts are speculating that the company is positioning itself either to go private or to become a takeover target.

Selling off such marginal businesses would help achieve either of those objectives: It would bring in more cash for continuing the company's purchases of its own stock and it would make the company more attractive to potential suitors.

Conceding that outsiders are not quite sure where the company is headed since no one has revealed long-term corporate objectives, the analysts share the belief that NSI chief David Mahoney's game plan calls for a leaner, smaller enterprise with more potential and fewer problems than the diversified marketer of consumer products and services now has.

The analysts note that Mr. Mahoney nowadays discusses his company in less grandiose terms than he did in his early years at the head of the conglomerate, when he proclaimed that NSI would direct its resources only toward markets offering substantial growth opportunities. When businesses turned sour, he immediately got rid of them. And when division heads fell short of growth goals, they departed.

In recent years, however, business declines were not limited to one or two subsidiaries that could easily be sold, and Mr. Mahoney has been described as becoming, by necessity, more committed to turning around ailing businesses for which he cannot find a ready buyer.

Meanwhile, analysts say, the company will continue its recent policy of using excess cash obtained

Antifreeze brands jockeying for No. 2

By BRADLEY JOHNSON

Union Carbide's Prestone II is the hottest-selling product in the auto antifreeze market, and its competitors are not even shooting for the top spot.

But the struggle for the No. 2 position now held by Dow Chemical's Dowgard may get warm this fall as several companies crank up their marketing efforts.

"There are two labels in the country—Prestone and price," said Jack Glidden, product manager for transportation chemicals at Texaco Chemical Co., a major coolant supplier to auto companies and for private labels.

Union Carbide plans to break major network tv ad support later this month for Prestone II, which the company says accounts for 81% of the coolant sold by mass merchandisers. (Aluminum-compatible Prestone II replaced Prestone in 1972).

Robert Mitchell, marketing manager for coolants at the New York-based company, said 85% of the product's ad budget will be used in the fall, with the greatest concentration in September and October. Commercials begin running on baseball and preseason football at the end of August and go through early December. The ad theme will be "Deep inside, trust Prestone." Leo Burnett

'News' ' future brighter

By STUART EMMRICH

NEW YORK—For the first time in more than nine months, the future of the *New York Daily News* looks as though it might be secure.

Although *Daily News* executives said late last week that they have yet to reach formal contract and wage concession agreements with three of the paper's 11 unions—the mailers, the pressmen and the drivers—they said enough progress had been made to make them highly optimistic about working out a suitable pact within the next few days.

"Things are very close," said *News* vp-advertising and marketing Art Wible, adding that while both sides have agreed verbally on the substantive parts of the negotiations, it would take several days to work out final details and to get them into writing.

"We've come this far—working through all hours of the night—that we want to get it all down in writing so that both sides agree they have agreed on the same things," Mr. Wible said.

If they have, then it will signal an end to nine months of an emo-

Good times—for some

By Don Veraska

Was 1981 a watershed year in the two-decade-old trend that has American drinking tastes turning from brown to white liquors?

There is some statistical evidence to suggest just that, and there are those in the industry who support the theory. But opinions are far from unanimous: Some take the opposite view; others suggest that any such projections are speculative. One industry executive asserts that any attempt to draw conclusions from less than a three-year period is sheer nonsense.

Don Veraska is a business writer based in Washington, D.C.

There's even some question about the statistics. Those of the industry association, the Distilled Spirits Council of the United States (DISCUS), differ in many instances from those of private companies in the business of providing figures and projections to the industry.

Nevertheless, some generalizations can be drawn.

As recently as 1960, whiskies —bourbons, blends, Scotch, Canadian and Irish—represented 74% of the U.S. market, while the whites—gin, vodka, rum and tequila—totaled only 19%. A decade later, browns were at 63% and whites were 27%, and by 1980 the figures were 45.6% and 39.3%.

But from 1980 to 1981, browns dropped only 0.5%, to 45.1%, while bourbon, Scotch, Canadian and Irish whiskies actually showed small increases in their share of the total market. In the same period, whites gained only slightly, from 39.3% to 39.8%, with gin down and vodka, rum and tequila showing only modest increases.

Those are DISCUS' figures. Numbers from *Impact*, a marketing publication in the wine and spirits industry, showed whiskies dropping from 45% to 44.5% from 1980 to 1981, while in the same period whites also dropped, from 39.5% to 39.4% of total market share.

According to *Impact*, gin, vodka and rum showed losses, with only tequila increasing its share of the market.

There appears to be solid agreement on only a few major points:

- The distilled spirit business in the past decade has become a no-growth industry, while wine and beer continue to gain.
- There are a number of individual brands within the industry whose fortunes are soaring.
- Blended whiskies, once the mainstay of the industry, have become and will continue to be a poor sister, with less than a third of the market share they enjoyed just two decades ago.

Emil Pavone, vp for public relations with National Distillers, New York, cautiously predicts a continued decline in blended whisky sales, a modest growth in bourbons and a leveling-off in white liquors within the next four or five years.

All in all, he said, the relative market shares of whites and browns should remain at essentially their present levels for the forseeable future.

But, Mr. Pavone warned, the science of predicting trends in the consumption of hard liquor is anything but exact.

"Somebody would have made a face at you not too many years ago if you'd suggested a drink of tequila," he said. "Now they are drinking it.

"Spirits have a way of waxing and waning. Tastes are closely related to fashions. There are just too many variables in the picture that can so easily alter things. For instance, the only reason we talk about brown vs. white, about white liquors encroaching on browns, is our utter surprise that something would come along and bite off a big chunk of the traditional market for whiskies, which people have been drinking in this country for hundreds of years."

In short, he said, "You just can't be sure why a product is doing well or poorly."

Equally cautious is William Kling, director of economic statistical research at DISCUS. "The production and marketing people in the industry have to make some projections," he said. "But it's a guessing game. Just look at the oil industry, the automobile industry. Some people can be very brave. But I have too much experience in seeing how people can fall on their faces—especially when you are dealing with human taste.

"I shudder at the idea of making projections. It's like trying to figure out whether women's skirts will get longer or shorter. You might as well connect it to sunspots."

Paul Farber, a senior execu-

BEST AVAILABLE COPY

tive vp of Schenley Industries and president of Schenley's marketing entity, believes that individual brands of distilled spirits, rather than the brown and white categories, should be the objects of consideration.

"Within those categories, things are happening," Mr. Farber says. "There are many contradictions and many anomalies, like the growth of higher-proof dark rums and the continued strength of Jack Daniel's. It's the worst of times and at the same time the best of times in the spirits industry."

This means, Mr. Farber said, that although the spirits industry is a no-growth industry, some individual brands—even within categories that show substantial losses—are doing well.

"But this is a low-technology industry," he said. "The cycles are long, and the reading of changes are subject to so many variations. Reading numbers on anything less than a three-year bracket just doesn't make any sense, in my opinion."

Marvin R. Shanken, editor and publisher of *Impact*, couldn't disagree more. Although *Impact* foresees only a 1.1% annual growth rate in the industry through 1990, its publisher said he sees continued growth of white liquors. And he defended his ability to make those projections.

"I disagree quite violently with industry executives who feel that there is not enough history or structure to the statistics in order to be able to make responsible projections," he said. "Within the framework of this industry, some fundamental changes are taking place, some of which have been in place for the last 30 years, and others for the last half-dozen years.

Mr. Shanken predicted that by 1990, whiskies will have dropped from 45% to 37% of the market, that white liquors will have increased from 39.5% to 44%, and that specialties—brandies, cordials and premixed drinks—will have increased from 15.5% to 19%.

Within the brown and white categories, he projected growth only for Canadian whisky, vodka, rum and tequila.

The white wine cocktail phenomenon, he said, was the primary reason for the recent slowdown in the growth of the vodka market.

There also appears to be little disagreement over the reasons for the growth in the white liquors. There is an increasing number of women drinking, and their tastes tend toward fruit juices, with which vodka and rum can be easily mixed. Although vodka has the same number of calories as brown liquors, it is perceived as a "lighter" liquor than bourbon or scotch, more or less complementing the general public trend toward low-calorie diet/health food products.

In addition, vodka, at least compared with bourbon and other brown liquors, is a relatively new product in the U.S. and is simply staking out its market share at the expense of brown liquors.

Advertising also has affected the market. Brands of white liquors, particularly vodka and rum, have been heavily advertised in recent years. Advertising not only tends to promote the growth of individual brands, Mr. Shanken said, but carries over into categories.

Thus, advertising for Smirnoff vodka helps Smirnoff sales, but it also gives a boost to vodka in general.

Mr. Pavone also noted that because white liquors are cheaper to distill than are browns—they do not have to be aged, thus they don't have high inventory costs—more money is available to promote and advertise them.

In addition, he said, public demand for a white liquor can be met almost immediately, while there is a lag of at least four years between the time whiskies are distilled and the time they can be bottled.

But perhaps the most important aspect of the ascendency of white liquors, Mr. Pavone said, is the combination of economics and fashion.

He recalled the observation Jack Musick, now retired, made when the latter was president of Hiram Walker Inc. some 10 or 12 years ago. When economics reinforce fashion, Mr. Musick said, you have a runaway success.

Vodka is cheaper than bourbon, making it more of an "in" drink. The result, Mr. Pavone suggested, is obvious. AA

Luisi flap resurfaces as ex-H&K exec sues JWT

By RICHARD L. GORDON and CHRISTY MARSHALL

WASHINGTON—JWT Group's hope that the Marie Luisi scandal would fade away was shattered last week by a stockholder suit seeking millions of dollars in damages.

The stockholder, seeking damages of nearly $10 million, is Robert K. Gray, a prominent Washington pr mogul who became an unwilling JWT stockholder in 1980 when Thompson acquired him along with Hill & Knowlton, the nation's largest pr agency. Mr. Gray, H&K vice-chairman and its longtime Washington office chief at the time of the takeover, received cash and 37,431 shares of Thompson stock for his 8% interest in H&K.

Mr. Gray's suit accuses Thompson of presenting a false picture of JWT's financial prospects to H&K stockholders during the merger talks, and of preventing Mr. Gray from selling his JWT stock last October. Five months later, revelations of $30 million in fictitious sales within Ms. Luisi's JWT Syndication unit surfaced.

If the suit goes to trial in U.S. district court here, it's likely that a parade of Thompson executives, and perhaps Ms. Luisi herself, would be subpoenaed to explain how much they knew, and when, about the fictitious time-bank sales allegedly recorded by Ms. Luisi's unit. Thompson executives, while continuing internal inquiries, have been striving to put the scandal behind them; Ms. Luisi, fired from JWT, her syndication unit dissolved, has never publicly told her version of what happened.

Attorneys for Mr. Gray declined to comment on their plans last week. JWT said only that it will "vigorously" defend itself in court.

Mr. Gray said JWT's decision this year to revise downward its past financial statements, subtracting the false sales, showed that Thompson's 1979 earnings—the benchmark for the H&K acquisition—"had been falsely overvalued by an amount not precisely ascertainable at this time, but at least 42%."

After the acquisition in 1980, JWT told its stockholders the deal cost $28,533,000, representing 602,628 shares of common stock worth $14,059,000 and $13,632,000 in cash. JWT confirms that this amounted to $68 per share for each share of Hill & Knowlton stock. One H&K insider said last week: "I have nothing to complain about. We got $68 a share for stock worth about $20. If the JWT stock was overvalued, that's still a nice premium."

JWT stock has taken a serious tumble since the Luisi revelations. When the news of the scandal

The thrill of it all

Sunday supplement color pages are breaking for the McDonald's/Atari nationwide scratch-card game promotion (AA, July 26). The drive, with food and videogame/home computer prizes, will run through mid-October. Atari will give McDonald's fast-food customers $3 and $10 cash rebates on its products. Tv and radio support, from Leo Burnett U.S.A.

last minute news

K mart reported moving part to Campbell-Ewald

TROY, MICH.—K mart executives declined comment on reports the retailer's corporate ad account is being switched from Ross Roy to Campbell-Ewald. The corporate portion is worth about $15 million; its loss would leave about $45 million in K mart spending at Ross Roy.

Paulson resigns as president of DDB/New York

NEW YORK—Paul Paulson has resigned as president of Doyle Dane Bernbach/New York, citing philosophical differences. Effective Sept. 15, Mr. Paulson's duties will be assumed by Neil Austrian, DDB chairman. Mr. Paulson said the parting is amicable and that there was a difference of opinion on some key issues. He said he is considering a number of options and expects to make a decision by January.

Viacom near Showtime deal

By SUSAN SPILLMAN

NEW YORK—Viacom, managing partner of the Showtime cable network, is believed to be preparing to announce its purchase of the pay tv network's other half from Westinghouse Broadcasting & Cable, for a reported $50 million.

Terrence Elkes, president of Viacom, and Jonathan Hayes, president of Westinghouse's Group W Satellite Communications, both refused to confirm that negotiations are under way or to comment on the report.

Westinghouse became half-owner of Showtime nearly two years ago through its $646 million acquisition of Teleprompter Corp. The acquisition immediately prompted speculation that either Westinghouse or Viacom would try to acquire the other's interest in the network.

"There has been substantial disagreement between Viacom and Westinghouse about the direction Showtime should take, and you can't run a network that must be aggressive with two different opinions," said Anthony Hoffman, vp and media analyst at A.G. Becker Inc. "Westinghouse has more money and the wrong direction and Viacom has the right direction and less money."

"Westinghouse recently met with securities analysts and implied that Showtime wasn't really their thing,"

B&B in Hardee's test

By RICHARD KREISMAN

Hardee's Food Systems will make a decision within 30 days on where to place its consolidated Hardee's/Burger Chef $70 million-advertising/promotion account, and in the interim is starting to convert Burger Chef units to the Hardee's banner in a St. Louis test.

The success of the conversion, which features a blended Hardee's-Burger Chef menu, is considered the crucial test of whether the chain will succeed in its attempt to become a solid third in the fast-food market behind McDonald's and Burger King.

Hardee's has asked Benton & Bowles, New York, its agency, to handle the St. Louis conversion-test advertising. The advertising will be on air by late September.

Ogilvy & Mather, Chicago, Burger Chef's agency, has made a pitch to top management for the account, said Ron Wertheim, Hardee's senior vp-marketing. B&B has not officially presented for the business and will not be asked to do so, he said. Of the total $70 mil-

Currency chaos stills marketers in Mexico

By STEPHEN DOWNER and CHRISTY MARSHALL

MEXICO CITY—The sudden, unexpected devaluation of the Mexican peso early this month, coupled with new currency and price controls, is throwing the Mexican advertising industry into a turmoil of uncertainty.

The chaos in Mexico is important to multinational agencies because it is the second-largest Latin American advertising market, behind Brazil, and many U.S. agencies depend on the usually consumption-oriented Mexican consumer to account for a large proportion of billings from that region.

The Mexican economy is so uncertain that neither advertisers nor agencies dare make any decisions yet, but both expect it is only a matter of time before advertisers begin pulling back.

"There will definitely be an impact," said Albert R. Koehl, president-chief executive officer of McCann-Erickson in Mexico. "Some clients are definitely going to have to cut back. Those who did not do so after the February devaluation will have to do so now."

Michael Ferrier, manager of McCann's North Latin America and Canada regions, says, "My office right now is besieged with clients as we try to sort out the problem."

In the U.S., international agency

Comparative ad for Noxell Corp.'s Noxzema skin cream and 12 Hour acne medicine uses medical research claims to proclaim the two products to be the best treatment for acne. Copy reads: "You don't have to dry out your skin to clear up your acne. Because scientific testing has finally proved it: Dry is a lie!" Ads place P&G's Ivory soap far behind the Noxzema treatment.

Noxzema goes comparative in effort targeted at teens

By CHUCK REECE

With a new comparative campaign it describes as "quite a bit larger than any previous advertising campaign for Noxzema," Noxell Corp. will pit its Noxzema skin cream and 12 Hour acne medicine products against Norcliff-Thayer's Oxy line and Procter & Gamble's Ivory soap, a product never advertised as an acne reliever.

Budget for the tv and print campaign was not disclosed.

With commercials set to break on tv Aug. 23, the campaign uses medical research findings to back its claim that the two Noxzema products, used in tandem, are the most effective treatment for acne.

Germinated by a 1980 *Journal of the American Medical Assn.* article that took issue with the classical acne treatment, overdrying of the skin, Noxzema's new ads say: "Noxzema wants to clear up a myth about acne. Because dry is a lie."

■ In the *JAMA* article, two Utah doctors and a registered nurse wrote, "We challenge the historical belief by physicians that acne. . .should be treated by purposeful irritation of the skin to produce erythema, peeling and dryness. The degree of surface dryness. . .in our study is the single variable significantly associated with failure to clear up acne lesions."

Baltimore-based Noxell said it commissioned a test of the effectiveness in acne treatment of 10% benzoyl peroxide, the active ingredient in Noxzema 12 Hour acne medicine, when used with Noxzema skin cream as the skin cleanser.

■ Tested against two other treatment regimens—one using Ivory soap and 12 Hour acne medicine, the other using Oxy-Wash as a cleanser and Oxy-10—the Noxzema program was said to be most effective 54% of the time by dermatologists who examined participants in the study. Oxy products were picked 36% of the time, the Ivory program 4%, the Noxell study claims.

Tv commercials will run on daytime network and syndicated shows, backed by network radio and spreads in October issues of teen magazines, plus *People* and the college edition of *Time*.

SSC&B, New York, is the agency for the two products, which last year received about $6.3 million in measured media support, according to Leading National Advertisers.

A spokesman for P&G declined to comment on the comparative campaign; Norcliff-Thayer officials could not be reached for comment.#

Hopes for final FTC bill now rest in Senate

WASHINGTON—The future of the Federal Trade Commission once again rests on down-to-the-wire legislative maneuvering, with the ad industry hoping that its Senate friends will be able to shape the final bill.

Legislation previously reported by the Senate commerce committee contains much of what the ad industry wants, including its cherished goal—an amendment rescinding existing FTC power to police "unfair" advertising. But the industry's Senate allies have yet to get their bill onto the Senate floor for debate, and last week the House energy and commerce committee reported an FTC bill which goes only partway toward ad industry objectives.

Assuming that the bills pass the Senate and the House in the few remaining days of the session after the Labor Day recess, the final version of FTC legislation will be hammered out in a conference committee of Senate and House negotiators. Ad industry strategists have been told by senior House Republicans that they can't expect more from the House bill and that their best shot is to make their case to the conference committee members.

Time becomes a factor because Congress needs to approve FTC legislation by Sept. 30, when the commission's current operating authority expires, or watch the agency shut down.

Ad industry lobbyist Charles Adams, Washington chief for the American Assn. of Advertising Agencies, said there is much he likes about the House bill: It writes into law standards that the FTC must use in determining when a practice is "unfair"; continues the congressional veto over FTC industrywide rules; requires the commission to show that a practice is "prevalent" in an industry before seeking to control it through industrywide trade regulations, and directs the courts to review FTC cease & desist orders when the commission seeks later to apply them to companies not originally involved in the case.

But the House bill does not ex-

Sony's tiny tv won't stuff many stockings

By ROBERT RAISSMAN

NEW YORK—The following Christmas fantasy may be dancing in the minds of some Walkman fanatics:

The morning arrives and the Walkman freak reaches under the tree, knowing full well what gift is waiting. With a staged look of surprise, this headphoned wonder immediately goes for the gift shaped like a small walkie-talkie. The wrapping paper is ripped off the gift to reveal the son of Walkman—the hand-held Sony tv, Watchman.

Unfortunately, this scene will not be repeated in many homes this year. Tiny tv sets, both the Sony Watchman and the Sinclair Microvision 2700, will not be on the market in significant quantity for the Christmas season.

In Sony's case, the success the Watchman is enjoying in Japan has led the company to concentrate its efforts in that market. Since its recent introduction on the Japanese market, the Watchman has been averaging sales of about 5,000 units per week, according to a Sony spokesman.

The Watchman was supposed to makes its debut in the U.S. in October, according to John A. Coghlan Jr., vp-national advertising at Sony. Mr. Coghlan said some units might be on the market by then, but the inventory would only be in major cities and would be limited.

"We won't do any advertising until we have reached significant inventory levels," Mr. Coghlan said. He added that initial ads for the Watchman would be print only. Agency is McCann-Erickson.

The Watchman's cathode-ray tube provides a recessed 2-in. square picture, and the entire set is 1¼ ins. thick. The secret to the set's slim design is the flat display picture tube, positioned below and parallel to the screen. Conventional tv picture tubes are positioned behind and perpendicular to the screen. The unit will sell for about $280.

Sony executives said an important sidelight to development of the Watchman will be that the

Most shops post a poor 2nd quarter

By CHRISTY MARSHALL

New York—The trickling down of advertisers' woes is showing up in agencies' bottom lines. The second quarter was not as good as advertising executives had hoped it would be, and in some cases was downright rotten.

In terms of net income, the Interpublic Group of Cos. was the big gainer in the second quarter of 1982, posting a net of $8.1 million, a 40.5% increase over the year-earlier tally. The next greatest gain was recorded by BBDO, up 12% for the quarter with net income of $3.7 million.

Grey, along with Doyle Dane Bernbach and Foote, Cone & Belding, reported flat quarters, with slight gains of 4%, 2% and 1.5%, respectively. Ogilvy & Mather slipped 7.5% to $4.4 million, while Mickelberry Corp. (a communications services company that specializes in ad agencies and printing) reported a drop of 31.2% in net income, attributed to high interest rates and the acquisition cost of Cunningham & Walsh last winter.

The big loser in net income was JWT Group, nose-diving from $2.4 million in 1981 to a net loss of $2.1 million in the second quarter of 1982. The loss was attributed in part to costs of closing down the JWT Syndication unit (AA, Aug. 9) and also to billing conflicts stemming from previously reported "accounting irregularities" in the unit. The agency also encountered high costs for its new office occupancy, operational problems, high taxes and interest rates and losses in its recruitment advertising unit.

As far as revenues in the second quarter, Mickelberry and its agency coterie that includes C&W, Nadler & Larimer and Laurence, Charles & Free, and its printing concern, Sandy-Alexander, reported an increase of 125.5%, skyrocketing to $19.5 million from $8.7 million the year before. Other substantial gains were posted by Grey and Interpublic, coming in with increases of 34% and 33%, respectively, over the year before.

BBDO, now reporting with Tracy-Locke/BBDO consolidated in its earnings, had revenues of $53.1 million in the quarter, up 19%. While no declines in revenue were reported, the smallest gain was shown by Foote, Cone & Belding, up 6.1% to $47 million. Commented FCB president Norman Brown: "The recovery from the recession is slower than expected."

Interpublic, coming off a $151 million new business spree for the

With Valassis you get the largest circulation available: Over 42 million beginning January, 1983!

Your cost per coupon redeemed is also the lowest of any four-color medium in the country!

That's because Valassis can offer you both high readership and redemption, combined with efficient delivery!

Now your four-color coupon and advertising message can appear in most of the top 200 markets in the country...chosen according to SMSA ranking, effective buying income, retail sales, and your recommendations!

That's:
- 55 new newspapers
- 38 new markets
- and many new **exclusive** markets!

Announcing The "New, Improved" Valassis Insert!

Because Valassis appears on Sunday, you're getting better readership, too!

With Valassis, more consumers spend more time reading your advertising message, and they take advantage of your promotion! One reason is because Sunday offers so many readership benefits:

- High readership. With 62% of women now in the job market, Sunday becomes the best day of the week to reach them.
- More readers. Sunday papers in the top 100 markets offer a broader audience segment, according to NAB figures.
- Longer readership. NAB studies show that people spend more time with the Sunday newspaper and they tend to keep it around the house for a longer period.
- Established readership. STARCH studies show that people actually look for free-standing inserts in Sunday's paper.

Valassis guarantees you'll never waste money buying markets that you don't need!

You can choose national or regional markets, or test in a single market. Join our Co-op program, or create your own Solo insert! And now, Valassis offers you a third IMPACT™ Program; the Co-op Coupon Page!™

videotech update/ BY MAURINE CHRISTOPHER

Next RAB task: Fending off cable inroads

Having "cleaned up" Miles David's contract, the Radio Advertising Bureau soon will be looking for a strong No. 2 man who is likely to be groomed as his successor.

The 57-year-old Mr. David managed to retain the top spot at RAB despite a well-mounted challenge from a few critics on the 35-man board. Even though the dissidents wanted what one described as "a more aggressive, charismatic" chief to give the bureau higher visibility, the incumbent has been signed to a shorter pact to run through the fall of 1986. The new, firm four-year contract replaces one that would have expired in '88.

The old contract called for a multiyear settlement in case of dismissal. The new one, negotiated by a compensation committee headed by RAB board chairman George Duncan of Metromedia Radio, Secaucus, N. J., gives the vice-chairman and chief executive officer "additional security" in his pension. He will be paid $140,000 annually.

Still to be determined is the blueprint to be charted for the bureau's future as relates to organization, aims and staff. The long-range planning committee, chaired by Arthur Carlson of Susquehanna Broadcasting, York, Pa., is due to meet in September to discuss recommendations for structure and strategy for the next five years.

The committee probably will recommend the creation of two divisions, one for local and the other for national sales, each with its own president. Naming a president for each would give them greater stature than if they merely were called vp-in-charge-of, for example. Once there, in the natural course of affairs, one of the presidents will emerge as the No. 2 exec at this $5 million drum-beating organization. Having two people, rather than one, waiting in line for the top post should make life more comfortable for Mr. David.

Mr. David has not been backed up by an in-house heir apparent since exec vp Bob Alter defected to cable last year. He is president of RAB's counterpart, Cabletelevision Advertising Bureau.

Now that the dispute over Mr. David's own future has been settled, Mr. Duncan said the board, at its October meeting, will move on to the next step—an analysis of what changes, if any, should be made to respond to catv, and other new technology competitors, who are vying for radio's sponsors and audiences. Emphasis will be placed on how best to strengthen the management by adding new people.

Mr. Duncan leans toward hiring an outside consultant who can take a dispassionate view. This, he feels, would enable RAB to avoid the kind of embarrassment that NAB's search committee suffered when seeking out a presidential candidate. The committee's choice later was rejected by the full board. But the RAB chairman is by no means certain board members, whose companies must pay their own expenses to run RAB, will vote to spend $100,000 to $200,000 for an outside search.

One of Mr. David's most vocal critics, who reportedly voted in favor of his new contract because he knew it had the numbers to pass without his support, opposes hiring a consultant to help in finding RAB's No. 2 and No. 3 persons. "Look at all the talent on this board," said this member. "Why do we need to spend money for outside advice when we have all our directors available to address this problem?"

And while he faulted the NAB board for turning down its search committee's recommendations after the searchers had spent three months scouting out prospects, this board member said the same thing could happen to an RAB candidate chosen by an outside, paid consultant. Others directors checked agreed the board should be able to locate people to fill the additional posts at RAB without outside assistance.

Still another board member I checked with figured Mr. David came out of this squabble in a better position than he went in. Mr. David felt the same way about RAB. "It's very healthy to have the dissidents speak up about what they think should be done," he told me. "Unless an organization is moribund, there will always be dissidents. They are sincere people with their own ideas about the best way to shape RAB for the future."

I asked what changes he plans in order to respond to the criticism that RAB needs a fresher, more vigorous, less predictable approach. Mr. David said this will be clearer once the long-range planning committee has completed its report. He noted that study was in the works long before the "public family feuding" over his contract.

Mr. David said he received several reassuring calls from major advertisers and agencies after I wrote an earlier column about the board dissidents. He thinks RAB already does a creditable job of helping sponsors to make effective use of radio, but he hopes to improve that aspect of the bureau's work.

For the moment, he's probably out ordering a batch of Friday, the 13th, T-shirts. The cnetime trade press editor signed his first contract as RAB president on Friday, Aug. 13, 1965. He celebrated his 17th anniversary on Friday, Aug. 13, just past, with a handshake agreement to seal his latest four-year pact.#

Vp banks on electronic future

Los Angeles—Don't look for it around the corner, but the Who concert of tomorrow, or Neil Diamond in person, may take the form of 3-D, 20-ft. holographic projections above the stage for the audience to see in perfect detail.

That's one glimpse Henry E. Koehn of Security Pacific Bank here has of the future. Mr. Koehn makes it his business to crystal-ball gaze: The bank vp is director of Security Pacific's Futures Research division.

Mr. Koehn's research tells him that movies and special events are likely to be transmitted into home and community facilities simultaneously. These images, he believes, will be shown in multiple angles on multiple screens.

"The lasarium of today," he said in a recent speech, "is the concert hall of the late '80s."

He also believes that live events and concerts will be videotaped immediately and the cassettes sold at the door. The audience will be offered the cassettes on the way out "as take-home albums."

In one of his more elaborate visions, Mr. Koehn sees the entertainment superstar of the late '80s being "an electronic fabrication." He's suggesting that this "superstar" will be nothing more than a "computerized creation," a simulation designed to "fit the styles, attitude and fads of the moment."

The real star, according to the bank executive, will be an engineer, who is really an "artist," projecting a 3-D image upon the stage from a remote location.

Is this laser-beam, holographic vision too far out? "Not really," assures Mr. Koehn. He reminds that a laser beam already has appeared as Tinker Bell in the recent Broadway stage production of "Peter Pan." He also calls attention to the "excitement" of the computer images in the Disney movie "TRON."

If electronic, computerized Tinker Bells and "TRONs" work today, why not, he wonders, tomorrow have "unreal, rather than real, performers who glide above the stage while singing in the vibrant manner of an electronic synthesizer?"

In still another vision of the future, this one a close resemblance to the plot of "Rollerball," the 1975 United Artists/Norman Jewison theatrical feature, Mr. Koehn sees the coming of new sports. Specifically, he envisions crowds using hand-held controllers to select team plays by popular votes (in "Rollerball," which takes place in the 21st Century, a violent sport is used to release the antisocial feelings of the masses).

"Audiences will demand ever more exotic forms of entertainment," he predicts. Auditorium managers, for example, will need to constantly be aware of new technologies and know how to deal and manage crowd stimulation.

Among other near-future advances, Mr. Koehn forecasts fiber optics used almost exclusively in cable; digital sound continuing to affect all sound transmission, and receiving equipment and giant "plasma display" auditorium screens providing clearer images than are now available (and because they are thin and flat, they'll be easy to place anywhere in a facility).

He's figuring on a big future for video conferencing. National conventions, as early as the middle of this decade, he says, will be divided among multiple images, with workshops, presentations and tours all beamed via the electronic conferencing technique.

In a capsule, what he thinks has happened, is that "we have survived the period of transition and are a very different society—a diverse, multi-ethnic, multilife-style, hi-tech society searching out the path to our future."#

Laser targets outdoor

Philadelphia—For the past 12 years, about five companies have been involved in providing laser light shows to the entertainment industry. Now one of those companies is taking the technology into advertising.

American Laser Promotions Ltd. is trying to sell its laser outdoor board concept to advertisers. Daniel Arbess, director of sales at American Laser, said he expected to have a laser showing in place in the Northeast for a major advertiser within the next three months.

The ad messages would be stored in a computer that would be set up at a specific site. From there, they could be recalled and shown on anything from the side of a building to a regular outdoor board to a cloud. Mr. Arbess said the company will use a time-sharing arrangement to enable a variety of companies to place ads at the same site.

Using lasers, the company can construct animated or stationary figures, along with text, to create an ad, according to Mr. Arbess.

Mr. Arbess declined to say how much a laser board would cost. However, he said the cost would depend on the location of the ad and the amount of time needed to produce the effect.

"Everyone in the laser business has the potential to create laser [outdoor boards]," Mr. Arbess said. "No one has made a substantial commitment because many of the laser companies are too small to have the marketing resources."

American Laser purchased Montreal-based MassLaser in 1981. MassLaser had created a mobile laser unit—laser shows transported in a bus—in 1979. Mr. Arbess said American Laser intends not only to offer the laser outdoor board concept to advertisers, but also use of the mobile unit for promotions and product introductions.#

More satanic numbers

(Continued from Page 24)

sumer habits.

There is, however, the possibility that a competitive marketplace will provide an incentive to design more safety into products. While the power mower industry was deploying legal and political forces to fight the "deadman's" switch, a Memphis barber, musician and inventor named Buford Whitman developed a nylon replacement lawn mower blade that deals directly with the hazard of chopped-off toes. A lengthy account in the business section of the *Washington Post* says he can sell it profitably for $25.

Spokesmen for the power mower industry say there is a difference between developing a safer power mower and actually ending up with a product that works effectively. Having poormouthed Mr. Whitman, however, they admit there are no signs that their companies have made notable progress toward safer power mower design.

Cynicus nodded knowingly when he read about Mr. Whitman's invention. "Whitman may not have the answer," he says, "but industries which forget that improving your product is more important than fighting with the government play the devil's game. Look what Toyota was able to do while General Motors was squandering its energies and resources in squabbles over who should be doing what about auto safety."#

vidbits

Zenith Radio Corp., Glenview, Ill., has signed a long-term agreement with Rogers Cablesystems for addressable cable tv decoders to be used in Rogers' Canadian pay tv operations. Rogers stated it will purchase an initial $12 million worth of the decoder equipment. The Toronto-based Rogers will launch its pay tv service next February.

* * *

Cable Health Network has signed news personality Joseph Benti to anchor its daily "Cable Health World Report" and "Cable Health Week in Review." Mr. Benti's credits include KNXT-TV, Los Angeles, anchor stints with "CBS Morning News" and KABC News, Los Angeles.

* * *

Procter & Gamble will sponsor a multipart NBC-TV miniseries, "A.D.," and also co-produce with International Film Productions. Production is set for early next year for the 1984-85 prime time season. "A.D." will dramatize the conflict between the early Christians and the Roman Empire.

* * *

Avis' first buy on USA Cable Network calls for spots in various sports packages and in the "Sports Look" anthology.

* * *

Kawasaki Motors Corp., U.S.A. has made a cash buy of the 10-second ID that the Drake-Chenault Enterprises radio production company reserved for itself in each one of the 52 "History of Country Music" special programs it has produced. Agency is J. Walter Thompson USA, Los Angeles.

Poor quarter

(Continued from Page 30)

first six months of '82, outpaced its competition in net income with a 62% increase for the half over the year before. Its $10.8 million net reflects an increase in operating profit, the acquisition of SSC&B:Lintas and the switchover to the accounting system that permits companies to reduce a portion of losses suffered as a result of currency exchange rates.

A significant gain of 20% was recorded by Mickelberry, but the other agencies—with the exception of JWT—were basically flat. JWT plummeted to a net loss of $2.2 million from a net income of $2.7 million in 1981.

Active on the acquisition circuit, Mickelberry's revenues were up 86% for the first half of '82 to $29.9 million. Augmented by three newly acquired foreign agencies, Grey's revenues climbed to $68.7 million, a 30% increase over the same six months of 1981. Those results include three foreign agencies that were not a part of Grey in 1981. The most modest gain was posted by Foote, Cone & Belding, up 6.2%.#

THIS DEPARTMENT IS A READER'S FORUM. LETTERS ARE WELCOME

Expenditure figures need comparison

To the Editor: I was most interested to read Sid Bernstein's column in the issue of June 21 about advertising spent in European countries.

Seymour Banks has, I believe, pulled the wool over your eyes, because the figures he gave you as having been gathered by himself from various sources are, in fact, exactly to the second decimal place the figures which appeared in Starch INRA Hooper's "World Advertising Expenditure" book (1980 edition).

In fact, if you look at the make-up of these figures a little more closely, you will realize that they are not truly comparable, as stated by Mr. Banks. Ad expenditure as a per cent of GNP relates to all forms of advertising in some countries whereas other countries only report expenditure in the mass media. Therefore, before one issues such figures, they should be compared on a common basis. This is something I always do by using just the figures for newspapers, magazines/consumer and technical/outdoor/transit, cinema, radio and television.

Attached is a chart (above, right) based on figures from the Starch INRA Hooper/IAA reports for 1979 and 1980. This shows advertising expenditure in mass media as a per cent of GNP.

Very little change in the pecking order, but U.K. and Norway certainly gained in 1980 over 1979.

Unfortunately, with statistics of this kind they are always historical by the time one gets them. We are a long way from push-button instant figures for what is happening today.

M. J. Hook,
Managing director, Ogilvy & Mather International Media, London.

Advertising Age welcomes letters to the editor, but we ask that they be held to 400 words. The editors reserve the right to edit letters.

Countries' definitions of advertising vary

To the Editor: In catching up with my copies of Advertising Age after two months teaching at the Keio University graduate school of business, I ran into Sid Bernstein's column on variation in advertising expenditures country by country (AA, June 21). Along with Seymour Banks, Gordon Miracle and many others, I have been interested in the reasons for variations in advertising expenditures, creative approaches, media strategy, research methodology and various other fascinating national characteristics. One of the problems which Seymour has, along with Starch INRA and the International Advertising Assn., is trying to get countries to agree on just what they will include under the advertising rubric. Some of them will include gray areas like sales promotion expenditures, public relations and many others, while some of the other countries are not so generous in their accounting consideration. Perhaps all of us internationalists can at least get together again at the next American Academy of Advertising meeting, if not earlier.

S. Watson Dunn,
Professor of marketing, University of Missouri-Columbia.

Preference for 'Ms.' is considered quaint

To the Editor: A. Jean Lesher does not speak for New York women or their grandchildren either in her long letter to Ad Age (July 9) suggesting that Mr. Bernstein's attitude toward the term "Ms." is 19th Century.

Actually, it is Lesher's preferred form of address that is passe. Regardless of its adoption by organizations that sell training courses, most of the young career women here find it quaint.

Jo Foxworth,
New York.

Sunday a convenient time for car buying

To the Editor: Relevant to Sid Bernstein's column of July 19 questioning the lack of door-to-door marketing by car dealers, I've always marveled why dealerships aren't open on Sundays.

At least in New York (Westchester County) they're not, and to me it is the most logical day to be open. Car buying is usually a family decision, and midweek and evening hours are totally inconvenient.

Yet in my area when I wanted to go shopping for a new car, the dealerships were closed the one day most suitable for my availability.

But then again, I'm never amazed at car dealer acumen.

The few times I went shopping for a new car, I knew more about the models than the salesman who was serving me. I did his homework.

No wonder the industry is in such a sad state.

Steve Davis,
Davis Public Relations, New York.

Editor's note: Auto dealers are open on Sunday in many areas; in others, local ordinances prevent Sunday openings. Dealers in Illinois have just succeeded in securing passage of a law preventing Sunday car dealer openings, claiming such openings are expensive and nonproductive.

Stereotyping in-house agencies is prejudicial

To the Editor: Leonard Matthews' comments ("Accounts continue move outside," AA, Aug. 9), were totally biased in his interpretation of the people who comprise the staff of an in-house agency.

Stereotyping an in-house agency as either, "young folks getting experience so they can move on to a bona fide agency, or those who have been in the bona fide agency world and were flushed out somewhere along the way," is exactly the type of advertising we can do without—untrue.

Perhaps he is unable to see past his agency steps, for people in an in-house agency are also "concerned with the whole marketing process."

Perhaps, they are more versed with product knowledge and marketing strategies because of everyday working familiarity. Did it ever occur to Mr. Matthews that the "bona fide agency" may not be the Utopia of the advertising world?

In order for the advertising world to prosper in the future, we must stop prejudiced thoughts. It can only hurt our future careers as advertising professionals, whether it be in an agency or in-house situation.

William D. Field,
Advertising services manager, Dresser Industries, Stratford, Conn.

Time to move toward a meaningful forum

To the Editor: Contrary to what your advertising pieces tell when it is time to renew my subscription, Ad Age did not come on Monday "to put me right back into Monday...", nor did it arrive on time for me to enjoy it over a warm cup of coffee.

Nevertheless, when it did finally arrive, on Tuesday, late, I duly turned the pages to my favorite column, The Voice of the Advertiser.

Then it hit me.

For the last ten years we've been reading one long-running series of letters carrying essentially the same message about the misuse of the female form in out-of-context ads.

We've had our fun, for sure. Humorous letters from female colleagues, a guessing game when letters are signed with initials or androgynous names, worried AE's explaining why, etc.

Now it all seems so repetitive. Why not give a little less space to these letters, and a bit more to more substantial comments from the field, such as legislative implications of a given campaign, political input, media bias, a forum to expose the enemies of our profession, etc.?

Let's make it a true voice of the advertiser.

For those who cannot do without the ads they can do without, let's make another "Crain Book." If they want these letters so badly, let them pay for them, not the rest of us.

U.S. creativity still best seller: Coke's Keough

By NANCY GIGES

New York—Coca-Cola president Donald Keough, before an audience of over 650 advertising/marketing people from 45 foreign countries, voiced a ringing proclamation that American creativity still leads the world.

Addressing himself to the critics of American advertising, the soft-drink executive defended it against those who malign it and claim that U.S. creativity has lost its lead. If any fault exists with the American creative process, he said, it is with those ad agencies that have sought to save a few dollars by cutting their creative staffs.

Delivering a keynote address at the opening of the 25th Advertising Age Creative Workshop here, Mr. Keough paid tribute to those generations of creative people who, he suggested, have been key to the success of Coca-Cola and other brands like it, especially those that are sold purely for human enjoyment.

"Please accept the simple, straightforward premise that advertising—creativity implied—exists for one reason: To sell, to sell goods and services," Mr. Keough said. "I'd say unequivocally that American creativity is 'selling' harder and more effectively than ever before." Of the 145 countries in which Coca-Cola is now being sold, he said, "I do not know a single one which offers for sale the almost inconceivable variety of products and services that we offer consumers in these United States."

While advertising in other countries may be appropriate there, he asserted that the American creative product is the world's most advanced because "we've been at it longer and we've escaped the adolescent notion at long last of creativity for the sake of creativity."

Other Creative Workshop coverage on Pages 6, 14, 48 and 54.

He described advertising in Japan as "selling without really selling," in keeping with that country's cultural tradition. The principal job of advertising in Japan is to get attention by whatever film and graphic techniques are available and thereafter to entertain and enthrall, he said. While Coca-Cola copy in Japan talks about kindness and friendship and the "gentle refreshment of the morning's dew falling from sweet green leaves to the thirsty earth," that's not exactly the Coca-Cola copy we are buying these days for presentation to the American consumer, he noted.

Mr. Keough suggested that anyone who sets out to make comparisons between the crea-

Apple prepares battle plans

New York—Faced with increasing competition in the personal computer industry it pioneered, Apple Computer plans to step up its ad spending and probably will begin to advertise on tv throughout the year, Frederick M. Hoar, vp-communications, told AA Creative Workshop attendees.

Mr. Hoar, whose responsibilities at Apple include advertising, indicated that Apple will spend $24 million to $30 million on advertising in the fiscal year ending next month, or 4% to 5% of the company's projected sales this year of about $600 million.

Apple intends to remain the industry leader despite the entry of large computer companies—most notably IBM—into the personal computer field, Mr. Hoar said. But he acknowledged that that will require spending more money on marketing and advertising. (*See story on ad plans for Timex's new low-price computer on Page 3.*) He declined to project actual spending in the next few years, but said it will remain at 4% to 5% of sales even though sales are expected to reach $1 billion "not too far down the road." In 1977, its first year, the California-based company had about $700,000 in sales.

Apple will break a new campaign "in about a month" that will stress the variety of uses for Apple computers, Mr. Hoar said. He said a recent print ad that merely listed 1,100 Apple-compatible computer programs was very successful.

Though he said he couldn't predict the company's media mix in future campaigns, Mr. Hoar indicated that tv will be used more heavily. "Typically, we've been fallow in broadcast" for three-quarters of the year, he said, referring to the company's practice of

last minute news

DDB joins Volkswagen in moving to Detroit area

Detroit—Doyle Dane Bernbach will join client Volkswagen in moving to the Detroit area. DDB will open a full-service office in Troy, Mich., to serve the VW division, which will shift from Englewood Cliffs, N.J., next March. The DDB office, expected to open about the same time, will be headed by Robert Rees as president. He is currently exec vp of the agency in its New York office. Volkswagen of America, the parent, also has headquarters in Troy. *(See related DDB story on Page 56.)*

Mitsubishi to top $6 million in 1st separate effort

Detroit—Mitsubishi Motor Sales of America will invest between $6 million and $10 million in advertising this fall in its maiden ad effort. Ads break in 22 markets in mid-September via Cunningham & Walsh. Ads will hail "the most advanced technologies to meet the needs of our times." Until now, its vehicles were marketed here only through Chrysler Corp.

$20 million fall introduction—its largest ever

AMC puts its all into Alliance

By JAY McCORMICK

Southfield, Mich.—The American Motors/Renault Alliance, to bow next month, will have a thick French marketing accent despite being built in Kenosha, Wis.

"We have a hybrid here," said Howard I. Mosher, director of Renault marketing for AMC. "But it's a first-generation import; it hasn't been here since the Mayflower. It's almost a foreign car as opposed to an imported car."

The baby-boom generation is the target audience for the Alliance marketing program. As the bulge in the population moves ahead in years, car makers' mouths water with the prospect of increasing market size.

"By 1990, they [baby boomers] are going to account for about 42% of our business, being 60% of the population—an enormous market exploding, wanting new cars," said AMC's general marketing manager David J. Van Peursem. "The opportunity in the decade of the 1980s has never been greater for the car company that brings the right products marketed correctly to these boomers. Success is virtually guaranteed."

To take best advantage of the boomers' current attitudes, and get the proper marketing angle for the first all-new car AMC has introduced since the ill-fated Pacer of 1975, the Alliance will be treated as a European car. "We found that European, in the minds of the market, stood for craftsmanship, quality, durability and generally positive associations. European means modern technology," said Mr. Mosher. "With 'made in America,' we had a very ambivalent reaction. 'Made in America' is a plus for the average consumer in our target group...with two qualifiers: They won't pay more money for it and they won't give up quality to buy American."

Alliance tv commercials—breaking Sept. 4 on an NFL football game—and print ads (from Grey Advertising) will play off these feelings. A voiceover in a 30-second spot says: "For years, European excellence was priced out of reach. But one car maker, Renault, believes a car can't be the best unless people can afford it. Introducing the alliance of quality and affordability, Renault Alliance. Front-wheel drive, rack and pinion steering, electronic fuel injection. Alliance, European technology now built in America to be affordable. $5595. Renault Alliance, the alliance of quality and affordability is here."

AMC will spend more on the Alliance during its introductory quarter than it has spent on a vehicle before. The Pacer had previous

(Continued on Page 56)

Car makers' theme: Hands across the sea

By RALPH GRAY

DETROIT—Domestic auto makers are flaunting their meaningful relationships with foreign car companies nowadays. It wasn't so long ago Detroit was telling import companies not to call them at the office.

Nowhere is that change more marked than at General Motors, where president F. James McDonald said last week the pressure to marry couldn't be avoided any longer.

"All the American car companies have entered into creative new relationships with foreign companies. Although some people question these moves, competitive economics at the lower end of product offerings make them mandatory at this time.

"Importing smaller vehicles from abroad is not a new idea," he told the *Automotive News* World Congress. "But today, small cars are taking about 60% of all U.S. auto sales, and foreign competition accounts for 40% of this market segment.

"These arrangements with foreign companies will assure that U.S. car makers retain a strong, competitive presence in this growing segment of the car market.

"I doubt if any American producer prefers to take this route, and I am hopeful that our current research and development work will prove that in the future we can competitively build small cars in this country," Mr. McDonald said.

GM will import some 200,000 Suzuki-made small cars as a Chevette supplement and has started joint venture negotiations with Toyota. Ford Motor Co. has a deal with Toyo Kogyo for small cars, and Chrysler has been working with Mitsubishi and is seeking stronger ties with Peugeot of France.

American Motors Corp., now controlled by Renault of France, was the first to make it legal. "I think the type of relationship between AM-Renault is now an industrywide trend," said Jose Dedeurwaerder, president of AM and former Renault exec, another speaker at the World Congress, which this year featured more foreign-auto speakers than ever.

He was joined by Robert J. Sinclair, president of Saab-Scania of America, who said, "We are headed into a future of automotive re-alignment and alliances. The situation today is leading to all sorts of joint activities among the world's producers—driven by the intense competition among high-volume manufacturers and everyone's need to share the enormous cost of design.

"These alliances will continue and one day there will likely be less than a dozen major car marketers in the world," Mr. Sinclair said. He quickly added that would leave plenty of room for smaller manufacturers—like Saab.

■ "The line to the altar continues to lengthen," observed AMC's Mr. Dedeurwaerder. "The reason is simple. The costs of playing in the global automotive poker game have become too high for any of us to go it alone. We are proud of having led the way. Others are doing today what we did three years ago," he said.

The auto execs gathered at the World Congress had mostly nice things to say about the free, open markets that have to exist if the multinational operations are to succeed.

The issue of local content that would bar sale of vehicles without substantial U.S. content was received cooly. Voluntary import restrictions to which Japan agreed were played down.

The natural order of local content is just fine with Mr. Dedeurwaerder. He pointed out the French-designed Renault Alliance being built here has 74% local content.

GM's Mr. McDonald also mildly suggested the car makers who sell here ought to make investments here. "How you get there—through voluntary restraints, tariffs or local content—is for someone else to decide," he said. Any local-content law should make

Pepperidge Farm rolls vegetable-pastry line

By GAY JERVEY

Pepperidge Farm, having met with success with its Deli's pastry-sandwich line, will roll national with a decidedly gourmet, vegetarian offshoot, Vegetables n' Pastry.

Previously tested in Portland, Me. (AA, March 22), the new line currently is being shipped to retailers in the East and South. It will be available nationwide by February.

Vegetables n' Pastry is described by Bill Sanders, general manager-frozen foods division at the Norwalk, Conn., company, as vegetables in a sauce that are wrapped in puff pastry. The five varieties include asparagus in mornay sauce; mushrooms dijon; zucchini provencal; spinach almondine in a light cheese sauce, and broccoli in cheese sauce. The asparagus mornay will retail for $1.59, the others, $1.29.

Pepperidge Farm is hoping to cash in on the growing gourmet cooking fetish that is infiltrating the kitchens of middle America. Just as the Deli line thrived on Americans' faster-paced life style (*see story, Page 54*), the new entry should go over well with aspiring Julia Childs who don't necessarily want—or perhaps lack the time—to do all that cooking.

Mr. Sanders described the line as a natural by-product of the Deli introduction. "It was the outgrowth of some consumer input we got," he said. "The trick is to listen to what consumers are saying. And they were saying they wanted some sort of premium product like this."

Like its predecessor, Vegetables n' Pastry will be targeted at smaller households, particularly working women and men cooking for themselves, who need something fast and convenient, yet nutritious. Pepperidge Farm said the products contain no additives nor preservatives and have about 220 calories a serving.

There also appears to be some wishful

Young now old at Sanka

WHITE PLAINS, N.Y.—General Foods has decided that its Sanka (brand) decaffeinated coffee no longer requires the services of likable Robert Young, alias Dr. Marcus Welby.

A Young-replacement campaign will soon break nationally.

When word surfaced last week that GF had retired its longstanding Sanka spokesperson, talk began as to why. Could it be Mr. Young's health? It is well known that Mr. Young several years ago was hospitalized for a metabolically caused bout with depression, and his well-being has been in question ever since.

Or, possibly, did increasing competitive pressures from Procter & Gamble's High Point decaffeinated coffee—which opted for a new approach itself last year featuring actress Lauren Bacall—lead to the strategic shift?

The marketer is saying no to both, claiming that the decision was made simply because it was time.

Several months ago, when columnist James Brady reported in the *New York Post* that GF had decided to drop Mr. Young, strong

Low-price computer to get $30 million sendoff

Timex raises its ad sights

Low-cost computer gets a high-tech sendoff from Timex in this color magazine ad set to break next month as part of a heavy introductory campaign.

By ROBERT RAISSMAN

If added evidence is needed to show the beginning of an explosion in the personal computer market, Timex Computer Corp. is providing it with its announced intention to spend between $25 million and $30 million this year on an introductory campaign for its Timex Sinclair 1000.

The campaign, via J. Walter Thompson USA, breaks this week and comes on the heels of announcements of sharp price cuts by other personal computer manufacturers (AA, Aug. 23). In Timex's case, its price—$99.95—is lower than the competition's.

When the Timex computer was introduced last spring (AA, April 26), the Sinclair ZX81 computer, which is similar to the Timex model, was selling for $149.95. Peter A. Schweitzer, JWT senior vp, said Timex realized that major personal computer marketers would cut prices below $200 before the Timex Sinclair could reach the market and, in part, based its price on that expectation.

At the time of the Timex computer's unveiling last spring, industry sources estimated that Timex's ad spending would be somewhere between $6 million and $10 million. Timex executives would only say at the time that spending would be based on potential sales. Timex still declines to reveal its sales projections for the Timex Sinclair, but its ad expenditure appears to point to a greatly increased sales projection.

Mr. Schweitzer said the volatile state of the home computer market led Timex and JWT to delay the final implementation of its introductory ad campaign. The tv spots went into production on Aug. 2. "We waited as long as possible to get a better reading of what was going on in the marketplace," Mr. Schweitzer said, "but it got to a point where we had to go."

Pricing is one key to the cam-

CBS, industry prepare for life after Paley

By MAURINE CHRISTOPHER

NEW YORK—With 81-year-old William Paley finally getting ready to leave his beloved CBS Inc., the company he founded, Black Rock insiders wait to see if president-chief executive officer Thomas Wyman, 52, has the necessary board support to run the $4 billion conglomerate.

Mr. Wyman, heir apparent under Mr. Paley since June, 1980, was on vacation last week. And the CBS founder-chairman was traveling in Africa, far from reporters who were trying to learn whether he, as first reported in *New York* magazine, will retire next January and become a partner in Whitcom Investment Corp., owner of Whitney Communications and its 10 magazines, newspaper, some cable systems and part of CapCities Cable. It was reported earlier that Mr. Paley was attempting to buy into Whitney (AA, July 26).

As the retirement report gained momentum, sources at CBS, where many top executives were away, seemed—not surprisingly—to have no inkling of the unpredictable, close-mouthed chairman's plan to leave CBS and invest some of his estimated $500 million fortune in a concern headed by his old friend, Walter Thayer, and started by his late brother-in-law, Jock Whitney. Mr. Thayer was out of the office and not available. Nor were CBS board members reachable.

Insiders at CBS characterize Mr. Wyman as a strong, people-sensitive manager. They see him as a fast learner who has taken firm control at CBS and has displayed a diplomat's tact in dealing with the legendary Mr. Paley and with group presidents and middle-line executives, who have had to teach the former Pillsbury executive the intricacies of the communications business.

He works through and with a management committee comprised of the group heads—Gene Jankowski, broadcast; Walter Yetnikoff, records; Thomas Kirwan, CBS/Columbia, and Peter Derow, publishing. Also sitting in on these thrice-monthly sessions are James Parker, law; Paul MacCowatt, administration; William Lilley III, corporate affairs; Roger Moody, development, and Fred Meyer, finances.

While associates like him, Mr. Wyman has not scored any great new triumphs for CBS. The audio-record business has plummeted, CBS Cable is floundering and CBS-TV, though conquering in the nighttime Nielsens, continues to lag behind ABC-TV in the more crucial network tv billings race. Many observers think CBS has become too diversified for its best financial interests.

CBS Inc.'s president has handled his sessions with Wall Street analysts adroitly, but the numbers have given him little to elaborate on. Per-share earnings and income for the first six months of 1982 declined 12% from the 1981 levels. Revenues were up slightly—4%—to $2.04 billion.

If Mr. Paley retires and leaves his corporate baby in the care of Mr. Wyman, Mr. Jankowski and the others, it may be because he wanted to be part owner of the *International Herald Tribune*. (His CBS colleagues also point out the obvious, that the aging chairman tires more easily and is less energetic these days. For example, he is said to be standing aside as they deliberate over a way to salvage

(Continued on Page 51)

Technical snags remain

Jan. target for 'WSJ/Europe'

By DENNIS CHASE

Officials at Dow Jones & Co. will announce next month that the new European edition of the *Wall Street Journal* will debut in early January, according to sources in Europe. The startup date mentioned most often by sources is Jan. 17.

The working name of the publication is the *Wall Street Journal/Europe*, but the final name has not yet been determined.

Top Dow Jones officials are scheduled to meet in Europe on Sept. 10 and may issue a press release on the launch shortly afterward, following a press conference. They have nearly completed marketing plans for the new publication and have hired a staff of reporters and distributors. Ads in the trade press will coincide with the announcement next month. The ad agency is Jim Johnston Advertising in New York.

This week a production and editorial team for the new publication is in Europe to prepare for the launch. Sources say much of the editorial staff will move into its Brussels offices this week, although others have been told to report later.

The launch, expected later in the year by some competitors, has caught them off guard. "I am surprised it is coming out so soon," said a spokesman for the *Financial Times*. "We were expecting March or April." The *FT* is planning a huge promotional campaign for its European Frankfurt edition this fall.

One hitch that possibly could delay the *Wall Street Journal/Europe* startup is the technical problem of matching the *Journal's* Composition Systems Inc. system with another system used by its printer, the *Limburgs Dagblad* newspaper in Heerlen, a tiny south Holland mining town on the German border.

Interfacing the two systems and waiting for outside vendors to write software for it is causing Dow Jones officials to shy away from announcing hard-and-fast startup dates which they may have to retract later.

■ Sources say another technical problem is reproducing full-color ads. *Limburgs Dagblad* allegedly has problems producing four-color ads for small pressruns. The prototype issue has 10 to 15 four-color pages, sources say, and one alternative is to produce the ads in France.

The newspaper likely will have 10 reporters based in Europe—most of them in Brussels and London—and another based in New York. It also will use the staff of the Associated Press/Dow Jones

world news roundup

HONG KONG—Cathay Pacific Airlines tapped Leo Burnett Co. last week to handle its $15 million account over Sydney-based DFS affiliate Fortune, which handled the account for 22 years, and Ogilvy & Mather's Hong Kong subsidiary Meridian.

ATLANTA—Ted Turner is in Europe this week lining up contracts for his 24-hour Cable News Network, and the first is likely to be with Italian private tv. Mr. Turner already has signed contracts in Japan and Australia; his next stop is Latin America.

MANILA—Coca-Cola's Philippine subsidiary has won a court injunction against the local Pepsi bottler, which was ordered to halt ads claiming the two colas sell for the same price. Coke sells for 12¢ for a 12 oz. bottle, compared with Pepsi's 14¢.

LONDON—Campbell Soup Co. will spend $2 million here to launch new upmarket condensed soups via Saatchi & Saatchi Compton.

PARIS—Pernod-Ricard's Austin Nichols will launch two wines (red and white) in the U.S. next month under the brand name Devereaux. The company, stepping up its U.S. presence, will eventually launch Pacific, an anise-flavored soft drink, recently rolled out in France.

CARACAS—Venezuela's Health Ministry banned Adams Gum, of Warner-Lambert's American Chicle division, from airing its worldwide Dentyne commercial, which "promotes poor oral health by recommending chewing Dentyne over toothbrushing in public."

Soft-drink brands staying on top—top-of-mind, that is

By JOSEPH M. WINSKI

Soft-drink brands increased their already substantial visibility among consumers in July, snaring five of the top 10 spots among all advertisers in consumer awareness, as determined by adWatch, a monthly survey by ADVERTISING AGE and SRI Research Center Inc., Lincoln, Neb.

Coca-Cola and Pepsi-Cola ranked one and two, respectively, in over-all awareness, as they have each month since the adWatch polling began in April.

7UP, which had ranked No. 8 in April but had not reappeared among the top 10 since then, jumped to fifth place in July, while Shasta (which recently broke a new ad campaign) broke into the top 10 for the first time. Dr Pepper, No. 8 in July, made the top 10 for the third straight month. Shasta tied for ninth with Bell Telephone, which also made its first appearance in the top 10.

adWatch

Top 10 In awareness, July
Advertising named most often

July	June		July % of responses
1.	1.	Coca-Cola	4.56
2.	2.	Pepsi-Cola	4.00
3.	4.	McDonald's	2.40
4.	3.	Miller	1.52
5.	—	7UP	.88
6.	5.	Budweiser	.64
6. (tie)	6.	Ford	.64
8.	8.	Dr Pepper	.48
9.	—	Shasta	.40
9. (tie)	—	Bell Telephone	.40

Question: Of all the advertising you've read, seen or heard in the last month, which ad first comes to mind?

Source: SRI Research Center Inc., Lincoln, Neb.

AdWatch measures consumer awareness of advertising by asking a random sample of 1,250 consumers age 18 or over: "Of all the advertising you have read, seen or heard in the last month, which ad first comes to mind?" In July, one of every 10 Americans (10.3%) named a soft-drink brand when asked that question.

Displaced by 7UP, Bell and Shasta in the top 10 were Chrysler, Chevrolet and Tide detergent, which were seventh, tied for eighth and 10th, respectively, in June. In the most notable position switch in July, McDonald's moved up to No. 3 from No. 4 in June, changing

places with Miller beer.

In product-specific questioning, however (consumers are also asked to tell which advertising comes first to mind for each of 20 product categories), McDonald's fell significantly in awareness of fast-food advertising. Although it retained its solid hold on No. 1 in the category, McDonald's share of the responses fell 5.76 percentage points in July, the largest decline recorded by any advertiser. No. 2-ranked Burger King, meanwhile, scored a gain of 3.52 percentage points, the largest increase scored by any advertiser.

McDonald's was named by 343 consumers in July, or 43.4% of the total, down from 615 consumers, or 49.2% in June. Burger King was named by 113 people, or 9.04%, up from 69, or 5.5%, in June.

In other categories in July:

Beer: Philip Morris' Miller/Miller Lite regained the No. 1 spot from Anheuser-Busch's Budweiser/Budweiser Light. Miller received 13.5% of the responses, up from 10.8% in June, to Budweiser's 12%, down from 14.5%. Miller and Bud each have led the category in two of the four months of the survey. Coors, which received 6.2% of the responses in July, down from 7.7%, has ranked third all four months.

Cameras: Polaroid, No. 3 in the category, continued its slide, receiving 6.2% of the responses in July, down from 9.4% in June and from 16% in April. Polaroid's score has dropped every month since April, when it was No. 2 in the group with 16% of the responses and within striking distance of Kodak, No. 1 in the category that month and each month since. Canon strengthened its hold on No. 2, but remained well behind Kodak.

Cars/trucks: Ford remained No. 1, but its awareness score fell to 13.4% from 16.7%. Chevrolet was second with 10.2% and Toyota third with 8.7%. The rankings in this group have not changed in the four months of the survey.

Coffee/tea: General Foods' Maxwell House (12.8%, up from 11.8%) reclaimed the top spot, after having dropped to third and yielding No. 1 to Procter & Gamble's Folger's (11.5% in July, down from 12.6%). GF's Sanka was third (11.3%, down from 12.5%).

Cosmetics/fragrances: Maybelline, which was No. 3 in June, marking its first appearance in the top three, moved up to No. 1 in July, with a score of 4.3%. Avon, No. 1 in June, was second with 2.7%, and Revlon's Charlie, No. 2 in June, was third with 2.5%.

Home electronics: Mattel's Intellivision (3.3%) ranked No. 3 for its first appearance among the category leaders. Radio Shack reappeared with a No. 2 ranking (3.7%) while Warner Communications' Atari continued its comfortable lead (15%).

Paper products: P&G's Charmin (8.5%) regained the top spot from Scott's (7.68%), which fell to third behind P&G's Bounty (7.76%).

Soap/shampoo: Coast and Ivory, which weren't in the top three in June, tied for No. 1 with 4.6% of the responses. Both are from P&G, as is Prell, No. 1 in June, which fell to No. 3 in July with 4.1%. Armour-Dial's Dial, No. 2 in June, fell from the top three.

Soft drinks: Coke (25.36%) narrowed Pepsi's (25.76%) three-month lead to just five mentions, or an insignificant 0.46 percentage points. Seven-Up (8.3%) was third again.

Toiletries/hygiene: Charmin (6.7%) led here also, thus repeating its May feat of being No. 1 in two different categories. Johnson & Johnson's Stayfree (3%) was second and P&G's Crest (1.8%) third.

The top three in the remaining categories:

Airlines: United (14.3%), Eastern (9.4%), American (7.9%).

Breakfast foods: Kellogg's (5.4%), General Mills' Cheerios (3.84%), GF's Fruit 'n Fibre (3.76%).

Gum/candy: Wrigley (8.2%), Doublemint, a Wrigley brand, (5.4%), Warner-Lambert's Trident (4.4%).

Laundry products: Tide (15%), Cheer (4.2%), Solo (3%). All are from P&G.

Medicine/drugs: J&J's Tylenol (17.5%), American Home Products' Anacin (6.8%), Sterling Drug's Bayer (2.8%).

Packaged, canned, frozen foods: GF's Birds Eye (4.7%), Pillsbury's Green Giant (3.5%), Stouffer's (2.7%).

Pet food: Purina (7.9%), Allen Products' Alpo (6.6%), Ralston Purina's Chuck Wagon (3.2%).

Tobacco products: Philip Morris' Marlboro (7.2%), R.J. Reynolds' Winston (3.8%) and Salem (2.6%).

Wine/liquor: Gallo (5.12%), Villa Banfi's Riunite (5.04%), Brown-Forman's Cella (3.6%).#

Album retailers try rentals

By JENNIFER PENDLETON

Some independent record retailers that have watched their businesses get zapped by sluggish sales, home taping and competition from discount-oriented national chains, are fighting back with a new method of merchandising that threatens the powers in the record industry. They're renting new albums at a fraction of the retail price as an incentive to stimulate sales.

As new album prices have soared to $8 and $9, record album sales have dropped dramatically in the last few years. Many retailers, especially the independents, have seen their profits dwindle.

CRC Records, San Jose, Cal., is one record retailer that decided to do something about it. At its San Jose outlet, CRC is offering two-day rentals of new albums at $1.98, with the hope that once customers preview albums, they will pay the difference in the retail price and keep the merchandise in the home. CRC believes the rental service has done a lot to help its business in San Jose and believes there's a big future in other markets.

■ CRC currently has only one outlet, but the company is planning to open 14 additional locations in the Bay Area sometime in the next year. CRC also is looking to expand into Southern California.

While it's apparent the intent of many rental record customers is to record the albums on blank tape to avoid today's hefty record price tags, CRC executives are unconcerned. CRC vp Al Clem shrugs off criticism that record rental is improper with the argument that record companies are charging too much for albums. "If albums were still at reasonable prices, no one would rent records," he says.

CRC has never mentioned home taping in its advertising for its record rental services. Instead, it refers to its rental service as "no-risk record buying." The company is using in-house produced radio spots, with plans to expand into Bay Area tv spots next month.

CRC is not alone. By one estimate there might be as many as 200 record retailers renting records throughout the country. Overseas, especially in Japan, there are reportedly thousands of retailers renting records.

Music Odyssey, West Los Angeles, is another high-volume retailer renting records that believes the practice is the legitimate fulfillment of consumer needs, instead of a way to rip off record companies. "People can't afford $8 for a record," argues Music Odyssey president Steve Gabor, "so we are letting them preview the music to see if they want to buy it." Music Odyssey charges $1.99 for rental of the first record, plus 99¢ for each additional record rental. But rentals are not promoted, and there are no plans to do so.#

FCB 'repositions' creative dept.

The creative department of Foote, Cone & Belding, Chicago, has been "repositioned" since the departure of Alvin Hampel, who was executive creative director until becoming president of D'Arcy-MacManus & Masius/-New York. Now the duo of Lou Centilivre and Mike Rogers is in charge—presented in this ad as returning control "to the workers." The b&w ad, which ran in *Screen*, a local newsletter for the commercials production industry, spoofs the alleged hierarchical structures of rival agencies.

"If I can get it through my ACD before the CD sees it, we might be able to catch the ECD and schedule an AMI. So how're things over at FCB?"
Simple:
We've cut out the middlemen and done away with the alphabet soup.
We don't have a lot of empty titles and a lot of supervisors and a lot of hassle.
This is pretty much a place where you show it to the boss, and then you show it to the client. At FCB, controlling the work is back where it belongs.
With the workers.
FCB
FOOTE, CONE & BELDING

Followers explain new wave and its impact

McCabe envisions computerized creative dept.

NEW YORK—Computers are coming to his creative department at Scali, McCabe, Sloves, and Ed McCabe, president-executive creative director, is thrilled about it.

"I want to get rid of the gap between the inspiration and realization of an idea," Mr. McCabe told an audience at the ADVERTISING AGE Creative Workshop session last week. "Computers offer tremendous usefulness for writers to be able to retrieve old copy, to edit, to work more quickly. One year from now, I plan on having a computerized creative department."

Computers (word processors) also would allow creatives other advantages: "A writer not only won't have to go through account management, he won't even have to go through the client," Mr. McCabe said. "He will have access to that information in the machine." Some of the account and client data he envisioned being fed into the computer includes historical copy; marketing and technical information; jobs being worked on now by the client, and exactly who is working on what.

After the writer composes his copy, he can then transmit it to Mr. McCabe, who in turn can make notes in the margins (and on the computer), zip it back to him, get it back revised and then hit the print-out button, the executive explained.

This is not the first time Mr. McCabe has made news with an idea to revolutionize the creative department, he reminded the audience. About 18 months ago, he decided to wipe out the traditional, vertical creative group structure, wherein copy supervisors, art supervisors, associate creative directors were all assigned to specific accounts (AA, April 6, '81).

The vertical was replaced with a horizontal setup, and Scali's creative operation now consists of four associate creative directors assigned to specific accounts and then an army of writers and art directors who can work on one account one day, another the next. Their assignment is determined by

CREATIVE WORKSHOP

where they can be most effective, where they want to be and where they are needed; Mr. McCabe describes it as free lancers working on assignment.

The experiment has worked well, Mr. McCabe reported. While he expected client resistance, he got none. "Instead of clients worrying about what writer they had, they started looking at the advertising being done," Mr. McCabe said. And, he boasted, the advertising was as good or better than it had been in the past.

"Everyone grew substantially," he added. Although the restructuring was only made in the creative department (the only place it was suitable), Mr. McCabe said it has served to make the account management people work harder, too.

■ David Tree, creative director of Young & Rubicam, Los Angeles, answered the ponderous question, "What is New Wave?" by noting that, commercially speaking, new wave means strong visuals, strong music, strong colors, a minimum of copy. It is the Lincoln-Mercury ads for Lynx, the Chanel "fantasy" spot, the Diet Pepsi "Now you see it, now you don't" commercials. New wave also is a 3-year-old reel of European commercials that native Londoner Mr. Tree brought along for his Creative Workshop presentation.

"The heart of new wave is visual impact," Mr. Tree told attendees. He also explained that new wave advertising reinforced the basic advertising tenet that "an ad message should be simple and clear, relevant—and the product is hero."

Asked whether he thought new wave might be old wave in a year, Mr. Tree said he doubted that it would happen in that way. He said

corrections & clarifications

- In the table of figures in today's Magazine (P. M-3), the total number of estimated consoles already installed in U.S. homes (in thousands) should be 15,450 in the Merrill Lynch column and 17,500 in the Becker column.
- The spoonable yogurt market totals more than $525 million, of which the Dannon Co. share is about 25%. Both figures were incorrect in an earlier story (AA, Aug. 9, P. 2).
- The *Washington Post* said it sold ad space to, rather than swapped with, the *Detroit News* (AA, Aug. 23, P. 43). The *News* had said it swapped space with the *Post*, along with five other newspapers, to publicize its editorial awards.
- *Rolling Stone's* cpms have been lowered, contrary to an earlier item (AA, Aug. 9, P. 38). The b&w cpm is $16.60, down from $17.02, and the four-color cmp is $24.76, down from $25.38.

Pontiac building image for lineup

By JAY McCORMICK

PONTIAC, MICH.—Now the image building really begins for Pontiac.

The General Motors division is only two cars away from having a full lineup of "exciting" models, according to general manager William E. Hoglund. It took several years for Pontiac to get this close.

"I don't think our basic problem or challenge has been advertising; it's been getting the product," Mr. Hoglund said. "Then the advertising has to complement that."

The division has been building a sporty image since last year with various "excitement" themes, leading to this year's "Pontiac, we build excitement" (AA, Aug. 9). "Image is perception, a gut feeling. Right or wrong, image can help or hurt, and you don't change it overnight," Mr. Hoglund said.

One of the two cars needed to fill out Pontiac's image, the P-car two-seater, will come out during 1983 as a 1984 model. Another model, the subcompact 2000, will have its image improved when a convertible version, dubbed the Sunbird, debuts next spring. "The convertible has an excitement image," Mr. Hoglund said. "Not every car you do is going to be a BMW, but there's an aura of excitement about the convertible."

Pontiac has had trouble building name awareness for its alphanumeric models, such as the J2000, T1000 and 6000, which may account for the Sunbird nameplate on the new convertible. "We're moving in that direction by taking the alpha part of the alphanumerics, and you may see the rest of it go eventually," said Jim Graham, Pontiac's director of merchandising.

Pontiac's image-building is really a resurrection of the old "wide track" image the division had in the late 1960s and early 1970s, according to Mr. Graham. "When Pontiac was riding high, third in the industry, it was because we had a very special image, our own image, and it was stylish, sporty, fast, muscle, partly shed off the old GTO image," Mr. Graham said.

When the oil crunch came, Pontiac dropped that image as untenable. "Burning rubber down Woodward Avenue became not only bad judgment, but almost sinful. In a way, we overreacted. In retrospect, we shouldn't have pulled our image back as far as we did and made it bland," Mr. Graham said. "We were trying to be a mirror to other attitudes—trying to out-value the low end of the market and out-velour the top end of the market."

When Pontiac decided to go back to its sporty image, it found it lacked the necessary hardware to carry it off. The division did not want to promise something it could not deliver. "I worked for Bill Bernbach at Doyle Dane and he told me, 'The quickest way to destroy a bad product is through good advertising.' We knew we could not come out last year with the product line we had—the whole line—and say, 'You've got to accept it.' There were cars in that line that just didn't make it," Mr. Graham said.

Now with the Firebird, a peppier 2000 on stream and a European-style 6000 STE coming later in the fall, Pontiac is closer to the product mix it desires. But other GM divisions have the car lines Pontiac has, so the burden of building a distinct image falls to advertising. "If products are more alike, then the difference can be merchandising and advertising," Mr. Graham said.

■ So Pontiac is requesting a larger ad budget from GM. If the added money comes through, it will go into the division's normal media mix—80% for tv and 20% for print, mostly newsweeklies and special-interest magazines.

The banner headline in some of the ads will be the name of the car and a smaller head will be below a shot of the car. The 2000 will be: "Pontiac 2000. Five speed, overhead cam, fuel injection." The 6000 will get a similar layout: "Pontiac 6000. European performance, American technology, world class." The Grand Prix gets a longer headline: "There's new excitement in our '83 Grand Prix."

The "image" cars—2000, 6000, Grand Prix and Firebird—will get most of the ad weight and all of the tv time. Bonneville, 1000 and Phoenix will get print support but no tv. Cable buys are "exploratory only," according to Mr. Graham. "If Ted Turner indeed comes up with the fourth network, if ESPN [Entertainment & Sports Programming Network] becomes a giant factor in the business, then we'll make some giant moves," he said.

To push the sporty image a little more, Pontiac is using Richard Petty, the race car driver, in its catalog. "Goodyear is helping us out a lot," Mr. Graham said. "They use Richard Petty with their Eagle tires on our Grand Prix [in Goodyear ads]. When you see our catalog, you'll see an awful lot of Goodyear tires on the cars, and in our ads, too. It's a one-hand-washes-the-other thing; we didn't make a deal with them."#

Pontiac dealer intro to become tv special

PONTIAC, MICH.—Detroit's all-out effort to get more bang for the buck in these troubled times has extended to its customary new-car introduction hoopla.

Pontiac division of General Motors will tape its Las Vegas extravaganza to introduce new models to its dealers next month and develop it into a tv show that will air in 85% of the U.S. in January.

"We've made an investment [in the dealer show] anyway; why not get a bigger audience with it?" said Jim Graham, Pontiac director of merchandising. The show will air on an ad hoc network created from various independent and network affiliate stations around the nation. It will run on Sunday, Jan. 23, from 8 p.m. to 9 p.m. (ET).

Stars lined up for "Me and my car, an American love affair" (the current working title) include Dick Van Dyke, Norm Crosby, Morgan Fairchild, Lee Majors, Isabelle Sanford and Scott Baio. The stars will appear in taped location shots that will be inserted into the edited Las Vegas show.

"We will make a sizable investment in an entertainment vehicle to introduce our new cars to our dealer organization in Las Vegas. By taping the big production elements of that, adding to it the inserts with the star names and so on, subtracting from it the overcommercialism of the car reveals what we will be doing for the dealer organization—what we're doing is getting more bang for our bucks," said Mr. Graham.

Pontiac and two sister GM divisions, AC-Delco and GM Parts and Service, will take the four minutes of "network" time and the local stations will get the other four. "We are urging dealer tie-ins on that," said Mr. Graham. "The stations have been enjoined to offer [the time] first to Pontiac dealer associations or dealers, then to offer it to other sponsors if that doesn't sell. In no case are they going to offer it to any other auto company, since we have the basic buy anyway."

Pontiac tried to work with syndication tv before but the effort failed because no ad hoc network was set up, Mr. Graham said. Because the show in January will be on at the same time and same day on all the stations, Pontiac and its dealers can promote it.

"We think it's going to work," said Mr. Graham. "If it does, you can be sure that we will do it again."#

Conwood still leads in smokeless tobacco

By JOHN C. MAXWELL JR.

As usual, we question U.S. Department of Agriculture statistics and have modified them as best we can. We also have broken out the soft-plug category for the first time. It seems wiser to show soft plug as a separate product rather than a subdivision of loose leaf.

Conwood continued as the industry leader in 1981, with Pinkerton and U.S. Tobacco in a tight race for the No. 2 position. The fine cut and semimoist area (up 13.2%) is receiving new entries. Conwood has added to its product line with Kodiak, while Reynolds is testing Timberline in Texas and Liggett Group recently came out with Culver Brothers. This and soft plug (up 71%) are the only growth areas of the smokeless tobacco industry, and this is where new product activity is occurring.

Industry volume was up about 4% in 1981, against rises of 3% in 1980 and 6.7% in 1979. We are aware that this industry has been affected by the economic downturn. Many blue-collar work sites, such as mines and auto plants, prohibit smoking—and this encourages the use of smokeless tobacco products. We guess that some laid-off workers have returned to cigarets, but will revert to the smokeless area when they are rehired.#

Two join 13-30 Corp. in executive changes

KNOXVILLE, TENN.—13-30 Corp. has named two outsiders to new, key executive posts in a reorganization that also involves five of its current managers (AA, Aug. 23).

The moves were essential, said Christopher Whittle, chairman, "if 13-30 Corp.'s growth is to continue in an orderly fashion." Gross income more than doubled, to more than $20 million, in five years, he said, with $31 million projected for the current fiscal year. It and *Esquire* are owned by 13-30 Group.

Ivan Samuels has joined the publishing company as chief operating officer, a new post. He previously served as president-chief executive officer of Ciba Vision Care Co., Atlanta, a division of Ciba-Geigy Corp. This new position ranks below that of Mr. Whittle and Phillip Moffitt, president, and above that of Mike Collins, exec vp-general manager.

Ron McDougall has joined 13-30 as exec vp of a newly created division, the Business Group. He had been senior vp-marketing and strategic development at the Dallas-based Steak & Ale Restaurants division of Pillsbury Co.

Within the Business Group, which will handle all of 13-30's multiple advertiser operations, there were two promotions: Bob Hanggi to vp-publisher, student publications and sampling from vp-sampling operations, and Warren Guy to vp-publisher, wall media from vp.

Ed Smith formerly vp-circulation and field operations, has been promoted to a new position, senior vp-planning. He will oversee development of new products.

Replacing Mr. Smith is Jim Rinehart who takes the new title of vp-field marketing. He formerly was director, national advertising sales, student publications. Laura Eshbaugh who was vp-creative development, becomes vp-research and development.#

The big bang marketing of home VIDEOGAMES

Hot competition could mean $100 million in 4th quarter advertising

By Matthew F. Mansfield

Like the astronomic scores and pulsating beats of Space Invaders and Astro Smash, the numbers and the competitive pace in the home videogame industry continue to escalate. Consider that:

- Factory sales estimated at $2 billion for 1982 will nearly double last year's figures and will equal 20% of all American toy sales.
- At least 14 million U.S. tv homes will have game consoles by Christmas—an increase of between 6 million and 8 million homes over a year ago.
- Some 50 million to 70 million game cartridges will be plugged into those consoles in 1982, depending on whose figures you believe.
- Competition has become so fierce that marketers are spending at least $1 million and in some cases perhaps as much as $3 million to market each new videogame that enters the field.

We are in a gold rush era of home videogames. No one agrees on the figures, and everyone is talking deals. Marketers ranging from free-wheeling, one-shot entrepreneurs to corporate giants are crowding the marketplace. Retailers are at once ecstatic and anxious over the fall invasion.

With five and possibly as many as seven incompatible game consoles being offered at $100 to $250 retail, a major shakedown by January seems inevitable. Atari and Intellivision (made by Mattel) are expected to continue dominating the market, although a major battle looms for third place.

The hot spot today is software. At least 15 companies, including some that barely existed last year, will ship more than 300 different game cartridges priced from $20 to $40. Atari will still lead the way, but Atari-compatible cartridges from competitors are sure to make inroads. Capable of instant millions in console and game sales, this segment is the leading edge of the business.

What makes the game cartridges exciting? There are several factors: The emotional pull with customers whose word-of-mouth can make or break the game; the short product life span, with 50% of sales achieved in the first six months; the lucrative margins for manufacturer and retailer with a box office hit. At an estimated $6 cost-of-goods, software is where the money is.

Already, opposing schools of software design and marketing have drawn lines. Graphics versus playability, action versus strategy, solitaire versus multi-players, original vs. presold titles—all these are weighed as to importance. The scramble to segment the market is on.

Illustration by Jeanette Adams

Atari: Leader of the pack

A point on which everyone can agree: Atari is big. *How big* is in dispute. Skimpy with details, Atari itself claims 85% market penetration. A cross-section of competitive, retail and Wall Street opinion is more conservative and specific estimates are that Atari has a 65% to 75% unit share of the installed videogame consoles and a 50% to 55% unit share of the videogame cartridges, with 20% to 25% of remaining cartridges Atari-compatible.

Several advantages make Atari big: Pioneer game development and marketing of the original organization before its 1976 acquisition for $27 million by Warner Communications; willingness to invest in research and development as well as sales and promotion; unique cross-marketing experience from coin-operated service operations.

This game plan leads to the largest variety of cartridges, more than 50 by yearend, for one of the least expensive consoles, the Atari 2600 VCS. With cartridges competitively priced at slightly more than $30, the VCS retails at $130, about $100 below its major rival, Mattel's Intellivision.

By October, the Atari 5200 Home Entertainment System (HES) with a $250 suggested retail price, will be shipped. This stripped down Atari 400 Home Computer is being introduced to counter complaints about the VCS quality and limitations, relative to Intellivision, and to be an intermediate price level between game consoles to home computers at $350 and up.

A total of 14 Atari games will be compatible only with the 5200 HES. (Atari VCS games will not be compatible with the 5200 HES until 1983, when a special adapter will be ready for separate purchase.)

Retail and competitive reactions to the 5200 HES have been skeptical. A production unit has not been seen by many buyers. The unit may not have enough potential for those seeking add-on home computer capability. The two-tiered positioning of the VCS for children and the 5200 HES for the family may frustrate purchasers with the price-value spread. In fact, Atari unexpectedly lowered the suggested retail price of the 5200 HES by $50 after its debut at the June Consumer Electronics Show in Chicago.

Atari division president Michael Moone maintains that the 5200 HES will be well received by players demanding state-of-the-art videogame technology. Put another way, game graphics will be touted as highly as they are with Intellivision.

At the same time, Atari is reinforcing its VCS library. Following the heralded success of Space Invaders, Asteroids and Pac-Man, 13 new games will be launched this fall. Two titles reflect corporate ambitions to step beyond its arcade experience: "SwordQuest," a unique four-cartridge series of interrelated strategy games with supplemental clues to appear in issues of Warner-owned D.C. Comics books, and "Raiders of the Lost Ark," an adventure game based on the movie. Four sports cartridges also will be fielded against Mattel's Intellivision lineup.

Pac-Man's initial performance as a home videogame, may have accelerated this corporate imperialism. Atari management says 9 million cartridges have been shipped. But at the retail end of the business, the picture is somewhat different; Not only is the home version of Pac-Man a disappointing translation of the arcade format, critics say, but also graphic "flickering" hints at poor programing. Retailers report selling at—or even below—the $22.50 cartridge wholesale price.

Game concept segmentation for different player appeal is also coming. The key group now is 8 to 18 year-old males. Preschooler importance is growing as indicated by Atari licensing arrangements: Aerobics games with Mickey Mouse and other Disney characters as well as educational games with the Sesame Street gang are planned for 1983.

Both published and internal company sources put 1982 Atari advertising spending at $75 million—under the industry 10% advertising-to-sales ratio but still the largest budget. At least $30 million and probably more will be spent in this year's fourth quarter because of seasonality and increased competition.

The bulk of second half 1982 dollars will go to lengthy network tv and radio schedules. Print ads will extend reach in mass, male-oriented, sports and specialty magazines. Informational ads for parents will apear in some of these plus shelter and women's service magazines.

Copy for the 10 30-second tv spots to air will support separate corporation and software title stores. The intended customer take-away is edging away from "Have You Played Atari Today?" According to Janet L. Soderstrom, Atari vp-corporate advertising, the new concept will assert: "Only for Atari from Atari."

Mattel smashes back

Despite Atari's dominance, Mattel has built a strong second position in the market. Intellivision's estimated 18% to 20% of installed U.S. consoles has proven its hardware and software endurance to retailers and customers. But marketplace turmoil is pressing Mattel to go after Atari even more aggressively during the balance of 1982.

Mattel has convinced a lot of people that the Intellivision master component is the best of the videogame consoles, especially for graphics. This image is important to justify competitive value and premium pricing. The sophisticated controls, a larger memory and other features

Matthew F. Mansfield is a contributing editor to "Crain's Special Events Newsletter" and vp-management supervisor at Drossman Yustein Clowes, New York. And no—he is not a videogame aficionado. He prefers gardening instead.

BEST AVAILABLE COPY

compare very favorably with the Atari VCS. Complementing the hardware has been a limited, 27-cartridge library with notably successful sports games.

Intellivision's state-of-the-art position is being challenged, first with the imminent arrival of the Atari 5200 HES and other hardware promising more computer capability at competitive prices and, second the headlong rush of software marketers to market new game cartridges, most of them Atari-compatible.

Intellivision has prepared counterattacks. Hardware advertising will draw customer attention to the product's superiority over the Atari VCS. Promotions and new features will parry other hardware challenges.

A $50 cash rebate plan for an Intellivision purchase (begun Aug. 16 and ending Sept. 18) will match expected ColecoVision and Commodore Max introductory prices and undercut the Atari 5200. Intellivoice, a voice module for more player-computer interaction, will be a console add-on available this fall for $69. Except for Odyssey, other rivals will not offer this feature until 1983.

Another thrust will be the expansion of the cartridge line with 13 new Intellivision titles and the M Network, consisting of 11 Atari-compatible games. Four more also will be sold for the Intellivoice module.

"We are developing software with broad segmentation potential," says Peter Pirner, senior vp-marketing at Mattel. "We have wide appeal now because average cartridge sales per game title are higher across the Intellivision line than the Atari line. Atari gets its large sales from a small number of titles."

Mr. Pirner admits the success of Pac-Man to attract marginal players has pricked Mattel's desire "to pursue all entertainment areas of interest." New Intellivision titles reflect efforts to diversify with traditional hand-eye coordination games such as "Astrosmash" to the video fantasy, "Advanced Dungeons and Dragons."

While statements about Intellivision advertising plans come easily, budget figures do not. Based on $9 million in 1981 measured media industry, estimates for Mattel advertising in 1982 range from $20 million to $25 million, with the big push this fall.

For Intellivision and Intellivoice, George Plimpton will continue to assail Atari on tv as well as in 1,000 movie theaters and major trade and consumer publications. Separate M Network advertising will be directed to teen males.

In view of increasing competitive sophistication, Mattel is testing a keyboard module and nine programs to expand Intellivision to home computer capability. Whether the company will pursue this direction and Atari into home computers remains to be seen.

For the time being, Mattel is holding to a clear and simple course of marketing electronic games.

In search of Odyssey

The situation is considerably more complex for North American Philips' (NAP) Odyssey. The good news for the company: With a 6% to 8% console unit share, its Odyssey² unit has a clear third place. The bad news: Big investments in compatible game development and console defense are needed to keep the franchise viable. Relative to Atari, Mattel and other companies, Odyssey² promotion dollars are limited. NAP will only say the budget is "In multiples of the 1981 figure," at most $15 million to $18 million.

Until the court decision barring entry of its K.C. Munchkin, rival to Pac-Man, Odyssey² intentions were quiet. Since spring, 1982, the adverse ruling and hot competition have brought NAP to the surface churning with activities.

According to marketing vp Gerald Michaelson, 60% of the advertising this fall will support the hardware with the "Wizard of Odyssey" extolling the virtues of the console with computer keyboard. This feature is the Odyssey² point of difference: The alphanumeric keys enrich game playability and perceived value at its current retail price of $150.

The remaining funds will go to software advertising of specific game titles. The listed 43 Odyssey-compatible cartridges contain many original titles with sports, arcade-type, competitive, strategy and education series.

Certain ones, among them Pick Axe Pete, have been designated for special advertising and promotion blitzes. Mr. Michaelson feels that, used together, "promotional events can extend the advertising campaign." Bridging both hardware and software will be the September introductory blitz of a voice synthesizer, the "Voice of Odyssey," available for less than $100.

While not specific, retail comments about Odyssey² games have been lukewarm. Possibly the presold title and advertising fanfare of Atari and Mattel have been missing. Mr. Michaelson stoutly replies: "Our cartridge sales per main frame are better than anyone else's."

Megabucks: Estimated videogame advertising budgets for 1982

Maker	Estimated advertising budget ($ thousands)	Period covered	Agency
Atari	$75,000	calendar '82	Doyle Dane Bernbach

Software wars

The play's the thing, agrees the new crowd of software makers. Just what makes for good play spurs endless debate. With a short product life and no guarantee of success from one title to the next, these differences translate quickly to the bottom line.

One software maker is Activision, with Atari and Intellivision compatible cartridges. James Levy, Activision president, believes software is a "creatively driven" business based on the game designer skill to reach the customer emotions.

Activision has assembled what it considers an elite design group and shuns pre-sold titles. "We do not want to mislead the customers about quality, says Mr. Levy. The company just completed a $66 million sales year, up from $6 million a year ago. Its $20 million ad budget makes for one of the highest advertising-to-sales ratios.

A different philosophy is espoused at Parker Bros., building on its games expertise. "What happens if all the games offer similar quality?" Asks Richard Stearns, consumer electronics vp. "Strong advertising and licensing will be essential to draw customers." The company crows about the success of its "Empire Strikes Back" game and plans to spend $3 million advertising per title.

Making cartridges compatible for three consoles, Imagic co-founder James Goldberger says that "Most successes to date had origins in arcades. Future hits will be based on other sources." He stresses consumer research to separate winners and losers because bad word-of-mouth can rapidly undo the best advertising campaign.

New wave systems

One approach to a better game has been to build a better console. "Better" has varying meanings to these manufacturers attracted by the unsatisfied console demand. A common point seems to be the quality comparison to arcade games.

Anticipated to sell under $200, according to Michael Katz, Coleco vp-corporate communication, ColecoVision claims superior controls, graphic resolution and open-ended capacity to add on steering wheel, computer keyboard and modules for Atari games. Arcade-quality comparisons are encouraged by the high number of licensed coin-op titles among the 24 ColecoVision games, including the recent leader, Donkey Kong. If customers still prefer Atari VCS, Intellivision or Sears systems, Coleco will offer compatible system games at competitive prices.

The Arcadia 2001 from Emerson Radio will be targeted for a lower price range. This unit presents itself as an advance system, comparable to Intellivision, with plans for a module that will accept Atari games. The makers promise retail profitability at $100 in-store price based on limited distribution. Two units with varying approaches are being marketed in the $300 range: Astrocade (formerly known as Astrovision and Bally Arcade) and Commodore's VIC 20.

Astrocade has the same custom microprocessor set as Bally/Midway coin-operated games and four-player capability.

Two unusual games are Creative Crayon, with a pen for drawing electronically on console screens, and Music Maker, for composing electronic music.

VIC 20 is practically a reverse case: A home computer adding cartridges to attract current console buyers to the franchise. A lower-priced model, the Commodore Max, is scheduled for December arrival at about $180.

Milton Bradley, which in July acquired General Consumer Electronics Co., with arcade-style vector scan technology, is not commenting on future plans, although it will enter seven markets this fall.

'Mega-Tron'

Is the movie "Tron" in effect the longest, most expensive commercial ever made—a commercial for videogames? Despite its mixed reviews, Mattel will market exclusive "Tron" games based on the recently released, $20 million Disney film set inside a console. The assumption is children will not be affected in their decision to play the game or see the movie by the reviews.

In search for marketing momentum, various videogame deals with tv and film production companies have been struck.

Lucasfilm has straightforward licensing with Atari, and Parker Bros. and co-venture production arrangements with Atari.

Robert Lee Hunter, director of CBS Video Games, will this December ship two Atari-compatible licensed games and expand the library in the post-Christmas market. Intellivision-compatible and Odyssey²-type en-

On the Legal Front

By Sidney A. Diamond

More than a slap on the wrist

Between Congressional cutbacks and the conservative attitude of President Reagan's appointee as chairman of the Federal Trade Commission, the FTC clearly is limiting the number and breadth of deceptive advertising cases it plans to file. But this does not reduce the potentially sharp impact on any company that happens to lose one of those cases.

When the U.S. government wins, the typical conclusion of an FTC proceeding is an order to cease and desist—in other words, to stop violating the law in the particular area the case involves. Some advertisers and agencies consider this kind of an order the equivalent of a slap on the wrist because there are no fines or monetary damages to pay. But that attitude ignores the expenses of defending the case, including attorneys' fees, the expert witnesses often called in to help and the lost time of company executives in preparing for the defense and testifying at the trial, which often is a very lengthy affair with many interruptions. It also ignores the risk of an embarrassingly broad order and the financial consequences of failing to obey the order scrupulously, as we shall see.

A recent court decision enforcing an FTC order against Sears, Roebuck & Co. provides an example of how things can get out of hand. While the original case was started some years ago and conceivably might not have been filed under today's policy, the FTC's remedies against any loser are not being changed.

In the early 1970s, Sears decided to reposition its top-of-the line private brand dishwasher, the "Lady Kenmore." J. Walter Thompson USA prepared a memo for Sears stating that the objective was to "transfer the consumer image from a 'price' brand to a superior product at a reasonable price."

The detailed strategy focused on two major product claims: First, the Lady Kenmore completely eliminated the need for scraping and prerinsing of the dishes. Second, the machine would clean dishes on the upper rack as thoroughly as those on the bottom rack.

An advertising campaign based primarily on these claims ran in various forms of print and electronic media over a four-year period at a cost to Sears of some $8 million. It was a success. From 1971 to 1973, sales of Lady Kenmore dishwashers rose from 35,029 to 105,570 units, an approximately threefold increase.

The trouble was that the claims were untrue. In particular, the owner's manual that the purchaser received after buying the dishwasher contradicted the "no scraping, no prerinsing" claim. It specifically advised the purchaser to presoak or lightly scour certain dishes.

The FTC ordered Sears to cease and desist from making the "no scraping, no rinsing" claim and the "top rack, bottom rack" claim. But it went much further, ordering Sears not to make any claims for any major home appliances unless they were true and unless Sears had a reasonable basis for relying on the statements, consisting of reliable tests or other substantiating evidence.

The major home appliances covered by the additional part of the order included a total of 14 big-ticket items such as air-conditioning units, clothes washers and dryers, refrigerators and freezers, stoves and humidifiers. These particular products were listed on the basis that Sears tested them in the same laboratory it uses to test Lady Kenmore dishwashers.

Sears took the FTC decision to the U.S. Court of Appeals in California in an effort to have it reversed. But the court upheld the FTC by a vote of 2 to 1.

Sears made no real effort to justify the dishwasher claims, where it had been caught in a contradiction between its media advertising copy and the instructions in the owner's manual. Its main problem was the extra burden of having to use special care to avoid stepping over the line on those 14 other items.

There is a big difference between defending a separate FTC proceeding for violating the law and defending an FTC proceeding for violating an existing cease and desist order, which will be explained later.

The lengthy majority opinion of the Court of Appeals excoriates Sears, saying that the Lady Kenmore advertising campaign demonstrated "blatant and utter disregard" for the law.

The judges on the majority side believed that making false claims for a major ticket item was a serious violation because it would be effective for a considerable period of time, with great benefit to the merchant but great cost to the consumer. The court reasoned that the same selling strategy easily could be transferred to the marketing of other home appliances.

FTC orders that extend to more products than the specific item that led to the particular proceeding are nothing new. So the Court of Appeals had no difficulty in upholding the FTC order, including its coverage of the additional 14 products.

The single dissenting judge would have been willing merely to give Sears another chance before the FTC to prove that the other big-ticket items were so unrelated to dishwashers that the commission had gone too far in its order. Sears now has the legal right to ask the U.S. Supreme Court to review the case, so it is possible we have not yet heard the last of it.

When an advertising agency is responsible for the alleged false claims, the FTC does not hesitate to include it in the proceeding. An agency may risk even more than an advertiser by one of these broad orders. The FTC has ordered agencies to cease and desist from misrepresentations not only about the products of the particular advertiser who ordinarily is the main target of the proceeding but also about the products of other clients of the agency.

In the Sears case, J. Walter Thompson originally was named as a party by the FTC. It settled by consenting to the entry of a limited order against it, conceivably to avoid the danger of having its work for other clients subjected to the kind of broad order just described.

The significance of all this is the difference between a violation of the law and a violation of an existing cease and desist order. A violation of the law may lead to a separate FTC proceeding depending on whether the commission ever finds out about it, whether it falls within the new guidelines and how busy the FTC is with other matters. But that kind of case can be defended on the particular facts applicable to the product and the campaign. A violation of an order is potentially much more serious. The order already is in effect and the only question is whether it was obeyed.

The law states clearly that the penalty for each separate violation of a final FTC order can go as high as $10,000. If the violation consists of a passive failure to observe the order, each day is a separate $10,000 (maximum) violation.

Just last year *Reader's Digest* got involved in an enforcement proceeding growing out of an earlier FTC order affecting its sweepstakes promotions. The court found that there was evidence of 17,940,521 separate violations; there were that many improper sweepstakes mailings. Under the circumstances, the penalty of $1.75 million imposed on the *Digest* could be considered a relative bargain. The propriety of charging that amount was sustained by the U.S. Court of Appeals in Philadelphia.

Even though the FTC may limit its future false advertising activities to "hard-core" cases, its present enforcement and penalty procedures remain intact. Any advertiser or agency trapped in an FTC proceeding should be aware of the possibility of an embarrassingly broad order to cease and desist and conceivably a very expensive penalty, if the FTC charges that it has failed to comply with the order.

Sidney A. Diamond, a former U.S. commissioner of patents and trademarks, is counsel in the Washington office of the law firm of Sidley & Austin.

Videogames

(Continued from Page M-3)

tries also are possible. Mr. Hunter's hope is to get into areas away from horizontal, vertical and maze patterns.

At Fox Video Games, the first four games rely on such familiar movie titles as "9 to 5" and "Porky's" in addition to two new ones. Target group feedback is essental to guide the Fox programers and designers. Says Fox staffer Kandes Bregman: "We feel the kids are entrepreneurs and should tell us what they want."

Another entry is expected from MCA Universal. Marketing vp James Fieldler hints that a direction contemplated creates more "sense experience, less observation" with new video technology.

These companies gaze covetously at the millions of television households in the virtually untapped European South American and Pacfic markets. And Japan is returning the gaze: A TOMY Toys official confirms possible U.S. entry of home computers with game cartridges by the huge Japanese toy company during 1983.

What's the guy minding the store going to do? High interest rates and inventory turn make store managers move very carefully. Too many consoles and too few cartridges can be retail nightmares. On the other hand, with the new consoles, customers will shop hardware more closely. Cartridges will relate to the status they confer on customers. Giftgivers will be looking for safety.

Bill Silverman, editor of the *Merchandising*, sees store buyers hedging: They will stay with traditional console successes, take a variety of cartridges for new consoles, see which cartridges move and stock accordingly, he predicts. *Chain Store Age* associate editor Jeff MacCallum hears the retailers want simplicity of equipment and games so that store personnel are free to move. Steve Smith at *Electronics for Kids*, a toy and hobby publication, expects toy stores to try electronic game boutiques staffed with qualified people. Finally, George Kopp of *Video Business* has found overnight cartridge rentals for $2.50 to be big business and a retail safety valve before big stock commitments.

There is agreement on this: Retailers will first look at the company reputation and its ability to fill orders. Next they will establish logical price points with clear value differences and build game variety. Finally, the importance of coin-op success and/or heavy advertising can rapidly affect opinion.

To some extent, the megamarketing of home videogames has become a mirror image of itself. In conference rooms or on corporate jets strategies are created and implemented. Products are launched and invade alien space. Advertising and promotion are brief blips lighting the screens as opposing forces struggle for supremacy.

As in "Tron," the players *are* the game.

Major 1982 videogame marketing events

Manufacturer	Event	Concept
Atari	"Pac-Man Day" (4/3)	27-major market same-day, live appearance of Pac-Man and Ghosts with free games and hoopla
	McDonald's "Rub Away" (8/15-10/15)	Instant-win contest with Atari prizes at participating restaurants
	"SwordQuest" (late fall)	Promotion related to new 4-cartridge game of same name
Mattel	"Astrosmash Shootoff" (3/1-8/11)	National game contest with $100,000 in prizes (finals near Houston Astrodome)
	"Videochallenges" (8/1-12/31)	18-site contests with primarily sports games and $180,000 in prizes
	"Tron" Sweepstakes"	Product tie-ins with Scott Paper contest
Odyssey²	"Pick Axe Pete Pick-Off" (7/1-8/30)	National game contest with pound of gold bullion as main prize (finals at World's Fair in Knoxville)
	"Otto C. Robot"	Robot spokesmachine at World's Fair
Coleco	$5 Consumer Refund (9/1-11/30)	Joint promotion with Hostess Cakes supported by $1 million in network and spot TV
Astrocade	Diamond Vision Contests (summer)	Game contest projected on giant ballpark screens before ballgame (Chicago, New York, Seattle)
Imagic	"Defend Atlantis" (9/15-10/24)	National game contest with $10,000 in gold as top prize (finals in Bermuda)
U.S. Games	"Name That Game" (fall)	National contest to name untitled game cartridge

The network tv connection

The majors—and minors—scramble for the contract

By Anita Seelig

Traditional seasons have become sports seasons. In the fall and winter months—with spring soon to follow—there is football; in the summer there is baseball, and now, just about year-round, save July and August, there is basketball.

But one thing ties them all together: Network television. Watching sports on tv has, in fact, become a way of life: Our viewer settles into a large comfortable chair, a cool brew in hand, eyes concentrated on the illuminated television screen, taking in everything from professional bowling to professional football.

Cable and subscription tv may have attracted his attention lately, but it is network tv that maintains his greatest loyalty.

Professional sports leagues, too, remain loyal to the networks. A tv contract has often reached proportions akin to life and death situations for a league. That may be a bit exaggerated, but a recent contract with ABC-TV breathed life in the fledgling United States Football League (USFL) even before nicknames, coaches or players were selected for the teams.

This is not a one-sided relationship, however. As much as network tv means for the people who are in the sports business, pro sports is just as vital to the fortunes of television companies themselves.

And of all the major sports, pro football is the king of tv. According to 1981 A.C. Nielson Co. tv index sports ratings, football has the highest average audience of all tv network sports with an 18.3% rating.

Baseball ranks behind football, and basketball comes in some distance behind.

It should not be surprising, then, that in the National Football League, few things are as sacred as tv contracts. In the past, the network season package budget has hovered around nine figures. But this year a new high was reached when the big three networks—ABC, NBC and CBS—agreed to pay a combined $2 billion for the right to carry the NFL games for five years. The combined total of the last contract was $650 million.

Although the new figure may bring gasps from some, there are reasons that explain what might seem extravagant folly.

For one, the NFL is one of the most popular shows on the network schedule. ABC's Monday Night Football had its highest rating ever last year with a 21.7 share. CBS also made record ratings with a 17.5 share for regular season games. NBC was the exception, dropping from 14.9 to 13.9.

Anita Seelig is a Dallas-based writer whose articles have appeared in Texas Business *and other business publications.*

Then there is the Super Bowl. That frenzy of football watching broke new territory this year with a 49.1 rating, making it the third-highest rated program after the "Who Shot J.R.?" episode of "Dallas" and the final segment of "Roots." Football's popularity may be one reason NFL commissioner Pete Rozelle decided on the record figure for the football contract. Another may center on the way the NFL itself is operated. It is substantially different from professional baseball and basketball.

In all three major sports, the teams share the money from the network contracts. With the increase in the football contract, this year—for the first time—the NFL teams will make more money from the tv agreement than from gate receipts. With the new contract, teams will average $15 million each, up substantially from the $5.5 million average last year. The Los Angeles Rams will receive the most—$19.8 million. But even the Cincinnati Bengals, at the bottom of the 26-team list, will gross more than $14 million. The Rozelle rule: Everyone makes money and everyone is happy.

Even the networks are happy because they too come out ahead. The negotiations for the "happy are we" contract are easy. As one network source quipped, "Rozelle tells us what he wants and we pay it, and we all make money."

That doesn't mean the networks will get off without some wincing at the bill. CBS will pay the most for its broadcast rights, probably because of its high ratings and schedule of National Football Conference games. The amount is estimated at $700 million to $750 million, or about 2½ times more than all three networks paid previously. ABC, with its prime-time package, is paying the least, several million less than the estimated $625 million to $650 million NBC will pay for its American Football Conference lineup.

Virtually the only debatable question, it seemed, was whether to add ABC to the Super Bowl rotation—previously held by the other networks. The agreement was to allow ABC to carry the Super Bowl once during the five-year contract, in 1985.

And where will all this money come from, you ask? Advertising, the networks answer. The way the system generally works is this: Instead of terrifying sponsors with sudden skyrocketing prices, the networks are creating a scale, asking advertisers to pay more each year. This will slowly edge the current $200,000 paid per minute for the regular season closer to this year's Super Bowl minute of $690,000. The Super Bowl, in the meantime, is expected to settle near the magic million mark early next year.

Advertisers are more than aware of the circumstances. "The money has to be passed on," says Jerry Solomon of D'Arcy-MacManus & Masius, New York, network buyer with Anheuser-Busch. "Two things happened. All three networks had a higher rights fee. And the NFL has granted each network an extra [preseason] game to sell, and within each game, they added an extra minute."

But this isn't an immediate cure, he says: "They have to charge more per unit. I don't think the networks are near a sellout position. They're all having problems. They may have a lot of revenue, but not as much as they need.

"I believe the networks in 1982 will have to generate $120 million more in new revenue to sell-out football as they did in '81."

But how far are advertisers willing to go in terms of dollars spent on commercials?

"As long as it's doing the job," says Mr. Solomon, "I imagine we [Anheuser-Busch] will continue to pay unless we can field another vehicle to achieve the same results."

But the NFL isn't the only football fish in the sea, at least not if the USFL proceeds as planned. ABC reportedly paid from $17 million to $24 million for a two-year contract with the new league, a gamble few feel was much of a risk.

"Football is football," Mr. Solomon says. "It's not really a gamble on ABC's part. It's not prime time and it's not preempting anything."

Moreover, the new league was sought by not one but two networks, pairing ABC and NBC in a bidding war. CBS was the only network sitting this one out, mostly because of its heavily committed spring basketball schedule.

The founders of the USFL seemed to be thinking tv when they announced franchise sites and season. The inaugural season in 1983 is scheduled from March 6 to July 10. And eight of the top 10 markets were included in the 12 franchise sites—New York, Boston, Philadelphia, Washington, Tampa, Chicago, Denver, San Francisco, Los Angeles, San Diego, Detroit and Birmingham, Ala.

The biggest test will be whether football will hold its attraction through the spring and how well the leagues will be managed by its founders. That hasn't seemed to discourage advertisers. In fact, Anheuser-Busch is eagerly waiting to invest.

"We have been looking for an advertising vehicle for that time of the year," Mr. Solomon says. "We're just waiting for ABC to come to us with a package."

If football has proved the most popular sport on tv, what about basketball and baseball?

Although basketball and baseball teams share revenues from network contracts, the similarities to football end there. Gate receipts make up more than half of the revenue picture, so if a team doesn't draw crowds, the franchise is in financial trouble. Trouble has been no stranger to pro basketball—specifically, the National Basketball Assn. This once-acclaimed sport of the 1970s is struggling for survival in the 1980s.

Commissioner Larry O'Brien said earlier this year that "the NBA is at a crossroads." The news, he said was good and bad. Although the NBA has "the finest athletes in the world playing a game that has nonstop action," he said, the financial picture "is a mixed bag." In fact, only five of the league's 23 teams finished in the black in the 1980-1981 season, while the total league lost $13 million.

There is some good news, however, to help the sagging NBA. It recently signed a four-year, $22 million contract with CBS. In 1981, CBS refused to carry the playoffs live because the series fell in the important May ratings sweeps period. To get the network to carry the games live this year, the NBA pushed its entire season back one week.

The championship series began the night after the ratings period ended; CBS obliged.

Also, game attendance has in

COMMENTARY CORNER

By Jack Craig

What's all the fan fare for?

The explosion of hard cash and high energy into the cable industry and sports is a reminder of television's commercial origins 35 years ago. Legend holds that NBC's primary motive then for producing tv shows was not so much to sell advertising as to help parent company RCA push sales of tv sets.

We shouldn't laugh at such absence of foresight because people were just as keen and incisive then as now. Similarly, it is altogether possible that the current attitude of sports franchises toward pay tv/pay cable is misdirected, too. A bonanza of cash may not be the end result.

Nonetheless, a recent example of that inclination to pay tv can be found in Boston. There, conventional judgment once ruled that pay cable should be restricted to covering home games while conventional tv should bring back road games. The rationale for the conventional approach is that the limited penetration of pay cable or pay tv for home games protects the live gate while far-flung exposure of road telecasts via conventional tv sustains fan interest. Sounds reasonable.

However, in Boston, that traditional approach is soon to be a thing of the past.

There, scheduled for spring, 1983, the combined Red Sox-Bruins pay cable plan will place all baseball and hockey games, Monday through Friday, on the pay channel and all weekend games on free tv. Game location will not be a factor.

Why the new formula? To eliminate confusion among fans about when a game is on free or pay tv. Fans in Boston unwilling to pay the monthly cable fee at least will know enough not to turn on the regular tv set during the week to see local sports action.

Yet there is still fundamental disagreement about how to market sports on pay cable and how profitable it actually will be. And the disagreement emphasizes how little empirical evidence there is to support any theory. But sports franchises continue to speculate and experiment.

One successful pairing of pay cable and sports became apparent last season with the National Basketball Assn.'s Seattle SuperSonics. They charged subscribers $120 for the entire schedule and made close to $1 million after paying production and other costs of $1.2 million. Onward and upward next season? Maybe, unless the first 17,000 fans were the easiest to sign on.

And in terms of really big money, there's the 15-year contract the New York Yankees are negotiating with Woodbury, N.Y.-based SportsChannel.

Reportedly, the Yankees would generate a whopping $100 million over a 15-year time span.

The contract calls for the Yankees to eventually shift all their games away from WPIX-TV, which is paying the Yankees $5 million this year, to SportsChannel.

This brings up a fundamental question: Should sports fans be asked to pay for what they have previously enjoyed for free? The issue is fast turning into a public relations problem for professional sports.

The Yankees-SportsChannel arrangement is a good example of this. A little history is in order. Last spring, the ballclub had a chance to form its own pay channel. It decided against it. Now, it has returned to SportsChannel on tiptoes. This spring, after it was agreed that 45 Yankee games would appear on the pay channel, there was not one press release sent out, nor one press conference called. Why not? Basically, the Yankees did not want fans to realize that although they would still have 100 free games on WPIX-TV during 1982, 45 games had been winnowed away, available for view only at a monthly fee.

There's the rub. The whole premise of pay cable or pay tv is that fans will pay to watch sports on tv.

Now this might make sense on the West Coast, where local tv coverage is limited because of the expensive line costs to the Midwest and East. But in those regions where a higher percentage of a team's games traditionally have been televised at no cost, it is unsubstantiated, and seems presumptuous, that these same fans, in sizable numbers, now will pay.

The manner in which the shifting from free to pay is being done in many cases might impede or even prevent the union of pay tv/cable and sports in a major way.

The ideal tie-in would be for teams to use cable to supplement conventional tv revenue, not replace it. How many franchises would or could accept a sizable cutback in existing tv revenue while waiting for the cable bonanza?

All of this optimism about cable enriching sports is natural enough, though. Just as there is no real evidence that it will happen, there is no real evidence that it won't. And just the possibility of its success increases the value of the franchises. AA

Jack Craig writes a column on televised sports for the Boston Globe *and the* Sporting News.

Joint Venture

Corporations are interested in selling products and services, increasing public awareness and enhancing their images.

Celebrities are interested in working with companies, being involved with quality products and services and enhancing their images.

ProServ puts the two together.

We specialize in managing sports and entertainment personalities, in packaging and presenting events, and in helping corporations determine the most efficient and effective ways to market their goods and services.

Our client list includes celebrities such as Arthur Ashe, Tracy Austin, Tai Babilonia, Tommy John, Joan Lunden, Moses Malone, and Hollis Stacy. We've worked with Xerox, IBM, E.F. Hutton, Volvo, Michelob Lite, and Dr. Pepper, to name a few.

ProServ Television markets exclusive worldwide broadcast rights to top sporting events and produces award-winning programs for cable networks.

Our offices are in Washington, New York, Dallas, Paris, Tokyo, Sydney, and Bologna.

If you're considering a joint venture, mail in the coupon below. We just might bring you one of the best partners your business has ever had.

Networks

(Continued from Page M-7)

creased after a 9% dip in 1980-1981. Cable also has made an impact, adding an estimated $5.5 million in revenues to the league.

Cable tv, particularly on a regional basis, has been the salvation for a number of teams. The Seattle SuperSonics last year offered their 82-game package for $120 per household on cable systems in the Pacific Northwest. The target was 12,000 subscribers to cover costs; by the end of the season, more than 17,000 had signed, with up to 25,000 expected for next season.

Major league baseball is somewhere between the NFL and NBA. As an industry, baseball is larger than basketball and smaller than football. It also fits the No. 2 position in popularity on tv.

But that doesn't mean the financial picture is any better. Baseball is in trouble, or so says commissioner Bowie Kuhn. Only nine of the 26 teams reported making money in 1980 (the strike last year discounts 1981). Seventeen clubs claimed total losses of about $40 million.

As Mr. Kuhn says: "It appears that we are well on our way toward the very considerable losses over the five-year period [from] 1980 through 1984 that I predicted last year. It is clear that our industry continues to operate in a precarious financial condition." Baseball fans' response to the commissioner, can, at times, be laced with sarcasm. As one reader wrote to one columnist: "This condition would never have happened if Bowie Kuhn were alive today."

Mr. Kuhn is definitely not a Pete Rozelle. In fact, the team owners recently met to offer a reconstruction proposal, which would merge the American and National Leagues. The 26 owners would operate as a board of directors with the commissioner in the role of chief executive officer. (Also, there is speculation that Mr. Kuhn may be losing his job as commissioner after baseball team owners meet soon to decide on the renewal of his contract.)

The owners are trying to act as one unit, with the primary goal to solidify the finances of the clubs. More questions will arise next year when the current $94 million contract with ABC-TV, NBC-TV, CBS Radio and USA Cable expires. At the moment, each team receives about $2 million each from the network package. But the secret to baseball's survival may be on the local level with cable franchises.

The leader of this crusade is the Atlanta Braves, with access to owner Ted Turner's broadcast empire, Turner Broadcasting System. In addition, the Philadelphia Phillies, New York Yankees, Montreal Expos and Chicago White Sox have local cable contracts that promise success.

Professional sports can barely exist without tv. Hockey and soccer remain minor sports because of the lack of network tv contracts. League leaders interested in success should follow in the footsteps of Pete Rozelle, who proved $2 billion is not an ugly word. AA

100 Leaders spend 14% more in 1981

Campbell Soup Co.

Visibility is key, $14.8 billion in ad spending shows

By Marion Elmquist

In an economy where corporate bottom lines are hard-hit the decision makers among ADVERTISING AGE's 100 Leading National Advertisers chose to keep their identities and products visible by raising advertising expenditures 14%, to an estimated $14.8 billion in 1981. In 1980, the 100 Leaders spent an estimated $13 billion in national advertising.

Procter & Gamble, the perennial No. 1 advertiser, held on to its title although Sears, Roebuck & Co. made its annual challenge to the advertising king.

Procter & Gamble first wrested the No. 1 position in ADVERTISING AGE's 1964 Leaders report, when its spending for 1963 toppled General Motors Corp. from the top spot. The automobile marketer had held the top spot since AA began ranking Leading National Advertisers in 1956.

P&G spent an estimated $671.8 million in advertising and promotion in 1981, a modest 3.4% increase over the $649.6 million spent in 1980.

Sears boosted its spending to $544.1 million, 16% more than it spent in 1980. (Local newspaper advertising is not included in AA's estimate for that retail giant or the other major retailers on the 100 list; however, nationally generated preprint newspaper inserts are. Sears' ad spending figure for 1980, as a result, has been adjusted accordingly from last year's report.)

Merger mania has afflicted the 100 Leaders, with no fewer than 10 of the companies making major acquisitions. The combined advertising spending resulting from the marriage of R.J. Reynolds Industries and Heublein Inc. will undoubtedly propel RJR to the No. 3 position, this year held by General Foods. It is estimated that the combined ad spending of the two companies will exceed $500 million in 1983.

Other companies whose advertising spending are skyrocketing as a result of mergers or acquisitions are General Foods, which bought Oscar Mayer & Co.; Jeffrey Martin Inc. (new to the Leaders in last year's report), which has bought a number of Purex brands; Coca-Cola Co., which acquired Columbia Pictures and P&G, which picked off MortonNorwich Products' Norwich-Eaton Pharmaceuticals. Other acquisitions are: Clorox Co., Olympic stains; Sears, Dean Witter Reynolds and Coldwell Banker; Esmark Inc., Jhirmack; Beatrice Foods Co., Buckingham Corp. and a number of Coca-Cola bottlers; Chesebrough-Pond's, Prince Mfg., and Campbell Soup, Mrs. Paul's Seafoods.

On the other hand, Stroh Brewery Co.'s purchase of Jos. Schlitz Brewing Co. may

HELP
How simple life would be if help were just a push-button away.
It is. On some of IBM's newest computers and office systems.
It's called a HELP button and it's just one of the ways we're making our machines easier to learn and easier to use.
Push it, and our machine will explain itself, flashing easy-to-follow messages on the display screen. It will tell you what other buttons on the keyboard mean, what they do, and how to use them. Instantly.
It's like taking instruction manuals off the shelf and putting them at your fingertip. To teach a beginner. Or refresh the memory of an old pro.
Of course, some people may never need any help.
But it's nice to know it's just a push-button away.

**AA estimate

Advertising expenditures for American Airlines, Dallas/Fort Worth Airport, the nation's 89th largest advertiser, increased to $51.5 million in 1981, up from the previous year's $46.3 million. The 11.2% increase is partially due to the growing intensity of the major domestic air carriers' battle for passengers and sorely needed revenue.

The airlines' total measured advertising in 1981 was $45 million, compared with $42.1 million 1980.

American recorded its first $4 billion revenue year in 1981 and had net income of $47.4 million. While the airline was able to make a profit in 1981, compared to a $75.8 million net loss in 1980, American suffered a first quarter 1982 loss of $41.6 million. The first quarter 1982 loss followed a fourth quarter 1981 loss of $20.3 million.

American's executives attribute the first-quarter loss to the discount fare war the airline waged with crosstown rival, the now-bankrupt Braniff Airways. When Braniff officials announced in November that they were cutting their systemwide fares by at least 45%, American wasted little time in matching the move made by its main competitor at the Dallas/Fort Worth Regional Airport.

While American's strategy to almost duplicate ailing Braniff's route structure paid off in increased passenger traffic, the adamant stance taken on matching Braniff's fares dealt a severe blow to American's bottom line. In its last days, Braniff was struggling to trim down to what its management referred to as "flighting weight" and find its niche in the marketplace as a medium-size trunk carrier; American was aggressively expanding its operations. American employed more than three times the number of employes than Braniff had on its payroll before its May 13 bankruptcy filing, and offered service to almost twice as many cities. Consequently, American executives estimated the airline was losing $12 million a month at the peak of the battle.

In an effort to cut losses, American's employes were asked to accept a pay reduction effective for the first quarter of the year. While the airline's nonunion employes voted in favor of the proposal, American's union leaders refused to submit the plan to a membership vote. The airline's executives withdrew the proposal. In order to finance new aircraft and maintain its

Advertising's hot one hundred

competitive posture in the industry, American officials say they must achieve an operating margin of 5%. The airline's profit margin was 0.3% in 1980 and climbed to 4.3% in 1981. Because of losses suffered in late 1981 and early this year. American officials fell short of the desired margin once again this year.

As a result, in February, the airline discontinued plans to purchase 15 Boeing 757 airplanes valued at $600 million and defer the delivery of Boeing 767 jets scheduled to arrive beginning in September.

American chairman Albert V. Casey attributed the move to the eroding effect caused by the excessive discount fares and the inability to obtain labor productivity improvements.

While Braniff's bankruptcy is a positive factor for American, the airline was not left alone to fill the void. American's top rival nationwide, United Airlines, landed its first flight at the Dallas/Fort Worth Airport only two days after Braniff was grounded. Chicago-based Midway Airlines moved in, followed by Northwest Airlines. Airlines already serving the Dallas Fort/Worth Airport, including Delta, Pan Am and TWA, raced for a piece of the action by increasing their service, and in several cases, discount fares, not as severe as Braniff's, remained popular in the market.

In June, American announced it would leave its advertising agency of 20 years, Doyle Dane Bernbach, and hire smaller, Bozell & Jacobs, which has a Dallas office. The major factor contributing to the switching of the $45 million a year account was the heavy strain that developed on the working relationship with Doyle Dane after American moved its corporate headquarters from New York to the Dallas area in 1979. American officials asked Doyle Dane to set up shop in Dallas, but the agency declined, citing the difficulty in providing the same quality out of Dallas as it could offer out of New York.

27th annual study

Presented here is ADVERTISING AGE'S 27th annual collection of facts and figures about the marketing operations of the nation's advertising giants—what they spend on advertising, how they're doing in sales and profits, how their leading product lines and brands rank nationally, what share of the market they hold—and many other vital details. The profiles include listings of each company's marketing executives, the agency lineup and a rundown of account personnel serving the various product lines. Much of the material has never been published before, including estimates of total advertising and promotion expenditures for the 100 advertisers covered, and sales figures for privately owned companies.

**AA estimate

American Brands, New York, the 66th largest national advertiser, spent an estimated $82.2 million on advertising in 1981, a 3.9% decrease from the previous year.

The company's net sales record of 1980 went up in smoke as sales dropped from $6.8 billion to $6.5 billion. This 4.4% decrease is mainly caused by lower foreign currency exchange rates experienced by the company's United Kingdom subsidiary, Gallaher Limited.

Net income reached $386.1 million in 1981, a record level. Operating income was $783.5 million, up $22.5 million from 1980. Operating income for American Brands has swelled 35% since the tobacco producing company began diversifying in 1965. International tobacco as well as nontobacco lines presently account for 60% or more of the company's total operating income.

American Brands reported sales of $3.21 billion for the first six months of 1982, a 0.3% drop from the same period in 1981. Net income for the first half was $184 million, down 6% from $196 million for the same period in 1981.

But American Brands' operating earnings jumped 18% from first half 1981's $284.9 million to $336 million.

Domestic tobacco operating income rose to $302.2 million in 1981, up 3% from the previous year. This increase is partially due to the closing of American Brands' 50-year-old plant in Richmond, Va. Production was transferred to its Reidsville, N.C., facility, where high-speed equipment was installed.

Cigaret output fell from 66.63 billion units for the domestic market in 1980 to 61.64 billion in 1981. The company's share of the domestic market also fell, from 10.8% in 1980 to 9.7%

Of American Brands' five major cigaret products only Pall Mall is among the top 10 sellers. Pall Mall's sales, however, dropped from 31.69 billion units in 1980 to 25.59 billion in 1981. As a result, the brand moved down from the fifth-largest seller to ninth in 1981. Pall Mall's market share dropped to 4.7% from 1980's 5.1%, despite measured spending of $7.4 million. The bulk of that ad spending was concentrated on Pall Mall Light 100s, according to Leading National Advertisers. Despite spending of $7.4 million on the product, sales slipped from 1.16 billion units in 1980 to 0.63 billion in 1981.

Total sales of Carlton filter cigarets were down 13.1% in 1981, reducing its market share from 2.6% to 2.2%. However, Carlton is still the No. 1 ultra-low-tar cigaret, with 24% of that category. Carlton box, with less than 0.01mg. of tar, suffered a sales decline from 0.35 billion units in 1980 to 0.07 billion in 1981. American Brands has expanded the Carlton line to eight styles with the addition of Carlton 120s regular and menthol.

Tareyton consumers may well have decided to switch rather than fight, as sales dropped from 10.77 billion units in 1980 to 9.13 billion in 1981—a 15.2% decrease. Tareyton's market share dropped to 1.4% in 1981. The company is focusing the bulk of ad spending on Tareyton Lights filter cigarets, spending $7.7 million on combined magazine and outdoor pitches.

Lucky Strike, together with Pall Mall, continues to dominate the nonfilter market with a combined 58% share. Lucky filters, however, have dropped in sales from 0.14 billion units to 0.11 billion in 1981, making its total market share negligible. Rollout of Lucky Strike low tar filters began in the fourth quarter of 1981, backed by print and outdoor ads using the theme, "Lucky Strikes Again. The moment is right for it." Ad spending in that quarter was $94,800.

American Brands holds fifth place in the low-tar segment behind R.J. Reynolds, Philip Morris, Lorillard and Brown & Williamson. The company holds a 4.2% market share, down 4.9% in 1980. Low-tar sales fell one billion units to 10.78 in 1981, and ultralow from 17.31 billion in 1980 to 14.81 billion.

The company's cigaret output for the export market remained stable at 1.30 billion units in 1981. Gallaher Ltd., American Brands' U.K. subsidiary, reported a sales increase of 5%, and a record operating income. However, due to lower exchange rates for the depressed British

pound, operating income in dollars lowered 11% to $167.8 million, and sales dragged down to $3.89 billion, a 9% decrease from the previous year.

A 30% excise tax increase failed to deter Gallaher's Home Trade cigaret business, which gained one million in pounds. The company held 29% of the U.K. cigaret market, and its product, Benson & Hedges Special Filter, remained the top-selling brand, and Silk Cut as the leading low-tar brand. Filter cigarets hold 93.5% of unit sales in the UK, and Gallaher's filter cigarets hold 90% of the total unit sales. In 1981, Gallaher introduced Sobranie Virginia Blend, a premium price cigaret; Silk Cut Extra Mild, a low-tar cigaret; and Berkeley Extra Mild King Size.

Berkeley may be threatened by the pending introduction of British American Tobacco's product Barclay, in limited distribution in the United Kingdom as of December, 1981. Since the British pronunciation of "Barclay" is perilously close to Berkeley, American Brands will fight the distribution should it go full scale. Said an American Brands spokesman, "We wouldn't want to see them confused."

The tobacco industry may be hard hit in the U.K. in the coming years. Tobacco companies have agreed with U.K. health ministers to follow new guidelines that may restrict the cigaret trade severely. Advertisements for products with 20 mg. of tar will be discontinued, and poster ad spending is to be significantly decreased. Ad spending for products with 17 mg. of tar or less, including Benson & Hedges and Silk Cut, is to be emphasized. The U.K. will also require warning labels on cigaret packs and advertisements.

American Brands, as well as four other major U.S. tobacco producers last year were fined $100,000 by the Federal Trade Commission in connection with health warnings on billboard advertisements. The commission had charged that health warnings were in undersize type of two inches instead of five. The companies also agreed to string the warning out along the bottom of the ads, rather than picture it on the cigaret box.

American Cigar, the fourth-largest cigar company, experienced a 1.2% decrease in the market share of little cigars in 1981. Antonio y Cleopatra, which accounts for 63% of the division's cigar sales, dropped from 2.5% of the little cigar market in 1979 to 2.1% in 1980.

In the large cigar market, American Cigar commanded a 7.5% share in 1980, as compared with 7.3% in 1981. Total unit sales dropped to 288 million units from 295 million in 1980. Antonio y Cleopatra's sales rose from 180 million units in 1979 to 181 million the following year. Roi-Tan and La Corona's sales decreased slightly, yet American Cigar's market share for large cigars rose 0.2%. Operating income for the division rose 11% to $3.7 million and sales reached $39.7 million.

In 1981, Russell P. Truitt was appointed vp-tobacco. Mr. Truitt continues as executive vp of the American Tobacco division as well as director on American Brands' board.

In March, 1982, the company sold its Duffy-Mott subsidiary, a fruit juice producer holding 11% of the apple juice market, to Cadbury Schweppes for $60 million in cash and a note. Duffy-Mott's operating income for 1981 was a record $8 million on sales of $110.2 million.

Sales climbed 8% in 1981, mostly due to the popularity of Mott's apple juice. Ad spending was pared down to $70,200 in 1981. American Brands called the sale of the subsidiary, acquired by AB in 1968, for $34 million, a "redeployment of assets" in a nongrowth area. Cadbury Schweppes, a British confectionery and soft drinks concern, picked the apple juice market to augment its already successful line of lime juice.

The company did see a growth area in Ofrex Group Ltd., which Gallaher Ltd. acquired in 1981 for $70.2 million. An office products marketer in the U.K., Ofrex will give the company more access to overseas markets.

The company's overseas market is already assured with Jim Beam, which, distributed in 150 foreign markets, is the world's largest-selling bourbon. Beam is also the top-selling domestic bourbon and the fifth-largest liquor brand in the industry.

Countering an industry slump, case sales of Jim Beam shot up 5% from 1980. With measured spending of $2.7 million, case sales rose from 3.5 million to 3.7 million.

Beam's 8-Star blended whisky, introduced in 1981, is enjoying success. Other non-bourbon product sales escalated 39% to $38.2 million. The company also is responding to the liqueur market rise with a new entry, Kamora, a coffee liqueur.

The distiller began a new marketing drive by sponsoring the Jim Beam Spiral Stakes, a thoroughbred racing event. The race, held in March of 1982 at Latonia Race Course in Kentucky, offered a purse of $150,000. The company also ran sweepstakes ads in *Playboy* for a trip to England to the Royal Scot race, and a trip to the Kentucky Derby. Riding high on spirited sales of $241.8 million, James B. Beam Distilling Co. had operating income of $32.5 million, up 16% from 1980.

Andrew Jergens Co.'s sales rose 22% to $119.6 million in 1981. The introduction of new products—Jergens lotion-enriched soap and Jergens aloe and lanolin skin conditioning lotion—accounted for record ad expenditures and couponing. American Brands also invested $2.3 million on media advertising for Gentle Touch soap, $2.7 million for Jergens soap, and $2.1 million on Jergens lotion.

New products introduced over

Where Ad Age got its data

Advertising figures listed for each of the 100 leaders include "measured media" expenditures published by various statistical bureaus and associations. These include Leading National Advertisers Inc., the Publishers Information Bureau, Radio Expenditures Reports, Agricultural Marketing Information Service (Agricom), LNA-Broadcast Advertisers Reports, Media Records, Institute of Outdoor Advertising and the Outdoor Advertising Assn. of America.

In the eight media so measured, the 100 leaders dominate, accounting for just over half ($9.5 billion) of all the advertising dollars invested there (*see charts on Pages 130 and 131*).

In addition to the measured media figures, "unmeasured media" spending is added to get a grand total for each of the 100 companies.

These unmeasured expenditures include point-of-purchase, direct mail, premiums and other forms of national advertising and sales promotion. All estimated expenditures are calculated by Advertising Age.

Measured media figures generally include gross space and time costs only, while production and talent costs are included in unmeasured expenditures. Exceptions are the network tv figures, which include net time and talent.

Advertising Age would like to make it clear that the selection of the "100 leading national advertisers" was based on measured media expenditures only. Final ranking, however, is based on the combined total of measured and unmeasured spending.

If other criteria were used, other advertisers not now on the list would need to be included. Among such advertisers would be those who spend many millions annually in local advertising, which is not measured, and who spend relatively little in national advertising. Such companies include many of the large retailers.

Because there are not yet reliable measurements of money spent in national cable television advertising, cable advertising is not included in our ad expenditures totals.

Several profiles, however, contain references to what these companies' are doing to enter the cable advertising arena. We hope next year to include cable tv advertising as a category in our measured media calculations.

Other staff

This special issue was edited and produced by the members of the Advertising Age Magazine staff.

Company profiles were written by Advertising Age reporters listed on the masthead at the left, Magazine staff members, and various free lance writers.

Members of the Magazine staff are:

- **Marion Elmquist,** editor.
- **Mark Watanabe,** managing editor;
- **Geoffrey Shives,** art director.
- **Cecelia Reed,** associate editor.
- **Nancy Scrivner Tiffen,** associate editor.
- **Reven Uihlein,** associate editor.
- **Kristin Blom,** assistant editor.
- **Karen Brodsky,** copy chief.
- **Pat Thomas,** production editor.
- **Sarah Stiansen,** a summer intern, worked on over-all coordination of this issue.

the last five years accounted for 35% of domestic net sales. Operating income for 1981 was up 14% to a record $9.5 million; the international division's sales rose to $7.6 million, up 11%.

Sunshine Biscuits is "tasting the difference" in a sales rise of 9% to $405.7 million. Operating income soared, reaching $26.4 million, up 25% from 1980's level.

The biscuit division, with a new advertising theme emphasizing the use of 100% vegetable shortening, experienced the largest gains.

New products introduced in 1981 included Snack n' Sesame, Swisstyle Grahams, Cafe Crackers, Snack n' Onion, Chocolate Sugar Wafers and Chipples, a potato chip snack.

Sunshine's ad expenditures were estimated to be in excess of $2 million. According to Leading National Advertisers, spending in six measured media reached $700,000. In 1981, Sunshine eliminated spot tv from its media list.

Franklin Life Insurance Co., acquired by American Brands in 1979, posted revenues of $502.3 million in 1981, a 6% increase. Operating income was up 14% to $134.2 million.

For Master Lock Co., the world's largest padlock manufacturer, sales picked up 9% to $86.9 million. Operating income, at $29.6 million, was up 10% over 1980.

Advertising for home Master Locks was $611,900, in magazines and network tv.

Swingline Inc.'s sales and operating income rebounded in 1981 to $97 million and $12 million, respectively. The Swingline division, which accounted for 68% of dollar volume, began an aggressive product development program in 1981.

Acushnet Co.'s sales hit a record $131.8 million in 1981. Operating income was $18.6 million, up 16%.

New entries, the Power-Step golf club shaft and Mallet I Bulls Eye putter, contributed to a 19% sales increase for the Titleist Golf Division.

MCM Products, a spin-off from Swingline, had sales of $78.4 million in 1981, and operating income of $6.3 million. W.R. Case & Sons Cutlery Co.'s sales were sliced to $27.1 million, a 9% decline from 1980, despite ad spending of $58,300 on Case Hunting Knives. Marson Corp. Marvel Lighting and Swingline of Canada's sales also gained in 1981.

Acme Visible Records' sales dropped 6% to $60.5 million in 1981. Domestic sales decreased 2% to $38.96 million, and operating income plunged 51%. The subsidiary is introducing a new line of terminal stands, modular cabinets and transport carts to step up sales.

Only Gift-Pax sampling "brands" them FIRST...

SELECTIVE SAMPLING TO YOUR MAJOR MARKETS

There is product sampling. And then there is *selective* product sampling. Which is where GIFT-PAX comes roaring through.

Take the way GIFT-PAX is distributed. First, each GIFT-PAX is *personally* presented by a sponsoring institution. Second, it's presented at the right *psychological moment,* just when prospective users are entering the market.

By hospitals to New Mothers. By marriage bureaus to Newlyweds. By the school to College, High School, and now Junior High School students as well. By hospitals and the Red Cross in expectant mother classes and clinics.

There's never been a more efficient way of placing your product in the hands of prime prospects. And when you add GIFT-PAX product exclusivity and geographical selectivity, you have all the ingredients for a sampling program that builds volume and profit.

For over thirty years, GIFT-PAX has shared in creating "brand successes" for many of America's leading marketers. Some were new products; others were established brands. But in every case, selective sampling scored high in converting triers to users.

How do you get started with your brand? Just drop us a line on your letterhead, or call collect anytime. When you get in touch with GIFT-PAX, you're getting in touch with your market in a very special way.

*The **First** Name in Selective Sampling for 34 Years.*

American Broadcasting Cos.

	1981	1980
Sales.....	$2,443,713,000	$2,280,380,000
Earnings.....	146,313,000	146,304,000
Advertising*.	40,000,000	46,764,800

*AA estimate

American Broadcasting Cos., New York, the 99th largest national advertiser reduced its advertising budget 14.5% to an estimated $40 million in 1981.

Not surprisingly, the ABC Television Network was the top corporate spender with most of its advertising concentrated in magazines. But, its measured media spending of $12 million was nearly 25% below 1980. Also, the network also spent $3 million in the promotion of its "Movie of the Week."

The company's other big spender was ABC Radio, comprised of six radio networks and 13 am and fm stations. ABC Radio spent $6.1 million in measured media, nearly all of it on spot tv. Among others, ABC cable programing spent $175,700 and WABC-TV, a network-owned station, spent $376,400 in measured media.

ABC reported record revenues of $2.4 billion for 1981, an increase of nearly 7% over 1980 revenues of $2.3 billion. However, net earnings of $146.3 million in 1981 were approximately equal to 1980 earnings.

The company reports that uncertainty in the advertising marketplace affected all of its principle operating units, especially in the first half of 1981. Other negative influences on included write-downs of certain publishing assets and the disruption of network programing and sales efforts by the previous year's actors' strike.

In 1981, ABC's broadcasting operations had revenues of $2.1 billion and net earnings of $316.1 million. Both revenues and earnings registered increases over 1980. In fact, broadcasting accounted for 86% of the company's revenue increases in 1981.

As usual, the ABC Television network was broadcasting's primary revenue source but the unit was plagued by increased costs in entertainment as well as

100 Leaders' advertising as a per cent of sales

news programing. According to the company, the late start of the 1981 new fall season—approximately three weeks late due to the 1981 Writers Guild of America strike—and the residual effects of that strike caused a sharp increase in prime time program costs. At the same time, news programing costs also soared due to the expansion of the news division and coverage of special events. The special coverage included the attempted assassinations of Ronald Reagan and Pope John Paul II, the Royal Wedding, the death of Anwar Sadat and the flight of the space shuttle.

ABC-owned tv stations also had increased revenues for 1981, but the increases were moderated by cost increases. As a result, the stations registered a second year of earnings decline. Many of the tv stations expanded their news coverage during the day and evening, adding significantly to their costs. WABC-TV in New York introduced "The Five O'Clock Eyewitness News," while WLS-TV in Chicago began "Eyewitness News Tonight" at 10 p.m. In Los Angeles, KABC-TV expanded "Eye on L.A.," a magazine-format series, from three to four nights weekly. All five stations led in ratings in their five markets from sign-on to sign-off.

Even though ABC Publishing also showed revenue increases for 1981, its earnings dropped drastically. In 1981 earnings of $4.4 million were down 71% from 1980.

The increase in revenues earned by the magazines, including *Los Angeles*, *High Fidelity* and *Modern Photography*, increased book sales and the inclusion of revenues from the newly acquired Ames Publishing Co. The losses came from write-downs of the assets of the company's R.L. White Co.

ABC's other operations consist of ABC Video Enterprises, ABC Motion Pictures, ABC Entertainment Center in Los Angeles and three nature-oriented parks in Florida. The combined revenues of these operations were $32.4 million in 1981. However, the extensive investments in the start-up and development of the video and motion pictures segment offset the revenue gains and the units showed an earnings loss of $10.6 million.

ABC underwent a year of transition in 1981. While continuing to dominate in the area of broadcasting, it made a major decision to diversify into the new communications technologies as well as motion picture production. ABC and Westinghouse continued to develop their all-news cable service launched in the spring of 1982. It also joined with Getty Oil's Entertainment & Sports Programming Network (ESPN) to develop a pay sports network. And, with the Warner Amex Satellite Entertainment Co. it launched the Alpha Repertory Television Service (ARTS), an all-arts cable network, now programed by Hearst/ABC Video Services.

Based on the averages for all 90 shows broadcast during the 18 weeks that ended on Feb. 7 this year, ABC and CBS tied at a 13.9 rating among women 18 to 49. Among men 18 to 49, ABC's 13.6 easily beat CBS' 11. ABC also topped CBS, 14.1 to 12.4, in viewing by men 25 to 54.

Published research about the November, 1981, sweeps also showed that ABC affiliates, as in the past, emerged as the top

We lifted the spirits of a total community,

excited thousands of premium beer lovers,

and smoothed out coffee all over America.

The richness of coffee. The smoothness of Coffee Rich.

Coffee Rich. Its smooth creaminess has made it America's leading frozen non-dairy creamer. It makes coffee more mellow, yet doesn't hide its hearty taste. Coffee Rich costs less than cream. But it's just as versatile. Delicious on cereal or fruit. And it stays fresh 3 weeks in the refrigerator.

Free Recipes. Enjoy the convenience of Coffee Rich in cooking and baking, too. For your free booklet, send a self-addressed, stamped business size envelope to Cooking with Coffee Rich, PO Box 117, Buffalo, New York 14240.

Coffee Rich. The cream of the non-dairy creamers.

Buffalo. The home of over a million positive thinkers. A city "Talking Proud" about its assets, growth, and the organization that brought the city's pride out into the open.

Healy-Schutte & Comstock, a big-city thinking agency located out of the big-city rat race. An agency with style, strategic planning services and polished, hard-working creative.

In addition, our costs are reflective of the area in which we work, so the bottom line is better. Healy-Schutte & Comstock does a Class A job without the Class A cost.

Healy-Schutte & Comstock. Talking Proud for a lot of good reasons. Why not let our Chief Executive Officer, Alden Schutte, show you some of our other award winners. (716) 884-2120.

HEALY-SCHUTTE & COMSTOCK
564 Franklin Street, Buffalo, New York 14202

YOUR NEW PRODUCT.

You have great hopes, but do you have great creative?

You know you need great creative.
To go with your great marketing.
How can you make sure you'll have it?
Give us a call.

We specialize in doing great creative work for new products. From name generation and concept development to outstanding finished commercials.

We know that nothing needs great creative work more than a new product.

Most of our regular clients are new-product marketing people at some of America's largest advertisers. Yet we're a small, personal creative service.

To find out more about us, call me, Tom Attea, at (212) 371-5588.

With marketing like yours and creative like ours, you'll have the best chance of having something better than great hopes:

A great success.

THE TOM ATTEA COMPANY, INC.
220 EAST 65TH STREET, NEW YORK, NEW YORK 10021
Nothing needs great creative work more than a new product.

draw among the key 18-to-49-year-old viewer in major urban centers. ABC stations were the demographic leaders in all of the top 10 markets, with CBS breaking ABC's stranglehold in markets 17 and 18, St. Louis and Tampa/St. Petersburg. In terms of the top 10 stations in the top 50 markets, WBRC, Birmingham, Ala., an ABC affiliate, was the biggest draw among women 18 to 49, notching an average 54 share.

"Good Morning America," hosted by David Hartman, held a substantial ratings edge over NBC's "Today" and the revamped "Morning" on CBS. Later during the day the network attracted the majority of soap addicts with its legendary "General Hospital," "All My Children," "One Life to Live" and "Ryan's Hope." These shows were among the top-rated programs in daytime television and helped increase ABC's lead over its competitors for the fourth consecutive year.

The network's Afterschool Specials scheduled 15 shows for 1981-1982, many on controversial and provocative topics. In 1981, programs included "The Wave," a chilling recounting of a history teacher's classroom demonstration of fascism, and "Don't Hit Me, Mom," dealing with child abuse.

ABC's prime time programing continued with its mix of successful series drama, blockbuster films, made-for-tv movies and program specials. The successful series drama included veterans such as "Happy Days," "Laverne and Shirley," "Three's Company" and "Too Close for Comfort" as well as the newcomers such as "The Fall Guy." At the same time audiences continued to be loyal to "The Love Boat" and "Fantasy Island." The motion picture segment featured

some of the biggest films of recent years: "Superman," "Close Encounters of the Third Kind," "Grease," "The Goodbye Girl," "Moonraker," "Slap Shot" and "Airport '79-The Concorde," while "Jacqueline Bouvier Kennedy," "Sizzle" and "A Long Way Home" highlighted the made-for-tv list of movies.

But ABC's most marked success was in the area of newsprograming. "World News Tonight," with its unique three-anchor format, nibbled away at the network news ratings led by CBS. In several weeks, "World News Tonight" finished ahead of the others in the Nielsens. Later on in the evening, "Nightline" was expanded to a half-hour format. On Sundays, ABC expanded its "Issues and Answers" to the one hour "This week With David Brinkley." Anchored by David Brinkley, this public affairs program not only deals with interviews of people in the news but provides extensive news analyses through some of the country's major media and electronic journalists.

The telecast of the World Series helped cap a fine year for ABC. For the six Los Angeles Dodgers/New York Yankees games—four in prime time and two in the afternoon—ABC averaged a 30.0 rating and a 49 share. For the entire series, ABC estimated that 130 million people had watched all or part of the games.

This year ABC plans to spend nearly $24 million for the rights to its baseball programing, a package that includes Monday night games, the All-Star game and the championship play-offs. ABC charged $150,000 per 30-seconds for its prime time All-Star game July 13. The rate was $15,000 more than NBC sought last season, and $40,000 higher than the 1980 rate.

However, 1981 saw more than the dominance of ABC in tv, it saw the company move boldly into the new communications technologies. In April, ABC launched ARTS, the cultural program service that marked the network's first entry into the cable programing field.

ARTS provided programs in the areas of drama, music, opera, dance, painting, sculpture and literature to over 7 million homes. Hearst/ABC Video Services estimates that ARTS has been drawing an average rating of 1 to 1.5 in the homes it reaches, for an average hourly audience of about 600,000. Since the announcement of ARTS' much vaunted Mobil Showcase programing on various arts, General Motors, AT&T, Ford Motor Co., Chevrolet Motor Division, Eastman Kodak, Exxon, Mobil Oil, Polaroid and Atari have come on board.

ARTS began as an independent ABC venture and slowly evolved into a joint presentation of Hearst/ABC Video Services carried on Warner-Amex Satellite Entertainment Co.'s Nickelodeon Channel. It has not been the only Hearst and ABC joint venture. Also in the works has been "Daytime," a women's cable service that was finally launched in March.

The content of "Daytime" is original programing that deals with three areas: Self, home and family. The subjects covered include fashion, careers, homemaking, finance and interpersonal relationships. The four-hour weekday format of "Daytime" is advertiser-supported and distributed on SATCOM III-R. For advertising, "Daytime" has been making a pitch for three-to-five minute "infomercials" and traditional 60 and 30-second spots. It has targeted for one "infomercial" per hour and a combination six additional 60-second spots for a total of nine to eleven minutes of advertising time per hour.

ABC also joined forces with Westinghouse to form Satellite News Channels, a joint venture to produce two 24-hour advertiser-supported cable news networks. SNC offers cable system operators one-time-only signing and launch bonuses totaling 75 cents per subscriber for carrying the service, as well as 10 cents per subscriber annually for a co-op advertising fund.

Even though the two news services put SNC in direct competition with Ted Turner's Cable News Network, SNC executives insist that their service will be markedly different. According to them, SNC will provide subscribers an up-to-the-minute briefing on the top news stories of the moment, plus other important information—all in a relatively short period of time—18 minutes.

SNC was launched on June 21, and beamed to nearly 2.6 million subscribers via Westar IV. There were 12 charter advertisers: Ace Hardware, American Fur Industry, American Motors Corp., Charles Schwab, Corvo Wines, Chrysler Corp., Ford Motor Co., General Motors' Chevrolet division, Kraft Inc., Olympic Stain, Radio Shack and United Van Lines. ABC and Group W Satellite Communications estimate that SNC will have 10 million subscribers by the end of 1983.

SNC has also developed a series of reciprocal advertising arrangements with a number of cable services, including Black Entertainment Television, ESPN and the USA Network.

At the National Cable Television Assn. convention this year, ABC announced two more communications technologies ventures. The first, Home View Network, will use ABC's broadcast distribution system to transmit overnight a four-hour, five- to six-day service of movies and other special programs to subscribers. The signal will be recorded on special home videocassette recorders for playback at a future time. The signal, which will be sent in scrambled form, can only be decoded by a special unit to be supplied by Sony according to ABC specification. The new network will be launched in 1983 through the network's five owned-and-operated stations and participating affiliated stations. ABC estimates that if it captures 20% of the VCR market in 1985 estimated at 10 to 12 million units, it will have a yearly revenue stream of $480 million.

The other venture brings ABC Video Enterprises together with Cox Cable Communications in developing one and two-way interactive cable technology, as well as transactional services and videogames. Even though the nature of the joint venture wasn't clearly specified, ABC plainly wants a piece of the software industry that INDAX is capable of providing.

Hand in hand with these ventures, ABC also plans a sports pay cable television service—a joint venture with Getty Oil's ESPN—to offer major sports events on a pay subscription basis. The venture has been stalled since its announcement last September because of technical glitches.

With this large-scale move into cable and pay-tv, ABC is also looking toward increasing its motion picture production capabilities. It has established ABC Motion Pictures for the production of movies for theatrical distribution. The division began production on "Young Doctors in Love," a satirical movie released this summer.

Other films set for a 1982 production are "National Lampoon's Class Reunion" and Mike Nichols' "Chain Reaction," starring Meryl Streep.

While video was positioning itself for the expanded marketplace, radio was repositioning itself for the rapidly evolving radio environment and emerging technologies, principally satellite distribution. The company established a Radio Enterprises unit to produce and develop new programing and business opportunities. The unit is producing ABC TALKRADIO for the ABC Radio Networks, which have also expanded their operations from four to six full-service networks in the past year.

ABC also acquired Watermark Inc., a major syndicator of radio shows, and the company is a subsidiary of ABC Radio Enterprises. Watermark's "American Top 40," radio's most widely syndicated weekly series, now airs exclusively on ABC's Contemporary Radio Network.

The ABC Owned Radio Stations continued to increase audience delivery and in several markets have moved to answer demands for more informational programing. WABC in New York has adopted a news and talk format, patterned after the successful KABC, Los Angeles, move in the early 1960s designed by Ben Hoberman. Mr. Hoberman, vice-president and general manager of KABC then, is now president of ABC Radio.

On the personnel front, there were a number of changes. John C. Severino was named president of ABC Television, Robert G. Burton was named president of ABC Publishing, and Herbert A. Granath was named president of ABC Video Enterprises. Other appointments included that of Mark Cohen, senior vp, ABC Television, to the additional post of corporate vp and that of David Johnson to the post of vp, strategic planning, ABC, Inc.

Earnings	197,054,000	159,195,000
Advertising*	138,000,000	125,000,000

*AA estimate

American Cyanamid Co., Wayne, N.J., increased its ad spending 10.4% in 1981 to an estimated $138 million, to become the 44th largest U.S. advertiser.

Worldwide sales for American Cyanamid and its subsidiaries increased 5.6% to $3.65 billion in 1981, a slight increase from 1980's record $3.45 billion sales. Net earnings inceased to $197 million, up 23.8% from $159.2 million in 1980.

American Cyanamid's second-quarter 1982 earnings dropped a whopping 42% to $28 million from $48.4 million in the same 1981 period. Earnings for the second quarter were down as a result of the company's withdrawal from certain pigments and rubber chemicals businesses. James G. Affleck, Cyanamid chairman-chief executive officer, said the sales and earnings drops stemmed from severe recessions in many of the company's key markets and the continuing strength of the dollar against foreign currencies.

For the first six months of this year, Cyanamid earnings were $66 million, down 32% from the same period last year. Sales in 1982's first half dropped 2% to $1.75 billion.

The company, which celebrates its 75th anniversary this year, began operations in 1907 in a plant built on the shores of the Niagara River in Ontario, Canada, producing cyanamide, the first synthetic fertilizer. With chemistry as the thread binding its diverse operations, Cyanamid has expanded throughout the years into five major businesses: Agriculture, which accounts for 23% of the company's total sales; medical, 21%; specialty chemicals, 31%; consumer, 14%, and Formica brand products, 11%. Sales were up in all segments in 1981.

Operating earnings were higher for chemicals, consumer products, and Formica brand products and lower for the agricultural group, while medical earnings were about even with the 1980 figures. This is in direct contrast with the past two years when only the medical and agricultural segments showed higher earnings, while the other three areas declined.

Agricultural sales rose to $844 million, up from $837 million in 1980, while earnings fell to $120 million. Earnings in 1980 were $132 million.

The decline in earnings was attributed to a worldwide recession in the livestock industry, a severe over-supply and reduced prices of phosphate fertilizers, and the impact of the strong dollar on overseas revenues. An outstanding performance by pesticide products helped to offset the effect of these problems and produce increased sales for the division.

Sales of Cyanamid's major pesticides, Prowl and Avenge herbicides and Counter and Amdro insecticides continued to set new records for the company.

These four products, all introduced since 1975, accounted for about 65% of all pesticide sales in 1981.

Sales of animal industry products were about even with those of 1980. The U.S. livestock industry continued to slump because of high interest rates, overproduction and low prices.

A sharp drop in U.S. exports of phosphates, particularly upgraded diammonium phosphate products, left fertilizer producers in the U.S. with an extended inventory position, and prices suffered a severe decline. These conditions, coupled with continuing high raw material and operating costs, resulted in sharp lower profit margins.

Sales for the medical group increased to $773 million, up 11.3% from $695 million in 1980. Due to the negative impact of the foreign exchange rates, earnings remained even for the past two years at $88 million.

Medical products, which are made and marketed in the U.S. by Lederle Laboratories division, benefited from the first full year of sales of a new antidepressant, Asendin amaxapine; continued consumer acceptance of Centrum multivitamins, and increased sales of Orimun oral polio vaccine and Davis and Geck sutures.

Lederle announced it is in the

early stages of research to create a new series of surgical devices that will diversify and expand Davis and Geck's business in hospital operating rooms. The first of these new products, Appose disposable skin stapler, was introduced at the annual meeting of the American College of Surgeons late in 1981.

In 1981, the company spent $6.9 million advertising Centrum vitamin and mineral tablets. Network tv got $6 million, with the remainder going to magazines and spot tv. This represents a large increase from the $2.6 million spent in 1980 to promote Centrum in magazines and spot tv. Centrum was Cyanamid's most heavily supported product outside the consumer products division.

Media spending for Stresstabs 600 was down from $5 million in 1980 to $2.9 million with the bulk being spent in magazine ads and the rest in newspaper supplements and spot tv. Last year, Stresstabs was the most heavily advertised product outside the consumer products division.

Chemical sales increased 7.6% to $1.1 billion and operating earnings increased to $78 million up 61.6% from $48 million in 1980. Operating earnings were up to 22% of the company total primarily because of the impact of increased sales and a 1980 provision of $13.6 million for business withdrawals. Cyanamid withdrew from the polyester tire yarn and certain other businesses in 1980.

Sales of paper chemicals increased dramatically in 1981 while mining, water treating and plastics chemicals showed moderate improvement. Sales of Cymel methylated resins increased as a result of a shift by the appliance and automotive industries to water-based, high-solid, high-performance industrial finishes.

Sales of Creslan acrylic fibers increased as price improvements offset a decline in volume caused by a weakness in the U.S. textile industry. Despite this weakness, textile chemicals also performed well.

The consumer products division consists of Shulton toiletries (including household products), Jacqueline Cochran prestige fragrances and Shulton International. Consumer product sales increased 5.3% to $519 million in 1981, up from $492 million last year. The sales figure represents 14% of the company's total sales for the fifth consecutive year. Operating earnings rose to $34 million up from $28 million in 1980.

The established prestige fragrances of Nina Ricci's L'Air du Temps for women and Goeffrey Beene's Grey Flannel for men had a banner year in 1981.

L'Air du Temps received $2.4 million in measured media spending with $1.9 million on spot tv and the rest on magazine ads. Grey Flannel got $688,800 with $359,100 on magazines, $257,800 on spot tv and the rest on newspaper supplements.

Pierre Cardin cologne for men received $2 million, mostly in spot tv.

Cie women's fragrance was transferred back to Shulton in 1981 after being handled by the Jacqueline Cochran division. Total media spending for Cie was $2.1 million in 1981, with most being allocated to network tv followed by spot tv and magazines.

Blue Stratos aftershave/cologne for men was successfully introduced in the United States in 1981. With a measured media budget of $6.4 million, $5 million was spent on network tv with emphasis on sports programing. The remainder went to magazines and spot tv.

The line was first launched abroad in 1975, and to a certain extent, the ad theme is borrowed from Shulton's overseas cousins. In preparation for U.S. entry, Dancer Fitzgerald Sample adopted the hang gliding focus concept, added new music and copy for the campaign that is themed, "Unleash the spirit... Blue Stratos for the free spirit in men."

Shulton made a five-year, $1 million buy on cable tv's ESPN for Old Spice, Blue Stratos and Pierre Cardin men's products in 1981, becoming the biggest new client for the round-the-clock Entertainment & Sports Programming Network.

Old Spice, which commands a 21% share of the men's fragrance market, continues to increase in sales. Old Spice solid dry antiperspirant deodorant received $6.7 million.

Old Spice cologne for men totaled $5.3 million in media spending with $4.8 million spent on network tv and $525,900 going to spot tv. A new antiperspirant product, Lady's Choice, has completed successful test marketing and is being launched nationally in the U.S.

Last fall, American Cyanamid folded its household products division into Shulton toiletries leading to speculation that the company was planning on de-emphasizing its consumer products division. Although company spokesmen have denied this, rumors still persist that the company is looking to sell off Breck haircare products.

Miss Breck hairspray, with 10% of the market share, had its ad budget cut to $1.8 million, with the bulk placed in network tv and the rest in spot tv. Last year the budget for Miss Breck hairspray was $3.5 million.

The over-all ad budget for Breck products was cut more than half for the second year in a row from $5.7 million in 1980 to $2.5 million in 1981.

Pine-Sol liquid cleaner continued as the No. 1 liquid cleaner in the U.S. in 1981. Pine-Sol continues to receive the largest ad budget of any product from the company with a budget of $7.3 million. About $5.9 million is spent on network tv and $1.4 million on spot tv. The cleaner is promoted in ads themed, "Pine-Sol cuts through grease better than any leading liquid cleaner."

Bowl Gard was introduced to join the Pine-Sol cleaner/disinfectant/deodorizer and subsequently got caught in the controversy surrounding toilet bowl cleaners containing the chemical calcium hypochlorite and never carved out a place for itself. It has been withdrawn from the market.

Although the U.S. market for laminates decreased from 1980 to 1981, sales and earnings of Formica brand products increased through strict management control, an effective cost reduction program and an expansion of the distribution network. Sales increased slightly in 1981 to $412 million, up from $406 million in 1980. Operating earnings were up to $33 million in 1981, accounting for 9% of the company total—an increase from $26 million in 1980.

New creative designs helped boost sales of Formica brand laminates in 1981. The group of Design Concepts laminates for commercial construction, introduced in the U.S. in 1980, contributed to the increased sales.

The Color Grid system of laminate color selection was introduced late in 1981 to the U.S. market. This system coordinates 72 colors in two separate grids and offers all designers and architects a logical, integrated method of matching and selecting colors. Early sales of the line have been ahead of forecasts.

The company is concentrating on product and design innovation, efficient management and aggressive marketing to place Formica brand laminates in a strong position to capitalize on the anticipated revival of the housing and construction industries.

Last year proved to be a

highly productive one for American Express Co., New York, the 71st largest national advertiser. The company recorded its 34th consecutive year of earnings growth, the average share gaining 40¢. American Express revenues worldwide increased 13% last year, reaching $7.2 billion, while consolidated assets climbed to $25 billion. The company's net income rose sharply by 12%, totaling $518 million.

American Express' domestic advertising expenditures were up 20.7% from 1980 to an estimated $76 million. Worldwide, the company's advertising and promotional expenditures totaled $254 million.

Perhaps the most significant corporate move in 1981 was the merger with Shearson Loeb Rhodes, the second-largest securities company in the U.S. The addition strongly bolstered American Express' position in the evolving financial services industry. The merged unit promptly became one of the four units in a newly reorganized American Express that now includes American Express Travel Related Services; Fireman's Fund Insurance; American Express International Banking Corp., and Shearson/American Express Inc.

Within the collective effort, certain other key American Express developments in 1981, relating to the company's four business units, prominently advertised services and products, are as follows:

American Express Travel Related Services Co.: TRS net income rose by 18% in 1981, hitting $209 million, while revenues were $2.2 billion. TRS reorganized Card and Travelers Cheque divisions, representing two of the most widely identified products in the American Express family into a new entity, the Consumer Financial Services Group (CFS), to enable the company to develop and market integrated financial services as well as single products.

The American Express Card, despite rising interest rates and consumer costs worldwide, improved its membership base 12%, totaling 13.3 million cardmembers. Also, three new foreign currency cards were introduced in 1981: Thailand, Ireland and Brazil. Advertising to support the card represented expenditures of $26.2 million with $12.3 million spent on network tv, $7.5 million on spot tv and $6.2 million on magazines.

Early in 1982, American Express began a "Good Samaritan" marketing strategy that uses newspaper ads in certain cities to tie its card's usage to fund-raising needs of a local charity. Ads announced that each time the card was used locally over several months, an important community activity would receive 3¢ from Amex. Test campaigns helped such causes as the Neighborhood Arts program in San Francisco and the ballet in Dallas. Card transactions in Washington, D.C. were earmarked to help the maintenance of historic Mt. Vernon.

The company's Gold Card program increased membership by 29% to 2 million. Over-all, at year's end some 558 million establishments worldwide honored the American Express Card, up 27% from 1980.

American Express enhanced its existing travelers cheque product in 1981 by adding five new services, at no additional cost, for refund claimants in the U.S., Canada, Virgin Islands and Puerto Rico. These were check cashing, credit card cancelation assistance, temporary I.D. card, reservation assistance and message service. Advertising to support this program represented $13 million in expenditures for 1981.

Also, a number of new American Express Traveler Cheque partnerships were established overseas—including agreements with Lloyd's Bank in the U.K., the Dutch Postal Office and German savings banks. In addition, the Bank of China was authorized to sell and refund travelers cheques in the People's Republic of China.

Developments in the travel division included acquisition of Haley Corp., a San Francisco-based travel agency with sales of nearly $50 million. A new commercial business unit was also created to better serve the corporate traveler. American Telephone & Telegraph joined the Corporate Card program as the largest account ever, raising the total Corporate Card membership to 1.2 million. Also, a new, convenient Business Travel Account was introduced, permitting corporate clients to charge all airline travel to a single American Express card account. Ad expenditures in 1981 for the Corporate Card program were $106,400.

Shearson/American Express: Net income for the year jumped 25% over 1980, to $107 million while revenues were up to $936 million. Fiduciary service soared 252% to $30 billion, due mainly to Shearson's acquisition of the Boston Co., a 110-year-old Massachusetts holding company. In a highly volatile stock market, Shearson remained the largest maker of over-the-counter purchases. The company's Real Estate Corp. managed $325 million in residential mortgages, despite steep interest rates and a depressed housing market.

With the merger completed on June 29, 1982, Shearson/American Express launched a dramatic awareness campaign with spots on prominent tv programs such as the Super Bowl XVI.

In other developments, gold and foreign exhange trading were expanded to 24 hours daily in the New York, London, Hong Kong and Singapore offices, while new domestic offices were opened in cities including Birmingham, Knoxville, Sebring, Fla., and Wichita, giving Shearson 248 offices in 217 U.S. cities. And, to qualifying real estate clients, Shearson introduced a floating credit line on home mortgages, with no prepayment penalties.

Most recently Shearson/American Express added two regional brokerages to its organization. Foster & Marshall, a Pacific Northwest regional investment banking company based in Seattle with 52 offices, was acquired on March 23, 1982. Also, Shearson agreed in principle to acquire Robinson-Humphrey Co., an Atlanta-based regional investment company. This transaction is expected to be completed this summer.

Fireman's Fund Insurance Companies: Net income reached $231 million and total revenues rose to $3.1 billion—both substantial increases from a year ago. Gross investment for the year was up 13% to $351 million.

In efforts to keep up with rapidly expanding international markets, the Fund established a new subsidiary, the San Francisco Reinsurance Co., to pursue new business overseas. It also joined with seven other international companies to form a Singapore-based reinsurance company, which will focus on the Pacific Basin and other parts of Asia. Domestically, the Fund began a major push to help independent agents develop automated data and computer systems. An extensive list of new rural markets was organized to concentrate on insuring America's agribusiness. And a large-scale reorganization was started within the Fund's property-liability operations, thus freeing independents for much-needed individualized marketing programs.

Warner Amex Cable Communications: A 50/50 joint venture of American Express Co. and Warner Communications, Warner Amex registered strong gains last year throughout its 146 cable tv systems nationwide. Subscribers jumped 17% to 863,000 in 27 states, while major franchise approvals were granted for suburban Chicago, Queens and Brooklyn, N.Y., Winter Haven, Fla., and Houston. Warner Amex was also awarded the exclusive franchise for Dallas—the largest single municipal cable award in the industry, with 400,000 homes. Qube, Warner Amex's two-way interactive service, was inaugurated last year in Cincinnati and over the next several years will begin operating in Pittsburgh, Dallas, Houston, St. Louis and Chicago. The Warner-Amex Satellite Entertainment Co. (WASEC), already the largest single seller of national cable advertising, reached agreement with Turner Broadcasting to represent all advertising sales for that system's highly successful Cable News Network (CNN) and CNN2.

WASEC introduced a new satellite-delivered service last summer—"MTV: Music Television"—ordered by cable systems serving over 3.6 million households in 1981. The 24-hour a day service offers stereo music with related video productions. Distributed free to basic subscribers, the service received significant advertiser support. "Nickleodeon," WASEC's young people's channel, experienced large subscriber gains in 1981. The channel reached 6.3 million subscribers, an increase of 135% from 1980. "The Movie Channel," is also satellite delivered. The service features only current films 24-hours a day. Carried by 1,700 cable systems, the number of subscribers totaled 1.7 million in 1981, an increase of over 188% from last year.

American Express International Banking Corp: AEIBC was active in pursuing expanded long-range foreign business, opening new offices in Istanbul and Mexico City. Wholesale Banking Operations set up a new marketing arm in Singapore to service product development throughout Southeast Asia. Also introduced was Datamex—a cash balance and account reporting service for clients' correspondent bank holdings in the U.S. Latin American transactions were especially strong in 1981, as was project financing in Nigeria, Saudi Arabia and Portugal. One major development was the $40 million financing of a major petrochemical plant expansion in the People's Republic of China—the first syndicated loan ever guaranteed by a Chinese municipal authority.

American Express' two publications enjoyed growth in 1981: *Travel & Leisure* posted ad revenues up 20% and ad linage up 13%. *Food & Wine*, produced by an affiliate of the publishing division, increased its ad rate base 50% to 300,000. In 1982, advertisers who bought space in the same issue of the two magazines, beginning with the February issues, were offered a 10% discount under The Lifestyle Impact plan.

American Home Products, the nation's 16th largest advertiser, increased its U.S. advertising in 1981 to an estimated $209 million, a 6.1% increase over the previous year, which brought advertising expenditures back to 1979 levels.

The company continued to show record sales and earnings, with sales increasing by 9% and earnings 12% over 1980.

Earnings continued to post strong gains during the first quarter of 1982, increasing 14% to $145.1 million from $127.5 million in the comparable quarter a year ago. First-quarter sales rose 6%, to $1.11 billion from $1.1 billion last year. First-quarter data included the operations of the Sherwood Medical Group, which AHP acquired from Brunswick Corp. in March 1982 for about $425 million. The purchase of Sherwood underscores AHP's commitment to its prescription drug divisions.

In 1981, both prescription drugs and Brach candy sales led U.S. sales, and in fact posted better U.S. sales growth than foreign. Just the opposite held true a year ago. Foreign sales,

Source: Radio Advertising Bureau and Radio Expenditure Reports.

representing 34% of gross sales at AHP, recorded a slight 3% rise in 1981, to $1.39 billion from $1.34 billion in 1980. Sales in this area were adversely affected by the decline in foreign exchange rates.

Prescription drug sales once again accounted for the bulk of company sales and earnings—42% of total sales and 57% of earnings. In 1981 the unit posted sales of $1.737 billion with operating income before taxes of $548.7 million.

In addition to the acquisition of the Sherwood Medical Group, AHP is accelerating its research and development efforts in the pharmaceutical arena. R&d expenditures have increased from 1979 to 1981 at a compound annual rate of 16% while sales were increasing at a 10% rate. For 1982 the planned increase in r&d expenditures is greater than the average for the last three years. Some current projects include seeking therapeutic compounds in the fields of cancer, cardiovascular diseases and diabetes.

In 1981, AHP signed two agreements with European pharmaceutical companies to pursue various research efforts. Ayerst Labs' Inderal was found effective in preventing deaths among patients who suffered heart attacks, according to a study released by the National Heart, Lung and Blood Institute. The division launched its first major consumer campaigns for over-the-counter products. Both Riopan Plus antacid and Beminal Stress Plus vitamins received spot tv support, Riopan getting $266,800 and Beminal $71,200. Distribution of Riopan was expanded to food outlets in preparation for a national tv ad campaign. Dermoplast Anesthetic Spray, for sunburn pain relief, also received consumer support, $126,500 in magazines.

Wyeth Laboratories received some adverse publicity earlier this year when it recalled 2.3 million cans of SMA infant formula, due to an uncertainty that they contained the amounts of vitamin B6 required by federal law. The company had also recalled Nursoy Ready to Feed and Nursoy Concentrate, which had been mixed without any vitamin B6.

While prescription drugs continued to be the brightest star in AHP's stable, advertising is basically confined to trade journals and marketing to physicians.

The company division hit hardest in ad expenditures in 1981 was its Whitehall Laboratories' line of packaged medicines. The division accounted for $565.9 million or 14% of total sales and pretax income of $118.9 million.

Interestingly, two products that received a sizable share of Whitehall's advertising dollars —Anacin and Preparation H— have been involved in court battles over their and other companies' ad claims.

The Anacin franchise received the bulk of ad dollars, with spending slightly above 1980's $43.5 million to $44.8 million. The company is in the midst of a court battle over an FTC ruling that AHP must have rigorous scientific support for claims regarding Anacin and its other analgesics. The ruling also requires that the products containing aspirin must disclose that ingredient as the pain reliever, eliminating blind references to "the pain reliever most recommended by doctors."

With the bulk of the ad dollars going into network tv, AHP is hard pressed to increase its 12.3% market share in the analgesic market against competitor Tylenol, with 31% of the market.

Going after that market, Anacin 3 nonaspirin tablets had the support of $6.6 million, trailing only behind the $27.5 million spent on Anacin tablets and capsules. Both the capsule and the aspirin-free markets offer the greatest areas of growth for otc marketers.

The company began a national rollout in January of aspirin-free maximum strength Arthritis Pain Formula, with advertising by Kornhauser & Calene, New York.

Preparation H also was involved in a court battle, but this time on the offensive. AHP took out a lawsuit against Abbott Laboratories, challenging the company's introduction of its hemorrhoid remedy, Tronolane. Preparation H has a stronghold on the hemorrhoid remedy business, with an estimated 63% market share. AHP disputed Tronolane's wording in several instances and the agreement reached at the end of 1981 stipulated that Tronolane ads state "relieves pain immediately," rather than "stops pain immediately." Abbott also has to refer to the product as a "new product" rather than a "new treatment." Consumer preference testing may be continued by Abbott.

The challenger budgeted more than $6 million in advertising time and distributed 31 million mail-in sample offers to introduce Tronolane to the estimated 25 million hemorrhoid sufferers. By the September/October auditing period, Tronolane had attained a 9% dollar share of the $100 million category, with Preparation H's 63% share whittled down to 56%. Other challengers include Bristol-Myers' Hemtrex and Upjohn's Cortef.

Preparation H's ad support increased in 1981 to $14.6 million from $10.8 million in 1980, which had been a drop-off from 1979 levels. AHP also has formulated an entry in this market with hydrocortisone, Prepcort cream, which received $619,800 in ad dollars, mostly on network tv.

Dristan's ad spending increased to $23.7 million from 1980's $21.2 million, although it is still below 1979 levels. Market share continues to hold at 11.4% and analysts say that without major flu outbreaks, marketers of cold remedies over-all will only attain 1% to 2% annual unit growth. The company did introduce a new 12-hour relief formula in the Dristan spray line.

Several new products were introduced by Whitehall in 1981. Diet Gard appetite suppressant entered the weight control market with a program that combines diet pills with a nutritional supplement. The supplement received $1.1 million in ad dollars, with $9 million on network tv and the remainder in magazines and spot tv. The appetite suppressant capsules were introduced with $171,600 in magazines.

Spending on Denorex medicated shampoo continued to increase, from $2.8 million in 1980 to $3.3 million in 1981. AHP went national with Denorex shampoo and conditioner, with the two benefits previously unavailable in a single product.

Testing of Youth Garde moisturizer continued in spot markets. Multimedia support is estimated at a $3.5 million rate, handled by Kornhauser & Calene.

AHP's second-largest ad spender was the home products and housewares group. The division showed a 4% increase in sales, to $1.04 billion from $997.3 million. Pretax income declined by 1%, to $110.1 million from $111.5 million. The decrease is attributed to the decline of the Prestige affiliate in the United Kingdom, a line of housewares, and the cost of plant consolidation in the U.S. and U.K.

The group consists of Boyle-Midway, Dupli-Color, Ekco Housewares & Products, The Prestige Group Ltd. and E-Z Por.

Boyle-Midway's group of home products saw their ad expenditures increase after a downturn in 1980. The two leaders in the field, Woolite cold water wash and Pam cooking spray, have benefited from manufacturers' recommendations and recipe recommendations. Woolite's ad budget grew from $8.9 million to $9.4 million, as the cold water wash continued to lead the division in sales. Pam's dry cooking sprays also saw an upturn in ad expenditures, from $6.1 million to $7.6 million.

Wizard air fresheners and Fire Starters exhibited a drop in spending, decreasing from $4.7 million to $2.5 million. Wizard Island Flower, a new aerosol fragrance, was introduced nationally.

By comparison, the Sani-flush line of toilet bowl cleaners regained its competitiveness in the burgeoning area, increasing its ad budget from $1.9 million to $4.1 million. Boyle-Midway introduced Sani-flush automatic 4-month in-tank bowl cleaner. The four-month cleaners have accumulated approximately a 40% dollar share of the automatic in-tank segment of the toilet cleaner category.

New products include Aerowax Pine 'n Shine, which is being test marketed in several cities, and Black Flag Dead Aim ant and roach killer.

Ekco's media expenditures continued to fall, from $2.2 million to $1.9 million. In the products line, Ekco is moving into supermarket sales with Ekco's Showcase line of clear plastic containers and lids. Foil containers also have been designed for bulk salads and layer cakes. In housewares Ekco has added all-nylon kitchen tools to its kitchen helper line and Cool Tools has increased sales in barbecue tools.

American Home Foods, which includes Chef Boy-Ar-Dee and Brach candy items, had sales of $790 million on pretax income of $104 million, up from the $724 million and $84 million shown in 1980. Advertising remained basically the same, in the mid-$15 million range. The company introduced Zooroni, animal-shaped macaroni in tomato sauce, with or without meatballs, aimed at young children. Five new main meals and one new snack item went into test markets. Upgraded label designs were developed for a number of products.

The Brach candy business, with a 16% sales increase, was the major factor in the 25% increase in operating profit for the food and candy segment. Spending grew from $3.6 million to $4.8 million. Network tv was added to the advertising schedule, with magazines still receiving the majority of the dollars. The number of spot tv markets was increased from 54 to 59.

A new line of candies in hanging bags, the Impact Line, was introduced in 1981, featuring 37 of Brach's most popular candies. Chelsea Chips, a chocolate-covered toffee candy, was expanded from regional to national distribution. Teaser Beans, a new jelly bean, was also introduced nationally.

In other maneuvers, AHP gutted its in-house agency in early 1982. Everything except media buying has moved to five AHP agencies.

The company had reached outside agencies for advice on the problems of several brands, including Anacin, whose unit share has dropped from 21% to 13%. Soon after that, Murray's president, Frank Donino, left. Immediately on his heels Murray was disbanded.

Industry observers said Murray was constrained both fiscally and creatively. They also said there is no difference between the quality of work between house agencies and outside firms.

AHP was ranked No. 3 by the Television Bureau of Advertising in tv spending, behind P&G and General Foods. The company spent about $172 million on net and spot tv, up 9% from 1980.

American Honda Motor Co., Gardena, Cal., the 78th largest national advertiser and the third largest auto importer in the U.S., is a wholly owned subsidiary of Honda Motor Co. Ltd., Tokyo, Japan.

The U.S. unit is estimated to have increased its total ad spending for calendar 1981 to $68.3 million, up 25.7% from the $54.3 million in 1980.

The company, which markets Honda automobiles, motorcycles and a line of consumer power products, posted a 12% gain in worldwide sales for its fiscal 1982, with about 71% of its consolidated net sales made outside Japan. However, consolidated net income for the year dropped to $277 million, a decline of 16% from the record high of the previous year, reflecting a depressed world economy and higher sales promotion expenses in Japan.

Honda cars continued to sell well in world markets, thanks in part to their fuel-efficient engines and the front-wheel-drive technology, which has been a

feature on all its passenger car models since 1967. The company's last fiscal year recorded worldwide car sales of 1,044,000 units, 56% of the company's total sales, and for the first time in Honda history, its automobile sales have exceeded the million-unit level. The U. S. accounted for 370,705 units in 1981, down from 375,388 units sold the previous year due to import quota restrictions placed on all Japanese auto manufacturers last year. In terms of units of production, Honda has ranked as Japan's third largest producer of passenger cars. It accounts for 16% of all imports into this country, with a 4.3% share of the total U.S. market.

Honda continued to use its "We make it simple" ad theme into its fifth model year, positioning its cars as more dependable and simple than its competition. Network television represented the major expenditure in the company's support of its 1982 models, with Honda involved as a corporate sponsor of men's professional golf tours (PGA) in the Honda Inverrary Golf Classic this spring.

Last October Honda introduced its new auto line for '82, including its new gas-saving Civic 1300 FE (fuel economy) $5,899 hatchback model which carried an EPA estimate of 41 mpg city, 55 mpg highway, for a time making it the highest gas mileage car available in the U.S. However, the introduction of Nissan's new Sentra this spring and its EPA estimate of 43 mpg city and 58 mpg highway, brought a halt to Honda advertising of the highest mileage claim.

The popular Honda Civic line offered six new models for '82, priced from $4,799 to $6,949. Television and magazine advertising supported these units as well as the new Accord series, which had been redesigned and offered in three models, all featuring a larger 15.8-gal. fuel tank to provide a longer cruising range. Prices for the more luxurious Accord models and the top of the line Prelude sports coupe range from $7,399 to $8,445.

Worldwide sales of Honda motorcycles during the past fiscal year rose 20% to 3,518,000 units, which accounted for 25% of the company's total sales. In the U.S., Honda accounted for 37.5% of total motorcycle retail sales for '81, the largest share of the market and ahead of Yamaha (25.3%), Kawasaki (16.2%), Suzuki (14%) and Harley-Davidson (5.2%). Unit sales in North America accounted for 19% of total motorcycle unit sales outside Japan. At the same time, output at Honda's motorcycle plant in Marysville, O., continued to move to its full capacity of 60,000 units a year.

Honda introduced a variety of new models in '81, backed by a motorcycle ad budget estimated near $25,000, the largest in the company's history. The aggressive promotion featured a media mix that included a heavy concentration of network and spot tv and radio, mass consumer print and a variety of vertical enthusiast magazines in the motorcycle field. The over-all campaign was set to the theme of "Follow the leader," now in its third year. But due to slumping street bike sales, Honda still wound up the year dropping a few market share points to Yamaha.

A generally lack-luster 1981 for Honda motorcycles was bolstered by booming sales in the three-wheel ATV (all terrain vehicle) market, where Honda managed to capture over an 80% share of U.S. sales which topped 200,000 units last year.

The company kicked off its 1982 push for motorcycles with two commercials during the Super Bowl telecast on CBS-TV in January. The Super Bowl buy, the first for a motorcycle marketer, was matched by Honda's auto group which also bought two spots.

The intensified promotional spending in '82 supported the introduction of several new top of the line street bike models. This included a vee-four (750cc) turbo performance twin in both the Magna and Sabre lines; a CB radio and stero-equipped Aspencade model, an extension of its touring-oriented Gold Wind line, and the CX500 Turbo, the first production turbo motorcycle offered by any marketer.

Power products, the third major group in Honda's worldwide operations, encompasses some 40 different products built around Honda's small, high-efficiency engines. Currently receiving advertising support estimated at $3.5-million level, more than ever before, power products have been receiving a omnibus approach in consumer magazines. Major expenditures are going to spot tv in behalf of Honda lawnmowers and the EM500 electric generator.

Honda's share of the U.S. lawnmower market, estimated at 5.7 million units in 1980, is currently about 1%. But company executives point out that Honda is not competing for the entire lawnmower market, just the high-priced end.

American Motors Corp, Southfield, Mich., the 76th largest national advertiser, decreased its 1981 estimated advertising spending slightly to $70 million over the revised 1980 estimate of $71 million.

AMC sold fewer vehicles in 1981 than in 1980. The net loss was $136.6 million, down from $200.8 million in 1980. Sales of $2.6 billion were up slightly over 1980.

AMC is basing its automotive future on Renault products and its own 4-wheel-drive Jeeps and Eagles. Renault Le Car and 18i sales in 1981 were up 22% over 1980 sales. The hot sporty Renault Fuego went on sale in March with a $5 million ad campaign. "This vehicle will tell the public a lot about Renault," said Howard I. Mosher, director of Renault marketing at AMC. "We're spending ad dollars relatively heavily to increase awareness not only of this car but for Renault as a whole."

The marketing of the Fuego paves the way for the September, 1982, introduction of the Alliance, the first domestically-produced Renault.

Behind the Alliance will be what AMC calls "the most comprehensive and far-reaching marketing program in the company's history." The ad budget will be increased to $72 million in 1982.

AMC introduced a corporate ad campaign in 1982 for Renault, building on Renault's front-wheel-drive leadership and Formula One racing. Gatefold ads read: "Quick. Who's sold the most front-wheel drive cars in the world?" The answer: "Voila, Renault."

The Renault-AMC "arrangement" was formally started in December, 1980, with Renault's purchase of 46% of AMC stock and options to buy up to 59%. Two years later, Jose J. Dedeurwaerder was elected president-coo. Mr. Dedeurwaerder joined the company in September, 1981, as exec vp after serving 23 years with Renault. W. Paul Tippett Jr. moved from the presidency to chairman-ceo following the resignation of chairman Gerald C. Meyers, the man instrumental in the AMC-Renault pact.

While Renault is the future hope, present woes were blamed on the recession, high interest rates and "a lack of consumer confidence." Spirit and Concord sales were down, but Eagle sales were up 32%. The company says it will continue to produce Spirit and Concord as long as there is a demand.

Eagle had the best percentage increase in 1981, with unit sales of 43,221. Sales of AMC's other 4wd units—Jeep Corp.'s CJ, Cherokee, Wagoneer, Scrambler and pickup—were off 19% to 63,275 vehicles. AMC is waiting for its XJ Jeep series, which will come out in 1983 along with a doubled Jeep ad budget.

Renault sales in 1981 stood at 30,869 units, up 22% from 25,365 in 1980. AMC hoped to sell 10,000 Fuegos in 1982, and it plans on 100,000 Alliances in the 1983 model year. That would make the Alliance, a five-passenger subcompact, AMC's top seller.

The Spirit and the Concord, leftovers from the 1970s, had sales declines of 33% and 8%, respectively. Spirit sales were 33,504 in 1981, against 49,723 in 1980. Concord sales were 59,957 in 1981, down from 64,991 in 1980.

Total AMC vehicle sales dropped 9% to 230,826 in 1981 from 252,655 in 1980. Automotive losses came to $149.4 million in 1981, compared with $210.9 million in 1980. AM General, which makes military and postal vehicles, was AMC's only money maker. It turned in record orders and a record profit of $13.2 million, an increase from $10.1 million in 1980.

While AMC's auto sales were down 9% in 1981, the company increased its share of the total U.S. market to 2% in 1981 from 1.9% in 1980. Jeep sales slumped 19% in 1981, but AMC's share of a depressed domestic 4wd market increased to 15.8% in 1981 from 14.9% in 1980.

In the fall of 1980, AMC tried to consolidate its market position somewhat. The 4wd version of the Spirit was introduced as Eagle SX/4 to tie-in with the existing Eagle line. Both Concord and Spirit came under the umbrella theme, "The Tough Americans," and Jeep continued with the "legend" theme.

AMC also introduced the Renault 18i in September but had a more important Renault announcement later in the fall. Renault agreed to pump $200 million into the ailing AMC for additional stock.

In January, AMC shifted the $12 million Renault ad account from Marsteller to Grey, thereby giving Grey all of AMC's 2wd car business and Compton all of the 4wd car and Jeep business. The agency announcement caught Renault's European agency by surprise. Publicis-Intermarco thought it had an inside track for the Renault account in the U.S., but AMC wanted to consolidate advertising in two rather than three agencies and that left the French company in the cold.

Price rollbacks on Spirit, Concord and Eagle models followed later in January. The rebate substitute ran under the theme: "While others raise prices, the Tough Americans give you a 10% rollback." The rollback did not apply to Renault because consumers "don't perceive imports to be too high in price," said Mr. Tippett. Jeep didn't get it because "price isn't the issue with Jeep," he added.

A couple of new models came out in the spring as part of AMC's 6x6 plan—a new model every six months for six years—a Jeep entry into the small pickup field, the Scrambler, and a Le Car four-door hatchback.

The name Le Car got second billing in ads for the new model. AMC wanted to build the quality image of Renault in the advertising as well as sell different models. So the new Le Car ads read: "Renault presents the 5-door Le Car. Renault was designing cars around people before Ford or General Motors even began putting pistons in an engine block...Renault has made more front-wheel-drive cars than anyone else in the world."

Renault, Jeep and AMC lines

were so distinct executives decided to create a brand management system during the summer. "Lodged in one company are three very distinct lines of products that serve three distinct sets of consumers. The marketing problems are really quite different," said David J. Van Peursem, general marketing manager.

Thomas A. Staudt, vp of AMC's marketing group, resigned that post to become general marketing manager of Chevrolet, where he had been director of marketing before his two years at AMC. Six months later, Joseph E. Cappy left his job as general marketing manager at Lincoln-Mercury to replace Mr. Staudt.

Marketing strategies and ad plans for the fall introduction period continued along lines set the year before. Renault advertising kept building awareness of the French auto maker, setting the stage for the introduction of the Kenosha car (later named Alliance). The Renault theme was, "Where great engineering lives in great design." That covered the Le Car, 18i and later the Fuego.

Eagle, Concord and Spirit ads kept the "Tough Americans" theme. Rust protection was emphasized in one spot that sent a Spirit off a pier into salt water. Variations of the "legend" message continued the previous year's Jeep strategy.

AMC found it had to work hard just to stay even in the soft market in the fall of 1981, and it introduced a $750 rebate on Jeep Wagoneers, Cherokees and big trucks as well as a 10% rebate on the 18i, Concord and Eagles. In December, AMC changed the wording on warning stickers put on Jeeps to comply with a Federal Trade Commission settlement. The stickers warned of possible rollover of the high-center-of-gravity Jeeps in "sudden sharp turns and abrupt maneuvers." With the tougher language on the sticker in place, the FTC dropped plans to file a complaint against Jeep advertising.

In an attempt to avoid more rebates, AMC introduced the "old car retirement program" in January, 1982. The plan offered consumers cash bonuses on top of the trade-in value of their old cars, the older the car, the better. The imitation rebates ranged from $300 for trade-in of 1977-78 models to $500 for 1974 cars or older.

The "old car retirement program" was still alive when AMC decided to roll back prices once again, this time on Jeeps. Jeep CJ and Scrambler models were given the uniform base price of $6,765. The theme line for the widespread Jeep ads was, "Great little number, Jeep."

Even as all the incentive programs were being aired, AMC concentrated on building Renault image through advertising to prepare for the Alliance due in the fall. The sporty Fuego, based on the 18i platform, was introduced in early April. Ads showed the car superimposed on a Renault Formula 1 race car with the headline: "New. Racy. Fuego."

AMC posed the question in the Jeep summer campaign: "Why drive a car when you can drive a Jeep?" Again the ads were stepping stones to a future AMC product, a downsized Jeep.

Incentives kept pestering AMC, and when other car companies went in for warranty incentives, AMC was forced to follow. In April the company brought out a five-year expanded warranty program and began a comparison ad campaign to support it. The special $6,765 price on some of the Jeeps was held until the end of the model year and a $500 price cut on AMC cars ran through July 12 along with the warranty offer.

Jeep products again led AMC international operations to record sales outside the U.S. and Canada. Worldwide sales of AMC cars stayed about even while Jeep sales rose 31%. In Indonesia, Jeep sales nearly doubled.

Improved sales of military vehicles to the government increased AM General's earnings in 1981. AM General won a big contract for a five-ton truck and had hopes of winning another contract for a tactical vehicle dubbed the "hummer".

**AA estimate

American Telephone & Telegraph Co. increased its advertising 14.6% to an estimated $297 million in 1981 to become the ninth largest advertiser in the U.S. Of this, measured media spending amounted to $209 million, an increase of 16% over 1980 expenditures.

Financial and operating results showed that 1981 Bell System revenues rose 14.5% to $58.2 billion while earnings rose 13.7% to $6.9 billion. Almost 90% of net income came from telephone operations, the remainder from the company's Western Electric subsidiary. Return on average capital was up by 0.4% to 10.3%, still a far cry from the 13% return Bell has hoped for since 1979 to assure sound financing of service growth and improvement.

The year 1981 was of historic importance for AT&T. As the year drew to a close, the company and the Department of Justice began discussions which led to a modification of the 1956 Consent Decree, the basis for the government's action in agreeing to drop its 7-year-old antitrust suit. This modified final judgement requires AT&T to divest the local service facilities of the Bell operating companies, representing more than $80 billion in assets. The System's inter-exchange facilities and the customer premises equipment business, as well as manufacturing operations and research and development (Western Electric, Bell Laboratories and Long Lines) would be retained by AT&T.

At press time, the agreement was before a federal judge in Washington to determine if it was in the public interest.

Meanwhile, AT&T has set up a planning model which structures the Bell System's 22 principally-owned operating telephone companies into seven regions. The model is being used as the basis for the further planning which must be accomplished to prepare for the divestiture of its local exchanges. Additionally, chief executive officers have been designated for these seven regional holding companies.

On the legislative front, the House is now discussing H.R. 5158—a new telecommunications bill that AT&T opposes. As proposed, the bill would force AT&T to purchase 30% of its equipment from outside suppliers. It would place restrictions on the amount of capital that AT&T could give to a new subsidiary. In addition, it provides specific guidelines on how the new subsidiary should be structured.

In other major developments, AT&T announced the formation of American Bell Inc., a wholly-owned, fully operated subsidiary, to provide enhanced communications services. Under the FCC's Computer Inquiry II decision, all enhanced communications services—those where customers' information is changed or where customers interact with stored information—and new customer premises equipment must be provided through a fully separated subsidiary by Jan. 1, 1983. American Bell said its first service offering would be Advanced Information Systems/Net 1, a communication processing service that provides data storage and transmission, programing capability and the management of data communication networks.

A capitalization plan for another subsidiary, Advanced Mobile Phone Service (AMPS) that will offer domestic public cellular radio telecommunications systems and service, was filed with the FCC on May 25. On June 8, AMPS and 19 other companies announced plans aimed at ensuring the expeditious offering of cellular radio service to customers in 29 major metropolitan areas.

In 1981, AT&T's growth in volume of business accounted for 60% of the $7.4 billion increase in revenues; the remaining 40% was due to rate hikes. Some $4.4 billion in earnings was declared in dividends, the rest reinvested in the business.

About 700,000 new phones were added to the system in 1981, for a total of more than 142 million in service. There was a gain in access lines of 2.1 million compared with 2.5 million in 1980, and $18.1 billion was spent largely to expand the capabilities of the telecommunications network.

Long distance calling within and between states rose 6.6%,lower than the 7.8% increase the year earlier, while international calls increased 17.8%. Revenues from 800 Service and OUTWARD WATS grew 35% and 17.1% respectively.

Business services provided 52% of Bell System operating revenues in 1981, while residence services contributed 41%. Together they accounted for $6.9 billion of the year's $7.4 billion growth in operating revenues.

During the year, Bell operating companies were awarded $3.2 billion in interstate rate increases. Pending state requests totaled $3.2 billion at year's end. The FCC granted AT&T higher rates for interstate long distance messages, WATS and private line services, increasing revenues by $1 billion annually.

The Bell System continued to place strong emphasis on marketing new ventures, including Dial It 900 and Dial It National Sports programs.

Dial It 900, a mass polling and marketing device introduced in June, 1980, was first used by ABC to obtain viewer response to the Carter/Reagan debate. In 1981, the service was used by national and local broadcast media to conduct 160 straw polls on various issues. In addition, AT&T continued to offer Dial It National Sports, a recorded sports report which is updated every 15 minutes. Callers to Dial It services are charged 50 cents for each call. In 1981, more than 11 million calls were made to Dial It services, generating $5.6 million in revenues.

The largest share of AT&T ad spending went to long distance lines, which received $47.8 million in measured media spending, up from $39.9 million in 1980. More than half went to network television. Magazine buys followed with $12.8 million. Yellow Pages had a budget of $16.2 million, the bulk of which went to tv, both spot and network.

The regional Bell System companies had autonomous budgets, ranging from a high of $10.7 million for Southwestern Bell to a low of $4.2 million for the New York/New Jersey Bell Telephone Co.

Pacific Telephone & Telegraph was budgeted for $5.8 million while Chesapeake & Potomac Telephone Co. allocated $5.8 million for its advertising. AT&T's manufacturing subsidiary, The Western Electric Co, received an ad budget of $2 million, down from a 1980 expenditure of $9.5 million.

Nine new "Reach Out And Touch Someone" spots were aired in 1981. During 1982, AT&T is celebrating a year-long "100 Years of Bell Quality Phones for the Home" campaign with actor Don Ameche as spokesperson in broadcast and print interviews and in personal appearances throughout the U.S., including the opening of the Bell system "Home of the Future" exhibit at the Knoxville (Tenn.) World's Fair. New commercials for 1981 were designed to stress the low cost of reaching out on weekends, and spots for Long Lines continued to push the "20-minute visit."

The Bell System spent $18.1 billion on construction in 1981, an increase of $800 million. About 55% of the construction budget went to meet current and anticipated growth, 24% to replace older equipment and facilities with new technology, and the balance largely for the rearrangement of facilities and provision for customer movement.

Allocations were also made for new electronic switching equipment. Local electronic switching offices were serving 50% of the nation's customers, a 7% increase from the year earlier.

Seventeen long distance electronic switching systems were also installed in 1981. These large digital systems handle more than 500,000 calls per hour—more than four times the capacity of earlier systems. The new systems, which take up less space and require less maintenance, brought the total in service to 70.

To remain in the forefront of technological development, the Bell System invested $1.7 billion in research and development in 1981.

During the year, a trial by AT&T and Knight-Ridder newspapers enabling users to perform shopping and banking transactions from home terminals came to a close. Knight-Ridder announced plans to begin an expanded commercial market test of the system in 1983 using Bell System terminals and communications facilities. During 1982, CBS Inc. and AT&T will begin a seven-month test of another videotex system in New Jersey.

The Bell System also announced plans for the largest lightwave system in the world, a 767-mile system connecting Moseley, Va., and Cambridge, Mass.

International Dialing came to 723 additional cities in the continental U.S. in 1981. Some 54

million telephones in 5,400 cities across the country can now dial direct to 86 foreign countries.

A seventh transatlantic cable, approved by the FCC in 1979, is scheduled for service in 1983. The cable will stretch 3,295 nautical miles from Tuckerton, N.J., to Land's End, England, and will be capable of carrying 4,200 conversations at once, compared with 51 in the first transatlantic cable laid in 1956 (now retired) and will cost $14.23 per circuit mile, compared with $233 for the first cable.

In terms of business marketing, the Bell System took several major steps to reaffirm its leadership in the telecommunications marketplace.

First, Bell announced six advanced capabilities for its DIMENSION PBX product line, making its best-selling family of PBXs even more versatile and cost-effective.

The six advancements are:

- A Distributed Communications System, to provide expanded telecommunications capabilities to over 25,000 stations in a unified system.
- Energy Communications Service, available across the entire DIMENSION PBX Product line, to give customers ongoing management and monitoring of their energy usage throughout their organizations.
- 9.6 KB Data Switching to more efficiently handle voice and data through the same switch.
- Call Management, automated call distribution coupled with sophisticated management reporting systems for organizations with large numbers of incoming calls, such as those involved in telemarketing and teleservicing.
- Message Center Service to insure that calls get a professional response and that messages are delivered promptly.
- Message Center Directory to provide improved message handling in both internal and external communications.

Other significant business marketing-related developments were: Bell's introduction of the DIMENSION Prelude PBX, a low-cost communications system for small PBX customers who need fewer than 100 telephone stations but require relatively sophisticated features; the introduction of System Management, a process whereby Bell System customers will gain more control and responsibility for the full DIMENSION PBX product line, and AT&T's proposal to offer a two-way Video Teleconferencing Service (called PICTUREPHONE Meeting Service) that would allow business people to conduct face-to-face meetings without having to travel long distances.

Dataphone Digital Service, which provides private-line digital transmission at high speed, was extended to 34 additional cities, bringing the total served by the network to 94.

In early 1982, there was activity on three key antitrust cases against Bell.

The Chicago U.S. Appeals Court heard arguments in AT&T's appeal of MCI's $1.8 billion antitrust judgment in 1980. The arguments were virtually the same as those presented a year ago but, because of illness of one judge, a new judge had to be appointed and the arguments were repeated.

AT&T's appeal of the June 29, 1981, verdict in the Litton antitrust case was argued before the United States Court of Appeals for the Second Circuit in New York City.

The verdict awarded Litton Systems some $276.8 million in damages.

And in Washington, a federal district court judge is still deliberating the antitrust suit filed by Southern Pacific Communications Corp. (SPCC) against the Bell System. AT&T has moved that the case be dismissed. During its testimony, SPCC had lowered its original damage claim against AT&T from $567 million to $480.5 million.

*AA Estimate

Anheuser-Busch Cos., St. Louis, the nation's 28th largest advertiser, boosted ad spending by 3.3% in 1981 to a total of $187.2 million. For the 25th consecutive year, A-B led the brewing industry and set another all-time industry sales record of 54.5 million bbls. sold. That is an increase of 8.6% over 1980's record total of 50.2 million bbls. A-B now outdistances No. 2 ranked Miller Brewing Co. by a record 14.2 million bbls. The brewer's kingpin status grew in 1981 as A-B's market share jumped to 29.5%, an increase over the previous year's 27.8% holding. In 1981 A-B's sales increased 15.4% to $4.4 billion, while net income climbed 26.6% to $217.4 million.

While many of the nation's brewers fight for survival, A-B is striving to keep up with consumer demand by investing an estimated $2 billion-plus toward upgrading and expansion of its breweries. For example, the Williamsburg brewery came on line in late 1980 and early 1981, and the Los Angeles brewery's capacity was tripled in early 1982. The Baldwinsville, N.Y., brewery comes into production in 1983; Houston's may expand by 5 million bbls., and plant No. 12 will be built in Colorado. When these additions are completed, it will give A-B a brewing capacity of more than 70 million bbls.

Budweiser, the company's powerhouse flagship brand, continued to grow at a double-digit rate for the third year in a row. The "king of beers" logged 70% of A-B's beer sales compared to 68% the previous year. A-B continued with its "This Bud's for you" salute to the working man, and increased its roster of vignettes to include tributes to sports referees, deep sea divers

on the *Andrea Doria* treasure mission and lumber camp workers. In addition, A-B beefed up its youth-oriented ad supplements for Budweiser by coining a series of spots smacking of "new wave" video impressions, also backed by the "This Bud's for you" theme. These ads are targeted to the young-adult crowd and are seen mostly in the late-evening regional time slots, in theaters and on cable tv.

The brewery invested $40.5 million on Budweiser in six measured media, up 26% from the $32 million spent in 1980. The bulk of the spending—or $25.8 million—went into network tv buys. Of the remaining, $9.3 million went into spot tv, $2.8 million into network radio and $876,000 into magazines. In addition, A-B continued to spend heavily on local promotions, ranging from outdoor Summerfest concerts to rodeos.

A-B completed its testing of Budweiser Light in 1981 and proceeded to roll it out nationally beginning last March. Bud Light is considered by the brewing industry as the most formidable challenger to Miller Brewing Co.'s segment leader, Lite. In tests, A-B commissioned two ad agencies to handle the new light brew—St. Louis-based D'Arcy MacManus & Masius and Chicago's Needham, Harper & Steers. D'Arcy employed the use of a lone Clydesdale and buffered it with a "Break Away" theme. NH&S went with a sports-oriented approach that showcased the message, "Bring Out Your Best." Both campaigns fared well in tests and consumer acceptance, but A-B opted for NH&S to handle the estimated $35 million to $40 million national rollout for the sake of "agency balance." D'Arcy remains A-B's principal shop, handling Budweiser, Michelob, Michelob Light and Natural Light. In addition to Bud Light, NH&S handles popular-price Busch beer.

Weekends are still made for Michelob, but the superpremium beer expanded its ad approach by enticing drinkers to "Put a little weekend in your week." In 1981, A-B spent $18.2 million for Michelob—$13.2 million on network tv, $2.6 million in spot tv, $1.3 million in magazines, $560,400 in network radio and $49,500 in outdoor.

Supplemental spots have also been forged for Michelob. Two commercials using a format entitled "Mystery Man" are running in late-night and fringe times. The spots showcase the dashing, James Bond-type, cavorting among the upper crust while being tracked by a dastardly bad guy, equipped with black hat, cane and limp. In each spot the bad guy attempts to capture the Michelob "mystery man" but fails, prompting the tag line, "Michelob—one step ahead."

Michelob Light has shaken its comparative taste campaign and replaced it with a sports-oriented look that cashes in on the competitive fires of amateur sporting activities. Spots showcase young men grunting and sweating their way through a no-holds-barred contest of touch football, sandlot baseball, soccer or basketball—all in quest of a Michelob Light, which the losers, of course, buy. A total of $21.5 million was spent on Michelob Light in measured media, with the bulk of the spending going to network tv.

Last year also saw a change in marketing direction for A-B's Natural Light. The brewer opted to take Natural out of the tavern and place it on the buffet table, giving it a new ad campaign linking it with good food. Instead of bumping heads with Miller's Lite, as it did in its series of me-too sports personality spots, Natural is out of the macho fray, as far as its advertising goes. Natural's new campaign promotes the beer's lightness as a counterpart to heavy meals such as pasta and sizzling steaks. The push carries the theme, "The beer with the taste for food." Last year, A-B invested $17.9 million in Natural with the bulk going toward network buys.

Natural will now be positioned as a popular-price light beer, a price leader that will make its strongest sales in the supermarkets where women traditionally are the buyers. The downturn of Natural to popular prices, the debut of Bud Light at premium cost and the growth of superpremium Michelob Light gives A-B a light beer presence in every range.

A-B's other popular-price beer is Busch, which continued throughout 1981 to maintain its "Head for the Mountains" theme. The company invested $7.4 million in measured media; Busch is distributed in 28 states, and showing signs of new vitality throughout its distribution area.

A-B's German import, Wurzburger Hofbrau, received only token support of $266,000. It was also pulled from markets along the lower eastern seaboard, to be sold only in New England. Industry observers believe this scaling down to be an indication that A-B is getting ready to abandon its Wurzburger test and use its bottling capacity for Bud Light instead.

The company continues to distribute its beers internationally—with mixed results. Testing of "Busch" brands in parts of Berlin were discontinued, but the beer has gone national in France. A-B also has set its sights on South America and Sweden, where tests are under way. Budweiser has become the fifth best-selling brand in Canada, where it is brewed under an agreement with LaBatt Brewing Co. Michelob is also distributed in Canada under this agreement. A-B is also making inroads in Japan, where Bud is the largest-selling import at the 200,000 cases per year mark.

A-B had only mild success in its diversification efforts. In September, 1981, the company discontinued its foray into the soft drink business by withdrawing Root 66 root beer, and its diet counterpart, from the market. The brewer spent $248,000 in support of the faded soft drink.

But Eagle brand snacks are doing well. The premium-price snack line was expanded into 100 markets and is available at all major airports. Eagle is also being sold in some convenience foods stores as well as in drinking emporiums. In June, 1982, A-B named TBWA Advertising, New York, to handle the brand, which has had virtually no ad support so far.

The company got out of the direct-mail business as it discontinued its Clydesdale Collection mail order business after the limited venture's second year. In other A-B businesses, Metal Container Corp., its can manufacturing subsidiary, produced a record 3.6 billion beer cans, about 40% of its total annual requirements of more than 9 billion cans, and more than 10% of all the beer cans produced in the U.S.

A-B got out of the corn refining business in 1981 when it sold Busch Industrial Products Corp.'s Lafayette, Ind., plant to A.E. Staley Co., Decatur, Ill. Busch Industrial continues to market bakers yeast.

Busch Entertainment Corp., the company's family entertainment subsidiary, operates major theme parks in Florida and Virginia, a water park attraction in Florida and an educational play park in Pennsylvania. In 1981, the Dark Continent, the brewer's Africa-theme park in Tampa, drew approximately 2.9 million people, a decrease of 6.3% compared to 1980. The Old Country in Williamsburg also saw an attendance decrease of 2% from the previous year's numbers. But Adventure Island, also in Tampa, saw an increase of 11% in 1981 to 365,000 visitors. Measured ad spending was about $1 million compared to the previous year's $3.8 million.

Finally, A-B continues to support the St. Louis Cardinals Major League Baseball team. In 1980, the National League team posted losses of $3 million. Although last year's figures were not released, industry analysts say the loss was in the same neighborhood as the previous year. The brewer also completed negotiations to buy Busch Stadium, home of the Cards.

†AA estimate

B.A.T. Industries PLC, a London-based holding company and the 21st largest national advertiser, spent $199.3 million on advertising in the U.S. in 1981, more than double the amount spent in 1980.

Virtually all of the increase—108.1% higher than the 1980 figure of $95.8 million—is attributable to advertising and promotional support put behind Barclay, the controversial ultralow-tar cigaret marketed by Brown & Williamson Tobacco Co. B&W is a unit of Batus Inc., which in turn is the U.S. subsidiary of B.A.T.

Worldwide sales of B.A.T., the world's largest tobacco marketer, totaled $17.7 billion in 1981, an increase of 21% over the $14.6 billion recorded in 1980. Net earnings in 1981 jumped 55% to $693 million from $447 million in 1980.

At the same time, Louisville, Ky.-based Batus Inc., which operates tobacco, retail and paper units in the U.S., saw its sales increase by 10.4% in 1981 to $4.6 billion from $4.16 billion in 1980. Net income totaled $179.7 million, down 8.8% from $197 million in 1980.

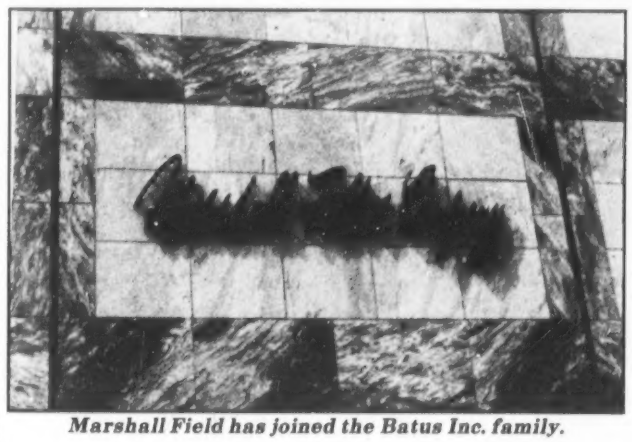
Among Batus' holdings, Brown & Williamson, also based in Louisville, is the biggest single unit. The tobacco operation's sales totaled $1.98 billion in 1981, an increase of 15.7% over the $1.71 billion in 1980. Operating income, however, declined 13.6% during the year, dropping to $252.4 million from $292.2 million in 1980. The company attributed the drop in part to the "substantial marketing investment" it is placing in its brands, particularly Barclay.

Batus' retail holdings comprise Saks Fifth Avenue, Gimbels, Kohl's food and department stores, Thimbles and—acquired in 1982—Marshall Field & Co. In 1981, the retail division's sales totaled $2.16 billion, an increase of 5.9% over $2.04 billion in 1980. Operating income fared better, increasing by 29.4% to $126.8 million in 1981 from $98.0 million in 1980.

Appleton Papers, Batus' paper operation, saw its sales rise by 9.7% in 1981 to $403.2 million from $367.6 million in 1980. But operating income of the Appleton, Wis.-based company declined to $36.9 million in 1981 from $39.0 million the year before, a drop of 5.4%.

The company blamed the decrease on depressed export sales, startup costs on an expanded plant in Harrisburg, Pa., and "unusual" one-time expenses.

Tobacco, of course, provides the basis of much of Batus' operations. During the year, Brown & Williamson, the nation's third-largest cigaret marketer, saw its share of the cigaret market rise to 14% from 13.7% in 1980. In all, the company sold 87.75 billion units in 1981. By contrast, market leader R.J. Reynolds Tobacco Co., which holds on to 33% of the market, had sales of 207.18 billion units.



Marshall Field has joined the Batus Inc. family.

Top executives at B&W and Batus professed to be pleased with B&W's ability to increase its market share, but they expressed even more delight at the progress made by Barclay, the 1mg smoke introduced nationally in January, 1981, with an estimated $150 million in advertising and promotional support.

Given that Barclay's ad budget was the highest for a new product in the tobacco industry's history, it would be expected that the bulk of attention paid to B&W—both inside and outside the company—would focus on Barclay. Industry watchers were not disappointed.

Not only did Barclay accumulate a 1.3% share by the end of 1981—which alone more than accounted for B&W's over-all share increase—but the 1mg tar claim and the cigaret's unique filter system stirred considerable debate and a Federal Trade Commission ruling adverse to B&W's interests.

R.J. Reynolds, one of B&W's chief competitors, lodged a complaint with the FTC in July alleging that Barclay's 1mg rating was inaccurate. The complaint charged that Barclay's filter "fooled" the regulatory agency's conventional method of testing

tar and nicotine levels. Indeed, part of Barclay's marketing effort was to position the cigaret as having fuller flavor than other ultralow-tar smokes, an advantage, B&W claimed, enabled by the different kind of filter Barclay uses.

In late June of this year, the FTC determined that its testing machines, in fact, could not validate the 1mg claim and that independent consultants had concluded the real rating for Barclay lay probably between 3mg and 7mg. The FTC did not take any legal action against B&W's advertising of the 1mg level, but it did advise the company to alter the claim. (The FTC determination could also affect B&W's Kool Ultra and Kool Ultra 100, which use the Barclay-type filter system.)

Shortly thereafter, the company won a temporary court order that enabled it to continue advertising the 1mg level. But, on a larger scale, it proposed a revamping of the FTC's tar reporting system that would halt the reporting of specific tar content numbers entirely, replacing them with four broader categories—ultralow (under 6mg), low (6mg to 10mg), medium (11mg to 15mg) and high (above 15mg).

"Barclay is a 1mg product, comparable in tar delivery to all other 1mg products," B&W said after the FTC action. "We believe we are right, and we stand behind our advertising claims."

That B&W is fighting hard to preserve the momentum that Barclay has developed in its first year should not be surprising. In introducing the cigaret, B&W used some advertising and promotional tactics that caught a lot of attention. There were two-packs-for-one offers, widespread couponing, the development of a sophisticated-looking "spokesman" (the urban cousin of the Marlboro man, some say) and perhaps the ultimate—carton giveaways by calling a toll-free number.

Competitors sought to take some of the luster off Barclay's numbers—termed the most successful cigaret introduction in a decade—by attributing a large portion of the share gain to the promotion. B&W did not say how much can be linked with the giveaways, but the company contended that it has been trying to build up a following with trial consumption, hence the importance of maintaining forward movement in the cigaret's evolution.

The heavy interest in Barclay certainly matched the heavy spending. In fact, according to Leading National Advertisers figures for 1981, total measured media spending for Barclay, $68.8 million, was almost double the $37.4 million spent for the rest of B&W's brands combined. Broken down, Barclay's measured spending (used for a campaign themed, "The pleasure is back") was allocated as follows: $38.3 million went to magazines, $11.8 million to newspaper supplements and $18.7 million to outdoor.

Possibly one reason B&W is putting so much effort into Barclay is to spark life into its other brands, all of which lost share points in 1981. The company's top seller, Kool, has lost its crown as the nation's No. 1 menthol, toppled by Reynolds' Salem. Its market share, moreover, continued to drop, reaching 8.4% in 1981, compared with 8.8% in 1980.

B&W's hopes for recovery in the Kool brand rests in part with Kool Ultra and Kool Ultra 100s, introduced in 1981. Those brands, however, could be affected by the FTC's action with regard to the measurement of Barclay's tar levels.

With the introduction of Kool Ultra, the brand's positioning received a more contemporary setting and the theme line, "There's only one way to play it. . . Kool." The jazz-like ambiance was perhaps appropriate, considering Kool's continuing sponsorship of Kool Jazz Festivals across the nation.

In 1981, measured media spending for Kool totaled $15.1 million, with $10.2 million going to magazines, $1.3 million to newspaper supplements and $3.5 million to outdoor. This compares with total spending of $28.3 million in 1980.

Raleigh, the second-ranking cigaret in B&W's stable, also saw its market share drop—albeit rather more slightly. At the end of 1981, Raleigh had 1.7% of the market, compared with the 1.8% it held in 1980. Unlike the other longtime B&W brands, Raleigh saw its measured media support increase in 1981, rising to $12.1 million in 1981, compared with $8.1 million in 1980. Of the 1981 spending, $5.3 million went to magazines, $3.7 million to newspapers supplements and $3.1 million to outdoor.

B&W's third brand, Viceroy, saw its share drop to 1.5% from 1.7% in 1980. Unit sales declined by more than 1 billion, a drop of 13%. And of all the brands, Viceroy saw its measured media budget slashed the most, down to only $101,200 in 1981, all to outdoor. This compared with a spending figure of $13.8 million in 1980.

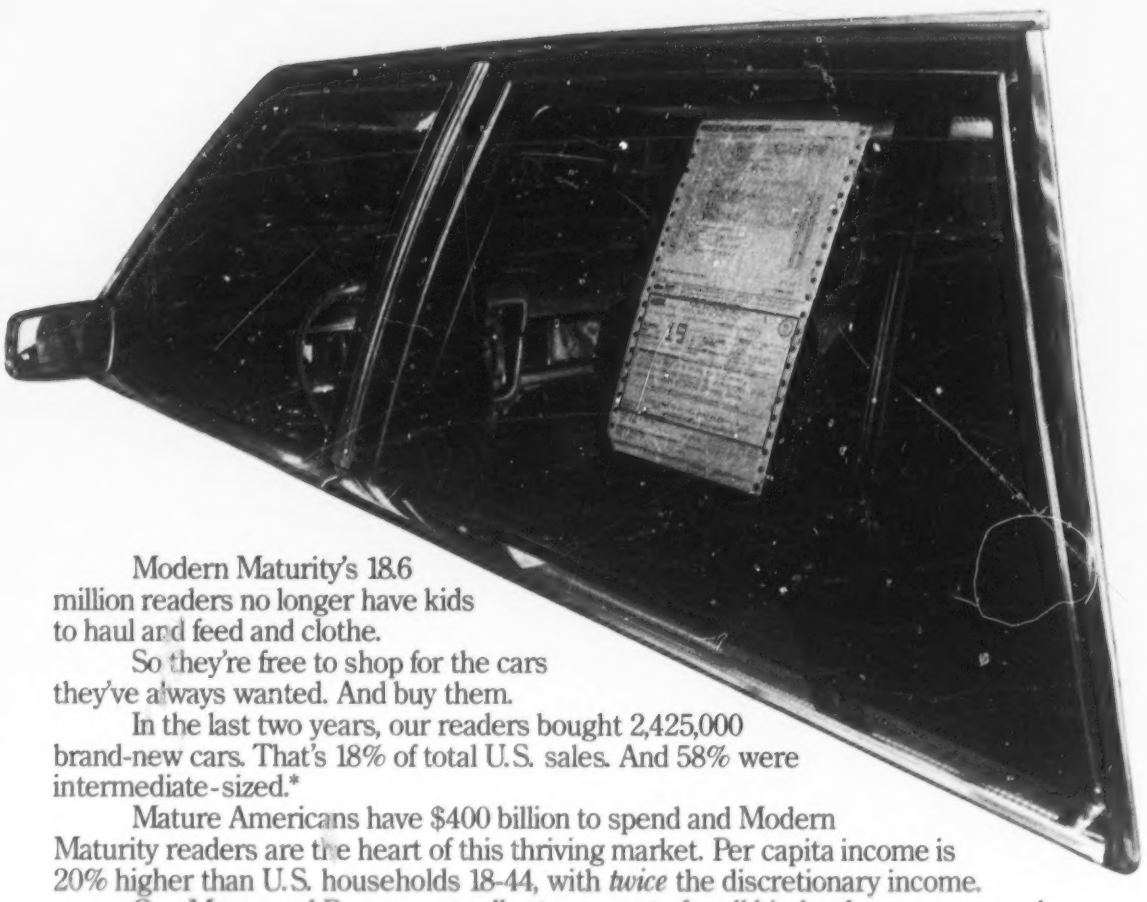
Belair, another B&W menthol, had a share of 1.1% at the end of 1981, compared with 1.2% in 1980. Measured media support declined slightly in 1981, dropping to $10.2 million from $11.2 million in 1980. Of the 1981 spending, $5.4 million went to magazines, $2.6 million to newspaper supplements and $2.2 million to outdoor.

In Batus' retail division, meanwhile, the major news came in 1982, when the company acquired Marshall Field & Co., the Chicago-based retailer. Batus' eventual offer of $30 per common share and $54 per preferred share was accepted by the Field board, despite strong dissent from a group of investors headed by Carl C. Icahn, a New York financier and arbitrageur, that tried to take over the company.

With the acquisition of Field, Batus agreed to cut back the amount of floor space it held in the Milwaukee area in order to win FTC clearance for the merger.

As with other retailers in the current economic environment,

Our Mom and Pop are great window shoppers.



Modern Maturity's 18.6 million readers no longer have kids to haul and feed and clothe.

So they're free to shop for the cars they've always wanted. And buy them.

In the last two years, our readers bought 2,425,000 brand-new cars. That's 18% of total U.S. sales. And 58% were intermediate-sized.*

Mature Americans have $400 billion to spend and Modern Maturity readers are the heart of this thriving market. Per capita income is 20% higher than U.S. households 18-44, with *twice* the discretionary income.

Our Moms and Pops are excellent prospects for all kinds of consumer goods and services. And they're yours at only $3.12 CPM for a color page.

* 1980 SMRB/Telmar Simulation

Modern Maturity
Our prospects are excellent.

performance figures at Marshall Field have been somewhat sluggish. In 1981, although the retailer had $1.19 billion in sales, up 17.9%, operating income increased by only 3.4% to $53.2 million from $51.4 million in 1980.

Among Batus' other retail holdings, the specialty stores—Saks Fifth Avenue, Kohl's department stores and Thimbles stores—have performed the best. In 1981, combined sales for the three units totaled $818 million, an increase of 16% over 1980.

Saks opened three stores in 1981—in Las Vegas, Nev.; Oak Brook, Ill., and San Francisco—giving the New York-based retailer 32 units across the country.

Kohl's department stores, positioned as a value-oriented merchandiser that lies between the discount store and the traditional store, opened four new units, three in Milwaukee and one in Rockford, Ill., the first one outside the Milwaukee area.

Thimbles, a specialty business that came into existence in 1980, is still in the development stage, the company said. The stores, located in suburban shopping centers in Detroit, Chicago, Milwaukee, Minneapolis, Short Hills, N.J., and Washington, specialize in women's fashions (particularly for career women) at popular prices.

In the department store category, Gimbels saw a 5.6% increase in sales in 1981 over 1980. Though the retailer shows signs of making some strides, especially in its Milwaukee and Pittsburgh units, it is still hampered by troubles in its New York stores, analysts said. But the parent company in recent years has attempted to revive the retailer through renovations and revised merchandising strategies.

The retailing division's food store unit—Kohl's food stores, with units in Wisconsin and Illinois—suffered from a 5.2% sales decline in 1981, compared with the 1980 total. The company attributed the drop to "increased competition and economic demands." Measured media advertising for the various retailers remained at about 1980 levels. For Saks, measured support totaled $2.2 million, about half of which went to spot tv, with most of the rest going to magazines. In 1980, Saks' spending came out to $2.5 million.

Measured media spending for Gimbels totaled $5.2 million—mostly in spot tv—up from the $4.3 million spent in 1980. Kohl's received $1.2 million in measured spending in 1981, all in spot tv. This was the same amount as that spent in 1980.

One B.A.T. holding with some marketing interest in the U.S. but not under Batus' aegis is Germaine Monteil cosmetics. In 1981, the various lines of cosmetics had measured media spending of $1.1 million, virtually all in magazines; this compares with $806,700 spent in 1980.

Advertising**	170,000,000	148,750,000†

*Fiscal year ends Feb. 28
**AA estimate
†Revised

Beatrice Foods Co., Chicago, the 33rd largest national advertiser, had 1981 total domestic advertising expenditures of an estimated $170 million, a 14.3% increase from 1980.

Net sales for the company increased only 3% in fiscal 1982 to $9.02 billion, while earnings rose 28%. Beatrice attributed the minor gains to its switch to LIFO (last-in, first-out) inventory costing method, as well as to a change from the deferred to the flow-through method of accounting for tax investment credit.

The year 1981 was a transitional one for the diversified food company, one marked by a new twist in the acquisition and divestiture strategy it has been following. The extent of these changes became apparent in October, 1981, after Beatrice disclosed plans for a hostile tender offer for AMF Corp., White Plains, N.Y., for $912 million. Although the plan was dropped, industry analysts were surprised at the lengths Beatrice would go in order to expand its operations.

A company official said, "Unfriendly takeovers still aren't our style, but given the current climate, we may have to look at it as an option." A Paine, Webber analyst called the plan "as sharp a departure as you'll see."

James Dutt, chairman-chief executive officer, outlined new economic goals for his company, one of the country's largest food processors, including an increase of equity returns, now at 16.9%, to 18%, and a real growth rate of 5% a year. Divestitures and acquisitions obviously should play a key role in achieving these goals. Since his appointment in 1979, Mr. Dutt has been responsible for divesting operations that accounted for $1 billion in sales in 1979.

The most notable sale in 1981 was that of Dannon yogurt, sold to France's BSN/Gervais Danone for $84.2 million. The decision to sell the highly successful yogurt marketer was based on increasing competition and the rapid maturing of the yogurt market. Sales for Dannon had reached a high point in 1978, although the company has maintained its commanding 35% share of the yogurt market.

On the acquisition side of the ledger, Beatrice seems to be seeking larger food and beverage companies rather than many of the less sizable units upon which it built its empire. The company believes the beverage business will contribute to its long-term success, and that this focus will narrow its base of interest and make it more competitive.

This year, Beatrice paid a controversial $580 million for the beverage segment of Northwest Industries, a sum many industry analysts saw as excessive. The purchase included Coca-Cola Bottling Co. of Los Angeles and Buckingham Corp., a wine and liquor distributor. Although Beatrice's bottling acquisition and the Coca-Cola Co. are separate entities, press reports have noted that the Atlanta-based soft drink marketer's Minute Maid orange juice is a major competitor to Beatrice's Tropicana.

The purchase gives Beatrice an additional entry into the bottled water market with the bottling company's Arrowhead Puritas Waters and Great Bear Spring Co., and strengthens its position in the wine and spirits industry. Buckingham, a marketer of Cutty Sark scotch, also distributes Mouton-Cadet, the leading branded Bordeaux wine in the U.S.; Finlandia, the second-largest imported vodka, and Waterford Irish Cream liqueur, an entry in what has been among the hottest of liquor categories.

Despite criticism of the high price paid for the beverage business the company acquired from Northwest Industries, Tom Kemp, president of Beatrice's soft drink and bottled water division, speaks positively of the tradeoff, favoring the strength of the premier cola: "We're virtually everywhere in our market. When the product is available and reinforced with a strong image through advertising, that adds up to good sales."

In line with this thinking, the company recently purchased two more California-based Coca-Cola distributors, in San Diego and San Bernardino.

In conjunction with Beatrice's shift of allegiance in the beverage industry, the company's nine Royal Crown Cola bottling operations and Seven-Up Bottling Co. of Denver were sold. An agreement was reached in December, 1981, for a sale to a new company owned by Forstman Little & Co., soft drink division executives and private investors.

Meanwhile, among its current holdings, Beatrice increased its measured media advertising support by 48% across the board, up to $46.5 million from 1980's $31.4 million, according to Leading National Advertisers. The company altered its media distribution, increasing newspaper advertising 125% to $5.7 million for the calendar year, and magazine ads 192% to $12.4 million, compared with 1980's $4.2 million. In radio, the company made an even switch, cutting network expenses 60% to $223,100 from last year's $556,500, and increasing spot radio to $4.8 million, a 60% increase from 1980. The budget for network tv was trimmed by 16% this year, while spot tv grew to $15.8 million, an 8% increase.

Tropicana, the company's orange juice operation, had a troubled year, beset by adverse weather in Florida and legal problems. In late 1980, an administrative law judge for the Federal Trade Commission ruled that Beatrice's acquisition of the fresh fruit juice producer was unlawful under antitrust statutes, and that Beatrice must hand over all profits generated by Tropicana to the federal government since its acquisition in 1978. The FTC is reviewing the decision, and although Beatrice management expects a favorable outcome, industry speculation is that the possibility of losing Tropicana—and 61% of all Beatrice's beverage profits—has had an impact on the company's intent on acquiring beverage interests.

Although Tropicana, based in Bradenton, Fla., does not own any fruit groves, production, supply and distribution were adversely affected by the winter freezes in Florida, damaging 85% of the fruit crop. Tropicana buys about 15% of all citrus grown in Florida.

Former Tropicana chairman-ceo Ken Barneby resigned this year and was replaced by Richard Walrack, a Beatrice veteran from the dairy division. Mr. Walrack's appointment accompanies a push for renewed profit growth, and plans are being made to expand the Florida operation. Production capacity reportedly will be increased by 30 million gallons through a $15 million dollar enlargement of Tropicana facilities. Management hopes increased production will boost Tropicana's 24% share of the orange juice market, squeezed down from 30% when Beatrice acquired the company.

Total advertising expenditures for Tropicana increased 35% in 1981 over 1980, and measured media spending alone shot up 160% to $6.8 million, from $2.6 million in 1980. For the first time, other Tropicana juice products, including orange juice made from concentrate, are being supported by their own campaigns.

One such product is Tropicana's new Chugger, a shelf-stable, all-natural, 100% juice from concentrate available in orange, apple and grapefruit flavors. Although no ad budgets were disclosed for Chugger, the tv commercials created for the product achieved some notice when networks questioned the acceptability of the commercial's "Chuck the soda" theme, an interesting campaign in light of Beatrice's hope for growth through its new Coca-Cola bottling acquisition.

Also new at Tropicana is product differentiation, as the company now markets different grades of juice. A premium pack made from fresh juice is being promoted in commercials featuring Olympic decathalon-winner Bruce Jenner. In addition, to alleviate shortages caused by future winter freezes, the company has introduced Tropicana packaged in an orange carton and made from concentrate. The separation is expected to build product awareness. The company is also planning to revamp Tropicana's packaging.

Another step in beverage growth was the introduction in 1981 into Midwest-Mideast test markets of Cap 10, "the perfect adult thirst capper."

Beatrice is also concentrating on growth in the snack and confectionery division. In 1981, sales were $602 million, up 15% from $522 in 1980. Joining its battery of performers were new acquisitions: Good 'N Plenty, Good 'N Fruity and Rothschilds rolled candy bought by Beatrice's Switzer Candy Co. The company also purchased Callard Bowser & Nuttall, a subsidiary of Arthur Guinness & Sons in the U.K.

Eckrich meats, one of Beatrice's most successful companies, had sales of $678 million in 1981, down from the previous year's $689 million. Earnings were up to $53 million, from $50 million in 1980. The specialty meat company introduced nine products in 1982, including additional smoked sausage products, dinner franks and smoked ham. Eckrich had measured media spending in 1981 of $3.9 million, up 9% from 1980's $3.6 million.

La Choy food products gained 6% in sales this year, while earnings grew by 12%. The frozen foods division of La Choy increased measured ad spending 25% for the calendar year, while total ad spending grew 13% to $3.1 million from 1980's $2.8 million.

In November, 1981, Beatrice

formed a joint venture in the People's Republic of Chi... with Canton's municipal government to produce canned fruits and vegetables, as well as citrus juices and soft drinks. Plans call for the plant to produce goods for export and the Chinese market.

In its consumer, industrial and chemical segment, Beatrice maneuvered to acquire Louver-Drape Co., the vertical blinds maker, while it sold Buxton Leathers, including the line of Bill Blass designer products.

Samsonite, Beatrice's luggage marketer, experienced a decline in domestic sales, but volume increased abroad.

Measured media support for Samsonite was cut 37% during the year, to $2.6 million, as the company switched to pricing promotions. But spending is expected to increase in fiscal 1983 to support a number of new products.

Another Beatrice unit, Culligan International, experienced sagging domestic sales, but gains abroad helped bring revenues by some estimates to $400 million in fiscal 1982. Culligan's ad expenditures jumped from $5 million to $8 million during the year, and dealer prices were cut up to 15% in an attempt to regain its 25% share of the domestic household water conditioning market. Its share has dropped to 14.5% while maintaining a 21% share of commercial markets. Culligan advertises primarily through spot tv.

*Worldwide figures. AA conversion
**AA estimate

Beecham Group Ltd., Clifton, N.J., the 77th largest national advertiser, spent an estimated $68.4 million in advertising in 1981, a 22% increase from last year's $56.6 million. Worldwide sales for the company increased 10.2% in 1981, up to $2.95 billion.

An increasingly aggressive presence in new product categories, such as skincare and liquid soap, and increased spending for established cosmetics contributed to the increase in ad expenditures.

Beecham changed its media mix substantially this year. Newspaper advertising increased 71% in 1981, farm publication spending grew by 50% and magazine ad spending was up 11%. Expenditures for national tv, the biggest ad medium, were $54.9 million, an increase of 26% from 1980.

The Beecham Group has two consumer products groups in the U.S. The Jovan division handles the company's Jovan, Yardley of London, Lancaster and Beecham cosmetics products.

In May, Jovan entered the suncare products category with Dial-a-Tan with a $2 million ad campaign hyped, "the most revolutionary suncare products in the history of the world."

Jovan is also planning a fall introduction of Glacier men's aftershave, a moderate priced item, and Island Gardenia, a gardenia-based perfume and cologne, using magazines only, according to David Miller, director of advertising for Jovan.

Jovan's creme soaps, introduced in October, received $163,600 of ad support in the last three months of 1981, all in consumer magazines.

Jovan division acquired a new subsidiary called OMNI, which expanded into children's toiletries with a 12-item "Star Wars" line this summer. Network tv broke in July.

Courting other star frontiers, Jovan Inc. signed with Mick Jagger & Co. as sponsors of the Rolling Stones' 45-city U.S. tour to promote its fragrances. Jovan also offered a Stones poster for $1 to customers buying $5 in products and staged a radio contest promotion in about 180 markets.

Beecham Cosmetics' Vitabath, a bathing gel product, received a measured spending increase of 130% this year, boosted to $449,200 from 1980's $188,700. A new campaign touts the bath gel as the "ultimate dimension of bathing."

Yardley of London, another division of Jovan, made its first venture into skincare with the introduction in February of Yardley Liquid Complexion soap and the launch in spring of Yardley of London Aloe Vera, with ads themed, "How to make your skin the best it can be. How to keep it that way." No ad budgets were revealed.

Advertising for Yardley's liquid toilet soap jumped 120% to $1.2 million with $312,200 to magazines, $94,900 to spot tv and $807,900 to network tv, an area that was not used at all in 1980. In addition, Yardley soaps increased advertising to $245,300 in 1981, after spending only $2,000 in 1980.

Aqua-fresh, Beecham's entry in the toothpaste market, holds a competitive 13.5% share of the market only three years after its introduction. Positioned as a decay fighter as well as a breath freshener, the brand is third only to Procter & Gamble's Crest (No. 1) and Colgate-Palmolive's Colgate. Measured media support for Aqua-fresh came to $21.6 million this year, a scant 1.5% increase from 1980's $21.3 million.

Aqua-fresh recently launched a new version, with the addition of a red stripe. The brand was reintroduced as "triple protection" Aqua-fresh. Spending for this push is not reflected in measured media figures as yet.

Beecham Group's parent company, Beecham of London, spent $3.9 million in a June, 1981, for the launch of a liquid soap product, Supersoap. A similar product called Sameta, made by Beecham's German subsidiary, Lingner & Fischer, was introduced in Germany in November, 1981.

Spending for Sucrets lozenges and Sucrets children's lozenges decreased 3% in 1981, down to $4.9 million. Hold cough suppressant cough drops maintained 1980's spending level at $2 million, all in net tv.

Cling Free fabric softener increased advertising expenditures 35% this year, from $5.4 million to $7.3 million; $7.2 million went to buys in net tv.

Massengill disposable douche and Massengill medicated douche increased measured advertising support for the two products 81% this year, to $7.9 million from the previous year's $4.4 million.

Borden Inc.

	1981	1980
Sales	$4,415,174,000	$4,595,795,000
Earnings	159,939,000	147,863,000
Advertising*	44,019,000	51,695,700

*AA estimate

Borden Inc., Columbus, O., is the 92nd largest U.S. advertiser. Advertising expenditures in 1981 of $44 million (according to AA estimates) showed a 15% decline over 1980 figures. Sales declined 3.9% to $4.4 million, down from $4.6 million in 1980. Earnings, however, were up 8.2% in 1981, with a showing of $159.9 million as opposed to the previous year's figure of $147.9 million.

For the first quarter of 1982, net earnings included an after-tax gain of $17.6 million or 61¢ a share from the January, 1982, sale of three Pepsi-Cola franchises and provisions for losses on the disposal of other operations.

For the first six months of this year Borden reported a 6.6% increase in net income to $77.2 million and a 13% decline in sales to $1.97 billion.

Borden's chairman-chief executive officer, Eugene J. Sullivan, said income from ongoing opera-

tions of the consumer products division was "moderately" ahead of last year despite the loss of income from its Pepsi-Cola bottling business. The company sold the three bottling franchises to the Pepsi-Cola Bottling Groups (a subsidiary of Pepsico) on Jan. 25, 1982. The sale of the franchises essentially concluded the disposal phase of Borden's assets redeployment program first announced in July, 1980. The consumer products division also withdrew from the nut processing and natural cheese businesses.

Mr. Sullivan said the excellent performance of the pasta, bakery and dairy operations enabled the division to increase operating income from last year's level. The "sharp drop" in the chemical division income for the first quarter of 1982 was blamed on "near catastrophic" conditions in the housing and automotive industries, and higher natural gas costs of $9.6 million. The chemical division is a major supplier of adhesives to the forest products industry and of polyvinylchloride resins and vinyl materials to the housing and automotive markets.

On June 1, Borden acquired Du Pont Co.'s line of car care products, including waxes, polishes, cleaners and sealants under Rain Dance, Rally, and No. 7 brands and "performance" products such as radiator chemicals and gasoline additives under the Du Pont trade name. The line was assigned to the home and professional products group of the consumer products division, with advertising to Grey, Lyon & King.

In the summer of 1981, Borden's dairy division entered the fruit juice category with an aseptically packaged orange juice called Sippin' Pak. The product is still in test market. Another new product that will be rolled out nationally after being test marketed in Albany, N.Y., and Charlotte, N.C., is Cracker Jack Extra Fresh Popping Corn.

The company's earnings over the past five years have shown steady increase. There was a loss of income of $40 million in 1981 from operations that had been divested—but the operating divisions more than made up this amount.

Borden's priority for the future is to channel its resources into fewer areas of business, those that provide the highest return and show the greatest growth potential. Consumer products and chemical products for specialty markets can be expected to benefit from this commitment.

Eagle Brand sweetened condensed milk showed substantial sales with heavy tv and print advertising support (expenditures for network tv increased by $2.2 million in 1981) positioning it as "America's dessert maker." The Borden powdered drink mix line increased volume and market share with the national rollout of ReaLemon lemonade crystals and expansion of the Wyler's unsweetened line. Wyler's will test market a line of drink mixes artificially sweetened with aspartame this year. Orange Burst, a new instant breakfast drink, continued to be test marketed with results satisfactory to the company.

The grocery products group's cheese operations withdrew from the packaging of natural cheeses for sale to retail, in keeping with the redeployment program. Cheese manufacturing operations were consolidated at one plant in Wisconsin, reducing operating costs. Borden continued its No. 1 position in the diet/health segment of the cheese market, with the national rollout of Lite-line Swiss slices. Increased ad spending and promotion (the major portion going to network tv) contributed to the strong performance in this category. Country Meadow slices (a low-cholesterol product) and Cheez Twin slices (a cheese substitute) continued in test market.

The snacks group's corn-based snacks had a good year. Cheez Doodles had a 15% gain in sales, with $689,000 of the ad budget going to spot tv. Corn Crunchies, Borden's entry into the corn chip market, showed sales up 68%, and sales of Wise tortilla chips were up 17%. Single-serve snacks made from ingredients other than corn or potatoes were introduced; also introduced was a no-salt-added potato chip.

The specialty products group includes the consumer products division's confections, pasta and Galloway-West operations, which produces cheese cultures used by the dairy operations and sold to cheese factories.

Cracker Jack's sales growth was helped by a $6 million "Super Surprise Sweepstakes" promotion and by the addition of flexible-bag packaging for Cracker Jack candied popcorn.

Borden's pasta products, under the Creamettes brand, gained greater penetration into the Midwest and expansion into new markets in the West. Pasta operations were bolstered by Borden's acquisition of National Food Products, New Orleans, which is the largest distributor of pasta in its market area.

Borden's bakery operations, under the Drake's brand, expanded its snack cake line with two entries in the large volume sponge cake market—strawberry and banana—and Fudge Mates, a new cupcake entry.

Elsie the cow played a major role in dairy product promotions. The cartoon was featured in all the group's advertising, and Elsie, on the hoof, even took part in the Mardi Gras.

In the chemical products group, the Krylon line of spray paints, backed by $2.4 million in ad support, registered a good performance in 1981. The Elmer's line of adhesives and sealants ($2.99 million total ad expenditures in 1981) gained from a strong market in do-it-yourself home improvement.

Bristol-Myers Co.

	1981	1980
Sales	$3,496,700,000	$3,158,300,000
Earnings	305,800,000	270,600,000
Advertising*	200,000,000	196,286,400

*AA estimate

Bristol-Myers Co., New York, the 20th largest national advertiser, is estimated to have spent approximately $200 million on domestic advertising in 1981, a modest gain over the $196.3 million spent in 1980, but still below the more than $210.6 million spent in 1979. According to Television Bureau of Advertising figures, tv spending was down 3% last year to $121.5 million.

The company's reported worldwide advertising and product promotion expenses of $555.3 million showed a more than 8% increase over the $513.2 million spent in 1980.

The company had record sales of $3.5 billion, an 11% increase over 1980. Net earnings rose 13% to $305.8 million, following increases of 17% and 14% in 1980 and 1979, respectively.

Bristol-Myers markets more than 1,000 products in 100 countries. Its products are grouped into four industry segments: Toiletries and beauty aids, nonprescription healthcare, household, pharmaceutical and medical products. All four segments posted sales and earnings gains last year. The pharmaceutical and medical segment is the company's largest and most profitable segment and contributed 37% of total sales in 1981, with a 13% sales gain. Pharmaceutical, nutritional and medical product sales have been growing at a faster clip than consumer products. The toiletries and beauty aid business segment comprised 25% of the company's total 1981 sales. Sales and operating profit for nonprescription healthcare products were 18% higher last year, and household product sales were up 8%.

For the first half of 1982, worldwide sales were $1.76 billion, a 3% gain over 1981's opening six months. Net earnings meanwhile increased 16% to $160.5 million.

Bristol-Myers is the leading seller in the growing domestic nonprescription drug market, where its sales constitute a 9% share of the total market. Last year's 18% gain in nonprescription health product sales produced a yearend sales volume of $888.7 million. The operating profit margin, meanwhile, topped 19% for the third straight year.

To hold onto the eye-popping sales gains its Comtrex multisymptom cold remedy has chalked up since its debut in 1978, the company boosted spending for the line by at least $3 million, according to measured media figures. The measured media total of $14.7 million is up from 1980's $11.8 million, and is double what it was the year before. The Comtrex line expanded with the introduction of Comtrex Nighttime cold medicine, which received $2.6 million in measured support, with $2.4 million spent on tv. A Maximum Strength Comtrex Nighttime formula is also now on the market. An aggressive door-to-door sampling campaign for Comtrex in the Albany market, aimed at fighting off some newly introduced competition there, drew some criticism during the year.

The company also tested Extra D/M high potency multisymptom cold remedy in North Carolina test markets.

Extra Strength Bufferin was introduced last year, and was

Source: Leading National Advertisers, in cooperation with the Institute of Outdoor Advertisers and the Outdoor Advertising Assn. of America.

backed with $10 million in measured media spending. Of that, $8.7 million of it went to tv, and $1.4 million was spent in magazines, using the campaign theme: "The pain stops here." Extra Strength Excedrin got a five-fold measured media spending increase last year, and went from $3.3 million of measured support in 1980 to $15.7 million last year. About $14.1 million was spent in tv and $1.6 million in magazines. Excedrin PM, meanwhile, received $2.8 million in measured support. Total Excedrin sales amount to roughly 7% or 8% of the U.S. analgesic market. Congespirin received $1.7 million in measured support, and 4-Way nasal spray received over $2.2 million.

In the deodorant category, market leader Ban Roll-On received $8.5 million in measured support last year, up from 1980. A new Extra Strength Ultra-Ban was introduced and was backed with an $8 million campaign.

To help its major products get off to a solid 1982 start, Bristol-Myers set aside $10 million of this year's national ad budget for distribution to retailers for local tv and radio buys during the first half of the year. The money was distributed according to the amount of products the retailers purchased during 1981's closing six months.

Hemcare, a contender in the $90 million a year hemorrhoid remedy market, was tested in southeastern U.S. cities last year. The company has been trying to get into this market since 1975, when it tested what was then called Hemtrex. It was withdrawn and later reappeared in test markets in 1980.

Clairol is the dominant marketing force in the haircoloring market and its sales add up to an estimated 60% of that market's total sales. Leading products are Nice 'n Easy, which has about a 16% market share; Loving Care, which has a 13% share; and Clairesse, with about a 5% share. According to Clairol executives, Nice 'n Easy and Loving Care sales in 1981 were well ahead of 1980 sales. Final Net, meanwhile, continued to hold down its position as the leading hair fixative.

Clairol's most heavily advertised products, according to the measured media figures were: Nice 'n Easy, which got nearly $7.3 million in ad support (including $5.2 million in tv, with the remainder going to magazine and newspaper supplement support; Clairol Loving Care, which got $6.7 million; Clairol Final Net, $6.7 million; the Clairol conditioner line, backed by over $6 million in spending; Clairesse, $4 million; Miss Clairol color shampoo, which got $3.8 million in tv support; Miss Clairol with color hold, which got $1.6 million in magazine support, and Clairol Frost and Tip haircare kit, which got $1.3 million.

On the new product front, Kindness Body Wave was introduced to the market in December. A $7 million introductory campaign, featuring $4.2 million in network tv and the rest in women's magazines and newspapers, supported the introduction, along with a refund offer, sweepstakes and couponing.

Clairol's ad campaign for Body on Tap shampoo, which focused on comparisons with Sassoon shampoo, got Clairol involved in litigation, and the campaign was eventually discontinued.

As a group, Clairol beauty appliances got a total of $1.4 million in measured media ad support last year. The Clairol Foot Fixer Massager topped $1 million in measured spending but that was a loss from 1980, when it was supported with a budget of nearly $1.4 million. Clairol Kindness hairsetter received approximately $1 million. The division launched several high-tech appliances in 1981, including the Clairol Custom CareSetter, featuring smooth surfaced rollers; the Clairol SST Electronic hair dryer, and the Clairol Kindness Quartz hair dryer, for curly hair.

The company's household products, marketed through the Drackett division, include Windex glass cleaner, Drano drain opener, Vanish bowl care product, Behold and Endust furniture care products, Renuzit air freshener, and O'Cedar mops and brooms. Windex received $4.9 million in measured media spending last year. Drano liquid received $3.1 million, Drano powder got $1.6 million, and Endust received nearly $2 million.

Drackett's Vanish toilet bowl cleaner suffered a vanishing share of market in the face of introductions by several competitors of chlorine-action cleaners. Ads promoting Vanish as "tough on stains, safe on plumbing," helped turn the tide on the declining market share but embroiled Drackett in legal battles with the competition, which charged Drackett with running a disparagement campaign.

An advocate of self-produced programing, Bristol-Myers was one of the first major advertisers to get involved in syndicated tv, sponsoring a variety of syndicated shows in the last decade. The longest running of them is the "In Search of" series, which it uses as a network and spot tv supplement for its major brands. Just as it views syndicated tv as a supplementary ad vehicle, it increasingly is viewing cable tv.

The major cable event was a 10-year, $40 million deal with the USA Network to produce and sponsor the "Alive and Well" health, beauty and life style show, aimed at the women's market. Another major cable deal was a six-figure buy on the ESPN all-sports network. That buy, for Vitalis, for the final commercial break on more than 200 collegiate sports telecasts, also includes options that could see more than $2 million in Vitalis ad money going to ESPN in the next few years.

Other cable ventures include sponsorship of a monthly movie on WTBS, and two-minute medical news bulletins on the Cable News Network. Bristol-Myers executives view cable as a vehicle to promote promising products not heavily advertised, an experimental forum where they can test commercial lengths and patterns, and a vehicle to provide supplementary ad exposure for major brands. With its increased cable tv involvement last year, Bristol-Myers now reaches about 75% of the more than 20 million cabled households in the country.

Internationally, Bristol-Myers markets its pharmaceutical, nutritional and consumer products through its international division and through subsidiaries and distributors. Antibiotics, cardiovascular and anti-cancer products are its major product categories. The major consumer product markets are Europe, Latin America, Australia and Asia, where the important brands include Nice 'n Easy and Miss Clairol haircolorings and Mum deodorants, Clairol Herbal Essence and Body On Tap shampoos. Mum 21, a fragranced deodorant spray, is reportedly doing well in several European, Latin American and Asian countries.

The company's Zimmer USA division is a leader in the biomedical implant field and manufactures and distributes orthopedic, surgical, patient care and hospital products. It had a record sales year, with significant increases in the sales of total knee and hip prosthesis. Several innovative new products were introduced, including a voice prosthesis. Zimmer is also entering diagnostics with an arthroscopy system for visualization of joint surfaces inside the body.

Bristol-Myers is also a major force in the dental products market. Its Unitek division manufactures and markets a wide range of products for orthodontists, endodontists, and other dental specialties, as well as for general dentists and dental laboratories. Professional Positioners Inc., a domestic subsidiary of Unitek, manufactures custom-made positioners and retainers for orthodontists. The Pelton & Crane division, meanwhile, is a designer and marketer of a range of dental products, but is best known for its dental chairs, autoclave sterilizers and operating lights.

Early in 1982, a new science and technology division was formed. The unit includes the industrial division.

Brown-Forman Distillers Corp.

	1981	1980
Sales*	$860,556,000	$768,772,000
Earnings*	86,771,000	67,249,000
Advertising**	78,000,000	65,000,000

*Fiscal year ends April 30
**AA Estimate

Brown-Forman Distillers Corp., Louisville, Ky., the 70th largest national advertiser, increased its advertising to an estimated $78 million in calendar year 1981, some 20% higher than the $65 million spent in the previous year. Ad spending, furthermore, is expected to continue its climb, with the company set to invest $300 million in advertising over the next three years.

Brown-Forman's sales for the 1982 fiscal year were up 11.9% to $860.6 million, compared with fiscal 1981 sales of $768.8 million. Earnings rose 29% in fiscal 1982 to $86.8 from $67.2 a year earlier. It was the 24th consecutive year of increased sales.

Of the $78 million spent on advertising in 1981, which is charted on a calendar basis, $37.9 was for measured media, a 20.3% increase from a year earlier. There was a heavy increase in spot television, with $7.9 spent in 1981 compared with $3.6 in 1980. Spending increased for newspaper, magazine and outdoor advertising and decreased for network television. Spot radio was added to the media list in 1981 with an expenditure of $176,500.

According to Leading National Advertisers, Brown-Forman's most heavily advertised products were Canadian Mist Canadian whisky, $6.97 million, down from $7.5 million; Bolla Italian wines at $5.56 million up from $4.7 million; Cella Italian wines at $6.5 million, up from $4.4 million; Jack Daniel's Tennessee whisky, $4.49 million, up from $3.5 million, and Southern Comfort liqueur at $4.6 million.

Jack Daniel's Tennessee whisky continues to be the company's flagship brand, with Jack Daniel's Black Label worldwide depletions (sales from wholesale to retail) reaching 4 million nine-litre cases.

The Jack Daniel Distillery itself again provided the imagery and focus for advertising and promotional efforts as it has for more than a quarter of a century. Included on the National Register of Historic Places of the Department of the Interior, the distillery, located in the foothills of the Cumberland Mountains in Lynchburg, Tenn., is a top tourist attraction. Routine happenings in Lynchburg are highlighted in the brand's magazine ads which, through "candid" black-and-white photography and home-spun copy, have become a Jack Daniel's trademark and classic example of consistency in marketing communication strategy.

Impact, the wine and spirits newsletter, calls Jack Daniel's "the distilled spirits industry's most dynamic growth brand," predicting the brand will be America's No. 5 brand in sales by 1985. It was No. 31 10 years ago.

In 1970 Jack Daniel's held a 2% share of the American bourbon market. Its share in 1981 was 13%. The winner of *Impact's* 1980 Brand Performance Index for the decade was Jack Daniel's Black Label.

Advertising for Jack Daniel's shifted in the 1970s from newspapers to newsweeklies and publications like *Esquire, Harper's, Atlantic, The New Yorker* and *Sports Illustrated*. Research showed the brand was popular among college-educated 21-to-35-year-old males, a group the company believed was not reached efficiently via newspaper ads. The company advertised Jack Daniel's in 28 magazines in 1977; the list grew to 48 in 1981.

Recognizing a potential market with upscale working women, Jack Daniel's has been one of the first liquor brands to run ads in *Ms., Working Woman, Self* and *Savvy*.

Depletions of Early Times Kentucky bourbon fell 2% in fiscal 1982 to 2 million cases. However, in each of the last three quarters, depletions exceeded those of comparable quarters in the previous fiscal year. The Early Times label has been redesigned and will appear in the fall along with a new theme: "There are no better times than these."

Wholesale to retail sales of Old Forester Kentucky Bourbon, the company's original brand, were off sharply to 600,000 cases. The trend among consumers seems to be away from traditional premium-price bourbons. Old Forester unveiled its first campaign targeted exclusively to the black market during fiscal 1982 with the theme line: "Old Forester. The real taste."

Based on industry data for the top 20 spirit brands, Brown-Forman's leading imported spirit, Canadian Mist Canadian whisky, recorded the second-largest gain in domestic case depletions in calendar 1981, exceeded only by Jack Daniel's. Depletions climbed to 3.5 million cases in fiscal 1982.

According to *Impact*, Canadian Mist holds a commanding position in the bulk-Canadian market segment. In 1981, the brand held a 14% category share, up from 5% in 1970. One of Brown-Forman's most heavily advertised brands, Canadian Mist, ranks as one of the largest outdoor advertisers in the country. The brand's advertising to blacks, which urges consumers to go "Misting," has remained relatively unchanged since 1974. Recently, Canadian Mist has placed increased emphasis on mail-order programs featuring discounted brand premiums ranging from a "Misting" jumpsuit to a scale model of the de-Havilland Beaver, a bush plane produced in the 1950s that still serves rugged northern areas today.

Depletions of Usher's Scotch, the company's second-largest imported spirit, fell by 4% in fiscal 1982 to 500,000 cases as the result of price increases which Brown-Forman says were necessary because of higher supplier prices. Because the value of the U.S. dollar against the British pound improved earlier this year, Brown-Forman was able to reduce prices, a move which the company hopes will considerably strengthen Usher's competitive position.

Worldwide depletions of Southern Comfort fell slightly in fiscal 1982 to 1.8 million cases, although domestic depletions picked up noticeably after the first quarter. Credited with the increase were new general and black marketing campaigns stressing mixability, occasions for usage and the position that "Everyone needs a little Comfort."

Cella Italian wines, the company's largest-selling wine brand, continued to outpace the rapidly expanding market for imported wines as depletions rose 16% to 2.9 million cases. The brand was heavily supported in fiscal 1982 with increased use of tv advertising centered primarily on its popular spokesman, Aldo Cella. A new public relations campaign included a tour of several cities by Aldo Cella highlighted by his appearance on the nationally syndicated "Mike Douglas Show" and the "Today Show."

Bolla's position as the leading premium imported wine in the U.S. was reinforced in fiscal 1982 with one of the largest advertising budgets of any wine brand.

The Bolla sales message was seen and heard on network and cable tv, national consumer magazines, and national and local press. Bolla continues to associate with the affluent life style by sponsoring events such as Louisville's Bolla Hardscuffle Steeplechase and the Bolla Young Artist Series. More recently, the brand was one of the sponsors of the prestigious Wimbledon tennis tournament.

Martell Cognacs remains one of the biggest sellers in the rapidly growing U.S. cognac market.

The brand is aggressively seeking further sales expansion with individual marketing campaigns aimed at general, black and Hispanic markets.

The Korbel line of California champagnes and brandy grew 2% in fiscal 1982 to 930,000 cases. Korbel introduced a new and already critically acclaimed Blanc de blancs champagne in October.

CBS Inc.

	1981	1980
Sales	$4,125,954,000	$4,062,052,000
Earnings	163,811,000	189,708,000
Advertising	134,010,000	132,372,000

CBS Inc., New York, the country's 46th largest advertiser, raised its advertising expenditures 1% in 1981 to $134 million. In 1980 the company spent $132 million.

CBS measured media spending rose in only two categories: Newspaper and spot radio. All others—magazine, spot tv, network tv, network radio and outdoor—showed substantial declines.

In 1981, CBS revenues rose by 3% to $4.13 billion, but net income fell 14% to $163.8 million, a figure that reflected discontinuation of CBS' mass-market paperback operations. Income from continuing operations in 1981, however, was only slightly lower than in 1980.

Foreign revenues decreased 4% to $719.1 million. Profits on those sales rose 7% to $88.9 million. Domestic earnings decreased 11% on a revenue gain of 5%.

The company reports that the 1981 performance was shaped by three general factors: A recessionary economy, structural changes in certain aspects of CBS' business and ambitious efforts at new business development.

In the first half of 1982, CBS net income showed an 8% decline to $58.3 million from $63.6 million a year ago. Revenue increased 4% to $2.04 billion from $1.97 billion in 1981. The company said it was "satisfied" with these results, given the generally poor economic climate that prevailed.

The CBS/Broadcast Group, the largest and most profitable operation of the company, reported a rise in profits of 21% to $299.6 million. Its performance more than compensated for the difficulties faced by CBS/Records, Columbia and Publishing groups. The second-highest source of revenue was the CBS/Records Group, which contributed $48.6 million on revenues of $1.2 billion. Operating profits for the CBS/Columbia group decreased from $16.6 million to $4.5 million. Operating profits for the CBS/Publishing group decreased from $43.2 million to $41.8 million on a 5% revenue gain.

The company also made some major advances in the new communications technologies—in cable, in teletext and videotex and in home video.

CBS announced plans for a videotex trial in partnership with AT&T. It also received permission from the FCC to purchase a cable system with fewer than 90,000 subscribers to test new technology such as teletext and videotex.

Late in 1981, CBS launched CBS Cable, an arts and cultural channel, the company's first foray into cable software. Finally, CBS also entered into a joint venture with Twentieth Century-Fox for the promotion of cable programing and home video products.

Last year, the CBS/Broadcast Group had revenues of $1.9 billion, nearly 13% more than the 1980 figure of $1.7 billion. Profits rose by 21% to $299.6 million. The group's measured media spending was estimated at $23.4 million, most of which was placed in magazines.

The CBS-TV network continued to be on top of prime time ratings for the second consecutive year. For the first three months of the 1981-82 season eight of the ten most popular regularly scheduled programs on tv were those offered by CBS. These included "Dallas," "M*A*S*H," "Alice," "The Jeffersons," "One Day at a Time," "The Dukes of Hazzard," "Archie Bunker's Place" and "60

Minutes." The success of the series was complemented by a number of blockbuster movies—"Gone With The Wind," "10" and "Every Which Way But Loose."

It was also a successful year for CBS Sports, which registered a 1.4% audience increase over 1980. Capping the year's sports coverage was Super Bowl XVI. The event, broadcast in January, 1982, attracted 110 million viewers, the largest Super Bowl audience ever.

Most sponsors on the Super Bowl telecast shelled out $345,000 to $350,000 per 30-second spot, but early-bird advertisers such as Ford Motor Co, Anheuser-Busch and Miller Brewing Co. were said to have paid closer to $325,000. The event was the first tv attraction to surpass the $300,000-per 30-second barrier, just as it led the way beyond $250,000.

CBS News continued to have an over-all lead in national news viewership even though on individual weeks it was topped by ABC's revamped news. CBS expanded its faltering "Morning" to 1½ hours and replaced anchor Charles Kuralt with Bill Kurtis and Diane Sawyer.

This year, CBS announced that it plans to air a news and information show for late-night viewers. The broadcast will air from 2 a.m. to 6 a.m. on weekdays. The project's editorial startup costs are estimated at $100 million.

The CBS Radio Network led the industry by broadcasting 13 of the top 20 sponsored programs on network radio. The network has secured rights to broadcast 20 NCAA basketball games in 1982 and 1983, and its contract to cover baseball's All-Star Game, league championships and the World Series was extended through 1983.

To capitalize on the growth trend in network, the division is organizing a new network, RADIORADIO, which will be programed to serve the listening interests of young adults 18 to 34 years of age.

CBS Cable launched its cable program service in October, 1981, to rave reviews but lukewarm advertiser support. The advertiser-supported service is available free on more than 350 cable systems as a basic service and reaches nearly 5 million homes.

CBS Cable has presented such programs as "Early Days," starring Sir Ralph Richardson, "Sizwe Banzi is Dead," with John Kani and Winston Ntshona from the original Broadway production, and "Macbeth" starring Ian McKellen. There has also been dance and music featured on CBS Cable. To promote CBS Cable, the company spent $189,500 in magazines.

In February, 1982, CBS announced that it had agreed to purchase an 18,000-subscriber cable television system in the Dallas-Fort Worth area from Black Hawk Cable Communications Co, a unit of American Family Corp. The price was given as $14 million. In a year of major difficulties for the record industry, CBS/Records Group followed suit. Revenues declined to $1.22 billion in 1981 from the $1.34 billion of the previous year and earnings dropped to $48.6 million from $63.7 million. The measured media spending of the group was placed at $20 million. While much of this was in magazine, extensive use was also made of newspaper supplements. Of the $16.7 million spent by the Columbia Record & Tape Club, $6.4 million was placed in magazines and $9.2 million in newspaper supplements.

In spite of the recessionary climate, a number of CBS Records artists did exceedingly well. REO Speedwagon's "Hi Infidelity" topped the album charts for months and sold nearly 6 million copies in records and tapes. Also successful were albums by Journey, Billy Joel, Pink Floyd, Willie Nelson, The Manhattans, Kenny Loggins, George Jones and Bob James and Earl Klugh.

Another way that the division tried to cope with difficult market conditions was to drop its retail list price designation for its records and tapes. The division closed its Santa Maria, Cal., record pressing plant in October, and shifted a substantial amount of recording activity to its new Carrollton, Ga., facility, which incorporates videodisc pressing and audiocassette manufacturing.

In April, 1982, CBS took an innovative record marketing step when it began releasing 45s without a flip side. The company announced that it hoped that one-sided singles will save it money by halving artist and songwriter copyright royalties and will be more attractive to consumers by costing less. The estimated retail price for the one-sided singles will be $1.

The CBS Video Enterprises division of the Records Group took some major steps in the building of new business. For the division, prerecorded videocassettes provided the bulk of sales, although videodiscs and sales of CBS-produced programs were beginning to grow in importance.

The division continued its association with MGM Films in the joint marketing of a wide range of films, musical entertainment and historical programs to home video consumers.

Early in 1982, however, MGM Films announced that it would terminate its joint venture with CBS and strike out on its own. A company spokesman said the company believed that the new entity, the MGM/UA home entertainment group, would be more successful in exploiting its vast library of movies and other entertainment material.

In 1980, the company's Columbia House division was transferred to the CBS Records Group and restructured to focus primarily upon the direct marketing of audio and video home entertainment products. The division reports that it had a major turnaround and made a profit.

All three divisions of the CBS/Columbia Group—Musical Instruments, Gabriel Industries and Specialty Stores (primarily Pacific Stereo)—experienced difficulties because of the economy. Revenues declined for a second consecutive year to $419.4 million in 1981, and operating income dropped to its lowest in five years to $4.5 million. The majority of the revenue and earnings decline came from the Musical Instruments division and this more than offset the other gains. The measured media spending for the whole group was $5.6 million.

The musical instruments division had a particularly difficult year, reports CBS, because the business is highly credit-sensitive and retailers had difficulty obtaining financing for consumers' purchases. The strength of the dollar resulted in higher prices for the division's products in export markets and increased the competitive edge of foreign competitors.

The toy division, despite similar problems, fared much better. In fact, Gabriel Industries (CBS' toy division) had its best year in history. Backed by heavy advertising and measured media spending of $4.7 million—the largest amount of spending in the CBS/Columbia Group—the toy division maintained the sales pace of earlier years. This year, it plans to expand its product line and add various new electronic items.

The CBS/Publishing Group had modest revenues growth of $23.1 million to $510.9 million. Earnings declined to $41.8 million—down $1.4 million from 1980. The profit decline was attributed to the losses incurred by Doin Editeurs, a small French publishing company, and the film portion of BFA Educational Media. Also, the Fawcett magazine subscription fulfillment operation was closed.

Most of the division's strength came from its educational and professional publishing division, especially the publication of college textbooks. However, school sales were hurt by tight funding and delayed book purchasing by many school systems.

The CBS consumer publishing division, which publishes nine major magazines, some 40 newsstand specials and a Sunday newspaper magazine, experienced increased revenues and a slight increase in profits. *Woman's Day* increased its advertising rates and cover price in 1981, but could not build on its spectacular 1980 gains. Other magazines, including *Field & Stream* and *Mechanix Illustrated*, also increased circulation and advertising revenues in 1981, as did some of the special-interest magazines, among them *American Photographer*.

The division's Sunday newspaper magazine, *Family Weekly*, achieved all-time highs in 1981 in both circulation and advertising revenues. The magazine is distributed in 356 daily newspapers and is read by more than 27 million adults.

Last year, CBS created its Theatrical films group for the production and distribution of feature films for theatrical exhibition and licensing them for use by other media such as cable and subscription tv. The division's first production, "Back Roads," was moderately successful, and its second, "The Challenge," directed by John Frankenheimer, was recently released. "Table for Five," with Jon Voight, is in production.

CBS has made a commitment to develop and introduce new technologies in the various aspects of its business. Its joint venture with AT&T for the videotex test is proof of that intent. The company has also become a strong advocate of high definition television—a technology that allows vastly improved resolution of the tv image. The CBS Technology Center is developing techniques for transmitting the associated high-information signals within minimum frequency space, the key to making high definition tv feasible for broadcast.

Early this year, CBS announced a number of acquisition and joint venture plans. It announced that it will purchase Ideal Toy Corp. for $58 million. Thomas M. Kirwan, president of CBS' Columbia Group, described the proposed acquisition as a perfect complement to existing toy lines. Ideal has a strong distribution network in France, England, West Germany, Canada, Hong Kong and Australia, and CBS expects to link up with this network for its Gabriel toy lines. In addition, Ideal has a 1 million sq. ft. manufacturing facility in New Jersey that might help alleviate some of CBS' need for additional manufacturing space.

CBS also announced plans to acquire *Cuisine*, a gourmet food monthly, from Cuisine Magazine Inc., a unit of Forum Communications, Santa Barbara, Cal.

The company also signed an exclusive four-year licensing agreement with Bally Mfg. through which CBS will manufacture and market home video cartridge versions of Bally's coin-operated arcade games. Initially, CBS plans to market cartridges that are compatible with Atari and Intellivision.

CPC International

	1981	1980
Sales	$4,343,100,000	$4,120,300,000
Earnings	218,400,000	197,400,000
Advertising*	87,000,000	77,900,000

*AA estimate

CPC International, Englewood, N.J., the 63rd largest advertiser in the U.S., increased its advertising spending 10% in 1981 to 87 million.

The company's North American division, comprising operations in the U.S., Canada and the Caribbean, recorded sales of $1.68 billion, up more than 12% from the previous year. This total accounts for 39% of worldwide sales, 3% more than last year.

For the first six months of 1982, CPC's earnings rose 9.3%, to $98.2 million from the same period last year. First-half 1982 sales were $2.07 billion, down 6.5% from same period a year ago.

International sales rose 5.4% to $4.3 billion, with earnings reaching a new high level for the 10th consecutive year. The company also celebrated its 75th anniversary in 1981.

CPC International, one of the world's 10 largest food companies, is involved primarily in two major business segments: Branded grocery products, which account for 58% of sales, and corn wet milling. Among minor businesses, which account for less than 5% of sales, are those devoted to specialty chemicals and packaging.

CPC continues to pour money into expanding the two major business areas, investing since 1975 about $950 million in construction and upgrading manufacturing facilities in both segments and had marketing expenditures of about $1 billion, primarily in branded grocery products.

A stronger management/financial thrust is being centered in these operations, which company executives claim "have strong market positions."

Marketing costs for CPC International hit the $242 million level in 1981, up from $228 million the previous year. Worldwide advertising alone accounted for close to $178 million in 1981, an 11% hike over 1980.

CPC is the world's largest marketer to retail consumers of dehydrated soups and bouillons, most sold under the Knorr label; of mayonnaise, including Hellmann's; of corn oil, notably Mazola, and of corn starch, such as Argo's. In addition, it is the world's largest corn-wet miller, with that segment constituting 38% of CPC's sales in 1981.

The North American unit, which had almost a 13% rise in sales in 1981, receives 60% of its sales in grocery products.

This division includes Best Foods; S.B. Thomas Inc.; Corn Products and Canada Starch Co.; Peterson/Puritan, the nation's largest contract packager; Acme Resin, which produces resins and resin-coated sands, and the Penick Corp. and Amerchol Corp., both in specialty chemicals.

Early this year CPC sold the Dutch Pantry restaurant subsidiary to Harley Hotels. The sale, officials at CPC say, will have no effect on the company's earnings since Dutch Pantry had accounted for a minute part of its over-all sales.

Best Foods' mayonnaise, sold under the Hellmann's and Best labels, holds 40% of the U.S. market in that category. Measured ad spending for the mayonnaise totaled nearly $9 million, including $5.4 million spent on network tv.

Skippy peanut butter, supported by a $6.7 million ad budget, held 22% of the market. Despite a production cutback forced by a poor peanut harvest, and a resulting 52% price jump, ad schedules continued running as planned.

Toward the end of the year, Skippy sales improved after an abundant peanut harvest allowed a drop in price.

Sales dropped for Karo syrup and Golden Griddle pancake mix, and neither received a measured cent of the $21.4 million network tv advertising budget put forth by the company.

Most of the funds expended for these products were allocated to magazine ads.

A summer, 1981, promotion pushed Mazola as a light oil for dressings on fruits and vegetables. Health benefits also were emphasized and CPC even sponsored a 1,000-meter Mazola Corn Oil Run in Central Park in New York.

Mazola, which continues as the top-selling corn oil, was backed by almost $10 million in measured spending, the largest amount given to any CPC grocery product in 1981.

A years-long aggressive marketing campaign is geared to peddling English muffins produced by CPC's S.B. Thomas unit. Ads have been targeted to women in the 18-to-49 age group. After a sluggish start, sales improved in the second half of 1981 for Thomas' muffins, which reportedly now leads in market shares in most of the country, with expansion to other geographical areas underway.

Measured spending for the muffins totaled $6.7 million, almost all going to spot tv.

CPC North America also produces such items as Rit color dies, Mazola spray starch, Sahara bread, H-O instant oatmeal and Kingsford corn starch.

While 80% of measured spending for U.S. products was divided between network and spot tv, 14% went for magazine ads. Newspapers were given almost twice as much—$1.3 million—as they received in 1980.

Executives at Best Foods have indicated that with the uncertain economy in mind, the company will devote its energies to developing new ideas for its current products instead of emphasizing introduction of new products. David Newstadt was named president of Best Foods in 1981.

Best also is attempting to build up sales in the South and other "weak" spots.

Activity in the corn wet milling operations, where sales were up 16.5% in the North American division, included expansion of facilities.

Plants in Stockton, Cal., and Winston-Salem, N.C., were completed, and the Argo, Ill., plant was expanded in size.

The Pekin, Ill., plant was sold to Pekin Energy Co. for a fuel-grade ethanol project in conjunction with Texaco.

Just recently, CPC International and six other corn refiners settled a suit brought in 1980 by the U.S. government.

The settlement prohibits the defendants for 10 years from entering into pacts to fix prices, or from exchanging price information.

In the future, CPC officials expect a continuation of sales progress, and marketing expenditures are scheduled to reach $275 million in 1982.

Advertising**	70,757,000	57,997,500

*AA estimate; fiscal year closes Aug. 2.
**AA estimate

Campbell Soup Co., Camden, N.J., the 74th largest national advertiser, increased its advertising spending 22% to $70.8 million.

Formerly thought of as a product-oriented company, focusing on growth through improved production, Campbell has adopted a policy of acquisition and aggressive marketing.

When R. Gordon McGovern was appointed president-chief executive officer in December, 1980, Campbell outlined an ambitious five-year plan, setting its goals at a 5% growth in unit volume and an annual sales growth of 15%, assuming 10% inflation. To achieve this, the company says it is determined to learn more about today's consumer, and either develop or acquire product lines that best serve new needs.

One real concern for Campbell is the working mother. Because she spends less time shopping and is harder to target in advertising than in the past, Campbell is adjusting its ad strategy. Consumer magazine annual expenditures decreased 40% in 1981, while yearly newspaper advertising was increased 56%, to $4.4 million, and newspaper supplement ads 175%, to $782,800 from last year's $284,500. Network and spot tv budgets have been increased 23% and 24% this year, respectively.

Campbell is hoping to find a new medium for reaching women in "WomanWatch," a weekly Campbell production that premiered on Turner Broadcasting's superstation WTBS in June. The weekly program, with a half-hour magazine format, features stories of general interest to working women. The series was cooked up at BBDO, and while it is Campbell's first venture into programming for cable tv, Campbell has long believed in associating its products with quality tv, starting in the 1950s with the sponsorship of "Lassie." Although this is Campbell's debut in cable programing, the company spent an estimated 5% of 1981's ad budget, or $3.5 million, on cable advertising.

Branching into cable as a medium is one result of Campbell's increasingly extensive market research, and what a company official called a growing desire to "acknowledge the rapid changes and tough standards of the consuming public." Accordingly, the company is paying more attention to the growing number of single consumers. Ad expenditures for Soup For One, a single-serving canned soup line, were increased 10% this year, and the company is planning to extend the line in 1982.

Additional products aimed at the same market are convenience frozen foods from the Swanson and Pepperidge Farm divisions. Pepperidge Farm's Deli's, combinations of meat, egg and cheese in pastry, are emerging as a real star among products developed for smaller, busier households. Measured media spending for Deli's was only $637,900, but that was for its very early market stages. Deli's went national in February, 1982, and a variation on the Deli theme, Vegetables in Pastry, is currently in test.

Pepperidge Farm is the second largest division of Campbell, with estimated sales of $400 million in 1981, as well as Campbell's fastest-growing segment, both geographically and in product development. Altogether the line received $4.6 million of measured media support, a 108% increase from 1980's $2.2 million. Pepperidge Farm has gone national with fruit-filled snack bars and fruit cookies, and one food industry expert estimates Pepperidge Farm's share of the premium-price baked goods market at from 10% to 20%.

An important new direction for Campbell is focusing on what Mr. McGovern calls a "consumer trend toward health food." Since more than half the adult meal planners in the U.S. are dieting, the company is emphasizing the nutritional and caloric value of its products.

For the soup division, this has meant voluntary labeling of product content and consumer testing to minimize sodium. Seven low-sodium soup varieties have been introduced.

By promoting the dietary benefits of soup, Campbell hopes to increase demand in a market typically seen as mature. The company commands a 65% share of the soup market over-all, and an 80% share of all canned and condensed. Since 40% of total company sales come from soup, one of the 10 largest grocery categories, Campbell's push for an increased market share includes an increase in promotional efforts. Measured ad spending increased 10% in 1981, to $17.6 million, and of all soup advertising, Campbell spent 70%.

Also in test at the soup division are Bisto, a gravy maker product, and a line of premium-price soups, with varieties like clear ox-tail and Serbian bean. Crispy vegetable soups, which can be served either hot or cold, are now available nationally. But despite the numerous newcomers, chicken noodle and cream of tomato are still Campbell's best sellers.

In 1981, Campbell switched the lion's share of its soup advertising account to Backer & Spielvogel, after 27 years with BBDO. The new campaign, "Soup is good food," uses various findings from the American Journal of Clinical Nutrition, documenting the healthful aspects of Campbell soups. The campaign received $16 million in measured support this year. BBDO continues to handle Chunky soups, "The soup that eats like a meal."

Another element of Campbell's bid for the healthy eater is the acquisition of Mrs. Paul's Frozen Foods Co., the largest frozen fish producer in the U.S. Terms were not disclosed, but industry experts estimated a purchase price of $70 million. Campbell is convinced the fish market will expand as consumers look for protein alternatives, and the purchase of Mrs. Paul's would guarantee the company what Mr. McGovern calls "a major entry into the growing market for lighter, lower-calorie foods." Mrs. Paul's, with total 1981 sales amounting to $124 million, has a 25% share of the deep-fried, batter fish market, according to Rick Larsen, an industry analyst with the First Manhattan Co. of New York. The acquisition does not include Mrs. Paul's Arthur Treacher's Fish & Chips Restaurants.

Also acquired was Snow King Frozen Foods, producing uncooked frozen specialty meats. Snow King, with plants located in Pottstown and Stowe, Pa., cost Campbell's $5.1 million, and had $32 million in sales in 1981. Another step in Campbell's growth—and in its growing sensitivity to consumer demands—is its involvement in the produce industry. Campbell's Farm Fresh mushrooms total sales for fiscal 1981 were an estimated $40 million, and the company is looking into acquisitions in celery and other vegetables. This year, $9 million was invested in the DNA Technology Corp., a company that is experimenting with different varieties and recombinant DNA, breeding the ideal Campbell tomato.

Campbell is hoping this investment will pay off for Prego spaghetti sauce, as well as in the soup division. Prego, in a carefully phased rollout, is now available in about 40% of the U.S. (by population) and in 60% of the spaghetti sauce-buying market, and has a 25% share of the prepared sauce category. It is promoting the sauce with the theme, "We put homemade taste in every jar," and in 1981 Prego received $12 million in ads and promotion.

Swanson's, a division that has had to undergo sizable reorganization of priorities to counter slipping sales, is working on product development that will allow it to keep its position in the frozen foods industry. The division is continuing its expansion of the frozen breakfast entree line, and spent $701,600 in measured media support. Varieties now available nationally are pancakes with sausage, scrambled eggs and sausage with hash brown potatoes, french toast with sausage, omelet with cheese sauce, spanish style omelet and pancakes and blueberries in sauce. Also new at Swanson's is Plump 'n' Juicy frozen fried chicken, now in test. Total 1981 sales for Swanson's are estimated at $340 million.

Campbell also is continuing its testing of Country Dawn beverages in the Northwest, and has added a 32-oz. glass bottle for Spicy-Hot V-8 vegetable juice cocktail and Clam V-8 to the existing V-8 on the West Coast. Campbell's beverage division, with a 50% share of the tomato/vegetable juice market, received $2.8 million of measured support in 1981. The $4.5 million account was switched from Needham Harper & Steers to Backer & Spielvogel.

To extend its juice interests, Campbell agreed in principle to purchase Juice Bowl Products, a Florida processor of more than 20 varieties of fruit juice and drinks. The acquisition will increase the company's domestic beverage concerns, which now includes only the V-8 line.

Vlasic Foods increased advertising expenditures 32% in 1981, to $3,031,000. Within this budget, spending for spot tv jumped 153%, to $914,000, while spending for network tv was maintained with a 10% increase. Vlasic is the country's largest pickle producer, with a 30% market share. The division's fiscal 1981 sales were an estimated 150 million.

Canon U.S.A.

	1981	1980
Sales*	$705,000,000	$567,000,000
Advertising**	36,525,800	31,339,330

*In North America
**AA estimate

For the first time, Canon U.S.A.'s ad spending ranked among the nation's top 100, with 1981's total advertising expenditures at $36.5 million, an increase of 17% from 1980's $31.3 million, making Canon AA's 100th largest advertiser.

Measured media expenditures accounted for $33.2 million of the total for the company, whose domestic base is Lake Success, N.Y. U.S. sales increased 24%, from $567 million to $705 million. Canon's world headquarters is in Tokyo.

Canon, however, is poised to prime the ad dollar pump by infusing $40 million over the next four years supporting its newly introduced 10.5-oz., 35mm Snappy, the company's answer to an "idiot-proof" camera selling in the under-$100 market.

Spending during 1981 continued heavily on Canon's warhorse, the AE-1, which has attracted an entire line of "A" models since it was first introduced in 1976 via tennis star John Newcombe, as spokesman. The line shares 60% of its parts, but each is equipped with varying features. They range from the premium A-1, a highly advanced electronic camera with six exposure modes, to the economical AV-1.

A new feature added to the AE-1 during 1981 was the AE-1 program, which provides a fully automated programed shutter. The new program, positioned between the AE-1 and the A-1, is being promoted by professional athletes Tracy Austin, John Newcombe, Ben Crenshaw and Joe Theisman.

The company unveiled the AL-1, a model that promises sharply focused images. All of the "A" line camera advertising focuses on simplicity, in tv ads by Grey Advertising, N.Y., and print campaigns by Dentsu Inc., N.Y.

Canon also introduced the F-1, a professional camera with a system of interchangable parts, and the Super Sure Shot, billed as the "world's most automatic lens shutter camera." The new model, which has a built-in flash system, is even more compact than the older model Sure Shot launched in 1979 and which has since captured 25% of the compact 35mm market. In fact, Canon now is responsible for one-third of all 35mm single lens reflex sales annually in the U.S.

Canon's new Snappy entry has crowded into a highly-contested field dominated by Kodak, with an estimated 33% of market and Polaroid, 28%. Canon believes it can wrest a 20% share by 1983. The new camera is available in five colors, and features an automatic film-loading system.

Women, Snappy's target market, account for 75% of instamatic purchases in the U.S. compared with 25% of the high-tech 35mm market.

Measured media support in 1981 for Canon U.S.A. increased most substantially in one of the company's two noncamera divisions—office equipment, which accounts for 45% of domestic

Once upon a time.

Kids all over America sat spellbound watching Saturday morning cartoons. Kids everywhere, all kinds of kids, but not kids who can't hear.

Why would they? It's impossible to read Scooby-Doo's lips. It's no fun to wonder why the Smurfs are so upset. Or guess what Batman wants Robin to do next.

And that's the shame. Because closed captioning can make cartoons exciting for those kids.

Several companies have already begun to fund captioning of some children's programming. But more underwriters are needed. Perhaps your company can help make Saturday morning a happy time for tens of thousands of hearing-impaired kids.

Call the National Captioning Institute at (703) 998-2486. Do it now for the child sitting alone. And do it because a few words from your company can give this story a happy ending.

sales. Copiers contributed most to division revenues, followed by calculators and printing calculators.

In the calculator segment Canon found another first with the SP1260-D, the first printer/display calculator with a voice synthesizer available in the U.S. Also introduced in January, 1981, were 13 new printer/display calculators. Six more of them came to market in December. The calculator account is valued at $3.5 million, and is handled by Dentsu Inc.

Although Canon's copiers are comparative newcomers, they already command a competitive 10% share of the U.S. market, and a commendable 20% in Japan, where the market is dominated by Fuji-Xerox.

The copiers were introduced in this country with an ad budget of $11 million for measured support in 1981, up 58% from last year's $7 million. More than 50% of this, $6.9 million, went to network tv.

One industry analyst estimates that altogether, Canon spent the equivalent of about 10% of total copier revenues on advertising and promotion.

To promote its color copiers, the company is opening a series of Color Copy Centers, featuring the Color Copier II. Branches have opened in New York, Chicago and Los Angeles. The NP-200, a typewriter-size copier, is controlled by a microprocessor and uses fiber optic technology.

In 1981, the company introduced the NP-120, the NP-400 and the NP-400F, as well as two new electronic typewriters, the AP-400 and AP-500. One area of office products rapidly expanding at Canon is the desktop computer, including a complete business software library called Canon MBA (Modular Business Accounting). The CX-1, introduced in May, 1981, is an advanced and economical model, with dual floppy disc drives and a memory of 64K.

The company's developmental innovation extends to other product areas, and Canon's research and development division is looking especially hard at the future. The company, referred to by one analyst as the "wild card in the Japanese deck," is constantly sizing up new markets in video and optical technology.

The optical products division, which began in 1938 with X-ray products, brought in 5% of Canon USA's sales revenues. The division makes machinery for imprinting silicon chips, used by computer manufacturers like IBM, RCA and Texas Instruments.

In addition to its Leading National Advertisers measured spending, the company spent an estimated $3.3 million in other advertising areas. An especially strong attempt was made to associate Canon's products with sports. The company secured exclusive supplier and marketing rights for the World Cup soccer competition, and became the official 35mm camera of the Summer 1984 Olympics. The company is the "photographic consultant" of the National Basketball Assn., the National Football League, the National Hockey League, and the official camera of, among others, the U.S. Auto Club, the New York Yankees and the Chicago Cubs. It also sponsored the Oshkosh Air Show in Wisconsin, the Montreal Grand Prix, the Indianapolis 500, the NFL Pro Bowl in Honolulu, Super Bowl XV, the World Figure Skating Championships, the Lexington Broadcast Service 36-hour World Championship Tennis tv package and the Grand Prix in Long Beach, Cal. The company also sponsored the U.S. Open Tennis Tournament where Canon-endorser Tracy Austin won the women's championship.

Chesebrough-Pond's

	1981	1980
Sales	$1,529,674,000	$1,377,484,000
Earnings	114,822,000	100,203,000
Advertising*	136,241,000	128,316,000

*AA estimate

Chesebrough-Pond's, the nation's 45th largest national advertiser, increased its domestic advertising spending nearly 6.2% to $136.2 million in 1981.

Despite an adverse economic climate, Chesebrough-Pond's marked its 26th consecutive year of increased sales and earnings. Sales advanced 10.8% to $1.53 billion, and net income climbed 14.6% to $114.8 million. All seven operating divisions contributed to the sales gain. Moreover, the company was able to take important steps, in terms of expanded manufacturing capacity, to meet the needs of new marketing programs for new products.

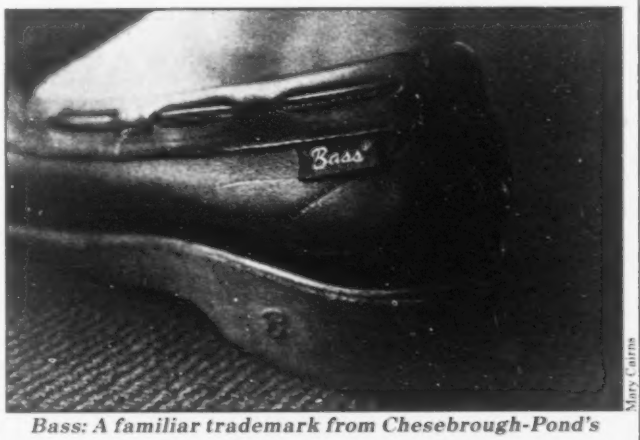
U.S. contribution to sales included: Packaged foods, $265.9 million or 17% of all corporate sales; health & beauty products, $269.5 million, or 18%; Health-tex, $251.4 million, or 16%; Prince Matchabelli, $129.9 million, or 9%; Bass, $123.2 million, or 8%, and hospital products, $45.2 million or 3%. International accounts for the rest, about 29%.

For the first six months of 1982, net income rose 6.5% to $57.2 million, compared with $53.7 million for the corresponding period last year. Sales for the first half of 1982 rose to $782.8 million, up 9.2% from $723.6 million for the same period last year.

Chesebrough-Pond's, always known for its aggressive product campaigns, an intensive focus on marketing and a stress on diversification, along with the care and feeding of newly acquired divisions, continued to follow the time-proven path in 1981.

Heavy competition and lean retail inventory policies, especially in the health & beauty products area, forced Chesebrough-Pond's to step up its advertising spending.

Advertising expenditures for health & beauty care reached $36.7 million, up substantially from 1980. A large chunk of advertising, about $15 million, went to the entire Vaseline product line, including Vaseline Intensive Care lotion and the newly launched Vaseline Dermatology Formula cream and lotion line. Vaseline Intensive Care lotion remains the division's largest-selling product.



Mary Cairns

Bass: A familiar trademark from Chesebrough-Pond's

Vaseline petroleum jelly holds the No. 1 spot with a 90% market share. Vaseline Intensive Care and Pond's Cream & Cocoa Butter lotions also are ranked No. 1, holding a 28% share over the nearest competitor, Jergens.

The Vaseline Intensive Care line was broadened with Vaseline Dermatology Formula, an ultra-therapeutic skincare line backed with a $2.8 million introductory ad budget for print and tv. Because of its therapeutic hand and bodycare positioning, the new line is in direct competition with Westwood Pharmaceutical's Keri lotion.

Pond's Cream & Cocoa Butter lotion was backed with $5 million in network and spot tv and remained strong throughout the year.

In the home permanent product category, Chesebrough-Pond's Rave ranks No. 1, holding a 26% market share. Among hairsprays, Rave currently holds third place, with an estimated 9% market share. The Rave line was expanded last year with the introduction of Rave Body Only, a soft body wave product. Rave, over-all, was supported with an ad budget of about $9.5 million last year, up 12%, according to LNA estimates. Much of that sum was put into network tv, magazines and newspaper supplements.

In early 1982, the company pushed to get the newer Cutex products into the drugstore chains where most of the nail-care business is done. This all-print endeavor was modeled after the early Revlon strategy that pushed that name into national prominence. The campaign consists of several new nail polish shade promotions each year.

Chesebrough-Pond's package foods division launched a major new product carrying the popular Ragu brand name in 1981. Ragu Homestyle spaghetti sauces, designed to appeal to consumers who still make their own spaghetti sauce, provided the division with an important new resource in meeting heavy competition and in increasing its position in the growing spaghetti sauce category.

Part of the Ragu Homestyle strategy is not only to sell the product directly, but to promote growth within the category. The company's share is estimated at 58% over-all, with advertising expenditures for the entire line at $21.9 million. Of that amount, Homestyle spaghetti sauces received $2.9 million for network and spot tv.

Ragu Pizza Quick sauces, launched in 1980, also registered strong sales in 1981, with ad backing of $5.4 million for network and spot tv. Two new Pizza Quick sauces and a pizza crust mix under the Pizza Quick name were launched in 1982 through tv spots as, "homemade pizza, simple as pie."

Chesebrough-Pond's is currently testing Montera Mexican sauces in California. The sauces are promoted for their 100% natural ingredients in print ads, with the theme, "Give your nacho the mark of Montera." Ad spending was $11,400 for magazines.

Future progress for the division involves continued growth of Ragu and Adolph's brand names, as well as new opportunities to expand into ethnic and other specialty foods categories.

The Prince Matchabelli division had strong sales gains in cosmetics, while performance of its fragrances reflected the depressed fragrance industry. Divisional sales were up 4.7% from 1980 to $130 million while operating profit rose 2%.

The Aziza business benefited from increased advertising support of $4.22 million, up 5% from 1981, for magazine and network tv. Aziza shine-on lip gloss was launched in June, 1981, with support of $339,400 in magazines.

Although the division's fragrance business felt the effects of inventory reductions by retailers, four Prince Matchabelli women's fragrances—Chimere, Cachet, Aviance and Wind Song—remain best-sellers. LNA estimates a total $7.3 million spread among network and spot tv and magazines. The Matchabelli men's fragrance introduced in 1980 established a strong position in the men's fragrance category in 1981 with ad support of $2.9 million for network tv and magazines.

Division executives say more Aziza products are expected in 1982, to broaden its base in the fragrance and shaded cosmetics markets. New marketing initiatives for the exclusive Erno Laszlo line of skincare preparations are also planned for 1982.

Sales in the Bass division, which have more than doubled since acquired by Chesebrough-Pond's in 1978, increased 9% to $123.2 million.

Strong consumer demand for Bass footwear resulted in the addition of major new manufacturing facilities in Bangor, Me. and Berlin, N.H. Start-up expenses and delivery delays associated with the assimilation of these new plants reduced the division's operating profit by 16% from record high 1980 levels. However, by year's end, a revamped organizational structure was in place and company officials expect Bass to resume a normal level of growth in 1982.

The Bass product line now includes a wide range of spring and summer footwear, more men's styles and for the first time in 1981, a line for pre-teen girls which proved highly popular. Plans for expansion of the line are currently under way.

The division spent just over $1 million in measured advertising, mostly on magazines and newspaper supplements.

At Health-tex, sales increased 23.5% to $251.4 million and operating profit grew 30.2%. The percentage increase in operating profit was the greatest for Health-tex since it was acquired in 1973.

Health-tex expanded the distribution in 1981 of the new Our Gang line of boys' apparel in sizes 8-14. More new styles were added to the infants' line, which accounts for about 25% of the division's sales. The move into new categories of children's clothing continues in 1982 with the introduction of Beach Babies swimwear for infants and toddlers.

Manufacturing facilities for children's apparel went on line in 1981 in Warrenton, Ga., and Cowpens, S.C. Chesebrough-Pond's, the No. 1 children's apparel manufacturer in a competitive industry, increased advertising to $1.4 million for magazines, newspaper supplements, network and spot tv.

In the hospital products division, sales climbed 13.8% to $45.2 million and operating profit rose 5% despite unusually high expenses for three new products; the Voldyne volumetric exerciser, the Kangaroo feeding pump and Actin-N medicated dressings.

All the major product lines contributed to the division's increased sales, and business was especially healthy for urological devices, respiratory therapy aids

and burn care products.

Sales of Chesebrough-Pond's international division rose 7% to $444.6 million. Growth was particularly strong in Australia, Canada, South Africa and many countries in Latin America. Major product introductions in 1981 included Aziza cosmetics in Mexico and France, Matchabelli men's fragrance in Canada and Rave haircare products in Ireland and Canada.

In August, 1981, Chesebrough-Pond's asked for $23 million plus treble damages in a trademark infringement and unfair competition suit against S.C. Johnson & Son. Although the company did not successfully market a shampoo under its Vaseline Intensive Care brand, it is still unhappy about Johnson's new Agree Intensive hair treatment product.

The suit, ultimately decided in Johnson's favor, asked that Johnson be stopped from using the name Agree Intensive. Chesebrough-Pond's currently uses the Intensive Care name on a baby shampoo and also tested an Intensive Care hair shampoo in 1976 and 1977, although the product is no longer sold.

In July, Chesebrough-Pond's agreed in principle to acquire Princeton, N.J.-based Prince Manufacturing, marketer of high-quality tennis racquets. Prince's sales have increased over the last several years—from $9.4 million in in 1979, to $34.9 million in 1981.

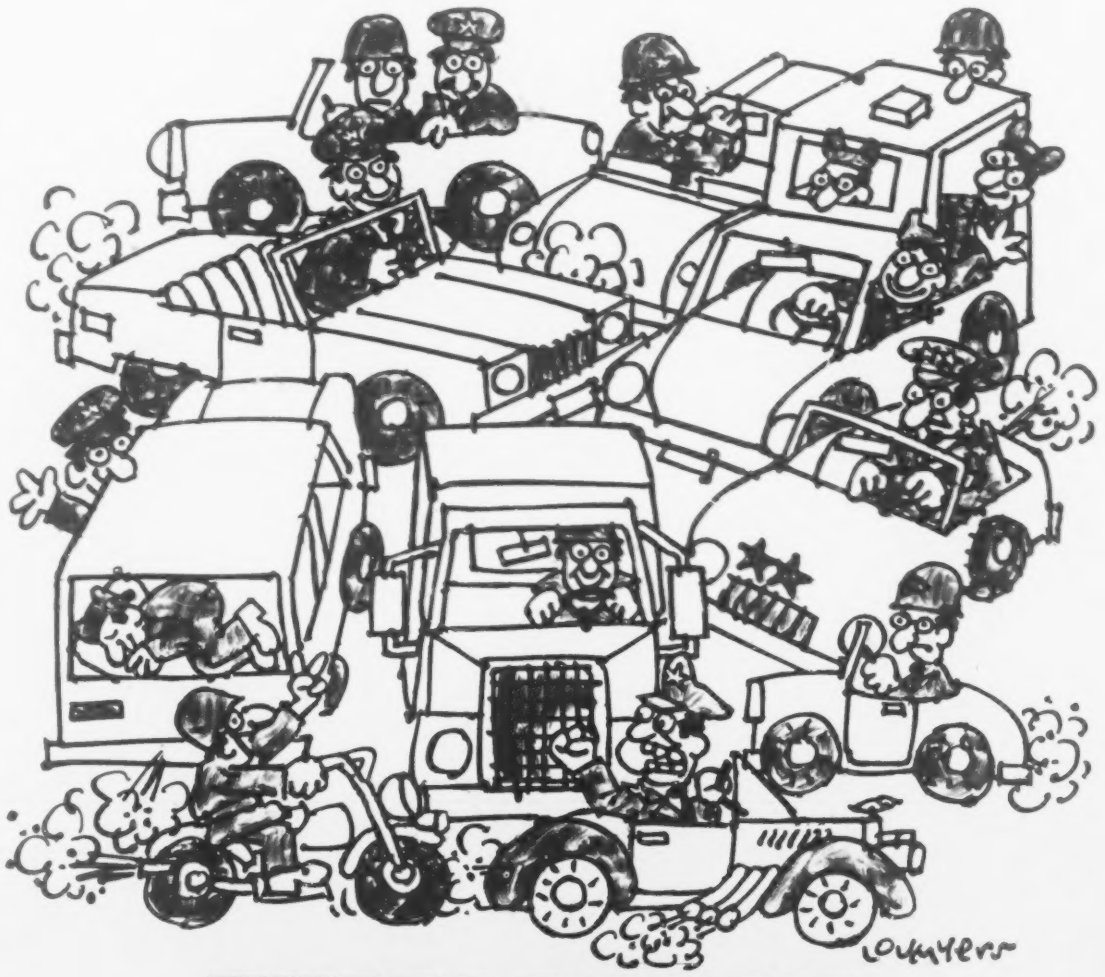
**AA estimate

Chrysler Corp., Highland Park, Mich., the 24th largest national advertiser, increased its ad expenditures some 10% in 1981 to an estimated $193 million over 1980's estimated ad expenditures of $174.7 million.

Chairman Lee Iacocca ticked off these accomplishments to the annual shareholders meeting: Fixed costs reduced by $2 billion; a record $900 million in cash and securities (from the sale of Chrysler Defense); the breakeven point cut to 1.2 million units from 2.4 million units;



THERE'S ROOM FOR MORE BIG WHEELS IN THE ARMY.

The active U.S. military market doesn't sit on its duff. There are more than five million men, women and children out there who love to ride. And they have more discretionary dollars to spend on cars, motorcycles, recreational vehicles, bicycles, and just about anything on wheels you can name, than any other market you can name.

And there's just one big medium that penetrates them all. Army Times, Navy Times, Air Force Times. At every military installation in the world, these are the papers that are read front to back by service people and their families.

If you want to move vehicles in today's economy, grab a market that drives home a lot of sales.

ARMY TIMES, NAVY TIMES, AIR FORCE TIMES.
A MARKET, NOT JUST A MEDIUM.

Army Times Publishing Co. has sales offices in NYC at One Citicorp Center, 153 E. 53rd St., 10022, (212) 753-1040; in Chicago at 20 N. Wacker Dr., 60606, (312) 828-9446; in L.A. at 2049 Century Park East, Suite 430, 90067, (213) 203-8185; and in Washington D.C. at 475 School St., S.W., 20024, (202) 554-7239.

a net profit in the first quarter of 1982; sales up 50,000 over 1980 and a five-year, 50,000 mile warranty.

Sales increased to $10.8 billion from $9.2 billion and unit sales dropped 1% to 1.03 million from 1.04 million. The gain was in car sales, to 840,813 from 789,367. Truck sales dipped to 186,621 from 249,766. Chrysler's share of the car and truck market was 9.5% in 1981, up from 9.1%. Its car market share was up to 9.9%. Its truck market share was down to 8.2% from 9.9%.

The much heralded K car was the only Chrysler entry to hit six figures—196,997 for the Plymouth Reliant and 149,653 for the Dodge Aries. The Omni-Horizon twins and their coupes held about even with 1980 while the only other gains were in the imported Sapporo, to 13,326 from 10,263 and the luxury Imperial, which went to 4,649 from 2,497.

Mr. Iacocca forecast the launch of the 1981 K cars in the fall of 1980 would be "the best marketing job in history." Themes were "The American way to beat the [gas] pump" and "America's not going to be pushed around any more"—a sweeping reference to the Iranian hostage situation and its incumbent feeling of malaise and front-wheel drive vs. rear-wheel drive.

By November, Chrysler had shifted into price ads in the face of a new round of higher interest rates. The K cars also initially came loaded with expensive options and a mid-course correction was made to more Spartan models. By December Chrysler was talking about a 15% slash in ad spending but market pressures negated that. Chrysler introduced an "interest allowance plan" pegged to the prime rate. In effect, it rebated the difference between a 12% rate and the prime and the auto incentive wars began.

Chrysler seemingly counted those periods without a rebate or similar inducement as 10 days down the drain. The interest rate allowance became a 7% rebate and Chrysler sales responded with K cars setting records.

The $50 test drive, revived from "Chrysler's whole new way of doing business," was allowed to languish. When General Motors' J cars debuted in the spring they were greeted with the ad line, "Chrysler bets $50 you won't buy a GM J car after one test drive..." Chrysler ad executives started to hope that model 1982 would bring a return to product instead of rebate advertising. Meanwhile it joined in a "Special K sweepstakes" with K cars as prizes in a Kellogg cereal and Keyko margarine promotion.

By August the rebates were back in a form that was to endure—$300 to $1,000. But first another stab was made at marketing as usual. Chrysler bet some $45 million that advertising just the cars would work. It didn't, even with Ricardo Montalban moving over to new LeBarons and voicing "Lee Iacocca's dream to combine high mileage and luxury." Model Kelly Harmon drove Dodge 400s through beach spray, actor John Houseman touted Horizons and Walt Garrison switched to Dodge pickups from Ford pickups.

Prices were held on some popular models even as Mr. Iacocca said that would erase profits on them. What Chrysler did get was cash flow and a hoped for, and achieved, market share increase.

By October, the $300 to $1,000 rebate was back—this time for cars whose prices weren't frozen. It was called a "Chrysler savings certificate." In November, Chrysler was already looking to spring when it sent out direct mail pieces on the LeBaron convertible. The direct marketing program solicited "advance order reservations," which also stimulated cash flow.

Dodge's Rampage pickup truck was introduced in December as half car, half truck. It was built on the Omni-Horizon two-door chassis.

Cars that Chrysler barely noticed in its advertising started to become stars. The rear-wheel drive New Yorkers benefited from a "payback" of the splurge in small car sales. Factories went into second shifts for the low-volume cars while the high volume plants for front-wheel drive vehicles shut down.

Chrysler extended rebates for the new year with the old theme of "Get a car, get a check." In 1982, the rebates were joined by the extended Chrysler warranty with Chrysler saying it believed the public was tired of rebates. By June, Chrysler was back in the rebate business with the familiar $300 to $1,000 plan.

Chrysler tripled its 1982 truck budget to $20 million as light trucks showed signs of a comeback. Chrysler truck penetration started to rise again and the company split off trucks as a separate operation. Some of those trucks were made by Mitsubishi, which a year before had gained its independence from Chrysler. Hard-pressed Chrysler agreed to allow the Japanese automaker to market its product under its own name in addition to supplying Chrysler. In return Mitsubishi agreed to bankroll the cars it sends to Chrysler until they are in dealer hands and give Chrysler more cars in the future. The possibility of a Mitsubishi investment in Chrysler was also held out.

Chrysler also established in mid-1981 an import operations group, but executive shakeups reduced its initial effect. Chrysler's captive imports will be positioned as imports to attract that segment of buyers.

Kenyon & Eckhardt, Chrysler's agency, was eliminated as the middle man in media billings. Chrysler is being billed directly for the media buys.

In 1981, the billings amounted to a sizeable amount. The $174.5 million in total expenditures, despite efforts to hold the line, was up nearly $25 million above 1980. Rebates helped fuel advances in newspaper and spot tv spending.

The rebate influence was seen more strongly in the amount of Chrysler corporate advertising, which rose to $57.9 million from $39.8 million.

Dodge spending was up 12% in 1981 as increases in spot tv, magazine and newspaper offset a decrease in network tv. Chrysler-Plymouth ad spending was off 1%. C-P's biggest decrease was in network tv, to $23.5 million from $30 millon.

Marketing personnel changes included Jack Givens to vp marketing from director of sales operations; Darrell Davis to general manager of import operations; C. J. Stickford to manager import advertising; John Damoose to director of U.S. auto merchandising and A. C. "Bud" Liebler to director communications programs office.

Chrysler fared less well in Canada. Car sales slid to 116,089 from 125,835 and truck sales dipped to 30,218 units from 36,390. Market share for cars fell to 12.9% from 13.4% and for trucks dropped to 10.7% from 11.1%. Chrysler de Mexico S.A. is the remnant of a once global auto empire which was sold during Chrysler's dark days. Chrysler de Mexico S.A. had sales of 114,833 vehicles up from 106,380 in 1980 and earned $22.3 million on dollar sales of $1.3 billion.

Chrysler Defense, a producer of military tanks, components and other vehicles for the U.S. government, was sold early in 1982 for $335 million to General Dynamics Corp.

Advertising*.	80,761,000	74,554,000

*AA estimate

Clorox Co., Oakland, Cal., the 68th largest advertiser, increased ad spending in 1981 to $80.8 million, from $74.6 million in 1980.

The company's earnings for the fiscal year ending June 30, 1981 rose 14.7% to $38.1 million from 1980 level of $33.2 million. Corporate sales totaled $714 million, up 12% from 1980 level of $637.4 million.

During 1981 Clorox continued on the course it has been following since 1969, when it became independent from its short-term parent company, Procter & Gamble.

Since that time it has been attempting to transform itself from a company dependent upon a single product into a broad-based consumer products marketer via a diversification strategy, including acquisitions and in-house research and development of new products.

Clorox took a major step in this direction in October, 1981, by acquiring Comerco Inc., Tacoma, Wash., marketer of Olympic and Carver Tripp paints and stains. The Olympic brand, a leader in the category, is estimated to have a 40% share of the $200 million to $250 million exterior paints and stains business. While at present the housing industry is experiencing a rather deep slump, analysts in general are high on the acquisition, expecting Clorox's Olympic Stain division to eventually contribute substantially to company profits.

Another benefit of the acquisition is that it opens the possibility of a new avenue for distribution for Clorox's household products in paint and hardware stores. To date, Clorox has not taken steps to use Olympic's distribution system in this way.

It was six months before the Comerco deal was made final that Clorox's president-chief executive officer Edwin H. Shutt Jr. abruptly left the company after a mere eight months on the job. Reportedly, Mr. Shutt left Clorox because of a power struggle between himself and Clorox chairman R.B. Shetterly, over the terms of the Comerco deal and Clorox's growing ties to its West German partner, Henkel. In order to finance the Comerco deal, Henkel in 1981 took steps to increase its stake in Clorox to 25%.

On July 1, 1981, Mr. Shutt became president-chief operating officer of Tampax Inc. Calvin Hatch, a Clorox executive vp and a member of the board since 1976, succeeded Mr. Shutt as president and chief executive officer. Mr. Shetterly continued as chairman. In July, 1982, Mr. Hatch was named chairman to succeed 67-year-old Mr. Shetterly, who is retiring. Mr. Hatch continues as ceo. At the same time, C.R. Weaver, 53, was named president-chief operating officer.

Clorox has been riding high on the successes of new products like Tilex instant mildew stain remover and Clorox Pre-Wash, a laundry soil and stain remover, and early acquisitions like Hidden Valley Ranch salad dressing mixes, but the company is still dominated by sales of liquid and dry bleach. However, company execs like to point out that liquid and dry bleach sales account for less than 50% of Clorox's total earnings from established brands. Clorox is estimated to have a slightly less than 60% share of the U.S. bleach business.

While Clorox is at work building its nonbleach business, it is, ironically, facing a challenge from its former parent company, P&G, in its core business. P&G has since fall, 1981, been testing a new dry bleach called Vibrant, that some say represents a technological challenge with the potential to obsolete Clorox liquid.

Clorox executives, at least in public, play down the significance of the Vibrant introduction, claiming it is not the technological breakthrough that P&G claims. Clorox in May, 1982, started testing a new, all-fabric dry bleach called Wave in Bakersfield, Cal., Oklahoma City, Nashville and Louisville, with ad support via FCB/Honig, San Francisco. Wave, like Vibrant, is positioned as a heavy-duty bleach able to provide the

whitening powers of chlorine liquid and the safety of dry bleach.

During 1981 Clorox continued on a new products push. Clorox started testing AirO's solid air freshener in Peoria and other markets, backed by tv spots that describe the product as "able to fight odors longer than any other concentrated air freshener."

The test was suspended in April, apparently after the product failed to live up to company expectations. Clorox also started distributing its Tilex mildew stain remover nationally with heavy ad spending via Foote, Cone & Belding/Honig, in addition to Clorox Pre-Wash laundry soil and stain remover, assigned to Ketchum Advertising. It moved Fresh Step odor-controlling cat litter into test in Salt Lake City and Cincinnati, supported by ads via Young & Rubicam, San Francisco.

In the early part of 1982 Clorox discontinued marketing of its Duraflame firelogs, a product it had acquired in 1978. It is said to have been operating in the red on annual sales of $20 million to $25 million. Clorox puts the blame for Duraflame's demise on the sorry state of the firelog market, which has been declining in general at a 20% to 25% pace for the past several years.

In charcoal, Clorox is still the national leader with its Kingsford and Match Light brands, but sources say Clorox is not making the kind of profit margins it desires on the labels. Company sources deny there is any possibility the company might make a similar decision about charcoal as it did about firelogs earlier in 1982.

In 1981 Clorox pulled out of a category in which it had tried its hand—liquid soap—after severing its ties with Evolution Health Care, Taylor, Tex. The two companies had a joint marketing agreement on the product, and Clorox had had a two-year option to acquire Evolution. That relationship was terminated after the product lost ground in supermarket and other retail outlets because of strong drives from soft soap competitors, Jergens and Minnetonka.

Over-all, Clorox increased spending in network tv about $5.2 million to a total of $49.7 million in 1981, compared to 1980 levels of $44.5 million. It also practically doubled its expenditures in spot tv to $7.5 million from 1980 levels of $4.1 million.

*Revised by company to reflect the sale of Aqua-Chem and Tenco division
**AA estimate

Coca-Cola Co., Atlanta, the 22nd largest national advertiser, increased its ad spending 7.4% to an estimated $197.8 million in 1981. Worldwide media ad spending was $414 million in 1981 compared with $395 million in 1980.

Net sales for Coca-Cola were up 4.8% last year, from $5.6 billion to $5.9 billion, compared with an increase of 19.9% in 1980. Earnings were up 14%, from $422 million in 1980 to $482 million last year.

Soft drink unit sales, which made up 80% of net sales and 88% of 1981 earnings, increased 3.6% worldwide, compared with a 20.1% increase the year before. Sales revenues from soft drinks were up by 4%, to $4.68 billion from $4.52 billion in 1980.

Net sales of nonsoft-drink products were up 9.7% in the past year, compared with an

18.9% increase the year before.

In 1981, the company's combined U.S. operations accounted for 55% of total net sales and 37% of earnings. Net sales from U.S. operations were up 6%, while earnings were up 21%.

Coke, the company's flagship brand in a sea of beverage brands including Tab, Sprite, Fresca, Mello Yello and Mr. PiBB, has come a long way since it was invented in Atlanta in 1886 to become a cure-all for the aftereffects of overindulgence. It is now the world's No. 1 soft drink, sold in more than 145 countries, with sales of over $2 billion annually.

Second to soft drinks, citrus is the company's largest business, including products sold under the Minute Maid and Hi-C labels. The company also markets coffee and tea. However, in the last couple of years it has been the wine segment that has proved to be the sprinter among the holdings.

Despite the battering the company has taken this past year as a result of foreign currency translations, the drop in sugar prices and energetic competition from its rival Pepsi Cola, there is a mood of buoyancy in the company that was not there three years ago. Much of the mood can be attributed to the new management team.

Ever since Roberto Goizueta, chairman and chief executive officer, took over from the austere J. Paul Austin in March, 1981, the direction the company has taken has been as unconventional, they say, as Mr. Goizueta's silk ascots. In addition to the Cuban-born Mr.Goizueta, the new team includes Iowa-born Donald Keough, president and chief operating officer, and Egyptian-born Sam Ayoub, senior exec vp and chief financial officer.

Others recognize the change as well. "It's clearly a management team that's a lot tougher in the marketplace than the old one," John Scully, president of PepsiCo's Pepsi-Cola Co., has been quoted as saying.

The company also cites the continued restructuring and strengthening of its bottler system and the opening of the first Coca-Cola bottling plant since WW II in China as major accomplishments of 1981.

One of the most controversial recent developments was Coca-Cola's purchase of Columbia Pictures Industries, for $750 million, in June.

It was Mr. Goizueta's first major acquisition, and first major move in stamping his own personal style on the soft drink behemoth. The move, however, prompted mixed reactions from industry analysts.

Chairman Mr. Goizueta said in a recent interview, "The entertainment business provides an opportunity for high growth potential without requiring two things that the Coca-Cola Co. isn't good at: High technology and investment in hardware." These areas—film, entertainment and programing for cable and pay tv—seem to be of special interest to Mr. Goizueta, who also has mentioned fragrances as another possible field for diversification.

Another big move recently, partially prompted by new management, partially by research, has been the change in the ad campaign for the flagship brand, Coke. The "Have a Coke and a smile," used since 1979, has given way to "Coke is it!" released nationally this February after rigorous and expensive testing during the past year. Mirroring Coke's management's new aggressive stance, this campaign is considered its "fight" song.

One of the most well received commercials for the new "Coke is it" campaign was created by Burrell Advertising, a Chicago-based black agency that has been with Coke for years. It features the Grambling College marching band and is targeted to mostly black audiences.

Last year there was a flap when the Rev. Jesse Jackson's black activist organization Operation PUSH, Chicago, boycotted Coca-Cola Co. products because, according to Rev. Mr. Jackson, the company offered little opportunity for blacks to enter its franchise business. Coca-Cola offers more for blacks in Third World countries than in the U.S., he said. As a result, Coca-Cola agreed to spend $30 million on black businesses and help arrange for more blacks to win lucrative Coke bottling franchises. As part of that pledge, the company agreed to assign a black-owned agency a product "from any division" that would lead to $8 million in billings. Although Burrell Advertising is a strong contender for that account, it has not, as yet, been assigned.

Other maneuverings that went on in 1981, to culminate in early 1982, were Coke's decisions about a diet beverage to carry the Coke logo. Coke has overcome its earlier concern that such a move might cut into its flagship brand franchise. It now plans to spend more than $50 million to launch Diet Coke, scheduled for test market this summer. The company also noted it will enter the caffeine-free category when it believes the time is right.

How did the Coke-Pepsi battle look at the end of the year? As with last year, it depends on the source. Several industry watchers ascribe a one-tenth of a percentage point drop for Coke in 1981, from 24.3% to 24.2%. Pepsi, on the other hand, is shown moving up three-tenths of a point, from 18% to 18.3%. into case sales.

A.C. Nielsen Co., which measures retail sales through surveys of food and drugstores, shows Coke out in front in that heated area in which Pepsi momentarily overtook Coke during 1981. Although the battle has been neck and neck in the supermarkets, in total U.S. sales Coke is the unquestioned leader because of its strength in fountain and vending sales. According to Nielsen, Coca-Cola brands as a whole moved up to 30.9% in 1981 from 30.0% in 1980. Pepsi products were at 29.4% from 29.1% in 1980.

The battle has particularly affected bottlers, who, because of the intense competition between the two, are tending to spend more time on Coke and Pepsi and less on other brands. The constant discounting and price wars are costing both companies money. Some believe that the recent veering off into caffeine-free for Pepsi and Diet Coke for Coca-Cola might allow the head-on competition to subside for a while.

Tab, Coke's sugar-free cola and the world's No. 1 diet product, holds the No. 5 position in the top 10 soft drink lineup in the U.S. According to *Beverage Industry*, its market share increased from 3.2% to 3.6% in 1981, while Diet Pepsi—No. 8—went from 2.6% to 2.9%. Nielson puts Tab figures for 1981 at 4.1% over Diet Pepsi's 3.6%. Ad spending for the "Beautiful People" product was up 18% in 1981, from $13.1 million to $15.1 million, with the majority in network and spot tv.

The "The beautiful drink for beautiful people" campaign has been going on for five years. Some considered the beach-oriented spot a "mind grabber" because of the beauty of the model's figure, a perfect "10." Others—a definite minority—found it exploitative and offensive.

Sprite, Coca-Cola's lemon-lime product, continues to be the No. 3 product for the company. "When you're reachin' for more . . . reach for Sprite" continues into its third year, although sugar-free Sprite has a new campaign: "Great taste says you shouldn't . . . but you can." Ad spending for regular Sprite was just about the same as last year. According to *Beverage Industry*, Sprite holds the No. 7 position in the top ten soft drink lineup, losing its prior-held No. 6 position to Pepsi's Mountain Dew.

Fresca's transformation in 1980, from taste to logo to packaging to ad campaign, had disappointing results. According to figures compiled by Emanuel Goldman, beverage analyst with Sanford C. Bernstein & Co., New York, cases of Fresca dropped from 38 million sold in 1980 to 28 million in 1981. Ad spending for the product in 1981 was down 18%, from $7.9 million in 1980 to $3.7 million in 1981, mostly concentrated in network tv.

Ramblin' Root Beer, on the other hand, in only its second year of test marketing, was given an ad spending boost of over 600% in 1981, from $135,000 in 1980 to $1.1 million in 1981. According to the company, it is now the largest-selling root beer in New York.

Ad spending for Mello Yello, which has gone from "Mello Yello makes you feel so good so fast" to "Mello Yello to the rescue" was down last year some 25%, from $3.7 million to $2.7 million.

Its over-all market share, however, increased slightly, from 0.8 % to 0.9%.

Sales of Mr. PiBB dropped from 39 million cases in 1980 to 34 million in 1981. Its market share dropped from 0.7% to 0.6%, according to Tom Bachman of *Beverage Industry*. Ad spending for the product was down more than 40%, from $1.3 million in 1980 to $757,900 in 1981.

On other fronts, the foods division was revamped into the Foods and Wine Group, which now includes the Foods division, the Wine Spectrum and Presto Products, all under the management of Ira C. Herbert, group president.

After soft drinks, citrus is Coca-Cola Co.'s largest money maker. It is the largest producer and marketer of citrus in the world. The foods portion of this group includes citrus and fruit juices sold under the Minute Maid, Snow Crop, Five Alive and Hi-C labels and coffee and tea under the Maryland Club and Butter-Nut labels.

The citrus industry was knocked briefly to its knees after a mid-January Florida freeze temporarily disrupted fruit supply. As the prices shot up, sales went down, causing an over-all slump in the frozen concentrated orange juice category.

Nonetheless, Minute Maid frozen concentrated orange juice continued to lead the pack in the frozen orange juice category. Over the past five years, Minute Maid in cartons has achieved an annual growth rate of 44%. The Minute Maid family has grown to include Minute Maid Frozen Concentrated Orange Juice with More Pulp, a 100% all-juice sibling with no sugar or preservatives and a Minute Maid reduced-acid orange juice.

Minute Maid's frozen concentrated apple juice, introduced nationally in 1981, achieved a 15% market share in its category within the first six months on the market. The frozen apple juice category itself grew 58% in 1981, making it one of the fastest growing areas in supermarket sales.

Total ad spending for Minute Maid products, including orange, lemon, apple and grapefruit juices, lemonade products and presweetened mixes, was $15.8 million, according to Leading National Advertisers figures, down from $16.4 million in 1980.

Five Alive, a frozen concentrate made from the juice of five citrus fruits, went national in 1979, and last year shot ahead of the other fruit drinks to become No. 2 after Minute Maid. Five Alive's success was the catalyst for Fruit Punch, introduced in 1980, made from cherries, apples, pineapples, grapes and lemons. In early 1981, Five Alive appeared in a new form, refrigerated and ready-to-serve, supported with $3.9 million—all in network tv.

Ad support for all Five Alive juice products increased from $6.3 million in 1980 to $8.2 million in 1981, a 30% jump.

In the fruit drink category, Hi-C maintained its No. 1 spot in 1981, adding on an apple-cranberry flavor early in the year. A new development in 1981 was the introduction of "Hi-C in the drink box"—a septic packaging. The new packaging, Brik Pak, which comes with an attached straw, has proved successful with children.

Ad spending for all Hi-C products was up 15%, from $2.7 million in 1980 to $3.1 million in 1981.

Coca-Cola's two coffee products, Maryland Club and Butter-Nut, maintained their market shares over the past year in a category whose slump seems to be leveling off. The general aging of the population is a factor cited for the end of the two-decade-long decline that has plagued the coffee industry.

Market share of Maryland Club is 1% and Butter-Nut is 2.4%, according to early 1982 figures compiled by Lehman Bros. Kuhn Loeb research.

The other side of the newly organized group, The Wine Spectrum, put in a star performance in 1981, with a 20% increase in sales, making it the fastest-growing wine company in the country.

Presently, it ranks No. 4, after E.& J. Gallo, United Vintners (Heublein) and Almaden (National Distillers).

The group includes wines made and distributed under the Taylor, Sterling, Monterey and Great Western labels as well as New York state champagnes, Solera dessert wines and Cinzano Italian wines.

Taylor California Cellars continues to be the most successful entry in the wine industry since its debut in 1978. Its ad campaign, "Better wines. . .judge for yourself" promoting the generic brands, chablis, rhine, rose and burgundy, continues. And, as of last year, rose was added to chablis and burgundy in the canned category for airline use. As of early 1982, Delta Air Lines now serves wines in cans on all its flights.

In 1981, Taylor California Cellars brought in the first lower-calories wine in the U.S.—Light Chablis of California, test marketed in 12 markets, and backed with heavy media support, with the theme, "The perfect time for your other wine." Results were good, and national introduction in early 1982 brought in light rhine and rose, in addition to the chablis. Following the trend to "light" drinks, these wines have approximately 25% fewer calories than the regular wines. Also introduced in 1981 were Taylor California Cellars dry red and dry white wines.

The Monterey Vineyard continued to focus on its white vintage varietals while Sterling Vineyards markets both red and white varietals, exclusively estate-bottled and vintage-dated, from the chardonnay, sauvignon blanc, merlot and cabernet sauvignon grape.

Last year, The Taylor Wine Co., Hammondsport, N.Y., began the test marketing of its Lake Country Soft red, white and pink wines. The wines are low-alcohol, slightly carbonated and semidry and the company bluntly states its mission is to cut into the Italian Lambrusco market, which makes up the largest segment of the imported wines.

Ad spending for Taylor and Taylor California Cellars wines increased 14% last year, from $10.6 million to $12 million, with most of the concentration on network tv.

Great Western's new line of Special Selection varietals is helping to change New York's wine image. They include Verdelet, Aurora Blanc, Rose de

Chaunac and Vidal Ice Wine. According to the company, response from the wine writing community has been excellent.

Other developments at Coca-Cola include the combining of the plastic products operations, Presto Products and Winkler/Flexible Products, into a single group, Presto Products Inc. within the newly formed Foods and Wine Group.

Also, the company shed its Aqua-Chem subsidiary, maker of steam generators, industrial boilers and water treatment equipment for $29 million to the Societe Lyonnaise des Eaux et de L'eclairage, Paris. Also, earlier this year, the company sold its Tenco division, an operating unit that manufactured and distributed private label instant coffees and teas to Tetley Inc., Shelton, Conn.

**AA estimate

Colgate-Palmolive Co., New York, the 13th largest national advertiser, boosted ad spending 16% to $260 million in a year when the company expressed renewed commitment to adequate media support.

A redirection of media expenditures to back major brands was named as one of six basic changes in organizational structure and operating emphasis that occurred during 1981. The others included organizational restructuring to capitalize on global strengths, establishment of a strategic and business development planning group, increased emphasis on major brands, increase in research and development and higher capital spending.

Colgate is still a company in transition as chairman Keith Crane re-establishes the company as primarily a major marketer of personal care and household products, eschewing the sports and apparel businesses acquired by his predecessor.

Worldwide sales rose 2.6% to $5.26 billion, while net income totaled $208.4 million, up 21.5% over 1980.

Colgate reported earnings of $109.8 million for the first six months of this year, a 1% increase over 1981. Sales fell 5.5% to $2.48 billion for the six-month period.

Worldwide, Colgate invested $307.5 million in media, up 7% over 1980. The company pointed out that in overseas markets, actual ad spending in local currencies rose by a significantly greater amount, but that is not evident from the figures because of currency translations. Colgate also pointed out that media spending as a percentage of sales moved up from 5.6% in 1980 to 5.8% in 1981.

Sales of household and personal care products worldwide, which account for 69% of total sales, rose 1.9% last year. Those products contribute 63% of operating profit. Colgate said in the U.S. it improved its position and achieved sales advances, especially in dentifrices, dishwashing liquids, detergents and first aid products.

U.S. sales account for 41% of the corporate total, while U.S. operating profits account for 37%.

Colgate emerged from the dentifrice war in the U.S. in a relatively good position. The company initially responded to competition with an improved formula for Colgate toothpaste offering a fresher mint taste as well as "unbeaten cavity" protection.

Later in the year, the company introduced Colgate winterfresh gel, which now accounts for one-third of the sales of the Colgate toothpaste brand.

Recent market shares indicate that Colgate has maintained its strong No. 2 position (behind Procter & Gamble's Crest) with close to 20% of the $800 million market. Like most of the other secondary brands, Colgate's Ultra Brite has lost ground and holds less than 3% of the category.

To achieve these rankings, Colgate invested $25.3 million in measured media for the Colgate brand, including $4.9 million specifically for the gel variety. Ultra Brite received $4.8 million in measured media.

The company dropped its plans to promote Fluorigard dental rinse heavily to consumers and spending fell to less than $500,000 from $3.5 million two years ago.

In laundry products, Colgate's single largest business, the company said sales benefited from the continuing acceptance of Fresh Start concentrated detergent.

The company also is rolling out Fab detergent with fabric softener and expects to be national by year-end.

There has been some question about whether Fresh Start has been the success the company originally hoped for since the brand has leveled off at about a 3.5% market share (based on case sales). Colgate asserts that it is satisfied with the brand's performance and that its share is over 5%. The discrepancy is believed because of Colgate's use of dollar sales instead of case sales.

Fresh Start received its first major direct competition several months ago with the introduction in several states by P&G of Ariel, a concentrated low-sudsing detergent it markets overseas. Ariel is P&G's biggest-selling detergent brand worldwide. Last year, Colgate invested $14.4 million in measured media to support Fresh Start, a $3 million increase over the previous year. Its other detergent brands include Fab and Dynamo, each holding 2.4%, and Cold Power at 1.6%.

Ad spending for Dynamo last year was $4.3 million and Fab, $3.5 million. Cold Power is no longer supported as a major brand.

In the light-duty market, Palmolive shares the No. 3 spot with a 12.5% market share. It trails P&G's Ivory and Dawn in the $1 billion category and is holding even with P&G's Joy. Last year the company spent $8.2 million to back Palmolive, some $2 million more than the previous year. The company tested several tv spots during the year that did not use longtime tv endorser, Madge, the manicurist, but so far actress Jan Miner has survived the test and continues to appear in national advertising.

The only other light-duty brands to receive significant ad backing were Dermassage, which got $1.9 million in measured media, and Ajax dishwashing liquid with $1.7 million. Ajax was reformulated to contain lemon juice.

Irish Spring deodorant soap remains Colgate's leading entry in the toilet soap category. The brand, with a 4% market share in the $850 million U.S. toilet soap market, was supported by $6.8 million last year. Palmolive and Cashmere Bouquet are among those products no longer profitable enough for major advertising.

The Ajax line of cleaning aids received $3 million in measured media support with most of the dollars going into the dishwashing liquid ($1.7 million) and liquid cleaner ($1.3 million).

Another household product, the Baggies line of plastic bags, continued to experience declining ad spending. Although the No. 2-seller of food bags, the company spent less than $1 million to support the products in measured media.

Colgate boosted spending slightly to $2 million in an effort to increase market share of its Curad bandages, a brand with 25% of the category that holds about half as much share of market as leader Johnson & Johnson's Band-Aids.

In the foods division, the company's major ad focus was on Success Boil-in-the-Bag rice, a brand that received more than $1 million in advertising. Other brands, Carolina, Mahatma, River and Water Maid, do not receive full-fledged campaigns. Colgate is the leading marketer of branded rice in the U.S., although rival Uncle Ben's is the leading single brand.

Colgate expanded its use of cable by spending more than $500,000 on Ted Turner's Cable News Network. The company already spends over $1 million on superstation WTBS. The amount is about the same as the company spends on syndicated properties and was seen as good protection for Colgate in the spring and summer when network tv numbers sometimes sag. The CNN time also gives Colgate some help in urban markets.

During the year, Colgate was ordered by the U.S. Supreme Court to pay United Roasters $950,000 for breach of contract in a dispute related to the marketing of Bambeanos soybean snack several years ago. The case had been in the courts the past four years.

Columbia Pictures Industries

	1981	1980
Sales	$686,600,000	$691,800,000
Earnings	44,300,000	44,900,000
Advertising*	47,500,000	43,000,000

*AA estimate

Columbia Pictures Industries, New York, purchased by Coca-Cola this year, was the nation's 90th largest national advertiser in 1981, with ad expenditures of $47.5 million, an increase of 10% from the previous year.

Sales dropped 0.8% to $686.6 million, primarily as a result of a 46.5% revenue decline in the company's amusement games division, D. Gottlieb and Co. At $44.3 million, earnings were down 1.3% from the 1980 fiscal year.

Nevertheless, board chairman Herbert A. Allen and president/chief executive Francis T. Vincent Jr., called the 1981 fiscal year "an important and exciting one for Columbia. Despite some extraordinary pressures, our company made strong financial and operating progress."

Columbia Pictures Industries is an entertainment company involved in production and distribution of films, tv shows and home programs, as well as a manufacturer of amusement games. Columbia also operates broadcasting stations, a music printing unit, tv commercial production facilities, an out-of-home advertising group and a merchandising division.

Just recently, Columbia Pictures Industries was purchased by Coca-Cola in a cash/stock deal reportedly totaling in the $800 million range.

The deal has been credited to the "Eller connection," in reference to Karl Eller, who joined Columbia early in 1981 as head of its communications division. Shortly thereafter, Columbia announced its intention to buy Outlet Corp. and its broadcasting properties, but the deal fell through when Columbia merged with Coca-Cola.

According to reports, Mr. Eller's friendship with Ira Herbert, a Coke executive vp, was the basis for talks that led quickly to an offer from Coca-Cola at a price that some financial analysts felt was quite high.

Mr. Allen, however, voiced much enthusiasm for the Coke takeover, noting that "it will put Columbia and its management in a dominant place in the entertainment industry for years to come."

And Coca-Cola chairman Roberto O. Goizeuta remarked that his executives saw the entertainment field as one having excellent prospects "for profitable growth. . .particularly in areas of filmed entertainment and programing for cable and pay tv."

Fiscal 1981 was marked at Columbia Pictures Industries by certain notable developments, including elimination of intense friction by the repurchase, after costly litigation, of Kirk Kerkorian's 24% interest in the company.

Columbia Pictures prospered, company executives maintain, in a year when the film industry as a whole "was stagnating."

The company's rentals in the U.S. and Canada totaled $184.6 million, up $8 million from the record-breaking previous year.

"Stir Crazy," with total measured spending in 1980 and 1981 of more than $5 million, proved a financial smash, reportedly grossing $100 million in its initial six months. Pay television licensing agreements and sale of network tv rights boosted profits for the Richard Pryor-Gene Wilder film.

Columbia, in fact, noted that "Stir Crazy" is the third-highest-grossing film in its history (behind "Close Encounters of the Third Kind" and "Kramer vs. Kramer") and "one of the most successful comedies of all times."

"Stripes," launched with a measured spending total of $4.7 million, reaped much success. Columbia used the national entertainment and sports cable network, ESPN, to aid in promoting the film.

Measured spending for Columbia pictures hit $36.7 million and included promotion for such films as "Absence of Malice," a winter release whose ad costs ran to $4 million. Other 1981 Columbia pictures included "Cheech and Chong's Nice Dreams," with a fiscal year rental total of $14 million, and "Tess," backed by a $3.5 million spending campaign and opened through a gradual release system.

Columbia releases also included "The Competition," with $3.8 million in spending; "American Pop," "Modern Romance" and "Happy Birthday to Me."

The company invested close to $4 million to push "Neighbors," which was a December, 1981, release starring John Belushi, whose death occurred shortly thereafter.

Network tv spending comprised close to 90% of all measured media output for Columbia's 1981 films. This reflects

the approach of Marvin Antonowsky, newly appointed to the presidency of marketing and research.

Mr. Antonowsky, who delves heavily into research, has been quoted as saying that the film industry's marketing direction will be "more and more tv."

"I don't know of any way to market pictures without tv advertising."

Under Mr. Antonowsky, Columbia begins testing print ads right after production of a film begins. The advertising is researched and fine-tuned until the best possible ad is created.

In its annual report, Columbia notes that television is used heavily to promote films because it is the most efficient way to reach those aged 12 to 29, the group which makes up a high percentage of moviegoers.

Ogilvy & Mather's fee basis work for Columbia is basically in the tv placement end, while Columbia has increased its in-house creative staff, which handles about half the studio's releases.

Columbia in fiscal 1981 continued gearing for its $40 million musical, "Annie," whose film rights it had purchased in 1977 for a record $9.5 million. The advertising/promotion budget reportedly was around the $10 million mark for the movie, which follows a long and successful Broadway stint for the show.

Opening this summer against such Hollywood smashes as "E.T.," "Rocky III" and Star Trek II," all produced by competitors, "Annie" garnered lukewarm reviews.

Even as it opened, though, Mr. Antonowsky commented, "we've got our money back already." Columbia, in fact, has sold $30 million in theater guarantees, $10 million in tv rights, and $10 million for HBO. In addition, "Annie" products were being sold through licensing agreements with a large number of toy companies, clothiers, publishers, etc.

Home video entertainment continues to form an important segment of Columbia's business. A joint venture with RCA will enable Columbia to market home video programs worldwide. Columbia in 1981 also signed a pact with Bell & Howell to expand videocassette offerings. Cassettes of Columbia's feature film, "Close Encounters of the Third Kind," attained $1 billion in sales quickly after release.

Also, late in 1981, Home Box Office acquired exclusive rights to Columbia films for a number of years and will aid Columbia with production costs for upcoming films.

Fiscal 1981 saw Columbia Pictures become producer of specials through the company's Rastar Television Inc. "Sixty Years of Seduction" and "Ripley's Believe It or Not" headed the inaugural list. The restructured division, under president Herman Rush, also beat all other studios in completing sales of three new series to networks: "Code Red" to ABC; "Mr. Merlin" to CBS, and Mickey Rooney's "One of the Boys" to NBC.

Columbia Pictures Television has acquired most of Time-Life's television assets, including a library for television distribution all over the world. And Columbia Pictures Television Domestic Distribution, under Joseph Indelli, continued as one of the nation's largest peddlers of movies and specials.

EUE/Screen Gems, a Columbia unit that produces tv commercials, fought for a share of the plummeting commercials market and recorded lower profits than in the past year.

But Columbia's merchandising division is prospering not only with securing of licenses for "Annie" items, but also from such merchandising efforts as that connected with the animated "Heavy Metal," which also got promotion help from the *National Lampoon*, which has a "Heavy Metal" fantasy magazine.

Gottlieb Co., under president Boyd M. Browne, is the subject of a revitalization program with plans to branch out from coin-operated games to video models, after losing a substantial portion of market shares in 1981. Analysts believe that Coca-Cola can provide funds to Gottlieb for expansion in videogames.

Eller's communications division is a core of Columbia's growing involvement in that area. Eller is expected to continue his bid to enlarge Columbia Pictures Communications through acquisition. With New York Subways Advertising now in the Columbia fold, having come on board when Eller joined the Columbia ranks last year, a push is on to renew the contract of the unit's biggest franchise—the New York lines.

He has said he is not interested at this time in bringing cable tv companies into the Columbia family.

Major personnel changes include the resignation last July of Leo Jaffe as board chairman, and the addition of chairman to the president's title held by Frank Price.

*Company estimate for fiscal year ending July 3, 1982
**Fiscal year ended June 27, 1981
†AA estimate

Consolidated Foods Corp., Chicago, the nation's 34th largest national advertiser in 1981, spent an estimated $166.4 million on advertising during the last calendar year, an increase of slightly more than 11.5%. Sales for fiscal 1982 (ending July 3) rose an estimated 7% to $6 billion, with earnings estimated to have grown by 11.8% to $157 million.

Despite its name and its position as one of the nation's largest food processors, Consolidated Foods is considered by many analysts to be more of a package goods company than a food operation.

The company, beginning as a small food wholesaler and incorporating in 1941, went through a long period of growth by acquisition through the early 1970s. As a result of its rapid growth, Consolidated Foods ended up owning not only such strong branded food and service lines as Sara Lee, Popsicle, Shasta soft drinks, Electrolux vacuum cleaners, Fuller brushes and Hillshire Farm's specialty meats, but also a variety of smaller companies, including motels, furniture manufacturers and apparel marketers.

Following an earnings slump in the mid-1970s, the company embarked on a corporate strategy that called for emphasis on operations that were market leaders or strong contenders in their business areas. More than 60 business operations totaling annual sales of more than $500 million have been divested since 1975. Combined with several major acquisitions—including the purchase in January, 1978, of the Dutch Douwe Egberts coffee, tea and tobacco operations, and the purchase in January, 1979, of the Hanes hosiery, women's undergarments and men's and boys' underwear business—the transactions have transformed the basic character of the company.

Consolidated Food's acquisitions have continued—in recent months the company has purchased the C&C Cola soft drink business and the Sav-A-Stop distribution operations—but since the Hanes acquisition, most of the emphasis has been on cultivation of internal growth opportunities rather than growth by acquisition.

The company's L'eggs operations (a part of the Hanes group) illustrates Consolidated Foods' plans for internal growth. The L'eggs line, one of the marketing success stories of the 1970s, was introduced by Hanes in 1970 in an effort to meet the hosiery needs of the increasing number of working women. The basic idea was simple: That working women had a need for mid-price hosiery, but the demands of work left them with little time to shop for such an item. Rather than distribute L'eggs through the department stores and specialty shops that traditionally carried hosiery, Hanes decided to sell the new product through drugstore chains and supermarkets so that time-strapped working women could purchase L'eggs on quick shopping trips during their lunch hours or at the same time that they bought their groceries. L'eggs were packaged in a distinctive styrene egg-shaped container, and an extensive store-door distribution network was established to deliver the line to supermarkets and drugstores on consignment.

Backed with heavy advertising support ($20.5 million in measured media in 1981, up from $19 million in 1980), L'eggs has come to command more than 20% of the highly fragmented hosiery market, and is the category's best-selling brand.

In the last two years, L'eggs has implemented a market segmentation strategy that has enabled its sales to grow much faster than the over-all hosiery market. This has included the introduction of such brands as L'eggs Sheer Energy (focusing on the benefits of all-day massage); Undie-L'eggs (addressing the problem of undesirable panty lines), and the recently introduced L'eggs Sheer Elegance (providing "elegant, silk-like pantyhose" to the mass markets).

Despite the outstanding performance of L'eggs, Consolidated Foods has been much less successful in its efforts to use the brand's powerful distribution system to deliver other kinds of products to the same working woman market. Starbooks, a line of children's books to be sold in grocery markets, was discontinued last year following disappointing results in test market, and Consolidated Foods' attempt to market a line of cosmetics under the L'erin label continues to have problems. Just as with L'eggs, L'erin's distribution through drug chains and supermarkets is intended to make it easy for working women to purchase the cosmetics.

In terms of pricing, the brand has positioned itself as presenting a better fashion statement for a few pennies more than budget brands and an equally elegant package and fashion statement as prestige brands, but for a few pennies less. The brand completed its expansion to national distribution last summer, and has shifted its ad emphasis from spot to network tv.

One of L'erin's first problems resulted from women's reluctance to buy makeup without trying it first, and the consequent difficulty that the brand encountered in getting consumer trials.

As a result, L'erin cut its media budget to $6.9 million in 1981 (from $8 million in 1980) and sharply increased its promotional efforts, including trial sizes, combination packs, and special-price offers. The step-up in promotional programs included the use of 20 in-store promotions a year, with every major product category promoted every quarter.

The brand also has had difficulty getting display space at drugstores and mass merchandise outlets, and, in response, the displays have been redesigned to be more space efficient. New trade efforts have stressed that the brand has space efficiency margins that are "49% more than Maybelline, 88% more than Cover Girl, 141% more than Natural Wonder and 76% more than Maxi." Some observers feel the purchase of Sav-A-Stop with its strength in distribution beauty and health aids was spurred by the desire to help solve L'erin's problems.

L'erin also has expanded the number of shades of mascara, eye shadow, and lipstick it offers, and this fall will be adding a new Color Glaze nail polish that offers an "acrylic, water-resistant" formula that "wears strong, shines long."

Despite all the efforts, L'erin losses are believed to have totaled close to $10 million to $15 million in 1980 and 1981 , about twice the losses Consolidated expected would be incurred in launching the new line. Though company officials maintain that L'erin has the potential of reaching $75 million in sales by 1985, current industry estimates put the line's manufacturer volume at a disappointing $25 million clip. Many industry observers feel that fiscal 1983 will be a critical year for L'erin, and that if the brand does not turn around soon, it will be a likely candidate for divestiture.

In addition to selling L'eggs via supermarkets and drugstores, Consolidated Foods' hosiery and undergarments operations also include the very successful Hanes brand and Bali undergarments, both of which are mainly sold in department and specialty stores. The Hanes women's hosiery brand was introduced shortly after World War II as high-quality women's hosiery, and for the last eight years has used its "Gentlemen prefer Hanes" theme to support its premium image. Bolstered by extensive national advertising ($11.1 million in measured media in 1981, up from $8.6 million in 1980), Hanes dominates the department and specialty store segment of the hosiery market, accounting for an estimated 29% of the unit sales and 42% of the dollar volume.

Just as with L'eggs, Hanes has sought to grow through market segmentation. Last September Hanes added Hanes Too!, a mid-price pantyhose that, according to Hanes officials, is aimed at

younger women who are aware of the Hanes reputation for quality and "who would love to buy the brand, but cannot reconcile themselves to the premium price."

Among other products introduced in recent years are: Underalls, a mid-price all-in-one panty with hose guaranteed not to leave "unsightly panty lines" (measured media in 1981: $3.7 million); Slenderalls pantyhose that promise a firm fit (measured media: $1.7 million), and Winteralls, an opaque pantyhose for cold weather wear (measured media: $375,000). Today's Girl pantyhose, Hanes' low-price entry, is aimed at working women, and concentrated its $1.5 million in 1981 measured media spending in spot and network tv. The tv spots use the tag line "Today's Girl. Buy it for the quality, choose it for the price."

Consolidated Foods' Bali undergarment line also has shifted its marketing thrust in the last couple of years in an effort to increase its 14% share of the underwire bra market and 2% share of the soft cup market. The company reports dramatic increases in unit volume as a result of a new Bali Boutique packaging display system that was designed to make Bali bras more accessible to customers at department stores and to make it easier to find the right style or proper fit without the help of a salesperson.

The program has been rolled out to more than two-thirds of the U.S. with national distribution expected by mid-1982, and measured media support for Bali increased to $2.5 million in 1981 (compared with $1.3 million in 1980 and $600,000 in 1979). The emphasis was on television advertising, including commercials that stressed "Bali fits your shape, not just your size." Because the new display system did not have national distribution in 1981, Bali's ad buys last year were on spot rather than network tv.

The Shasta operations—which account for about 2% of the regular soft drink market and 8% of the diet market—began a new advertising and marketing strategy that has been in development for the last couple of years. The brand, which had lost market share in the late 1970s, has shifted its advertising away from head-on clashes with Pepsi and Coke, instead emphasizing the variety of flavors (18 regular and 17 diet) that it offers. The principal medium is spot tv, which received $6 million in 1981, and the new ads carry an "I wanna pop" theme and stress the thrill and excitement that Shasta drinkers want from the brand's many flavors. Company officials have indicated that Shasta's advertising budget for the fiscal year beginning July, 1982, will increase 86% to $14 million (up from $7.5 million).

Other Shasta changes inciude: New package designs featuring a diagonal S logo, bright colors, and abstract forms; two new flavors—Citrus Mist and Red Berry—that were announced this spring, and a new Dr Pepper-like soft drink, Dr. Diablo, that has been in test markets. Shasta also is expected to benefit from the acquisition earlier this year of C&C Cola, a regional soft drink company with annual sales of about $100 million. Industry observers say that C&C's strength in the cola segment and in the Northeast will bolster Shasta's weaknesses in both areas. C&C also has a New Jersey production facility that can produce certain large-size bottles.

Capri Sun brand also has been the center of a great deal of activity. The fruit juice drink, which is sold in a unique flexible foil package, was developed in Germany where it holds a 44% share of the juice drink market. Capri Sun has become the leading brand in every country in which it has entered, and company officials say that in the U.S. markets in which it currently is distributed (28 states mainly concentrated in the East, Midwest, Southeast and parts of the Southwest), Capri Sun's various flavors have combined for a 33% market share. Company officials predict that Capri Sun will reach $60 million to $100 million in annual sales by the mid-1980s.

Consolidated's troubled frozen food operations continue to be the subject of turnaround efforts, with Sara Lee operations having been battered by an almost 20% industrywide drop in sales of frozen baked sweets. Industry analysts cite the recession and reduced consumption of sweets by weight-conscious consumers as contributing factors, as well as increased competition from fresh-baked goods marketed by Warner-Lambert's Entenmann's unit.

Sara Lee now controls 45% of the declining frozen baked goods market (up from 40% a couple of years ago), and had cut its measured media advertising to $850,000 in 1981 (from $900,000 in 1980 and $3.4 million in 1979), and put more muscle behind heavier trade promotion.

More recently, however, there have been indications that Sara Lee will be putting more effort into consumer advertising and promotion. The company changed agencies, and Robert Elberson, Consolidated's exec vice-president and the mastermind behind the very successful Hanes operation, took over direct control of the frozen foods group and Sara Lee. New print ads that began appearing in January attempt to provoke consumers with the question "What is your Sara Lee fantasy?" and tv spots have hit out at Entenmann's with testimonials showing consumers tasting both a Sara Lee cake and a "boxed" cake packaged in a white box with blue letters, similar to Entenmann's packaging. Sara Lee introduced a line of Puddin' in the Middle cakes this spring, and other new products are expected later this year.

Sara Lee also began test marketing a line of fresh-baked goods in Chattanooga and Nashville last fall. The company already is a supplier of "thaw-and-

eat" goods to supermarkets that heat and sell the items under private labels as fresh-baked. The thaw-and-eat division is Sara Lee's fastest-growing operation, and the products currently are being distributed in about 20% of the country.

Though profit margins at Consolidated Foods' specialty meats operations began to feel the pinch of escalating hog prices this spring, the division continues to enjoy growth through regional expansion, new product introductions, and selective acquisitions. Measured media ad support for most brands continued to rise in 1981: Hillshire Farm $6.2 million ($5.4 million in 1980); Kahn's $3.2 million ($3.3 million in 1980); Bryan Foods $921,500 ($515,000); Rudy's Farm $549,600 ($498,200), and Gallo Salame $163,800 ($126,700). Among the product expansions was the introduction of Rudy's Farm frozen country sausage and biscuits and ham and biscuits into Los Angeles, Dallas and Houston. There also has been talk of rolling national with Gallo Salame, a $30 million San Francisco-based brand acquired in 1979 and popular on the West Coast. National share of market of the combined brands totals roughly 5%, but regional shares are much higher.

Consolidated's Lawsons convenience food store chain continues to suffer as the depressed economy has had an especially devastating impact on the chain's main markets in Michigan and Ohio. Despite cost-cutting efforts and an increase in measured media ad support in 1981 ($427,100 as compared with $216,700 in 1980—all in spot tv), the 700-store chain has been losing money this year.

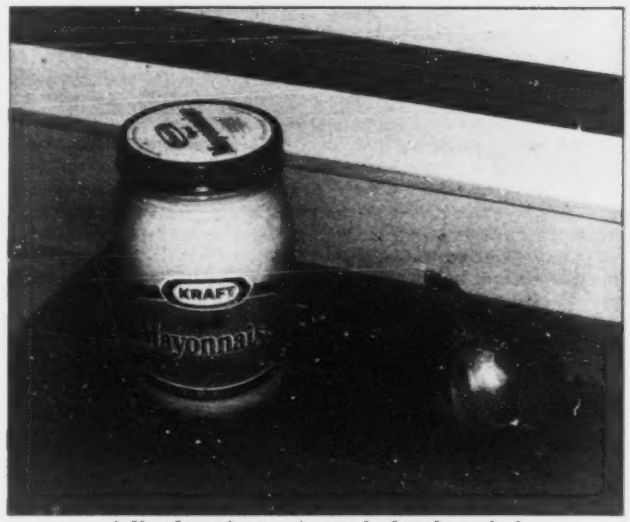
*1980 Dart & Kraft sales and earnings only
**AA Estimate for Dart & Kraft; 1980 figure excludes Hobart

Dart & Kraft, the nation's 30th largest national advertiser in 1981, spent an estimated $177 million in advertising during the year, up 18% from the combined 1980 estimated total for Dart Industries and Kraft Inc. of $149.7 million. Hobart Corp., acquired during 1981, spent $3.9 million in advertising during 1980.

Dart & Kraft, including Hobart, had net income of $348 million, down from $383 million in 1980, on sales of $10.2 billion, compared with $9.4 billion in 1980.

The year was marked by strenuous new product development activity in the Kraft retail food group, resulting most recently in a spurt of new Philadelphia brand products and salad-related items.



A Kraft mainstay is ready for the salad.

With 1981 representing the first complete calendar year since Dart and Kraft merged in the fall of 1980, advertising expenditures reflected, as one Kraft official put it, that Kraft was forced to "fight harder for advertising dollars than we used to." But the new products effort running rampant in the retail food group made for heavy advertising expenditures that should continue through the next fiscal year.

Increases in Kraft's retail food group ad budget went primarily to new products and specially targeted existing brands. Included were Kraft salad dressings, whose measured ad spending for 1981 jumped 50% to $9.6 million, including heavy introductory advertising for the three-item line of buttermilk dressings. During the year, Kraft also introduced two oil-free dressings and spent about $740,000 in advertising for low-calorie dressings.

Kraft maintained its No. 1 position in bottled dressings, and increased its tonnage for the year about 10%, according to Lou Levine, an associate at Technomic Consultants, Chicago. The company introduced bacon and tomato-flavored dressing this summer.

Concurrently, Kraft surprised observers by entering Tucson and Phoenix test markets with Sun Seasons hydroponically grown vegetables, a line of three types of lettuce, European cucumbers and cherry tomatoes. A natural fit with Kraft's salad dressings, whose volume growth, according to one company source, is dependent on the availability of vegetables year-round, the produce is being marketed under the Kraft label, with advertising that stresses freshness. The company also put into Houston test an 11-item line of salad toppings, under the Kraft Salad Bar label. The toppings include individual cans of seasonings, croutons, natural cheese shreds, french fried onions, crumbled bacon and a nut and sesame mix.

In November, Kraft startled industry observers with the announcement that it intended to market a line of California table and varietal wines designed to compete with major mass-market wines. The company formed the Mont Rouge subsidiary and units in three undisclosed states to market the wines, but in July said it had scrapped plans to market wine because analysis of the wine industry and Kraft's potential indicated "other avenues of new product development are more advantageous for it to pursue at this time." Kraft will try to sell off the subsidiaries, along with "marketing concepts" for the wines.

The nation's No. 1 cheese marketer heavily increased ad spending on three cheese lines: Grated cheese, (up from $628,000 in 1980 to $1.8 million last year), Cracker Barrel cheese, (up from $2.3 million to $3.1 million) and Golden Image cheese substitute, whose ad budget leaped from $899,000 in 1980 to $2.7 million, reflecting the national rollout last spring. Measured spending for Light n' Lively cheese dropped 38% to $1.4 million, but will be higher for 1982 as a result of a current campaign stressing Light n' Lively as a natural cheese with "half the fat but all dairy."

Kraft decreased measured spending on Velveeta process cheese spread 14% last year, to $4.9 million, but the budget is expected to rise significantly this year with the national rollout of Velveeta slices. The new product is getting a strong multimedia campaign, under the theme: "The taste you wouldn't trade for anything."

The rollout of Golden Image cheese substitute to all states in which there are no restrictions against such products resulted in a $2.7 million advertising campaign under the theme, "You have to taste it to believe it."

As the Philadelphia brand cream cheese line last year was extended with new Soft Philly, which rolled national, Kraft boosted spending on the brand 64% to $7.8 million during '81, much of which went toward the new product. (Recent advertising for the regular cream cheese asks, "Isn't it silly not to use Philly?")

But promotion of the brand name is certain to have residual effects in current tests of several new Philadelphia brand items. This spring, Philadelphia dressings with cream cheese, the first nonspreadable item to be marketed under that name, went into test in several markets including Erie, Oklahoma City and Phoenix, backed by a heavy tv, magazine and newspaper campaign, themed "Get into the thick of it."

In July, Kraft began testing a five-item line of flavored Soft Philadelphia cream cheese with bits of real fruit or vegetables. Advertising is running in couponed newspaper and insert ads in markets including Dallas and Oklahoma City.

Kraft was scheduled to begin test marketing in August for Light Philadelphia cream cheese with half the fat and a third the calories. The product, packaged in tubs, will test in Baltimore and other markets. The company has remained silent about additional Philadelphia products now in development, but one is rumored to be cream cheese-based flavored dessert frostings.

Kraft, already controlling more than 50% of the package dinners category, increased ad spending for macaroni and cheese dinners last year, with a 40.8% increase in spending to $6.2 million.

A new campaign for Kraft mayonnaise took direct aim at its prime competitor in an attempt to unseat CPC's Hellmann's from its category leadership.

Kraft hiked 1981 ad spending for the product 27% to $6 million in a continuing campaign that depicts long-time Hellman's users discovering the superiority of Kraft's mayonnaise, and telling their friends and relatives about it.

In other new product activity from the retail food group, Coffee Velvet, a flavored coffee additive combining nondairy creamer with variations of mocha flavoring, entered Tucson, Washington state and other test markets late last fall. The product, originally assigned to McCann-Erickson, Chicago, was moved to N W Ayer in December, eliminating McCann from Kraft's agency roster.

La Creme half-dairy whipped topping, tested since spring, 1981, in 7% of the country, began national introduction early this year. It has proven to be a significant force in the category, garnering an estimated 17% of the market. General Foods, whose Cool Whip remains category leader, nonetheless has shown its concern over the Kraft entry by introducing three new whipped toppings in the past year. Kraft spent $2.8 million on La Creme advertising during 1981; that figure should increase this year as rollout is completed.

Other new products from the retail group included Oven Melts meat-filled cheese slices, whose market area was expanded during the past year, and which received about $700,000 in advertising; Light n' Lively reduced calories mayonnaise, which was introduced in spring, 1981, with an ad budget of $2.7 million, and Parkay Light Spread, with 25% fewer calories and fat than margarine, now testing in Marion, Ind., and

possibly other markets. An obvious decrease in support showed up across most of the rest of Kraft's line and in the food company's regionally marketed dairy brands, including the Breyers and Breakstone lines.

Kraft moved its Light n' Lively dairy products account, along with several undisclosed new products, valued at a total $6.5 million, to Geers Gross, New York, from N W Ayer, New York, in January. Ayer retained the Sealtest and Breyers accounts and will continue to handle new products, Kraft said.

On the Dart side, only Duracell batteries' advertising budget seems to have weathered the merger intact. Because of its substantial return on investment, Duracell received a 14% increase in ad spending during 1981, to more than $16 million, and corporate officials promised continued support through the next year for Duracell research and advertising. Total West Bend unit spending fell 44% to a total $1.3 million, despite a $500,000 campaign for new Discovery cookware.

The company reported a decline in West Bend sales due to "economic conditions which softened consumer demand." The company formed a new subsidiary, Anova Electronics, during the year to market a home environment system comprised of three individual units: A telephone center, control center and protection center. The San Mateo-based company, an outgrowth of West Bend, selected Bozell & Jacobs, Palo Alto, for the account; consumer advertising is set to begin in 1983. Tupperware ad spending rose only slightly to $2.3 million.

Hobart's consumer group, under the KitchenAid name, saw an 8.8% ad budget decrease, led by a 27% decline, to $2.2 million, in spending for the KitchenAid dishwasher line. Hobart sales fell from last year as a result of decreased consumer demand for KitchenAid appliances and overseas volume. This summer, KitchenAid introduced its new food processor, manufactured by Robot-Coupe International to the company's specifications. Advertising for the new appliance will stress the "superior performance" of KitchenAid products, in color, page ads running in November and December women's, shelter and gourmet books and specialty magazines.

Focusing on those operations that retain assets and earnings in branded foods and other consumer products areas that offer stability, cash generation and growth potential, the company sold off its Canadian Dominion Dairies operation and Thatcher Glass Mfg. Co., and has virtually eliminated its fluid milk business.

Management changes during the year included adding operational responsibilities for domestic manufacturing and distribution to the post of H. Keith Ridgway, continuing as president of the retail food group. Mr. Ridgway took over from O. Everett Swain, executive vp of the corporation and chairman of the retail food group, who is retiring. In July, 1982 W. Brad Whitaker was named senior executive vice president of marketing and sales for the retail group. The title of chairman was eliminated.

H.J. Handley was named executive vp-marketing, a new position in the retail food group, from senior vp-research, marketing and development. Herbert Kohlhaas, formerly senior executive vp-U.S. operations for the corporation, succeeded Mr. Handley. William L. Jackson, formerly president of Duracell North America, was named president of Duracell Inc., upon the death of Peter Viele last February. C. Robert Kidder was named president of Duracell USA, a new title. Bill Davis, formerly president of West Bend Co., was made president of Hobart Corp. and Richard Mueller, formerly executive vp-marketing for West Bend, was named president of West Bend.

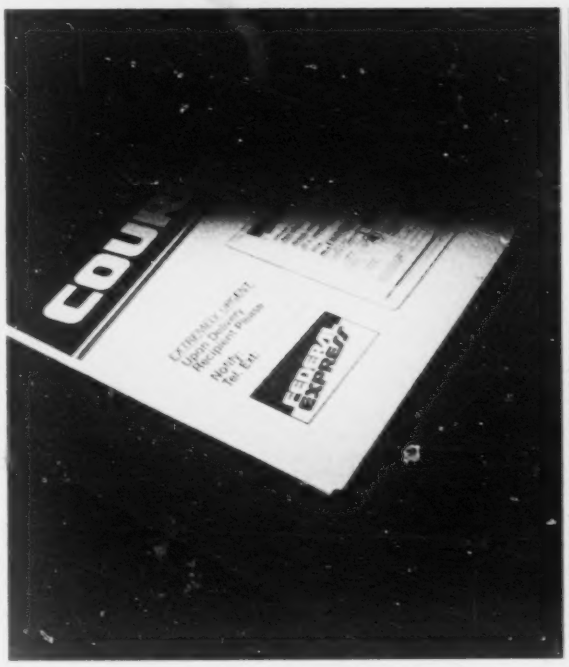
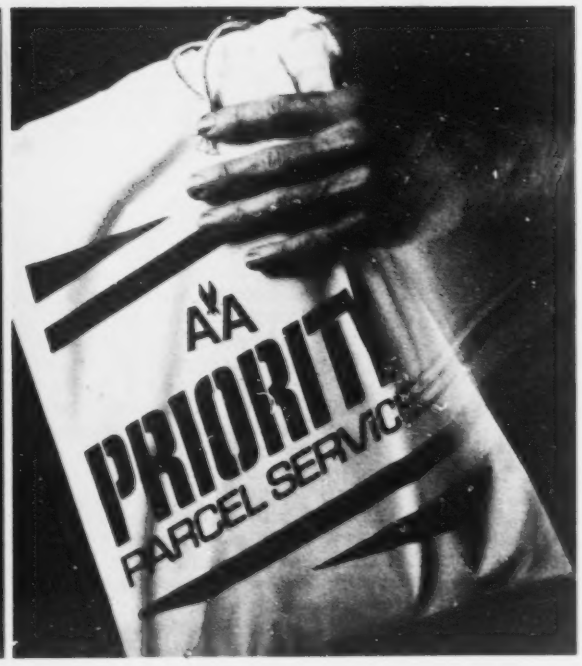
THEIRS VS. HOURS





If you think their small parcel service is fast, we think you should know about ours. American's Priority Parcel Service can get your small package virtually anywhere we serve in the continental U.S., Hawaii, Canada, Mexico and the Caribbean in a matter of hours, 24 hours a day. In most cases, that's hours faster than the overnight delivery services.

So if you're tired of waiting overnight, American's in-hours alternative is as easy as dialing toll-free (800) 368-2042. Just ask for Priority Parcel Service and we'll provide door-to-door pickup and delivery anytime, day or night, seven days a week.

When a few hours can make all the difference, don't wait overnight. Call us immediately, and we'll have your package on the next flight.

*AA estimate

Delta Air Lines, Atlanta, the 91st largest national advertiser, expects to record its 35th consecutive profitable year in 1982 despite suffering setbacks from the air fare war beginning the tail end of 1981 and bottoming out early this year.

Delta's advertising expenditures increased 15% in 1981 to an estimated $44.5 million from $38.7 million.

The most profitable airline in the world for many years, Delta recorded a net loss of $18.3 million for the quarter ended March 31, the air carrier's first net loss since the quarter ended December, 1957. The loss compares to a net income of $27.9 million for the same period in 1981.

Revenue passenger miles through May increased 0.4% to 10.36 billion. Available seat miles declined to 18.88 billion from 19.12 billion for the first five months of 1981.

Operating revenues for fiscal 1981 were $3.5 billion, compared with $2.95 billion in 1980, a 13% increase. Delta achieved record earnings of $146.5 million, a 17% increase over 1980's net income of $93.15 million.

Delta officials attribute this fiscal year's third quarter loss to the recession's negative impact on traffic and to the "uneconomic" discount fares and ticket giveaways initiated by competitors.

Within hours after Dallas-based Braniff International, in a desperation move, slashed its systemwide fares 45% last November, Delta criticized the move but followed suit along with American Airlines. Both were fearful of losing substantial traffic at the Dallas/Fort Worth Airport, American's home base and Delta's secondary hub behind Atlanta's Hartsfield Airport.

At the height of the red ink-soaked fare war Delta began an advertising campaign with the message that it would not be undersold in its markets. "Now there's no need to settle for less! Delta will not be undersold," touted newspaper ads. The airline altered its standard "Delta is ready when you are" theme to "Unbeatable Delta is ready when you are."

Eastern Air Lines immediately countered with "Nobody Undercuts Us," and American Airlines joined with "No one beats American's fares."

In March, the Dallas Better Business Bureau sent bulletins to its members questioning the advertising practice used by the three airlines, claiming the tactics were misleading to the public. The Civil Aeronautics Board Office of Congressional, Consumer and Community Affairs also informally notified the carriers of its concerns about the ads. The underselling campaigns in Dallas ultimately died off.

The East Coast earlier this year was the scene of another fare war. Faced with lower than usual winter traffic to Florida, Air Florida between Thanksgiving and Christmas waged a discount campaign to boost business. To counter this, on Christmas Eve Delta announced a plan that cut fares between 23 eastern and Midwest cities and nine Florida cities by 51%. The package included rental of a subcompact car and hotel accommodations for five days and various discount coupons for per person rates ranging between $88 and $179 dollars for the period. That move touched off a flurry of price matching and cutting by major Delta competitors including Eastern, Pan Am, TWA and Air Florida.

While the operating efficiency of the nation's air traffic system has increased somewhat since the walkout of 13,000 air traffic controllers last August, Federal Aviation Administration-imposed restrictions have hampered the expansion plans of most carriers.

Delta began service to Lubbock and Amarillo through June, only because the carrier was allocated the slots left vacant when Braniff entered bankruptcy. Service was also begun in Pittsburgh. Delta continued expanding its operations out of Cincinnati, increasing the number of daily flights to 68 from 28 in April, 1981.

Last year's financial turbulence was not strong enough to deter Delta from proceeding with its characteristically conservative plans for future growth. In 1980, Delta officials outlined a 15-year expansion plan to begin in 1987 that includes spending $5 billion to acquire about 100 new, fuel efficient airplanes that will seat 150 passengers and are designed for short to medium length flights. The $5 billion planned expenditure does not include the $4.5 billion Delta is now allocating for orders and options on Boeing 757s and 767s.

With the youngest operating fleet in the airline industry, Delta has almost completed a $2.5 billion program started in 1973 to modernize its fleet and make its DC8s and DC9s comply with federal noise limit standards that will become effective in 1985.

Delta has demonstrated a knack for resourceful planning and employe motivation that has created one of the most productive carriers in the commercial airline industry. Delta officials also contend that a tried-and-proven operating philosophy is why Delta always is "ready" to take advantage of cycles that occur in the airline business.

Delta's media mix varies slightly from year to year, with newspapers consuming about 54% of measured spending and 49% of total spending. Delta recorded one fluctuation in its media mix for 1981—a 25% increase in spot tv spending, according to Leading National Advertisers. Newspapers, however, will continue as the primary medium to "tell the man in the street who we are, where we go and how often."

E.I. du Pont de Nemours & Co., Wilmington, Del., the 53rd largest national advertiser, boosted its advertising 13% to an estimated $105 million in 1981. Earnings rose 55% to $1.1 billion from $716 million in 1980, largely as a result of Du Pont's acquisition in August, 1981, of Conoco Inc., the ninth-largest oil company. Sales totaled $22.8 billion in 1981.

The largest chemical company in the U.S., Du Pont reported worldwide advertising expenditures of $128 million in 1981, up 6.6% from the 1980 worldwide total of $120 million.

To finance the $7.8 billion Conoco acquisition, Du Pont had to borrow heavily (nearly $4 billion), and while it works to pare down its new debt load, it will probably have to shelve other expansion plans, including purchase of a drug company. That will slow the company's drive to get further into higher-margin products—a direction management deemed critical to the company's health as recently as 1980.

The Conoco acquisition added three new segments to the Du Pont Co.: Petroleum Exploration & Production, Petroleum Refining, Marketing & Transportation, and Coal & Minerals. The two petroleum segments accounted for 42% of the company's 1981 sales, according to company figures computed as if Conoco had been a part of Du Pont for all of 1981 instead of its last five months. Combined petroleum sales were $6.77 billion. The Coal & Minerals segment, accounting for 5% of corporate sales, had $841 million in sales.

Du Pont's fiber sales totaled $4.85 billion, about 8% higher than 1980 and accounting for 15% of corporate sales. Despite a 3% reduction in the physical volume of its fiber production due to a softening in the apparel, home fabric and carpet markets, Du Pont kept its fiber sales climbing by raising average prices 12%.

Chemicals, plastics and specialty products had total sales of $10.32 billion in 1981, almost 13% higher than in 1980. Of the four company segments dealing in chemicals, plastics and specialty products—Polymer Products, Agricultural & Industrial Chemicals, Industrial & Consumer Products and Biomedical Products—only the Agricultural & Industrial Chemicals segment survived a leveling off of sales due to sluggish domestic demand and economic conditions.

Sales of agricultural and industrial chemicals jumped almost 25%, from $2.72 billion in 1980 to $3.39 billion in 1981. Total chemicals, plastics and specialty products sales accounted for 33% of corporate sales, down from 67% in 1980, before the Conoco merger.

Polymer products sales increased by 7% over 1980 to $3.21 billion. Industrial and consumer products sales—including electronics, printing and industrial photographic film, finishes, explosives, firearms and coatings—increased only 3.8% to $2.72 billion after leaping over 12% from 1979 to 1980. The Biomedical Products segment, producer and marketer of high-tech systems that aid in the diagnosis and treatment of disease, saw its sales skid in 1981, growing only 8.8% to $1 billion after soaring up 37% from 1979 to 1980.

In 1981, Du Pont held that its specialty products—electronics, finishes, explosives, agricultural chemicals, medical and printing—were the heart of its strategy for the 1980s. And even after the Conoco merger was completed, company chairman Edward G. Jefferson said Du Pont's commitment to expanding its efforts in the life sciences, electronics and other specialty areas would "remain unchanged."

Leaving those expansion plans unchanged, Du Pont planned for 1982 a 25% increase in research and development manpower and a 20% jump in spending for research to continue current studies while stepping up energy research.

"This merger isn't just backward integration" to supply raw materials for the many Du Pont products that depend on petrochemicals, Mr. Jefferson said. "We've made engineering and scientific contributions in every area as we've gone from gunpowder to chemicals to fibers to film to healthcare. I don't think energy will be any different."

Capital expenditures in 1981 jumped 80% to $2.45 billion from 1980's $1.36 billion. The increase was mainly due to $996 million in capital outlays by Conoco in the year's final five months.

Du Pont's international operations, which account for one-third of its business, are expected over the next five years to produce sales that will grow, in real terms, at twice the rate of industrialized world economies.

Of Du Pont's $50.5 million in total measured media spending, $6.6 million—all in network tv—was from Conoco. SilverStone cooking coating was a pacesetter among DuPont's product spenders, with $7.8 million in measured spending.

Leading National Advertisers reports Antron fibers in women's apparel received $3.4 million in measured media support, $3.2 million of it going to magazines. Spending for Lycra fibers in women's apparel totaled $3.3 million while Lucite home paint received $2.1 million.

Measured media spending as a whole generally was split between magazines and network tv.

In the future, Du Pont will stress the development of high-value specialized products in markets with strong growth potential. Du Pont in 1981 broke ground on an $85 million life sciences research complex near its Wilmington headquarters. The complex will have a staff of 700 scientists and support personnel. Additional biological science research facilities are being read-ied at Glasgow, Del., Glenolden, Pa., and Deepwater, N.J.

Eastern Air Lines, Miami, the 87th largest national advertiser, held the line on its 1981 advertising budget, matching 1980's total of $54.1 million.

The airline reported its second annual net loss in a row, which rose to $65.9 million in 1981 from 1980's net loss of $17.4 million. Revenues in 1981 were $3.7 billion, up 9% from 1980's revenues of $3.4 billion.

While Eastern's 35.5 million revenue passengers carried in 1981 was the highest for the airline industry, it was below the trunk carrier's 1980 figure of 39 million. Eastern's board chairman, Frank Borman, cited a deepening recession, fare cuts on certain routes and the air controllers' strike as primary reasons for the company's and industry's woes throughout 1981.

In his address to shareholders, Mr. Borman said revenues for the first six months of 1981 climbed 14% above the year earlier period but the advance slowed to one-tenth of 1% by the fourth quarter, forcing the airline to take such measures as laying off 1,500 fulltime employes and 1,000 parttime and temporary employes.

In addition, he said, 500 employes took advantage of a leave-of-absence policy, which allowed them to take from one to six months of unpaid leave time.

A large part of the layoffs was blamed on the air controllers' strike in the second-half of 1981, which forced the FAA to set limits on operations, thereby straining available seat miles in the third and fourth quarters.

Another cost-cutting measure taken by the air carrier was to institute a variable earnings program in which employes donate 3.5% of their wages to the company unless Eastern meets certain profit goals. In 1981, the company kept the entire 3.5% or an estimated $37 million. At yearend, Eastern again went to its employes and asked for an extension of the variable earnings program in addition to a one-year wage freeze.

Both requests, from Mr. Borman, were accepted by Eastern's pilots. However, the company's union contract with the International Assn. of Machinists (IAM) expired in December, 1981, and by mid year 1982 a new contract was still being negotiated. A source close to the negotiations said the two requests were a part of the negotiating process.

Fuel costs, the bane of the airline industry since the Arab oil embargo in the early 1970s, continued to affect operating costs for Eastern, although not as severely as in 1980. Despite a decline in fuel consumption, Eastern's over-all fuel bill rose to $1.14 billion from 1980's $1.03 billion, reflecting an 18% rise in the average price for a gallon of jet fuel as opposed to a 51% rise for the year earlier.

In a further effort to control costs, Eastern also grounded indefinitely a number of its older, less efficient Boeing 727-100 aircraft and exercised an option on the purchase of nine additional twin-engine Airbus Industrie (a French aircraft maker) airliners, considered by Mr. Borman to be more fuel-efficient. Eastern bought the planes, with delivery through 1983, for a total of $335 million.

Fare cuts by carriers competing with Eastern on certain East Coast and transcontinental routes continued to affect revenues for the air carrier. Eastern matched the fare cuts of competitors. However, Eastern did turn up with two air fare programs—a couponing offer for passengers on its Eastern Seaboard shuttle flights and a dividend, of sorts, in the form of a fare discount for its shareholders.

In the program for its estimated 87,000 shareholders, Eastern offered vouchers good for 25 cents of travel for each common share owned as of Feb. 6, 1981.

The vouchers could be used to pay for up to half the regular price of a ticket on Eastern's route system, except for flights originating out of Canada. The company reported that nearly two-thirds of its shareholders took advantage of the program and the program continued in 1982.

In July, Eastern issued coupons to passengers on its Eastern Seaboard shuttle flights that entitled recipients to up to $50 discounts on the air carrier's coast-to-coast market.

Aside from the cost-cutting programs, there were two noteworthy events that occurred in late 1981 and early 1982. In November, Eastern shifted its $54 million account from its agency of nearly 20 years, Young & Rubicam, to Detroit-based Campbell-Ewald. The switch shook the advertising industry—not only because the account change was the largest by an advertiser in 1981 but also because of the circumstance surrounding the switch.

At the time of the switch, rumors were flying that the

friendship between Eastern's Mr. Borman and C-E's chairman Thomas B. Adams figured largely in Eastern's decision to change agencies. Both men denied that their friendship was the sole reason for the switch, and that while it may have figured some in the decision there were larger considerations in the reason for the switch.

Not long after the changeover, C-E broke Eastern's new campaign in 1982, which focused more on Eastern employes and less on the air carrier's chairman. In addition, "America's favorite way to fly" became the tag line in Eastern's new campaign, reducing its former slogan ("We earn our wings every day"), like Eastern's chairman. to a cameo status. Interestingly, "We earn our wings" is uttered by the chairman.

For the first three months of 1982, operating revenues were $908.4 million, down from 1981's first-quarter revenues of $961.5 million. Net income loss for the three months ending March 31 in 1982 was $51.4 million and compares to earnings of $4.1 million for the same period in 1981.

Advertising*	101,000,000	83,887,700

*AA estimate

Eastman Kodak Co., Rochester, N.Y., the nation's 55th largest advertiser, increased its U.S. advertising by 20% to an estimated $101 million.

While Kodak's worldwide sales increased in 1981, the company did not enjoy the double-digit growth it had in 1980. Worldwide sales of $10.34 billion were up 6% from $9.73 billion in 1980, which had been an increase of 21% over 1979. Those worldwide sales included $8.26 billion, a 4% increase from the previous year, for the photographic division and $2.35 billion for Eastman Chemicals division, up 13% from 1980.

Within the U.S. alone, Kodak sales to unaffiliated customers in 1981 were $6.4 billion, up from $5.7 billion in 1980. Sales to unaffiliated customers in other areas in 1981 totaled $944 million in Canada and Latin America, $2.45 billion in Europe and $539 million in Asia, Africa and Australia.

For the first quarter of 1982, Kodak's worldwide sales dropped to $2.25 billion, a decrease of 3% over 1980's first-quarter reading of $2.31 billion. Worldwide net earnings dropped 27% during the same period, compared with a 29% rise from first-quarter 1979 to 1980. Earnings dropped to $181.3 million from $249.1 million. Company officials say they don't expect a turnaround until the fourth quarter of 1982, traditionally the company's strongest selling period.

Kodak's sales for the first half of this year were $4.68 billion, a decline of 1% from the $4.72 billion reported for the same period of 1981. Earnings for the same period declined 19% to $429.6 million from $533.6 million for the period a year earlier.

Commenting on the six-month results, Eastman chairman-chief executive Walter A. Fallon and Colby H. Chandler, president, said they were "restrained" by a variety of factors, including the sluggishness of the worldwide economy, pricing pressure in the chemicals industry resulting from overcapacity, unfavorable currency fluctuations and costs incurred in introducing new products.

Kodak also invested more money in research and development efforts in 1981. A total of $615 million was invested, up from $520 million in 1980, an increase of 18%. The greater portion of that money was spent on the development of several new amateur cameras, photofinishing equipment and a new Ektaprint copier.

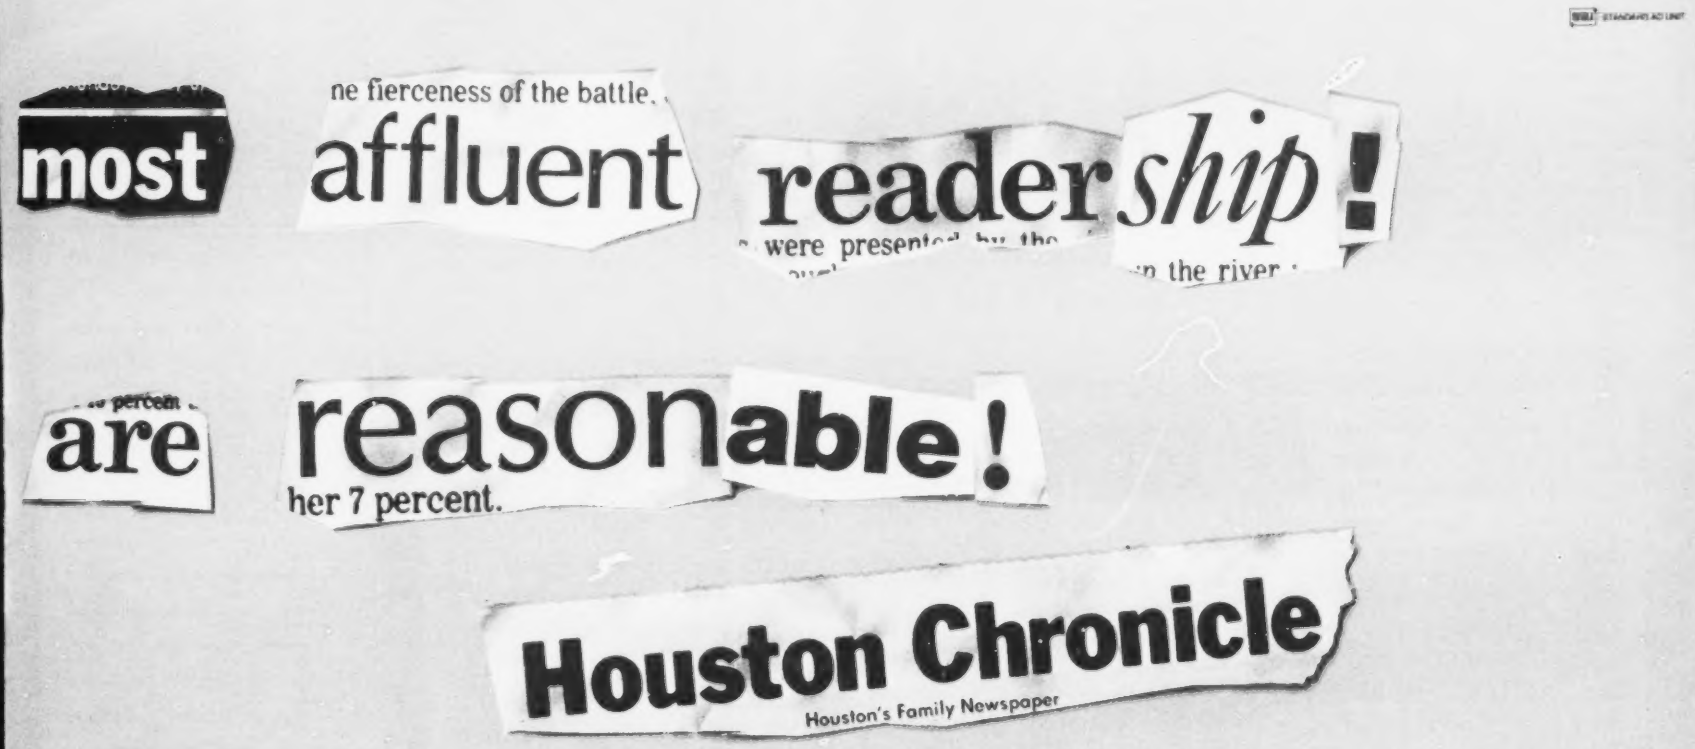
The company seems well on its way to matching 1981 ad expenditures this year if the planned spending involved in the rollout of its disc cameras is any indication. Announced at a press conference last February, the cameras reached the retailers in May. Sources say Kodak will spend at least $30 million on the disc campaign, virtually eliminating advertising for its conventional lines. However, Kodak's new instant line is being supported substantially with advertising and promotion. Kodak's aim is to ensure that 95% of all adult consumers will have heard of the disc camera 18 times before the crucial week before Christmas. The bulk of the advertising dollars will go to tv in 90, 60, and 30-second prime-time commercials. John Powers, vp-director/marketing communications for Kodak, said the 90-second spot is new for the company and is necessary to show the various aspects of the disc. The longer spots combine vintage Kodak scenes with futuristic shots demonstrating individual parts.

Kodak showed prototypes of the camera to 1,000 outsiders to find which features buyers would consider most critical and should be advertised. Because the camera is taking center stage in these commercials, popular Kodak spokesman Michael Landon will be used to advertise color paper, rather than the equipment.

In addition to tv, the company is also using magazines such as *Time*, *Sports Illustrated* and *People* for print color spreads with, said Mr. Powers, fairly long copy. And to increase home saturation, Sunday supplements will be used.

The camera was christened after the 15-exposure film disc that Kodak hopes will replace conventional roll film. The film lists for $3.19 and the camera offers three choices; the 4000, list price $67.95, has a fixed focus ranging from 4 ft. to infinity; the 6000, list price $89.95; and the 8000, $142.95 list price, with a rapid sequence film advance and a built-in digital alarm. All three cameras automatically advance the film to the next frame, set the exposure, activate a built-in flash if necessary and recharge the flash in just over a second.

While analysts were impressed with this new offering, featuring other innovations such as wide-angle lens, they were fearful that the higher-than-expected prices may put it out of



BEST AVAILABLE COPY

the range of most amateur photographers. If so, analysts claim, the disc will fail to do for Kodak, and the amateur photography industry as a whole, what it is hoped it will do—stimulate a sagging business.

However, Walter Fallon, Kodak's chairman, called the disc camera "the biggest innovation in amateur photography since the cartridge-loading Instamatic 19 years ago." The camera is expected to increase by 25% the number of good-to-excellent pictures amateurs get from pocket cameras, the company claims.

To get all these points across to consumers, in addition to advertising, Kodak is sinking large sums of money into promotional materials, discounts to retailers who order early and training programs for salespeople. First, retailers who ordered prior to April 30 received 5% off their order and all retailers are reimbursed for the advertising they do up to an amount determined by how many cameras they buy.

At the annual meeting last May, Kodak officials said orders were ahead of expectations for both the disc and the new line of instant cameras that were introduced in January. Colby H. Chandler, company president, said almost 1,100 independent photofinishing labs—350 in the U.S. and Canada—ordered the new equipment necessary to process the disc film.

Photofinishers say the minimum investment needed for equipment and attachments to existing printers is $20,000, about one-fifth the capital analysts now say goes into a typical minilab. Large photofinishers will indirectly benefit from the need for new equipment as they can afford the more expensive, highly automated systems, which should dramatically increase the productivity of finishers. Investments are made on the basis of picture-taking volume, which in turn depends on camera sales. Kodak itself makes most of its money on sales of film and paper rather than equipment, so the financial rewards of the new system will not be apparent until 1983, when the company hopes millions of its latest entry will be in consumers' hands.

Typically, amateur photographers use new cameras with abandon for the first six to nine months of ownership, giving photoprocessors a chance to prosper. Then in the three to five-year period after a product launch, as competitors play catchup, processors continue to enjoy substantial profits. Pako Corp., a photoprocessing equipment maker that said it used patents to design a film processing and printing system for disc films, placed the cost to small back-of-the-shop finishers as small when compared to the cost of the entire plant of $90,000 to $100,000. Kodak said the least expensive film processing unit it is producing will cost about $18,000.

Meanwhile, Kodak isn't resting, but is looking to answer the hesitation regarding the high price of the camera. At the annual meeting Mr. Fallon said a less automatic disc camera, with a manual flash, no close-up lens and penlight battery, will be introduced in Europe this fall. The 2000 model is expected to sell in Europe for $40, and analysts are predicting that in early 1983 lower-price extensions will surface here. This should help protect Kodak against competitors such as Keyston Camera Corp. and Vivitar, which are thinking of licensing the disc technology from Kodak. At least one company, Continental Camera Corp., Rahway, N.J., has already done so.

The company is also investigating the possibility of using the disc to record images from negatives to display on tv. Sony is expected to debut the Mavica that records images on videodiscs for tv playback next year, at a cost of approximately $1,000. Kodak is also researching and developing a filmless, all-electronic camera. Electronics are now used to improve traditional photos and prints made from poor negatives.

Besides looking into its crystal ball, in early 1981 Kodak brought out four more "conventional" cameras and faster instant film. These new cameras replace the Colorburst line, which fared badly against Polaroid's high-speed 600 Sun camera. Three of the four are folding models with built-in flashes which make use of existing indoor or outdoor light. The fourth, the Champ, is a rigid-body camera, at the lowest price of the line—$29.95. Top-of-the line is $114.95.

The new line commercials use magician David Copperfield as spokesman, with the tag line "Capture all the magic in an instant." Kodak used cable as part of its national rollout for the line.

Polaroid is not the only challenger Kodak has to stay focused on. Fuji Photo Film Co., the dominant force in amateur photography in Japan, is gearing up for its instant camera entry in the U.S. The company is expected to announce worldwide distribution in October. Fuji also won the sponsorship of the Los Angeles Olympic Games over Kodak, as the latter bickered over price. Fuji is already in the States with its film line, with a spring promotion featuring an instant game and an extensive ad campaign in May, trying to reach 90% of all adults more than 10 times for peak spring sales.

Kodak film replaced Ektra cameras as the area receiving the greatest amount of ad dollars in 1981. Film was supported by $19.5 million, including $11.4 million in network tv, $2.9 million in magazines, $4.9 million in spot tv and $371,700 in outdoor. The budget for Ektra cameras dropped by 63% in 1981, with only $5.9 million spent last year vs. 1980's $15.9 million. Network tv again received the bulk of the dollars with $4.2 million; $1.1 million was spent in magazines, $422,900 in newspaper supplements and $188,800 in spot tv.

Kodak Colorburst instant cameras and film had an ad budget of $1.7 million, all of that spent in magazines. Magazines also received the total budget for both Kodak carousel projectors and copiers. Carousel projectors were supported with $1.3 million and copiers with $1.4 million.

Kodak is going after the likes of Xerox and IBM by taking a different type of picture, a copy, with the August introduction of the Extraprint 250. The machine can produce 5,500 two-sided copies per hour automatically, using a pair of microprocessors 10 times as powerful as those in existing Kodak duplicators. Two models will be available: The 250 AF model, which can separate and staple multipage sets, will sell for $116,000 and lease for $2,645 a month, and the model 250 F, which simply collates, at a price of $110,000, leasing for $2,505 a month.

These machines will set sights directly at high-end Xerox models, with Kodak features going up against Xerox's speed.

Kodak is aiming at another area of business machines with its August, 1981, acquisition of Atex Inc., a maker of computer-based publishing systems. The cost was about $79.2 million of Kodak stock. This should strengthen Kodak's position in the graphics market; the company already provides printing plates, phototypesetting papers, films and chemicals to the publishing industry. Atex computer systems and software were used in the preparation and processing of texts for newspapers, magazines and other publications.

The acquisition was a departure for the company, which prefers to develop its own technology. Atex management reports to the general manager of Kodak's photographic division.

In other photographic division highlights, worldwide sales of instant film showed solid increases, particularly in Latin America. While film advertising in Brazil remains with J. Walter Thompson, Kodak recently moved its line of Ektra cameras in that country to McCann-Erikson.

Some recent moves over at J. Walter Thompson have industry observers wondering whether the Kodak account will be following some of its key agency people out the door. Especially as William C. Thompson, a former JWT exec vp, joined McCann-Erickson as exec vp-director of account development. For the past five years Mr. Thompson has been focusing almost solely upon Kodak's worldwide business.

Executives at both Kodak and JWT state that the move of Mr. Thompson and the other vps who worked on the Kodak account are purely coincidental and any changes will be positive ones. Kodak is becoming more aggressive in its advertising posture; no longer content to deal with competitors only when they become realities, the company is now aware of threats to its domination of the amateur photography industry.

Kodak is expected to release a new Eastman color high-speed film by late 1982 for the motion picture industry. In addition, a color print film with improved dye-stability characteristics is being developed. The film will hold its color 10 times longer than other release print film available today, increasing its attractiveness to libraries, educational companies and for other archival applications.

At Eastman Chemicals division, several construction efforts are under way in areas such as coal gasification and hydrocarbon cracking. Agricultural chemicals are making steady advances with "excellent" sales gains for natural source Vitamin E. Kodel polyester staple and yarn and Estron acetate yarn were manufactured at near-capacity levels throughout 1981. Kodolite polyester, a fiberfill introduced in the fall, was well received by manufacturers of a wide variety of outerwear.

If you want to make every TV dollar worth even more, stretch your TV budget in *Outdoor Advertising*. That's right, *Outdoor Advertising* is the perfect complement to almost every TV buy. It's like buying media insurance to assure the effectiveness, reach and frequency of your advertising. Used in conjunction with TV, *Outdoor Advertising* can make your TV sales points even more memorable. But more importantly, *Outdoor Advertising* can maintain your presence in a market even when you're not on TV. Smart marketers across the country use *Outdoor Advertising* during breaks in their TV schedules. So they're never really out of the marketplace. Never really out of the consumer's mind. For more information, call the Institute of Outdoor Advertising at (212) 986-5920.

Esmark Inc.

	1981*	1980**
Sales	$3,132,349,000	$2,730,312,000†
Earnings	93,769,000	471,414,000††
Advertising	175,065,000	166,952,000††

*Fiscal year ending Oct. 31, 1981 (53 weeks)
**Fiscal year ending Oct. 25, 1980 (52 weeks)
†Revised due to corporate restructuring
††Restated

Its restructuring apparently complete, Esmark Inc., Chicago, the nation's 31st largest advertiser, showed dramatic gains in operating profits in fiscal 1981 from its stripped-down portfolio of brand-name packaged food, consumer goods and industrial chemicals and products.

Esmark spent an estimated $175.1 million in advertising in 1981, up 5% from the estimated spending of $167 million in 1980. Advertising and sales promotion spending as a percentage of net sales declined to 5.7% in 1981 from 6.2% in 1980 with the end of massive promotional campaigns for new food products introduced in 1979 and 1980.

Since 1979 the Chicago-based company has divested its low-margin fresh meat and capital-intensive energy interests to become a much smaller but more profitable concern. Revenues in the fiscal year 1981, ended October 31, were more than $3.1 million, less than half the pre-restructuring level, while net earnings were $93.8 million, slightly higher than they were in the last year before the divestitures.

After-tax earnings from on going operations in 1981 reached nearly $99.6 million, almost twice the $54.3 million reported for 1980.

A major contribution to the improvement in Esmark's bottom line was a sharp rebound in the results of Swift & Co., the remains of the foods operation on which the holding company was founded. Swift had record operating profits of $38.4 million for 1981, vs. a $9.8 million operating loss in the previous year. Swift remains the core of Esmark, accounting for nearly $1.5 billion or 47.4% of the company's revenues.

Although Swift reported the largest contribution among Esmark subsidiaries to the over-all bottom line, its 10% return on assets lags far behind the standard set by chief executive officer Donald Kelly for his "portfolio approach" to managing the operating units. At the annual meeting last March, Mr. Kelly said Swift had shown "remarkable progress" but that he wants at least a 15% return from the foods subsidiary. Other Esmark units have even higher returns on assets.

"We're about a year away from knowing whether Swift can consistently give us an adequate return," he said at the meeting, echoing his statement in the 1979 annual report. "I believe the time has come for performance rather than promises," referring to Swift's profits—which preceded the spin-off of the fresh-meat operations by about a year.

The turnaround stemmed from improved margins in three of Swift's food groups—processed meats, poultry and grocery. The fourth group, cheese, had flat results.

The best gainers were peanut butter, which capitalized on last year's peanut shortage by raising prices after locking in supplies, and the realigned turkey business, despite an industrywide inventory glut.

Over-all advertising expenditures for Swift were up 6%, to $26.2 million from $24.7 million in 1980, but still less than the $27.7 million spent in 1979. Most of the increase was in magazines, up about $500,000 last year, with network and spot tv advertising about the same.

Swift's dry grocery business was the most profitable area during 1981. Peter Pan peanut butter, the largest-selling product of the group, improved its market share 1.4% in share points, although it still runs a distant third, after Procter & Gamble's Jif and CPC International's Skippy. Ad spending for 1981 was $7.5 million, with $5 million of that going to network tv with the remainder in spot tv.

Dry soup mix sales increased in 1981 with extension of the Soup Starter line, including the introduction of Stew Starter dry stew mix, which went national in October. The company spent over $5 million in advertising last year on Soup Starter, up from $3.3 million in 1980, including about $2.5 million in network tv. The product has a 9% share of the dry soup market, down from 11% in 1980.

Swift spent $3.6 million to advertise Butterball turkey products, including a new line of smaller Butterball products which saw its first full year of national distribution. That compares with about $6.9 million spent on Butterball ads during the rollout phase in 1980. The company has about 24% of the branded turkey market, with an increase of one share point last year. Turkey and other poultry specialties account for about $300 million in sales, up from $286 million in the previous year.

Swift remained a major force in breakfast meats with a 5.4% share of the market, up from 5.1% in 1980. New products included Brown 'N Serve sausage from ham and a beef variety of Sizzlean breakfast strips.

Over-all ad spending in 1981 for processed meats totaled more than $13 million with ad spending on breakfast meats exceeding $7 million. Brown 'N Serve sausage held onto an 85% share of the total pork sausage market, while sales of Sizzlean and Swift Premium bacon were relatively flat. Spending on other meats included regional brands such as Schickhaus in New York and Mayrose in St. Louis, as well as Swift Premium label products nationally. Total sales of processed meats were in excess of $400 million.

Swift's cheese operations faced an industry oversupply of cheese and dairy products plus record USDA inventory levels as a result of the milk price support program. Treasure Cave blue cheese continued as a leader in its category, and the New Dimensions line of imitation cheeses was introduced nationally. Total ad spending for these two brands was $400,000.

International Playtex, Esmark's most profitable unit, increased earnings 29% in 1981 to $84.2 million, accounting for more than half of Esmark's profits from ongoing operations.

It was the first full year of earnings from leotard-maker Danskin Inc., acquired in April 1980, which contributed $11.4 million in earnings compared to $1.4 million in the previous year, including a $5.1 million offset for acquisition costs. During 1981, Danskin introduced new leotard brands and entered the casual socks business.

Esmark also reported "significantly higher earnings" from its marketing arrangement for the Jhirmack line of haircare products, which saw a $30 million gain in sales last year. Last March, Esmark announced the acquisition of Jhirmack Enterprises for $28.4 million. Jhirmack sales in 1982 are expected to reach $65 million in the nearly $1.6 billion shampoo-and-conditioner market.

Total advertising spending for the division increased 64% from 1980, as Playtex concentrated on Jhirmack and its other leading brand, Playtex tampons. Playtex reported "significantly" increased market share for tampons, following the turmoil caused by the discovery of toxic shock syndrome.

The U.S. intimate apparel divison of Playtex reported "very strong" sales and profits in 1981 and a record high market share. Playtex bras, girdles and panties were supported with over $26.6 million in advertising and sales promotion spending in 1981, compared to $25 million in the previous year.

Retail sales of Playtex's Pennaco Hosiery division were up 16% in 1981 vs. a total industry increase of 10%. Currently sold mainly in better department and specialty stores, the division has "aggressive plans and programs to increase share in this area scheduled for test marketing." National expansion of new Playtex Super Look pantyhose among mass merchandisers is likely in late 1982, and a line of bras and bikini underwear sold in grocery stores under the Bare D'Lites brand name, in lightbulb shaped containers and displays, went into test markets last December.

The international division reported a record sales year, with increased market shares in France, Italy and Mexico. Market shares remained steady in Spain, the United Kingdom, Australia and South Africa. The Danskin line was introduced in Western Europe last year, while Jhirmack products entered Canada and France. Playtex tampons registered a 32.3% market share in Canada and 31.2% in France. And the division entered into a joint venture with Carita, a French skin-and haircare company.

Estech, a diversified chemical company, posted revenues of $462.8 million and operating earnings of nearly $44.9 million in 1981.

Estech has four main lines of business: Phosphate rock mining, fertilizers, international investments and distribution of industrial chemicals.

Estech is the seventh largest independent producer and marketer of mixed farm fertilizers in the U.S. It makes Certified Harvest King fertilizer for farms and Vigoro fertilizer for lawns and gardens. It holds the second largest market share in the latter, supported last year by $771,000 in measured ad spending, compared to $681,000 in 1980. Its Par Ex brand is the leading fertilizer for golf courses and the commercial lawn care business.

Estech's earnings were relatively flat compared with 1980 as gains in fertilizer earnings from acquisitions were offset by reduced earnings in the phosphate business. Phosphate exports, which account for a large part of sales, were hurt by a weak international economy and a strong U.S. dollar.

Estech distributes industrial chemicals under the name of Weskem, acquired in September, 1981. Eschem, the other side of Esmark's chemicals business, has interests in industrial adhesives, wax coatings and specialty oils. Revenues were even with last year's record levels, but pretax earnings were down for the second consecutive year due to the recession.

For the sixth year in a row, Eschem's National Wax Co. reported increased revenues and a return on assets in excess of 25%. Eschem's international markets in Canada, the United Kingdom and France reported combined revenues and operating earnings slightly below 1980's record levels.

Altogether Esmark earned $46.9 million on revenues of $575.4 million from its chemicals group in 1981, compared with profits of $47.1 million and revenues of $485.8 million in the previous year.

STP Corp., a car-care products distributor acquired for $116.5 million in 1978, is apparently having profit problems although it continues to dominate several of its product categories. The company was not mentioned in the 1981 annual report nor at this year's annual meeting, and the head of Esmark's chemical unit has been studying what to do with the subsidiary. "It was a bad buy," Mr. Kelly said in March. "Costs are up considerably and volume is down." He also said the company has not added to its product line as expected.

STP's biggest brand, STP Oil Treatment, continued to lead the oil additive category in sales with measured advertising spending of nearly $4 million, vs. $2.4 million in the previous year.

STP Gas Treatment maintained its lead in the expanding gas additive category with record sales on measured advertising of more than $3 million, against 1980 ad spending of $2.3 million. Sales of Son of a Gun, a vinyl protector that is one of the leading brands in that market, are growing in excess of 10% a year. Measured ad spending for Son of a Gun was estimated at more than $3 million, compared to $2.6 million in 1980.

STP Diesel Fuel Treatment was introduced last year and achieved "significant levels that were well above plan," the company said. A major part of STP's marketing strategy is the sponsorship of auto racing teams, including Gordon Johncock, this year's winner of the Indianapolis 500.

Estronics is the new name for the division that includes International Jensen, maker of high-fidelity audio products, plus EESCO Inc., the Midwest's largest independent electrical wholesale distributor, and Custom Technologies, a maker of short-run metal stampings and investment castings.

Revenues from Estronics reached $289.3 million from $216.7 million in 1980, while operating earnings declined to $23.2 million from $25.2 million. Earnings from acquired businesses and the domestic car speaker business were up but profits from international sales and other domestic hi-fi products were down. Also, 1980 earnings included $1.1 million from the sale of a division.

International Jensen, the brand leader in home and car stereo speakers, improved its market position in 1981 despite the slump in auto sales, apparently because "consumers are now keeping cars longer and investing in after market products," the company said.

Jensen also makes car audio receivers, including electronic digital display units introduced last year. Jensen recently introduced a line of audio-video component products to compete in the booming video market.

During 1981, Jensen acquired Discwasher Inc., the leading maker of record and tape care products. Discwasher recently introduced video head cleaners and other products for the video

accessory market, which grew by nearly 90% last year.

Other recent acquisitions are Advent, manufacturer of high-quality home loudspeakers, and Phase Linear, a maker of electronic audio components. Jensen also markets hi-fi products for the car and home in more than 60 countries, with the largest growth in Latin America last year.

Exxon Corp., New York, the 84th largest national advertiser, increased its advertising 66% to an estimated $58 million in 1981. In 1980, Exxon's estimated advertising expenditures were $35 million.

After two years of dramatic growth in which the company doubled its annual earnings to $5.7 billion in 1980, net income declined 1.5% in 1981, to $5.6 million. The decline in earnings in 1981 was offset to a great extent by foreign exchange gains related to the strengthening of the U.S. dollar. Both the petroleum and chemical segments of the company experienced depressed earnings due to weak product demand, excess production capacity and higher raw material and operating costs.

Exxon's poor performance continued into 1982. The company announced in July that its 1982 second-quarter earnings had dropped 51.5% to $885 million compared with $1.83 billion in the second quarter of 1981. For the first six months of 1982, Exxon's net income declined 38% to $2.1 billion, in comparison to the $3.4 billion of a year earlier. Exxon's 1982 second-quarter earnings were its lowest since 1979 when it earned $830 million.

The company's weakest performance came from its refining and marketing businesses in Europe where conditions similar to 1981—weak product demand and higher operating costs—combined with a depressed economic environment produced losses of $17 million.

However, the company reported that earnings had also been reduced by a $106 million loss provision resulting from its decision to withdraw from the Colony shale oil project in Colorado in May.

The company does not expect its troubles to be over soon. It is gearing for tougher times ahead with an estimated 15% reduction in its work force. It is also expected that its budget for exploration and other capital investment will be scaled down.

Exxon has also cut back on its corporate advertising budget. The "We're Exxon. We're more than 100,000 people working on energy," campaign has been shelved and there are indications that product ads may be the next casualty.

More than 50% of its 1981 spending was concentrated on network tv, which received $24.2 million. About $6.8 million went to magazines while $6.2 million was devoted to spot tv.

According to Leading National Advertisers, Exxon spent $23.9 million in measured media support for general corporate promotion in 1981, of which $20.6 million went to network tv, $2.8 million to magazines, $357,400 to spot tv and $70,600 to network radio. In 1980, the company had spent only $10.5 million in this category.

Exxon reported that energy operations had declining revenues in 1981. Even though U.S. earnings were favorable, affected by the full decontrol of crude oil prices, the improvement was tempered by increased taxes and higher exploration expenditures.

In addition, its oil reserves continued to drop—from 6,513 million bbls. at the beginning of 1979 to $6,157 million bbls. at the end of 1981.

In spite of the poor earnings climate, 1981 saw Exxon's development drilling program at its highest level in over 20 years. Development expenditures of $1.9 billion set a new record, and development wells drilled were up 30% to 934. The company confirmed the presence of significant quantities of oil at its 1980 oil find in Arauca, Colombia.

It was also a year in which Exxon decided to call a halt to a number of its ongoing projects. In July, the company suspended work on the proposed development of heavy oil deposits at Cold Lake, Alberta. The potential returns from the project did not justify its reactivation, said the company. Later in the year, the company relinquished all its concessionary interests in Libya. Finally, in the spring of 1982, the company decided to withdraw from its shale oil project in Colorado, in which it had already invested over $1 billion.

The company has also suffered heavy losses in its effort to mine uranium and other metals. In fact, it plans to shut down its uranium mining operations in the U.S. by the end of 1983. Exxon's mining losses are estimated at $383 million.

Exxon is also experiencing disappointing sales and revenues with its office systems products. The three major product lines—*Qwip* facsimile system *Qyx* electronic typewriter and *Vydec* word processing system—have been struggling in the marketplace and 1981 losses were placed at $105 milllion.

In an effort to strengthen the image of its office products, the company switched its advertising from McCaffrey & McCall to Marsteller Inc. and increased the advertising budget to $20 million.

Measured media support was estimated by LNA at $5.1 million, of which $3.4 million went to network tv, $1.5 million to magazines, $242,400 to network radio and $20,900 to spot tv. The 1981 ad expenditures on office systems products was not significantly different from the 1980 expenditures.

Another problem area for Exxon has been its subsidiary, Reliance Electric Corp. After purchasing the company for $1.2 billion, Exxon has found its alternating current synthesizer too expensive to be practical. In March, Reliance terminated further development work on the project. Sales from Reliance's other products earned Exxon only $31 million in 1981.

As the oil companies prepare for the first extended period of price competition since the oil embargos of the 1970s, Exxon is not prepared to be left behind. Even though it has not followed Atlantic Richfield Co.'s plan to discontinue credit cards, it has developed its own discount for cash campaign. Under the program, dealers are encouraged to offer a discount to motorists who pay cash for gasoline and diesel fuel.

Exxon had test marketed its discount for cash program in Phoenix; Worcester, Mass.; Jackson, Miss., and Norfolk, Va., where nearly 90% of all dealers chose to participate in the program. It was planned that by the end of August the program would be extended to all markets where Exxon has branded retail stations.

*(Loss)
**AA estimate

Ford Motor Co., Dearborn, Mich., the 11th largest national advertiser, spent an estimated $286 million in advertising in 1981, 2.4% over last year's $280 million.

Low vehicle sales in North America plunged Ford to its second year of $1 billion-plus losses, although the company earned $387 million outside North America. The Canadian loss was $252 million.

Worldwide dollar sales rose 3% to $38.2 billion on unit sales of 4.4 million, down 1% from 1980. Unit sales rose 2% outside the U.S. and Canada.

The 1981 losses still represented a minor improvement of some $483 million from 1980's loss. It was caused primarily by "the continuing lack of profitability in our North American automotive business," said chairman Philip Caldwell. Ford had to fight for market share in the depressed market that saw industry sales of 8.5 million cars, the lowest in six years. Trucks, always profitable, slumped to 2.3 million industry sales, the lowest in 10 years.

Ford's market share for cars slipped to 16.6% of the total U.S. market, down from 17.3% in 1980. Truck share was also off, down to 31.4% from 31.6%, although Ford maintained the truck sales lead in the U.S., for the fifth year, by some 41,000 units.

The subcompact Escort, built worldwide, was the best-selling nameplate in the world in 1981, and in the early part of the 1982 model year, Escort was the best-selling car in the U.S.

Those were the bright spots. Ford sold 2.1 million vehicles in the U.S., down 9% from 2.3 million in 1980.

Ford's measured ad spending increased to $264.2 million from $247.3 million in 1980. Broadcast tv took the biggest chunk, $113.9 million, but was down from last year's $125.7, as Ford spent increased amounts in newspapers, magazines and cable.

Shifts in Ford's media strategy were discussed by president Donald E. Petersen in a speech. "For over 30 years, network tv has dominated our thinking in this area. Over the next 30, this will very likely change," Mr. Petersen said.

Ford will likely shift to a "rifle" approach from a shotgun approach, turning to cable tv, videocassettes and disc, regional and special interest publications and local radio and tv.

In the fall of 1981, Ford ran some 400 spots on three cable networks as part of its over-all tv effort, consuming 62% of the 1982 launch budget.

Both car divisions showed decreases in measured ad spending, caused primarily by increased use of cable tv and heavier corporate outlays. Ford division spent an estimated $125.1 million, down from $147.7 million in 1980.

Lincoln-Mercury's spending fell to $55.5 million from $71.5 million. Network tv took the brunt of the decline while newspapers and magazines showed increases. L-M's spending followed the same pattern. Network tv fell to $27.9 million from $41 million, while spot tv dipped to $7.9 million from $8.7 million. Magazine spending rose to $14.5 million from $12.7 million in 1980. No monies were spent in spot radio, and net radio spending was cut to $334,700, down 82% from 1980's $1.8 million.

Product advertising was down but sales were even worse off. Ford division car sales fell to 1-million from 1980's depressed 1-million.

Only Granada showed a real increase over the previous year and that came at the expense of its sister Fairmont. Granada sales climbed to 106,996 from 88,371, while Fairmont sales slumped to 182,909 from 285,272.

Some of the slack was taken up by the Escort sales in its first full year of production. Escort sales totaled 284,907, making it the division leader. In its abbreviated 1980 life, Escort sales were 60,196.

Ford's two specialty market offerings, Thunderbird and Mustang, also ran into hard times. T-Bird sales plummeted 45% to 69,775 from 127,248, and Mustang's dropped to 154,985 from 225,290. The full-size Ford was surprisingly strong with sales of 113,109 down from 142,819.

Although truck sales declined over-all, there were areas of strength. The Econoline vans scored a gain to 108,658 units from 104,254 in 1980.

The Club Wagon, a passenger van, held almost even at 24,669 units from 24,783 the year before.

The mainstay, light-duty conventional trucks, still were the best sellers at 432,134, down from 475,998. Sales for four-wheel-drive Broncos continued to decline, down to 35,680 from 1980's 40,065, and heavy-duty trucks fell to 51,783 from 68,117.

Ford truck execs were pinning hopes of a comeback in trucks on the compact Ranger line, introduced early in 1982, and a downsized Bronco due out as an 1983 model.

Lincoln-Mercury division weathered the dismal auto sales slump pretty well. Sales actually showed a slight increase from depressed 1980 levels at 403,380 units, up from 400,587.

The luxury lineup of Lincolns just about held even. The full-size Lincoln sold 29,178 units down from 30,144, while Mark VI dipped to 29,733 from 35,371. Continental, smaller now, partially recovered some of the losses with sales of 4,919.

In the fall of 1980, Ford was looking to the future, hoping new models could help it take on the world. The Escort was the first of a new wave of internationally designed cars.

The Escort was intended to change the image of Ford to some degree and also to become its best-selling car. "The success of these two car lines is bigger and more important than just sales. It isn't just bringing out a Mustang or Capri to break a sales record," said Bennett Bidwell, then vp-car and truck group for North American Automotive Operations.

Other Ford car ads kept essentially the previous year's style. The sporty "Mmmmustang" kept prancing horses and young women happy under the head: "America's most popular sports car."

Thunderbird was "unforgettable" in the crooning words of the late Nat King Cole and his daughter Natalie.

Later in the fall, Ford began running a series of repair information ads to comply with orders from the Federal Trade Commission.

Under the aegis of Ford Parts and Service division, Ford ran five insertions in six national magazines with the headline: "Ford Motor Co. introduces the customer information system. It makes great aftermarket service even better."

Ford began what would turn out to be a long string of rebates and rebate substitutes when it followed hot on Chrysler's heels into interest rate ceilings. Ford set a 12% interest ceiling on loans as the prime rate floated around 18%.

Stepping into 1981, Ford put a

spotlight on the Escort when it fine-tuned the "world car" theme line to: "Escort—built in America to take on the world—and doing it."

The EXP, a two-seat sporty car based on the Escort platform, was introduced in April and Ford wanted to give it a good corporate and divisional send-off with the idea it was "another car from your world car company as opposed to another world car," said Philip Benton, vp-sales operations for North American Automotive Operations. "We want to keep that image of the company going but the car itself is a North American product."

The corporate theme for the EXP intro was "tomorrow is coming," which led to the divisional theme: "Tomorrow is here." Tomorrow included a bit of yesterday as Ford put the blue oval on the EXP, the first time the symbol had appeared on the outside of a Ford since 1938.

GM and Chrysler pushed Ford into more direct rebates in late February. The only cars exempted from the 10% rebates were the Escort and full-size car. Ford put $10 million behind this wave of rebates. During the summer, Ford switched to indirect rebates in the form of dealer incentives. When it came time to clear out the 1981 models in September, direct rebates were brought back.

Ford also cleared out old ads in September, keeping only a modicum of the "world car" theme for Escort and opening an umbrella theme over all its models: "Look out world, here comes Ford."

Magazine ads and tv commercials got a unified look as well. A silver background graced magazine ads for all the car lines and the cars appeared in profile, *a la* Lincoln-Mercury. The "Look out world" theme became tag music on all tv commercials. Most of the Ford tv time in the fall went to the small and/or sporty models.

The new Escort four-door was "A brand-new World Car," and the slow-selling EXP was a "brand new two-seat movin' to the upbeat." All the singing fit well with the three-week radio blitz that began in mid-September. Each model was given an appropriate voice and song, such as Natalie Cole (again) for Thunderbird and Tony Bennett for Granada.

But the grandest plans of men and marketing managers are fleeting and the early onset of rebates in October sapped strength from product advertising. Ford went after GM's special interest plan with a direct rebate and the ad line: "A better way to beat the high cost of financing." Ford's "up front money" ran from $700 on the EXP to $500 and $400 on various Escorts.

Ford tried to make more sense out of indirect rebates with the "Fordcare" program in January. The two-year, 24,000-mile warranty and maintenance plan coupled with a 5% rebate on the base price of Escorts followed direct rebates at Chrysler and a price cut threat from GM.

Corporate print ads for the program starred Harold Poling, executive vp of NAAO. The headline read: "We are offering more than quality. We are offering the closest thing to cost-free driving."

Ford division ads picked up the "cost-free driving" line and hired Telly Savalas for the commercials. The rebate part of the program was expanded to include virtually all Fords after GM announced extensive rebates in February.

One of the few vehicles that did not fall under the new rebate program—at least at first—was Ford's new compact pickup truck, the Ranger.

As sales continued to slump, Ford joined GM in asking suppliers, including ad agencies and the media, for a 2% giveback. The agencies grudgingly complied but the media gave Ford the same answer they gave GM: No.

In preparation for new models due in the fall and winter for the 1983 model year, Ford began shifting ad weight back to product advertising from rebate advertising.

In the fall of 1980, Lincoln-Mercury also decided people needed to see more pictures of the division's cars, so it put 75% of its largest-ever ad budget into tv. The L-M version of the Escort, the Lynx, was the star for fall and it got royal treatment.

Agency Young & Rubicam hired a "Star Wars" special effects expert, and English director and composer Vangelis ("Chariots of Fire" and "Blade Runner") to make the Lynx commercial on Los Angeles' largest sound stage.

The spots placed a live lynx in a stark landscape with the new Lynx. The "world car" theme was tied in with the line: "Starting today, the world belongs to an American car. Starting today the world belongs to Lynx," with a shot of the lynx perched atop a sphere which turns into a globe.

Other Mercury brand car lines were put into a unified print campaign which showed the cars in profile with artwork instead of photos. Two-word headlines were the rule, "Space travel" for the Zephyr station wagon and "Class cat" for Cougar.

L-M tried a different tack with its luxury cars in mid-winter. The big cars had been selling poorly despite an ad blitz in the fall so L-M decided to push luxury with price, a delicate task. The Lincoln Town Car got newspaper ads with the headline: "Perhaps the best item on this list of standard features is the bottom line." Mark VI designer series special packages were touted as "A modern art sale."

Other models also received price breaks as L-M carried all the rebate programs that Ford division did, model for model.

In the spring, L-M introduced the LN-7, a two-seater version of the Lynx that looked just like the Ford EXP except for a curved glass back window. "The LN-7 and the Lynx are a marketing man's dream," said Gordon MacKenzie, L-M general manager. "Everything came together. We wanted to hang onto our good ride and luxury image and still have fuel economy. We need more youth-oriented products. It takes a long time to change perceptions and the LN-7 is right along the line of what we are trying to do."

Fall introduction advertising for the division carried on that plan. A new model, the reshaped Continental, was touted in toney but sparse ads and commercials in the style of the original Lynx spots. "Research showed that these people [luxury car buyers] said they don't want to know all about the engine size," said Mr. Vanderzee. "All they want to know is if this car is the ultimate, the most up-to-date luxury car. They want a status symbol and getting the newest luxury car is their status symbol. They don't care about all those other words. That's why we've gone to very simple stuff."

The advertising style of the previous fall continued for other car lines as well. The new five-door Lynx had the print headline: "Missing Lynx." The LN-7 would "Handle with flair" and the Cougar wagon had "Class room." L-M also boosted cable advertising it had started in the spring to reach an upscale audience.

Ford corporate ad efforts also looked more toward improving the company's image, changing from the Escort oriented "incredible world of Ford" ads in fall, 1980, to the "Quality is Job 1" campaign a year later. "We in corporate are going to take the quality story, which is really essential to the image of the corporation. The two vehicle divisions will tell the story of the product," said Joseph A. Kordick, executive director of marketing for NAAO.

Ford essentially traded corporate campaigns with GM when it took up "Quality is Job 1." GM had been running a "people building transportation to serve people" campaign that used shop-room vignettes but dropped it in favor of a technology theme that looked to tomorrow's cars. Ford gave up on copy like: "If you could see tomorrow the way it looks to us today, you'd say incredible," and picked up shots of the shop for the "quality" theme.

In spring, 1982, Ford split corporate ad responsibilities between two agencies, taking some business away from Wells, Rich, Greene and giving it to Young & Rubicam.

Y&R officially took over corporate product advertising but that translated into responsibility for the "Quality" campaign. WRG kept working on a campaign with the theme: "There's a Ford in America's future," which ran weekly in newspapers and magazines and on tv.

The assignment shakeup was due to a rearrangement of duties at Ford. "While my group had been assigned to NAAO before being transferred back to marketing staff, we had the responsibility for corporate advertising there. With our reassignment back to marketing staff, it was decided the corporate efforts of the company should be directed to a new campaign [Ford future]. It was reasonable for NAAO to select one of its own agencies to handle its business and they picked Y&R," said John Bowers, director of advertising for the corporate marketing staff.

Mr. Bowers retired from his post on July 1. John McDougall, executive vp of Ford International Automotive Operations also retired in the summer of 1982. He was replaced by Robert Lutz, who had been president of Ford of Europe.

James A. Capolongo gave up his post as vp-truck operations to replace Mr. Lutz and Edson P. Williams became vp and general manager of the truck operations, leaving his post as president of Ford Asia-Pacific.

Earlier in the year, B.J. Coughlan became general marketing manager of L-M, from a regional sales post, replacing Joseph E. Cappy, who left to become the vp of AMC's marketing group.

Ford Parts & Service literally took a closer look at the auto aftermarket for a 1981 campaign. Ford Parts provided highly magnified looks into engine parts. The ads also targeted the Motorcraft brand to do-it-yourselfers.

Ford Tractor borrowed a page from the Escort world car ad campaign for its new Series 10 tractors. "Built to take on the world" was the recycled theme line. Ford Tractor tried to capitalize on the same blue logo that is on car, truck and tractors. But worldwide tractor sales still reflected economic hard times and fell to 89,300 units off 9% from 1980.

Ford Glass division geared up to supply auto manufacturers in Europe and Japan as well as Ford units. Rouge Steel Co. was formed from the Steel division as a wholly owned subsidiary.

Electrical and Electronics division came up with computer controlled electronic instrument panels for 1982 Continentals and was poised for further electronic marvels like cathode ray maps, talking cars and automatic day-night rear-view mirrors.

Earnings	1,652,000,000	1,514,000,000
Advertising	164,696,300	156,196,300

*AA estimate

General Electric Co., Fairfield, Conn, the 35th largest advertiser in the U.S., increased its domestic advertising spending by an estimated 5.4% in 1981 to $164.7 million.

Spending levels increased for spot tv, spot radio and outdoor advertising, but the most significant increase was for magazines, up by some 16% to $19.2 million. Reduction in spending levels occurred in newspapers, network tv and network radio advertising.

Earnings in 1981 rose by 9% to $1.65 billion. Revenues also increased 9% to $27.2 billion, making GE the 13th largest of the nation's nonfinancial companies. However, earnings for the first half of the new fiscal year were $842 million, an increase of 6% from $795 million for the same period a year ago. Sales in the first half of 1982 were $12.66 billion, down 3% from $13.04 billion for the 1981 period. A "highly polarized business environment" was cited as the cause.

GE underwent a major internal reorganization in 1981. John F. Welch Jr. became the new chairman in April, 1981, and began instituting changes in September. Commenting on the restructuring of GE in the company's annual report, Mr. Welch said, "the result will be an organization more high-spirited, more adaptable and more agile than companies a fraction of our size."

From the sector realignment, its first since the system was established in 1977, emerged the new technical systems, services and materials, power systems, industrial products and aircraft engine sector.

The consumer products sector, constituting $6.6 billion or 23% of total revenues, continued to be the most significant sector for large advertising outlays. Earnings, however, dropped by $20 million for the sector. The higher 1981 revenues were achieved essentially by flat volume, but the lower earnings reflected difficult economic conditions, the company said. This included a 35-year low in residential construction, and GE's commitment to maintain its level of investment in product and manufacturing technology. While GE increased its advertising budget, it reduced the number of products that received $1 million or more in spending. GE's most heavily advertised products last year were: Microwave ovens, which received $10 million in support; dishwashers, $4.5 million; home light bulbs, $3.3 million; ranges, $3.2 million; and refrigerator-freezers, $1.5 million. The company spent an additional $21.5 million on multiproduct advertising.

In addition, GE spent some $1.2 million to promote its General Electric Credit Corp. financial services and an additional $1.2 million to advertise its three am and five fm radio stations.

Spending on such products as its color televisions dropped from $2.6 million in 1980 to less than $1 million in 1981. Also, advertising for the GE Coffeemaker fell from $2.6 million in 1980 to slightly less than $1 million last year. GE's housewares segment reported increased sales primarily through products such as the GE-pioneered Light 'N Easy plastic frame iron.

Sales of television and video products were higher in 1981, although earnings declined due to increased costs and expenditures for future growth.

GE currently operates three VHF tv stations, three am and five fm radio stations and 13 cablevision systems. Its broadcasting and cablevision business had record sales and earnings with GE television stations providing substantial increases in news coverage, local programing and other community services

In May, GE asked the Federal Communications Commission to allocate a portion of the radio spectrum for new consumer-oriented mobile communications service. The system, which would be used in motor vehicles and have a range of up to 15 miles from home, would permit the caller to dial other telephone numbers directly, a feature not generally available now.

GE estimated that the price for equipment that would permit the user to call within a range of less than five miles from home would be approximately $400. Customers would have the option of subscribing to a repeater station that would extend the range to 15 miles.

Major appliance sales were slightly ahead of 1980, as a result of a number of new product introductions. Among these were GE's Model 2500 electronic dishwasher. Over-all, GE's dishwashers received approximately $4.4 million in advertising support.

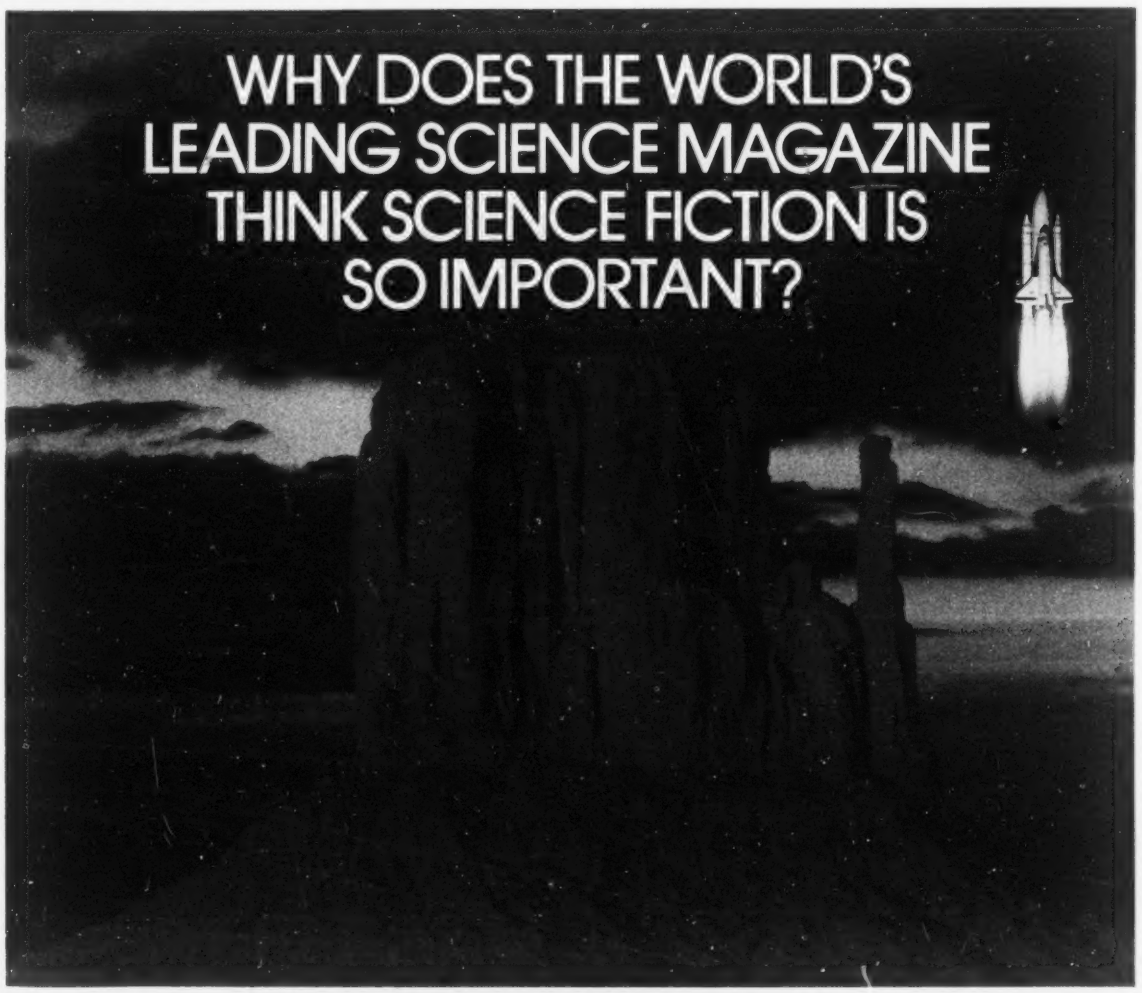
Lighting products also added to the company's higher sales and earnings. Advertising for home light bulbs totaled some $3.2 million.

Energy-efficient Watt-Miser fluorescents and Lucalox high-intensity discharge lamps were credited with aiding the segment's higher results.

New from GE is its Optimiser fluorescent lighting system, which, according to the company, uses 34% less energy than standard fluorescents.

The company's Halarc light bulb, which began home testing in 1979 and was introduced nationally in 1981, has not met GE's expectations. The reason has been partially attributed to its $10 price tag. With increased consumer education and rising energy costs, GE hopes to spark renewed interest in the product. The Halarc lamp is said to use one-third as much electricity and last much longer than conventional bulbs.

The earnings for its air conditioning products were substan-



BECAUSE OF
MEN LIKE CYRANO DE BERGERAC.

"I MIGHT CONSTRUCT A ROCKET, IN THE FORM OF A HUGE LOCUST, DRIVEN BY IMPULSES OF VILLAINOUS SALT PETRE FROM THE REAR, UPWARDS BY LEAPS AND BOUNDS . . ."
—CYRANO DE BERGERAC, 1640

OMNI Magazine recognizes that science is not just the province of scientists, but of all thinking men and women. That's why a man like Cyrano de Bergerac, who was not a scientist but a renowned swordsman and scholar, could envision the rocket over three centuries before Man made his initial venture into the frontiers of space. He was a man of vision and imagination, the most basic elements of science. In his day, they called his work wild speculation, fiction. Today, we would call it prophetic.

Which is why OMNI feels that science fiction is as much a part of science as are laboratories and textbooks . . . and why every month, more than 5.4 million OMNI readers (MRI 1982) have come to see the full scope of today's science—and tomorrow's. Join us on the New Frontier. OMNI Magazine. It will change the face of science journalism forever.

OMNI
THE ORIGINAL

tially improved and sales increased because of the continuing strength of the domestic replacement market and strong export sales which offset the depressed residential construction market. GE began shipments of its electronically-controlled two-speed Weathertron heat pump in 1981.

The new technical systems sector reported revenues of $3.9 billion, an increase of 22% over 1980. Net earnings declined to $98 million from $105 million in 1980. Lower earnings, as in previous years, were attributed to product development and acquisition costs.

With plans to enter and acquire leadership in the emerging factory-automation market, GE acquired Calma Co., and Intersil Inc. in 1981. Calma is involved in computer-aided design and manufacturing (CAD/CAC) and Intersil, a manufacturer of integrated circuits, is expected to help GE capture as much as 20% of the estimated $500 million robot market by 1986, according to the company.

In a licensing agreement with DEA of Italy, Hitachi Ltd. of Japan and more recently with Volkswagenwerk A.G. of West Germany, GE has thrust itself into robot technology. The company currently has some 200 robots in operation, performing tasks from assembly to unloading plastic parts. To further the development of this technology, the Optomation II Instrument System will be giving electronic "sight" to robots and other devices.

Aerospace sales and earnings, as well as those of medical systems, were well ahead of 1980.

In 1981, GE introduced its new CT9800 scanner and also the digital Fluorican 3000 X-ray system. Both products will now enable many patients to avoid exploratory surgery.

In the newly reorganized industrial products sector, revenues and earnings improved despite depressed U.S. residential and industrial construction. Revenues totaled $4.8 billion or 17% of total GE revenues. Earnings increased from $225 million in 1980 to $242 million last year.

With improving U.S. railroad business, due to deregulation, mergers and increased fuel efficiency, GE anticipates a growth in its locomotive business, both diesel-electric and electric, and other transit vehicles. In 1981, GE expanded production at its locomotive facilities in Erie, Pa.

In 1980, GE negotiated the largest contract for locomotives in the company's history. The contract with National Railways of Mexico calls for delivery of 60 to 100 locomotives or their component sets each year through 1990.

General Electric Supply Co. (GESCO) provided improved distribution services during 1981 with the installation of a real-time order entry system, capable of searching all of its inventory stocking locations for products needed by its customers.

The natural resources sector reported that revenues and earnings were substantially greater than in any previous year. The increases were primarily attributed to its affiliate, Utah International, a leading supplier of natural resources worldwide.

About 77% of 1981 revenues, totaling $1.7 billion, came from outside the U.S. and of its net earnings of $284 million, 52% came from abroad.

Lower sales and earnings in 1981 from copper were tied to the depressed worldwide price for the mineral.

The new services and materials sector, including the General Electric Credit Corp. (GECC), reported revenues of $2.5 billion for 1981 with net income of $38.2 million.

GECC, GE's consumer, commercial and industrial finance affiliate, under the Economic Tax Recovery Act of 1981 took part in tax-leasing transactions. The cost of the leased equipment was $1.9 billion, profits from which will accrue over a period of several years.

GECC ranks as the largest U.S. diversified financial company. It is the largest nonmanufacturing company in equipment financing and leasing. It handles leasing activities ranging from computers to supertankers.

The international sector reported $10.1 billion in revenues from outside the U.S., with net earnings of $57 million. Revenues from international sources totaled 37% of all GE's revenues and 35% of its net earnings. This represented a decline of 1% and 7%, respectively, over 1980.

GE's international business is made up of four broad categories—foreign multi-industry operations; U.S. exports of GE products and services; operations of nondiversified foreign affiliates, including the foreign operations of Utah International, and technology licensing revenues.

The aircraft engine sector provided GE with $2.9 billion in revenues and $149 million in earnings during 1981. Revenues and earnings were higher due to increased volume of military aircraft engines as commercial shipments decreased.

The restructured power system sector generated $5.9 billion, or 21% of GE's total revenues. Earnings totaled $224 million, an increase of $23 million over 1980. The higher earnings were attributed to modest revenue growth and higher productivity. Sales and earnings were well above 1980 for steam turbine generators and equipment and construction and engineering services. More modest profits resulted from GE's power-delivery and transformer businesses and also from the nuclear power business.

GE's backlog for all types of nuclear products was $3.6 billion at the end of 1981 compared with $5.5 billion in 1980, primarily due to projects scratched from production. The future of the domestic nuclear steam supply systems market is uncertain.

ALMOST EVERYTHING COMES TO SAN DIEGO FROM LOS ANGELES. EXCEPT OUR NEWSPAPER.

THE BIGGEST PLUS IN SOUTHERN CALIFORNIA.

You've always suspected that Southern California is a little, well, different than most of the country. And you're right.

It's not the Los Angeles ADI which pulls all the consumers of Southern California together to form the number one market, but the sheer enormity of L.A.'s more or less isolated distribution system.

In short, if you want your advertising to go where your product goes, you need a basic L.A. newspaper buy—plus at least the next largest city.

That big plus is San Diego: second largest city in all 11 western states. A metropolitan area that's home to nearly 2 million consumers with almost 16 billion dollars to spend on your product—if only you tell them about it in the San Diego Union and The Tribune. The newspaper with more than seven times the penetration of any paper that happens to trickle down over a hundred miles from L.A.

For more information, write or call Dick Applegate, National Advertising Manager, Union/Tribune Publishing Co., P.O. Box 191, San Diego, California 92112. (714) 299-3131. Or contact our national representatives at Sawyer-Ferguson-Walker.

General Foods Corp.

	1981	1980
Sales*	$6,351,100,000	$6,601,300,000
Earnings*	200,207,000	255,366,000
Advertising**	456,800,000	410,000,000

*Fiscal years ended April 3, 1982, and March 28, 1981.
**AA estimate

General Foods Corp., White Plains, N.Y., the third largest national advertiser, raised its advertising 11.4% to an estimated $456.8 million in 1981, reflecting an expansion of the company's base, primarily through the acquisition of Oscar Mayer & Co. and the introduction of a few heavily backed products.

Worldwide, GF spent $486.3 million, a 10.7% increase, due mainly to the expansion of its coffee business with Maxwell House Master Blend increased-up-yield coffee. GF's worldwide sales increased 26.5% to $8.35 billion, Oscar Mayer sales accounting for most of the increase with the balance coming from volume gains in GF's established businesses.

But worldwide earnings dropped 21.5% to $200.2 million after GF wrote off $1.20 per share because it decided to sell all its U.S. restaurant operations and restructure or sell certain overseas businesses.

For the first quarter of fiscal 1983 ended July 3, GF reported sales of $2.06 billion, virtually the same as a year ago. Earnings rose 25% to $61.5 million.

Analysts believe there is a bright future for GF's packaged convenience food lines. And they emphasize that new president-chief operating officer Philip Smith's initiatives to keep marketing money for only the best new product ideas and to trim the company's research department will boost earnings in the future.

GF has staked over $20 million in marketing funds on Jell-O Pudding Pops, a frozen dessert on a stick that rolled nationally this spring. If the frozen novelty catches on, it will be the company's first successful big new product in years. But GF officials say future development efforts will move toward the creation of whole new businesses, rather than single products. As Mr. Smith said following the Oscar Mayer merger, "We would never have tried to develop a better hot dog. We're better off going out to buy a hot dog and luncheon meat company."

During fiscal 1982, GF's three product segments, excluding the processed meat category gained in the Oscar Mayer buy, showed an average 12.7% gain in sales.

The package convenience foods segment, generating 39.8% of GF's total sales, advanced its sales 8.7% to $3.3 billion on U.S. volume gains and higher selling prices. Package convenience foods were the only GF segment to post an earnings gain. GF credited the increased earnings to improved margins and volume increases on several products.

Grocery coffee held large shares—34% of the regular coffee market and 46.5% of the instant market—of the $4.2 billion U.S. market and accounted for 30.4% of corporate sales. Coffee sales, however, dropped 6.2% on lower selling prices to $2.5 billion after a 9% jump from fiscal 1980 to 1981. Fiscal 1982 earnings of the coffee segment dropped on lower margins from declining coffee prices and increased marketing expenditures. The marketing money went mainly to push the Master Blend brand.

Foodservice and other, a category that supplies industrial and processed meat products and coffee to all kinds of foodserving organizations, had the biggest sales jump of the three, moving up 35% to $1.1 billion primarily because of the inclusion of Oscar Mayer foodservice. The segment, which will work in foodservice and industrial products only after GF completes its planned divestiture of its restaurant businesses, accounted for 13.3% of GF's corporate sales. Foodservice held a little over 5% of that $20 billion market.

Earnings in the foodservice segment declined because of low earnings on industrial products like coconut, which faced what GF called "intensive competitive pricing pressures."

Processed meat sales, at $1.3 billion in fiscal 1982, accounted for 16.2% of GF's corporate sales. Although the segment did not exist within GF last year, sales did rise when compared to the same period for Oscar Mayer the year before.

Of its $367.5 million in measured media spending, General Foods spent more than $21 million on its Maxwell House coffees. More than $18 million went to the new Master Blend, which garnered a 5% share of the regular coffee market and is currently running above that, according to an April report by John C. Maxwell Jr. of Lehman Bros. Kuhn Loeb.

GF increased its share in both regular and instant coffees, with Maxwell House in 1981 grabbing a 20.2% share of the regular coffee market that trailed only Procter & Gamble's Folger's at 24%. GF's Maxwell House and Sanka brands led the instant coffee market with 22.3% and 11.1% shares, respectively. Sanka got $17.3 million in measured media spending, $11.4 million of that going to network tv, according to Leading National Advertisers.

GF backed its Post Grape-Nuts cereal with over $12.6 million in measured media spending, of which $9.5 million went to network tv. Grape-Nuts in 1981 had the second-largest market share—2.6%, up from 2.4% in 1980—of all the company's cereals. It trailed Post Raisin Bran's 3.2% share, although Raisin Bran's share was down half a percentage point from 1980. Raisin Bran got $9.8 million in measured media support, nearly $9 million of which went to network tv. GF's cereals together held 15% of the $3 billion cold cereal market in 1981, the same share it had in 1980.

Stove Top stuffing mix received $11.7 million in measured media support, $8.9 million going to network tv.

Of its nine pet food brands, GF gave the most measured media support to Gravy Train with more than $11.5 million. Gravy Train responded well, moving its share of the dry dog food category up to 6% in 1981 from 4.7% in 1980.

GF backed Gainesburgers with nearly $10.8 million in measured media support, and the product continued its lead of the semimoist dog food category with a 25.9% share, up from 24.1% in 1980 although retail sales dropped 2.7%. The sales drop for Gainesburgers, however, survived the deeper slide of the entire semimoist category, which fell off 9.6%.

GF pet foods held an 8.8% share of the $4.37 billion market, down one-tenth of a percentage point from 1980. But in March the company cut its advertising and promotional budget for pet foods from $40 million to $23 million and dropped one of three ad agencies handling the division's products. Reports circulated all year that the pet foods operation was for sale, but GF repeatedly denied them. The ad budget cut was part of a plan for the division to focus on profits instead of volume, GF officials said.

Tang instant breakfast drink got $11.3 million in measured media support, and GF reported that product improvements and repositioning turned around the beverage mix's sales.

GF also backed Kool-Aid heavily, giving Kool-Aid unsweetened drink mix $11.3 million and Kool-Aid presweetened $10.8 million in measured media support. Kool-Aid volumes and earnings reached record levels, GF reported.

General Foods International instant coffees got $10 million in measured media support, and the company said the International coffees' volume "increased markedly."

Of the company's over $367 million in total measured media spending, 64.8%—more than $238 million—went to network tv. Spot tv got $84 million; magazines, $37.2 million; network radio, $5.6 million; newspaper supplements, $2.4 million, and outdoor, $12,000.

GF was testing several new products in early 1982, among them a dairy formula for Cool Whip and several sugar-free beverage products made with G.D. Searle & Co.'s recently approved NutraSweet artificial sweetener. Also in test markets were a Cafe Amaretto flavor for International coffee; Strawberry Honeycomb, Honey Nut Crunch, Raisin Bran and Wishing Stars cereals, and Jell-O Gelatin Pops, a frozen whipped-gelatin dessert on a stick designed to follow Pudding Pops.

The company said it will be more selective about its development projects in the future. "By focusing sharply on the best ideas, assigning good people to them and giving them the required financial support, we believe we will improve our chances for success," GF said in its fiscal 1982 annual report.

As if to demonstrate, GF early this year stopped test marketing on Lean Strips textured protein strips, a product it gave almost $2.3 million in measured media support in 1981. "The additional investment necessary would not have been prudent," the company reported.

General Mills, the nation's 19th largest national advertiser, boosted ad spending for calendar 1981 some 21% to $207.3 million, up from $171.1 million in 1980.

The company finished fiscal 1982 with earnings of $225.5 million, up from $196.6 million in 1981, on sales of $5.31 billion, up from $4.85 billion.

The company's results reflected the disposition of several companies, including GoodMark Foods (and its Slim Jim brand), the Lord Jeff Knitting Co. men's apparel line, and Regal Toys, a division of the Canadian toy operations and two pending sales—Bowers & Ruddy rare coins and Harris Stamp Co. General Mills this summer announced its intention to sell or license the technology and research facility of its Kitchen Harvest hydroponics unit. The company said early test marketing indicated consumer interest but that other areas of new product development promise better returns.

General Mills celebrated the Federal Trade Commission decision in November to scrap the 10-year-old shared monopoly cereal case aimed at breaking up the big three cereal companies.

Big G cereals grabbed an estimated 23% of the ready-to-eat cereal market during the past year, led by Cheerios—the second-largest selling cereal in the country with a 5.9% dollar share of the market, up from about 5.3% last year. The brand was backed by an approximate $9.7 million in advertising in 1981, a 19.5% increase from 1980, and a new "You made Cheerios No. 1" campaign theme. Honey Nut Cheerios' market share grew to 2.3% of the cereal market with no significant change in the $4.8 million ad budget.

The company began 1981 by moving the $5.5 million Wheaties account to NH&S/USA, Chicago, after a lengthy stint at Dancer Fitzgerald Sample, New York. Ad spending for the brand was increased a whopping 81%, to $4.1 million, during 1981, as NH&S' new "Eaties for Wheaties" campaign broke in late summer. The heavy spending failed to affect the brand's performance, however; Wheaties maintained the estimated 2% dollar share of the cereal market it held last year.

Likewise, General Mills hiked ad spending for Buc*Wheats cereal to about $5.4 million, from only $605,400 in 1980, but the brand retained its earlier 0.5% market share.

Donutz powdered sugar cereal, rolled out last spring, captured about 0.5% of the cereal market, supported by an introductory budget of approximately $2 million. This summer, General Mills introduced chocolate flavor Donutz nationally with network tv, Sunday inserts and couponing.

Spending for Crispy Wheats 'n Raisins, introduced in 1980 with an $8.6 million budget, dropped to about $7 million last year while its dollar market share increased to 1.4% from 1.3%. Body Buddies, still nationally marketed, received virtually no advertising support, after getting more than $6 million last year. The company said sales volume does not warrant advertising expenditures.

General Mills got a major challenge to its control of the granola snack market with Quaker's introduction of Chewy granola bars in East and West Coast markets. But the company kept its firm lead in the category, after Quaker was forced to pull out of eastern markets because of supply problems. Meanwhile, General Mills spent about $10 million to promote the Nature Valley line, extended during the past year with the rollouts of Light & Crunchy granola snacks and Granola & Fruit Bars, and Granola Crisp, a three-item line of light bars, testing in Portland, Ore., and other markets.

Also being marketed at foodservice outlets are Nature Valley Snacks, portion-controlled packages of trail mix, granola mix, Fruit 'n Nut mix and individually wrapped granola bars.

The Gorton frozen seafood unit received $1.4 million in ad spending during the year, up some 65%, although the line's market share dropped about 1% to 20%.

Yoplait yogurt increased its market share in the $525 million yogurt category to about 16%, up 3% over last year, as the brand completed national rollout. The brand's No. 2 position in the category behind Dannon spurred General Mills to enter a six-item line of Yoplait Custard Style yogurt in West Coast markets last fall. The new line was rolled into additional markets this spring. Yoplait ad spending increased 48% to $4.3 million during 1981.

Betty Crocker dessert mixes held on to about 32% of the $756 million category, down from a share of 36% last year, as Duncan Hines had the lead with 35% of the market.

Big Batch cookie mixes, floundering in the wake of a Duncan Hines entry late last year, were virtually ignored in advertising, as measured spending dropped 97% to less than $10,000.

SuperMoist cake mix, with a 26% share of the layer cake market, was backed with a $3.6 million drive, up from $3.0 million in 1980, while spending for Creamy Deluxe frostings jumped 31% to $3.2 million. Last fall, the company beat its competition to the national market with a chocolate chip cake mix, and its ready-to-spread chocolate chip frosting was the first on the market.

Spending for Snackin' Cake mixes dropped to about $600,000 from $1.6 million last year, and Stir 'n Frost cake mixes received only $722,000, a 68% decline in spending. But the company backed the introduction of Stir 'n Streusel cake mix with about $504,000.

The Bisquick baking mix line, with about $100 million in sales, got a 56% hike in spending—to $2.3 million—for the buttermilk item.

Other Betty Crocker items with spending increases during the year were muffin mixes, up 70% and brownie mixes, up 117%, though both still received less than $400,000. Wild blueberry, tart cherry and apple cinnamon muffin mixes were promoted during the year with on-pack cardboard doll tie-ins with American Greetings' Strawberryland characters.

The company last summer introduced Supreme Golden brownie mix with brown sugar, chocolate chips and pudding, backed by advertising in women's magazines.

Betty Crocker packaged potato dishes received only $2.9 million in ad spending during the year, compared to $4.5 million the year before, but the company introduced nationally a new flavor—hickory smoked cheese potatoes—and entered two other side dish mixes—four varieties of International Noodles and three flavors of Saucy Oven Rice—into Marion, Ind., tests this spring under the Betty Crocker label. Also in test in Marion are four styles of Cookbook Chicken.

Chef Saluto frozen pizza, ranking fourth in the category behind Totino's, Jeno's and Celeste, received about 65% more advertising during 1981, up to $2.1 million. The brand, marketed nationally, had decreased volume, although it had a slight share increase over the year.

The restaurant group, ranking fifth in total sales among the nation's restaurant chains, showed increased profits and sales during fiscal 1982, with earnings of $79.2 million and sales of $839.4 million, but 1982 results were affected by a severe winter, particularly in the Midwest, which hurt the over-all restaurant category. Continued expansion of the restaurant group made it one of the two major cash users (along with specialty retailing) at General Mills during the year; the company added 61 restaurant units during the fiscal year.

Red Lobster Inns, General Mills' largest chain with 328 units, is considered the leading dinner house chain in the country. Joe Lee, exec vp for the restaurant group, said the company had embarked on a strategy to reposition Red Lobster "before it got sick." New menu items, including foods such as shrimp in lighter oriental breading and more steamed and broiler items, have been added, and the units have been redesigned. The chain is growing at about 30 units a year, mostly in existing markets, according to Mr. Lee. The company continued its successful campaign, "For the seafood lover in you," and hiked calendar 1981 ad spending 43%, to $24.6 million. The company is working with Jusco Ltd., a Japanese retailer, in a Red Lobster joint venture in Japan.

The 139 York Steak House units are being repositioned with a new ad campaign, "Good steak and a whole lot more," an expanded menu, including nonbeef items, and new interior designs. Ad spending during calendar 1981 jumped 69% to $2.6 million for York.

The company added eight new Casa Gallardo Mexican restaurants to the existing two during fiscal 1981, and expanded the chain with two additional units in 1982. Mr. Lee considers the chain "properly positioned in this fastest growing segment" of the restaurant industry, and plans further expansion in large urban areas in the central and southern U.S.

Darryl's, with a total of 18 units, is positioned as an atmosphere specialty concept, and is being expanded from its Carolinas base through the Sunbelt. The Good Earth chain, with 11 company-owned and 14 franchised units, is being expanded with company-owned units, including test units on the East Coast. The company is intent on refining the concept of the chain, which will involve, in part, new store designs.

General Mills' toy group moved into a new category earlier this year when its Parker Bros. unit introduced a videogame "The Empire Strikes Back" and "Frogger," at the American Toy Fair in New York. Parker Bros. also introduced an electronic accessory to Monopoly. The company's heavy use of licensed characters such as Strawberry Shortcake, and "Star Wars" and "Empire Strikes Back" movies—particularly in its Kenner Products unit—gave the group a record $79.2 million in profits during fiscal 1981, though economic conditions inhibited growth in electronic games and toys. Company chairman H. Brewster Atwater said General Mills experienced the falloff in hand-held electronics "with a minimal amount of pain" because of its small selection of such offerings.

Ad spending for Parker Bros. declined 15% to $13.2 million in calendar 1981, with almost no spending for the electronic games. Kenner Products, however, received a 26% hike in spending, to $22.5 million. During calendar 1982, Kenner is expected to spend $10 million on "Star Wars" toys advertising alone, including a fall effort pegged to the third "Star Wars" sequel, "Revenge of the Jedi." Kenner and General Mills' Fundimensions unit also will be using the popular "Raiders of the Lost Ark" movie as themes for new toys.

Dancer Fitzgerald Sample took on additional assignments for the worldwide and domestic toy business. DFS, New York, added the $12 million MAD division account, Parker Bros.' $2 million Canadian account formerly at Vickers & Benson, Toronto, and the $1.5 million Fundimensions account, previously at W.B. Doner & Co., while the London office split the $10 million European toy account with Foote, Cone & Belding.

The fashion group made headway into improved profitability with a 16.2% increase in earnings, to $101.7 million on sales of $657.3 million. After years of struggling, the Ship 'n Shore unit returned to profitability, though the David Crystal and Izod/LaCoste apparel lines had lower results than last year. Foot-Joy experienced increased earnings, while the Monet jewelry line earned about the same as in 1981.

The specialty retailing group, acknowledged by Mr. Atwater as "our weakest segment—the place we're really struggling," finished fiscal 1982 with less than half the earnings—$5.5 million—of 1981, despite sales growth of 19.6%. But earlier this year, General Mills divested two of the more unprofitable segments: The coin and stamp collectibles operations.

Some analysts expect Wallpapers to Go, "the worst segment of specialty retailing," according to Mr. Atwater, to be divested in the near future, although Mr. Atwater in February defended the operation, saying its poor performance is related to the sagging housing industry, and that the company is experimenting with "an array of ways to build wallpaper use in existing houses." The company's patience "is nothing infinite," he said, but General Mills "is willing to let it evolve for a while." Ad spending for Wallpapers to Go for calendar 1981 jumped 62% to $2.5 million.

Eddie Bauer and The Talbots, the group's two major profit centers, had increased earnings. LeeWards spent $1.1 million in advertising during calendar 1981, compared with only $300,000 the year before.

Among the major personnel changes at the company was the naming of Mr. Atwater as chairman in addition to his previous post of chief executive officer, succeeding E. Robert Kinney, who retired in January. David Mauer was named to the new post of exec vp-marketing and marketing services for Kenner Products; John Waters was named vp-marketing for the restaurant group, a new title.

Harold H. Nitch was named media services director succeeding Robert Bodeau, who left the company, and Lon Bencini was named manager of broadcast media succeeding Mr. Nitch; Chuck Weil succeeded Fletcher Waller Jr. as vp-marketing services division-domestic consumer foods.

General Motors, Detroit, the fifth largest national advertiser, increased 1981 ad expenditures 4.3% to $401 million in 1981 from a revised figure of $316 million in 1980. GM managed a slim profit in a "difficult and disappointing year."

GM's 1981 profit of $334.4 million represented a turnaround from 1980's loss of $762.5 million. It was achieved largely through General Motors Acceptance Corp., its financial arm, and not automotive sales. GMAC posted a record profit of $365 million, up from the previous record of $231 million in 1980.

Worldwide dollar sales were $62.7 billion or 9% higher than 1980. Unit sales dipped 5% to 6.7 million units or 20% of the market compared with 21% in 1980. U.S. sales fell 8% to 4.6 million vehicles, including 3.8 million cars (down 8%) and 847,000 trucks (down 10%). Market penetration fell 1% for cars to 45% and remained at 37% for trucks.

"High interest rates, a deteriorating economy and a relentless increase in labor rates and material costs prevented 1981 from being a year of real recovery for GM," said chairman Roger R. Smith.

GM "dominated" the list of best-selling cars in the U.S., the company said. Chevrolet Chevette headed the list in 1981 followed by the Chevy Citation. Also on the list were the Oldsmobile Cutlass Supreme, Chevrolet Malibu, Chevrolet Impala/Caprice, Buick Regal and Skylark.

Mr. Smith—who once said everyone is an ad expert, or thinks he is—presided over an active year of GM corporate advertising. It included rebates, interest rate ceilings, a sweepstakes that fell flat, and an aborted "pass through" of labor-rate savings to consumers. GM also took on Japanese imports in ads claiming better accident statistics.

GM used GMAC to dip a tentative toe into incentives in early 1981 with a "how to beat the prime rate" campaign. It didn't offer any special deals, however. But rebates were in the wind even as president F. James McDonald predicted the new J-cars "will enhance and excite the spring market." The Js failed to excite any market and by March, 1981, rebates of $500 to $700 on high-inventory models were in place. "Let's get America rolling" applied to GM as well.

GM extended the rebates while trimming some models from coverage and GM dealers kicked in a portion of the rebate—a practice that was to cause problems. GM announced a price increase as its second round of rebates ended and saw sales promptly nose-dive.

GMAC was the vehicle for GM's next lure—a 13.8% cap on interest rates. GMAC launched its "largest single-month" ad campaign in its history as "good news for car buyers." This one worked as GM posted its best 10-day sales period in five months during August.

The rebate fever even spread to GM's real estate activities. It was trying to peddle some 100 houses it acquired from transferred executives. "Buy a house—get a car," was the headline for a program that tossed in a 1982 model as a house-buying inducement.

GM followed a Chrysler Corp. price-holding action with a revival of the 13.8% auto rate but spurned rebates as such.

In November, GM apparently decided to stop throwing good ad money after bad car sales and cut fourth-quarter ad budgets by an estimated $7 million. GM wanted to save up for the introduction in early 1982 of its new front-wheel-drive intermediate-size models and redesigned Camaro-Firebirds. An ill-fated sweepstakes broke in December for the new models. It was called the biggest dealer showroom traffic effort in GM history and cost $4.5 million including the prizes.

GM had other marketing ploys up its sleeve including union negotiations. GM and the United Auto Workers agreed to pass through concessions in the form of price rollbacks. The deal unraveled even as GM buyers sat tight to find out what the new prices would be.

So it was back to rebates as GM called for a 2% "giveback" from its suppliers—including ad agencies. GM also unilaterally introduced "givebacks" for its staff workers. The result was rebates of $500 to $2,000, some of them on cars that had yet to be introduced. "Let's get moving" was the theme.

GM's 2% solution was expanded to include the media. While GM's agencies, led by Campbell-Ewald, were complying, the media turned a generally cold shoulder to the proposal. Some noted that they didn't succor Chrysler at its lowest ebb and GM certainly wasn't in that position.

GM's corporate agencies, D'Arcy-MacManus & Masius and N W Ayer had a shoot-out on a new GM campaign with Ayer winning for "We're the best GM ever." It didn't affect their basic assignments; D'Arcy does product corporate and Ayer public relations corporate, but it was a $15 million plum for Ayer.

Chevrolet sales took tumbles in both car and truck and market share nose-dived. In the face of the downturn, ad outlays stayed about even with the preceding year.

Total car sales fell to 1 million from 1.7 million; trucks were down to 675,628 from 756,491 and over-all, Chevrolet's sales were off almost 400,000 units to 2.1 million from 2.5 million.

Chevrolet did not have a car or truck line in which 1981 sales were higher than 1980. Chevette was the car leader with 346,307, down from 373,988 with the Citation X-body next at 300,184, down from 374,706. The full-size Chevrolet fell to 210,424 from 261,819. Cavalier and predecessor Monza plunged to 88,072 from 150,320 and Camaro, in its last year before a redesign, tumbled to 94,606 from 116,824. Monte Carlo held about even at 161,158 compared with 165,638.

Market share slipped to 16.9% from 19.5%. Ad outlays of $127.5 million nearly matched those of 1980 when they were $128 million.

Newspapers, magazines and network tv were the big winners while spot radio fell and spot tv held about even.

Chevrolet entered the 1981 model year with the ad theme: "Chevy's up ahead." That was a statement of fact for the No. 1 car division in the U.S., but it was also something of a devout hope following a poor 1980 model year.

Chevy concentrated on its "new" models for 1981, a reskinned Malibu and Monte Carlo and the Citation X-11. The X-11 took over the performance spot from Camaro, and ad copy read: "Grab a hold of the wheel. Feel how it works. It gives you goosebumps." Camaro advertising placed the sporty car in an economy mode. "People think they have to sacrifice fuel economy to drive a Camaro and it isn't true," said Carl Uren, director of advertising.

Trucks got an economy push as Chevy formed a group of "special economy trucks" (SET). The campaign was aimed at the personal-use trucker rather than commercial users. "The commercial business is holding up but the solid, discretionary buyers are on the shelf," said H.J. (Pete) Cordes. So truck ad headlines read: "More kinds of trucks than anyone else rated at 20mpg or better" and "Best mileage story of any full-size pickup."

Limited distribution also affected initial sales of the Chevy Cavalier, a version of the J-car, but not the amount of advertising. The Cavalier was "the complete car," and ads listed features "from A to Z."

In the summer, Chevy reorganized the top echelon of executives. Thomas A. Staudt was rehired away from his post as vp-marketing group for American Motors Corp. to become general marketing manager of Chevrolet. The marketing position was given more weight than it previously had, reflected by the fact that Mr. Staudt reported directly to Mr. Lund, corporate vp of sales and marketing rather than to the general sales manager, Robert E. Cook. Mr. Cook retained the sales position.

Chevrolet did not introduce many new models in the fall for the 1982 model year. The Cavalier was "reintroduced" with a second phase of advertising that emphasized technology while the mid-size models were grouped together in an ad as "Chevrolet's classics." The Citation intro was slated for later in the fall.

Over all this, Chevrolet popped its umbrella in a campaign that said: "Chevy makes good things happen," an attempt to create brand identity. "We're looking at this theme to be a long-term element in our ads. On top of that carrier wave we're going to lay the signals for various car product lines," said Russell Chick, manager of car ads.

The second wave of car introductions broke in November with the Citation and the Chevette getting most of the attention. Citation had four different tv spots, all done in a comic book style, featuring such characters as "Perfect Couple" and "Working Woman." The Chevette commercial showed two priests discussing its economy.

Both spots were aimed at the 25-to-34-year-old age group that includes a high number of entry-level buyers.

In the first part of 1982, Chevy brought out its versions of two new GM models, the Celebrity, a front-wheel-drive mid-size sedan, and the new Camaro, a downsized sporty model. The Celebrity was "The bright new shape of Chevrolet" in advertising. The newly shaped Camaro represented something of a return to performance for Chevrolet. Commercials for the Camaro featured the Z28 performance model with the theme line: "The only thing that can keep pace with it is its shadow."

One of the division's most optimistic image-builders, Mr. Lund, was replaced as general manager of Chevy in early February by Robert Stempel, who had been vp for European-sourced cars and managing director of Adam Opel in Germany. Mr. Lund was bumped upstairs to become vp in charge of corporate sales and marketing staff, replacing Robert Burger, who became the heir apparent to the general manager post at Cadillac.

Mr. Stempel, a former general manager at Pontiac, soon set about pruning and shaping Chevy to his liking.

Some of Mr. Stempel's European experience came in handy when GM began exporting U.S.-built models overseas, including a special version of the Camaro.

Pontiac, like Chevrolet, suffered erosions both in unit sales and market share but increased ad expenditures significantly.

Sales fell to 552,396 units from 614,897 and market share declined to 6.47% from 6.85%. Ad expenditures bounced up to $45.1 million from $32.2 million.

Only the Grand Prix intermediate specialty car showed an increase, to 128,236 from 118,414. The full-size Pontiac was next at 82,620, down from 105,398, but it was to be dumped as an '82 model. The Bonneville G, a fancier LeMans, replaced it and total sales for the Marque were 73,988 down from 77,911. Pontiac's low-price leader, the Sunbird, was dropped and the combined efforts of the T-1000, a Chevette in thin disguise, and the new J-2000 fell short of Sunbird 1980 sales. Firebird, a car whose flame was burning low pending a new design, managed 52,188 sales against 81,592 the year before.

Just about all the increase in Pontiac ad spending went to network tv which zoomed to $24.7 million from $13.8 million as Pontiac sought to implant new brand awareness. Spot tv actually fell to $4.8 million from $5.2 million and spot radio plunged to $129,000 from $1.4 million. That decline was partially offset by $893,400 in network radio against none in 1980. Magazine spending held about even while newspapers gained.

When consumer interest shifted toward fuel economy, Pontiac tried to follow but the division that brought the GTO and Firebird muscle cars to street racing found the performance image hard to shake. In

fall, 1980, Pontiac's ad campaign concentrated on fuel economy comparisons and kept the previous year's slogan of MPG: "More Pontiac know-how to the Gallon."

Other car lines, the Grand Prix, LeMans, Bonneville and Trans Am also were compared with suitable competitors but they had the wrong sort of names. "Someday, somebody will take a look at the names. They all say performance, and performance in today's thinking means poor gas mileage," Mr. Maloney said.

Pontiac continued to strive for a more economical image during the winter with the help of a new model, the T-1000, an identical twin of the Chevette. Because of its similarity to the popular Chevette and the impending introduction of the J-cars, the T-1000 got no introductory ad blitz.

The division dropped comparison ads because too many other companies had picked up on the technique. Instead Pontiac decided to "go for more impact, excitement and a little bit of the emotion of buying a car," said James Graham, director of merchandising. So Grand Prix became "always a more stylish way of getting there, and getting there in style makes all the difference." The MPG theme line was retained.

Pontiac had not given up chasing the Japanese imports. The J-2000, introduced in late spring, was positioned against the Honda Accord in price but not in advertising. The J-2000 was marketed as "a new generation of Pontiac know-how."

The division did an about-face on its goals, deciding to chase a "youth and excitement" image instead of economy.

The shift in strategy had been completed by the time the fall introduction period rolled around. Pontiac went with an umbrella theme: "Now the excitement begins." The full-size Bonneville model was dropped but the name was carried down to the Grand LeMans body, which became the Bonneville G. "A new lean breed takes over" was the line for the model. The Grand Prix ads urged prospects to "take up a new sport."

The J-2000 campaign changed from a basic recognition strategy to a somewhat frantic "fun, fun, fun," theme with Beach Boys sound-alikes singing the lyrics.

Few were having fun at Pontiac, where sales were so bad GM exempted the division from an ad spending cut for the fourth quarter. The division hoped new models introduced in January would help.

The strategy for the new Pontiac 6000, a front-wheel-drive midsize car, followed the direction Mr. Hoglund had laid out in the fall: Excitement.

The old Firebird sales had been sagging all through 1981 but the new Firebird sales were destined to take off. The Trans Am model was featured in ads to give a performance ruboff to the other models.

Pontiac's J-2000 had trouble keeping up with the Accord because of its price, so the division introduced the J-2000 S in January. The stripped-down version cost $320 less than the original base model.

During the harsh 1982 winter, things did not look as cheerful for the J-car as they had the previous fall. Pontiac dropped the "fun, fun, fun" commercials in favor of the old introduction spots with a new voiceover.

Buick did everything in moderation in 1981. Its unit sales, market share and ad expenditures all increased decorously. Unit sales rose to 722,617 from 720,368 with the Regal/Century intermediates leading the way with 334,696. That was down slightly from the 345,101 in 1980, but the slack was taken up by the front-wheel-drive X-car Skylark. Riviera rose to 47,964 from 42,917 while the full-size LeSabre and Electra were down just a bit.

The small increase in sales was enough in a down year to increase Buick's market share to 8.45% from 8.03%.

Ad outlays increased to $36.7 million from $35.6 million as Buick shifted more dollars into print from tv. Newspaper and magazine spending rose, network tv held about even, spot tv dropped and spot radio fell but network radio spending grew in 1981.

Buick continued flying the hawk for 1981 and 1982. "It's more than just an ad symbol," said Lloyd Reuss, the division's general manager. "It is really a demonstration of the rejuvenation of an organization that had products attuned to a different point in time."

Coming out of a year in which its sales slipped less than any other GM division's, Buick introduced its 1981 models with the venerable tag line, "Wouldn't you really rather have a Buick?" While Buick was now selling small, fuel-efficient cars, it still relied on its traditional customer base.

Buick broke new ground when it became a heavy sponsor on Cable News Network. "Cable is a great growth area, and we wanted to get in on the ground floor," Mr. Savage said.

Ads for 1981 Buicks included "Here's the problem. Here's the solution," for the Regal, a repeat of the "Little limousine" for the Century and "A luxury car you can buy because of the mileage—not in spite of it," for the Electra.

Buick promoted its "free spirit" image through sports tie-ins. Basketball star Earvin "Magic" Johnson and jockey Willie Shoemaker teamed up in a broadline commercial saying, "We give you front-wheel-drive at both ends"—the luxury Riviera and the compact Skylark. Buick advertised on "Monday Night Football" and college bowls. It was the official car of the 1981 Super Bowl, and a Regal V-6 Turbo was the pace car at the 1981 Indianapolis 500. In addition, Buick will be the official car of the 1984 Summer Olympic Games in Los Angeles.

For 1982, Buick continued its "Wouldn't you really rather have a Buick?" tag, its full-line divisional ads and tie-ins with sports personalities and football.

Buick teamed up its compact Skylark and full-size diesels in print ads that read, "Some of our Buicks use very little gas and some of our Buicks use none." The full-size Electra was pictured against the U.S. Capitol with "It uses fuel conservatively and luxury liberally."

In January, 1982, Buick introduced its version of the front-wheel-drive A-body with, "It's the year of the Century." Buick wasn't out to capture a lot of new business with the Century.

Two months after the Century introduction, Buick brought out its version of the J-car, the Skyhawk. Even before it was introduced in March, 1982, the Skyhawk was rebated. GM had put rebates on other divisions' poor-selling J-cars, and it couldn't leave the Skyhawk out of the fray. The subcompact Skyhawk was Buick's answer to higher-price imports.

Oldsmobile, like Buick and Cadillac, sported minor sales, market share and ad expenditure gains. Unit sales rose to 348,739 from 820,681 and market share advanced to 9.95% from 9.14%. Ad outlays came to $39 million from $35.4 million.

Every car line had increases with the exception of the regular Cutlass intermediate. It fell to 187,952 from 210,784 but the Cutlass Supreme redeemed those figures by posting a gain to 266,070 from 258,789. Cutlass Ciera, the new front-wheel-drive intermediate, added another 2,882. Omega, the X-body car, saw sales rise to 109,981 from 87,262, while the big Olds, the 88, rose to 158,662 from 147,997 and the 98 increased to 84,583 from 73,464. Toronado, the luxury personal car, was up a bit to 38,609 from 37,051.

Meanwhile, the ad dollars were shifted around a bit. Newspapers, network tv and spot tv all gained in 1981 over 1980 but magazine expenditures fell off. Spot radio increased but network radio spending fell last year.

Olds kept its market share thanks to the Cutlass and the "Oldsmobile of small cars," Omega. Having nurtured a reputation for quality and engineering innovation, Olds moved away slightly from an engineering approach to insert a little flash and dash in its ads, but it kept the engineering approach for its diesel engines.

"We've had one built for you" continued as the umbrella theme for 1981. Cutlass ads became personal with a "This Cutlass is me" campaign in which various highly animated people substituted their names for Cutlass. Tv actor Dick Van Patten came aboard as spokesman for the full-size Delta 88. The Delta 88 and Cutlass campaigns used a cross-media approach designed for "synergy" between print and broadcast to get more impact.

In the spring of 1981, Olds fielded what it called its biggest spring ad campaign ever as it promoted options value packages.

Olds opened a new umbrella for its 1982 models with the theme, "Even today, there's still room to do it with style."

Print ads continued with the tag "We've had one built for you." Olds prepared two tv ads for the Cutlass with one directed at men and one at women, since women constitute half of Cutlass' principal drivers.

Oldsmobile brought out its fwd A-body, the Ciera, as an addition to its Cutlass series.

If Olds has to distinguish its A-body Cutlass Ciera from other Cutlass models, it also has to separate it from a car that looks a lot like it, Buick's A-body Century. For its A-body, Olds chose as a print tag, "Cutlass Ciera, the only front-wheel-drive that is a Cutlass."

In March, 1982, Olds introduced the Firenza, its subcompact J-body. Like Buick's J-body Skyhawk, the Firenza was born with a cash rebate.

As gasoline prices dropped, Olds diesel sales dropped, and in May, Olds brought out a "diesel value package" for its V-6 engine, offering free options with the purchase of a diesel.

Last fall marked Oldsmobile's second year in its return to sponsoring pro football on tv, and it marked Olds' introduction to cable tv. Olds bought time on the ESPN sports network in addition to the CNN news network. This fall will mark the 15th anniversary of an Olds performance tie-in as Olds brings out a 1983 Hurst Cutlass.

Cadillac sales, market share and advertising expenditures posted gains in 1981. Unit sales increased to 230,665 from 213,002 with only Seville showing a loss—to 22,724 from 34,709. That loss was recouped by sales of the new Cimarron—14,604.

The big Cadillac had a sales increase to 138,948 from 126,151 and the personal luxury Eldorado was up a little to 54,389 from 52,142. Market share came to 2.7%, up from 2.37%.

Cadillac boosted ad expenditures to $19.6 million from $14.2 million spurred by a big increase in network tv. Magazines and newspapers also showed an increase in ad spending over 1980.

Cadillac moved out of the fuel economy "numbers game" and into engineering with 1981 models when it introduced the V-8-6-4 engine. "As you drive, the 1981 Cadillac automatically goes from 8 to 6 to 4 cylinders. Trust Cadillac to lead the way," the ads said. The engine encountered operating problems and became the subject of many lawsuits. But the engine did show Cadillac's high-technology strategy toward foreign competition.

The V-8-6-4 was the subject of nine class-action lawsuits by July, 1982. One suit charged that GM knew the engine was defective, dangerous and not able to be repaired before the engine was marketed and advertised. In 1981, GM extended the V-8-6-4 warranty to five years and 50,000 miles. Only Cadillac limousines continued to use the engine.

Cimarron "by Cadillac" was launched in May, 1981, as "a new kind of Cadillac for a new kind of Cadillac owner." The new Cadillac was a four-passenger subcompact with a four-cylinder engine and a four-speed manual transmission. The new kind of Cadillac owner would be a young, affluent buyer of imports.

While other GM divisions aimed their J-cars at Japan, Cadillac took aim at Europe. "Compare Cimarron to the likes of BMW 320i, Audi 5000 and Saab 900S. Spec for spec, feature for feature," ad copy read.

Cadillac introduced the Cimarron through magazine ads and direct-mail solicitations of 1 million owners of European luxury sedans. Cimarron's tv introduction came last fall when Cadillac bought its first football time ever.

The division brought out its 1982 models with the theme, "Best of all...it's a Cadillac." The Cimarron, continuing as "a new kind of Cadillac," was purchased by Cadillac's youngest customers.

The Seville, which at $25,000 cost twice as much as a Cimarron, was touted as "a car for those who seek the better things in life" and was targeted at Cadillac's oldest customers. Cadillac told its dealers the Seville was for those "for whom first class is a way of life" (those making over $75,000 a year).

Ads for the Eldorado called it "a different breed of Cadillac" with an "understated touch of class." Cadillac put ads for the $22,500 Eldorado Touring Coupe—which has stiff suspension and blackwall tires—in such magazines as *Motor Trend*.

Of all things, vans and big Suburban wagons were the brightest spots at GM Truck & Coach. Vans, in the doldrums for the last several years, had an increase to 22,982 units from 21,007, and Suburbans inched up to 4,349 from 4,210. Pickups were the best sellers at 97,599, down from 102,129. Total sales fell to 171,551 from 183,835. The S-15 pickup was plus business at 2,314.

Heavier-duty trucks also were down, with mediums at 19,360 compared with 24,108 and the heavy-duty models off to 12,810 from 18,698. GMC raised ad expenditures to $8.2 million mainly through network tv. From zero network tv in 1980, the division spent $3.7 million in 1981. Magazines were up to $2.6 million from $1.9 million.

For 1981, GMC put most of its money into magazine ads aimed at specific audiences. Targets were management execs for corporate trucks and farmers. Other magazine ads were directed specifically at fleet managers.

Finally, GMC put some ads in media directed at consumers. GMC spent no money on tv. It dropped Monday Night Football.

The division reversed its no-tv decision when it brought out the 1982 compact S-15 pickup. Sixty per cent to 70% of its ad budget would go into tv, according to James T. Riley, GMC's general sales manager.

The new S-15 pickup was allied with GMC's bigger rigs in ads to differentiate the S-15 from the identical Chevrolet S-10, the compact Ford Ranger and imported Japanese pickups. The theme for all of GMC's ads continued to be, "Trucks are what we're all about."

AC-Delco increased ad spending to $9.4 million in 1981, 29% above the $7.3 million spent in 1980. GM's replacement parts division spent 70% of its ad

budget during the football months from September to January. AC-Delco merged with General Motors Parts division in September, 1981, to form the Warehousing & Distribution division.

GM, after battling imports in the U.S., decided to join the import ranks via its North American Vehicles Overseas division. NAVO started marketing U.S.-built cars around the world with the ad theme, "Put yourself in another world." The tag line was "The New Americans from General Motors," and copy pointed out "There's a certain feeling you can experience only in an American car. It's a feeling of contentment and serenity."

It was the old idea of foreign mystique turned around with hoped-for sales of 110,000 to 115,000 cars in the 1982 model year. The operation represented plus business for idling U.S. plants and a chance to increase GM's overseas sales which after 1981 needed a boost.

GM's overseas retail sales came to 1.6 million units, down 5% from 1980 with GM's market share at about 7%. Adam Opel's sales in Europe declined 7% as well, and Vauxhall Motors in the United Kingdom saw sales plunge 11%. GM pushed ahead with a new small car plant in Spain, maintaining its output wouldn't be exported to the U.S.

GM made other arrangements for small cars. It plans to import 200,000 Isuzu-made Japanese small cars which will bear the Chevrolet brand name. Late in 1984 is the target date.

GM's Power Products Operations were a bit brighter. Detroit Diesel Allison division hit record dollar sales, topping 1980 by some 14%. There were record sales of light helicopter turbine engines, strong sales of off-highway transmissions and sales of transmissions for the new M-1 tank. Electro-Motive division saw a "significant increase" in demand for diesel engines in oil rigs and industrial applications. Diesel locomotive component sets for export hit a unit sales record.

GM moved General Motors Acceptance Corp. and Motors Insurance Corp. from New York to Detroit in the summer of 1981. It also realigned worldwide truck and bus operations into a new organization. Assigned to the new group were GMC Truck & Coach division, Worldwide Transportation Systems Center and Vauxhall Motors. Rochester Products division and Diesel Equipment division were consolidated as were Harrison Radiator division and Delco Air Conditioning division. Harrison Radiator was the surviving name.

Gillette Co.

	1981	1980
Sales	$2,335,000,000	$2,315,000,000
Earnings	124,200,000	123,977,000
Advertising*	171,900,000	150,981,000

*AA estimate

Gillette Co., Boston, the 32nd largest national advertiser, increased its advertising by approximately 14% to an estimated $171.9 million in 1981.

Worldwide sales in 1981 increased to $2.34 billion, up 1%, while earnings were virtually unchanged. Sales for the first quarter of this year decreased 9%, while earnings dropped 19% to $32.9 million.

Colman M. Mockler Jr., Gillette chairman-chief executive officer, attributed the lower results primarly to continuing recessionary conditions in retail sales in the U.S., as well as many countries abroad, and to foreign currency fluctuations that produced rates significantly below those in the first quarter of 1981. For the six months ended June 30, 1982, sales declined 5% to approximately $1.107 billion, compared with $1.171 billion in 1981. Profit from operations was $162.9 million, virtually unchanged from $163.5 million the year before. Pretax income was $121 million, down 2% from $123.3 million in the prior year. Net income was $70.8 million, a decrease of 7% from $76.4 million in 1981.

For all of 1981, Gillette's four major lines and their percentage contributions to sales were: Blades and razors 33%; personal care 28%; writing instruments 13%, and Braun products 20%.

Worldwide advertising and promotion costs in 1981 were up 13% to $385.5 million from $340.7 million in 1980. The 1981 total included $263.2 million for advertising and sampling and $122.3 million for sales promotion.

Sales and profits of blades and razors advanced in 1981. Gillette's safety razor division continued its dominance of the wet shave market on the strength of Trac II, the nation's biggest selling shaving system, and the continued success of the Atra automatic adjusting twin-blade razor and cartridge. The 5-year-old Atra continues to be best-selling razor in the country.

In most major markets abroad, Gillette blades and razors outsell those of all competitors combined.

In the U.S., the Atra brand retained its leading dollar share of the razor market, and sales of Atra twin blade cartridges increased significantly. Abroad, the Atra system achieved share gains in every major market in which it is sold. Atra cartridge sales overseas climbed significantly; Atra razors became the top sellers in Europe.

Trac II cartridge sales rose, continuing as the No. 1 blade brand in the U.S. International sales of the G II (Trac II's brand name abroad) twin blade cartridges were somewhat lower.

The U.S. sales of disposable razors saw a sharp increase primarily as a result of rising consumer demand for Good News!, the top seller in the category for six consecutive years. The new women's Daisy disposable also contributed to the increase.

With the total disposable market now accounting for approximately 28% of the total blade market in unit sales, Gillette continues to dominate with about 56% of unit sales in the disposable blade market.

In the $583 million blade market, Gillette's share continues to be in the area of 60%. Schick (Warner-Lambert) has the No. 2 spot with a share in the low 20s. The rest of the market is held by American Safety Razor, Bic and private labels.

According to Leading National Advertisers, Gillette last year spent $6.2 million to advertise the Atra shaving system; $3.02 million for Good News! and Swivel disposable razors, and $1.2 million for the Just Whistle razor.

The company's personal care division blossomed during the last year. Today, analysts who monitor Gillette agree that the division's new product posture is one of the best in the business—if not the best, due to several new product introductions, including Silkience, Aapri, For Oily Hair Only and Dry Idea.

Last year the division showed marked gains. Worldwide toiletries and grooming aid sales increased nearly 11% to $661.4 million in 1981. Dry Idea roll-on, introduced four years ago, continues to expand its share in the $1 billion retail deodorant/antiperspirant market. Aided by higher sales of its Soft & Dri brand, Gillette expanded its leading position in aerosol deodorant/antiperspirant.

Gillette's inroads into haircare and other beauty aids notwithstanding, deodorants and antiperspirants continue to be critical. Last year Gillette spent $19.6 million to advertise Right Guard, $8.1 million for Dry Idea and $4.7 million for Soft & Dri.

In addition, the company's shampoo sales climbed significantly as a result of the continued success of two-year-old Silkience "self-adjusting" shampoo, formulated to clean hair only where dirty and condition only where dry. As it traditionally does, Gillette backed the introduction with big bucks—more than $19 million in promotional spending and $11 million in advertising. In 1978, Gillette rolled out Silkience "self-adjusting" conditioner.

This very line, in fact, which is often credited as starting the Gillette winning streak last fall, gave birth to yet another sibling, a moisturizer based on the same self-adjusting concept that has proved so successful for the hair products. In November, Gillette rolled out Silkience moisturizer, backed by $11.5 million into prime time and network. Ads by N W Ayer follow the same creative tack as the hair product commercials created by Advertising to Women. Ultraviolet scanner photography demonstrates the product's selective lubricating capabilities.

When the product was announced, however, skeptics questioned whether or not the haircare success will translate as smoothly into skin. And, indeed, at a meeting of security analysts this summer, Gillette treasurer Milton Glass admitted the launch to date to be a little shy of expectations. As such, it is the personal care division's first recent flirtation with disappointment.

Another new product, Aapri, an apricot facial scrub introduced in June, 1981, quickly managed to grab 9% of the $133 million facial market, to the surprise of most analysts, who are now saying it created an entirely new category. Its introduction was supported by a $17.4 million advertising and promotion budget. Analysts fully expect Gillette to come out with some sort of Aapri reincarnation, but are unsure what to expect.

Last year also saw the introduction of Mink Difference, a hair spray with mink oil, which is supposed to leave hair shiny and soft. As such, Mink Difference was just the kind of product the personal care division is so fond of: Higher-price and sporting a distinct product difference. And, indeed women's hair spray sales have been rising sharply, after falling on hard times during the 1970s.

Over the past year, Gillette reports that Jafra skincare products registered strong sales gains both here and abroad.

At the company's annual meeting in April, Gillette disclosed several new products, including For Oily Hair Only, a shampoo and rinse system that is being supported by more than $20 million in advertising and promotion. Others included Bare Elegance, a moisturizing body shampoo aimed at women that entered into a West Coast test this past spring. It is expected to compete against moisturizing bars rather than just liquid soaps.

Sales of personal appliances decreased sharply as a number of models were discontinued.

Worldwide writing instrument sales jumped from $289.3 million to $303.5 million. Ballpoint pen sales rose in the U.S. where Gillette continued to retain the No. 1 position in dollar share of the retail market. The company attributed the performance to its Eraser Mate, a disposable pen, and to its Write Bros. stick pens, which registered strong sales growth in both the commercial and retail sectors.

The company's luxury writing instruments, manufactured and distributed by S.T. Dupont of France, posted sizable gains due primarily to the performance of its line of ballpoint pens. Gillette also maintained a leading share in the $110 million porous pen category, aided by the introduction of refillable Ultra fine flair brands.

Sales of Braun products continued in 1981 to show gains in local currencies. Sales were moderately lower, when translated into dollars. The shaver, household and personal care product areas, which together account for more than three-quarters of total Braun sales, showed strength, but profits were moderately lower.

Sales of its electric shavers were down, but Braun retained its leading share position in Germany. During the year, Braun continued its gradual divestiture of its photo and hi-fi business.

This year, there were some indications that Gillette had inched away from its noncomparative advertising stance toward the shaver business. For the first time, Gillette responded to a series of comparative Bic ads for the Bic Shaver, with pretty severe comparative ads of its own, in a tv campaign claiming, "If you use Bic you're not getting as close, as smooth, as safe a shave as you would with Gillette's Good News!" It ended —no less obliquely—with the line, "Sorry, Bic."

Although the company claimed its new spots were in the works before the Bic comparative commercials broke, Bic strongly believed that the campaign was in response to its ads. Other sources suggested that Gillette was steamrolling the issue with the networks, who had to decide whether or not to keep such conflicting claims on the air.

The networks decided not to, and dropped the Bic ads.

At any rate, sources characterized the quick belligerence of the Gillette effort as quite out of character, and suggested that maybe the safety razor division would be even more aggressive in the future.

During the first half of this year, Gillette made two interesting announcements. First, that it had completed an agreement with the Shenyang Daily Use Metals Industry, Liaoning Province, Northeast China, for the manufacture of coated blades, uncoated blades for industrial use and plastic razors for Chinese consumption. Production will begin in mid-1983. Then, in July, Gillette announced it would spend $30 million this year on oil and gas ventures.

Greyhound Corp.

	1981	1980
Sales	$5,164,000,000	$5,156,600,000*
Earnings	138,200,000	116,300,000
Advertising	75,592,100**	63,577,400

*Restated to include financial segment
**AA estimate

Despite declining earnings in its busline business, Greyhound Corp., Phoenix, the nation's 72nd largest advertiser, recorded earnings in 1981 of $138.2 million, a 17% increase over the previous year, on a slight 2% increase in sales from $5.136 billion to $5.164 billion.

Greyhound, which increased advertising from $63.6 million to an estimated $75.6 million in 1981, credits the company's improved financial performance to the reduction of long-term debt and short-term borrowings, the selection of new management and, most important, the "rejuvenation" of Armour & Co., Greyhound's food and consumer products group.

Armour & Co., whose Armour Foods is Greyhound's food segment, reversed a slide in profits which had brought dire predictions of its demise from the business community in 1980.

Greyhound reacted quickly as the year opened to revitalize the company's sagging prospects by making several management changes: Walt Tunnell was made president of Armour Foods and Dave Duensing became president of Armour-Dial, Armour's consumer products division.

Under the new leadership, Armour Food Group's net income increased from a loss of $5.7 million in 1980 to a $9.7 million gain in 1981, while sales slid from $2.46 billion in 1980 to $2.30 billion in 1981. An important development in the earnings turnaround was the jointly forged contract between Armour and the United Food & Commercial Workers International Union, which provides for a wage and cost-of-living freeze for almost the next four years.

Perhaps the most dramatic product turnaround was in the processed meat area, which experienced an almost $20 million upswing in sales. During the year, Armour regained some of its private-label business and increased its "second line" brands, which are made to meet unique regional tastes in bacon and other products. The company also increased volume on almost all processed meat products, including bacon, hot dogs and luncheon meats, as well as achieving expanded distribution. This strategy marked the continuation of the strategy begun in late 1980 to rebuild the division.

Building on the quality reputation of its Armour Golden Star canned hams, the company introduced the Armour Golden Star boneless ham last October. Also, Armour's new line of Dinner Classics frozen entrees were introduced into four new markets. Company officials say the line will be in national distribution by yearend.

Armour's processed meat ad spending in 1981 compared to 1980 (shown in parentheses) were Armour Golden Star canned ham $86,200 ($87,800); Armour International deli sausage) $25,400 ($91,900); Armour meats $8,400 ($300,000); Armour Star franks $9,600 ($1.3 million); Armour Star frozen turkey $2 million ($1.5 million); Armour Star ham $23,400 ($649,500). Figures are from Leading National Advertisers.

Other food product advertising included Armour La Sauce chicken baking sauce $1.1 million ($999,300); Armour frozen dinners $414,900 ($257,800), and Armour Star canned chili $654,600 ($641,700). La Sauce, still in its marketing infancy, had moved from test market into regional distribution (20% of the country) in 1980.

Armour canned Treet, canned Vienna sausages, lunch meats, Armour Star bacon and canned beef—products advertised in 1980—were not advertised in the six media monitored by LNA during 1981.

Because of the poor return on investment the company had experienced from its turkey-raising concerns, Armour sold its three turkey facilities to move out of the commodities end of the business. Armour officials say the decision will not affect the company's line of turkey products. Armour is introducing a new line of 12 turkey products, including turkey bologna, pastrami and hot dogs, to capitalize on the increased awareness of the nutritional benefits of poultry compared with red meat. After 20 years together, Armour split with Y&R on its $5 million processed meats account and enlisted the services of Bozell & Jacobs.

Greyhound's consumer products segment—essentially Armour & Co.'s Armour-Dial division—reported net income in 1981 of $16 million on sales of $597.5 million, compared with net income of $15.9 million on sales of $621.1 million in 1980.

Dial soap maintained its position as the leading deodorant soap in the nation with a market share of about 14%, and the company's Tone skincare bar held its own in market share, says the company. These two products dominate advertising at Armour, and at Greyhound for that matter. According to LNA, Dial deodorant soap spent $15.9 million in 1981 compared with $15.6 million in 1980. Tone soap spent $5.1 million in 1981 compared with $5.2 million in 1980. Armour's new liquid soap product, Liqua 4, went national this summer. Spirit, the blue-and-white bar soap billed as a "latherer," pulled from several Midwest test markets in early 1981 but reappearing a few months later with a new package design, drew $163,000 in advertising in 1981 compared with $144,200 in 1980. It has gained market shares of 3% to 4% in its test markets, say company officials.

Armour-Dial pulled out its guns during the year to support Dial dry solid deodorant with a $6.6 million accumulative buy—almost all on network tv—compared with the $2 million spent on the product the previous year.

Yet another Greyhound segment, foodservice, increased its earnings in 1981 almost 50% to $6.5 million from $4.3 million. Sales were up 6% to $255.3 million from $240.5 million in 1980.

A shrinking economy and growing unemployment rate contributed to the decline in Greyhound's transportation segment's earnings drop to $49.7 million from $54 million in 1980. Sales, however, increased to $1.05 billion from $989.9 million. In the process, Greyhound Lines passenger miles fell 6% to 8%. Greyhound Lines boasts that in September, 1981, it operated the largest charter movement in the history of the intercity bus industry when more than 560 of its buses carried 24,000 union members to Washington, D.C., for Solidarity Day.

To strengthen its Greyhound Package Express entity, the company added a new field sales organization. Greyhound's Package Express door-to-door pickup and delivery service was expanded in 1981 to 280 cities.

Ad spending for Greyhound bus lines dropped appreciably to $3.1 million in 1981 from $6.4 million in 1980, according to LNA figures. Greyhound spends very little on its other transportation units: Carey Transportation, Red Top Sedan Service, American Sightseeing Tours, Brewster Transportation, California Parlor Car Tours Co. and Gray Line Cos. Motor Coach Industries.

During 1981, Greyhound's board of directors elected John W. Teets as chief executive officer and Frank Nageotte as chief operating officer. The new management team also includes 24-year Greyhound veteran Ralph Batastini as president and chief financial officer.

Gulf & Western Industries

	1981	1980
Sales*	$7,409,000,000	$6,911,000,000
Earnings*	290,900,000	255,300,000
Advertising	106,140,900	104,728,785**

*Fiscal years ended July 31, 1980, and 1981.
**Restated.

Gulf & Western Industries, New York, the 52nd largest national advertiser, increased its total U.S. media advertising expenditures 1.3% to $106.1 million in 1981. Its biggest advertising spenders were Paramount Pictures, Kayser-Roth, Simmons and Simon & Schuster.

Gulf & Western's net sales and other revenues were up 7%, and net earnings increased 14% for the fiscal year ended July 31, 1981.

The relative contributions of the company's operating groups in terms of operating income in fiscal 1981 were: Consumer and Agricultural, 30%; Financial Services, 23%; Manufacturing, 17%; Leisure Time, 16%; Apparel and Home Furnishings, 15%; Automotive and Building Products, 6%, and Natural Resources, 7%.

The Leisure Time group, with revenues of $1.13 billion in fiscal 1981, includes Paramount Pictures Corp. and its subsidiaries; Simon & Schuster, publisher of hardcover and paperback books; Madison Square Garden, the sports and entertainment organization; Famous Players Ltd., which operates motion picture theaters in Canada and France, and Famous Music Corp., which creates and publishes copyrighted music.

Paramount remained the corporation's biggest advertiser with expenditures of $48.5 million in fiscal 1981, compared with $48 million in fiscal 1980.

One of Paramount's biggest successes of 1981 was "Raiders of the Lost Ark," produced by George Lucas and directed by Steven Spielberg.

The film became the fourth-largest grosser of all-time with box office receipts of more than $200 million.

Paramount was nominated for 35 Academy Awards for films released in 1981, including three best picture nominations for "Raiders," "Reds" and "Atlantic City."

The Warren Beatty film "Reds" was nominated for 12 Academy Awards—more than any film since 1966.

Paramount's summer/winter release schedule for 1982 in-

cludes "Star Trek II—The Wrath of Khan," "An Officer and a Gentleman" and "Airplane II—The Sequel." "Star Trek II" established a new industry opening weekend box office record of $14.3 million in its first three days of release.

Paramount Television will have nine series on the air during the 1982-83 season, more than any other company. New Paramount TV shows on NBC's fall schedule include "Family Ties," "Cheers" and "The Powers of Matthew Star." NBC also has picked up the company's "Taxi" series, which was formerly aired on ABC. In addition to the renewal of three of Paramount's recent hits, "Happy Days," "Laverne & Shirley" and "Joanie Loves Chachi," ABC has added two new Paramount TV sitcoms to its lineup: "Star of the Family" and "The New Odd Couple."

Paramount TV's "The Winds of War," based on Herman Wouk's best-seller, is currently in post-production. Scheduled for February, 1983, on ABC, this 16-hour miniseries is one of the most ambitious projects in tv history.

James Clavell's "Shogun," the 1981 Emmy award-winning 12-hour miniseries, recently was introduced to foreign markets by Paramount Television International Distribution. Paramount's international sales arm has 10 network shows for fall, 1982, the largest of any international distributor.

First-run programing returning in the 1982 season from Paramount TV's domestic distribution division includes "Solid Gold," the musical variety show that has been sold in more than 124 markets and is totally supported through advertiser sales, and "Entertainment Tonight," the half-hour entertainment news show that receives station license fees as well as advertiser support and airs in 188 markets. Premiering in September, 1982, is "Madame's Place," a half-hour comedy series that is partly advertiser-supported and stars Wayland Flowers' creation, Madame. For the first time in its history, Paramount is selling four advertiser-supported theatrical releases directly into syndication, bypassing the networks as part of its First-Run Network concept. "Friday the 13th, Parts I and II," "Lipstick" and "The Fan" will be available for independent stations to air during the four major ratings sweep periods between fall, 1982 and fall, 1983.

Network properties such as "Taxi" and "Mork & Mindy" continue to be sold into syndication, joining such other series as "Happy Days," "Laverne & Shirley," "The Odd Couple," "Mission: Impossible," "Star Trek" and "The Brady Bunch." Total unrecognized revenues from agreements to telecast Paramount TV programs and motion pictures were more than $400 million at the close of fiscal 1981, compared with $330 million a year before.

The original programing arm of Paramount Video has produced several live theater productions on tape for the Home Box Office pay network including "Barefoot in the Park," "Plaza Suite" and "The Rainmaker." Also, Silhouette Books, a division of Simon & Schuster, has contracted with Paramount Video which will produce two-hour movies based on the popular Silhouette romance novels. Called "Silhouette Romance Theater," the first movie is expected to be in production within six months. Distribution of the "Silhouette Romance Theater" will be channeled through pay tv, regular cable, motion picture theaters and commercial tv on a worldwide basis.

Major licensing deals for pay tv include "Mommie Dearest," "Paternity," "Atlantic City," "First Monday in October," "Gallipoli" and "Dragonslayer." The Home Video section of Paramount Video leads the industry with its line of top-selling videocassettes.

In fiscal 1982, Sega Enterprises and the Miss Universe operations were transferred from other G&W operating groups to Paramount Pictures Corp. in the Leisure Time group. Sega, a 90%-owned subsidiary that designs, manufactures and distributes commercial electronic amusement games and operates amusement game centers in Japan and the U.S., had domestic advertising expenditures of $100,390 in fiscal 1981, compared with $121,180 in 1980. Advertising for the Miss USA and the Miss Universe Pageants (which attracted an estimated worldwide television audience of 700 million in 1981) is done by CBS, the network that airs both pageants.

Advertising expenditures for Famous Players Ltd. were $456,187 in fiscal 1981, compared with $37,775 in fiscal 1980.

Simon & Schuster spent $6.9 million in advertising during fiscal 1981, compared with $6.3 million in 1980.

Hardcover best-sellers in 1981 included "The Last Days of America" by Paul Erdman; "Goodbye, Janette" by Harold Robbins; "Elizabeth Taylor: The Last Star" by Kitty Kelly; "Mornings on Horseback" by David McCullough, which was an American Book Award winner in the Biography category; "Jane Fonda's Workout Book," and "Maria Callas" by Arianna Stassinopoulos. Major books being heavily advertised in 1982 include John Ehrlichman's "Witness To Power"; "Dutch Shea, Jr." by John Gregory Dunne; "The Prodigal Daughter" by Jeffrey Archer; "Lace" by Shirley Conran; Andrew Tobias' "The Invisible Bankers"; "Strategic Investing" by Douglas Casey; "Someone Else's Money" by Michael Thomas; "Schindler's List" by Thomas Keneally; Harold Robbins' "Spellbinder"; "A Cry in The Night" by Mary Higings Clark; "Monsignor Quixote" by Graham Greene; "Having It All" by Helen Gurley Brown, and Barbara Woodhouse's "No Bad Dogs." Pocket Books had a record year in sales and income, reflecting successful promotion of such best-selling titles as "If There Be Thorns" by V.C. Andrews, "Memories of Another Day" by Harold Robbins and "The Calder Series." In 1982, Pocket Books is presenting Paul Erdman's "The Last Days of America" and "The Hotel New Hampshire" by John Irving, as well as the new printing of John Irving's "The World According to Garp" to tie in with the release of the film this summer, and has also experienced great success with its new title, "Real Men Don't Eat Quiche" by Bruce Feirstein.

Silhouette Books has made a successful debut in the rapidly expanding romance novel market. The results have led to the introduction of three extensions to the Silhouette Romances line in fiscal 1982: A "First Love From Silhouette" series for teen agers (aged 10 to 15); a "Silhouette Special Edition" series of longer novels for women (aged 25 to 49), and "Silhouette Desire" series for single women (aged 18 to 34). A major tv and print campaign has been launched with five distinct themes for these new lines.

Madison Square Garden Corp., which spent $3.1 million in ad dollars in fiscal 1981, compared with $3.7 million in fiscal 1980, owns and operates the Madison Garden Center, the New York Rangers of the National Hockey League, the New York Knickerbockers of the National Basketball Assn., Marketing Concepts, Madison Square Garden Network, Hughes Television Network and Roosevelt Raceway in New York and Arlington Park racetrack in the Chicago area. The company also has an 80% participation in International Holiday on Ice. Madison Square Garden is aggressively expanding its role as a supplier of sports and entertainment programing for both over-the-air and cable television. In fiscal 1982, the Madison Square Garden Network will supply a 125-event package that is expected to be seen by more than one million basic cable subscribers in the New York metropolitan area and nearly 10 million viewers nationally.

The apparel and home furnishings group had net sales of $1.5 billion in fiscal 1981. The group is composed of Kayser-Roth, a diversified marketer and distributor of apparel, hosiery and textiles; Simmons Co., a worldwide leader in bedding products, and Simmons Universal, which produces a variety of home and institutional furnishings, healthcare equipment and burial caskets. In fiscal 1982, this group was expanded to include Consolidated Cigar Co. and has been renamed the consumer products group.

Kayser-Roth spent $22 million in advertising dollars for fiscal 1981, versus $21.2 million in 1980.

Some of its well known brand names include Catalina bathing suits and sportswear and its new Kurt Thomas Collection of men's warmup suits, Cole of California and Cole Jrs., Beach 'n Beyond, Sandcastle, Going Places, Excello, Her Majesty Industries children's wear, Oscar de la Renta menswear, Liz Claiborne, Cheryl Tiegs sportswear, Cresco, Century Sportswear, Champion, John Weitz, Stetson western shirts and outerwear, Mr. California, John Newcombe tennis wear and Kayser intimate apparel.

The hosiery division produces women's pantyhose and stockings under such brands as No Nonsense, Mojud, Supp-Hose and Jordache, which are distributed through supermarkets, drugstores, mass-merchandisers and department and specialty stores. The men's brands include Sock Sense, Interwoven, Jiffies men's socks, St. Moritz men's underwear, Supp-Hose and Fruit of the Loom. In fiscal 1982, Kayser-Roth acquired Burlington Hosiery and Socks, adding to its branded line names the Burlington, Leg Looks and Cameo labels in the ladies hosiery division and Levi and Adler in men's socks.

Kensington, the newly formed health and beautycare division of Kayser-Roth Hosiery, plans a major entry in September, 1982, into the fragrance market with Cameron for men and Pascalle for women. Both fragrances will be sold in drugstores, food stores and through mass-merchandiser outlets, somewhat similar to the successful distribution pattern established by No Nonsense.

During fiscal 1981, the bedding operations of Simmons U.S.A. and Simmons International were combined into a single unit, Simmons Co.

Simmons recently introduced the Beautyrest Gemini, which has been test marketed in Minneapolis, Atlanta and Seattle. The company claims this product represents a breakthrough in mattress construction because it is designed to enable two people with different sleeping requirements to sleep comfortably on the same bed. The Gemini mattress has two separate "Comfort Cores"—either conventional, hybrid water bed or inflatable cores. This mattress will be introduced nationally in fiscal 1983.

Bedding products are marketed under such brands as Beautyrest, Deep Sleep, Slumberking, Feelings, Beautyfoam, Hide-A-Bed sofas, Quietude, Maxipedic, Golden Value Simcopedic, and the flotation sleep system, a hybrid waterbed.

Simmons Universal is divided into three divisions: Decorative fabrics, wallcoverings and accessories; furniture, and caskets. Two companies in Simmons Universal's furniture division introduced new product lines in fiscal 1981: The Gulf & Western Healthcare Group continued to add to its broad line of products for the hospital, extended care and nursing home marketplaces, and Thonet Industries, a leading marketer of institutional furniture, introduced two new complete lines of swivel seating targeted for the office furniture market.

The decorative fabrics, wallcoverings and accessories division is divided into three product lines: Fabrics, which includes Greeff, Bloomcraft and Century curtain; wallcoverings, which includes Albert Van Luit and Katzenbach & Warren, Old Stonemill and Ronkonkama, and accessories, which includes Raymor/Moreddi and Artisan House.

Upholstered furniture is marketed under the Selig brand. Institutional furniture is produced by Thonet Industries and Gulf & Western Healthcare. Infant and youth furniture is manufactured by Simmons Juvenile Products Co. under the Little Folks brand name.

Burial caskets are marketed wholesale to jobbers and distributors under the Elgin/York brand. Direct sales to funeral directors are made through Simmons.

The consumer and agriculture products group (recently renamed the food products group) had net sales of $669.1 in fiscal 1981. Although there was a reorganization of this group in fiscal 1982, last year it consisted of primarily two operations, Consolidated Cigar and agricultural products.

Consolidated Cigar retained its first-place position in the U.S. cigar market with a 30% share of dollar volume. The leading domestic brands include Dutch Masters, El Producto, Muriel, Backwoods and Ben Franklin. Allied Products include Mixture No. 79, Sutliff Private Stock and Old Grand Dad pipe tobaccos; Rogers pouches, and Nimrod lighters. G&W is in the process of selling Con Cigar to MacAndrews & Forbes Group for $105 million.

Backwoods Smokes completed its national rollout in September, 1981, and has forged ahead to become the largest dollar volume small cigar in the industry.

Agricultural products spent $938,720 for advertising in 1981 and $833,771 the previous year. Included in the 1980 totals is $2 million spent by Schrafft's, which was divested during fiscal 1981.

The financial services group, with revenues of $1.71 billion in fiscal 1981, is primarily composed of Associates Corp. of North America, which provides a broad range of consumer lending, commercial financing and insurance services, and Providence Capitol International Insurance Ltd., which underwrites a full line of insurance products and develops and manages real estate properties.

The automotive and building products group had net sales of $560.4 million in fiscal 1981. The major advertiser in this group is American Parts System (APS), a leading distributor of automotive replacement parts.

The total spent by this group was $1.3 million in ad dollars for 1981, compared with $962,419 in 1980.

Gulf & Western's other operating groups, manufacturing and natural resources, had advertising expenditures of $1.96 million and $34,616, respectively, in fiscal 1981. In 1980 the manufacturing group spent $1.7 million for advertising.

Gulf & Western's fiscal 1981 corporate advertising expenditures were approximately $296,319, compared with $620,000 in 1980.

H.J. Heinz Co.

	1981	1980
Sales*	$3,688,500,000	$3,568,889,000
Earnings	192,802,000	160,827,000
Advertising**	160,175,000	125,291,000†

*Fiscal year ends April 28
**Company estimate for calendar years
†Restated

H.J. Heinz, the nation's 36th largest national advertiser, spent an estimated $160.2 million on domestic advertising in 1981, a 28% increase over 1980 expenditures of $125.3, a figure $23.5 million higher than 1979 spending.

Fiscal 1981 saw Heinz increase its sales and earnings for the 19th consecutive year. Consolidated sales rose 3.4% to $3.688 billion and net income increased 19.9% to $192.8 million.

Heinz markets more than 1,200 products worldwide, including such widely recognized brands as 9-Lives cat food, Star-Kist tuna, Ore-Ida frozen foods, Heinz tomato products and Weight Watchers products and services.

In recent years the company has significantly increased advertising and promotional support for its branded products.

According to company figures for fiscal year ending April, 1982, the company spent $240 million for product promotions—including $148 million in media advertising—in its domestic and overseas operations, compared with only $28 million spent 10 years ago. Plans call for $280 million in marketing expenditures for the next fiscal year.

The increased ad support arises from the basic business strategy the company has embraced in recent years. Said Heinz chief executive officer Anthony J.F. O'Reilly, "We are utterly dedicated to the pursuit of our ultimate goal to be the low-cost producer in all the major markets we are in," and Heinz is generally recognized as having achieved that status in its potato, tuna and tomato-based operations. The strategy calls for paring inventories, phasing out unprofitable lines, and closing plants that cannot be modernized. Since 1977, for example, the company has shut down 15 factories or consolidated their operations into other facilities.

Heinz executives see the possession of the leading market share as a key to becoming the low-cost producer in a category, and many strategic decisions turn on the company's evaluation of a product's potential for achieving a strong or leading market share. Such considerations have prompted Heinz to concentrate the brand's marketing efforts in the Northeast—where it has its largest market share—and a few Midwest markets such as Chicago and Des Moines, instead of bringing it national. Measured media advertising support for La Pizzeria frozen pizzas dropped from $4.9 million in 1978 to $473,000 in 1981 as the company refocused marketing efforts toward the trade rather than consumers. However, the company has been patient with the shaky performance of Mrs. Goodcookie ready-to-bake frozen cookies, which was rolled out in 1978. The company explains that "the entire sweet goods category is still having problems" associated with the economy, but claims sales of Mrs. Goodcookie have stabilized, and that it "is definitely not a dead brand." Measured media support, which had reached a high of $1.7 million in 1979, was virtually eliminated by 1981 as the company substituted tv support with (unmeasured) newspaper advertising.

More recently, Heinz officials have voiced disappointment with the company's pickle operations that trail far behind the market leader, Vlasic. The company has pulled back advertising support for its pickle products, whose measured media support had reached a high at $750,000 in the mid-1970s and now has been virtually eliminated. Heinz has consolidated its pickle production and is currently studying new marketing approaches with an eye to enhancing the profitability of its pickle operations.

Similar reevaluations may be under way at Heinz' baby food operations which have seen measured media support shrink to $215,000 in 1981 from a high of $332,000 in 1979. The baby food brand's 15% share puts it in a neck-and-neck battle with Beech-Nut for the No. 2 spot in the market, far behind Gerber's intimidating 70% share.

At the same time that Heinz' strategy calls for trimming unpromising businesses, it also emphasizes the need for providing strong marketing support for its successful brands, with company officials arguing that "heavy spending against the consumer is as vital for established brands as it is for new entries" and that "brand reinforcement [of strong brands] should have top priority for [food] manufacturers in the 1980s."

The domestic ketchup operations—Heinz' most heavily advertised line—clearly illustrate the application of this philosophy. Excluding newspaper advertising, measured media support for Heinz tomato ketchup soared to $11 million in 1981, up sharply from the $6.6 million in 1980. The record high advertising expenditures paid off by helping the brand increase its domination of the market, pushing its share to a record 47% (up from 44% in 1980).

Major consumer promotions, including a Free Hamburger Giveaway IV, a Free Chicken Offer and several premium offers provided additional support for the brand, which company officials say outsells each of its national competitors by nearly 4 to 1. Industry sources also point out that Heinz now controls a staggering 84% of the food service market.

On the retail side, the introduction of a 44-oz bottle in 1980 also has contributed to the brand's growth. The large size captured 10% of the national market in the first year after introduction and now accounts for 25% of the company's share of total grocery market sales. Lite ketchup, which went into test markets in 1980 and which is advertised as having only half the calories of regular ketchup, is reportedly continuing to do well where it is distributed. Company officials report that Heinz chili sauce is the category's No. 1 brand with a 50% share of the national market, despite negligible measured media support.

The $3.3 million spent on Heinz 57 steak sauce in calendar year 1981 represented a decline from 1980's record $4.1 million, but still was easily the brand's second-highest, single-year ad investment. Ads included a "Brush Up" campaign featuring a versatile glaze recipe for chicken, ham and ribs. Couponing also was increased, possibly in response to increased competition as Lea & Perrins steak sauce moved into national distribution last winter. Heinz' 30% share makes it the No. 2 brand in the category, which is dominated by Heublein's A.1. sauce, which controls 60% of the market.

The Heinz Homestyle gravy line, which ranks as No. 2 in the ready-to-serve gravy category, has launched a cream gravy into the southeastern and central U.S. and increased its measured media spending last year to $2.3 million, up from $1.8 million. The company also rolled national with its seafood cocktail sauce and tested an extended-use print campaign for its vinegar products, positioning them as the answer for removing mineral deposits in automatic drip coffeemakers, tea kettles and steam irons.

The Weight Watcher operations continue to gear up for major growth, with measured media support increasing substantially to $6.9 million in 1981, compared with $5.2 million in 1980. Particularly notable was

the increase in support for Weight Watchers' classes, which rose to $3.3 million in 1981, compared with $2.3 million in 1980.

The efforts to attract members will use the organization's 20th anniversary as a theme, and Weight Watchers will launch its first prime time network tv promotion this fall. The organization also launched a mailing last summer to reach 4.5 million former members about a new diet plan that allows such food as popcorn, peanut butter, honey, wine and beer, and a 2.5-million-piece co-op mailing to former members is planned for March, 1983.

Research showing that 60% of those who currently buy the products are people who go through the class system undoubtedly helped spur the efforts to increase class membership, which currently includes about 2.5 million active classroom attendees, said Mr. O'Reilly in a recent address to Securities Analysts of San Francisco.

The company reports that Weight Watchers frozen entrees enjoyed strong growth behind the reformulations and reintroductions of 19 frozen meals. The reintroduction was supported with a $7.1 million media budget for fiscal 1982 that emphasized regional and network tv as well as an extended national print campaign. In addition, defensive spending against a competitive Stouffer's introduction has contributed to increased consumer interest in low-calorie frozen food entrees. Plans call for continuation of strong tv and print support, and attention is also being focused on test market introduction of Weight Watcher desserts.

Weight Watchers Treat bars (chocolate, chocolate mint and orange-vanilla), thin-sliced white and wheat breads and yogurt have expanded out of test markets and are being rolled national. Weight Watchers new products currently in test include ice cream sandwiches, a six-item line of frozen dessert cakes and a seven-variety line of pourable salad dressings.

Recent tuna industry problems caused by an oversupply of tuna and by consumer shifts to cheap protein alternatives like cheese and chicken may turn out to be a blessing in disguise for Heinz' Star-Kist operations. Though Star-Kist profits were pinched by heavy price discounting by private label and generic tuna processors, Star-Kist is weathering the difficulties much better than are its two major competitors, with both Ralston Purina's Chicken of the Sea and Castle & Cooke reportedly running in the red this year.

A large part of the reason that Star-Kist has been more insulated from the depressed industry conditions than are other processors is its capacity for using tuna by-products in pet food. In particular, the company's 9-Lives brand controls 34% of the specialty canned cat food market, whereas Ralston Purina has only an 8% share and Castle & Cooke does not produce pet food.

And Star-Kist has made moves to take advantage of its current upper hand, including sharp increases in advertising that raised measured media spending to $7 million in 1981, compared with $5 million in 1980. This included continuation of the brand's "spring water/half the calories" campaign to support the water-packed tuna products that now account for 52% of total tuna sales, up from only 28% in 1979. Star-Kist also introduced single-serving pull-top cans last summer.

The increased ad efforts have helped strengthen Star-Kist's market share of the 27.4 million-case tuna market to almost 31%, up from 1980's 29%, despite the increased competition from private label and generic processors, which have increased their total market share to 25% from 17% last year. In contrast, major competitor Chicken of the Sea cut its measured media ad support to $2.8 million in 1981, from $4.5 million in 1980, and saw its market share plunge to 21% from last year's 29%.

Heinz' interest in marketing pilchard, a sardine-family tuna substitute which some industry observers had believed could capture as much as 5% of the $1.3 billion U.S. tuna business by 1984, seems to have waned as a result of the oversupply of tuna.

The cat food business has been the healthiest part of the Star-Kist group, led by canned cat food sales that rose 9% and increased their market share to a dominating 33% of this segment. This growth was spurred by an increase in measured ad support to $4.8 million in 1981, compared with $4.3 million in 1980. Three new sliced meat flavors were introduced last year, and a new premium-price, ultra-gourmet canned cat food, Amore, also was placed in four test markets last winter using an ad theme that it is "more than a cat food—it's love!" Heinz reportedly is ready to roll out Amore this fall.

On the negative side, industry sources say market shares for semimoist and dry cat foods both fell half a point to 8% and 14% shares of their segments, respectively. Measured ad support rose to $1.8 million from $1.4 million. In an effort to capitalize on the growth of larger sizes within the semimoist segment, 9-Lives Soft Moist is expanding a new large 18-oz. size into 50% of the U.S. Ads will continue to stress the product's palatability and convenience using the Muppet-type character "Walter Le Cat" as its spokescat. The 9-Lives dry cat food line introduced a new and improved product that is "basted with real meat juices."

The various 9-Lives dry, semimoist and canned cat food products combine to repesent 18% of all commercially prepared cat food sales, reflecting the fact that dry products represent the bulk of the industry.

Star-Kist's dog snacks entries —Jerky Treats and Meaty Bone dog biscuits—both have seen strong volume growth in the last year. Sales of Meaty Bone, which became available in about half of the U.S. this summer, rose 100%, and the brand's measured media spending in 1981 rose to $967,400, more than three times the $293,100 spent in 1980. Unit volume of Jerky Treats, now nationally distributed, climbed 14%. No ad budgets were available. When combined, the two products accounted for 16% of all dog snack dollar sales in 1981.

Meaty Meal, a meat-coated dry dog food, was moved into upper Midwest test markets in June, 1981, and was supported by $298,900 in measured media in 1981. There has been speculation that Heinz is interested in acquiring another pet food manufacturer and is using Meaty Meal to test opportunities in the dog food market.

Heinz' Ore-Ida brands, which account for 55% of the category's dollar volume, enjoyed sharp increases in measured media support, reaching $9 million in 1981, compared with $7.3 million in 1980. Last year's ad efforts included a new tv campaign aired last fall that featured several celebrity spokesmen, including: Rich Little for Tater Tots; Muhammed Ali for hash browns, and an animated Superman for fries.

The company also expanded its efforts directed at the Hispanic market following the success enjoyed by such programs in test markets. The effort used daytime and nighttime slots in 16 major Hispanic markets around the country. Ore-Ida consumer promotion coupon and refund offers also have been increased significantly, featuring tie-ins with other food companies.

Ore-Ida new products activity included: National expansion of Home-Style potatoes with skins left on, a product designed to tie into the rising consumer interest in natural and wholesome foods; the expansion of Crispy Crowns —a two-item line of formed potatoes in plain and onion flavors —into new markets and toward national distribution, and the beginning of tests of Golden Patties, a new oven-prepared hash brown. An essential part of Ore-Ida's future growth is expected to come as a result of convincing large numbers of housewives to use Ore-Ida's ready-prepared products rather than preparing their own potato dishes from scratch. Company officials indicate that new product introductions and expansions are anticipated to continue, and there has been speculation that products yet to be unveiled may go beyond just potato items to include such things as potato-based casserole dishes.

Heinz also has high hopes for its Gagliardi Bros. operations. Advertising and promotion spending has increased sharply behind the recently completed national rollout of Gagliardi's Steak-umm frozen steak sandwiches, with measured media spending in 1981 totaling $4 million, compared with $1.2 millon in 1980. Sold in 32, 24 and 14-oz. packages, Steak-umm enjoys a 60% share of the market in its New York stronghold. Ads for the products use a "Got a Minute" theme, stressing not only taste and quality, but also the convenince of a product that cooks in 60 seconds.

Earnings	80,362,000	61,955,000
Advertising*	56,516,000	41,300,000

*AA estimate

Hershey Foods Corp., Hershey, Pa., the nation's 86th largest national advertiser, increased its advertising 37% to $56.5 million in 1981, a far cry from its parsimonious media advertising spending habits which underwent a transformation at the turn of the 1970s.

Hershey's was a celebrated advertising holdout for its first seven decades. That changed when its first-ever national ad campaign was launched in 1970. It has increased ad spending at a faster clip than a handful of the other major advertisers. From 1975 to 1980, for example, Hershey ad spending increased at a compounded rate of 34% a year. The 36.8% increase for 1981 speeds the pace, and the more than $15 million it represents is the company's biggest-ever dollar increase in annual ad spending.

Paralleling the ad spending increases have been very solid sales and earning advances. Last year was no exception. Consolidated sales in 1981 were $1.45 billion, up 9% from 1980. Earnings rose 30% to $80.4 million from $62.1 million. Hershey Foods' first-half 1982 sales were a record $704.8 million, up 3.7% from $679.6 in the first six months of 1981. Net income was $42.7 million in the first half, a 20% increase over the same 1981 period. Operating earnings rose 13% in 1982's first six months to $77.2 million from $68.2 million in 1981's first half.

Chocolate is Hershey's most famous line of business, but it's not the only one. In addition to the Hershey Chocolate Co. division, the nation's leading domestic producer of chocolate and cocoa, it operates the Friendly Ice Cream Corp. restaurant chain; the San Giorgio-Skinner Co., a major pasta products producer, and Cory Foods Services, one of the largest purveyors of coffee services in the U.S. and Canada.

Hershey is also expanding internationally. The growing importance of the Canadian market, for example, was recognized last year by the reorganization and transferral of all chocolate and confectionery operations in Canada to the Hershey Canada subsidiary. All non-Canadian activities, meanwhile, were regrouped under a new subsidiary called Hershey International. Ltd. Those activities include operations in Mexico, Brazil and the Philippines, and export activities in Japan.

A major capital improvement project of Hershey's is construction of its new 450,000-sq.-ft. confectionery plant in Stuarts Draft, Va., scheduled to be operational later this year. Hershey executives say the plant, whose total building and equipment costs may approach the $120 million mark, will enable the company to better exploit new product introductions and meet increasing production demands of existing products.

Hershey Chocolate Co., which accounts for approximately 70% of the company's consolidated sales, achieved a sales milestone in 1981. It topped the $1 billion mark in sales for the first time and ended the year at $1.1 billion. The company's principal product groups are bar goods, bagged items, baked ingredients, chocolate drink mixes and dessert toppings. They are marketed under more than 30 brand names and sold in over a million retail outlets.

Six of Hershey's traditional products—Hershey's Milk

Chocolate and Almond bars, Hershey's Kisses, Hershey's syrup, Hershey's chocolate baking chips and Reese's peanut butter cups—account for approximately half of Hershey Chocolate Co. sales.

The traditional Hershey's/Reese's products were the chief contributors to the 1981 sales increase. The Big Block (thicker bars) line, introduced in late 1980, exceeded sales expectations. Hershey's Kisses, meanwhile, have now doubled in sales volume in the last 3½ years.

The special markets group, formed two years ago to concentrate on selling mass-market branded products as gift items and fund-raisers, and on bulk sales to industrial and institutional users, continues to exceed expectations. Sales have doubled in less than three years.

Y&S Candies, acquired in 1977, and whose sales have doubled since then, now has the largest-selling licorice candy line in the U.S.

On the new product front, Hershey began testing New Trail granola bars earlier this year. The introductory ad campaign is targeted to the women's market. Skor, a chocolate-toffee bar under license from AB Marabou of Sweden, and Frostin', a line of ready-to-spread cake frostings, also were introduced in regional test markets. Whatchamacallit, meanwhile, completed its first full year in national distribution, and Reese's Pieces achieved national distribution.

During the 1981 summer, Hershey joined the American Dairy Assn.'s "Dairy Days USA" campaign. In a separate tie-in, Hershey offered a refund for a half-gallon of milk with the purchase of two 24-oz. bottles of Hershey syrup. In the fall, the company gave its Mr. Goodbar brand an expanded promotional push.

Chocolate and confectionery product sales in Canada showed significant gains. New products introduced in just the last three years now account for one-quarter of Hershey's Canadian sales. Those new products include Special Crisp (the Canadian version of Whatchamacallit), Reese's Pieces, Reese's Crunchy peanut butter cups, Y&S Allsorts, Top Scotch, a sundae topping, and Brown Cow, a milk modifier.

Hershey announced in March that it was raising the wholesale price of its standard bars 20% and the weight an average of 28%, resulting in a lower price per ounce for the bars. Some bars were raised in weight as high as 38%. The end result: A marketing standoff and elimination, for the time being, of two-tier prices.

At the same time, Hershey also increased its Big Block bar size while holding the line on its 50-cent price tag.

Hershey has also been trading salvos with M&M in a cash refund effort. Hershey took the offensive by offering coupons totaling $2.75 to customers sending in 22 Hershey wrappers. M&M followed up with an offer of refunds as high as $5 to those sending in 60 wrappers.

Between them, Mars and Hershey share about one-third of the U.S. confectionary market, and about two-thirds of the chocolate business.

Hershey's most heavily advertised products last year were: Hershey's candy bars, receiving more than $7 million in measured media support, 60% above the $4.4 million of measured support the previous year; Reese's candies, $4.6 million; Hershey Chocolate Kisses, $3.7 million; Whatchamacallit, $3.7 million, up more than $1 million from 1980; Hershey chocolate syrup, $3.1 million; Reese's Pieces, $2.9 million; chocolate chips, $2.3 million; Rolo candy, $1.6 million, and Hershey candies, $1.4 million. Hershey's $679,000 measured network radio spending total was focused on two products: $462,000 to Reese's candies and $217,000 to Rolo candy.

Hershey's advertising policy drew kudos from the Coalition for Better Television in July, when it called off its threatened boycott of selected advertisers. The coalition praised Hershey for its ad policy, a policy that rules out advertising on tv programs that "feature or incite excessive violence and antisocial behavior."

At the same time, the coalition also encouraged supporters to buy Hershey products "over those of their competitors." Their statements piqued various advertising association executives. Hershey, meanwhile, acknowledged "flattery" at the Coalition's endorsement, but added that it does not "consciously seek" such endorsements.

Friendly Ice Cream Corp., acquired by Hershey in 1979, continued its "modification program" begun five years ago. The program has repositioned it as an informal family restaurant, rather than a neighborhood ice cream and sandwich shop.

Fifteen new restaurants joined the chain, which at yearend numbered 626. They are located in 16 states in the Northeast and Midwest. The additions were offset by the closing of several of the chain's older restaurants, and the selling of its nine Jim Dandy restaurants.

A major ice cream promotion during the summer of 1981 spurred Friendly's ice cream sales. There were also tv-supported promotions for the chain's new breakfast sandwiches. But perhaps Friendly's biggest marketing success last year was the introduction of a Reese's Pieces Sundae. More than 1 million sundaes sold, making it one of Friendly's most popular sundae ideas ever. Late in the year, several new ice cream pie and cake products were test marketed. In total measured media support, Friendly received approximately $3 million of spot tv advertising last year.

San Giorgio-Skinner, Hershey's pasta division, markets products in approximately 50 major U.S. markets, and consists of four regional pasta companies: San Giorgio Macaroni, Lebanon, Pa.; Delmonico Foods, Louisville; Procino-Rossi Corp., Syracuse; and Skinner Macaroni Co., Omaha. Together, the four regional companies combined to show an over-all 2% sales increase last year, a difficult year for pasta producers.

San Giorgio brand products increased its market share in its markets, according to Hershey officials. Skinner brand products, meanwhile, were expanded into the Iowa market. Several new P&R brand items joined the product lineup, and the Gold Medal brand was repackaged and repositioned as an economy brand in its Southeast markets.

To combat generic brand advances, San Giorgio-Skinner touted its products with a new commercial last year that stressed quality and hammered away at the theme: "It's silly to skimp on pasta."

Cory Food Services had declining sales for a second straight year, attributed to the poor economy. Also hampering Cory's growth is the trend toward decreased per capita coffee consumption in the U.S. To help hold the line on its declining coffee sales, Cory last year added Cory-Lite, a partially decaffeinated coffee. Losses were partially offset by growth in allied lines such as tea, soups and a new line of canned juices that were added last year.

Heublein Inc.

	1981	1980
Sales	$2,050,121,000	$1,921,879,000
Earnings	88,379,000	77,411,000
Advertising*	187,000,000	170,000,000

*AA estimate

Heublein Inc., Farmington, Conn. the 29th largest national advertiser, raised its 1981 advertising budget 10% to $187 million from $170 million in 1980. While the company's measured media spending in newspapers, magazines, spot radio and outdoor advertising dipped below 1980 levels, spending on spot tv and network tv rose well above the previous year's totals.

The largest jump in measured media was in spot tv where Heublein pumped 40% more advertising dollars in 1981 than the previous year, bringing spot tv spending to $29.7 million. Network television spending was increased about 10% over 1980 levels to $33.6 million.

Sales for the food and beverage company climbed 6% in 1981 over 1980 to $2 billion and earnings rose 12% above 1980's $77.4 million to $88.4 million.

Starting with reports for 1983, this picture should change significantly if the proposed $1.3 billion acquisition of Heublein by R.J. Reynolds Industries is ultimately consummated. The merger would give Reynolds, the giant tobacco, grocery products, energy and shipping conglomerate, an even more expanded list of consumer goods. Heublein would be bringing to the deal other grocery products, food service operations, wines and spirits.

The RJR-Heublein combination would also create an advertising force of mammoth proportions.

Based on 1981 levels, RJR-Heublein could be spending more than $500 million a year on advertising, making it the nation's third-largest, behind Procter & Gamble Co. and Sears, Roebuck & Co.

Heublein itself is coming off a year in which it saw sales and operating profits continue to rise in its grocery and restaurant divisions, while they dipped in the spirits and wines division. Heublein's worldwide beverage operations accounted for 61% of corporate revenues and 59% of operating profit in 1981.

Heublein's president Hicks B. Waldron blamed part of the decline in its beverage revenues to the high cost of short-term borrowing, leading wholesalers and retailers to reduce inventories.

Heublein's spirits group, based in Hartford, Conn., markets Smirnoff vodka (the nation's leading vodka seller and said by some industry insiders to be the one product that built Heublein), Popov vodka, Black Velvet Canadian whisky, two lines of cocktails, Harvey's Bristol Cream sherry, Lancers wine, Don Q rum, Jose Cuervo tequila and Arrow cordials.

A sluggish economy and aggressive marketing campaigns by competitors in the spirits category were also blamed for unit sales decline of 7% to 19.5 million cases in 1981.

Changing consumer tastes also figured in the scenario prompting John A. Powers, senior vp, beverage operations, to say the company's strategy for growth is in maintaining heavy advertising and promotion behind key premium brands, especially those in the white liquor category.

A price increase in the domes-

Mary Kerleby

Doing it right? Heublein's Kentucky Fried Chicken had revenues of $386 million in 1981.

tic market in the first half of 1981 on Heublein's Smirnoff vodka was met with an 8% drop in shipments of the spirit, resulting in a promotional pricing campaign in the second half and a new marketing campaign positioning the brand as not only a premium vodka but also one of value. The new campaign broke early in 1982.

As in the U.S., the brand is marketed in other countries with emphasis placed on it being a premium vodka. It apparently has paid off, with sales overseas growing 6% to 5.8 million cases. The strongest foreign markets for the brand are in the United Kingdom, Canada, South Africa, Ireland and Sweden.

Heublein's Black Velvet Canadian whisky was also met with consumer resistance to price increases in early 1981, but a new advertising campaign in the second half, featuring tv's "Dallas'" leading man Larry "J.R." Hagman, helped the brand regain some sales momentum, Mr. Powers said.

There were several new products added to the spirits category portfolio, too, including Jeremiah Weed, a bourbon-based liqueur; Viejo Vergel brandy, a leading spirit brand in Mexico, and Rhum St. James, a superpremium rum from Martinique.

Revenues of the wines division declined 10% to $251.4 million in 1981. Aggressive marketing tactics by competitors and price-conscious consumers were blamed for the downturn. To help combat these negative forces, the company introduced four newly formulated Colony Classic wines and relabeled the entire Colony line to support the company's effort to market the brand as a wine classic. The marketing campaign centered on a $6 million comparative ad drive over the three months of summer in 1981.

Over-all, Heublein is concentrating on developing and promoting its dry table wines—an area where it sees growth potential in the highly competitive domestic wine industry.

Heublein also appointed Young & Rubicam, Los Angeles, in August to its $14 million United Vintners account.

Brands in Heublein's wine stables other than Colony Classic are Inglenook, marketed as a premium brand of wine; Petri wines, marketed as a good value in the lower-price range, and Jacare, the division's premium proprietary wine.

In Heublein's food division, the Kentucky Fried Chicken system in the U.S. continued to make progress in its 775 company-owned stores and the 3,679 franchised stores. Division revenues were up 19% to $385.7 million with average annual sales at company Kentucky Fried Chicken stores up 17% to $427 million. Real sales growth was up 7% compared with 1980's 5% growth.

While poor economic conditions have affected the fast-food industry, including Heublein's KFC system, the company concentrated on building 94 new stores and remodeling 199 older units and on a new campaign based on the "We do chicken right" banner. The fast-food chain also introduced a breast filet chicken sandwich and fries to compete against the entry of other fast-food competitors in the fried chicken market.

In Heublein's grocery products group, revenues climbed 17% to a record $152.9 million with operating profit up about 20% to $21.5 million. In this group, Heublein broke a national tv campaign in 1981 for its A.1. steak sauce that emphasized that it added value to less expensive cuts of beef—considered by the company to be a powerful consumer message in a period of high beef prices. A complementary tv campaign emphasized the use of A.1. as a pour-in ingredient with ground beef. Its Regina wine vinegar also underwent some transformation with the company adding a new flavor and introducing new packaging for the product.

Meanwhile, the proposed R.J. Reynolds-Heublein marriage apparently precludes General Cinema Corp. from continuing its efforts to take over Heublein, efforts Heublein had been rebuffing.

Early this year, General Cinema, an independent soft drink bottler and motion picture exhibitor, disclosed that it had purchased 2.1 million shares of Heublein stock. At a median price of about $35 at the time, the purchase carried an estimated value of $74 million. In addition, General Cinema announced its intention to increase its holdings to more than 15% in Heublein.

As a result, Heublein filed suit against General Cinema, charging that the stock purchases violated federal securities laws. Heublein then went on the offensive by purchasing 380,000 shares of General Cinema stock (about 3.5% of that company's stock).

Heublein paid $14.1 million for General Cinema stock, which sold at the time at $37 a share. Not long after the purchase, Heublein announced it would increase its holdings in General Cinema to more than 15%, and that could rise to as much as 25% to 50%.

In a countermove General Cinema announced its intention to acquire as many as 3 million shares of its own stock—a move some insiders said would make General Cinema invulnerable to a takeover because of the amount of insider holdings in the company. Backing its announcement, General Cinema purchased slightly more than 1 million shares of its own stock.

In early June, General Cinema announced it would stop buying Heublein stock but threatened it would resume its purchases if the companies don't reach an agreement.

Neither company would discuss what such an agreement would be about. General Cinema said it had purchased more than 4 million shares of Heublein's stock at an estimated cost of $159.6 million.

The RJR deal, however, has ended the dogfight.

They're rewriting your commercial!

A Clucas Diagnostic TV Test tells you how. And why. While there's still time to fix it.

Your audience sees what it wants to see, hears what it wants to hear. A Clucas Diagnostic Test session proves this. And 21 of the top 100 national advertisers have turned to Clucas in just the past two years to learn what the audience "thinks it saw"... "thinks it heard" ... **and why.**

Pick your target audience — 100 women 18-60, or a specific target sample, at your option. Using rough or finished material, the Clucas diagnostic technique gives you measures of oral communication, visual communication, audience involvement, and scene-by-scene scores of commercial objectives accomplished ... or not. Then Clucas delivers a summary analysis so you know what went right. What went wrong. And why. With subtle nuances made crystal-clear. That's not all.

Clucas delivers "Bonus Data," too. Product, advertiser and entertainment ratings. Unaided brand recall. All this backed by experience gained from over 2,000 sessions worldwide. More data-per-dollar than other diagnostic techniques can offer.

See for yourself how Clucas works. To arrange a presentation date or to receive the Clucas information package, call Nick Calo at 1-800-543-0450. Or call your nearest Burke client service office. Do it now. **After all, if your audience re-writes your commercial you're entitled to know the results.**

*AA estimate

International Business Machines Corp., Armonk, N.Y., the 98th largest advertiser, raised advertising expenditures 34% in 1981 to $40.7 million from $30.4 million in 1980.

Worldwide sales increased 11% from $26.2 billion in 1980 to $29 billion this past year. However, earnings dropped 7% to $3.3 billion from $3.6 billion in 1980. Foreign operations amounted to $14 billion, up 1.4% from $13.8 billion in 1980. U.S. operations had gross income of $15,088 billion, up 21% over 1980.

IBM's major operations are in the leasing and sale of information handling systems, equipment and services. Products include data processing machines and systems, information distributors, office systems, typewriters, copiers, educational and testing materials, and related services and supplies.

The greatest share of IBM's gross income continues to come from the data processing segment with equipment sales and rentals accounting for 66% in 1981, up 11% from 1980. While U.S. data processing rentals were up 13%, foreign rentals showed a decline.

Maintenance program products, parts and supplies accounted for 17% of gross income, up 20% from 1980. Office products gave 20% and all other segments contributed the rest of total earnings.

IBM reported net income of $1 billion in the second quarter ended June 30, 1982. This compares with $804 million for the same period a year earlier. Second-quarter revenue increased from $6.9 billion in 1981 to $8 billion in 1982.

Profit in the first half of 1982 was up 15% from $1.5 billion to $1.8 billion. In breaking down gross income for the latest quarter, sales account for $3.6 billion, rentals for $2.8 billion and services for $1.6 billion.

In the middle to high power main frame computer market, IBM has 62% of the U.S. market. The IBM 4300 and IBM 8100 have several new models which provide greater flexibility in selecting the right computer power and memory size.

In 1981, IBM began shipment of its 3380, the industry's most advanced computer disk file; the "thin film" head not only reads and writes data at 3 million characters a second but offers the largest information capacity, 2.5 billion characters per disk file.

In comparison to the mid-1950s IBM Ramac 305, the 3380 stores 6,000 times the information per sq. in. and retrieves data 37 times faster.

The new IBM 3081 Group Model K, introduced in 1981, has internal speeds up to 40% faster than current processors along with the densest logic and memory packaging available in the industry.

Also, 1981 heralded the introduction of the Audio Distribution System (ADS) that enables telephone users to record, change, hear and transmit messages.

The IBM Displaywriter now has greater file processing and communications capabilities which allows the merging of text and arithmetic data, thus offering wider flexibility across different IBM office systems.

The new IBM Personal Computer, the company's smallest system, is designed for business, school and home use. It sells for as little as $1,565 but with added accessories can go as high as $6,000.

This system not only brought IBM into the personal computer market in August, 1981, but saw the company launch a new way of selling its low-price products —through outside distributors —while retaining its own sales force to sell its high-price systems. With a more powerful memory than either Apple or Tandy, the current home computer leaders, and the prestige of the company, IBM is expected to get its share of growth from what analysts have predicted as a $5 billion sales market by 1983.

Another small computer introduced in 1981, the IBM System 23/Datamaster was designed to handle a variety of business procedures for small companies or department functions in large corporations.

International Data Corp. places IBM's 1981 share of market for Desktop computers, which includes personal computers, at 7%. Share of market for other desktop computer marketers is: Apple with 21%, Tandy with 20%, Commodore Business Machines 12%, Atari Computer division 10%, and Texas Instruments 6%.

New marketing approaches signaled the opening of 21 IBM retail product centers for office machines and small systems—making a total of 13 retailers in the U.S. and 20 in other countries. Personal computers were sold through IBM Product Centers, ComputerLand, Sears, Roebuck & Co., and business machine stores.

In addition, IBM expanded sales to other manufacturers and also began marketing its model 3101 display terminal and a new desk-top printer through distributors.

In conjunction with the changes in the distribution of products, there was major realignment of IBM worldwide marketing structures. All marketing and service operations in the U.S. now report to the Information Systems Group headed by Clarence B. Rogers Jr., vp and group executive.

All U.S. product development and manufacturing operations report to either the Information Systems and Technology Group or the Informations Systems and Communications Group. The former General Business Group/International division, its marketing services and manufacturing is being consolidated into two groups: Americas/Far East Corp. and Europe/Middle East/Africa Corp.

At the end of 1981 Satellite Business Systems (SBS), a partnership formed by subsidiaries of the Aetna Casualty & Surety Co., COMSAT General Corp. and IBM, had 60 earth stations and seven customer networks installed—including one for IBM. The second satellite for domestic U.S. communications systems entered commercial service in early 1982.

SBS has applied to the U.S Federal Communications Commission for authority to provide international common carrier services which would permit their U.S. customers to interconnect with SBS subsidiaries and British Telecom customers in the United Kingdom.

The services would include computer data communication, electronic mail, video teleconferencing and facsimile transmission.

SBS is negotiating with the Canadian government and Canadian common carriers to use SBS satellites between the U.S. and Canada.

Science Research Associates (SRA), IBM's educational publishing subsidiary, developed three software programs for the new IBM Personal Computer. The "educational courseware" is suitable for home or school and provides computer drill and arithmetic instruction.

Science Research Associates and IBM Instruments are no longer handled by a specific advertising agency.

In 1981 IBM sponsored a rerun of the tv special "IBM Presents Baryshnikov on Broadway." IBM also underwrote the sixth annual Van Cliburn International Piano Competition on PBS. Tune-in print ads promoting these programs ran in magazines and major newspapers.

A 10-month exhibition of French sculptor Auguste Rodin was sponsored at the National Gallery of Art in Washington with a grant from IBM.

The Federal Systems division launched a series of authoritative ads, created by Marstellar in late 1981 aimed at the Pentagon and based on historical events pertaining specifically to military detail.

"How much does it cost not to own one?" was Doyle Dane Bernbach's challenging headline for IBM's electronic typewriters, which dominated the field until 1980 when Smith-Corona introduced its new Typetronic at a price of $900.

Measured media spending for electronic typewriters increased negligibly from $529,000 in 1980 to $676,000 in 1981.

Measured media spending for Selectric typewriters dropped dramatically in 1981 to $1.1 million, a 67% fall from the $3.5 million spent in 1980—from 16% of total media expenditures in 1980 to 4% in 1981.

In the electric typewriter market, IBM has a market share of 90% of 600 million units sold in 1981. Share of market for electronic tyewriters is 45% of 450 million units. Combined electric and electronic is 75% to 80% share of market.

Doyle Dane Bernbach's print campaign in early 1981 for the Minolta-made IBM Executive copier was not only the heaviest ever launched for another maker's product but the only campaign ever launched for another marketers product.

In the plain paper copier category, IBM had 8% to 10% market share in 1981. Xerox Corp. had 45%, Savin had 10% to 12% and Kodak about 9%.

Measured media expenditures for copiers declined in 1981 to $1.9 million from $2 million spent in 1980; measured media outlay for copiers dropped from 9% to 7% of total expenditures.

IBM computer services had the greatest share of measured media dollars with 27%, a drop from a 30% share in 1980. This is a 14% increase in media expenditures from $6.8 million in 1980 to $7.7 million in 1981.

IBM's second-highest measured media expenditures in 1981 were for Displaywriter Systems at $3.4 million, up from $161,000 in 1980—12% of total measured media expenditures with $2.9 million in network tv.

Media expenditures for the general systems division was $1.7 million, up 149% from $704,000 in 1980—6% of the measured media yearly total.

IBM general promotion declined 10% from $5.1 in 1980 to $5 million in 1981—a drop from 22% to 18% of the total media expenditures.

Total media expenditures were up in 1981 by 22.4% with print media showing the greatest gains: Newspapers jumped 55% and magazines increased a whopping 51.9%. Network television rose 4.6%, spot tv declined 80% and radio climbed 20%, all adding up to the 31.2% increase in 1981 total measured media expenditures.

**AA estimate
†Restated

International Telephone & Telegraph Corp., New York, maintained its advertising spending level in 1981, spending $153 million to rank as the 38th largest national advertiser.

Worldwide sales and revenues, including ITT's insurance/finance group, fell $6 million to $23.2 billion. The company attributes the decline to two factors: The foreign currency translation impact of a stronger dollar and divestiture of several units which reduced the sales base.

ITT reported first-half 1982 earnings of $312.3 million, down 1.8% from $318.2 million during the same period of 1981. The lower earnings came on a 1.7% drop in sales and revenues, from $11.3 billion in the first six months of 1981 to $11.1 billion in the same 1982 period.

Excluding insurance and finance, whose revenues rose from $5.3 billion to $5.9 billion in 1981, the company's sales dropped in its four remaining groups—telecommunications/electronics, which had sales of $6.7 billion compared with $7.1 billion in 1980; engineered products, which decreased from $6.2 billion to $5.8 billion; consumer products and services, down from $3.8 billion to $3.7 billion, and natural resources, down from nearly $1.4 billion to more than $1.1 billion. In terms of net income, insurance and telecommunications led the groups, followed by consumer products, engineered products and natural resources.

Within ITT's consumer products group, which includes food, consumer appliances, hotels and "other" (*e.g.*, publishing, lawn and garden care, land development), food represented sales of $1.7 billion and appliances accounted for $711 million in volume. Hotels and "other" totaled $1.2 billion in sales in 1981. Food and appliances posted slight declines from 1980 levels, reflecting the sale of several units, principally Continental Baking Co.'s Morton Frozen Foods, Gwaltney and ITT Continental Kitchens divisions.

Among ITT's consumer properties, Continental Baking Co. garnered the greatest share of measured ad spending. This division sold 25 million loaves of Wonder and other brand breads weekly in 1981, according to the company. Wonder ranks first in bread sales nationally; Continental's Hostess brand continues to be a leader in snacks.

Over-all, branded breads tallied $14 million in measured media spending last year. Wonder's share in that was $7.6 million, followed by Home Pride at $5.9 million. Braun topped the remaining brands with $498,900 in measured media outlays, while Fresh & Natural spent $84,300. Network and spot television were the major advertising vehicles.

In baked goods, Continental spent roughly $1.2 million in combined measured media allocations last year. Home Pride bakery products accounted for $716,700 of that, followed by Town Talk with $301,300 and Continental Bakery products with $186,500.

ITT Continental hopes to increase its position in the wheat bread market by testing and expanding its new Wonder Family Wheat to the majority of its bakeries. Additionally, distribution of its Beefsteak Rye bread has been broadened to other bakeries, sparked by the switch to a resealable bag.

Hostess products budgeted more than $10 million in media last year in support of Snack Cake and Breakfast Bake Shop lines. Baked goods were allotted $8.9 million of measured media spending, while cakes received $1.2 million.

C&C Beverages, which earlier this year was sold to Consolidated Foods Corp., was budgeted for $1.1 million in measured ad spending in 1981. The soft drink unit spent $1.8 million in 1980, a year of discounting within the industry that did much to erode or stifle market shares of smaller companies.

In the retail lawn and garden products field, the Scott and Burpee operations spent a combined $9 million-plus in spring/summer 1981, with Burpee accounting for $1 million of the total. Turf Builder was the most heavily backed Scott brand at nearly $3.2 million, followed by Plus 2 with $1 million.

The Scott unit attributed part of its record 1981 sales and profits to its own "Lawn Care" magazine, mailed to 1.6 million homes yearly. The company, which last year handled almost 500,000 direct consumer requests with its "Hotline" and mail efforts, has expanded its computerized custom lawn program in two-thirds of the U.S.

In publishing, ITT's Bobbs-Merrill, publishers of how-to books primarily, received $50,400 in measured media spending, all used in magazine advertising.

The Hartford Insurance Group, with a total measured ad budget of about $4 million, is responding to the current difficult economy with a more hard-sell, product-oriented ad focus. Its new consumer ads feature interviews with key Hartford business managers discussing ways the company can help reduce insurance costs.

Additionally, the Hartford has been using a more targeted advertising approach to support specific product sales in key markets. The bulk of the company's advertising appears in business and newsweekly publications including the *Wall Street Journal, Time, Business Week, U.S. News & World Report* and *Newsweek*.

With the introduction of "Universal Life" insurance to Hartford Life Insurance Co. in May, 1981, the company adopted an ad campaign using the copy theme, "The Solution." The series features testimonials from financially sophisticated people who have purchased the product, described by ITT as a policy which offers permanent protection while providing attractive interest rates on cash values. The company put $253,000 in measured media spending behind Hartford Life Insurance last year.

Boston-based Sheraton Hotels spent nearly $9 million in media for national corporate advertising last year. Taking into account the owned, franchised and operated hotel properties, the hotel chain estimated its total advertising last year came closer to $35 million in the U.S.; international came to $2.2 million.

The Sheraton chain, which operates or franchises 430 hotels in 50 countries, says it served more than 20 million guests worldwide in 1981.

In telecommunications and electronics, ITT's U.S. Transmission Systems unit took its City-Call long distance telephone service to the retail level last year, testing it in 21 Sears stores in Miami and Washington. The company hoped to measure whether the over-the-counter selling approach might be more effective in reaching mass audiences than conventional direct-mail and telephone solicitation. Excluding American Telephone & Telegraph's position in the long-distance calling market, City-Call reportedly holds less than a 10% share; MCI Communications Corp. dominates with roughly 67% of the market not served by AT&T.

The City-Call service received $20,300 in measured ad spending in 1981, all targeted at spot television. In other areas, ITT's Ultra 80 Telephones were given $203,000 worth of support in magazine advertising.

ITT announced in late 1981 its interest in selling the Rayonier forest products unit, but the division remains a stubborn link in the corporation's chain of proposed divestitures. In terms of measured ad spending last year, fibers for apparel claimed a total of $152,100, all put toward newspaper supplements.

ITT continues to value image advertising at the corporate level, for reasons of identification and reputation, and will spend roughly $10 million toward this end in 1982. Some ads are designed to clear up confusion between ITT and AT&T; others are seen as image boosters for the conglomerate. In general, ads dramatize ITT's role in the lives of average consumers, a tack that supports the company slogan, "The best ideas are the ideas that help people."

Much of ITT's corporate advertising includes sponsorship of television specials, including "Little Lord Fauntleroy" and "Leave 'Em Laughing" in 1981, and "Oliver Twist" in March of this year, all broadcast on CBS-TV. According to Paul Jannuzzo, director of corporate advertising and sales promotion, "Twelve minutes of commercial tv better enables us to offer a complete view of the corporation than a single spot in a scatter plan program." And, with the company's choice of television specials, "we have an opportunity to associate with good family programing."

In a move which follows a number of corporate divestitures in the past few years, ITT agreed early in July of this year to sell its French subsidiaries, Compagnie Generale de Constructions Telephoniques (CGCT) and Laboratoire Central de Telecommunications, to the French government for a reported $50 million.

Johnson & Johnson

	1981	1980
Sales.....	$3,025,900,000	$2,633,600,000
Earnings.....	262,200,000	184,600,000
Advertising*.	195,000,000	177,000,000

*AA estimate

Johnson & Johnson, New Brunswick, N.J., the 23rd largest national advertiser, is estimated to have increased U.S. advertising 10% to $195 million in 1981. After failing to get on the elastic-leg diaper bandwagon and watching its market share plunge from 12% to 8% during the last six months of 1980, J&J withdrew its disposable diaper from the $1 billion U.S. market early last year and conceded the field to rivals Procter & Gamble and Kimberly-Clark. The company, which took a $16 million write-off against first-quarter net earnings, will continue in its still-growing international diaper business.

U.S. sales for J&J rose 14.9% over 1980 to $3.03 billion in 1981, with earnings up 42% to $262.2 million, due in large part to strong performances by the company's consumer, pharmaceutical and professional businesses. For the first three months of 1982, U.S. sales were up 9.3% over the same period in 1981, while earnings soared 43%.

J&J worldwide advertising climbed 15.9% to $270.6 million in 1981, up from $233.5 million in 1980. Consolidated world sales tallied $5.4 billion, an increase of 11.6% over 1980, with earnings rising 16.7% to $467.6 million. For the first quarter of 1982, worldwide sales were up 8.7% and earnings rose 28.4% over the comparable period in 1981.

Johnson & Johnson, which operates as a group of decentralized companies, has deliberately shed its baby-products-only image while becoming the world's most diversified health-care company. Today J&J leads the world in painkillers and feminine hygiene; it dominates the home bandage market, and is the largest manufacturer of contraceptives in the U.S.

Consumer products continue to be Johnson & Johnson's largest business segment, representing 43.8% of total segment. Consumer products consist of toiletries and hygiene products, including babycare items, first-aid products and nonprescription drugs. Major brands include Tylenol analgesic (and CoTylenol cold medication); Johnson's baby powder, oil, lotion and shampoo; Stayfree, Carefree, Sure & Natural and o.b. feminine hygiene products; Band-Aid adhesive bandages; Reach toothbrushes and Ortho and Conceptrol contraceptive products.

J&J channeled 76% of its measured media expenditure into tv in 1981, trailed by magazines (17%), newspapers (13.5%) and radio (3%).

McNeil Consumer Products Co.'s Tylenol brand (including CoTylenol) continues to get the lion's share of J&J's measured advertising, with support for the country's leading analgesic (and best-selling product in American drugstores) reaching $42.9 million in 1981, up 28.5% over 1980.

Tylenol's seemingly unstoppable growth in the $1.2 billion analgesics market ($385 million of which is Tylenol sales) has left its weaker aspirin-based competitors scurrying to find new positioning. Sterling Drug, for one, ended up in court last year when McNeil accused it of false and deceptive advertising in a recent Bayer aspirin campaign.

Bayer ads claimed analgesic parity between Bayer, which contains 325mg of aspirin, and Extra-Strength Tylenol, which contains 500mg of acetaminophen. One offending tv commercial, by SSC&B, referred to a new, unpublished study "showing the amount of pain reliever in Extra-Strength Tylenol is no more effective for headaches than Bayer aspirin. . .Why pay for extra medicine?"

McNeil has spent considerable time fighting competitors' advertising in courts in recent years, its most drawn-out battle being with American Home Products, whose claims for Anacin have been the target of several McNeil lawsuits.

Recent share estimates (1981) give Tylenol (including extra-strength and children's) in excess of 32% of the market, with AHP's Anacin at 12.3%, Sterling Drug's Bayer's at 8.5%, Bristol-Myers' Bufferin at 7.3% and B-M's Excedrin between 7% and 8%.

In 1980, Extra-Strength Tylenol (tablets, capsules and liquid) replaced regular-strength Tylenol as the leading pain reliever and now holds about a 20% market share.

Measured support for the extra-strength entry climbed to $211.5 million in 1981 (up from $17.7 million in 1980), with $18.3 million going into network tv. Measured spending for regular Tylenol was approximately $9.7 million, and Children's Tylenol (tablets and drops) received $5.1 million (up from $3.3 million in 1980).

A new addition to the Tylenol line in 1981 was a "personal size" tube, containing 12 tablets of regular or Extra-Strength Tylenol, which was backed last year with trade ad support.

Already a presence in the cold-remedy market with its CoTylenol tablets and liquid in both adult and child strength (backed by $6.1 million in 1981). McNeil is determined to take a larger piece of the slow-growing (3% per year), $1.2 billion national pie. In various stages of testing are Duonex day and nighttime capsules, backed by $30,200 in spot tv last year, and new Coldmax maximum-strength, multisymptom tablets, backed by $122,700 in spot tv.

McNeil's entry in the sinus remedy category, Sine-Aid sinus

sweep! stakes, plus

SWEEPSTAKES AND GAMES: THE TIP OF THE ICEBERG.

Because there's more to sales promotion than sweepstakes and games, at Don Jagoda Associates we do more than just create and execute sweepstakes and games.

re'bates

We work with advertisers and their agencies on planning and administering refund/rebate offers. We screen and verify all responses, very painstakingly, and return cash or coupons according to the terms of the offer. We're very careful when it comes to handling other people's money.

in·cen'tives

Because we know sometimes it takes more than money to motivate sales people, brokers, distributors and dealers, we help create and implement incentive programs. We know where and how to buy the prizes that will help increase sales, within budget.

pre'mi·ums

Looking for premiums or self-liquidators? We can help you there too. Our premium buyers shop the world looking for the right items to produce the right responses.

ful·fill'ment

And, with our ever expanding facilities, we have streamlined and expanded our capabilities for fulfillment. Getting the right merchandise to the right person on time, intact, is as important as getting people to respond to your offer.

sweep'stakes

Finally, if you decide to get involved in sweepstakes and games, the most visible tip of the promotional iceberg (in five years, sweeps have almost tripled in number), our more than 21 years of experience can be invaluable. We'll help you conceptualize, administer and—through our National Judging Institute—judge your promotion. We go out of our way to help our clients avoid the myriad pitfalls that can befall the unwary promoter.

When it comes to promotion, whether it's the very visible type or the not so visible but very effective nitty gritty variety, you have our number.

tablets (with acetaminophen), garnered $3.6 million in measured support last year, all in tv. In addition, McNeil expanded Maximum-Strength Tylenol sinus medication into Chicago, Cincinnati and St. Louis, after year-long controlled-store testing.

Feminine hygiene products, marketed by the Personal Products Co., received $40.3 million of J&J's measured ad expenditure, or 32% of the total. Market leader Stayfree (mini and maxipads) garnered $17.3 million in measured support ($12.8 million in network tv and $3.6 million in magazines), making it J&J's No. 2 brand spender behind Tylenol. Spending for Carefree panty shields reached $10.5 million, way up from the $5.9 million spent in 1980.

After an out-of-court settlement with J&J last October, Tampax Inc. agreed to drop its claim that its new "Maxithins can protect better than maxipads" and no longer compares its pad to "the leading maxipad" in newspaper ads.

Already holding well over half of the sanitary napkin market with its Stayfree, Carefree and Modess brands, J&J introduced superthin Sure & Natural maxishields in 1980, touting the new pad's "full-size protection." In its second year on the market, Sure & Natural received $8.7 million in ad support ($6.9 million) in network tv and $1.8 million in magazines).

It remains to be seen how J&J's digitally-inserted o.b. tampon will fare after the final results of the toxic shock syndrome scare are in. While it does not contain the ingredient that forced P&G's Rely off the shelves, many women have shied away from tampon use in general. Though o.b. is the leading tampon outside the U.S., it has never quite caught on here; analysts feel its share potential is at best 10%. Spending for the brand declined further in 1980.

J&J's Assure "natural fit" tampon, a more mainline entry with tubal application, has yet to make it out of test market, with dipping support ($200,500 in 1981, $447,000 in 1980) confined to magazines and spot tv.

Personal Products Co. is expanding its testing of Take-Off makeup remover cloths. Spending for the new entry in 1981 was $242,900 (in magazines and spot tv), with 1982 spending expected to reach a national rate of $8 million. Established Shower to Shower deodorant body powder received $1.1 million in measured support last year.

Ad spending by J&J's Baby Products Co. declined 36% to $20.2 million, from $31.8 million in 1980, representing only 16% of the company's total measured ad expenditure. One major reason for the decline was J&J's exit from the U.S. disposable diaper market during the first quarter. After reaching a high of 20% five years ago, Johnson's diaper fell to less than 8%. P&G, already the market leader with Pampers at 59%, was toting up a staggering 70% of the market (including elastic-leg Luvs) and Kimberly-Clark, after bombing with Kimbies, was sitting pretty in Huggies 17%. Nonetheless, J&J has not shut the door on diapers in the U.S. and promises to "dedicate substantial research and development toward new and improved diaper products."

Mary Herlehy

J&J's Tylenol dominates the analgesic market.

Spending for Johnson's baby lotion, oil, shampoo and powder (all leaders in their categories)—fell 21.6%, from $20.9 million in 1980 to $16.4 million in 1981. Ads continued to aim at an expanded market, pitching to both male and female adults as well as babies. The big spender in the group, Johnson's baby shampoo, declined from $9.5 million in 1980 to $7.2 million in 1981; likewise, spending for Johnson's baby powder dropped from $7 million in 1980 to $4.3 million in 1981. Spending for a newer powder product, Johnson's corn starch baby powder without talc, also declined, from $1.4 million 1980 to $651,900 in 1981, probably due to an over-all decline in powder use among parents.

Last summer, J&J ran radio spots in selected markets promoting its original baby powder as a "personal air conditioner." Follow-up print ads stated, "Share that cool, dry, comfortable feeling only Johnson's baby powder can give."

Spending for Johnson's baby oil remained steady at $2.7 million, while support for Johnson's baby lotion showed a healthy 47% gain, from $1.5 million in 1980 to $2.2 million last year. Both products were subjects in a suit filed by J&J against Carter-Wallace, charging that false advertising for C-W's Nair depilatory had damaged sales of J&J's oil and lotion.

Late last year, a federal district court issued an injunction to prevent Carter-Wallace from emphasizing Nair's baby oil ingredient in "any advertising medium or packaging in such a fashion that the consumer would perceive that the baby oil ingredient alone was the cause of Nair with baby oil's softer and smoother effect."

Recently introduced baby products—Johnson's baby bar soap, baby bath, baby bathing sponges and baby wash cloths which went national—showed dwindling support, garnering a total expenditure of $810,300 in 1981. Only established No More Tangles creme rinse got an increase in ad support, from $247,700 in 1980 to $335,900 in 1981. One baby product area showing increased interest is toys. Joining J&J Playpath Playthings (introduced in 1979) last year were J&J Child Development Toys ($375,500 in magazines and spot tv) and J&J Unforgettable Toys ($355,200 in magazines).

In the healthcare division of J&J Products Co., Reach toothbrushes unseated the Band-Aid brand as the top product spender, garnering $6.3 million in measured media support in 1981, way up from the $4.4 spent in 1980. Last year, Reach emerged as the largest-selling toothbrush in the U.S. and is now marketed in 31 countries overseas. In addition, J&J planned to spend $9 million backing new Reach Plus toothbrush, with a longer, narrower brush head, less slanted and with more bristles.

After only token spending for its line of dental flossses in recent years, J&J launched a two-pronged advertising campaign last year and backed it with $2 million.

Band-Aid bandages (including first-aid product group ads) received $3.6 million in measured media support in 1981. Spending for the brand was down from $4.3 million in 1980, but is likely to increase significantly again in 1982 due to the introduction of two new adhesive bandages—one made of mesh fiber and another with flexible fabric—that are getting $17.5 million in ad support.

J&J also introduced Band-Aid Kitchen Assortment, a package of bandages of unusual shapes to fit hard-to-adhere places where cuts often occur, like fingertips and knuckles. The company predicts all its new bandages will capture more than 40% of the market. The original Band-Aid already holds over 50%. Ads for J&J's first-aid products ran last summer in Sunday supplements, offering money-off coupons and free first-aid kits for proofs of purchase. Capitalizing on its reputation as "the first name in first aid" (with Band-Aid), J&J introduced early this year a new three-item topical treatment line. Clinicydin (anti-infection), Clinicaine (painkiller) and Clinicort (anti-itch and rash) are being promoted as "all you'll ever need to treat 95% of your first-aid needs." The line is getting a $4 million ad effort.

J&J spent almost $2 million to support its Sundown sunscreen, the category's No. 1 national best seller, up from the $1.25 million spent in 1980. Sundown's market share increased from 21% to 23% of the $75 million sunscreen segment, which continues to pick up share against tanning products. Last year sunscreens chalked up a 15% growth rate, while tanning products were up 12%. The over-all suncare market is worth about $225 million. Last year J&J expanded its Sundown line with a water-resistant version with a protection factor of 15. This summer's theme for the line is, "Don't go out till Sundown."

Ortho Pharmaceutical, the largest U.S. manufacturer of contraceptives, has in recent years extended its role in the nonprescription area. In addition to moving its over-the-counter items into nondrug outlets, it formed in 1980 a separate sales force for consumer products. Total spending for Conceptrol (contraceptive gel and prophylactics), Delfen vaginal foam, new Gynol II contraceptive jelly, Intercept contraceptive inserts, and Ortho Personal Lubricant was $1.6 million (down from $2 million in 1980), all in magazines. The newest Ortho product, Daisy 2 home pregnancy test kit, was acquired late last year from Bio-Dynamics, Indianapolis.

S.C. Johnson & Son

	1981	1980
Sales	$2,000,000,000	$1,800,000,000
Advertising*	66,560,000	51,411,600

*AA Estimate

S.C. Johnson & Son, Racine, Wis., was the 79th largest national advertiser in 1981. In an effort to remain competitive with its domestic consumer product businesses, it hiked its ad budget approximately 29% to $66.6 million.

Johnson is privately held and does not reveal sales and earnings. Worldwide sales for 1981 are estimated at $2 billion, with domestic sales accounting for approximately 40%, or $800 million.

Founded in 1866 as a marketer of wood flooring, Johnson built its reputation on floor and furniture care products and subsequently branched into insecticides, automotive products, air fresheners, laundry products and other household cleaners.

As many of these categories reached maturity, Johnson began to explore other avenues of growth, and in 1977 established a personal care division. The company since has launched three major brands in an attempt to establish a presence in that field.

Although it emphasizes its commitment to this relatively new venture, Johnson continually is seeking other opportunities. In 1981, the company quietly began to investigate the over-the-counter drug business. While it stresses that such activity is "strictly exploratory," Johnson has hired a consultant to assess options for entry—both by acquisition and internal product development.

In 1981, Johnson concentrated much of its attention on shoring up and extending existing product lines. It appears to be determined to cut its losses on less successful brands by eliminating media support.

In 1981, the company moved deeper into the personal care business by entering the $490 million hand and body lotion category with the September launch of Soft Sense Skin Lotion. Originally touted for its greaseless qualities, with the ad theme "All you feel is soft," Soft Sense positioning shifted more to the therapeutic side of the category earlier this year with a new "Healin' Feelin' " campaign. The company, which told the trade it would spend a total of $17 million in advertising and promotion during the six-month introductory period, spent $2.4 million in measured media in the last few months of 1981.

By mid-1982, Soft Sense had reached a 7% share, which the company claims is on target. Its entry coincided with the launch of Vaseline Dermatology Formula from Chesebrough-Pond's and Jergens Aloe & Lanolin lotion from Andrew Jergens Co. Jergens has a 15% share for all products combined, and Chesebrough has 25%.

Also in mid-1981, the company launched Enhance Shampoo as a companion to the year-old Enhance Conditioner. Targeted at women aged 25 to 34, the brand originally was positioned to "moisturize overworked hair." Whether it was an unclear definition or the competitive nature of the category, the brand has not lived up to company expectations and is being restaged. In mid-1982, the shampoo had a 1% share; the conditioner had 3%, down slightly from a year earlier.

In measured media, the company spent $3.3 million on the conditioner, down 25% from the previous year. It spent $1.5 million on the shampoo alone, and $1.3 million on the products combined.

Johnson increased support for its Agree brand. It hiked spending on the shampoo 26%, to $4.6 million, and on the conditioner 47%, to $5.3 million. It doubled spending on the products combined to $1.1 million. Also introduced was Agree Intensive, a five-minute deep conditioner, with $1.6 million in measured media. However, that segment of the conditioning category is thought to be limited.

Agree was given a facelift with a new campaign, "Escape the Greasies," designed to give it a "younger, hipper image." Although the new push helped the brand initially, its share leveled off. In mid-1982, the conditioner had a 4.7% share, down from an alltime high of 18%, and the shampoo, once with a 6% share, was down to 2.4%.

Also in haircare, the company briefly test marketed Achieve, a conditioning shampoo, in Tucson and Lexington.

Edge shaving gel continued to perform well for Johnson. With a 13% share, that product is second to Gillette Foamy (20%) in the men's shaving preparation category.

In floorcare, Johnson increased the advertising support slightly on its major cleaners. Brite, its entry in the no-wax floor segment, was backed with $3.6 million, a 4% increase from 1980, the year it was introduced. Although Brite initially appeared to have great potential, outperforming Lehn & Fink's Perk and Airwick Industries' Shine Guard (which were introduced at the same time), the product is considered only a "moderate success" by the company, and its share has leveled off at 8.5%. Meanwhile, Shine Guard has been withdrawn, and Perk has achieved an 11.6% share.

Brite's poor performance is attributed to the repositioning of existing brands for use on no-wax floors. Indeed, Johnson's Step Saver and Future are no exception. Both were restaged for that application in 1981, and are doing well. Step Saver has a 10.5% share, up slightly from a year earlier, and Future has 21%, up from 19%. Spending on Step Saver was $2 million, up 147%. The company backed Future with $3.3 million, up 43%.

Altogether, Johnson holds 50% of the category. Klear and Glo Coat continue to decline.

In furniture care, the company has a combined share of 54%. Pledge increased its market share from 35% to 41%. It was backed with $4.45 million, down 15%. Favor, which is not supported with media advertising, had a 4% share, down from 6%. Complete, introduced in 1980, was down from an 8% to a 4% share. Spending was cut 83%, to $446,000.

Shout laundry soil and stain remover, introduced in liquid form in 1980, was hurt by the introduction of Clorox Pre-Wash. Its share was down to 23% from 32%, and the new Clorox product won a 22.3% share. Texize's Spray 'n Wash continued to lead the market, with 49%. Johnson put nearly all of its media budget behind the liquid version, increasing spending 32% to $3 million. A Shout bleach was removed from test market.

The company continued to strengthen its Raid line. Over-all spending was increased 27% to $7.4 million in 1981. Raid crack & crevice spray, introduced in 1980, has done well, according to the company; spending was down 11% to $1.37 million.

Johnson also introduced Raid tomato and vegetable fogger nationally, and Raid Gypsy Moth and Japanese Beetle Killer in Northeast regions where that problem is severe. The Raid line is receiving more of a challenge this year as Texize revamps its acquired No Pest line, once belonging to Shell. Johnson has 48% of the insecticide market.

Off! continued to dominate the insect repellent market with a 78% share. Its major competition, Cutter Laboratories' Cutter line, was down slightly. Measured media spending for the line was $830,000, up slightly from a year earlier.

Johnson also dominates the aerosol air freshener business with Glade, which has a 47.5% share of that segment. Glade Solid holds an 11% share of that part of the category. The company spends minimally on that brand, investing $287,000 in measured media in 1981, an increase of 187%. Johnson is testing Glade Strips in Tucson and Toledo.

In other products, Johnson appears to be disappointed with Befresh! toilet bowl freshener, introduced with high expectations in 1980. Spending was $670,000, down 60% from a year earlier. The subsegment, the company explains, was not as large as initially anticipated.

Spending on the J/Wax car care line was $990,000, up 70%. The company put responsibility for the manufacturing, marketing and distribution of the line under the management of its Northern Laboratories subsidiary, and in mid-1982 switched the J/Wax account to G.M. Feldman & Co. from Foote, Cone & Belding.

In mid-1981, the company formed a Creative Arts division to manage its Creative Arts and Paternayan Bros. and Elsa Williams subsidiaries. It assigned that account to Warren & Epstein, New York.

In a trademark infringement suit brought against Johnson by Chesebrough-Pond's over the use of the word "Intensive" in the Agree Intensive hair treatment, a Federal judge ruled that Johnson did not infringe on Chesebrough's rights.

Johnson's Worldwide Innochem Operations consist of a commercial products group and a specialty chemicals group.

The commercial products group includes categories such as floor care, cleaning and disinfecting, air care, carpet care, furniture care and pesticides. The specialty chemicals group includes areas such as metalworking, special coatings, polymers and specialized chemicals for the graphic arts industry.

In the spring of 1982, Alfred Aragona, who had joined the company less than a year earlier, resigned as senior vp-marketing and sales. His marketing responsibilities were given to Laurance Newman, previously vp-regional director of commercial products for the company's Pacific and Far East divisions. The sales responsibilities went to David Henry, vp-U.S. Consumer Product Sales.

*Revised
**AA estimate

K mart Corp., Troy, Mich., the nation's sixth largest advertiser, found itself increasingly challenged in 1981 in the race to catch up with Sears, Roebuck & Co. K mart still lags far behind the $27 billion-plus No. 1 retailer, with 1981 sales of $16.53 billion, a 16.5% increase over 1980. The high cost of operations brought 1981 earnings to $220.3 million, a 15.4% decline from 1980. K mart's major playing card in the game to catch Sears is its increased ad budget. It boosted ad spending to $349.6 million in 1981, a 9% increase over 1980's $319.3 million, and K mart expects its 1982 ad budget will exceed $400 million.

The most dramatic increase occured in network tv spending. In 1981, the discount store marketer spent $11.8 million, a 100% jump from the previous year's $5.06 million in network tv. K mart also increased spending for spot tv, up to $22.8 million from last year's $18.5 million. Magazine expenditure was cut by $1.6 million. K mart's newspaper advertising budget, which is prepared and handled in-house and placed locally, is included in AA's unmeasured figure of $287.3 million. There has been some speculation that the company will move $15 million of its business from Ross Roy to Campbell-Ewald.

Despite the 171 new K marts opened in 1981, the company is planning on slower expansion, and will instead focus its resources on upgrading and refurbishing units. Only 250 new stores are planned for the next four years.

During 1981 alone, K mart revamped 463 of its more than 2,000 stores. During 1982, the company will continue its efforts to upgrade K mart's image, remodeling all its apparel departments. Additionally, the company will expand its home improvement departments in order to capture a larger share of the do-it-yourself home improvement market.

K mart is also trying to put more quality name brands in its stores and advertising. Such designer labels as Sergio Valente, Calvin Klein and Sasson can be found sprinkled through K mart stores cross-country. This merchandise is sold at discounted prices, providing the image of quality for less.

In a major move by its apparel division, K mart Apparel, a wholly owned domestic retail subsidiary which operates the women's ready-to-wear departments in all of its U.S. stores, K mart is expected to spend $4 million advertising its Jonathan Logan line of women's sportswear.

K mart hopes, said Howard Chalk, managing director of fashion agency Chalk, Nissen, Hanft, New York, to "capture a larger share of the softgoods business and capitalize on the tremendous traffic it has in its stores to begin with. This is a move toward carrying more well-known brands and higher level brands in softgoods [for K mart]."

By spending $4 million on advertising a single brand, K mart's ad budget for women's apparel for 1982 will be substantially increased from 1981 expenditures of almost $2 million. The first flight of tv, radio, some fashion magazine advertising and newspaper supplements began in August.

Other divisions of the company include K mart Canada Ltd., which is a wholly owned subsidiary operating the company's Canadian stores, Kresge stores and the Jupiter chain, the company's limited-line small discount stores. The latter was cut by 13 units in 1981, bringing the total to 69 stores in the U.S., Canada and Puerto Rico. K mart has been keeping a watchful eye on the Kresge chain, and eliminated 25 failing stores in 1981. There are 250 Kresge stores in the U.S. and Canada.

Furr's Cafeterias, a subsidiary of K mart, consists of a chain of cafeterias in the southwestern U.S. In 1981, the company announced it would begin to increase the number of restaurants, planning to reach a growth rate of between 40 and 50 cafeterias per year by 1985.

To further its growth in the restaurant industry, K mart opened two fast-food restaurants in test markets on June 17. Called Abra K Dabra, the restaurants feature pizza, family entertainment, such as magic shows, and electronic games. Restaurants will be placed near to K marts across the country if the first two, located in the St. Louis area, test successfully. K mart introduced the restaurants with newspaper ads and spots on local radio and tv.

In September, 1981, K mart acquired a 44% interest in Astra, a Mexican holding company with food, general merchandise and related real estate operations.

K mart continues to own a 20% equity in G.J. Coles & Coy Ltd., Australia's largest retailer, which in turn owns 68 K mart stores, 362 supermarkets and 170 variety stores. The equity yielded $20.1 million for K mart, which was $8.6 million more than the previous year.

Kellogg Co.

	1981	1980
Sales	$2,321,300,000	$2,150,900,000
Earnings	205,400,000	184,000,000
Advertising*	102,111,300	95,689,000

*AA estimate

Kellogg Co., Battle Creek, Mich., the nation's 54th largest advertiser, spent $102.1 million in advertising in 1981, with heavy increases in outdoor advertising and network radio. Over-all spending increased 6.7% from 1980's $95.7 million, and spending on network tv and magazines increased. Spot radio and tv and newspaper ads decreased.

Kellogg won what corporate officers termed "a major victory" in its 10-year battle with the Federal Trade Commission over charges of shared monopoly among the Big Three cereal makers. The FTC scrapped the complaint late last year without further appeals.

If successful, the action would have split Kellogg into five companies, distributing its brands among them. William E. LaMothe, chairman-chief executive officer, called the case "a classic example of government wasting taxpayers' dollars."

Also in 1981, the company posted its 37th consecutive year of increased sales with a worldwide total of $2.32 billion. That is an 0.8% increase from sales from the previous year. Earnings were up 12% to $205.4 million. U.S. sales, which account for 63% of the business, 1% more than in 1980, were $1.45 billion and U.S. earnings reached $151 million or 73% of total earnings, a 2% increase over 1980.

Although the company's sales and earnings have been rising briskly, Kellogg's share of the $3 billion-a-year American cereal market slipped from a peak of 43% in 1976 to 38.5% in 1981. However, this is still greater than the combined market share of its nearest rivals, General Mills and Post cereals.

Kellogg's Corn Flakes still remains the company's largest-selling product.

A major new product line, Nutri-Grain, was introduced during the year. It is Kellogg's only cereal with no sugar added, and the only U.S. flaked cereal made from whole grain. In order to thwart competitors, the company skipped test marketing and introduced four types of Nutri-Grain—corn, wheat, barley and rye—at the same time.

A record ad budget, an estimated $15 million, was set for the first year to advertise the new brand. Kellogg planned a heavy schedule of magazine ads, including *Self, Runner's World, Wall Street Journal, Sports Illustrated, National Geographic, Newsweek, Time* and *Vogue*.

Although Nutri-Grain grabbed a 1% share of the market, a success by traditional industry standards (the biggest seller, corn flakes, has a 6% share), the company was not wholly satisfied. Earlier this year, it quietly withdrew the rye and barley flavors and replaced them with a new flavor, Wheat & Raisins. Kellogg also is extending its Rice Krispies family with Marshmallow Krispies. The Snap, Crackle and Pop characters will be used in tv and print advertising.

The Mini-Wheats line was extended in January, with Apple Frosted Mini-Wheats. It was introduced nationally with the theme, "We've topped a good thing!"

An improved Special K cereal with a new flake and new packaging is being test marketed. And, in response to consumers' requests, more raisins were added to Kellogg's Raisin Bran cereal; a "New! More Raisins!" advertising campaign proved successful, the company said.

The company plans to expand its distribution of Le Shake liquid low-fat yogurt this year. The drinkable yogurt was successfully marketed in 1980 in the northeastern U.S.

Kellogg's international operations represent approximately 37% of the company's net sales and extend to 130 countries. Growth was reported during 1981 in three major and highly developed markets, Canada, the United Kingdom and Australia.

Kellogg has begun plans for construction of a new high-technology cereal facility that will utilize some existing equipment in the London, Ontario, plant. As one of the company's largest capital projects, plans for this facility include improvements to existing products and development of new cereals.

A major effort to refit and modernize packaging equipment in the Manchester, England, plant is under way. The Manchester facility is the company's second-largest cereal plant, next to Battle Creek, and serves over 75 countries in Europe, Africa and the Middle East.

The recently completed advanced technology plant in Wrexham, Wales, also helps the growing European market.

Kellogg holds a 49% share of the market in the United Kingdom and spent $23 million on advertising there last year.

The company said it plans to enter new markets in some areas of the world where the concept of a nutritious breakfast that includes ready-to-eat cereal is as novel as it was in the U.S. in 1906 when corn flakes were introduced.

Construction is under way on a new facility for processing a variety of ready-to-eat cereals in South Korea. Test market results, a high standard of living, a Western work ethic and above average consumer purchasing

"Did you say Sweepstakes?" "Talk to Ventura."

From package goods to financial institutions aggressive marketers are finding that Ventura Associates has the unique skills required for innovative prize promotions. If you're tired of "me too" sweepstakes, that simply don't work anymore, you owe it to yourself or your client to call Ventura Associates.

There's no cost for an exploratory discussion. A second opinion may net you some fascinating results. And if you don't know who to call for a first opinion we'll even tell you.

Professionalism is the reason that clients who got tired of hack promotions came over to Ventura Associates. Clients like American Express, TWA, New York Magazine, Lifesavers, Citicorp, Home Box Office, Halimark, Georgia-Pacific, Johnson & Johnson, Lipton Tea, and dozens of others. And since even judges are judged by the company they keep you might wonder why these firms made the switch to Ventura Associates. We're a no obligation telephone call away from showing you.

Call Jeffrey Feinman, Ventura's president; Bob Blashek, the executive vice president or any of our professional account people: Mike Stone, Larry Gershman, Florence Carlin, Ron Smiley, Tom Hackett, Linda Lacek Ferreri, Steve Prescott. In New England call our Boston office and ask for Rick McCabe.

VENTURA ASSOCIATES, INC.
200 Madison Avenue
New York, NY 10016
212-889-0707
Boston 617-639-0644

Our sales promotion activities include the design and administration of contests, sweepstakes, and games. In addition we offer full service in incentives, container packs, merchandise procurement, premiums, promotional books, fulfillment, field supervision of promotions, research and celebrity spokespeople.

power indicate South Koreans will accept and enjoy ready-to-eat cereals, it said.

In Saudi Arabia, another new market entry for the company, Kellogg International introduced ready-to-eat cereals to 21,000 school children through a unique sampling project.

Mrs. Smith's Frozen Foods Co., a Kellogg subsidiary, introduced frozen crepes, quiche and Italian entrees nationally early this year. The entrees are promoted with the theme, "Nobody cooks like the Mrs." Eggo apple-cinnamon frozen waffles were introduced nationally early this year. Kellogg's Eggo, a leader in the category, has a dollar share of about 31%.

Kellogg's Salada Foods unit was reorganized into a subsidiary of Kellogg's U. S. food products division in 1982, with headquarters relocated to Little Falls, N.Y. Robert J. Lievense was named president of the new unit, with Edward F. Kline named senior vp-marketing and sales. A new line of drink mixes further extended the selection of beverage products available from Salada in 1982.

Kimberly-Clark Corp.

	1981	1980
Sales	$2,900,000,000	$2,600,300,000
Earnings	205,000,000	182,000,000
Advertising*	62,440,000	54,527,900

*AA estimate

Kimberly-Clark Corp., Neenah, Wis., the 82nd largest advertiser in 1981, is estimated to have spent $62.4 million in advertising, up 15% from $54.5 million in 1980. Sales were up 11% to $2.9 billion from $2.6 billion the previous year. Net income increased 13% to $205 million from $182 million.

In 1980, K-C was reorganized into two operating groups: Consumer and service group, including such products as sanitary napkins, disposable diapers, tissues and paper towels; and a healthcare, paper and specialities group. The consumer and service group contributes approximately 65% of sales.

Part of the purpose of that reorganization was to shore up domestic business, a goal the company is beginning to accomplish. In contrast to 1980, K-C's domestic operations were stronger than its international operations in 1981. Net income in the U.S. was up 15% to $120 million; outside the U.S. it was up 10% to $85 million. The previous year, net income in the U.S. had declined 5% to $104 million, and outside the U.S. it had increased 61% to $77 million.

K-C, which essentially created the feminine hygiene category with the introduction of the Kotex sanitary pad in the 1920s, in 1980 shifted the emphasis of its advertising support to the New Freedom line. The company spent a total of $14.9 million in measured media on New Freedom, up 39% from a year earlier. Spending on the Kotex brand was $9.8 million, down 14%.

In early 1982, K-C launched a New Freedom super maxipad designed for protection on "heavy first days." Advertising says it is longer than "the other super maxipad."

With the two brands combined, the company claims approximately 25% of the $1 billion dollar feminine protection category. In the wake of the discovery of toxic shock syndrome and its link with tampon use, tampons have lost about 10 share points (from 47% to 37%), to sanitary napkins.

K-C apparently has made note of this development, and in 1981 almost eliminated ad spending for its Kotex Security tampon. That tampon has a minuscule share of the market.

K-C's Huggies disposable diapers with elastic legs, now in 87% of the country, saw some new competition from Procter & Gamble in 1982. After a very brief test period, P&G began to expand an elasticized Pampers with "stay-dry gathers" into a number of regional markets. The elasticized Pampers, priced at parity with regular Pampers, are priced 25% below Huggies and P&G's premium brand, Luvs.

Pampers is said to have approximately 50% of the field. Huggies is running slightly behind Luvs; they are running neck-and-neck in areas where they both are distributed. Most of the share held by Johnson & Johnson (8%) before it got out of the market in early 1981, has gone to lower-end products, now claiming 18% of the field.

Apparently determined to maintain its position, K-C hiked the Huggies ad budget by 87% to $12.8 million.

Kleenex Super Dry, distributed in the Southeast, or the 13% of the country where Huggies are not available, will remain in that region for the time being.

Kleenex facial tissue saw some new activity in early 1982, when K-C launched Kleenex Softique, an extra-soft formula, in the West. By July, Softique was moving into New England states, New Jersey, Pennsylvania, Washington, D.C., and parts of New York. The company continues to test a dry-formed tissue under the Softique name in Albany and Rochester, N.Y. The version now being expanded is made by the traditional wet formula.

Ad spending on Kleenex Boutique was increased 128% to $2.3 million. Spending on regular Kleenex facial tissues was down 28% to $3.8 million.

Kleenex's chief competitor is Procter & Gamble's Puffs, which it leads by a few share points.

K-C's Hi-Dri line of lower-price paper towels and toilet tissues received a small amount of ad support ($128,000) in 1981, its first, possibly in reaction to the introduction of P&G's new Summit line. The company also markets a Hi-Dri facial tissue in the Northeast, where generic activity is the strongest.

Depend, the company's entry into the briefs-for-incontinence field also is a high K-C priority. Previously testing in Kansas City and Green Bay, the product was expanded into the entire state of Wisconsin in 1981. The line will be introduced in much of the Midwest this fall. Available in drug and surgical supply stores, it is being supported by tv advertising. It competes against several products, which also are in early market stages. Procter & Gamble's Attends is distributed nationally in hospitals and nursing homes, and Johnson & Johnson is testing Espree in Tucson. (Depend is marketed under the Comform name in Lima, O.)

Both K-C and P&G are experimenting with ways to market their products directly.

The company discontinued its test market of Epic, nonwoven, durable cleaning cloths that had been testing in Jacksonville since 1981. It moved Tough Cat, a similar product, from test in Kansas City and St. Louis to Phoenix.

In mid-1982, Peter Larson, senior vp-marketing for the consumer and service companies, was named president of that group's U.S. business, a new position. Tom Dahl, formerly manager of seasonal products at S.C. Johnson & Son, joined as vp in charge of personal care products. J.D. Bernd was named to direct the activities of the tissue group.

K-C's Roswell, Ga.-based healthcare, nonwoven and industrial group introduced a disposable food service wipe called KleenUps, which is positioned against cloth.

That unit also introduced Spuncare, a cover gown for hospital personnel made of spunbonded polypropylene fabric.

†Restated

Liggett Group, Montvale, N.J., the 93rd largest national advertiser, increased its ad spending 21% in 1981 to an estimated $43.5 million.

Grand Metropolitan, a giant hotel, dairy, restaurant, gambling and beverage conglomerate, acquired Liggett Group in June, 1980.

In its first full year as a division of Grand Met, Liggett increased its sales 12%, to $1.2 billion, although earnings were down 7% in fiscal 1981 to $53.6 million. This compares with 1980's sales of $1.06 billion, and earnings of $57.5 million.

Liggett's nine operating companies manufacture and distribute cigarets, tobacco products, spirits and wines, pet foods, soft drinks, sporting goods and food ingredients.

Liggett cigarets include L&M, Lark, Chesterfield and Eve. Tobacco products include Velvet, Granger and Edgeworth pipe tobaccos and Red Man, the largest-selling chewing tobacco in America.

The unit cigaret sales of Liggett & Myers Tobacco Co. increased for the first time in 17 years, due to the success of new lines of generic cigarets and Eve 120's. L&M's generic product line is packaged in plain white. Carrying the simple legend "Cigarets" in black. L&M's generic cigaret sells at about $1 less per carton than name brands. The line of generics are all 14mg or under, and include menthol and ultralows. The generics holds a 1% share of the cigaret market, equivalent to $130 million at the factory level. L&M's market share dropped from 5.2% in 1967 to a 2.3% share of the domestic cigaret market last year.

The expansion to national distribution of Eve Lights 120's resulted in minor sales increases that were seen as surprising to the industry. The brand received $2 million in measured media support in 1981.

Liggett introduced Omni Luxury Lights 100's, a menthol cigaret, in several test markets. Mingo-Jones Agency is handling the promotion which features a man and woman in formal dress and states, "Introducing the world's most elegant menthol."

Last year, the Federal Trade Commission ordered Liggett Group to pay $85,000 in fines for allegedly failing to disclose health warnings "conspicuously" in ads and point-of-purchase material. The settlement requires more visible health warnings in oudoor ads. Several other major tobacco companies also got hit with similar restrictions and fines.

Liggett conducts its chewing and smoking tobacco business through a wholly owned subsidiary, The Pinkerton Tobacco Co. Sales were higher at The Pinkerton Co., where the company's principal brand, Red Man loose-leaf chewing tobacco, increased its share of market and strengthened its position as the largest-selling brand in the U.S.

Also contributing to the increase in sales was the success of a new product, Red Man Moist Plug, and the distribution benefits resulting from the consolidation of The Pinkerton Co. and L&M cigaret sales forces. In 1980, Pinkerton's measured support was $1 million. In 1981, it was more than doubled.

The Pinkerton Co. also manufactures and sells a wide variety of pipe tobacco brands under its own trademarks, principally Granger, Velvet and Black Clipper. Since 1974, Pinkerton has been manufacturing and selling other pipe tobacco under the brands Edgeworth Ready Rubbed, Rum and Maple, V.I.P., Holiday and John Rolfe. Pinkerton's sales of pipe tobaccos have continued to follow a long-term decline in the industry. The company recently entered several test markets with its first moist snuff product, Culver Brothers.

Liggett imports and distributes spirits and wines through its wholly owned subsidiaries, The Paddington Corp. and Carillon Importers. Paddington is primarily an importer of scotch whisky bottled under the J&B brand name of Justerini & Brooks Limited, an English company established in 1749, also owned by Grand Met.

Paddington has had the sole right to import J&B products since 1937. Sales of J&B were lower for 1981, according to *Business Week*, dropping 6.5% to 2.2 million cases, from 2.3 million cases in 1980.

Total sales of scotch in general have declined for the last few years, although J&B continues to be the largest selling scotch in the U.S. The media budget for 1981 was $15 million. In 1980, Paddington spent $10 million aggressively advertising J&B, via a campaign that touts the brand as having a taste that "whispers."

Paddington also distributes three other International Distillers & Vintners (IDV) scotches: Royal Ages 15 year old, Catto's Gold Label and Knockando, a single malt, which was introduced in 1981.

Paddington was appointed by IDV as the sole U.S. distributor of Baileys Original Irish Cream in 1980. Baileys has enjoyed remarkable success and has become one of the leading-selling imported liqueurs.

Baileys has an estimated 6% of the cordials and liqueur market, with an ad budget of $8 million. Baileys' success has resulted in a number of cream liqueurs from other companies. In fact, so many brands have followed in Baileys' path that industry observers predict an eventual shakeout. At present, however, none of the host of imitators has offered Baileys serious competition.

Carillon is the exclusive U.S. importer and distributor of Grand Marnier Liqueur, the leading French liqueur in the U.S. Media spending for Grand Marnier was $2 million in 1981.

In 1981, Carillon introduced the Piat d'Or line of French wines which have made a promising debut. Liggett also owns the trademark and distribution rights to Bombay English gin, distributed in the U.S. by Carillon. Carillon also imports Absolut Swedish Vodka.

While growth in the U.S. pet food industry was modest in 1981, Alpo premium canned dog food, the principal brand at Liggett's Allen Products Co., exceeded the industry rate of growth, improved its market share and maintained its position as the largest-selling brand of canned dog food. Media spending on Alpo in 1981 totaled nearly $13.5 million, according to Leading National Advertisers.

The Liv-A Snaps product line maintained its leadership position in its segment of the pet treat business. Sales of Alpo Beef Flavored Dinner and Alamo, major brands in the larger dry dog food segment of the market, eroded in the face of competitive market activity.

Liggett conducts its soft-drink business through its wholly owned subsidiaries, Atlantic Soft Drink Co. and Pepsi-Cola Bottling Co. of Fresno. The soft-drink bottling companies reported good results and maintained their leadership positions as the largest bottlers in their respective territories, with a dominant share of the soft-drink market.

Both companies bottle the full line of Pepsi-Cola products and operate in areas with very favorable climatic and demographic characteristics for soft-drink consumption.

Pepsi-Cola bottling Co. of Fresno continued to make excellent gains and broke ground last year for a major new bottling facility which will consolidate all production operations in one location.

High interest rates and the resultant contraction of trade inventory levels slowed the growth of the U.S. physical fitness and sporting goods industry in 1981, but Liggett's Diversified Products Co. achieved record results. New product introductions included a new line of boxing equipment, several new exercise bicycles and racquetball racquets, and a versatile compact home fitness system named Gym Pac 1000.

The U.S. food ingredient operations of Express Foods Cos., another Liggett subsidiary, were expanded and reorganized in 1981 with the acquisition of Western Dairy Products in San Francisco. This acquisition makes Express Foods one of the largest manufacturers of dairy-based protein ingredients in America.

BUSINESS WITH BILL*

[Frankly, an advertisement]

Yes, frankly, this is an ad. Our objective? If we can reflect to you the uniqueness of our Bill Communications' properties, then you can judge us even better as a reader, perhaps an advertiser, and maybe even a future fellow employee.

John Hartman
Chairman of the Board
Bill Communications, Inc.

Teamwork! So very important in this competitive industry of publishing. Without teamwork your successes will be minimal. Bill Communications personifies the words "teamwork" and "team effort."

When I first arrived at BillCom five years ago, I noticed immediately the willingness of each department to offer complete accessibility to my necessary requirements. From our editorial staff, to accounting, to circulation, everyone was pulling together to assist my sales efforts on the East Coast for *Incentive Marketing*.

That same togetherness is continuing to grow five years later. For the past two and a half years, I have been managing the sales activities for the same publication in BillCom's West Coast office. Although the distance from our corporate office could not be greater, I constantly have the team support from my colleagues back East.

Yes, BillCom is a unique company. Everyone has an opportunity for personal growth and development, and our continued success is based on people who are involved and want to participate. Each person has the freedom to express his or her thoughts and communicate with corporate management.

Peter V. Edmunds
Western Sales Manager
Incentive Marketing

With Bill: 5 years

Fifty-three years with BillCom (and its predecessors) in what began as a temporary job—"fifty-three years" should speak for itself, I think, but I have been prevailed upon to say something more—reluctantly, I confess.

But I'll see what stands out among my souvenirs of what makes working for BillCom worthwhile.

The Great Depression, when everyone accepted salary cuts so that no one would be laid off.

The office party, when Ray Bill detailed our Profit Sharing Plan—first in the publication field. And we now also enjoy a host of other fringe benefits.

Getting very personal—I am here 53 years thanks to company policy of employee reevaluation after a certain age.

During these years my services as assistant editor, managing editor, production editor, associate editor, senior editor, plus working with printers, photoengravers, artists, advertisers, accountants, and many sterling associates along the way have given me a well-rounded, fascintating, and what-I-wanted experience in the business publication field. And the last five years or so have been enriched as I work part time for *Rubber World* and as editor of BillCom's company publication.

I doubt I could have received such experience and for so long elsewhere.

Sylvia R. Hague
Senior Editor
Rubber World

With Bill: 53 years

Bill Communications is a company for the independent, self-motivated, goal-oriented individual. Technical competence must be coupled with vision and tenacity. Corporate staff is kept to a minimum and the financial people like me are involved in the creative process as advisers, not as policemen. For them success is measured by numbers, and the numbers at Bill have been very gratifying, indeed. Sales in 1972, the year I joined the company, were $10 million. Sales in 1981 were $33 million. That represents an average increase of 15% per year for the last nine years. During those years, the company has started four new magazines, increased employment levels by 10%, and become a national leader of a disappearing breed—the privately held publishing company.

At Bill, the emphasis is always on quality, of product and performance. There are probably some areas where we could save a nickel here, a dime there, but Bill wouldn't be the company it is if we did.

Joseph J. Furey
Corporate Controller

Loews Corp.

	1981	1980
Sales	$4,778,000,000	$4,535,000,000
Earnings	253,300,000	206,000,000
Advertising*	141,364,400	132,785,300

*AA estimate

Loews Corp., N.Y., the nation's 42nd largest advertiser, increased its ad budget 7% in 1981 to $141.4 million. Sales climbed 5.3% to $4.8 billion and net income rose 23% to $253.2 million, from $206 million in 1980. Income from continuing operations rose 20.8% to $268.2 million, and 1981 was the fifth consecutive year in which Loews reported record revenues and operating income.

CNA Financial Corp. had mixed results in 1981, with intense competition, inflation, high interest rates and the recessionary economy adversely affecting the insurance industry. In 1980 and 1981, CNA contributed 65% of Loews' revenues. Property and casualty insurance revenues were up 15.4% to $1.9 billion, but income contribution fell 6.4% to $80.3 million. Life insurance revenues were down about 5.5% and income contribution fell sharply again in 1981, down 16.3% to $25.8 million. Consumer finance revenues slipped 3.2%, while income contribution fell for the second consecutive year, 35% to $32.2 million, reflecting the closing of loan offices and the sale of receivables. CNA's ad budget was again devoted exclusively to magazines. Spending in 1981 increased 21% to $2 million.

The company strengthened its ties to independent agents by calling for a "Re-Declaration of Independence." As part of this campaign, the company proposed a "Bill of Rights" stressing the responsibility of agents and insurers. CNA is the No. 1 insurer of architects and engineers, and the second-largest in the libel and slander fields.

For the sixth year in a row, Loews' Lorillard Division reported satisfactory growth in cigaret sales. Lorillard held onto its rank as fifth-largest cigaret marketer in the U.S., despite an intense competitive environment.

However, Lorillard's share dropped 0.5% to 9.2%, while fourth-ranked American Tobacco also lost share points, dropping to 9.7% from 10.8%. In 1981, a 1% share of market was equivalent to more than $130 million at the factory level. Lorillard executives said the company's decline was due to massive ad spending by competitors, widespread use of free goods and merchandise by some companies and new product introductions by competitors.

Lorillard sales, representing 23.2% of Loews' revenues, rose 5.3% to $1.11 billion, and net income contribution climbed 12.3% to almost $178.2 million. Sales and net income increased for the fifth straight year.

In an attempt to hold on to its remaining share, Lorillard has developed several new ad campaigns aimed at solidifying its grasp of the low-tar cigaret market, 15mg or lower. Low-tar cigaret consumption now accounts for almost two-thirds of the market, with the ultra-low tars (0 to 6mg) in the area of 11%. Low tars captured 60% of the market in 1981, up from 48.5% in 1980. Of this market, Lorillard has about 11%. About 75% of its cigaret volume is in the low-tarmarket, more than other companies, according to industry analyst John C. Maxwell Jr.

Kent III and Triumph, two 3mg brands introduced in 1979, fared quite differently in 1981. Kent III currently holds 1.3% of the market, while Triumph keeps its head above water at five-tenths of 1%, which is industry minimum for success.

Foote, Cone & Belding, the main Lorillard agency, created a spread which appeared in *Sports Illustrated* to dramatize the success of Kent III having made it big in its first years. The ad showed a panoramic view of Yankee Stadium with an oversize Kent III outdoor board surprinted over the left field wall. The ads were an extension of the Kent III cities campaign, with themes tailored to particular locales. Kent sales over-all fell to 18.65 billion units from 20.28 billion in 1980. Market share declined to 3.0%. Kent III and other Kent products were supported by $13 million spent on magazines, newspaper supplements and outdoor. Triumph sales were down 11.3% to 2.27 billion units. Spending was $12.6 million on magazines, newspaper supplements and outdoor. Triumph 100s rolled national in 1981 with the theme, "Taste the Umph in new Triumph 100s." Ads for the two brands have continued to focus on taste, despite the fact both are in the ultra-low tar market segment.

The rest of the Kent line did not fare as well as Kent III, slipping 8.7% to 11.3 billion units. Ad support, however, picked up 100% to just over $2 million, devoted to premiums, newspaper supplements and outdoor. Golden Lights, considered one of the industry's faster-growing brands, lost ground this year. Unit sales fell 14.4% to 9.60 billion. Ad backing in magazines, newspaper supplements and outdoor continued to drop, down 17% to $12.3 million.

Faced wih slumping sales of True, the ultra-low tar, Lorillard launched a new campaign to reverse the situation. True's unit sales slipped 10.8% to 9.85

billion units from 11.04 billion last year. The series of ads was a drastic departure from previous True campaigns, which focused on low-tar content. The new approach was designed to pull readers into the ads by having them look for the True package emblem on one of a series of similar objects. Ad spending was $10.4 million in magazines, newspaper supplements and outdoor, down 12.6% from the previous year.

For the second year in a row, the best news for Lorillard came from its Newport brand, which topped its high sales gain in 1980: Unit sales were up more than 26% to 14.03 billion units. Loriliard's only major high-tar brand, it stays on top of True and Golden Lights to remain the company's second-biggest seller after Kent.

Ad backing for all Newports, including Newport Red nonmenthol brands, in magazines, newspaper supplements and outdoor was $11.9 million, up 28% from last year.

Lorillard tried two market probes with two low-tar smokes, Bistro Lights and Maverick. Bistro Lights, supported by $87,500 in magazine and outdoor, was billed as "Not just another faceless cigaret," featuring a smoker's face on the pack. The low-tar newcomer was tested in Sacramento.

Maverick, a cigaret tried once before in the 1970s, reappeared in Texas and Spokane, Wash., as a women's cigaret that's a "whole new breed." Maverick had $47,000 in outdoor advertising.

The company also launched Rebel and Heritage low-tars in minimarket tests with full advertising and promotion schedules. Ad spending for Rebel was $49,000 in outdoor, while Heritage received $36,600 for outdoor ads. Rebel is getting its feet wet in Erie, Pa., Nashville, Buffalo and Roanoke, Va., and Heritage is testing the waters in Lexington, Ky. and Jackson, Miss.

Old Gold, a regionally marketed brand, had sales of 2.10 billion units, down 10.3% from 2.34 billion units last year. Ad spending in magazines and outdoor went up 44% to just over $1 million.

Max 120s, designed to snip away at Philip Morris' Virginia Slims sales, had sales of 880 million units, down 8% from 1981. Ad spending totaled $285,400 in magazines and outdoor.

While small in comparison to cigaret volume, the company's chewing tobacco division continues to grow. The company is directing more attention to its successful Beechnut brand and is reformulating Big Red for national distribution. Beechnut spent $1 million on advertising in 1981, down $92,000, most of it on network and spot tv.

Loews' hotel division, which brings in 5% of Loews' total revenues, had revenues of $240.3 million in 1981. Ad spending for all hotel properties amounted to about $331,800, most of it in magazines.

Bulova Watch Co., 94% of which was acquired by Loews two years ago, contributed sales of $179.5 million in 1981, down 9% for its second full year of Loews ownership. Income contribution, however, was up 41.4% to $4.7 million. The company says new accounting, cost control and assembly systems were installed, causing some loss.

Over-all, Bulova watches received about $2.9 million in ad support, spread betweeen magazines, newspaper supplements, spot tv and outdoor. Caravelle watches received $33,700 for magazine and newspaper. All three watch lines, Bulova, Accutron and Caravelle, were revamped ano reintroduced in 1981.

Loews Theatre division continued its comeback from revenue declines and was up 9.5% to $59.9 million from $54.7 million. Income contribution was up sightly to $12.9 million.

Advertising*	63,600,000	74,000,000

*AA estimate
†Revised

MCA Inc., Universal City, Cal., the 80th largest advertiser, cut ad spending by 14% in 1981, to an estimated $63.6 million.

A comparatively poor crop of films in 1981 from MCA's Universal Pictures, requiring less paid media ad support, caused the downturn, which is not uncommon in the cyclical motion picture arena, where the bulk of MCA's consumer marketing is focused.

In 1981 corporate financial results, MCA Inc. revenues were $1.33 billion, up just 2% from fiscal 1980's $1.30 billion. Net profits in 1981 of $89.8 million fell 25% from the year before and represent the poorest showing since 1977, excluding extraordinary income.

Fiscal 1981 and early 1982 were unusually active, marked by divestiture of operations and major new undertakings, usually through joint ventures.

Besides cutting its 1981 ad spending, MCA also altered its media distribution. Magazine buys accounted for only $530,500 of MCA's ad budget, down 68% from last year's $1.6 million, and newspaper expenditures fell 42%, to $4.1 million. Spot tv buys accounted for just $4.9 million this year, a decline of 50% from 1980's $9.9 million. Network radio spending was down 76% from last year, while network tv spending was increased 12%, to $17.9 million. Spot radio buys were also increased this year, up 31% to $6.4 million.

In 1981, the company spent $22.4 million in measured media promoting Universal Pictures, compared with 1980's $26.6 million. Of the 21 movies monitored by Leading National Advertisers, the three recipients with largest budgets were "Ghost Story," "Great Muppet Caper" and "Continental Divide."

In summer, 1981, Universal began buying cable tv ads backing "Nighthawks" and "An American Werewolf in London."

Filmed entertainment revenues—representing movie, tv and studio tour operations—were $788.7 million, inching up 2% from 1980, representing the lion's share of MCA's business.

In the theatrical arena, Universal's domestic market share shrank to just over 14% in 1981, down from 20% the year before, when it led the industry. "The Four Seasons" starring Alan Alda and "Bustin' Loose" starring Richard Fryor topped Universal's 1981 slate. "Night Hawks" starring Sylvester Stallone, "The Legend of the Lone Ranger," "All Night Long" and "Honky Tonk Freeway" were disappointments.

Universal Pictures' fortunes have improved significantly in 1982, due to the release of "E.T."

In a cost-cutting marketing innovation, Universal via Doyle Dane Bernbach advertised both "Conan The Barbarian" and "E.T." within a single 30-second network tv commercial. Heartwarming contemporary fantasy, "E.T." became summer 1982's big movie, certain to make the all-time movie hit list.

Universal was joined by Paramount Pictures and MGM/UA Entertainment in forming during October, 1981, United International Pictures, a joint venture to distribute films overseas.

Increasingly, efforts in movie production have been toward coventures or pickups of completed films. Universal's major film associates are British conglomerate Associated Communications Corp., PolyGram Pictures, RKO General, producer Dino De Laurentiis and Oak Industries. Also in theatrical, a new division has been established to produce programs for pay tv and cable.

In 1981, MCA said it wrote down $15 million for "unamortized tv values of theatrical films unlicensed to tv." However, it is said to own perhaps the most valuable film vault of all major film studios, worth $500 to $600 million.

Although not a marketer directly to consumers, Universal Television is a major supplier to the three networks with "Magnum, P.I." and NBC-TV's "Quincy," its most successful entries. Once the undisputed kingpin of network tv production, Universal Television has slipped recently.

Its traditional strength has been in hour dramas, which sell particularly well overseas, but a recent push in half-hour sit-com, lucrative in domestic syndication, fizzled when CBS-TV's "House Calls" and NBC-TV's "Harper Valley" were canceled.

MCA TV, the distribution and syndication arm, is among the most active major studio units engaged in barter syndication. "Sugar Ray Leonard's Golden Gloves" and off-ABC-TV "Hardy Boys/Nancy Drew Mysteries" are MCA TV's existing barter series. New advertiser-supported entries for fall 1982 and beyond are off-ABC-TV "Those Amazing Animals," "Memories with Lawrence Welk" and "Road to Los Angeles—1984."

In a deal locking up off-network series produced by a major independent, MCA TV has a long-term syndication deal with Alan Landsburg Productions bringing it syndication rights to ABC-TV's "That's Incredible," NBC-TV's "Gimme a Break."

Also considered part of filmed entertainment operations is Universal Studios Tour, conducted at MCA's 420-acre headquarters in Universal City, adjacent to Los Angeles. Promotions for the tour increased 17% in 1981, to $286,200.

As for major new efforts, MCA Inc. became a partner in a basic cable tv network, video programing and real estate development joint ventures. It also made acquisitions for its existing book publishing division.

In October, 1981, MCA bought one-third of USA Cable Network, the ad-supported basic cable network, with intentions to launch an in-home cable tv pay-per-view service. Its partners are Time Inc., Home Box Office parent, and Paramount Pictures, the Gulf & Western subsidiary.

MCA distributes home video software through MCA Videocassette. MCA and Walt Disney Productions are the plaintiffs in the landmark Sony Betamax case seeking copyright compensation for off-air tv videotaping.

In 1981, MCA entered a joint venture with a British entertainment conglomerate, MCA-Thorn EMI Programs International, to increase activity in the video market. The new entity produces and distributes video programing.

Separately, MCA is producing and distributing programing for the struggling optical—also called laser—format videodisc. NAP's Magnavox and Pioneer Electronics are also partnered in the Optical Programing Associates joint venture.

DiscoVision Associates, a joint venture of MCA and IBM that pressed optical format videodiscs, was sold in February, 1982, to Pioneer Electronic Corp. of Japan, folding what had been a major money loser. DVA retains its optical videodisc patent rights. Leber Katz Partners was the ad agency.

MCA's records and music publishing boosted operating profits 58% on revenues that were down 5% in 1981. This remarkable showing has been the talk of the depressed music business. Revenues were $175.2 million; profits amounted to $25.2 million, although measured media spending for MCA records and tapes were trimmed 57% in 1981, to a scant $127,200.

MCA Records repackaged old hits—its Platinum Plus line—thus wringing more life out of a product that already had been amortized. Innovative marketing of existing assets, plus a good showing with new products, let MCA music escape the general record industry downturn.

Platinum albums (1 million unit sales) in 1981 included Olivia Newton-John's "Physical," The Oak Ridge Boys' "Fancy Free," outgoing artist Steely Dan's "Gaucho" and Tom Petty and the Heartbreakers' "Hard Promises." Ten artists came up with gold albums (500,000 unit sales). In-house Lankershim Advertising handles.

Spencer Gifts, MCA's Atlantic City, N.J.-based retail and mail order division, posted revenues of $216.2 million in 1981, a 2% rise. Operating profits rose 56% from last year, to $13.7 million. Spencer Gifts claimed $6.9 mil-

lion of MCA's ad budget this year, a decline of 40% from 1980's $11.5 million.

"A stringent corporate cost control program and increased profitability of catalog mailings" during the year brought sharply increased operating profits despite the general economic recession, an MCA spokesman said. Spencer Gifts operated 420 stores at the end of 1981.

MCA's other operations had revenues of $148.8 million, up from 11% from the year before. Other operations showed an operating profit of $4.1 million, off 3% from the year before.

MCA Publishing Group posted its highest revenues ever, despite a soft market. Putnam Publishing and BJ Publishing are the major units. In addition, MCA acquired Grosset & Dunlap Publishing from Filmways and Playboy's PEI Books.

MCA bought a 423-acre site near Disney World in Orlando, Fla., where it plans to build another studio tourist attraction at a cost of $170 million. Back at MCA's headquarters facility, an existing outdoor amphitheatre with 6,200 capacity has been enclosed for $20 million, permitting year-round live event and film production.

In June, 1981, Avco Embassy president Robert G. Rehme was named president of Universal Pictures new distribution and marketing division.

MCA founder Dr. Jules C. Stein, a medical doctor, who started the company as a big band booking agency in Chicago during the 1920s, died in May 1981.

Advertising*	78,400,000	83,729,375

*AA estimates

Mars Inc., the nation's 69th largest advertiser, emerged as the big winner in the candy bar wars of 1981 and trimmed its candy advertising enough to produce the first companywide decline in ad spending in four years—off 6.4% to an estimated $78.4 million. Ad spending boosts at the company's rice and pet food units, Uncle Ben's Foods and Kal Kan Foods, kept the decline from being even sharper.

U.S. sales, fattened on the candy boom, were up an estimated 38% to $1.35 billion last year. The company's extensive international operations put Mars brands at or near the top of the heap in Europe and elsewhere, with worldwide sales estimates for 1981 starting at a conservative $3 billion on up to double that amount.

Most of what's known of Mars' successes in the U.S. comes from grocery intelligence services and competitors who, of necessity, are students of its marketing moves. Mars itself, believed by observers to be this country's biggest privately held company, does not divulge its financial and advertising data and rarely boasts about its triumphs in public.

Available measured media estimates for Mars candy and snack advertising put the total for 1981 at $43 million, off 15.3% from the previous year. An M&M/Mars exec declined to discuss the figures, but a trade source suggested the company may have trimmed the ad budget to improve what he believed were anemic candy profit margins. M&M/Mars had raised wholesale prices last September, the source noted.

Meanwhile, however, measured media spending on the Kal Kan pet foods was up 26.6% to $14.8 million. An even bigger jump—56.5%—was reported in spending at Uncle Ben's Foods, where the estimate reached $7.2 million for 1981. Another big hike in ad spending at Uncle Ben's is apparently in the cards for this year.

The big story in 1981 for Mars, however, was candy. Easing prices for cocoa and sugar, key raw materials for chocolate candy bars, and rising chocolate consumption—to an estimated 9.3 lbs. per capita last year compared to 8.3 lbs. in 1979—set the stage for Mars in late 1980 to expand the size of its bars while holding its wholesale cost level.

By spring, 1981, unusually candid Mars execs were explaining their pricing tactics as a bold bid to expand volume even at the cost of slimmer profit margins. In February, about three months after expanding its bar size, Mars reported 30% jumps in sales volume for key brands like Milky Way, Snickers and Three Musketeers and 60% for its Mars bar. Even with the price hike that Mars put through in September, 1981, trade sources are saying that Mars may have taken in a 45% share of the approximately $2.1 billion in chocolate bars sold in the U.S. last year. If true, that would be a giant expansion from the roughly 33% share credited to Mars in 1980. Hershey, Peter Paul, Cadbury and Nabsico Brands are said to have lost share in the face of the Mars onslaught.

AA estimates U.S. candy and snack revenue for Mars reached about $950 million in 1981, although some estimates by trade observers put the U.S. total as high as $1.2 billion.

Not every Mars brand is a smash success, of course. Mars' Marathon candy bars, like Forever Yours bars earlier, were pulled from the market this April. But Mars execs and trade sources think they have two new product winners in M&M's Royals mint chocolates, a mint flavored M&M-type candy, and in Combos, a brand that is expected to broaden Mars' reach from confections into nonsweet snack food marketing.

Combos is a cheese filled crispy pretzel nugget, offered in nacho, cheddar and pizza flavors and available in regional markets in 1.5-oz. and 7-oz. packages. A three-pound package is being tested. It is the sole product currently being marketed by Mars' Snack-Master division, which had previously handled some of Mars candy brands.

At least one admiring trade observer said he believed Combos is selling at the national equivalent of $200 million a year in its regional markets. A Mars exec said that estimate is overblown, but that the product is doing "very well."

U.S. pet food shipments may have passed the $4 billion mark (wholesale) last year, perhaps reaching $4.1 billion, a $300 million increase over 1980, according to government economists who follow the industry. Despite major successes in European pet food markets, Mars is not a giant in the U.S. marketplace.

But it is trying not to fall farther behind. Its traditional strength has been in canned dog and cat foods, where analyst John Maxwell ranks Kal Kan canned dog food the No. 2 brand, Kal Kan canned cat food No. 3 and MPS Chunks canned dog food No. 13. Thorofed, another Kal Kan canned dog food product, has virtually disappeared from the market.

Kal Kan has been following the trend toward dry pet foods with two products, Mealtime dry dog food, now national and ranked seventh by Mr. Maxwell, and Crave dry cat food, which is going national this year. Ad support for Crave in new markets has been promised at a national rate of $20 million. Mr. Maxwell ranked Crave No. 8, well down the national list, at the end of last year, when it was still available only in selected western markets. AA estimates Kal Kan sales reached about $250 million (wholesale) in 1981.

Rice shipments in the U.S. are believed to have neared $1.9 billion last year, but 60% to 70% of the total in recent years has been going to export markets. Uncle Ben's converted brand rice is generally recognized as the No. 1-selling brand, although Colgate-Palmolive, with its Riviana brand, markets a number of different rice brands and is believed to be the market share leader.

Uncle Ben's Foods sharply expanded ad support for Uncle Ben's converted brand rice last year, and is believed to be spending even more aggressively this year. The company also offers a full line of speciality and flavored rices and Stuff-n' Such stuffing mixes. Two efforts to tap the frozen food market—SunCrisps, a frozen french fry made from rice, and Uncle Ben's Heat-'n Serve Rice—remain in test markets. New in test markets in 1981 was Uncle Ben's original brand rice.

Estimated measured media spending for major Mars brands last year was:

- Candy and snacks—M&M's, $5.6 million, off 46%; Mars bars, $5.3 million, up 114%; Milky Way, $4.5 million, off 41%; Snickers, $7.7 million, off 24%; Starburst, $2.4 million, off 49%; Summit, $3.7 million, off 40%; Three Musketeers, $4.6 million, up 31%; and Twix, $5.7 million, off 25%. Mars placed an estimated $560,000 in measured media behind Combos last year and $327,000 behind Royals mint chocolates. Support for Skittles fruit chews last year is estimated to be $248,000.
- Pet foods—Kal Kan canned dog food, $4 million, up 22%; Kal Kan canned cat food, $4.5 million, unchanged; Crave dry cat food, $1 million, up 18%; Mealtime dry dog food, $4.4 million, up 63%; and MPS chunks canned dog food, $423,000, comparison not available.
- Rice products—Uncle Ben's converted brand rice, $6.5 million, up 72%. Estimated measured media support for smaller brands was $148,000 for Heat-'n Serve frozen rice dishes, $187,000 for Uncle Ben's great recipe side dishes, and $247,000 for SunCrisps frozen french fries.

Jeffrey Martin Inc.

	1981	1980
Sales	$75,000,000	$45,000,000
Advertising*	41,000,000	35,708,100

*AA estimate

Jeffrey Martin Inc., Union, N.J., the 97th leading national advertiser, increased advertising 8.7% to an estimated $41 million in 1981 from an estimated $35.7 million in 1980.

Sales for 1981 were estimated at $75 million, up about 60% from $45 million in 1980. Part of the company's sizable sales increase is attributable to the inclusion of volume generated by brands it acquired when it signed an agreement in mid-1981 with Purex Industries to manufacture and distribute Purex's health & beauty aids lines.

Products picked up from Purex include Bantron, a smoking deterrent, Ayds appetite suppressant candy, Pursettes tampons, Campana Italian Balm hand softening lotion, Bert's gelatin capsules, Doan's pills and rub for backaches and Cuticura soap.

Under Purex these brands were unadvertised in 1980 and had witnessed severe drops in market share. Ayds, for one, was said to have dropped to a 5% share of the total diet pill market, down from a one-time high of 66%.

After assuming manufacturing and distribution control over those brands in 1981, Martin moved at once to increase ad spending. Measured media support for Ayds climbed from $4.3 million in 1980 to $4.6 million for the last six months of 1981, while advertising behind Doan's increased from $1.3 million to $4.7 million. Both Bantron and Cuticura, which had been unadvertised, received approximately $166,100 and $1.3 million in measured media support, respectively, according to Leading National Advertisers.

While the increased spending on the former Purex brands helped boost the company's total ad spending in 1981, they are expected to continue to do so this year. Total company ad

spending is forecasted at $65 million for 1982. Pursettes will receive $6 million in support while Bantron will receive $12 million. The brands have also given Martin a greater European presence because of Purex's base there with the distribution of Ayds and Cuticura soap. This year, Martin's Topol smoker's tooth polish and Porcelana fade cream will be marketed in England, with Topol venturing into Italy and France as well.

In the meantime, Martin has continued to aggressively back its own brands. Topol, with estimated sales of $30 million-plus and a 4% share of grocery store sales, received $14.5 million in measured media spending during 1981, up from $13 million in 1980. Porcelana's measured media spending dropped from $14.7 million in 1980 to $8 million in 1981. However, this could be partly attributable to some changes in the robustness of the category as well as the company's plans to expand the fade cream to include a sun-care version in 1982. Porcelana still retains a 55% share of drugstore fade cream sales, but the category itself is down in volume from two years ago.

This year, Jeffrey Martin signed on with the Computer Assisted Marketing Research Analysis service of Sound Marketing Inc., Greenwich, Conn., which provides advertising and sales reports with advertising-to-sales ratios, moving averages, analysis of brand development index, advertising penetration index and cost-per-gross rating point comparison.

Advertising continues to be handled in-house, but the company has been looking for an outside agency to share responsibility for its brands. Martin continues to buy its broadcast time on an opportunistic basis. The company has increased both its use of radio and tv during the last year as well as magazine support.

In the first half of this year, Jeffrey Martin was identified as one of the suitors of Nabisco's J.B. Williams division. Whether or not that acquisition comes to pass, the company is projecting the year's sales at over $100 million.

Mattel Inc.

	1981	1980
Sales*	$1,134,252,000	$915,690,000
Earnings*	39,102,000	7,898,000
Advertising**	110,600,000	87,100,000

*Fiscal year ends Jan. 30.
**AA estimate

Mattel Inc., Hawthorne, Cal., boosted advertising and promotion spending 27% in 1981 to an estimated $110.6 million, making it the 49th largest U.S. advertiser.

The sharp advertising increase is largely a result of Intellivision's programable videogame console. Sales soared to more than 1 million units, compared to 1980 sales of just over 200,000 console units. Intellivision has a 20% share in the domestic programable video game category, making it a distant second to Warner Communications' Atari subsidiary, whose market share is about 70%.

Sales of the videogame pushed over-all corporate revenues to $1.1 billion in 1981, a 24% increase over 1980. Corporate 1981 operating profits rose 111% to $148.0 million. Net profits were $39.1 million, skyrocketing 395% over 1980.

Toy and Hobby Products, Mattel's biggest unit, posted sales of $503.5 million, a 12.5 % increase from 1980. Mattel is the world's largest single toy maker with an estimated 10% share of the $4.2 billion U.S. toy/game market.

Mattel made 3 million large dolls in 1981; the Tippee Toes doll was the biggest seller in this category with more than 1.5 million units.

Ad spending for Mattel dolls and accessories increased 116% in 1981, up to $15.7 million from last year's $7.2 million.The Barbie dolls, which have sold 135 million since the 1959 debut, and the Hot Wheels miniature die-cast car line paced the entire segment to record operating profits of $65.5 million, up 58%.

See'n Say talking preschoolers' toys, Monchichi dolls and Children's Discovery programable kid computer are other significant Toy and Hobby Products lines. Mattel also includes in this unit plastic model kit sales from Monogram Models, Morton Grove, Ill.

According to the company, Mattel Electronics posted sales of $287.6 million, a 141% increase over 1980's $119.3 million.

Out of that, the 1 million console unit sales of Intellivision translated into estimated revenues of $200 million.

Mattel Electronics' operating profits were $73.1 million, a whopping 901% increase over 1980. Those profits are the reward from a successful gamble that Intellivision, starting late in 1979, could carve a niche in the home programable video game market pioneered by Atari. Stock analysts have predicted about 2.5 million console units will be sold by Mattel in 1982.

Advertising via Ogilvy & Mather, Los Angeles, rips Atari in competitive jabs using George Plimpton as presenter. The Plimpton-fronted ads contributed to the bulk of the 78% increase in measured network tv spending, which totaled $26 million in 1981. Total measured media spending for Intellivision was $9.08 million in 1981, compared to $427,600 in 1980, and an excess of $8 million was con-

Refine your thinking. It's Cleveland. Where a lot of well bred people with a lot of bread support the arts.

This city is the home of the world-renowned Cleveland Orchestra, Cleveland Museum of Art, six other major museums, the Cleveland Clinic, Case Western Reserve University, and a long list of theatres and other cultural institutions.

Clevelanders have good taste in reading, too. They read The Plain Dealer for a complete guide to the arts and entertainment. Learn how to reach our readers by contacting your local Newhouse Newspapers representative. Or call (216) 344-4079.

The Plain Dealer

Number One in the art of reaching Cleveland

buys. Ed Libov Associates was assigned some media buying in 1981, previously handled by O&M.

Intellivision's $210 wholesale price is about twice Atari's wholesale unit cost. In late 1982, Atari will introduce a new generation programable videogame with improved features. The product will wholesale for $250 and stock analysts say it is aimed directly at Intellivision.

In game cartridge developments, Mattel said in 1982 that it will market game cartridges compatible with the Atari's first generation VCS format under the M Network trade name. Also, Mattel said in 1982 it has licensed unidentified coin-operated arcade videogames for Intellivision, which represents the first major challenge to Atari's dominant arcade game licensing for its home video game.

Other Mattel Electronics products include portable electronic games such as Dungeons & Dragons, Computer Chess and others. Mattel will market a game cartridge based on Walt Disney Productions' July-released "Tron." The cartridge will be available in September.

Mattel's electronic games accounted for only $2 million of 1981's ad spending, a 275% decrease from the previous year's $7.7 million.

In fall 1982, Mattel plans to introduce Intellivoice, an Intellivision peripheral that synthesizes human voices during game play.

A joint venture of Mattel and General Instruments, Play Cable offers Intellivision software delivered via cable tv lines for a monthly fee.

For several years Mattel has been test marketing the keyboard component of Intellivision which attaches to the existing game console. The keyboard component, designed as an easy-to-use home computer and marketed through major retailers, is a departure from the home computer industry's current reliance on specialty stores.

Western Publishing, Racine, Wis., showed poor results in 1981 as revenues advanced just 4% to $277.9 million while operating profits tumbled 46% to $10.5 million. Reduced collections from direct consumer sales were one negative factor. Ad spending was cut by 80%.

Acquired in June, 1979, Western Publishing markets books, games and puzzles under the Golden Book and Whitman trade names. Other products involve licenses with Walt Disney, Children's Television Workshop/Sesame Street, Warner Bros. and Walter Lantz Productions.

Mattel retrenched operations of its live-attraction Entertainment segment—which posted a $1.1 million operating loss in 1981 on revenues of $77.3 million.

"Each one of the operations which comprise this segment suffered a decline in attendance," said Mattel.

Ringling Bros. and Barnum & Bailey Combined Shows was sold to Mattel for $22.8 million in March, 1981. Ice Follies and Holiday on Ice Inc. operations were included in this sale.

Mattel Communications, a unit charged with developing high-technology products for consumer markets, began test marketing in mid-1982 an 11-product line of personal security products. Kenyon & Eckhardt's western division was named in February, 1982 to succeed Carlson, Liebowitz & Olshever, Los Angeles.

The product line, called People Protection Products, (PPP), uses Michael ("Hill Street Blues") Conrad as presenter in tv test ads. PPP products, which retail from $10 to $80, were test marketed in five cities.

In other corporate developments, a 1981 stockholders' suit that charged Mattel and some of its officers with fraud was settled out of court at a cost of $2.9 million in February, 1981. Mattel also sustained expenses in connection with the December, 1980, bankruptcy of two buyers of Metaframe Corp., once part of Mattel.

	1981	1980
Sales	$7,129,000,000	$6,226,000,000
Earnings	264,834,000	220,893,000
Advertising*	230,248,200	206,962,100

*AA estimate

McDonald's Corp., Oak Brook, Ill., the nation's 15th largest advertiser, increased its domestic advertising and promotional spending by 11% this year, to an estimated total of $230.2 million. In its financial data, the company placed 1981 worldwide advertising and promotion expenditures at $322 million, a 14% increase over the $282 million reported in 1980.

McDonald's 1981 systemwide sales reached $7.13 billion, up 15% over the 1980 total of $6.23 billion. Net income was $264.8 million, a 20% increase from the 1980 total of $221 million. Sales in McDonald's restaurants outside the U. S. were $1.359 billion, a 15% increase over the 1980 figure, despite adverse foreign currency translation due to the strengthening dollar.

The company added 476 restaurants in 1981, bringing the worldwide total at yearend to 6,739. Of that number, 5,554 are located in the U.S. The remaining 1,185 restaurants are in 29 countries and territories.

McDonald's was among the top advertising news makers of 1981. The company stunned the advertising world in October with the announcement that it would move its $75 million national account to Leo Burnett USA from Needham, Harper & Steers.

The 11-year relationship between McDonald's and NH&S had brought business and advertising success to both client and agency: The chain experienced its greatest growth during the 1970s, and Needham received numerous awards over the years for its McDonald's work.

In making the change, McDonald's exec vp-chief marketing officer, Paul Schrage, cited the Burnett agency's "depth and track record to further strengthen our marketing and industry leadership" as the reason for the move.

Burnett's top management had wooed McDonald's execs for years and its persistence and work on the Holland, Belgium and French businesses, which the agency picked up in 1980, apparently impressed the chain's management. The decision to move the account, however, created an uproar in advertising and marketing circles, stirring up the issue of client/agency loyalty. Burnett officially took over the account in January, 1982.

In August, 1981, McDonald's returned to the "You deserve a break today" theme in NH&S-created advertising. The initial ads from Burnett during the first few months of 1982 carried out the plans NH&S had laid for the chain. Burnett picked up on both the "break" theme and the tone of the chain's earlier advertising in the first major pool of spots launched in the spring of 1982. The commercials emphasized people and situations which are typical of contemporary life styles—hallmarks of McDonald's ad style.

Meanwhile, the company faced a fierce market share battle in the fast-food restaurant industry, with a barrage of national promotions, new products and increased ad spending. At a November, 1981, securities analysts meeting, McDonald's execs said the company's domestic market share was 18.6%, compared with 18% in 1980.

New products figured prominently in McDonald's marketing strategy during the year and into 1982. The McChicken sandwich was rolled out to about 4,200 stores by yearend, but the company still classified the sandwich as a test product. The product met with mixed consumer response and other chains introduced chicken breast sandwiches, making comparisons with McDonald's processed and formed McChicken. In November, McDonald's said it would "refine and improve" the product. The chain pulled its Chopped Beefsteak sandwich, testing in 2,000 stores, on Nov. 1, after the sandwich failed to garner lasting customer support. It was first introduced in 1978.

Chicken McNuggets, boneless fried chicken pieces with side sauces, continued to roll out in 1981, and by yearend were in about 2,200 restaurants. Expansion proceded in the first half of 1982 to several major markets, including Seattle, Milwaukee and Indianapolis. Sausage and ham biscuits, in Southeast tests, moved into more than 1,100 stores in the southern region.

McRib, a boneless pork sandwich topped with pickles, onions and barbecue sauce, first launched in June, 1981, has expanded more rapidly than any product in McDonald's history. By June, 1982, McRib had been moved into about 2,500 stores, adding a new dimension to the chain's menu, once dominated by beef products.

In addition to new products, a score of national promotions peppered the McDonald's marketing arsenal. The company attributed record sales in the first half of 1981 to the "Build A Big Mac" collector-card game. It then gave customers a chance to collect Muppet-themed glasses during the summer as part of a tie-in with "The Great Muppet Caper" movie. In late fall and early winter, McDonald's offered the "Menu Music Chant" game. Another collector-card promotion, "Quality in the Bag," was launched in the spring of 1982.

Despite some industrywide criticism of the promotions as a form of discounting, it appeared as if McDonald's would continue the gamesmanship. A summer 1982, promotion featuring a videogame theme was planned, along with two children's "Happy Meal" promotions.

McDonald's tried various in-store experiments on a trial basis in 1981. The company constructed "Dessert Centers," walkup areas in the front of the restaurants where soft drinks, shakes and desserts are served, in several test units. A limited test of 24-hour service was started, but execs told securities analysts they were skeptical about any widescale implementation of the around-the-clock service. McDonald's continued to test the Mini-Mac concept, a smaller restaurant that caters only to drive-through or pedestrian traffic.

The percentage of freestanding restaurants with drive-throughs increased from 71% to 79%. During the year, McDonald's expanded the McDonald's Playland facilities, bringing the total at yearend to 979, compared to 581 at the close of 1980. Built adjacent to restaurants or integrated into the interior design of the dining area, McDonald's Playland features a McDonaldland theme and the chain's children's characters. The chain plans to expand the Playland concept, adding 1,000 more play areas. A test concept, children's miniature golf on the restaurant grounds, was tried in single units in Dallas, San Diego and an unidentified New York site.

International expansion is a key priority for the chain, and as the year went on, McDonald's opened its first units in Spain, Denmark and the Philippines. McDonald's said it planned to enter Mexico, Venezuela, Colombia and Norway within the next two years.

In June, 1982, the company's board of directors named Edward Schmitt, president-chief administrative officer, to the post of vice-chairman and chief administrative officer. Michael Quinlan, president, McDonald's U.S.A., was appointed president-chief operating officer of the company, while maintaining his former domestic duties. Edward Rensi, executive vp-chief operations officer, was elected senior executive vp and appointed to the board of directors.

During 1981, McDonald's made several other executive appointments. William Youngclaus, formerly senior vp-director of client services, Young & Rubicam, Chicago, joined the company as vp-marketing. He succeeded Raymond Caruso, who assumed the position of vp-communications. Mr. Caruso headed a new company department encompassing corporate communications, public relations, public affairs, creative services and the company's cross-departmental Total Marketing Approach (TMA) task force.

For the three years preceding the 1984 Olympic Games, McDonald's, which has the exclusive fast-food restaurant rights to the event, will sponsor "age group" and Junior Olympic swim meets. In addition to supporting pre-Olympics events, McDonald's sponsorship plans include underwriting costs associated with the McDonald's Olympic Swim Stadium on the University of Southern California campus in Los Angeles. The company is expected to be a major advertiser during the games' broadcasts.

Miles Laboratories

	1981	1980
Sales	$767,606,000	$686,117,000
Earnings	1,465,000	7,433,000
Advertising*	72,084,700	72,987,900

*AA estimate

Miles Laboratories, Elkhart, Ind., the 73rd largest advertiser, spent approximately $72 million on advertising in 1981, down 1.2% from 1980's total of $72.9 million.

Sales rose by 12% over 1980 to $768 million. Earnings decreased to $1.5 million, because of high interest charges and foreign currency fluctuations.

In 1981, Miles spent $53 million on research and development worldwide, an 18% increase over 1980.

Measured media spending decreased 2% over-all in 1981, down to $43.7 million from $44.6. Although Miles increased its spending in spot tv by 2%, up to $5.7 million from 1980's $5.5 million and magazines, spending in all other categories measured by Leading National Advertisers was down. Newspaper spending fell to $14,600 from last year's $31,400, and in spot radio, Miles cut its budget to $51,100 from $178,400 in 1980. Network radio was cut to $444,600 from last year's $528,300. Magazine spending rose 50% to $3 million.

The company markets its products through four operating units: Miles Pharmaceuticals, Miles consumer products group, Miles professional products group, Miles biotechnology group.

The consumer products group is composed of the consumer healthcare and the grocery products divisions. Miles markets children's and adult's vitamins under the brand names One-A-Day, Flintstones and Bugs Bunny and home remedies under the names Alka-Seltzer, Alka-Seltzer Plus, Alka-2, Bactine and Miles Nervine.

The Alka-Seltzer product line increased its measured ad support by 8% this year, up to $21.1 million in 1981 from $19.5 million in 1980. Alka-Seltzer Plus Cold Medicine received $4.95 million in media support in 1981, adding to its share in the highly competitive cold remedy market. In January, Miles hired Conill Advertising, New York, to handle Alka-Seltzer's Hispanic advertising.

Bactine antiseptic anesthetic cut its measured media support by 11%, down to $1.2 million from $1.3 million. In 1981, Miles introduced Bactine hydrocortisone skin cream in a network tv and couponing program. An estimated $1 million was spent on advertising the new product in the last few months of 1981.

In the $1.7 billion vitamin market, the company expanded the One-A-Day multivitamin line and introduced One-A-Day Stressgard, a stress formula vitamin and mineral combination. At the same time, One-A-Day Plus Minerals was reformulated to contain 12 vitamins and 12 minerals. One-A-Day products reportedly hold at least 32% of the vitamin market.

In addition, all five products, including One-A-Day Essential, One-A-Day Plus Iron and One-A-Day Plus Extra C, revamped their packaging to convey an entire One-A-Day line look.

A new advertising campaign was developed using the theme, "Putting nutrition to work for your body." The campaign received $6.3 million of measured media support, a decrease of 15% from last year's $7.4 million, and in 1982, the company launched a network tv and consumer magazine campaign. Miles plans to spend $10 million promoting the vitamins in 1982.

The grocery division encompasses S.O.S cleaning products and the Morningstar Farms and Worthington Foods lines of textured vegetable protein foods.

S.O.S soap pads continued to dominate the scouring tool market in the U.S. and Canada, reportedly holding a 35% share. S.O. Ezy, a two-sided scrubber with soap introduced in the fall of 1980, has established itself as a major entry in the medium-to-light cleaning category. Combined promotion budget for the products totaled $4 million in 1981.

Nonconsumer marketed products include prescription pharmaceuticals, dermatologicals, medical instruments and diagnostics, laboratory supplies, enzymes, food ingredients and industrial chemicals.

A substantial sales increase over 1980 was achieved by Miles Pharmaceuticals. Highlighting this successful year of expansion was the Food & Drug Administration approval of Mezlin (mezlocillin sodium), the first of a new generation of broad-spectrum semisynthetic penicillins used intravenously or intramuscularly, injectable in lower respiratory tract, urinary tract, skin and intra-abdominal infections.

The professional products group is composed of the Ames division, Lab-Tek division and the research products division. The Ames division, which introduced the Ames Dextro System in 1980 for insulin-dependent diabetics to self-monitor blood glucose levels, recorded excellent results last year. It was upgraded by the Glucometer Reflectance Photometer, a portable electronic instrument less expensive to purchase and easier to calibrate than the Dextro-

The 1981 Ad Dollar Summary

Year-End Issue Only $100.00

- The only complete listing of all brands active in six major media: consumer magazines, national newspaper supplements, network and spot television, network radio, outdoor.
- Expenditures for more than 28,000 brands—listed in alphabetical order with parent company identification and media used.

PLUS

- The top 1000 companies with Ad Dollars listed by media.
- The top 10 brands in each of 243 product categories with category total.

A complete summary of Ad Dollars from the PIB Service, LNA Broadcast Services, LNA Outdoor. The official industry figures prepared by MPA, TVB, RAB, OAAA used by every major advertiser and their advertising agencies.

The Lab-Tek division introduced two new products. They were a large 650ml flask that is specially treated to assure optimal cell yield in tissue culture growth and the Lux brand Select-A-Multi-well Plate for micro-inoculation.

In research products, the Monoform monoclonal antibodies line, first introduced in 1981, was expanded to make additional products available to the research community worldwide.

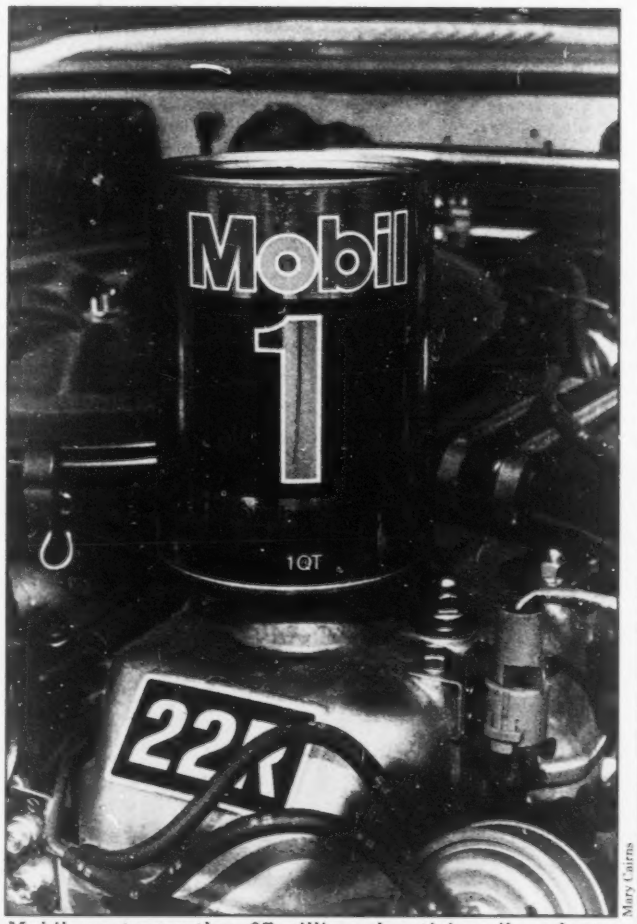
Mobil Corp.

	1981	1980
Sales	$68,587,000,000	$63,726,000,000
Earnings	2,433,000,000	2,813,000,000
Advertising*	293,103,200	274,316,700†

*AA estimate
†Restated

Mobil Corp., New York, the nation's 10th largest advertiser, increased its ad spending to $293.1 million in 1981, up 6.8% from $274.3 million in 1980.

The 1980 figure has been revised since last year's report to include newspaper preprint advertising, which is included in the 1981 total.



Mary Cairns

Mobil spent more than $7 million advertising oil products.

The quickly accelerating gains Mobil recorded on its balance sheets of the last several years slowed appreciably in 1981, as the corporation saw sales rise by 7.7% to $68.6 billion in 1981 from $63.7 billion in 1980. This compared with an increase of 32% in sales from 1979 to 1980 and a 29% jump from 1978 to 1979.

Even more notable was the dip in Mobil's earnings, which totaled $2.4 billion in 1981, a decrease of 14.3% from the record $2.8 billion of 1980. Again, this was a marked difference from the earnings gains of the immediately preceding years: Forty per cent from 1979 to 1980 and 77% from 1978 to 1979.

The company attributed the more modest figures to the worldwide economic slowdown, a reduced demand for energy and a global oil surplus, as well as lower foreign inventory profits and weaker foreign currencies. Despite the slowdown, the company noted, 1981 earnings were second best only to record earnings of 1980, and Mobil Corp. maintained its No. 2 standing in *Fortune's* list of the nation's 500 largest industrials, behind Exxon Corp. and ahead of General Motors Corp.

Reduced demand for energy and a surplus of oil would, of course, have a substantial effect on this primarily energy-related company's performance. Worldwide energy operations accounted for 84.5% of sales in 1981, with revenues of $58 billion, compared with $53.8 billion in 1980, or an increase of 7.8%. Earnings, however, decreased 10.3%, from $2.9 billion in 1980 to $2.6 billion in 1981. (Earnings from the energy operations are measured before corporate expenses and other items; hence, they are actually more than Mobil Corp.'s total earnings.)

The rise-in-sales, drop-in-earnings picture also affected Mobil's chemical operations, which saw revenues in 1981 of $2.4 billion, up 20% from $2 billion in 1980. Earnings at the same time dropped 21% to $93 million in 1981 from $119 million in 1980. Mobil attributed the decline to lower petrochemical and phosphorus earnings in the U.S. and lower petrochemical and plastics margins in Europe.

As adversely affected by economic conditions these two segments of Mobil's family may have been, retail operations—through the Montgomery Ward & Co. subsidiary—could not escape the severe financial trials and tribulations that started several years ago. Although revenues increased 3.4%, from $5.9 billion in 1980 to $6.1 billion in 1981, Wards reported a loss of $160 million. This compares with a loss of $162 million in 1980.

Mobil's paperboard operations, handled by its Container Corp. of America subsidiary, also recorded an earnings decline, from $65 million in 1980 to $50 million in 1981, a decrease of 23.1%. These figures came on revenues of $1.85 billion in 1981 and $1.74 billion in 1980, a 6.3% increase.

This over-all picture of a slowdown in growth was overshadowed during the last year by Mobil's participation in the merger and acquisition scramble that has underscored much of recent American business activity. Hardly a week went by in the second half of 1981 when Mobil, a corporation of high visibility even by the standards of big business, was not in the headlines of the business or consumer press.

In July, 1981, Mobil entered the celebrated bidding for Conoco, the nation's ninth largest oil company, with an ultimate offer of $120 a share, topping bids by E.I. du Pont de Nemours & Co. and Seagram Co. Ltd. But concern arose over antitrust considerations, as well as over Mobil's tactics, and the eventual winner in the battle turned out to be Du Pont, which acquired Conoco for a reported $7.8 billion, the most expensive takeover in American history.

Seemingly undaunted, Mobil later in the year made a $5.1 billion offer to acquire Marathon Oil Co., and the case turned out to be another in which the wooer was much more willing than the wooed. Marathon directors, vigorously opposed to the move, attempted to obtain a court injunction against Mobil, and eventually found a friendly suitor in U.S. Steel Corp., which offered $125 a share. The $6.4 billion purchase price, after much wrangling in the courts and among public relations campaigns, went to U.S. Steel, as the U.S. Supreme Court cleared the way for the steel giant early this year.

To many observers, who described Mobil variously as "combative" and "renegade," the hostile—and unsuccessful—takeover attempts cast the oil giant in a negative light. Mobil Corp. chairman Rawleigh Warner explained the proposed acquisitions as part of the company's long-term objective of obtaining crude oil reserves. But many attributed the failures of the takeover efforts to fears over antitrust considerations.

Meanwhile, even as Mobil failed to buy oil reserves through these two highly publicized battles, it managed to strike some success in its oil exploration attempts worldwide. The company reported that finding and developing new energy sources accounted for about 59% of capital expenditures in 1981.

During the year, Mobil made significant discoveries of hydrocarbons in the U.S., Nigeria, Cameroon and West Germany. It expanded its holdings in the Gulf of Mexico, spudded its first well off the coast of New England and continued to evaluate its natural gas strike in Mobile Bay, Ala.

At the end of the year, Mobil held 2.4 billion bbls. of crude oil and other liquid hydrocarbon reserves worldwide, an increase of more than 300 million bbls. since 1979. Natural gas reserves over the same period increased 20% to 17.4 trillion cu. ft. from 14.4 trillion cu. ft.

In the consumer arena, Mobil motor oils continued to receive a significant portion of Mobil Oil Co. advertising and marketing support. In all, Mobil spent more than $7.1 million in 1981 to advertise its various lines of oil, all of the spending going to spot tv. That compares with nearly $6.1 million the company spent on motor oil ad spending in 1980.

Most of the 1981 ad support—

$2.2 million—went toward Mobil 1, a synthetic fuel-efficient product, and Mobil Super, a gas-saving conventional oil introduced in 1981.

One notable change Mobil made during the year in its consumer marketing was to increase ad spending for Mobil gasoline. Whereas in 1980, the company spent only $10,000 in ad spending for gasoline, in 1981 it pumped $4.2 million, exclusively in spot tv—toward its primary consumer product. The significant increase in spending reflected a trend in the gasoline business toward a heavier emphasis on marketing and marketing concerns as gas prices edged downward in late 1981 and early 1982.

Worldwide, Mobil has 35,500 retail dealer outlets, 47% of them in the U.S., for its various lines of gasoline and petroleum products. In 1981, sales volume for these products declined from previous years, with automotive gasoline being sold at the rate of 710,000 bbls. a day, compared with 776,000 in 1980 and 796,000 in 1979.

One byproduct of the fluctuations of gasoline prices and concern over cost-cutting was an industry reassessment in early 1982 of credit card usage at retail outlets. Atlantic Richfield Co. in April coupled a move to stop accepting credit cards with a cut in wholesale gasoline prices of nearly 3 cents. For its part, Mobil began using a discount-for-cash approach to gas sales.

In the chemical end of Mobil's consumer business, Mobil Chemical Corp. introduced a "20% tougher" plastic waste bag under the Hefty brand family. In all, Mobil spent $12.2 million in 1981 to support its Hefty lines, which range from foam dinnerware to the various styles of plastic bags. The figure was up considerably from the $8.5 million Mobil spent in 1980.

Most of the support for the Hefty brand went to trash can liners and tall kitchen bags, which together received more than $11.1 million.

Meanwhile, Montgomery Ward & Co., Mobil's venture into retailing, continued to suffer losses on the balance sheets, as Wards' new management began to show signs of a new strategy to provide an uplift.

Much of the discussion about Wards centered on the plans being developed under the direction of Stephen L. Pistner, who came to Wards in early 1981 as president after a successful career at Dayton Hudson Corp. At Dayton Hudson, Mr. Pistner was credited with building up the company's successful Target discount store operation.

But at Wards, the challenges are proving to be tougher. With Mobil lending huge sums of money to help Wards back on its feet, the retailer has had to deal with building up a stronger identification for itself and an economy that has not been all that cooperative to sales.

Nevertheless, Mr. Pistner, who took over as chief executive officer in September (succeeding Edward S. Donnell), has streamlined management, brought in an army of new people and centralized many operations, including advertising.

The strategy that is emerging seems to hinge on Wards' ability to become less of a mass merchandiser and more of a retail operation with specialty areas throughout the store.

So far, this has meant changing the product mix—paring down the number of items the stores carry, an emphasis on high turnover products and the introduction of more brand name merchandise.

One thing was definite during the year: Under Mr. Pistner, Wards would not be converting 115 of its units into Jefferson Ward outlets, the company's discount operation, as had been planned.

Evidence of Mr. Pistner's strong hand was the centralization in late 1981 of Wards advertising efforts. In the past, Wards ad efforts were placed largely on a local basis, but beginning in 1982 the retailer started committing 70% of its newspaper advertising to preprinted color supplements appearing in Sunday newspapers in its various markets.

In 1981, measured media spending for Wards and Wards merchandise totaled $20.8 million, the bulk of it in spot tv and only $138,900 in newspaper supplements. Total spending was down from the $24.9 million recorded in 1980. Ad spending for Jefferson Ward in 1981 totaled $2.7 million—all of it in spot tv—compared with $1.7 million in 1980.

While Montgomery Ward goes through a period of major readjustment, Mobil's paperboard and packaging subsidiary, Container Corp. of America, enlarged its timberland holdings and began construction of a technical and research complex in Carol Stream, Ill. During the year, CCA continued its 32-year-old "Great Ideas" ad campaign and introduced a "Container Container" series to promote its ability to develop "innovative" packaging.

CCA's measured media ad spending in 1981 totaled $220,500, but Mobil reported an additional $332,165. In 1980, measured spending amounted to $96,800.

As active as all of Mobil's divisions were in 1981, one would expect corporate advertising spending to have increased as well. It did. In 1981, the company reported spending $6.1 million for corporate print ads, compared with $5.0 million in 1980, and $2.9 million for tv issue commercials, compared with $2.0 million in 1980.

Leading the way, of course, were the all-print quarter page "advertorials" that appear on the op-ed pages of leading dailies and in selected consumer magazines. Those series are in their 11th year, and they continue to be a source of controversy, particularly when a lot of attention focuses on Mobil or the oil industry in general.

But Mobil is also a leading underwriter of Public Broadcasting Service programing, celebrating its 10th anniversary

Informative, entertaining, responsible, bright, contemporary, readable, believable (with widely acclaimed special sections every morning), the News is the choice of Denver's affluent and influential—the decision makers and the buyers. More of this city's major movers and shakers read and respond to the News than any other newspaper. Studies confirm it.* (And we'll be happy to supply you with the facts and figures.) Denver chooses the News.

with "Masterpiece Theatre" in 1981. It also lined up a series of heavyweight programs for its "Mobil Showcase Network" for syndication across the country. A top title in the series is an 8½-hour miniseries of "Nicholas Nickleby," a Tony-award winning play and the subject of much attention on Broadway in 1981.

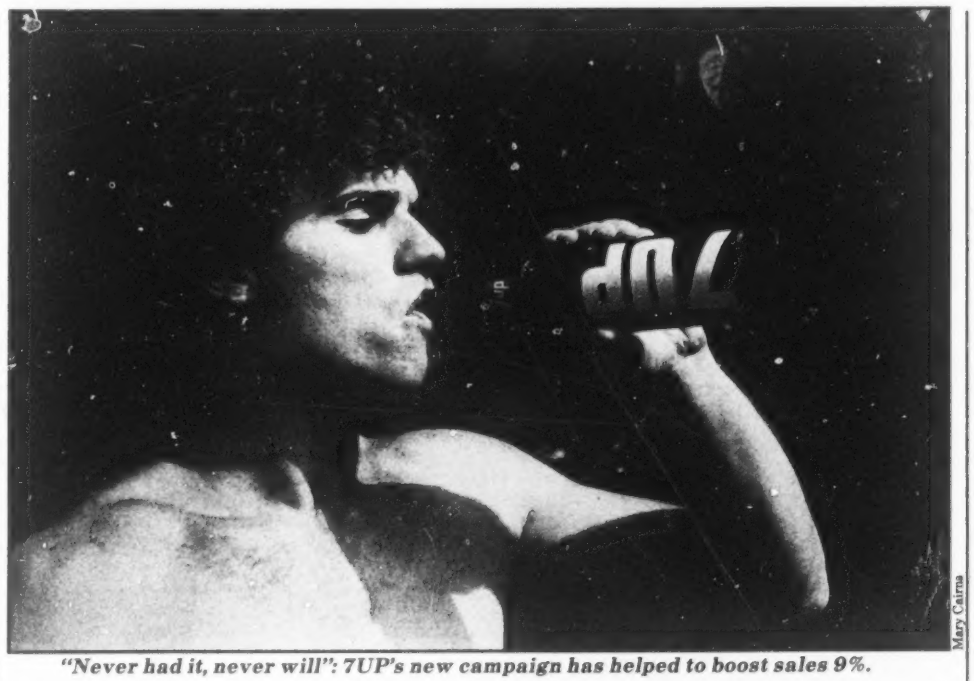
Philip Morris Inc.

	1981	1980
Sales	$10,885,900,000	$9,822,300,000
Earnings	676,200,000	576,800,000
Advertising*	432,971,400	364,594,700

*AA estimate

Philip Morris Inc., New York, the fourth largest national advertiser, increased its advertising 19% in 1981, to an estimated $433 million, a year in which, as usual, cigaret and brewing operations played the key roles in the company's sales and earnings growth.



Mary Cairns

"Never had it, never will": 7UP's new campaign has helped to boost sales 9%.

Consolidated sales were up 10.8% to $10.9 billion in 1981. Earnings were $676.2 million, a 17.2% gain over 1980. For the first six months of 1982, consolidated sales were $5.9 billion, an increase of 8.6% over the same period last year. Net earnings climbed 22.9% to $357.1 million from $290.6 million earned during the first six months of 1981.

The contributions of Miller Brewing Co., Milwaukee, to consolidated revenues and operating income in 1981 were 26.1% and 8.1%, respectively. (It increased operating revenues 11.6% to $2.3 billion.) Miller had a 21.9% share of the industry in 1981, up from 20.6% in 1980. It had an 8.1% increase in bbls. sold in 1981 over 1980.

The company's U.S. and international cigaret sales increased to 449 billion units in 1981. Philip Morris U.S.A., the company's largest operating unit, increased its domestic cigaret output (including exports) to 245 billion units, or 33.9% of the U.S. market, the volume of which totaled 627 billion units in 1981, according to the Maxwell Report.

Seven-Up Co., St. Louis, reported a $1.7 million loss in operating income in 1981, well under the 1980 loss of $7.1 million. Operating revenues increased from $353.2 million in 1980 to $432.1 million in 1981.

With its share of the domestic soft drink market slipping just below 7% in 1981, Philip Morris made two key moves: A repositioning of 7UP, using a no-caffeine campaign, and moving a new cola drink, Like, into eight test markets. Like, which is 99% caffeine-free, was backed by $2.3 million in advertising.

The no-caffeine campaign immediately drew cries of protest from other soft drink manufacturers and bottlers. Bottlers producing other drinks, such as Coke, Pepsi and Dr Pepper, believe the advertising campaign, touting no caffeine, could hurt sales of drinks containing caffeine. Officials of PepsiCo Inc. said the campaign relied on scare tactics. Seven-Up is spending about $1.5 million on the no-caffeine spots.

All of the commercials center on the no-caffeine theme. The one spot that has triggered the most controversy shows rival products: Dr Pepper, Coca-Cola, Pepsi-Cola, Mountain Dew, Tab and Mello Yello. In it, Tug McGraw, Philadelphia Phillies relief pitcher, tells a group of children, including his daughter, to find the soda without caffeine. "It's 7UP!" he says. "I'm talkin' no caffeine. I mean zero. Never had it, never will."

The company took risks when it decided to introduce Like and undertake the no-caffeine campaign. Approximately 40% of Seven-Up's volume goes through bottlers that also handle Pepsi Cola, Coca-Cola or R.C. colas. They may be alienated by an anti-caffeine campaign.

If it intends to take Like nationally, Seven-Up needs to find bottlers not already committed to Pepsi, Coke or another cola, or who would be willing to take a chance with a new cola.

Both the new campaign and the Like introduction seem to be going well for the company. Like's share of the market in test has shown a steady increase, while industry analysts report that 7UP sales have increased between 8-10% since the introduction of the no-caffeine spots.

Miller Brewing Co. changed its pricing strategy in 1981 in response to increasingly competitive market conditions. Miller delayed its price increases approximately three months following Anheuser-Busch increases in late 1980 and again in late 1981.

This tactic, combined with an advertising blitz, enabled the brewer to increase volume 8.1% over 1980 to record a record shipment level of 40.3 million bbls, giving Miller a 22% share of the market.

Miller's hot property, Lite beer, has come under heavy attack from Anheuser's new Budweiser Light. A-B has spent approximately $40 million in the brew's introduction. In 1981, Lite accounted for 2.9 million of the 3 million gain in Miller's barrelage.

Lowenbrau, which was tapped to counter Michelob, has not fared well over time with consumers who were skeptical when Philip Morris began brewing the German beer in the U.S. But in 1981, Lowenbrau had 27% growth in barrelage to an estimated 1.7 million bbls.

That growth cost Miller $19.5 million in advertising, more than half of which was spent on Miller High Life, which shipped about 23 million bbls. High Life accounted for approximately 60% of the company's total shipments in 1981.

Philip Morris continued its quest to introduce a successful menthol cigaret to compete with Brown & Williamson's Kool and R.J. Reynolds' Salem. It began retesting Northwind as a low-tar, menthol smoke.

The company's entry in the ultralow-tar category, Cambridge, has not proved successful after two years on the market. The cigaret has gained only a 0.2% share of the market. (In a related development, the company started national introduction in June of Benson & Hedges Ultra Lights.)

Despite trouble with a few brands, Philip Morris' worldwide cigaret business is the company's money-making machine. Over the past decade, Philip Morris has doubled its market share. In 1981, U.S. cigaret sales were up 1.4% while Philip Morris was recording a 4.3% gain. The company's domestic market share moved from 31% in 1980 to 31.8% in 1981.

Marlboro remains the top-selling smoke in the industry, Benson & Hedges is the leading 100mm cigaret, Merit is the top-selling free-standing low tar and Virginia Slim is the top-selling cigaret designed for women.

Philip Morris U.S.A. had operating revenues of $3.8 billion and operating income of $906 million in 1981. Philip Morris International had operating revenues of $3.4 billion and operating income of $373 million.

Looking for other advertising avenues, Philip Morris instituted the Merit Report, an opinion poll that will be conducted in 140 U.S. cities. The poll is conducted by company employes who will tour the country in vans.

In each city, citizens can go into the computer-equipped vehicles and answer 10 multiple-choice questions on national issues. At the end of each week, the data are fed into a main bank in New York so that press releases reporting the national results can be sent to news organizations throughout the country. Philip Morris is reportedly spending $10 million a year on the poll.

MortonNorwich Products

	1981	1980
Sales*	$957,584,000	$846,601,000
Earnings*	53,010,000	47,730,000
Advertising**	42,483,800	50,212,800

*Fiscal year ending June 30
**AA estimate

MortonNorwich Products, Chicago, the 94th largest national advertiser, decreased its advertising spending approximately 15% to an estimated $42.5 million.

Sales of $957.6 million for fiscal 1981 represent a 13% increase over $846.6 million in sales for fiscal 1980. Net income was up about 11% to $53 million from $47.7 million in fiscal 1980.

For fiscal 1982, ended June 30, the company reported a 26% increase in net income, up to $48.5 million. Net gain for the year was $79.8 million, primarily due to the sale of the pharmaceutical division. Net sales were up 9% in 1982, to $787 million.

In March, 1982, Procter & Gamble agreed to buy MortonNorwich's $216 million pharmaceutical business, the Norwich-Eaton division. The cost to Procter & Gamble was $371 million in cash.

The pharmaceutical operation, which produces professional drugs as well as over-the-counter medications, recorded profits of $21.9 million on sales of $215.8 million last year. In fiscal 1981 the unit showed earnings growth of 36% over 1980 and accounted for 22% of MortonNorwich's operating profits and 23% of total sales.

At the time the sale to P&G was announced, analysts agreed the reason MortonNorwich sold its drug business is that the market demands excessive cash expenditures on the part of companies in order to have an impact. A New York Times report said "In 1982 about 15 drug companies will each spend $100 million or more on research and development . . . compared with MortonNorwich's total corporate research and development last year of only $24.3 million."

Norwich-Eaton's over-the-counter products are estimated to make up 80% of sales for the unit. Among these products is Pepto-Bismol, a $65 million brand with approximately 12% of the $550 million stomach remedy market. The company spent about $6.3 million to advertise the product in calendar 1981, down from last year's $7.4 million.

In the sore throat remedy market, the company has the brand leader in Chloraseptic, an oral antiseptic-anesthetic. The company said sales of the brand, because of growth in the lozenges, were up 14%. Chloraseptic has over a 40% share of the market. During 1981, advertising for the line was moved to Henderson Advertising from James Neal Harvey Inc. Henderson also handles many brands in the company's household products division. Chloraseptic was backed by about $3.7 million in measured media advertising in calendar 1981, about even with the previous year's spending.

Norwich aspirin, the company says, was up 55% in sales from 1980, where a 50% increase was shown. Sales of aspirin were about $6 million. The company used consumer promotion, tying in Norwich aspirin with Chloraspetic and Pepto-Bismol. Coupons in freestanding newspaper inserts were used.

Ad spending for the Encare Oval contraceptive was cut almost in half to about $500,000, all in magazines. Procter & Gamble will not be acquiring the Encare Oval product with the rest of the pharmaceuticals unit.

The household products division, Texize, was a success story for MortonNorwich in 1981, as sales rose 19% to $228.6 million from $191.6 million. Earnings were up 50% to $23.1 million from $15.4 million.

Yes heavy-duty detergent plus fabric softener, which was rolled out nationally in July, 1981, accounted for 40% of the division's sales growth.

Yes received $8.4 million in measured media spending, a 55% boost from 1980. Of that sum, $4.2 million went to network tv, $2.8 million to spot tv and $1.2 million to magazines. Ad spending for Yes the previous year was $5.4 million.

Another household product mainstay for the company is Spray 'n Wash, the leader in the soil and stain remover category with 49% of the market. Sales for Spray 'n Wash were up 5% in the company's fiscal year. The company cut ad spending for the brand by 34%, down to $5 million from $7.7 million in calendar 1980.

Another category-leading product that got a cut in ad support was Fantastik spray cleaner, where spending was down 14% to $4.5 million, from $5.7 million. The majority of 1981 spending was in network tv. Sales for Fantastik were up 14%, the company said.

Glass*Plus, the No. 2 product in the $100 million-plus glass cleaner market, experienced sales growth of 18% in the company's fiscal 1981. Ad spending for this brand was down 16%, to $3.6 million from $4.3 million.

Wood*Plus, in its second year of national distribution, had a 4.1% share of a category which is dominated by S.C. Johnson & Son with its Pledge brand. Wood*Plus ad spending was up slightly to $129,700 from $96,600.

The No-Pest line of insecticides also is a minor factor in a Johnson Wax-dominated category. Where Raid has 48.4% and American Home Products' Black Flag line has 17.4%, the Texize No-Pest line shows up with 4.1% of the segment. Ad support behind the brand was cut 44% to $1.2 million from $2.3 million the previous calendar year. The company introduced a new product in the line, a flea spray.

Ad spending for Grease Relief kitchen and laundry cleaner was cut completely from $899,000 spent in calendar 1980.

In the company's Morton Salt division, sales were $321 million, up from $295.3 million in fiscal 1980. Profits were $46.9 million, up from $45.2 million the previous year. No measured media spending was recorded in calendar 1981 except for Morton Salt pellets and pellens, which were backed by $68,100, mostly in newspaper supplements. Despite some concern over a possible agency review, Needham, Harper & Steers continues as the agency on a fee basis.

In July, 1982, MortonNorwich acquired Thiokol Corp., a specialty chemicals company, for about $540 million in cash and stock. The acquisition was largely financed by the proceeds from the sale of the company's pharmaceutical division to Procter & Gamble.

Nabisco Brands

	1981	1980
Sales	$5,818,200,000	$5,587,200,000**
Earnings	266,300,000	234,600,000†
Advertising*	340,983,000	192,124,000

*AA estimate
**Nabisco Inc. and Standard Brands combined
†Revised

Nabisco Brands, New York, the seventh largest national advertiser in 1981, spent an estimated $341 million on advertising, a 77.4% increase over estimated 1980 expenditures of $192.1 million.

In 1981, Nabisco merged with Standard Brands, forming Nabisco Brands, the nation's fourth-largest food company. The merger was approved by stockholders on July 6, 1981.

In the same month, through William Esty Co., the company ran a newspaper ad "Announcing the First Day of Trading for Nabisco Brands." It featured Robert Schaeberle, new chairman-chief executive officer and former Nabisco Inc. chairman, and new president F. Ross Johnson, former chairman of Standard Brands.

Contrary to the stockholder prospectus that stated Nabisco and Standard Brands would retain their separate identities and operations, the two companies consolidated totally and dropped the Standard Brands name.

Most financial analysts said that the integration and reorganization took place much sooner than they expected. Industry forecasters over the last 14 months have continually commented on Nabisco having emerged as the stronger partner in the marriage.

Since the merger, the company has gone through major revisions of its organizational map as well as agency reassignments. At yearend 1981, Nabisco was organized under two branches, Nabisco Foods and Nabisco Products. These two operating groups were created shortly after the merger—as well as

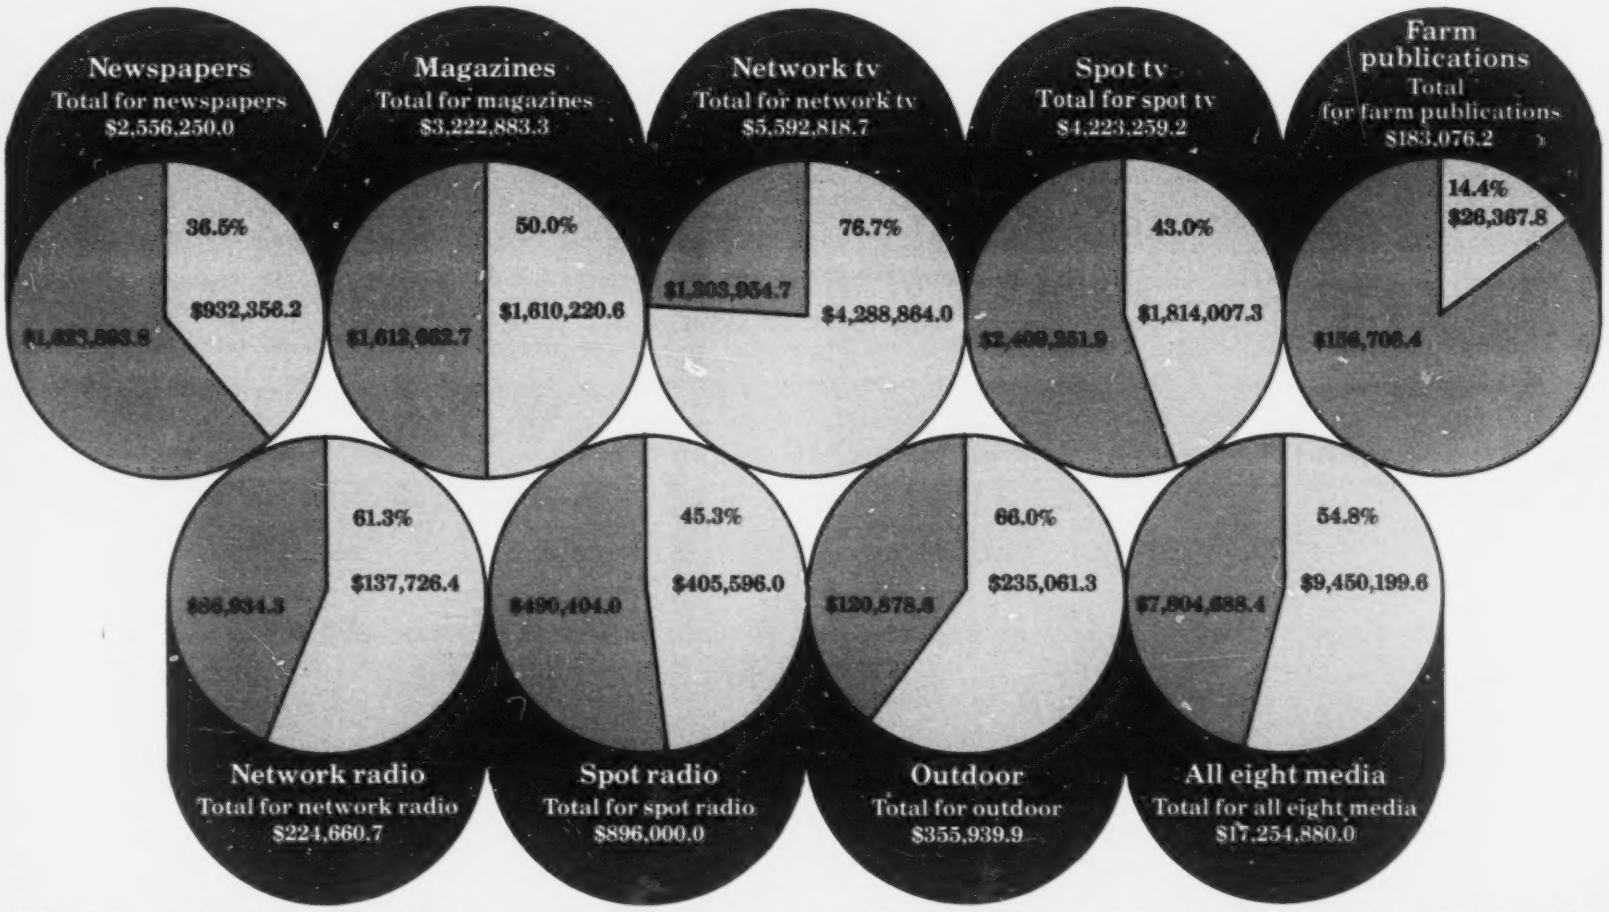
100 leading national advertisers account for giant share of expenditures in most media



Of the 17.3 billion invested by national advertisers in eight media last year, more than half (9.5 billion) came from the 100 leading national adve. isers, as shown in these charts. Sources: Leading National Advertisers; Publishers Information Bureau; Broadcast Advertisers Reports; Radio Expenditure Reports; Institute of Outdoor Advertising; Outdoor Advertising Assn. of America; Radio Advertising Bureau; Agricultural Marketing Information Service (AGRI-COM); Media Records

after management announced its intention to run both companies independently with one corporate parent.

Under the second reorganization, announced in May, the company was split into two major branches. Nabisco Brands U.S.A. includes all domestic food operations, all Nabisco food products and Standard Brand food products as well as the beverage group. It also includes food ingredients, a segment on which the company spends no ad dollars.

The second division, Nabisco Brands International, consists of all nonfood products, J.B. Williams toiletries and pharmaceuticals, its Associated Products division (shower curtains and household accessories) and all foreign holdings. Nabisco's international operations account for 30% of the company's net sales and 25% of operating income.

The company reported worldwide sales of $5.8 billion in 1981, 4% greater than its net sales of $5.6 billion of both companies combined in 1980. Net income rose 13.4% to $266.3 million from combined income of $234.8 million in 1980. Earnings per share of common stock were up 12.9% to $4.21. Nabisco reported earnings for the first half of this year of $129.7 million, up 18% from the same period last year, and an increase in sales of 4%, to $2.92 billion.

Nabisco's performance was also strengthened by its acquisition of Squibb Corp.'s Life Savers. The move added a complementary line of rolled candies, bubble and chewing gum to the company's already diverse confectionery division. The December, 1981, $250 million purchase made Nabisco Brands the third-largest confectionery marketer in the U.S. Life Savers is also the country's largest producer of bubble gum, with a 33% share of that market. In the chewing gum market, Life Savers has an 11% share, trailing the lead of Wrigley and Warner-Lambert's American Chicle division.

Nabisco's entry into the chewing and bubble gum market has added more leaders to the company's line of top brands, like Oreo, which more than one industry observer believes is the nation's No. 1 cookie. But the company faces formidable competition in both the cookie and snack markets. Cookies and crackers accounted for 30% of the company's total sales.

Keebler and American Brands' Sunshine still trail Nabisco as cookie competitors. However, in May Frito-Lay introduced a 16-variety line of Grandma's cookies aimed at grabbing Nabisco's limelight. To counter Frito-Lay's move, Nabisco has been beefing up its line of salty snacks in cannisters under the Planter's label and introduced a corn chip to compete with Frito-Lay's No. 1-selling Frito's corn chip.

In agency realignments prior to the merger of Standard Brands and Nabisco, the former dropped Wells, Rich, Greene; Doyle Dane Bernbach; D'Arcy-MacManus & Partners and Chicago-based Lee King and consolidated its food and confectionary business at MCA Advertising. Marketing Co. of America had been hired in 1979 for marketing advice. MCA handled Nabisco's introduction in December, 1981, to Florida test markets of Sunburst, a 100% sunflower oil margarine. Thus far, no plans have been announced to introduce Sunburst nationally.

But earlier this year, Nabisco ended its relationship with MCA. It split reassignments of some of its brands between McCann-Erickson and Benton & Bowles.

McCann-Erickson added Baby Ruth and Butterfingers candy bars to the Nabis-co accounts of hot and ready-to-eat cereals and Dromedary baking mixes.

Benton & Bowles, which handles the Planters line of nuts, oil and snacks, gained the Fleischmann's and Blue Bonnet margarine lines.

Media spending for Fleischmann's and Blue Bonnet in 1981 totaled upwards of $3.3 million while Baby Ruth and Butterfinger received only $12,400 of media support in 1981.

MCA also lost Tender Leaf tea, Royal puddings and gelatins and Fleischmann's Egg Beaters. These products will be promoted on a project basis by Ted Chin & Co.

In another agency reassignment, Nabisco moved approximately $6 million worth of its Life Savers business to Dancer Fitzgerald Sample, New York, from Foote, Cone & Belding this summer. Dancer adds Bubble Yum bubble gum to Life Savers and Breath Savers roll candies and Care*Free gum.

Dancer's challenge will clearly be to keep Bubble Yum the leader in the soft bubble gum category it virtually created in the mid-1970s. It has major competition from two later entries, Warner-Lambert's Bubblicious and Wrigley's Hubba Bubba.

Also in 1981, Nabisco introduced Gold Line dessert cookies, I Scream sandwich cookies, Fudge Striped Shortbread, and two snack crackers, Country Crackers and Better Cheddars. The latter was introduced via tv commercials featuring actor Ron ("Barney Miller") Carey and national newspaper ads. Other products introduced to test markets in 1981 were Morning Power, a vitamin-enriched hot cereal, and Country Cremes, vanilla custard cookies.

Internationally, the company acquired a 30% interest in Grupo Gamesa, the Mexican leader in cookie and cracker sales. In addition, it signed an agreement to acquire the final 25% of Gallesta Artiach, a major cookie and cracker manufacturer in Spain of which the company already owned a 75% interest.

In other moves in 1981, Nabisco disposed of its Pinata Mexican food and Royal Dragon Oriental food operations, and sold its U.S. Chase & Sanborn coffee business to General Coffee Corp. for more than $15 million. Prior to the sale of the coffee division, the brand had been unadvertised for some time.

A major move planned in 1982 is the sale of Nabisco's J.B. Williams toiletries and pharmaceuticals division, which has suffered a steady decline in earnings since 1979. J.B. Williams includes brands marketed in more than 20 countries: Lectric Shave, Aqua Velva, Rose Milk lotion, Geritol vitamins, Femiron vitamins and iron, Deep-Down topical analgesic, Acu-Test pregnancy test kit, P.V.M. appetite suppressant and diet

plan, Serutan laxative, Sominex sleep aids and Vivarin stimulant tablets. In 1981, the company spent more than $10 million on advertising for Geritol, the largest dollar amount it spent on any single Nabisco brand.

J.B. Williams was up for sale prior to the Nabisco-Standard Brands merger. Nabisco reportedly is asking $75 million for the division. Included in the sale will be house shop Parkson Advertising, which is a part of the Williams division. Parkson currently buys about $60 million worth of network tv for all Nabisco products and handles creative for Triscuit, Escort, Wheat Thins and Chicken-in-a-Biscuit crackers, amounting to an estimated $5 million in billing.

Even with the volume of business handled by Parkson, Nabisco, under the direction of W. Lee Abbott, has put together a new marketing services department. However, Mr. Abbott does not rule out allowing the Nabisco business to remain at Parkson even under another company's leadership.

Also recently announced was Nabisco's plan to sponsor exclusively the tv coverage of the Jan. 1, 1983, Tournament of Roses parade. The company will spend an estimated $2 million through Parkson. The company expects to involve as many as 30 brands of cookies, crackers, nuts, margarines, snacks, cereals, pet food and toiletries.

Announced late in July was the sale of the company's Julius Wile Sons & Co. wine and spirits business to Whitbread & Co., a British brewer. The $155 million sale removed Fleischmann vodka and gin, Canadian LTD, Caffe Lolita liqueur, Inver House scotch, Dunphy's cream liqueur and Irish whisky, American and Silhouette vodkas from the Nabisco product line-up. The Wile division also imported Metaxa brandy and Dry Sack sherry.

According to industry sources, Nabisco may apply some of its earnings from the Wile sale toward the purchase of British cookie and cracker maker Huntley & Palmer Foods.

The company will move its corporate headquarters from New York to Nabisco Brands Plaza in Parsippany, N.J. The move is expected to be completed late this fall.

Nestle Enterprises

	1981	1980
Sales*	$2,387,000,000	$2,400,000,000
Advertising**	88,000,000	82,000,000

*U.S. only
**AA estimate

Nestle Enterprises, White Plains, N.Y., a subsidiary of Nestle S.A., Vevey, Switzerland, is the 61st largest U.S. advertiser, having logged $88 million in spending in 1981, up 7% from the previous year.

Sales dropped 0.5% to $2.39 billion, reflecting substantial cost decreases in raw products, such as sugar, coffee and cocoa beans.

The parent company, Nestle S.A., recorded a 13% sales hike, with sales of 27,734 billion Swiss francs in 1981. North American operations contributed 18.7% of total worldwide sales, up from about 18.3% in 1980.

Pierre Liotard-Vogt, Nestle S.A. chairman, said the 1981 results were achieved by cutting "whatever is superfluous" and by arranging consolidations or activity alignments with other companies.

In 1981, a reorganization took place here when David Guerrant, chairman and president of Nestle Enterprises, relinquished the presidency of Nestle Co. to Jean Caste and became general director of all Nestle's North American food companies. Now reporting to him are The Nestle Co., Libby, McNeill & Libby, Stouffer Corp., Beech-Nut Nutrition Corp., Wine World, Nestle Enterprises Ltd., Canada and Nestle-Libby, Puerto Rico. Nestle Enterprises is the holding company for Nestle's U.S. and Puerto Rican subsidiaries.

Mr. Guerrant's goals include coordinating North American holdings and improving profitability since international officers appear to believe that the sales picture could be much better in the U.S. and Canada.

Jean Caste moved up to president of Nestle, from president of Cosmair, the U.S. subsidiary of L'Oreal, a Paris-based cosmetics company in which Nestle S.A. owns a substantial interest.

Mr. Caste reportedly was brought in to set priorities and to determine best areas of business investments, with a responsibility also for dropping those products not making money.

Mr. Caste noted that product development would be ongoing, commenting that "to be healthy a company must have a permanent product development program, and all products must be permanently under review."

Mr. Caste, who is due to exit the Nestle post within the year for responsibilities at the Swiss headquarters, is expected to continue axing nonprofitable arms of the U.S. operation and to oversee improved development and testing for the domestic products.

The international company, while lobbying against it, agreed to abide by an overwhelming vote in spring, 1981, by the World Health Organization in adopting a code to restrict marketing of infant foods. The U.S. cast the lone dissenting vote on the measure, which came to the forefront after controversy erupted regarding marketing of infant formulas in underdeveloped countries where the water supply is poor.

While Nestle does not emphasize the marketing of infant formula and baby food in the U.S., the company did make changes at its Beech-Nut subsidiary. Niels L. Hoyvald assumed that unit's presidency, and the name of the company was changed to Beech-Nut Nutrition. New products in 1981 were geared toward older children.

The company seems bent on making its mark in nutritional circles, as evidenced by its establishment of a Washington-based Coordination Center for Nutrition to oversee grants to organizations for research in nutrition. Nestle introduced a low-fat, low-starch, low-sugar line of foods under the New Cookery label in the U.S. Pasta, chili and cocoa mix were among items offered with a focus on weight maintenance.

Testing of New Cookery products took place in a few major cities and mixed results were noticeable almost immediately, as some of the New Cookery line had caloric value comparable to regular competing foods. Others claimed pricing was high for the products.

Within several months, the line was removed, although Nestle officials said it might reappear at some time under another name. While New Cookery multi-product measured spending is listed near the $70,000 mark, industry analysts figure New Cookery promotion and ad spending ranged upwards of $3.5 million.

Stouffer Corp. unveiled Lean Cuisine in a rollout which buyers called one of the most successful ever seen. Lean Cuisine foods are pushed as "light eating" offerings which also are for the calorie conscious. Single-servings are a major part of the prepared entries.

Stouffer's also backed its expanding frozen side dish business with a $2 million spending base, and spent $3.6 million, the highest sum for any of its products, on ads for its frozen pizza.

Coffee consumption continues to drop, although with the major population moving into middle age, a leveling off is expected after years of decline. Thus Taster's Choice decaffeinated was the lone Nestle brand gaining, having moved from a 4.3 market share up to 6 in the instant line.

More than $15 million in measured spending, up from $9.4 million in 1980, was used to promote Taster's Choice regular freeze-dried coffee, which nevertheless dropped more than 2 market share points to 9.5%. Pressure appeared highest from Folger's in the soluble coffee segment, now accounting for 16.5% of the industry's volume. This year, Nestle introduced a new, improved Taster's Choice, backed by a record ad expenditure.

Nestle reportedly sold about $75 million in soups, but that figure is declining. While dropping both Lunchtime and Souptime, Nestle's began testing of Simmer Soup, a dehydrated variety with five flavors.

Wispride cheese spread also was withdrawn while Nestle tests new spreads under the same label.

Chambourcy Inc., a new unit of Nestle Enterprises, unveiled in the U.S. a six-item line of French-style yogurt, which the company already sells in Europe and Latin America.

The tea business remains weak for Nestle in a declining market. Still Nestea instant tea, backed by $4.7 million in measured spending, holds 48% of its segment, and the company's ice tea mixes, regular and low-calorie, hold more than 25% in their respective categories. New this year is an improved soluble Nestea.

Though Nestle still has no candy bars among the top 10 in the nation, its Crunch, backed by $5.3 million in spending, and $100,000 candy bar have gained shares in the growing chocolate bar category. Nestle spent $1 million in ads to support a rock album tie-in with the $100,000 bar.

Ads for the popular Nestle's chocolate morsels pinpointed ways to make dough and freeze part of it for later baking. More than $9 million, half on network tv, was alloted for spending on the morsels, also promoting a package with three extra ounces of the small chocolate bits.

Jordan, Case & McGrath grabbed the account for Montclair, a mineral water offered by a Nestle Canadian unit.

Introduction in the U.S. has rocketed the beverage to No. 2 behind Perrier in New York, and to a 52% hold on the Miami market.

Nestle's Wine World, in the Napa Valley, owns 2,000 acres of prime vineyards. Wine World is a marketer of Beringer premium wines, Los Hermanos medium-price wines and an import division representing certain French, Italian and German wines.

In December, 1981, Libby agreed in principle to sell its U.S. canned fruit operations to California Canners & Growers, San Francisco, and its canned vegetable operations to S.S. Pierce Co., Dundee, N.Y.

The sales were completed in June and March, respectively.

Libby will now focus on non-seasonal and noncommodity products, as well as tomato juices, nectars, pumpkins and corned beef.

Libby used $2.8 million, a large part of its budget, to back

its Lite canned fruits. The company introduced Daybreak, the first orange breakfast drink with real orange juice, with measured media spending of $20.5 million. Banana and Pineapple Frosts were also introduced during the year, complementing Orange Frost, introduced in January, 1981.

Libby consolidated its $4 million account at the Bloom Cos., Dallas, moving beverages, pumpkin, produce products and new products from long-term agency, Tatham-Laird & Kudner, Chicago.

While over-all network tv spending for Nestle items was down almost $1 million, spot tv received approximately $27.2 million, up from $25.6 million in 1980. Magazines spending also increased by $2 million, while newspaper buys were cut by $1 million.

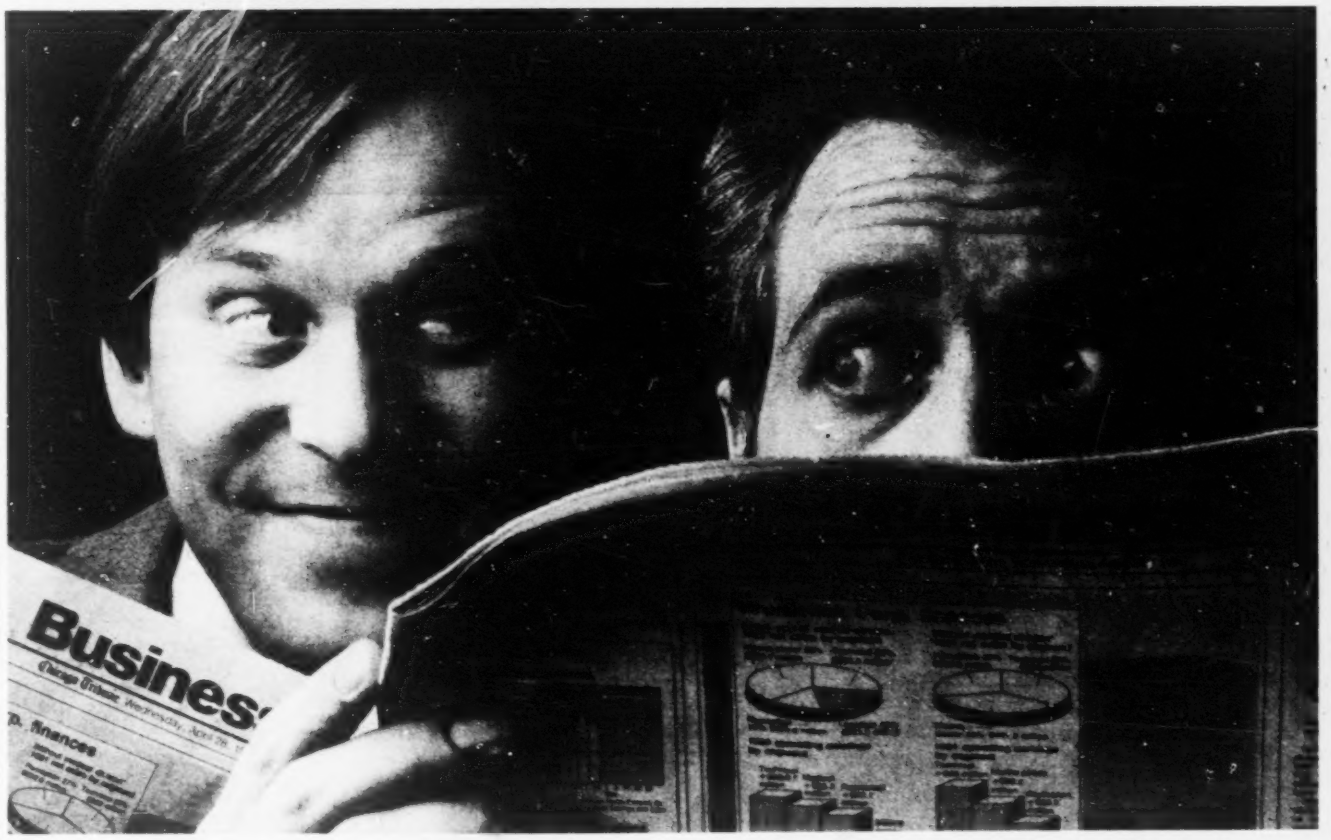
*Fiscal year ends March 31
**AA estimate
†Figures for fiscal 1980 restated

Nissan Motor Corp., U.S.A., a subsidiary of Nissan Motor Co. Ltd., which is based in Tokyo, was the 62nd largest national advertiser in 1981, with an estimated expenditure of $87.9 million, up 26% from 1980 spending of $69.9 million. In the fiscal year ended March 31, the parent company, Nissan Motor Co. Ltd., reported reduced earnings from year earlier figures. The losses are partially attributable to currency fluctuations.

Sales for Nissan reached a record $15.6 billion in 1981, although net income for the Carson, Cal.-based subsidiary dropped 4.7% to $408.6 million. This compares with 1980's earnings of $428.8 million, on sales of $14.67 billion. The maker of Datsun cars and trucks produced a total of 2.6 million units for the year, including 226,165 knockdown sets for overseas assembly, down 2.3% from 1980. Overseas volume was down 4.4% to 1.4 million, while U.S. car sales dropped from 516,890 in 1980 to 464,805 in 1981.

Nissan's share of the market in 1981 amounted to 20% of import registrations in the U.S., and 5.4% of the nation's total

EVERY DAY, THE NEWSPAPERS PUBLISH ALL OF YOUR COMPETITION'S LITTLE SECRETS.



Newspaper ads can tell you a lot about your competition that they'd rather you didn't know.

Like how big their budgets really are.

Or where they're test-marketing their new products.

And which existing brands are experimenting with major strategy shifts.

It's all there, if you read between the linage. And that's exactly what the ACB Market Intelligence Tracking System, *Mintsystem* for short, does for you.

Every day, we monitor the advertising placed in every daily and Sunday newspaper in America—all 1,760 of them. Plus hundreds of major weeklies.

And after looking at all that advertising in all those papers, we're able to discover quite a few interesting facts.

Facts that are next to impossible to get with any other single kind of research service.

Facts about everybody who uses newspaper advertising to sell any product or any brand, anywhere in this country.

So if you want to know more about your competition, you'll want to know more about *Mintsystem.*

Call us toll-free at 1-800-847-4600. (In New York, call 212/685-7300.) We'll be happy to send you a sample report.

market. The company ranks fourth in worldwide production, behind General Motors, Ford and Toyota.

Datsun's 1981-82 model year saw a continuation of the creative umbrella "We Are Driven." The theme serves as a unifying device to emphasize specific consumer benefits for each car line, but with the decision to change the corporate logo from Datsun to Nissan, a gradual process slated for the next several years, the Nissan name has become more prominent in the company's advertising. The change is expected to cost Nissan an estimated $150 million to implement in the U.S.

The 1982 model year saw the introduction of the Nissan Stanza, the company's first venture into the "global" car market and the first model to carry the Nissan nameplate in the U.S. In terms of interior size, the model is the largest car ever sold by Nissan in this country, seating five passengers. With front-wheel-drive, the Stanza has an Environmental Protection Agency rating of 32mpg city and 46mpg highway. The three Stanza models, which replaced the Datsun 510 series, are priced from $7,000 to $8,000.

The Stanza received a major portion of Nissan's October to December spending in sponsorship of Monday Night Football on ABC-TV, spot tv, newsweeklies, business publications and outdoor. Also promoted as new for '82 were styling changes for the sporty Datsun 280 ZX and 200 SX models, which also had the support of spots on college football bowl games going into the new calendar year.

In the spring of '82, the all-new fuel-efficient, front-wheel-drive Nissan Sentra, the second car to be marketed under the Nissan name, was introduced as a replacement for the Datsun 210, an effort that was budgeted at $19 million for a six-month period beginning May 1. The bulk of the Sentra budget, $12 million, went into the first weeks of the promotion using tv, radio, newsweeklies, sports magazines, newspapers and outdoor in Los Angeles and San Francisco.

At 43mpg city and 58mpg highway, the Sentra claims the highest mileage of any gasoline-powered auto in the U.S. The base price of the five-passenger Sentra line starts at $4,949, about $150 more than the 210 it replaced. Tv spots and print advertising featured a variety of people who praised the car's fuel efficiency and low price, with the theme, "You need this car!" followed by the familiar tag line "We Are Driven."

While the full Nissan/Datsun line shared in the support given to the introduction of the '82 models, the main thrust of the effort was behind the Sentra and the company's pickup trucks. The push behind the Sentra produced record sales for Nissan during June '82—46,747 units, half of them new Sentras—the best June sales month in Nissan history.

At the same time, Nissan truck sales nose-dived from year earlier figures, beginning with a 4.2% dip in May and a 37.6% drop in June, to 6,718 units from 10,783 trucks a year earlier. Depressed truck sales throughout the industry fueled a price war in the compact-truck market with Nissan, Mazda and Toyota alternately cutting prices to lay claim to having the lowest-price standard truck. Tv, radio and newspaper ads backed the company's price-war promotions.

The company is scheduled to begin U.S. production of its pickup trucks in the U.S. in the fall of '83 when a new plant, with a 15,000-unit per month capacity, opens in Smyrna, Tenn.

The end of the model year saw the company promoting the introduction of a new five-speed transmission, produced in the U.S. by Borg-Warner, as an option on the Datsun 280 ZX turbo.

North American Philips Corp.

	1981	1980
Sales	$3,030,044,000	$2,171,379,000
Earnings	103,974,000	74,488,000
Advertising*	83,881,500	68,514,793

*AA estimate

New York-based North American Philips Corp., with an advertising budget of nearly $84 million in 1981, ranks as the country's 65th largest advertiser.

North American Philips Corp. is an outgrowth of the N.V. Philips industrial organization, which is based in the Netherlands. The U.S. corporation has an extensive and varying product line in consumer products and services, electrical and electronic components and professional equipment. Norelco, Genie, Magnavox, Philco and Sylvania are among its better known brand names.

Sales in 1981 amounted to $3.03 billion, representing a 40% increase over the year before. Earnings also increased 40%, totaling $104 million for the year. Advertising expenditures increased by 22% from $68.5 million to $83.9 million. Network tv got the biggest boost in ad spending, receiving more than $20 million.

The two main consumer products divisions are N.A.P. Consumer Electronics and Norelco Consumer Products divisions. NAP Consumer Electronics represents the Magnavox, Odyssey, Sylvania and Philco brand names. The wide array of product offerings include tv sets, videocassette recorders and cameras, home videogames sold under the Odyssey 2 brand name, projection tv sets, the Magnavox and Sylvania Laser Vision videodisc players.

Philco and Sylvania home entertainment product organizations, which were recently acquired by NAP, were integrated with NAP's Magnavox subsidiary in order to reduce costs. New headquarters for the enlarged organization are in Knoxville, Tenn. In 1981, the newly-formed triumvirate introduced a new tv chassis design. The new design boasts fewer parts, permits assembly on more highly automated equipment and claims to deliver greater product reliability. The sales of these varied brand names boosted the company to the No. 3 spot in U.S. tv sales.

The three tv lines also introduced a rear-screen projection tv with a 50-in. diagonal screen in 1982. Although Magnavox, Philco and Sylvania integrated their technological efforts, brand-name differentiation exists, and advertising programs remain distinct. With color tv as its main product emphasis, the Magnavox division is continuing product advertising with Leonard Nimoy as spokesman.

The videogame sector continues to grow in the consumer electronics field, and Odyssey was no exception. According to NAP's annual report, more Odyssey 2 games were sold in 1981 than in all three of the previous years, making it No. 3 in the domestic market.

One successful game entry, however, K.C. Munchkin, has been withdrawn from sale pending the outcome of a lawsuit filed by Atari. The suit charges that K.C. Munchkin infringes on Atari's highly successful Pac-Man game, which is under license from Namco Ltd. New titles in the Odyssey 2 series include K.C.'s Krazy Chase, Freedom Fighters, Pick Axe Pete, Quest for the Rings and The Great Wall Street Fortune Hunt.

Odyssey 2 begins a new campaign this fall for its 50-plus videogames. The thrust will be to promote the Odyssey 2 alphanumeric keyboard, a unique feature in the videogame market. The theme "the keyboard is the key to greater game challenge," will be brought home to consumers by the Wizard of Odyssey, a character spokesperson. Media emphasis will be on network tv, print, co-op and trade publication advertising.

Sylvania plans to continue the theme of a Doyle Dane Bernbach-inspired campaign, now in its sixth year. The "best color picture" theme will be backed by a fourth quarter regional promotion tie-in with distributors. Game show, trade and co-op advertising will round out the mix.

Magnavox and Sylvania both carry the LaserVision optical videodisc player. A model introduced this year, Magnavox Model VC 8010 and Sylvania Model VP 7200, features random access infrared remote control.

The laser discs, which are manufactured primarily by Pioneer Electronics Corp. and also by 3M Company, feature more than 250 program titles in such categories as sports, musicals, concerts, kiddie programs, R-rated titles and special interactive programing discs which invite audience participation.

Philco is celebrating the 90th anniversary of its name this year in various promotions, including trade advertising and two limited edition anniversary models. The company also introduced a 30-day money-back guarantee on its color tv line, which ends Dec. 31, 1983.

Philips ECG Inc., acquired in Jan., 1981, as part of NAP's GTE tv set and related components business, is now the in-house supplier of picture, data display and receiving tubes to Magnavox, Philco and Sylvania.

Sales for Norelco personal care products and home appliances in 1981 paralleled 1980 sales, though earnings declined. Boxer Gerry Cooney and the New York Jets' Mark Gastineau became spokesmen for Norelco rotatract razors. The new theme, "Tough on your beard. Not on your face," is scheduled to run on tv in an attempt to reach the youth market. Prime time tv, network sports, late fringe and cable sports tv will run the 239 spots scheduled to air during the latter half of this year.

Norelco men's electric razors lead the category nationally. To further expand electric shaver usage, NAP bought the rights to the Schick name and trademark in the U.S. Plans are to reintroduce the Schick product line, which has not been a factor in the market in many years. However, Remington, NAP's chief American competitor, filed an antitrust suit to block Philips' use of the Schick name. Philips plans to "defend the suit vigorously," a company spokesperson said.

The Norelco Clean Air Machine, which debuted in 1980 and is now available in several models, leads that category. At the end of 1981, 1.5 million Norelco units had been sold. The new models include a Kitty Clean Air Machine, designed to keep the litter box area fresh, a baby's room clean air machine in a corresponding decor and a Car Clean Air Machine, introduced a year earlier.

Norelco has allocated its largest six-month advertising budget to date for a Clean Air Machine campaign by McCaffrey & McCall, which began in mid-'82. The commercials demonstrate the efficiency of clean air machines, and a new 30-second spot will focus on just the filter.

Additional advertising money is being channeled toward what Norelco calls its largest product introduction ever. The new Norelco Clean Water Machine will be supported by a media budget three times higher than that spent on the Clean Air Machine introductory campaign in the fall of 1980.

The freestanding unit with carafe will be positioned against the bottled water market. Tv advertising using animation begins Sept. 13.

Norelco's personal care product line was extended by two new products in 1981—the Norelco lighted mirror and the Norelco Hot Brush & Comb.

In the spring of 1982, Norelco introduced the new Chic collection of personal care products, consisting of 11 new products, including: Hair curling irons, curling brushes, hair dryers and style dryers, all in a rich burgundy color.

North American Philips Alliance Mfg. Co. subsidiary, marketer of Genie garage door openers, expanded its participation in the do-it-yourself market, a category that has aided garage door openers which have been hurt by the ailing housing industry. The do-it-yourself openers received increased advertising support. The campaign is highlighted by in store promotional material.

Other North American Philips divisions include NAP Lighting Corp., Anchor Brush Co., Baker, Knapp & Tubs Inc., a furniture marketer, Selmer Co., the country's leading supplier of band and orchestral instruments, and Carolina Coach Co., the third-largest regular route intercity bus carrier in the U.S.

Several major personnel changes took place at NAP in 1981. On Jan. 1, 1982, president Cees Bruynes also became chief executive officer, succeeding Pieter C. Vink, who will continue as chairman.

Edward L. Klein, vp-group executive, was elected exec vp. Mr. Klein is responsible for all electrical and electronic component operations.

Kenneth C. Meinken Jr., formerly president of NAP Consumer Electronics Corp., was elected exec vp with responsibility for all consumer products and services operations.

Norton Simon Inc.

	1981	1980
Sales*	$3,191,898,000	3,012,772,000
Earnings	103,655,000	124,730,000
Advertising**	149,875,600	149,000,000

*Fiscal years ended June 30, 1981, and 1980
**AA estimate

Norton Simon Inc., New York, the 39th largest advertiser, increased its ad expenditures 0.6% to an estimated $149.9 million in fiscal 1981. While NSI's worldwide sales increased 5.9% to $3.19 billion, reflecting continued inflationary pressure, its net earnings dropped 16.8% to $103.6 million. Declines in NSI's vehicle rental and packaging segments offset strong earnings in its other businesses.

The company reported that its earnings decline "came as no surprise" because of the poor economic environment. To cushion itself against the volatile economy and to enable itself to grab investment opportunites, NSI has placed a high premium on liquidity: At the end of fiscal 1981, its working capital was over $882 million.

For the fiscal year ended June 30, 1982, NSI reported a 33% decline in income from continuing operations, at $66 million, down from $99.1 million a year ago.

Revenue from continuing operations for the fiscal year was $2.994 billion, compared with $2.993 billion in 1981. Net income for the 1982 fiscal year, including that of continuing operations was $107.7 million, up 4% from $103.6 million.

The 1982 figure includes $12.9 million from discontinued operations, and an extraordinary gain of $28.6 million from the extinguishment of debt.

The company's foods segment, despite a 1.3% drop in sales to $988 million, managed a slight earnings increase thanks to improvement in the tomato market upon which NSI depends heavily for its Hunt's tomato products. Strong performances from Orville Redenbacher's Gourmet Popping Corn and Manwich sloppy joe sauce, both market leaders, further buoyed the foods segment's earnings.

NSI's heaviest ad spending went to Wesson Oil—over $7.4 million in measured media support, channeled mostly to network and spot tv, according to Leading National Advertisers. That spending level was 18.1% higher than last year's. NSI's Hunt-Wesson Foods in February moved the Wesson Oil account from BBDO to Ketchum, San Francisco, in an effort to regain market share it had steadily lost for the past few years. In February, Wesson held a 20% share of the oil market, trailing Procter & Gamble's market-leading 25% share with Crisco. Wesson also went national with its new "easy grip" bottle after a successful test in the Southeast.

Orville Redenbacher's Gourmet Popping Corn got $5.1 million in measured media support, all to network and spot tv, as the popcorn kept its market lead with record-high volumes. Also in fiscal '81, NSI rolled national with Orville Redenbacher's Gourmet Buttery Flavor Popping Oil, backed by $1.5 million in measured media support, again all to tv.

NSI kept up its heavy backing of Manwich sloppy joe sauce, another market leader, with $4.3 million in measured media support, $2.77 million of which went to network tv, with the remainder spread over spot tv, magazines and newspaper supplements. Manwich remained the No. 1 sloppy joe product.

NSI's light oil entry, Sunlite, a 100% sunflower oil, got almost $3.4 million in measured media support, most of it in network tv. Earlier this year, Sunlite was running neck-and-neck with, but slowly gaining on, its direct competitor, P&G's Puritan. The two oils had a combined share of 11% to 12% of the cooking oil market.

Hunt's tomato sauce and tomato paste maintained their No. 1 positions in the market with combined measured media support of over $3.5 million. Spot tv took all the tomato paste advertising, while sauce ads ran mainly on network tv. NSI continued testing ad campaigns aimed at promoting Hunt's tomato products as a whole rather than individually.

Things weren't as rosy in fiscal 1981 for NSI's vehicle rental segment where earnings dropped nearly 50% despite a 7.5% sales jump to $872.8 million. Avis, NSI's car rental arm, blamed the skid on low volumes stemming from the sorry economic state and the decrease in leisure and business air travel. Airline travel, the source of 75% of Avis' domestic volume, declined in fiscal 1981 for the first time in 20 years. This year's fourth quarter operating profits fell 60%, and the total decline for the fiscal year was 33%.

Avis Rent A Car System received $7.2 million in measured media support in 1981. In May, Avis launched a new ad campaign via McCaffrey & McCall, successor to BBDO, featuring as Avis spokesman David Mahoney, chairman-chief executive officer and chairman of Avis. The $17 million campaign, themed "Trying harder makes Avis second to none," introduced new guaranteed rates and unlimited mileage policies used at corporately owned rental centers and by participating licensees. A group of franchises jumped the ad strategy ship in April and

Even a crystal ball couldn't give you the total, complete and accurate picture of a television, radio or newspaper audience that you can get with Quantiplex.

Quantiplex. It's an astounding service that will tell you exactly who is watching what, listening to what and reading what. It goes miles and miles further than merely describing the members of an audience in terms of age and sex. It identifies them exactly. It tells you program-by-program who they are, what they buy, what they can afford to buy and even what they are planning to buy.

Quantiplex. It's quite simply the most efficient and accurate way to target your customer. A way to make sure that every dollar spent and every message sent is hitting the exact audience they are aimed at.

Why not join the many advertisers and agencies, large and small—all across the country—who are using Quantiplex with a never before achieved effectiveness? Call us today for more information and a host of success stories. The man to speak to is Ron Gleason, Vice President, Advertiser/Agency Sales.

Quantiplex. It's the service that takes the guess work out of reaching your customer.

Quantiplex

A DIVISION OF JOHN BLAIR & COMPANY

919 Third Avenue, New York, N.Y. 10022 (212) 980-7117

moved their $6 million account to Bozell & Jacobs.

During 1981, the company completed arrangements to lease from trusts virtually all of the vehicles in its ailing domestic car rental business and negotiated similar arrangements for vehicles in several overseas operations, a move aimed at reducing the capital invested in rental vehicles in order to limit the risk of losses. Similar leasing arrangements are expected in 1982.

NSI's cosmetics and fashion segment registered a 15.3% sales jump in fiscal 1981 to $617.6 million. Cosmetics and fashion had the biggest profits increase of all NSI's segments as its earnings more than doubled from 1980 to '81. Max Factor & Co.'s Epris fragrance, endorsed in its ads by ex-"Charlie's Angels" actress Jaclyn Smith, got over $5.9 million in measured media support, $4.5 million going to network tv. Epris surpassed NSI's original projections at both sell-in and sell-through levels after its introduction in 1981.

The Maxi cosmetics line, supported by a program of consumer couponing, spot tv commercials and national print ads, extended its line of popular-price products with nine more makeup items in 1982. In 1981, Maxi mascara received the most support of any product in that line with $1.2 million, most going to magazines.

The segment focused two marketing efforts on a pair of skin treatment lines geared for diverse market segments. In the premium-price category, Max Factor introduced three new products—Very Gentle Eye Makeup Remover Gel, Emergency Blemish Stick and Oil Control Skin Primer—to its Living Proof Skincare System line that sells in selected department and specialty stores. For the medium-price, mass-market category, NSI gave continuing support to its Skin Principle Skin Support System.

Max Factor also entered the women's designer fragrances market in 1982. Missoni perfume rolled out into selected department and specialty stores throughout the U.S. and internationally, supported by a heavy campaign of print ads in national women's magazines, some city and regional magazines and major-market newspapers. Several product line extensions from Max Factor were backed by an umbrella ad theme that asked, "Don't you love being a woman?"

Halston Fragrances' Halston Night perfume, introduced to upper-end markets in early 1981, received $543,000 in measured media support.

McCall's sewing patterns got $524,100 in measured media support. McCall's made what the company called "significant" share gains after beginning a marketing drive targeted toward special segments of the home sewing market.

Sales of NSI's beverages segment increased 3.5% to $430.2 million in 1981. The segment posted a slight earnings increase on the performances of Canada Dry Corp. and Somerset Importers. But in March, 1982, NSI sold Canada Dry to Dr Pepper Co. for $143 million, leaving its beverages segment dealing only in those of the alcoholic variety. Somerset Importers' Johnnie Walker Red Label scotch received $5.1 million in measured media support, nearly all of which went to magazines. Johnnie Walker Black Label scotch got $3.8 million in measured media support, and NSI backed Tanqueray gin with $3.5 million.

Somerset Wine Co. narrowed and reconfigured its product line to maintain a strong market position in basic consumption areas. The company planned to focus on the California wine business, while increasing its force in French and Italian wines. In French wines, Somerset increased case sales and market share. The company said it intended to maintain its current French market position with concentration on the finest classified growths and a balance of midprice wines. Somerset Wine gained position in the Italian wine market, working with Cantina Settesoli.

Noxell Corp.

	1981	1980
Sales	$233,112,000	$204,160,000
Earnings	16,864,000	14,699,000
Advertising*	41,082,100	41,318,600

*AA estimate

Noxell Corp., Baltimore, the 96th largest national advertiser, decreased its advertising expenditures 0.5%, to an estimated $41.1 million in 1981, from $41.3 million in 1980.

The company, which markets popular-price cosmetics, skin creams and household products under brand names including Noxzema, Cover Girl, RainTree and Lestoil, had a sales increase of 14%, to $233.1 million. Earnings were up 15% to $16.9 million.

Noxell said one-half of its dollar growth came from volume increases and the remainder from higher prices and shifts in the company's product mix. The company is also experiencing growth in international markets and is looking to that area for more growth in the future. Cover Girl cosmetics were introduced on a test basis in France in 1981, and expansion into Latin America is planned.

Noxell made several changes in its ad agency lineup last year, eliminating Foote, Cone & Belding and Scali, McCabe, Sloves from its roster. FCB had Lestoil and new products, while Scali gave up new products and RainTree. Backer & Spielvogel was the big winner, picking up Lestoil and RainTree lines as well as some new products work.

The cosmetics division accounted for 47% of Noxell's net sales. Cover Girl products sales were up a total of 20% in 1981. The Cover Girl line of facial makeups showed the fastest growth, the company said.

Spending for Cover Girl makeup was down slightly last year to $6.5 million from $6.9 million the previous year. Most of the spending was in network tv.

One Cover Girl product group that got a boost in ad spending was mascara, with a 5.2% increase to $8.1 million from $7.7 million, mostly in network tv. Cover Girl mascara is second to Maybelline in mass merchandise, food and drug outlets with an 18.4% market share.

Cover Girl NailSlicks, which got a big chunk of the budget with $3.7 million in advertising, is said by the company to be the leader among nail polishes sold in food and mass merchandise outlets. In mass merchandise stores, NailSlicks has a 15.1% unit share; in food stores 22.9%, and in drugstores, where Revlon is the leader with 26.8%, Cover Girl has 7.1%. The share for three-outlet sales for Cover Girl is 11.5% in the nail polish category.

Products in the Cover Girl line introduced in 1981 included LipBlush, a thin, lightly colored high-gloss product, BlushMates, Cream-on-Blush, with a sponge applicator, and Conditioning Eye Make-up Remover.

Model Kelly Emberg was added to the lineup of Cheryl Tiegs and Christie Brinkley, who appear as spokeswomen for Cover Girl products. In addition, the Cover Girl line was repackaged to give it a uniform identity, the company said.

The Moisture Wear line of cosmetics, designed for an older consumer than the Cover Girl user, got an ad spending boost of 41% to $3.1 million from $2.2 million. The line was also repackaged to give it a more sophisticated, upscale image, and actress Erin Gray was signed as spokeswoman. Ad spending was divided between network tv and magazines.

In the toiletries category, which contributed 28% of the company's revenues, sales were up 13% from 1980. Noxzema, the flagship brand for Noxell, received two different ad strategies, designed for two groups of consumers. Mariel Hemingway promoted the cleansing benefits of the skin cream to teen agers, while Meredith Baxter Birney was the spokeswoman for the older segment of the market, addressing the moisturizing properties of Noxzema.

Noxzema has a 22% share in the skin cleanser market. Total ad support for the skin cream decreased again this year, down 9% to $5.2 million, mostly in network tv.

Noxell now claims it has a total skincare line, led by Noxzema. Other products in the line are Noxzema Antiseptic Skin Cleanser and Noxzema 12-Hour Acne Medicine, which went national in June, 1981. In addition, the company began testing Noxzema Continuous Protection moisturizer in September, 1981.

Ad spending for Antiseptic Skin Cleanser was down slightly to $1.2 million from $1.4 million the previous year. The launch of Noxzema 12-Hour Acne Medicine got about $1 million in measured media for the last six months of the year, mostly in network and spot tv. At the time it was launched nationally, the product was slated for $3 million a year in advertising.

The acne preparation is advertised as having a 12-hour formula as well as a special skin softener that fights against flaking, scaling and overdrying. The product contains 10% benzoyl peroxide. In trade materials at the time of the launch, Noxell said the product obtained an average market share of 14% in test markets.

Noxell continued to expand its RainTree line in 1981 when it went national with RainTree hand and body lotion, a line extension to its RainTree moisturizer. The new product was backed by about $2 million in tv advertising. RainTree Moisturizing lotion and cream got $2.4 million in advertising support. After the death late in 1981 of its spokeswoman, actress Natalie Wood, Noxell pulled the commercials from the air.

RainTree is No. 2 in the mass-distributed moisturizer segment, but with its 4% market share, it is far behind No. 1, Oil of Olay, which has 40% of the market.

Noxzema shaving cream maintained its 13% share of market. The company said it introduced a "new protectant formula" with a lubricating agent, dimethicone. Measured media spending for the shaving cream was $1.6 million, and the company also said it made buys on male-oriented cable tv programming.

Noxell acknowledged a flat performance in the household products category where it markets Lestoil heavy-duty cleaner and Lestoil deodorizing rug shampoo.

An agency change and new trade programs were two steps the company said it took to improve performance.

Household product sales were about 7% of net sales. Lestoil was backed by $1.4 million, mostly in spot tv. The rug shampoo, which the company was not successful in expanding outside of its eastern marketing area, got about $465,000 in magazine advertising.

J.C. Penney Co.

	1981	1980
Sales*	$11,860,000,000	$11,353,000,000
Earnings*	387,000,000	268,000,000†
Advertising**	208,600,000	188,000,000

*Worldwide
**AA estimate
†Restated

J.C. Penney Co., New York, the nation's third largest retailer, increased its ad spending 11% to $208 million in 1981, to become the 18th largest U.S. advertiser.

Penney's advertising expense for newspapers, television, radio and other media worldwide for 1981 was $302 million, excluding catalog preparation and distribution costs.

AA figures do not include retail advertising for individual stores, although expenditures for preprint newspaper advertising have been included in AA's estimate of unmeasured spending. The 1981 figure represents about a 12% increase over the $270 million spent in 1980.

In 1981, sales of $11.9 billion represented an increase of 4.5% over the $11.4 billion in sales reported for 1980. Income from continuing operations was $387 million, a whopping 44.1% increase over 1980's figure of $268 million.

Full line store sales were $7.9 billion, up 8.5% from $7.2 billion in 1980. Soft line store sales were down slightly, to $2.38 billion in 1981 from $2.39 billion in 1980. The number of full line stores increased once again in 1981 to 597 compared with 552 in 1980.

Full line and soft line stores' profit increased in 1981 over the 1980 level due to increased sales, improved gross margin, and tight expense control. Profits for soft line stores had decreased from 1979 to 1980, due to lower sales.

A total of 1,065 soft line stores were in operation at the end of 1981 compared with 1,120 in 1980. The number of soft line stores has declined for the third year in a row.

The plight of small town soft line stores is illustrated by the closing of J.C. Penney store #0500-9 in Hamilton, Mo. James Cash Penney started his retailing career in Hamilton at the turn of the century working at the J.M. Hale Dry Goods store. Not wishing to go into competition with his first employer, Mr. Penney did not open a store in Hamilton until after Mr. Hale retired in 1924.

The town's 1,582 residents see the closing on June 6, 1981, as a case of "corporate betrayal," claiming that the New York-based headquarters have forgotten the rural Missouri roots of its founder. "There's still a strong feeling here that it was never Mr. Penney's idea to close this store while there was still a J.C. Penney chain," said Paul McCoy, secretary-treasurer of the Hamilton Chamber of Commerce and a guide at the J.C. Penney Memorial Library in town.

However, shopping malls have eroded the business in most small towns and Hamilton is no exception. The store had not shown a profit for the last several years.

Catalog sales rose 7.9% to $1.68 billion in 1980, surpassing last year's record $1.54 billion. Of that total, $1.23 billion was derived from catalog centers in stores, with mail order and outlet stores accounting for the remaining $407 million.

Increased emphasis on fashion items and a special sweepstakes promotion have been credited with the catalog sales gain. On the first page of the book, Penney informed readers that entry in the $500,000 sweepstakes was automatic for any customer who made a purchase from the catalog between late August and late December.

Another innovative promotion in the form of cents-off coupons developed by the Couponing Group Ltd., New York, was inaugurated in Penney's 1981 fall/winter catalog. Coupons were sold by the Couponing Group to package goods, health & beauty aids and household companies.

Drugstore sales, operating as Thrift Drug or the Treasury Drug Center, rose 7% to $507 million from $474 million in 1980. During 1981, 12 stores opened and 30 stores closed. At year's end, 343 drugstores were in operation. Profits were about the same as in the prior year, despite the cost of closing stores in certain markets.

J.C. Penney Financial Services, the insurance arm of the retailer, reported net income of $29 million in 1981, up from $28 million in 1980. Insurance centers were opened in 31 stores in 1981. By year's end, instore centers were operating in 98 J.C. Penney stores in 13 markets.

In an effort to keep its insurance sales closely associated with the Penney name, the company announced in 1981 that it is seeking a buyer for Great American Reserve Insurance Co. J.C. Penney Financial Services sells a variety of insurance in three ways: Through its stores, through direct marketing via mail and telephone and through 300 agents in 17 branch offices.

It often was possible for consumers to buy insurance from Great American Reserve and

never realize the company was owned by Penney. The decision to sell means the company has decided to concentrate on direct response and the store operation through the other two companies.

A combination of elements contributed to the company's 1981 performance. Gross margin rose to 31.7% from 29.4% in the prior year as a result of higher markup and significantly lower LIFO (last-in first-out inventory valuation method) provisions, which more than offset increased markdowns.

Two factors were of particular significance.

First, and most importantly, was the successful implementation of Penney's strategy to place increased emphasis on higher taste level apparel and soft home furnishings, which provide higher markup.

Second was the decline in inflation in the soft goods category of general merchandise to 4.0% from 5.8% in 1980.

J.C. Penney's capital expenditures budget for 1982 approximates $325 million. Virtually all of the increase over the 1981 budget of $208 million represents funds allocated to modernize existing stores.

As part of this modernization, the company will be devoting a greater proportion of selling space to women's apparel and accessories, menswear, children's wear, home furnishings and leisure merchandise—all areas of traditional strength for the company.

In new stores, soft goods will comprise 70% of selling space, compared with 60% in older stores.

This strategy is designed to appeal to shoppers in suburban malls, who are believed to be more interested in what are called "ego-intensive" goods than in merchandise such as washing machines.

Some observers foresee the day when Penney's may drop some hard lines altogether. "They may get out of the durable business in the next five years," says Walter Loeb, retail analyst with Morgan Stanley & Co., New York. "You don't associate Penney's with refrigerators."

Women's apparel and accessories is the largest of the six merchandise divisions, followed by menswear, children's wear, leisure and automotive equipment, home furnishings and home improvement items. The company promotes a number of its own brands in the apparel area, among them the Fox, Track and Court and Hunt Club for action wear and the U.S.A. Olympic running shoes.

The most heavily advertised product areas in all media for 1981 are as follows: $6.6 million for women's apparel; $1.5 million for women's intimate apparel; $2.1 million for women's sportswear; $1.9 million for men's sport shirts and apparel; $3.8 million for men's sportswear; $3.8 million for family sportswear; $1 million for children's sportswear; $4.2 million for J.C. Penney auto accessories, tires and car insurance, and $2.4 million for Penney's home entertainment center.

**Income before extraordinary charge
†AA estimate

PepsiCo Inc., Purchase, N.Y., the nation's 14th largest advertiser, increased U.S. advertising 11.4% to an estimated $260 million.

The company spent $376.5 million in advertising worldwide in 1981, up 5.1% from 1980. Advertising accounts for about half of the company's total marketing budget. In 1981, Pepsi increased marketing expenditures about 25% worldwide, including a 71% hike in spending for the foodservice division. PepsiCo reduced its spending on network and spot tv 4% in 1981, down to $139.6 million, after increasing it 22% in 1980.

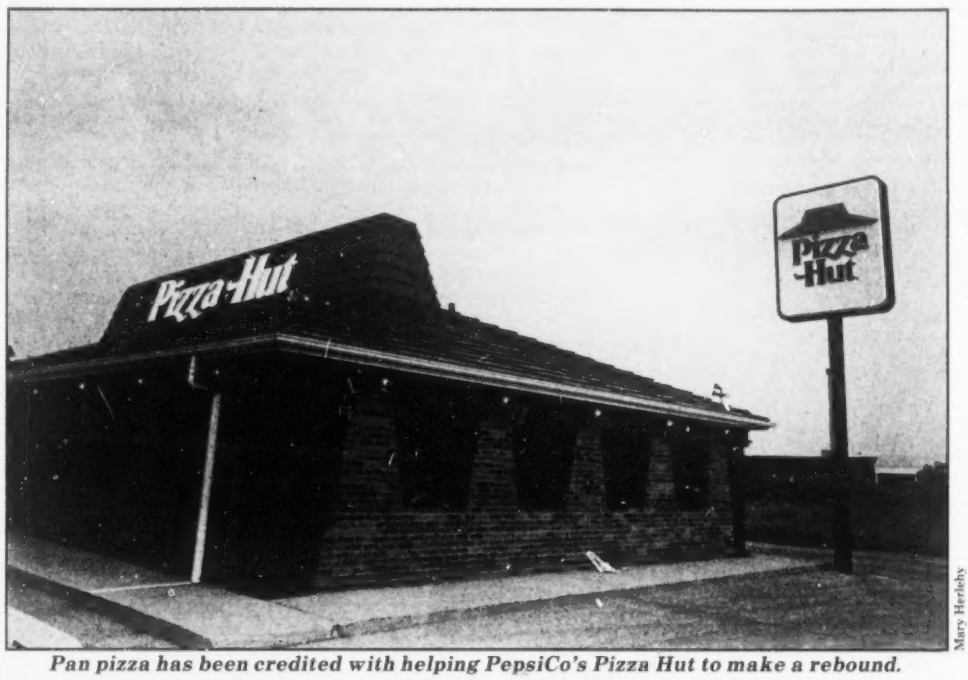
For the first six months, Pepsi reported earnings of $159.8 million, a 14% increase over the previous year. Sales rose 8% to $3.37 billion.

PepsiCo's growth in the 1980s is expected to come from increased beverage distribution outside food stores, expanded new product activity in snack foods and restaurants and an increased presence in foreign markets for beverages. According to Gerald J. Fischer, PepsiCo vp-corporate development, the company is experiencing a slowdown in traditional grocery outlets and is aggressively looking for other distribution channels for its soft drinks to fuel growth.

The best expansion hope appears to be in both drug and mass merchandisers, as sales in these outlets ran about 30% higher in 1981 than in the previous year. Other key growth areas will be in fountain and vending sales.

Earlier this year, company executives said marketing expenditures for 1982 will depend on the economy and how much money is needed to encourage consumers.

PepsiCo's net earnings rose 14% to $333.5 million in 1981, compared with a 10% increase in 1980. The company reported sales slightly exceeding the $7 billion mark, increasing by 18%.



Mary Herlehy

Pan pizza has been credited with helping PepsiCo's Pizza Hut to make a rebound.

These comparisons exclude the impact of the extraordinary charge in 1980 for the writeoff of motor car carrier operating rights. A change to last-in, first-out (LIFO) accounting for certain domestic inventories reduced net income in 1981 by $4.6 billion, or 5 cents a share. Before this adjustment, income was up 16% in 1981.

Pepsi-Cola's 1981 soft drink market share, according to an April, 1982, *Beverage Industry* report, was 18.3%, up from 1980's 18% share. Major rival Coca-Cola remained in the lead in 1981 with a 24.2% share, down slightly from 1980's 24.3%.

The foodservice division made substantial gains in 1981. Revenues at $1.07 billion increased 23% from the fiscal year ending in December, compared with a 17% increase in 1980. These figures reflect Pepsi's effort to increase store sales, which were up 18% in 1981, following a 21% increase in 1980.

Food products were also up 19% in revenues in 1981, following a 21% increase in 1980. Price increases along with volume growth contributed to improved profits here and abroad in 1980 and 1981, with performance in Mexico particularly strong. Company executives report foreign operating profits are beating domestic ones. PepsiCo is planning to expand overseas with more bottling franchises, and broad snack food penetration is expected in international markets by the end of 1982.

Approximately 76% of PepsiCo International's volume came from its franchise operation, which sells soft drink concentrate to franchised bottlers. The remainder came from United Beverage International (UBI), the company-owned, 11-country flagship bottling system. Total case sales rose 2.5%, down from an 8% growth in 1980. A sluggish worldwide economy was seen as a contributing factor in slowing sales.

According to Leading National Advertisers, measured media expenditures for Pepsi-Cola alone, the company's most heavily promoted soft drink, totaled $23.7 million in 1981. During the year, the company aired six commercials in the "Catch that Pepsi Spirit" campaign, on the air since February, 1981.

The Pepsi Challenge campaign is credited with giving Pepsi a lead over Coca-Cola in sales through certain types of outlets.

For 1982, Pepsi has dropped "Catch that Pepsi Spirit" in favor of "Pepsi's got your taste for life." The theme supplements Challenge on network tv and focuses more closely on taste than previous efforts. Instant winner consumer promotions and collectibie bottle cap games complement ad strategies.

Diet Pepsi is the company's second most-advertised soft drink brand, with a measured media ad budget of $12.1 million. The brand climbed a notch in the industry from No. 9 in 1980 to No. 8 in 1981. "Now you see it, now you don't," a new theme, included three versions in its first year. The jingle, sung by Joanie Sommers, was considered by some experts the most outstanding element of the three campaigns for Pepsi-Cola, Diet Pepsi and Pepsi Light. Company executives reported the highly stylized new commercials focused attention on the brand, which experienced the best sales for January and February in a number of years.

Pepsi Light, which moved from low calorie to sugar free in 1979, spent $5.1 million in advertising in 1981, off from $5.6 million in 1980. Despite the decrease in spending, the brand moved from 0.4% market share in 1980 to 0.5% in 1981. The "Lookin' light, lookin' Pepsi Light" campaign with actress Lauren Hutton included two tv spots in 1981.

Mountain Dew advanced from No. 7 to No. 6 in industry ranking in 1981. The drink remains the company's third most heavily advertised soft drink. Volume rose to the 179 million case level, an increase of 5.9% over 1980. The ad budget for 1981 totaled $10.9 million, up slightly from $10.8 million in 1980. Market share remained at 2.9%, same as in 1980. "Give me a Dew," the theme line from the brand's ad campaign, and the jingle that accompanies it, play important roles in the over-all campaign, which centers on the healthy activities of the young.

Aspen, Pepsi-Cola's apple-flavored soft drink, which debuted in 1979, will continue to be marketed in Los Angeles, where, the company says, it is doing reasonably well. The drink has been dropped from Denver and Philadelphia because of poor results. Media expenditures for 1981 were a modest $400,000. Teem's market share dropped to 0.2%, from 1981's 0.3%. Its ad budget was $60,800.

Food products, consisting of Frito-Lay and PepsiCo Foods International, had sales of $2.2 billion in 1981. Frito-Lay, PepsiCo's largest profit contributor, achieved its 13th consecutive year of record earnings. In the $14 billion snack food market, Frito-Lay registered a 20% sales increase to $1.8 billion. Frito-Lay's six leading national brands had retail sales of more than $100 million each.

The largest brands are Doritos, Lays and Ruffles potato chips, Chee-tos cheese-flavored snacks, Tostitos and Doritos tortilla chips and Fritos corn chips. Fritos is celebrating its 50th anniversary this year with ads themed, "They wouldn't have lasted for 50 years if they didn't taste so good." New ads for Lays potato chips focus on quality.

New line extensions introduced nationally in 1981 for Frito-Lay are Chee-tos cheese balls, Lays zesty cheese-flavored potato chips and Ruffles bacon and sour cream-flavored potato chips.

Test marketed in 1981 were Chee-tos bacon and cheddar-flavored cheese snacks and Bakenets hot and spicy fried pork skins. New product activity for 1982 includes the national rollout of Frito Light and Doritos Crispy Lights, as well as expansion of Tiffles crispy corn chips and Ta-Tos potato chips.

Tostitos recorded sales of $165 million in 1981. Measured media expenditures were $8.5 million for the brand in 1981.

PepsiCo attributes part of the growth success to its Total Snack Program. Themed "Good things to know about good things to eat," the print campaign relates nutritional information in an extension of the information labeling Frito-Lay began two years ago.

GrandMa's brand single-serve cookies and snack bars, acquired by PepsiCo in 1980, had measured media expenditures of $535,300, down from 1980's $736,200. Total sales exceeded $30 million. Frito-Lay is testing GrandMa's bagged cookies.

Though the foodservice division, which comprises Pizza Hut, Taco Bell and PepsiCo Food Service International, will not see major expansion until 1983, it tallied operating profits of $82 million in 1981, up 37.6% from the previous year. Improved earnings at Pizza Hut and Taco Bell stemmed from volume and price increases, as well as favorable ingredient costs. Though Taco Bell and Pizza Hut outpaced the restaurant industry in 1981, the company is hoping to increase per unit sales before building a significant number of new restaurants.

Pizza Hut closed about 100 unprofitable restaurants in 1981. Both Pizza Hut and Taco Bell have some of the highest ratios of company-owned versus franchised stores in the restaurant industry. Donald Smith, president of the foodservice division, said both chains will push franchising as a method of increasing revenues. With a combined total of more than 5,300 units, 50% of Pizza Hut stores are owned by Pepsi, as are 48% of Taco Bell units. Plans call for 25 of the 75 new Pizza Huts to be company owned and 70 of the 160 new Taco Bell stores are slated to be company owned. Total per store sales growth for Pizza Hut was 24% in 1981, the highest one-year increase in the company's history.

Ad expenditures for 1981 were $24.2 million and spending in 1982 is estimated at $50 million, more than twice what the chain spent in 1980 and 1981. The bulk of this is scheduled to go to spot and network tv, which in 1981 had a combined media expenditure of $24.1 million. New tv spots are targeting the take-out market, traditionally a weak spot for Pizza Hut. The chain cut couponing by more than half its 1980 rate. Value-added coupons are expected to take a greater share of the promotional budget.

Pan pizza has been credited with the company's sales turnaround. The chain hopes to keep up sales momentum by introducing a quick-cooking pizza product and other new products geared toward the lunch market.

Like Pizza Hut, Taco Bell has emphasized upgrading its facilities. Addition of drive-through windows caused sales to jump about 20% in 1981 and more will be phased in this year. More effort is also being centered on training and service.

Measured media advertising for Taco Bell ran $10.4 million in 1981, up 24% from $8.4 million in 1980. The bulk of the spending went to spot tv, leaving $5 million for outdoor.

In March, PepsiCo acquired San Francisco Boulangerie, a retail bakery chain specializing in original San Francisco sourdough and other variety breads. The company plans to open from eight to 12 new locations in northern California by the end of the year. Lynch & Rockey, San Francisco, is the chain's first agency.

Wilson Sporting Goods concluded the third straight year of earnings improvement, reversing the trend of the late '70s. Sales rose to $277 million, up 20% from 1980, while operating profits increased by 28%. Advertising strategy shifted, placing more emphasis on the competitive spirit, in addition to product features. Leo Burnett U.S.A.'s "ProStaff introduces Orange Aid" inaugurated the introduction of orange balls in golf. Wilson intends to stress its strong acceptance with its "Brand of pros" theme.

Of PepsiCo's two transportation companies, North American Van Lines and Lee Way Motor Freight, the former passed the $500 million mark in annual revenues in December, 1981, and completed the year with a $510 million total. Despite the intense competition of the first full year of deregulation in the trucking and moving industries, aggressive pricing, expansion into new markets and new marketing programs helped the company achieve this record. The household goods division registered a record year in 1981 in both shipments and revenues, which totaled $197.5 million. The division opened the year with a consumer promotion, the moving industry's first sweepstakes.

North American's commercial transport division entered a number of new markets, which contributed to a volume increase of 9.3% for the division.

Lee Way Motor Freight, however, experienced a loss in 1981. Declining industry volume produced widespread industry discounting.

On June 27, 1982, the space shuttle Columbia made history.

Photo Courtesy NASA

So did TeleCaptioning.

The instant the shuttle went up on June 27, the word went out—literally—for the first time ever, because of the advanced technology of real-time captioning. Real-time captioning was developed by the National Captioning Institute in order to provide simultaneous subtitling of live events.

Hundreds of thousands of people with hearing impairments were able to thrill to the full impact of the shuttle's breathtaking flight as it occurred. And their full participation in this historic event was historic in itself.

NCI's TeleCaptioning was created solely to open up the world of television to the deaf and hearing impaired. It's made television come alive, with over 40 hours of TeleCaptioned programs—from "Dynasty" to "Little House on the Prairie" to "ABC's World News Tonight" to the Super Bowl itself. And NCI has not only the capability, but the commitment to maintain this vital service on a national basis.

TeleCaptioning has also provided hundreds of advertisers with a new way of reaching the hearing impaired, a market extraordinarily loyal to products of companies that have made the effort to reach them. Among these are Procter & Gamble, American Express, Datsun and McDonald's.

If you want your program, product or service to be "heard" by a market that's too important to miss, please send in the coupon or call us. We'll be happy to provide you information on what TeleCaptioning can do for you.

National Captioning Institute, Inc.
NCI TeleCaptioning: There's no better sound in sight.

Real-time captioning of Columbia's launch and landing was made possible by a grant from the Johnson's Wax Fund, Inc.

Pfizer Inc.

	1981	1980
Sales	$3,249,700,000	$3,029,300,000
Earnings	273,700,000	253,900,000†
Advertising**	59,000,000	49,712,000

**AA estimate
†Restated

Pfizer Inc., New York, the 83rd largest U.S. advertiser, increased its domestic advertising expenditures 19% to an estimated $59 million in 1981.

Worldwide sales for the company increased 7% in 1981, to $3.25 billion. Sales in the U.S. rose to $1.4 billion, accounting for approximately 43% of the total.

For the first quarter of 1982, worldwide sales were $808 million, down slightly from $810 million registered in 1981's opening quarter.

Pfizer reported a sales increase of 5% for the first six months of this year to $1.68 billion, while net income for the first half increased 28% to $168.8 million.

All Pfizer marketing categories scored sales increases in 1981, with the consumer division and materials science division each recording a 12% gain.

Strong performances by Pfizer's consumer division's two U.S. operations—Leeming/Pacquin and Coty—were credited as major factors in its 1981 sales advance. The division also showed a 32% gain in operating profit.

Pfizer's healthcare segment, meanwhile, showed an 8% sales increase, with international sales rising 11% and domestic sales 4% from 1980.

The segment is the company's largest and most profitable business category and comprised 55% of Pfizer's consolidated sales last year, while accounting for more than 80% of its total operating profit.

The company achieved sales advances despite a withdrawal during the year from the diagnostic business.

Pfizer's other marketing categories, agricultural products, and specialty chemicals, showed 1981 sales increases of 5% and 1%, respectively.

Pfizer executives say 1981 sales gains were actually greater than the reported yearend figures indicate. Local currency fluctuations and the stronger U.S. dollar abroad had the effect of diluting the gains achieved, calculating the "real" sales gains scored by the company as being about 5% higher than indicated by the yearend figures.

The modest drop in sales in the opening quarter of 1982, similarly, becomes a modest sales gain when adjusted for local currency fluctuations, according to Pfizer.

Net income from continuing operations increased 8% to $273.7 in 1981. In 1982's opening quarter, net income was up 18%, from $72 million to $88 million.

The consumer products division receives the bulk of Pfizer's measured media ad spending, which last year increased 25% to more than $38 million, up from $30.7 million. The ad money increase was funneled into tv, up approximately $5 million; magazines, up $1 million, and farm publications, up $600,000. Of 1981's $38 million measured media total, nearly $31.5 million went to network tv, and $4.1 million went to consumer magazines.

Pfizer's consumer business segment gets the bulk of the company's measured media support. The segment markets fragrances and cosmetics through its Coty division and through its Leeming/Pacquin division, proprietary drugs, including Visine eye drops, Ben-Gay analgesics, Unisom Nighttime Sleep Aid, and Desitin Skin Care and baby care products, plus Pacquin and Barbasol toiletry items.

Coty's leading selling brands include Emeraude, Wild Musk, Nuance and Sophia. A 1980 new product entry that carries the endorsement of actress Sophia Loren, Sophia fragrances, became Coty's top advertised product in 1981, receiving more than $6 million in measured media support.

Coty calls Sophia its most successful ever new fragrance product, and says sales have been outrunning all its forecasts. It was a major contributor to the division's increase of nearly 20% last year, an increase that builds on 1980's 15% sales gain. Nuance perfume received $3.7 million in 1981 measured media support and Emeraude got $2.7 million.

Joining the Coty lineup last year after receiving extensive test marketing was the Stetson line of aftershave and cologne for men. Stetson, launched nationally in September, 1981, received a $4 million yearend ad burst.

Warwick Advertising, New York, handles the new entry. Another Coty lineup addition last Fall was Shape 'n Shadow Eye Kit.

The Leeming/Pacquin division is Pfizer's largest consumer product operation. Unisom and Visine sales, plus the expansion of the Pacquin skincare line, paced the division and were the chief contributors to its 1981 sales gains.

Unisom set the fastest pace and showed a sales gain of approximately 35% from 1980. In its second full year on the market, the product received more than $4 million in measured media support.

The Visine line extended its top-selling position in the eye drop market, abetted by continued growth of Visine A.C., which relieves minor eye irritation caused by allergies and colds. Measured media amounted to approximately $8 million.

The Pacquin hand cream line was extended with the introduction of Pacquin Skin Cream with Aloe late in the year. The new entry is being supported with magazine ads, couponing and sample giveaways.

Ben-Gay, which holds well over one-third of the analgesic cream market in the U.S. and is that category's leading brand seller, received nearly $5 million in measured media support—$3.4 million for Ben-Gay Analgesic Ointment, and $1.4 million for Ben-Gay Extra Strength Balm. All of the Ben-Gay spending went to tv.

Barbasol, meanwhile, is a non-advertised brand, but continues to show strong sales growth in the men's shaving cream market, according to Leeming/Pacquin.

Pfizer expects the healthcare products division to produce major sales gains for the company in the next few years. Expected sales of about eight or nine new medicines should play the major role.

The division markets its pharmaceuticals in seven therapeutic areas—antibiotics, antiinflammatory agents, central nervous system agents, cardiovascular agents, antiinfection, oral antidiabetes agents and other pharmaceuticals.

Antibiotic products are the sales leader and account for 39% of Pfizer's worldwide pharmaceutical sales.

It is the success of its new pharmaceuticals that Pfizer highlights as its most significant 1981 marketing development. At the forefront are Procardia, a cardiovascular agent for angina treatment launched in the U.S. in early 1982; and Feldene, a once-a-day antiarthritic agent, and Pfizer's first entry in the $600 million-a-year domestic antiarthritic drug market.

Supporting its commitment to technological innovation, Pfizer has been on an accelerated research and development program, and plans to increase r&d spending about 20%, to approximately $20 million this year.

Pillsbury Co.

	1981	1980
Sales*	$3,385,100,000	$3,301,700,000
Earnings*	136,300,000	119,600,000
Advertising**	131,015,100	124,025,700

*Fiscal year ends May 31
**AA estimate

Pillsbury, the nation's 47th largest advertiser in 1981, increased ad spending 5.6% over 1980 to $131 million, up from $124 million in 1980. The company reported 1982 earnings of $136.3 million, up 14% from $119.6 million in 1981, on sales

of $3.39 billion, up from $3.3 billion in '81, but financial analysts found the figures disappointing because fourth-quarter results included significant nonrecurring gains to balance flat operating results.

The company denied it had sought out non-operating income to boost earnings, and said the nonrecurring gains were "random events." The sale of the Wheat Nuts line occurred too late in the quarter to inform the market, a company official said.

During calendar 1981, the company also sold its Speas and Speas Farm apple juice unit to Sawyer Fruit and Vegetable Cooperative and its Wilton Enterprises subsidiary to a private investment group. The company purchased the Wickes Co. agricultural division, a marketer of dry, edible beans, peas and lentils sold under the Jack Rabbit label.

The company's share in the $756 million dessert mix category remained even at about 21%, behind Duncan Hines and Betty Crocker brands, despite a 44% decline in ad spending for Pillsbury Plus cake mix. Ad expenditures dropped significantly for the brownie mix—to less than $150,000 from more than $2.2 million the year before. However, ready-to-spread Frosting Supreme saw a 30% boost in advertising, to $5 million, and Streusel Swirl dessert cake mix received an ad budget hike of 60%, to $4.3 million. The company early this year consolidated its Frosting Supreme and refrigerated pie crust accounts at BBDO, New York, already the agency for cake mixes, as a result of a product conflict at former agency Leo Burnett USA, Chicago.

The company introduced coconut pecan and coconut almond Frosting Supreme and Oats 'n Brown Sugar Pillsbury Plus cake mix, being marketed nationally backed by a $7 million multimedia campaign. The introduction is expected to revitalize sales of German chocolate cake mix, which is intended to be used with the coconut pecan frosting. The company is calling the line the first major flavor introduction since the 1980 Carrot 'n Spice cake mix and cream cheese frosting.

Pillsbury, still maintaining its No. 1 position with about 60% of the volume in the $556 million refrigerated dough category, entered a new refrigerated dough product—Pipin' Hot Loaf—in four test markets, Grand Rapids, Mich., Syracuse, N.Y., Pittsfield, Mass., and Marion, Ind., late last year, and could roll out the product as early as this fall. The product, a refrigerated white bread dough that provides a loaf of bread in 30 minutes, uses a new technology for creating a yeast substitute that Pillsbury hopes can be used in other dough-based products. Tv spots use the theme, "There's a new loaf coming."

In an attempt to revitalize the refrigerated dough category, which declined through the '70s, Pillsbury has introduced five new products nationally since the beginning of calendar 1981: Parker House rolls, a two-item line of coffee cakes, double chocolate chip cookies, basic butter biscuits and reformulated Heat 'n Eat prebaked biscuits (formerly 1869 brand).

Pillsbury is now moving toward national introduction this fall of All Ready pie crusts, testing for two years in Cincinnati, Indianapolis, Milwaukee, Peoria, Ill., and St. Louis. The product, positioned as having homemade quality without the fuss, is sold in packages of two precut pieces of refrigerated dough.

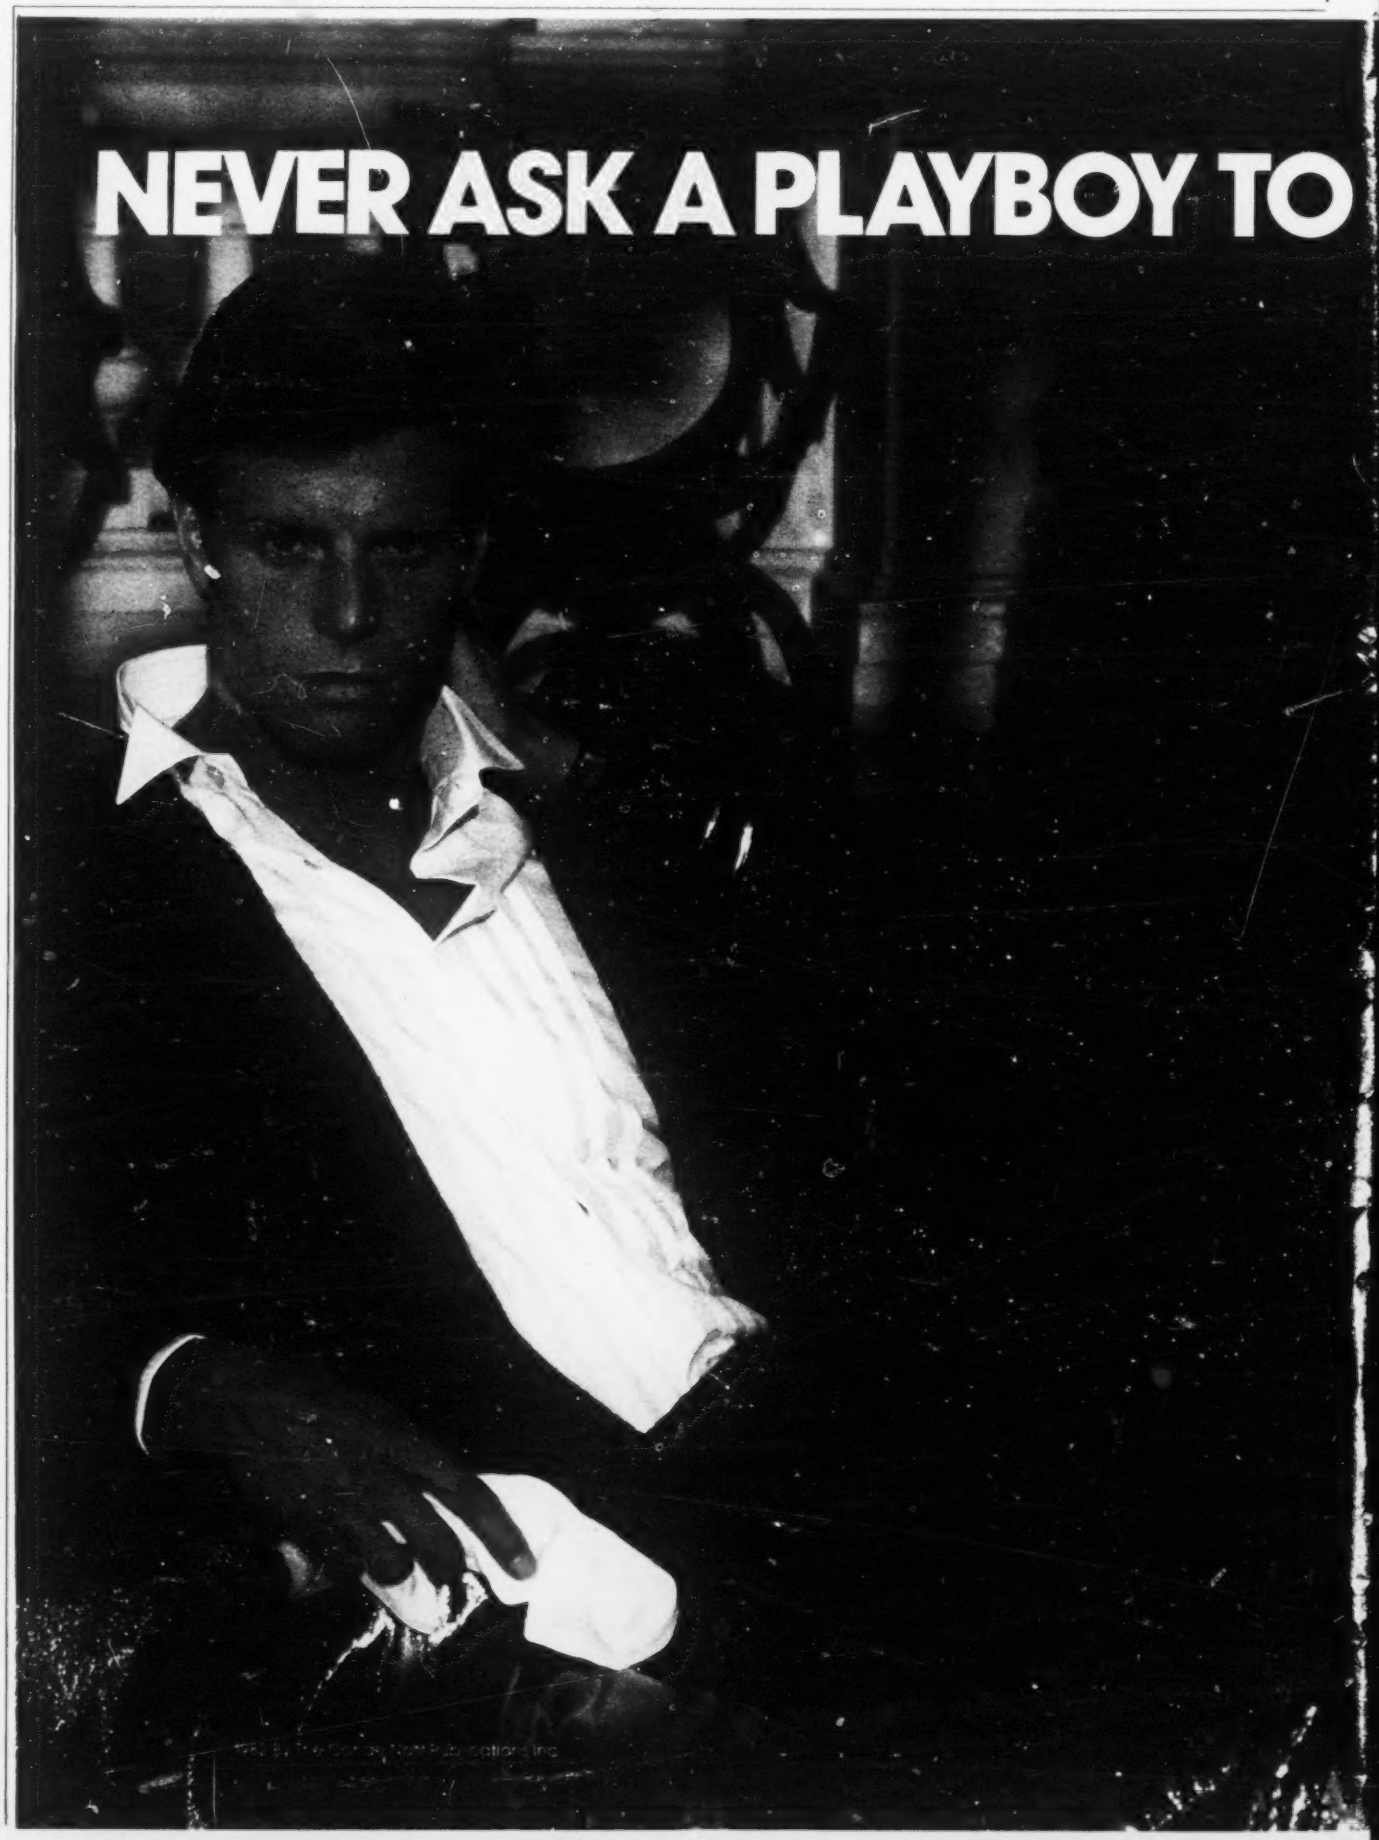
Management changes in the refrigerated products group included the naming of Robert Lindsay Jr. to director of marketing following the resignation of Peter Mihajlov. Michael Paxton succeeded Mr. Lindsay as director of new products; George Flett was named group marketing manager-specialty products to succeed Mr. Paxton. John Levine took over Mr. Flett's prior post as group marketing manager-new products.

This spring, the company began testing frozen New York-style cheesecake under the Margaret Baker's brand name in Denver, following several months of testing in Minneapolis. The product, containing four individual servings, previously was sold at foodservice. Pillsbury bought the brand in 1979 as part of the Green Giant purchase.

Pillsbury also introduced a four-item line of frozen toaster streudel into Phoenix test market this winter to compete with Kellogg's Pop-Tarts and Sara Lee cinnamon danish. Multimedia advertising at a $15 million national level supports the products.

Pillsbury moved out of convenience stores in selected markets and is now testing a three-item line of Heat & Eat microwave pizza in supermarkets in the Minneapolis area.

Pillsbury microwave popcorn



is reaching national distribution following last year's rollout. The Hungry Jack label is being eliminated from the package to give more prominence to the Pillsbury name. The company also markets microwave popcorn under the Heat & Eat label in convenience stores in the Southeast, Midwest, Northwest, California and Texas.

Frozen foods have been targeted as a growth vehicle for Pillsbury. Although its existing Green Giant entrees have been disappointing, the company is convinced that certain segments of frozen foods have growth potential. One area is the burgeoning Mexican food category, where Green Giant is still testing its Fiesta Grande line.

The unsuccessful Green Giant Toast Toppers were dropped during the year, and, in an attempt to put the business in the black and combat increasing competition from new low-calorie frozen entrees from Stouffer, Green Giant rolled out a new line of twin-pouch frozen entrees that are getting significant advertising support. Green Giant management is believed to be monitoring the low-calorie segment carefully, and could possibly make a move in the category. Green Giant frozen entrees received a 441% boost in ad spending during calendar 1981, to $1.3 million. A new ad campaign for entrees, the first Green Giant campaign without the Jolly Green Giant, broke in 15 markets in January, under the theme, "Welcome him home with Green Giant."

The company, already No. 1 in the frozen vegetables category, entered test markets last year with a five-item line of Valley Combinations mixed vegetables. Both frozen and canned vegetables received increased ad spending over calendar 1981, including a nearly 300% boost in spending for canned vegetables to about $1 million, and a 21% increase for frozen vegetables with cheese, to $1.5 million.

Since last fall, Pillsbury, ranking No. 1 in frozen pizza with a 31% market share, has been engaged in legal battles with top competitor Jeno's Inc. over Jeno's claim that Pillsbury misappropriated trade secrets by using manufacturing technology originally developed by Jeno's, and that Pillsbury altered its marketing strategy to injure Jeno's business. Pillsbury denied the charges and countersued, charging Jeno's with unfair competition and deceptive trade practices for packaging its pizza in packaging similar to Totino's and infringing on Pillsbury's patent for crisp-crust pizza. Jeno's was ordered to change its packaging to a yellow background. Jeno's next complained to the U.S. Department of Agriculture that Totino's packaging contains false statements that Totino's has "a deluxe topping on a crust nobody else has," but the department determined the package was not misleading.

Jeno's also warned tv stations nationally that they will be subject to lawsuits if they run Totino's spots that "denigrate the frozen pizza industry." Following Pillsbury's response to the networks, ABC upheld the company's right to make the claims; NBC asked for further substantiation, and its reply is still pending.

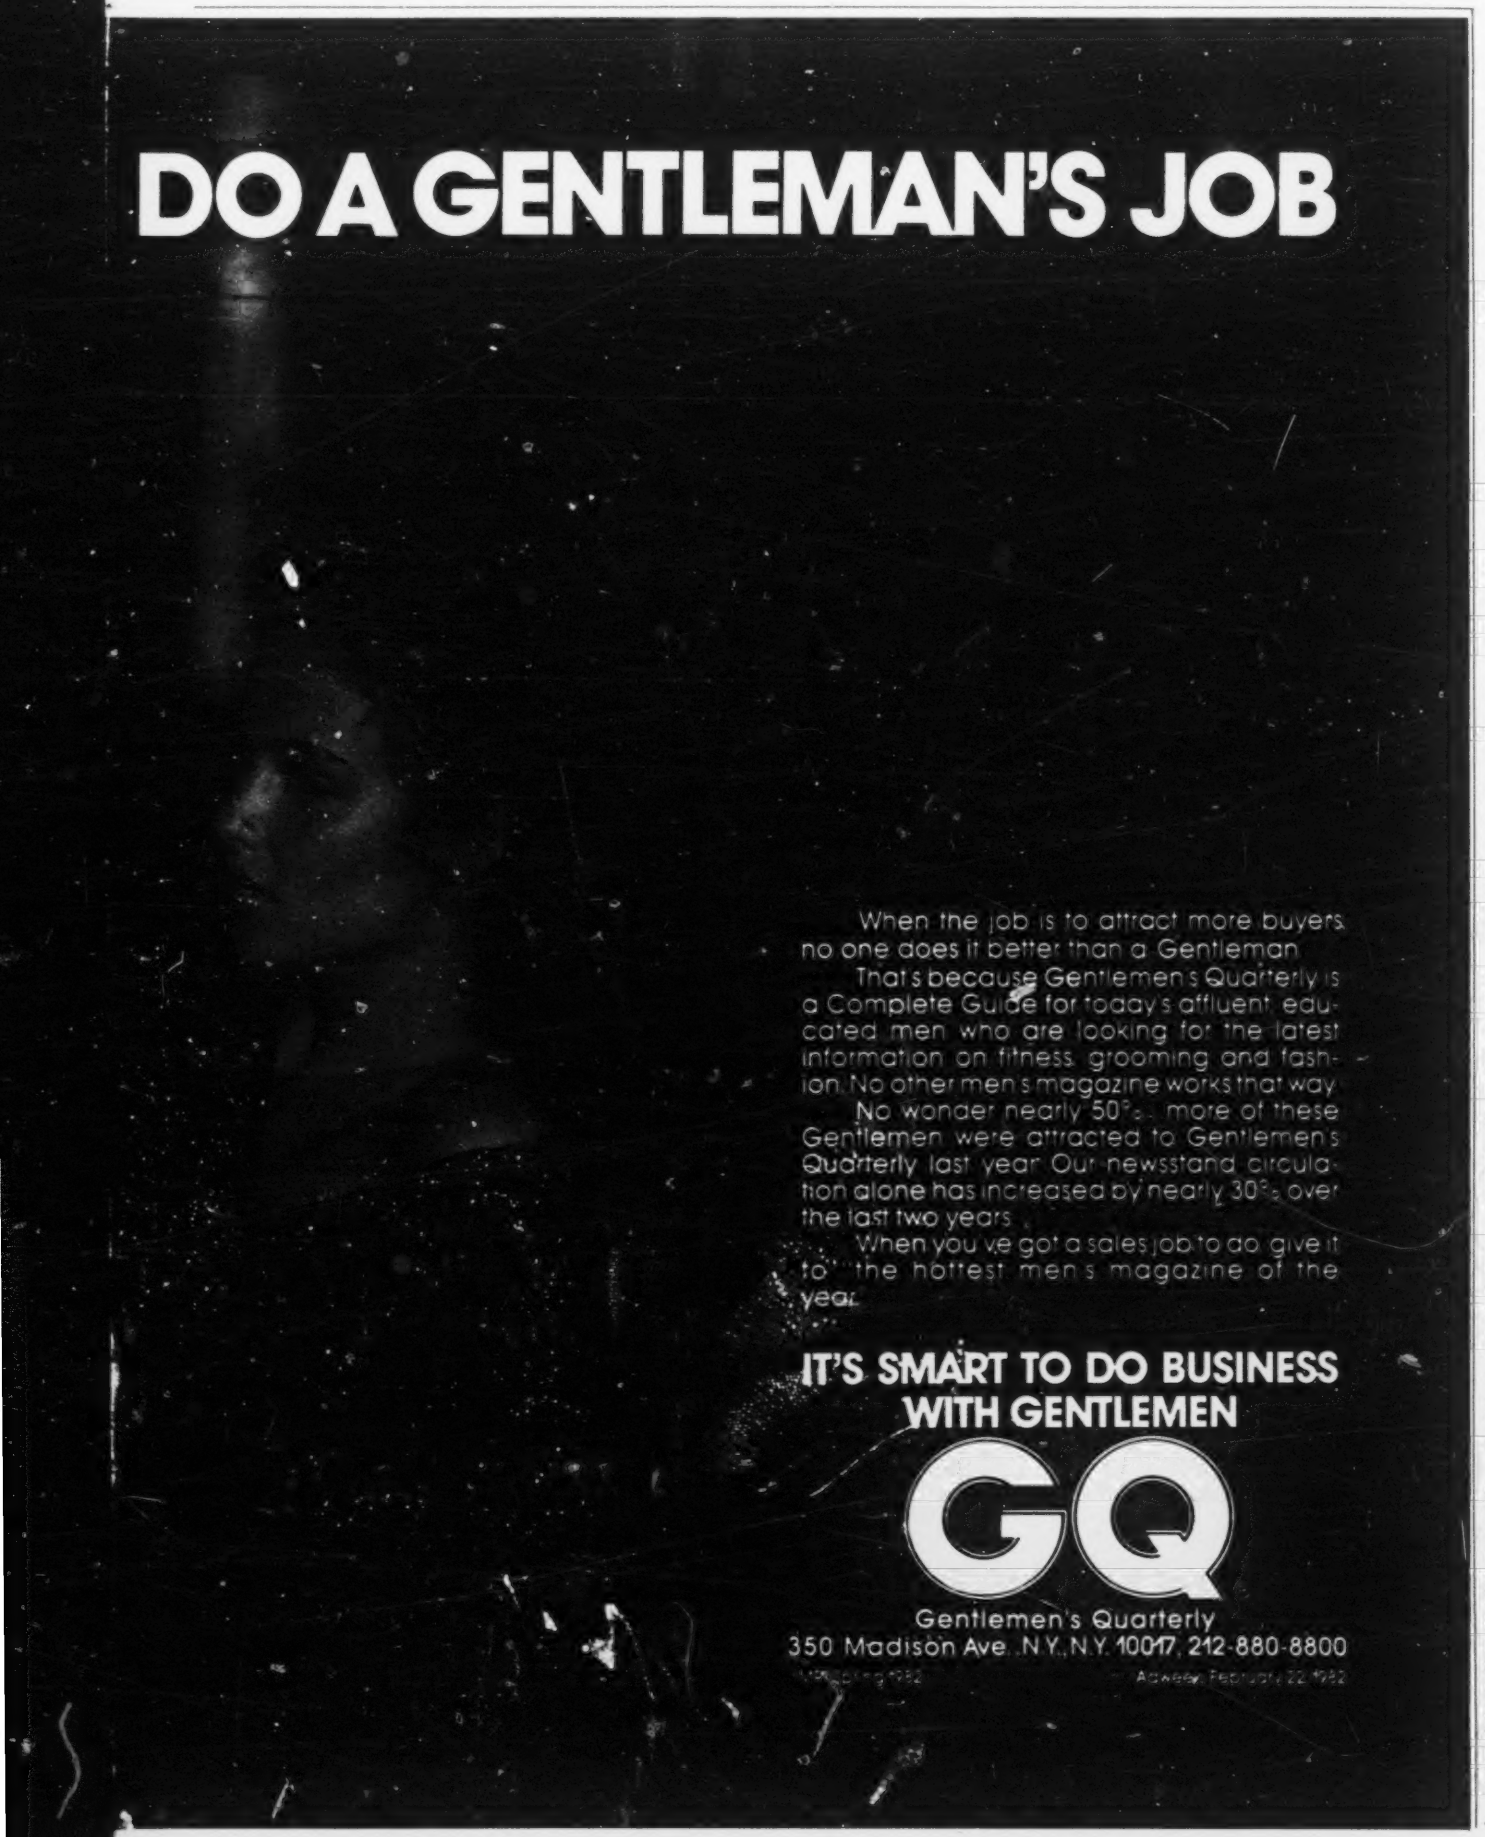
Meanwhile, Totino's continued to gain consumer support as it extended into national distribution. Introductory advertising in new markets last year included buy two-get one free offers. Ad spending for the brand nonetheless dropped 19% in calendar 1981, to $2.5 million.

Internationally, the company is pursuing a joint venture with Snow Brand Milk Products, Tokyo, to introduce Totino's in Japanese markets.

This spring, Pillsbury consolidated Burger King, Steak & Ale, Bennigan's and Poppin' Fresh operations into a restaurant group under the direction of Steak & Ale chairman Norman Brinker, now president of the group, headquartered in Dallas. The restaurant group recorded improved profits in fiscal 1982, led by Steak & Ale and Bennigan's.

Burger King, holding about 10% of the fast-food market in the U.S. and the No. 2 worldwide slot, had estimated earnings growth of about 10% in fiscal 1982 to $130 million. The chain, with about 3,000 domestic units, broke a new ad campaign earlier this year, under the "Aren't you hungry" theme, and focusing on products.

Burger King U.S.A., this spring, is expected to grow through acquisition, including the addition of 250 new restaurants this year. Among the new concepts being tried at Burger King are the development of smaller, 50 to 60-seat units that recognize increased drive-through business; late-night drive-through service, breakfast entrees and chicken, seafood and Mexican basket dinner meals. Internationally, Burger King has targeted the Japanese



DO A GENTLEMAN'S JOB
When the job is to attract more buyers no one does it better than a Gentleman.
That's because Gentlemen's Quarterly is a Complete Guide for today's affluent educated men who are looking for the latest information on fitness, grooming and fashion. No other men's magazine works that way.
No wonder nearly 50% more of these Gentlemen were attracted to Gentlemen's Quarterly last year. Our newsstand circulation alone has increased by nearly 30% over the last two years.
When you've got a sales job to do, give it to the hottest men's magazine of the year.
IT'S SMART TO DO BUSINESS WITH GENTLEMEN

Advertising February 22 1982

and possibly Mexican markets for expansion. Jerry B. Ruenheck, named president this year, is calling for a 1% increase in market share per year.

SSC&B, New York, was named for the $6 million to $10 million Steak & Ale Restaurants account, including Steak & Ale and Bennigan's, in January, after previous agency Leo Burnett USA took on the McDonald's account.

Calendar 1981 spending for both chains totaled about $4 million, more than $3.5 of which went to Steak & Ale. Steak & Ale expansion is slated for major Sunbelt markets.

Poppin Fresh Pies extended its "Pie-sneakers" campaign with new spots featuring chicken pot pie, taco salad and lasagne pie. The company hiked ad spending 23% to $1.5 million for the chain in calendar 1981. Company officials indicated that the chain may revise its current coffee shop concept; Pillsbury has stopped expansion of the chain in favor of improving unit volume.

Advertising*	51,750,000	49,253,300

*AA estimate

Polaroid Corp., Cambridge, Mass., the nation's 88th largest advertiser, increased its U.S. advertising expenditures by 5% in 1981.

Worldwide sales fell 2% to $1.42 billion, while earnings plummeted to $31.1 million from $85.4 million in 1980. The decline in earnings was in part attributed to payouts to the number of employes that elected to take early retirement under the company's voluntary severance program.

Polaroid continued its dominance of the $2 billion instant camera market in 1981, but it continues to be faced with the same marketing problem that has plagued the industry for the past four years—a lessening demand for instant cameras.

While Polaroid has continued to maintain its 66% share of the instant-camera market against archrival Eastman Kodak Co., the market itself has been shrinking.

In 1981, the company reported selling 5.6 million instant cameras, including 1 million Sun Cameras introduced in mid-year. This figure is down from the 6.6 million units sold in 1980, the 7.3 million sold in 1979 and the 9.4 million instant cameras sold in 1978.

Likewise, sales of instant film for both amateur and technical instant cameras fell for the second year to below 200 million units. Polaroid currently has a 25% share of the instant film market.

In an effort to build the sagging market—and increase its market share at the expense of Kodak, Polaroid, in June 1981, introduced the Polaroid Sun System consisting of two instant cameras (the 660 and the 640, each with a built-in flash) and a new ultra-high speed 600 ASA instant film. The film is the fastest on the market today, and can be used only with the Sun camera.

At the time of the introduction, Polaroid president, William J. McCune Jr., said the camera "will substantially increase the variety of situations in which the user can take an instant color picture with confidence, with a pleasing result, at a lower operating cost."

The Sun System, which has been heavily advertised using veteran Polaroid spokespeople James Garner and Mariette Hartley, received more than $16 million in advertising support, with nearly $13.5 million in network tv during the second half of 1981.

What makes the Sun System different from other instant cameras currently available is its ability to employ electronic flash in every picture-taking situation, both indoors and outdoors. This is accomplished by electronically calculating a blend of strobe light and natural light. As a result, the company says, the camera is able to deliver "more satisfactory pictures per pack of film."

Shortly after the introduction of the Sun System, Fuji Photo Film Co. introduced its first instant camera and film system.

At the time of the introduction last August, Fuji said its plans called for marketing the camera in Japan. Those familiar with the industry said the Fuji introduction could serve as a boon to Kodak's own instant film since the two systems are compatible.

Wall Streeters, however, discounted the possibility that Fuji would begin marketing the system in the U.S. anytime in the near future.

While Polaroid would have little to fear from a U.S. introduction by Fuji, its sales could be adversely affected by the Japan introduction. Japan is Polaroid's third-biggest market after the U.S. and Germany.

Film for the Fuji system is similar in many ways to Polaroid's. Both film formats are approximately the same size, and both films develop in 60 seconds.

The one significant difference in the cameras' operation is the placement of the battery. The Fuji system operates with a stored battery in the camera, while Polaroid provides a battery built into each pack of film, thereby insuring that the battery will always be fresh.

This past March, Polaroid introduced the Amigo 620, and a lower price Sun 650 which also uses the high-speed 600 film system. While an advertising budget for the Amigo 620 was not revealed, the company said it hoped to reach 91% of all U.S. adults an average of eight times. To accomplish this, the company began running 30-second commercials during prime time, featuring Mariette Hartley and the Muppets.

The tag line in print ads for the camera is "Meet Polaroid's Amigo, a new friend that's full of fun."

Since the retirement of Edwin Land, the company's founder, a number of reorganizational moves have taken place at the company under the direction of William McCune. I.M. Booth, an executive vp, was elected chief operating officer. Leaving the company after 17 years was Ted Voss, Polaroid's worldwide marketing group vp, to become senior vp/marketing for Atari Inc. Peter C. Wensberg, executive vp, was named head of worldwide advertising.

Since Mr. McCune took the helm, a number of steps have been implemented to rid Polaroid of its image as a "one product company." In October, 1980, Mr. McCune instituted three business groups within the company with responsibilities extending throughout its worldwide operations. The three units are: Amateur Photographic Products, which continues to account for the majority of the company's sales; TechPhoto, which includes technical and industrial photographic products, and Diversified Products, which covers nonphotographic areas. Last year, the three groups introduced a total of 38 new products and systems.

Commenting on the company's reorganization, Mr. McCune wrote in the annual report that the TechPhoto unit currently accounts for about 30% of the company's total sales.

The six products which received $1 million or more in advertising support during 1981 were all amateur photographic products. The products were: Polaroid Autofocus Sun Cameras and film, $16.2 million; Polaroid film, including TimesZero Supercolor, $6.5 million; Polaroid OneStep cameras, $6.3 million; Polaroid OneStep cameras and accessories, $5 million; Polaroid Sonar OneStep cameras and film, $1.3 million; and Polaroid Cameras, including the Button, $1.1 million.

More than $30 million of Polaroid's $41 million measured media spending went to network tv. Magazines received $6.4 million, and $1.5 million was spent on spot tv. Newspaper supplements, the only other medium used, received $51,000.

The company's growing involvement with technical photography led to a number of medical and industrial product introductions throughout 1981. In January, the company revealed its new Polaprinter slide copier. A compact desktop system, the copier is used for producing instant color and b&w prints and b&w negatives from 35mm slides.

In June the company brought out its Polaroid Type 612 ultra-high speed instrument recording film. Rated at a 20,000 ASA equivalent, the high-speed material is designed for oscilloscope trace recording, photomicrography and other scientific and technical applications.

The Polaroid SX-70 Photomicrographic System for instant self-developing images of subjects viewed through virtually any microscope was introduced.

The Polaroid CP-770 contrast enhancement filter was first introduced last September. The filter, an antireflection filter, attaches to video display terminal screens to eliminate glare and improve contrast for better readability and less eye fatigue.

The Polaroid Instant Endocamera, also introduced in September, attaches to the viewing end of flexible or rigid endoscopes and provides specialists in obstetrics, gynecology, urology and other branches of internal medicine with immediate color records of endoscopic examinations, which can be used for analysis, referral, patient education and records.

Also available last fall was the Polaroid Instant 8x10 Radiographic system. The system enables medical and industrial users of X-ray equipment to expose, process and view 8x10 radiographic transparencies quickly and easily in the field, hospital or office.

The company expects to introduce several new products and systems in 1982.

After nearly six years of battling Kodak in the instant-camera field, Polaroid may finally have its day in court. A lawsuit filed in 1976 in U.S. District Court in Boston, charging Kodak with the violation of its patents may soon be decided.

Polaroid has charged that the "manufacture, use and sale [by Kodak] of instant cameras and instant print film infringes on a number of U.S. patents owned by Polaroid."

Reportedly, three of the 10 patents in question are held by Polaroid's founder, Edwin H. Land. Polaroid has maintained that Kodak copied parts of its SX-70 camera.

Kodak charges that Polaroid patents every slight improvement rather than only true innovations.

The juryless trial was concluded on Feb. 26, 1982. Polaroid expects a decision in the case before fall 1982.

Polaroid also filed similar suits against Kodak and certain of its affiliates in the U.K. and Canada.

*Fiscal year ends June 30
**AA estimate

Procter & Gamble Co., Cin-

cinnati, the perennial No. 1 national advertiser, is estimated to have increased its 1981 advertising and promotion budget in the U.S. by approximately 4% over 1980 to $671.76 million.

The percentage increase, which has been shrinking steadily in recent years, was down slightly from 1980, when the company's investment jumped 6% from the previous year's spending.

In fiscal 1982, ended June 30, P&G reported sales of $11.94 billion, an increase of 5% over fiscal 1981. Earnings increased 16% to $777 million.

Under the leadership of a new chief executive, John Smale, P&G in 1981 began to pursue new directions through which it hopes to achieve its traditional 7½% growth rate.

For example, in the absence of a blockbuster product with which to revolutionize and overtake a market, the company has more new products in test worldwide than at any time in its history; there are 14 in the U.S. alone. The flurry of testing may also be an indication that the company is being forced to reach further for winning products; in 1981 the only new product it rolled out nationally was Crest gel toothpaste.

At the same time it is preparing for growth by acquisition.

P&G continued to show interest in the beverage industry (first demonstrated with the 1980 acquisition of the U.S. and international operations—excluding Canada—of Crush International) by acquiring the citrus processing operations of Ben Hill Griffin Inc. in 1981 for an undisclosed amount.

In early 1982, the company made its long anticipated move into the healthcare industry, acquiring MortonNorwich Products' $216 million pharmaceutical business for $371 million.

That property gives P&G a vehicle with which to learn the pharmaceutical business, in addition to the immediate support of a 330-member detail force. It also brings to P&G over-the-counter products in areas that complement its current product lineup. One of them, Pepto-Bismol, will make P&G the leader in the stomach remedy business where it currently has no entry. Chloraseptic, an antiseptic-anesthetic, gives the company a sore-throat remedy.

As it has with other acquisitions, P&G plans to operate the MortonNorwich business as a separate entity for the immediate future.

Meanwhile, the No. 1 spender in network tv, P&G broke the half-billion dollar mark in total tv expenditures in 1981, increasing its spot and network buying by 6% to $521.6 million. All of that increase went into network, where P&G raised spending by 9% to $393.24 million. Spending on spot tv continued to be cut, declining by 6% to $128.4 million in 1981.

The company also sliced several million dollars from its magazine budget for the second year in a row, cutting spending 4% to $35.7 million.

In radio, where the company had been increasing its investment steadily for several years, spending was cut dramatically from more than $4 million to $160,000.

Although it is difficult to determine how much money P&G is spending in cable tv, the company was an early supporter of Turner Broadcasting System's Cable News Network and is the network's largest sponsor. In December, it began support of a second cable outlet when it became a sponsor of Continental Broadcasting Network's weekly cooking program, "At Home With Beverly Nye."

And in early 1982, P&G started advertising on WTBS, Atlanta, Turner Broadcasting's "superstation."

In the promotions area, as probably the largest user of sampling, couponing, price-off, on-pack and other vehicles, P&G is estimated to have spent $108 million in unmeasured media in 1981.

All of this adds up to P&G's being such a large advertiser that its spending in just one category often exceeds the entire budget of a smaller company. For example, in 1981 it spent $115 million on 15 laundry products, up 10% from a year earlier.

The company spent $45 million on seven soap products; $43 million on five dishwashing products; $60 million on paper products; $147 million on personal care products; $64 million on food products; $20 million on household cleaning products, and $51 million on beverages, including coffee and soft drinks.

Normally P&G's most heavily advertised brand, Crest toothpaste received even more support than usual in 1981, when the company increased its spending for the brand by 59% to $45.45 million. The increase in spending was part of the "toothpaste war," which erupted during the year. P&G in April launched Advanced Formula Crest, based on a sodium fluoride substance rather than a stannous fluoride and said to be better tasting than the old formula and twice as effective in cavity protection. As it had with the original formula 22 years ago, the brand again obtained the seal of approval from the American Dental Assn.

Not six months later, in response to the inroads made by gels, in particular Beecham's Aquafresh, P&G rolled nationally with the Crest gel it had been testing in Burlington, Vt., and the Pacific Northwest. P&G reportedly sped up its plans to beat the rollout of Colgate-Palmolive's Colgate winterfresh gel.

By May of this year, the efforts by the two companies appeared to be paying off. The gel items accounted for approximately one-third of total sales for both brands, and the erosion of Crest's share had been reversed; Crest's share was above a 35% share for the first time in several years; Colgate was up to 21%.

Although the company's coffee brands remain among the most heavily supported, spending was reduced somewhat.

Call Barry Marcus or Larry Lubin at (212) 421-7277

Folger's received $26 million in support (down 4%), and High Point was backed with $21 million (down 14%). Ivory, with four advertised products, received $24 million in support, down 8% from a year earlier. And the Duncan Hines mixes were given $23 million in advertising, up 35%. Spending on the Crisco products, both oil and shortening, was up 11% to $21 million.

Of other P&G brands, the following received between $15 million and $20 million in measured media support: Both Luvs and Pampers disposable diapers; Head & Shoulders shampoo, and Tide detergent, which continues as the nation's No. 1-selling laundry detergent.

Backed by $10 million to $15 million were Bold 3 laundry detergent with fabric softener, Bounce fabric softener, Bounty paper towels, Cascade automatic dishwashing detergent, Cheer laundry detergent, Downy fabric softener, Era laundry detergent; Gleem toothpaste, Pert shampoo, Scope mouthwash and both Secret and Sure antiperspirants.

Challenged by the maturity of the category and the strong presence of generic and private label products, P&G has become active in the paper business. Although Charmin toilet paper, Bounty paper towels and Pampers disposable diapers all are clear market leaders, the company is dabbling with ways to further strengthen its presence.

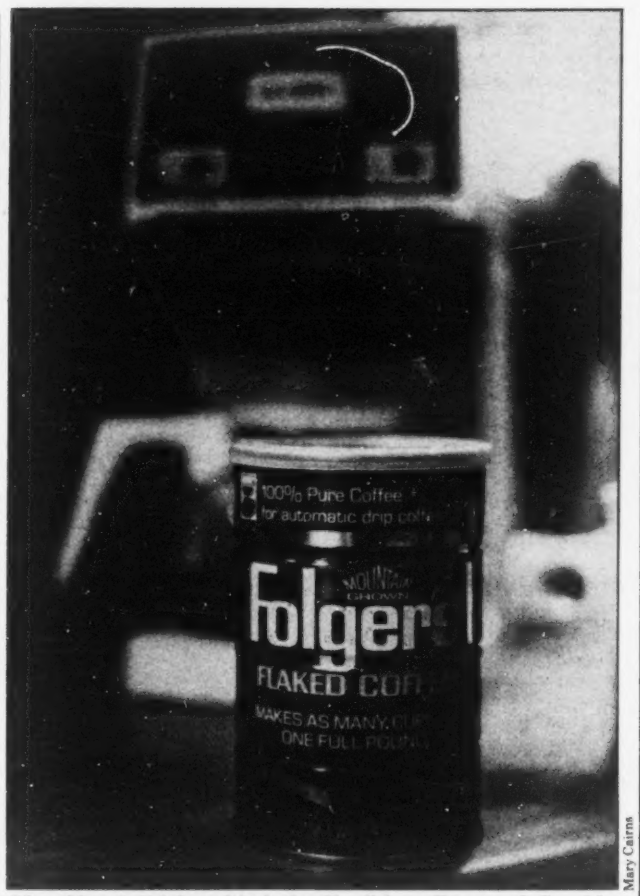
In June, 1981, the company introduced Summit, a line of unadvertised paper towels and toilet tissue priced from 25% to 30% below Bounty and Charmin, into nonfood outlets via a special sales force.

In August, it reintroduced Certain, a premoistened toilet tissue, into test in Omaha/Lincoln, Neb., and Des Moines, Ia. The new version is said to be less greasy and priced at parity with other "quality" bathroom tissues, in contrast to a version that tested in Fort Wayne and Indianapolis between 1978 and 1980. Certain was expanded further into Wisconsin and parts of Michigan in April, 1982.

In June, the company entered the toilet tissue business, with Banner, a moderately priced brand it is testing in parts of Georgia and North and South Carolina. Some of Banner's cost of savings is achieved by sacrificing 0.4 ins. of width, and some by using less expensive raw materials.

Charmin, P&G's premium-price product, climbed from a 16.6% dollar share to 18.4% in 1981; White Cloud, a two-ply product, rose from a 7.7% share to 8%. Spending on Charmin was $8 million, down 16%; on White Cloud it zoomed 182% to $9 million. Puffs facial tissue and Posh Puffs, at 70% and 65% distribution, respectively, are closing in on Kimberly-Clark's Kleenex products. Spending on Puffs totaled $5.4 million in 1981, remaining steady with the 1980 level.

Although P&G's Pampers hold more than a 50% dollar share of the disposable diaper market, the company apparently is concerned about guarding that franchise. In early 1982 it began to test a version of Pampers with elastic legs, called "stay dry gathers," in Fort Wayne and Lima, O. By June the new version, priced comparably with the old, was in Denver, Los Angeles, San Francisco, St. Louis and Hawaii. Although the company still considers the new version a "test" brand, it is expected to continue rolling the product out, replacing many package sizes of regular Pampers as it moves. Altogether in 1981, Pampers was backed by $19.8 million in measured media support, up 5%.



Mary Cairns

Mrs. Olson's "richest kind of coffee," from Procter & Gamble.

The company believes that demand for Luvs, its higher-price diaper with elastic legs, will continue because it offers "premium fit and containment." Luvs, which competes with Kimberly-Clark's Kleenex Huggies, was backed by $17.8 million in 1981, down 3% from 1980, the year it was introduced. Nationally its share is higher than Huggies', but in the 87% of the country where Huggies is distributed the two products are neck and neck.

The two companies have had the branded end of the market to themselves since February 1981, when Johnson & Johnson bowed out of the field. Nevertheless, unadvertised brands are active, and most of J&J's share (8%) is thought to have gone to such lower-end products.

In the $1.8 billion laundry detergent category, P&G is the undisputed leader. Combined, its brands hold just more than half the market. Included are: Tide (23.5%), Cheer (8.3%), Era (4.2%), Bold 3 (5.2%), Dash (2%), Oxydol (4.2%). Spending on those brands remained level.

The company appears to have taken notice of Colgate-Palmolive's introduction of Fresh Start, a concentrated granular product that had chalked up a 3.5% share by spring of 1982. In May, 1982, it began to test Ariel, a concentrated low sudsing granular laundry detergent in Colorado, Wyoming and parts of Nebraska, South Dakota, Utah and New Mexico. A strong brand overseas, Ariel is the company's largest-selling detergent.

The company also is testing Era Plus, a heavy-duty all-purpose liquid detergent with enzymes, in Minnesota, North Dakota and South Dakota.

Also in detergents, P&G continued to rollout Solo, a combination fabric softener and liquid detergent. By mid-1982 it was in 35% to 40% of the country, primarily in the East and Midwest. Competing against Texize's Yes, which rolled out nationally during 1981, Solo was backed by $2.2 million.

In other laundry products, P&G took two steps that affirmed its interest in the $500 million bleach market. In early 1981, the company began to test Biz (first a presoak, then a detergent booster) as an all fabric bleach. In January, 1982, Biz was relaunched nationally with this positioning, coming up directly against Clorox Co.'s Clorox 2.

In October, P&G put Vibrant dry bleach into test in Charleston, W.Va. Vibrant is positioned as a bleach that is as effective as liquid and as safe as dry bleaches. It is based on a new technology that reportedly is cause for high hopes for expanding the category.

In regular fabric softeners, P&G maintained its hold on more than 50% of the business with Bounce and Downy. Spending was down 5% on Downy to $14 million; on Bounce it was down 10% to $12.9 million.

In dishwashing detergents P&G also is No. 1. Cascade continued to lead the automatic segment, and the liquid brands maintained their shares: Ivory (17%), Dawn (13.5%) and Joy (12.5%).

Lever Bros. presented a new challenge with Sunlight, said to contain real lemon juice for extra cleaning power. Sunlight began to roll out in November following a successful marketing test in Phoenix, Ariz.

P&G continued to test Cinch, a dishwashing liquid containing abrasives, in Kansas City, and moved it into Phoenix in April, 1982.

Also in test in Kansas City, Omaha and areas of California and West Virginia is a product that opens a new category for P&G. Brigade automatic toilet bowl cleaner dispenses metered amounts of chlorine bleaches when the toilet is flushed. It has performed very well in Kansas City and is thought to be on the verge of national rollout.

Among antiperspirant/deodorants, P&G maintained its leadership position with Secret and Sure. It is testing a silicone-based dry roll-on Sure antiperspirant in Wisconsin, Georgia and Florida.

In bar soaps the company's six brands control the $1 billion category. They include Zest (8%), Ivory (7.8%), Coast (6.7%), Safeguard (6%), Camay (4.2%).

In August, 1981, the company entered the liquid soap category with Rejoice. Testing in Houston, Rejoice is positioned for use "instead of a bar." However, much of the optimism surrounding the initial expectations for liquid soap has subsided, and observers believe Rejoice will not be launched nationally.

In shampoos, a category whose dollar volume has long been controlled by P&G, the fickle nature of the business is making it difficult for all contenders. Pert, launched with $16 million in early 1980, had a 4.2% share by mid-1982. Prell, with a 4.4% share, continued to drop. And Head & Shoulders, supplemented by a conditioning formula rolled out in late 1980, held steady at just under 12%. The company is testing a new formula of Head & Shoulders in Milwaukee.

Spending on Pert was $14 million, down 15%; on Prell, support totaled $10 million, down 8%.

The company is testing an economy-price Ivory shampoo in parts of Missouri, Maine, Vermont and Wisconisn.

Apparently determined to get into the conditioner business, the company moved Head & Shoulders conditioner, said to "instantly condition hair and help control dandruff, itch and flakes," into test in the Northwest.

Procter & Gamble continues to test Abound, a conditioner in towlette form, in Peoria; and Pert cream rinse/conditioner in Milwaukee, Nashville and Buffalo/Rochester, N.Y.

Also in haircare products, the company introduced a new formula of Lilt home perm with a mild fragrance and without amonia. Spending on the home permanent line was up 35% to $4.8 million.

After testing a number of strategies for reviving Wondra skin lotion, the company in late 1982 prepared to relaunch the brand in an upright bottle with a new formula said to "relieve dry skin better."

Once with as much as a 13% share, Wondra was down to 4.6% when the restaging was announced to retailers.

The company is competing in a category which has heated up in the past year with the entry of S.C. Johnson & Son's Soft Sense, Andrew Jergens Co.'s Jergens Aloe & Lanolin and Chesebrough-Pond's dermatology formula Vaseline Intensive Care.

While the revitalization of Crest took much of the toothpaste limelight, P&G also increased spending behind Gleem by 52%, to $11.45 million, positioning it as a plaque remover. Gleem, which holds between a 2% and 3% share, lost some ground during the year. Pace, a gel that had been testing in several areas of the country since 1980, was expanded into Omaha and Phoenix in mid-1981, then withdrawn from all markets in April, 1982.

In food products, the company began to test two new products in the Duncan Hines line. Duncan Hines "ready-to-spread" frosting began testing in Evansville, Louisville and Lexington, Ky., in four flavors in November. Duncan Hines microwave cake mix was moved into the Seattle area in a yellow flavor. The latter product is believed to be one of the first non-frozen grocery products made specifically for microwave cooking.

Spending on the entire Duncan Hines line rose 35% to $23 million. Duncan Hines is the leader in the $750 million dessert mix category, with a 35% share. The cookie mix, launched nationally in 1980, was supported with $5.5 million.

Pringle's potato chips, long considered a major disappointment to the company, were revitalized in March, 1981, with an improved taste. Spending on the product, which had declined to $339,000, catapulted to $8 million.

In other food products, the company continued to test a butter-flavor version of Crisco shortening in Arizona.

In coffee, P&G's Folgers instant brand held steady with an 11% share, and its instant High Point decaffeinated coffee (rolled out nationally in May, 1980) chalked up a 5.5% share. Folger's ground roast coffee, which includes a high-yield flaked version lost one share point (to 24%), possibly thanks to a strong challenge from General Foods with the launch of Master Blend, which achieved a 5% share.

The company continues to test a High Point vacuum grind. It also is thought to be working on a highly aromatic coffee product. Actress Lauren Bacall was enlisted as a spokeswoman for High Point.

In soft drinks, although the company has made some formula and packaging modifications and changed the advertis-

ing themes for the products it inherited with the acquisition of Crush International, it is said still to be studying the business, and observers believe there is more activity to come.

Spending on Orange Crush was up 647% to $3 million; on Hires Root Beer it was up 255% to $875,000, and on Sun Drop it was stagnant.

Although the acquisition of the MortonNorwich pharmaceutical business is the first P&G has made in that field, the company has been moving in that direction internally for a number of years with both pharmaceuticals and paper products.

The company's prescription drugs are Osteoscan, an injected drug used to facilitate radiological diagnosis of bone disease; Didrnel, a tablet for symptoms of Paget's disease of the bone, and Topicycline, a topical antibiotic for the treatment of acne.

The company also markets Boundary, a line of surgical drapes and gowns, and Attends, a brief for use by incontinent adults.

In late 1981, P&G began to experiment with direct sales of Attends (it is marketed institutionally), advertising in *TV Guide*.

It also made the product available through the Sears, Roebuck & Co. catalog and 50 surgical supply stores and convalescent pharmacies. Although it once tested Attends at the consumer level in Idaho, that project has been discontinued.

Through its P&G productions, the company produces six regular soap operas: "Search for Tomorrow," "As the World Turns," "The Edge of Night," "The Guiding Light," "Another World" and "Texas." In March of 1981, "Search for Tomorrow" jumped from CBS to NBC.

P&G also produces prime-time shows, made-for-tv movies and specials such as "The People's Choice Awards," "Peter and Paul," "A Private Battle" and "The Patricia Neal Story."

In 1981 it announced that with Grey Advertising it would produce four two-hour first-run movies for prime time syndication.

In early 1982 the company embarked on its biggest prime-time special ever, with the co-production and sponsorship of "Marco Polo," a 10-hour four-day miniseries.

Also in early 1982, the first of a reported 400 cases pending against P&G in the Rely tampon controversy came to trial. The cases were brought by or on behalf of toxic shock syndrome victims who contend the disease is associated with use of Rely tampons.

P&G withdrew the product in September, 1980.

The results of the court trials by mid-1982 had proven inconclusive in terms of establishing precedents.

Quaker Oats Co., Chicago, the 56th largest national advertiser, spent an estimated $95.6 million in advertising in 1981, a decrease of 4% from 1980. The largest drop came in network tv, which fell from $46.7 million in expenditures in 1980 to $34.2 million in 1981.

Sales for the 1981 fiscal year, ending June 30, 1981, were $2.6 billion, an 8% increase over last year. Earnings totaled $105.2 million, up 9% over 1980.

Advertising Age 740 Rush Street Chicago, IL 60611

For fiscal 1982, which ended June 30 of this year, sales totaled $2.70 billion, an increase of 8% over fiscal year 1981. Earnings for that period were $120.6 million, up 11%.

An international marketer of grocery products, pet foods, toys and specialty chemicals, Quaker also owns and operates specialty retail and mail-order marketing companies.

The company's largest business segment is its U.S. grocery products unit, which in 1981 had $1.05 billion in sales, a 12% increase over 1980. Sales for fiscal 1982 totaled $1.2 billion, up 13% from 1981. Over-all unit volume did decline slightly, according to the company, because of "flat tonnage trends in the grocery industry, as well as competitive pressures in the pet foods business."

During fiscal 1982, unit volume increased among human food categories, and the full year's inclusion of Ken-L Ration Kibbles 'n Bits raised the total volume above a year ago, offsetting declines of other pet food products, the company said.

Quaker's primary strategy for the grocery operation has been to focus on internal product development. Three new products introduced in 1981—Aunt Jemima Lite syrup, Ken-L Ration Kibbles 'n Bits and Chewy Granola Bars—have proved to be successful entries in their categories.

Aunt Jemima Lite syrup, a reduced-calories product, was supported by ad expenditures of $2.8 million, the major part going to network tv. The company reported the product as having increased Quaker's market share almost 50%, allowing it to reach the No. 2 position in the pancake syrup category.

Ken-L Ration Kibbles 'n Bits moved Quaker from No. 6 to No. 3 share position in the dry dog food category during fiscal 1981. In fiscal 1982, the company solidified that No. 3 position with the help of that product, as well as Tender Chunks. Measured ad expenditures for the product in fiscal 1981 were $7.3 million. A $25 million introductory advertising and promotion budget supported a Kibbles 'n Bits' campaign, handled by J. Walter Thompson USA, Chicago. It featured dogs literally singing for their supper and has been one of Quaker's most successful new product campaigns in years.

As for the Chewy Granola Bars, since being introduced in late 1981, the product has performed better than the company expected. The product, designed to crumble General Mills' Nature Valley brand dominance of the category, was supported by $1.6 million in ad spending in fiscal 1981, all in for spot tv.

Cap'n Crunch, a fortified ready-to-eat cereal, enjoyed volume growth in fiscal 1981, with a 3.6% share of the $2.5 billion market. Quaker's other ready-to-eat cereals, Life, Corn Bran and 100% Natural, all contributed to the company's 8% share of the market.

Reformulated Halfsies corn and rice cereal presweetened with aspartame has been in distribution in the central U.S. this year. According to a company official, a national rollout is expected sometime in 1983.

Quaker's hot cereal product's over-all volume was down in fiscal 1981, this being attributed to a mild winter. A harsher winter in fiscal 1982, however, helped increase the product's volume.

The company did retain its No. 1 market share in the category, and Quaker Oats is the country's best-selling cereal, hot or cold. Measured ad expenditures for the product for 1981 were $3.6 million, the majority going to network tv.

Quaker's pancake mixes and syrup, marketed under the Aunt Jemima brand, experienced strong growth in fiscal 1981, mainly because of the success of the Lite syrup. But growth in fiscal 1982 was flat—the entire market was down 3%—though Lite had volume increases above its introductory year.

Quaker also enjoys the No. 1 market share in the corn meal, grits and tortilla flour category. Last fall, a new buttermilk corn meal mix was introduced in the southeastern U.S.

Quaker markets frozen foods under both the Aunt Jemima and the Celeste frozen pizza brands. Volume was off in the frozen foods area in 1981, largely because of declining industry trends in frozen breakfast foods. Fiscal 1982, however, proved to be better, as both product categories improved. Three new pizza flavors—Canadian bacon, Suprema and Suprema without meat—began region-by-region introduction in 1981, and Aunt Jemima waffles rolled out with a new flavor—apple and cinnamon.

Wolf Brand chili, sold regionally in the southwestern U.S., continues to be profitable and seeks to strengthen its regional markets. Ad spending in 1981 totaled $151,400, most of which went for spot tv.

On April 16, Quaker's foodservice division acquired Ardmore Farms, a Florida-based processor of portion-control juice marketed primarily to hospitals, schools, airlines and fast-food chains.

Before the acquistion, the foodservice division was already marketing a line of more than 200 products, including hot and ready-to-eat cereals, Wolf Brand chili, Aunt Jemima frozen breakfast products and Burry cookies and crackers.

Quaker pet food products, marketed under the Ken-L Ration and Puss 'n Boots brands, were, of course, spurred by Kibbles 'n Bits. But industry volume trends in the canned and semimoist dog food categories declined in fiscal 1981. The company has de-emphasized its canned pet food business with the closing of two plant operations.

Quaker is currently testing Ken-L Ration Sizzlin Skillet dog food in the Midwest and New England. The dog food is packaged in 3-lb. resealable cans. In the dry dog food category, Quaker currently holds an 8% share.

Over-all cat food unit volume declined in fiscal 1982.

International grocery products, Quaker's second-largest business segment, provided about one-third of consolidated sales and almost one-fifth of operating income. Sales were $845.1 million, an increase of 16% over 1980. Operating income totaled $49.5 million, 33% over 1980.

The company's three major product categories are edible oil, pet foods and cereal in Europe. In Italy, a controlling interest in Chiari & Forti represents Quaker's largest single operating company outside the U.S. It's the leading edible oil company in Italy and manufactures Cuore brand oil.

Through a joint venture agreement reached with Henkel, the largest household products company in Germany, Quaker's Minou cat food and Fido dog food are sold and distributed. To further strengthen Quaker's position as the No. 2 marketer of pet foods in Europe, two acquisitions were made in 1981: Quaker acquired 100% of Vitto di Morando, SpA, the third-largest pet food company in Italy, and 80% of Arlaud & Serre, a French marketer of pet accessories.

The Fisher-Price Toys division represents Quaker's third major business segment. Fisher-Price introduced 65 new products at the 1982 Toy Fair in New York—its largest introduction ever. The division said it would direct tv advertising to children for the first time, in response to positive consumer testing with mothers.

Fisher-Price accounted for 15% of the company's sales in fiscal 1981. The division remains the market leader in infant and preschool toys. Measured ad support for 1981 was $9.5 million,—16% of the company's total measured advertising expenditures.

In keeping with Quaker's operating strategy of expanding direct-to-consumer business, Jos. A. Bank Clothiers was acquired in July, 1981. Jos. A. Bank is a 14-store retailer and mail-order marketer of men's and women's clothing and accessories. The chain generated more than $58 million in sales for Quaker in fiscal 1981, and the company expects that its three direct-to-consumer businesses—Herrschners, Brookstone and Bank—will realize $117.8 million in sales for fiscal 1982.

Quaker entered the home videogame market in April, 1982, by acquiring U.S. Games, a California-based marketer of videogame cartridges. Quaker's in-house agency, AdCom, handles advertising for the new unit.

On June 22, Quaker sold its Magic Pan restaurant division to private investors for an undisclosed amount. The restaurants have had minimal ad support.

AdCom, incidentally, had a new president as of June, 1982, when the agency's vp and creative director Gary Bayer succeeded Elizabeth Harrington, now vp-advertising.

RCA Corp.

	1981	1980
Sales	$8,004,800,000	$8,011,300,000
Earnings	54,000,000	315,300,000
Advertising*	208,798,300	164,328,300

*AA estimate

RCA Corp., New York, the 17th largest national advertiser, increased advertising expenditures by 27% in 1981 to $208.8 million.

Worldwide sales decreased a bit in 1981, to $8.005 billion from the $8.01 billion tallied the year before.

However, earnings plummeted by 83% to $54 million from $315.3 million in 1980. The drop has been attributed to declines in the sales of picture tubes, transportation services and broadcasting, as well as to the economy and, in particuliar, high interest rates.

The poor profits overshadowed a good year for some of RCA's divisions. RCA led in sales of both color and b&w televisions in the U.S.; the government systems division had a record year, winning in excess of $800 million in new and expanded military contracts, and C.I.T. Financial Corp. had what the company called "an outstanding year."

During the year and into 1982, RCA continued in its newly adopted policy of divesting itself of noncommunications or electronics subsidiaries. It is actively looking for a company to buy its Hertz Corp. operation and trying to sell Coronet Industries, a carpet concern.

It sold off Gibson Greeting Cards for $80 million, and it reportedly considered selling off C.I.T. Financial, but then decided against it.

At the same time, RCA is refocusing on its core electronics and communication businesses. A corporate task force has been formed to devise plans for RCA's participation in satellite communications, pay tv, interactive communications, data transmission, cable and broadcast television systems, consumer communications and entertainment services. RCA plans to build on these new business opportunities through an expansion of its own capabilities, acquisition and joint ventures. In 1982, in fact, the company ventured into cable tv with the Entertainment Channel.

The company is also on a program to cut costs by eliminating or curtailing staff activities in the U.K., Canada and Switzerland, reducing substantially its capital expenditures and cutting back on personnel. In the U.S., 75 jobs were cut in 1981.

According to chairman-ceo Thornton F. Bradshaw, RCA's strategy is not designed for an overnight turnaround. "It is designed for the long haul, capitalizing on the strengths that have been RCA's heritage," Mr. Bradshaw said. "By any measure, 1981 was one of RCA's most difficult years, reflective perhaps of both the external environment and the unsettling management changes of the recent past. But the key elements to restore stable progress are within our grasp."

The first quarter of 1982 confirms both Mr. Bradshaw's enthusiasm and his contention that the company is not headed for a quick turnaround. Sales for the first three months of 1982 totaled $1.96 billion, up slightly from the $1.94 billion reported for the same period in 1981. Earnings increased to $60.5 million, a 44% increase over the previous year.

In the first quarter, RCA Global Communications began

offering domestic telex service in 70 U.S. cities and 250 countries; the solid state division introduced a videotex data terminal; RCA introduced the first eight-hour videocassette, and the service company began marketing an energy-management system and announced plans to enter the color data display tube business.

This apparent movement ahead comes on top of some shaky times in 1981, as Mr. Bradshaw noted. He had to calm some shareholders last year after Bendix Corp. bought 5.5 million shares, or 7.3%, of RCA. The RCA chief assured stockholders that Bendix was not going to take over the company or, indeed, even buy any more stock. He has also been denying persistent rumors that NBC is ready for the auction block.

Among RCA's units that Mr. Bradshaw oversees, the electronics segment is the largest, accounting for 55% of the company's sales total. It is divided up into consumer product and services; commercial products and services, and goverment systems and services. For the division as a whole, sales were up by 11%, but income was down by 43% because of costs in introducing the RCA SelectaVision videodisc player and a loss in the commercial products and services division.

Sales of consumer products and services unit were up by 20% in 1981 to $2.32 billion from $1.92 billion, while profits went up 32% to $132.2 million from $99.6 million. The principal products of the division are tv receivers (black and white and color), videocassette recorders, videodisc players and discs and records and recorded tapes.

In the past year, RCA introduced a portable 9-in. color tv, a 50-in. color projection tv receiver and unveiled its ColorTrak 2000 series. The ad budget for RCA television sets was nearly doubled, moving to $88.8 million in 1981 from $44.5 million in 1980. Measured media for color tv sets was up slightly, increasing to $14.3 million from $14.2 million last year.

The videocassette recorders operation was the first to introduce a home video camera using Newvicon tube.

Less upbeat news came in the videodisc player category. After investing more than $200 million in the development of SelectaVision videodisc players, RCA introduced the product last year. But consumer reception did not approach the company's lofty expectations. RCA predicted 200,000 units would be sold in the first year; only 60,000 videodisc players were sold in the first six months.

The system, called "CED" (capacitance electronic disc), consists of a player and record-like disc that produces sound and pictures for display on a tv screen. The company spent $8.7 million in measured media to promote the new product.

While the players were not doing as well as expected, videodisc sales were substantially stronger.

More than 2 million discs were sold in 1981, and, as a result, production capability has been increased by more than 300%.

In more conventional technology, the bottom line for RCA's records and recorded tapes suffered in 1981, despite increased sales and profits. While the division fared well in the U.S., the same cannot be said for overseas, where the strong U.S. dollar and poor economic conditions in Europe and South America resulted in a depressed bottom line—for the second year in a row. The company made a significant artist acquisition in 1981—it signed Diana Ross to its roster. The division spent $1.89 million in measured media, a 62% increase over 1980.

The $6 million RCA Music Service account, part of RCA's consumer products and services unit, changed agencies last year, going to Rapp & Collins from Tatham-Laird & Kudner and then a few months later from Rapp & Collins to Benton & Bowles.

NBC, in the meantime, had a sales increase of 6% to $1.62 billion from $1.52 billion in 1980, while profits skidded 36% to $48.1 million as a result of low audience ratings, a write-down of certain program material and increased programing costs.

In an attempt to spruce up the NBC act, a management overhaul took place last July. With Mr. Bradshaw at the helm of RCA, Grant A. Tinker took over as chairman-chief executive officer of NBC, Robert E. Mulholland became president-chief operating officer and Irwin B. Segelstein was named vice-chairman. Herbert Schlosser, formerly NBC network president, enjoyed an upward turn in fortunes in 1981, when Mr. Bradshaw named him in charge of all the company's home entertainment software activities, except the National Broadcasting Co.

But the outlook is not as rosy for NBC. While the network boasts that its "pride is showing," fewer people are watching it than the other networks. Mr. Tinker himself said the network is in its "11th hour." NBC came in third behind CBS and ABC for the whole of 1981. It also didn't help that a 13-week strike by the writers delayed the start of the 1981 season until 1982.

The network did score a winner with "Hill Street Blues," the highly acclaimed police series. The "Today" show added new blood with Bryant Gumbel and Chris Wallace, filling the gap left by Tom Brokaw when he became a co-anchor on the nightly news. In the summer of 1982, "Today" added another half hour in its continual battle to fend off the prime competition, ABC's "Good Morning America." In the daytime soap battle, NBC was again the cellar dweller.

MEASURING MEDIA . . .

Brand Expenditures. A good place to begin . . . a good place to end.

Measuring media for its advertising content is done by independently held companies in co-operation with the media. These measurements provide a breakdown of brand expenditures.

Brand expenditures answer the very first question often asked by advertisers: How much do I have to spend? For it is competitive brand expenditures that indicate how much is necessary to spend to keep up with the competition, or how much it will cost to introduce a new brand into the marketplace; the price of admission. An analysis of brand expenditures can also lend insight to a brand's marketing strategy — the overall media-mix, the selection of the individual vehicles within a particular medium, regionality, seasonal variation, etc. But in the beginning, the question is how much? How much are they spending? How much will I have to spend?

Once a brand's ad budget is determined, the other measurement services come into play to provide additional marketing intelligence: Audience measurement, sales measurement, measurement of the market itself.

Audience measurement, which provides a profile of the reader/viewer/listener helps direct where advertising dollars are to be spent. Naturally, these dollars are going to be placed in those media whose audience has a high buying/usage profile of a particular product type. And within the media, in the magazines, on the programs, and during the dayparts that will reach the heavy user. Determine who the heavy user is, find out what they read, look at and listen to, and you have come a long way in determining where to place ad dollars. Audience measurement: Key marketing intelligence.

Sales measurement — A tracking of product movement, whether it is off the shelf or out of the warehouse, can be a great aid in determining *when* to spend. Sales measurement provides the sought-after share of market figures, as well as analytical data for those whose bent it is to show advertising effectiveness. Naturally, you spend when your market is buying or shortly before, and data supplied by the sales measurement services tells you when they are buying. This is not necessarily a simple decision. All the money spent on advertising sunglasses during the winter months is not directed at the skiing market. The major manufacturers know sunglasses are an impulse item. Drug and sundry stores buy their sunglass display units in the winter and that is when to advertise. Know thy market — and where it is. In this vast country, there are tremendous regional variations. In Aspen, happiness is a dog and a jeep. The Southeast, for reasons we will not go into here, is a heavy pet food market. The sales measurement services show these seasonal and regional variations of spending patterns.

Measuring the marketplace — Thousands of door-to-door interviews in the field and in the store, are often directly fed back to those interviewed in the creative and copy approach to a particular campaign. Chances are that, "I like its clean, fresh smell" did not come out of a copywriter's head but directly off an interviewer's sheet, tabulated in some editing and coding department in one of the many market measurement companies. A new product or the emphasis of a specific attribute of an existing product comes from ideas expressed in the field — the marketplace — whose measurement is another essential ingredient of marketing intelligence.

All of the major and once minor brands utilize these measurement services. Services are subscribed to, reports received, data analyzed. It is a long and costly process to obtain and review the available information which gives the industry its expertise. At the end of all of the acquisition and analysis of services used to determine how much to spend, where to spend, when to spend and what to say, advertising dollars are spent; time is bought, space purchased. And we come full circle — back to the media measurement services. We tell you who spent, how much, where, when and against whom.

Brand expenditures — A good place to begin . . . a good place to end.

LNA

Since the beginning of the 1981-82 prime time season, NBC has lost about 800,000 homes. In the February sweeps, 130 NBC affiliates lost ground—only 33 improved and 13 stayed even. The network's measured media spending was increased 5% to $14.9 million from $14.2 million in 1980.

NBC Radio Network had better fortunes, as it continued to attract more listeners than any other network, according to the company. Its eight owned am and fm stations hit record listener levels in 1981. NBC's "The Source" network claimed the largest share of listeners aged 18 to 34 years old. In measured spending, the radio network spent less in measured media in 1981 than in 1980, dropping to $292,500 from $911,700.

RCA's transportation services, specifically the Hertz Corp., suffered in 1981. Sales were up 11% to $1.4 billion, but profits dove 72%. The drop is attributed to a special charge to cover the restructuring of truck operations, higher interest costs incurred in financing an expanded vehicle fleet and reduced profit margins. RCA is hoping to find a buyer for Hertz, thereby lifting a $1.3 million debt off its balance sheets.

It is speculated that RCA is asking $750 million for Hertz. For a while last spring, RCA thought it had found its saviour in the Firestone Tire & Rubber Co., but those talks broke off without a sale.

The Hertz car rental segment introduced a new rate structure last year, eliminating mileage charges and giving a guaranteed flat rate. As the company gained in its airport market share, it expanded its facilities or added new ones in the airpports in Los Angeles, Chicago, Atlanta, Houston and Boston.

Measured media spending for the segment was up 42% in 1981, to $10.4 million from $7.28 million in 1980. The company has signed former Buffalo Bills running back great O.J. Simpson for yet another year of rushing and flying through airports.

Sales for RCA's communications segment were up 6% in 1981, reaching $269.8 million, compared with the $253.5 million recorded the year before. A new subsidiary was formed in 1981—RCA Communications. It was designed to consolidate RCA's communications businesses and "to provide them with over-all strategic direction and financial planning."

C.I.T. Financial Services suffered a slight decline in equity in profit before taxes on income, slipping to $168.3 million from $177.4 in 1980 as a result of reduced net yield on the receivables portfolio restated in 1980. The company's financial portfolio exceeded $7.2 billion by the end of 1981, an increase of $1.8 billion over 1980. The portfolio makeup includes 53% industrial financing and leasing receivables, 33% consumer receivables and 14% factoring, commercial financing and wholesale receivables.

Ralston Purina Co.

	1981	1980
Sales	$5,224,700,000*	$4,873,200,000
Earnings	174,800,000*	163,000,000
Advertising**	192,984,000	206,794,860

*Fiscal year ended Sept. 30, 1981
**AA estimate

Ralston Purina Co., St. Louis, the 25th largest national advertiser, reduced domestic advertising spending in 1981 to an estimated $193.0 million, down 7% from $206.8 million in 1980.

The company tallied alltime record earnings and sales in the fiscal year ending Sept. 30, 1981. Total sales reached $5.22 billion compared with $4.87 billion last year, a 7% increase. Net earnings were $174.8 million in 1981, also a 7% increase from 1980, when earnings totaled $163 million.

Ralston Purina's operations comprise three main units: Worldwide animal feeds, domestic and worldwide grocery products and Foodmaker, the San Diego-based restaurant subsidiary consisting of Jack in the Box and Continental Restaurant Systems. During fiscal 1981, the animal feed operations produced 40% of the company's total sales and 29% of its earnings. Domestic grocery products accounted for 25% of sales, but contributed 52% of profits. Foodmaker's sales were 11% of total sales and 11% of earnings.

As 1981 unfolded, it became clear through a series of management changes and through the company's actions that Ralston Purina would devote itself to refreshing and restaging many of its existing grocery products. That process included new packaging for a number of brands and new operating strategies for other products to accommodate the shift in consumer markets to generic items, house brands and "value" labels.

The move was a departure from the company's actions in previous years when it kept up an accelerated new product introduction pace in pet foods and cereals, its primary grocery products categories. The strategy shift led to decreases in advertising expenditures for the year.

A decision to deemphasize advertising support for the Chicken of the Sea brand also contributed to the decline.

On the other hand, the company's Jack in the Box restaurants received increased support, as the chain introduced new products throughout the year and battled to recoup sales after receiving adverse publicity.

A management succession occurred during the year, resulting in a number of corporate personnel changes. William P. Stiritz, group vp-grocery products and restaurant operations, was chosen to succeed R. Hal Dean as the company's president in January, 1981. He added the chief executive officer title in July, 1981, and later, in January, 1982, was named chairman. Paul Cornelsen, vice-chairman and chief operating officer, resigned his post in September, 1981. The move was expected by company watchers after Mr. Stritz was chosen for the top job.

In the marketing area, William H. Lacey, vp-director of marketing, grocery products division, was named president, grocery products, succeeding Mr. Stiritz.

In March, 1981, Blair Gensamer, division vp-director of marketing, cat food, was named to a new post handling pet food marketing; in spring, 1982, he became division vp-director of marketing for all grocery products.

William Claggett continued in his post as division vp-director, advertising & marketing services.

All three of Ralston Purina's major grocery products businesses—dog food, cat food and cereal—recorded higher earnings in 1981. Competition continued to be fierce. The result was a high level of trade promotions and allowances in all three categories.

Van Camp tuna products and Country Stand fresh mushrooms were the two earnings trouble spots for the company, and analysts speculated that both businesses were potential divestiture candidates. In a cost-saving and marketing-related measure, the tuna operation's marketing, distribution and sales functions were integrated into the company's grocery products unit in June, 1981.

In the dry dog food business, the company's traditional stronghold, Ralston Purina dominated the category with an estimated 45% share of the market in retail sales in 1981. Sales

PANDA PRODUCTIONS
405 South 96th Street / Omaha NE 68114

of generic and private label products grew rapidly as consumers tended to trade down in the recessionary environment of 1981.

The company benefited throughout 1981 from several dog food product relaunches started in late 1980 and early 1981. Purina Dog Chow, the flagship brand, received renewed advertising support in 1981 after the company redesigned its package in late 1980—the first change in 25 years. Measured media spending hit $5.9 million, a 103% increase over the 1980 figure, $2.9 million. Chuck Wagon, which had experienced share declines for several years, was reformulated and reintroduced as a three-particle product in January, 1981. Advertising and promotion dramatically increased for the brand, to $7 million in 1981, from $2.6 million, a 169% increase.

In February, 1981, the company relaunched High Protein Dog Meal under the name High Protein Plus. It followed in May, 1981, with a line extension, High Protein Flavors. Measured ad support for the change was small for the category—$677,200.

Moist & Chunky, a soft-moist brand introduced in the late 1970s to counter Quaker Oats Co.'s Tender Chunks line, also received a boost in late 1981. The brand, which had fallen to a 1% share of the market, underwent a package design change, including a down-sizing to 4 lb. and 8 lb. sizes. It also got some advertising and couponing support in the first half of 1982. In 1981, however, there was no measured media support. Retailers were skeptical about the changes and the brand's chances for future success, according to industry sources.

Mainstay, a highly touted and much-advertised brand launched in early 1980, received a new lease on life from the company late in 1981. Reacting to the volume and share gains of low price brands, the company reintroduced Mainstay as a "value" brand, dropping its flavored-particle presentation in favor of more traditional chunks. The brand was repackaged, downsized to 4 lb. and 8 lb. sizes and priced at levels between the generics and Purina Dog Chow. The original Mainstay received only $350,000 in measured media support in 1981 (compared with the introductory level of $11.2 million in 1980). When the new, low-priced version hit supermarket shelves in early 1982, the company supported it with coupons only, and indications were that the brand would be unadvertised.

Ad and promotion spending dropped significantly for a number of other dog food products. Hero, a dry dog food formulated for large breed dogs and puppies, was supported with a $2.8 million measured media budget in its second year of distribution, down 56% from $6.3 million in 1980, its first year of national distribution. In June, 1982, the brand hovered at only about a 1% share. The Fit & Trim brand lost virtually all of its support in 1981: Its budget was $63,000, against $2.4 million in 1980.

The company also made cuts in the three-item Blend line. The brands received about $1 million in 1981, compared with $3 million in 1980. In May, 1982, the Butcher's Blend brand was repackaged in 9 lb. and 4.5 lb. bags, reflecting another down-sizing effort.

Support for Bonz, a dog snack launched in 1979, dropped dramatically during the year, but the brand maintained its No. 2 status behind Nabisco's Milk-Bone. In 1981, Bonz' measured media expenditures were $1.7 million, against $7.2 million in 1980, a 77% reduction. Both Purina High Protein Dog Meal and Puppy Chow spending stayed about the same during the year.

New product testing in the dog food category was downplayed in light of the relaunching efforts. Maverick, a semi-moist brand packed in a canister, was pulled from Erie, Pa., and Peoria, Ill., tests in January, 1981. In the spring of 1982, Ralston started selling Thrive dry dog food in Ohio, Pittsburgh, Phoenix-Tucson, Houston and Jacksonville-Tampa, Fla., test markets.

Cat food sales and market share, in the meantime, fared well in 1981 in a category that continued to outpace the rest of the pet food industry. The company said its volume outperformed the market, and all three categories—dry, semimoist and canned—were ahead of 1980. Thrive, a major new dry cat food, rolled out in January, 1981. The brand received $10.3 million in measured media support, making it the product to capture the highest expenditures in 1981.

The company wrestled with its problems in the canned cat food market in 1981 and early 1982 through an array of marketing strategies. In March, 1981, Ralston introduced Purina 100, a new brand, replacing its Purina Variety Menu line. At the time of the introduction, the company said it would get out of the canned cat food business if the product failed.

The product did not fail, but by late 1981, the company decided it could make better inroads on category leaders Star-Kist's 9-Lives and Carnation's Friskies Buffet by cutting the price and converting Purina 100 into a low-price, value brand. By year's end, it had captured about 10% of retail sales in the estimated $700 million gourmet canned cat food market.

With the new positioning, advertising and consumer promotion support for Purina 100 was virtually eliminated. Until the strategy switch, the company had spent $5.3 million on measured media. In July, 1982, Ralston took a step back into the canned market with Meow Mix Meals, a test market product in western New York and Denver.

Purina Cat Chow continued to maintain its leading position in the dry cat food category during the year, but it received less measured media support. The company spent $6 million behind the brand in 1981, compared with $8.3 in 1980. Good Mews, another dry brand, also was cut: Spending dropped from $3.5 million in 1980 to $741,100 in 1981. Spending on Whisker Lickins and Tender Vittles semi-moist brands also decreased in 1981.

During the year, Ralston Purina got into one new business and out of another. In late 1981, the company started testing its first nonfood pet product, Top Secret, a cat litter deodorizer, in Marion, Ind., and Pittsfield, Mass. And in October, 1981, the company announced the sale of the Deco Plants division, a home party direct sales operation. Officials said the division did not fit into long-range goals.

In the cereal business, Ralston Purina continued to achieve success in 1981. Both branded and private label cereals had record sales and earnings, recording the largest year-to-year advances in the company's history. Two national introductions in 1980—Wheat & Raisin Chex and Waffelos—helped spur growth in 1981, and both brands were heavily advertised. Waffelos was backed by $6.1 million in measured media in 1981, its first full year in national distribution. This came as spending for the entire Chex line was down about 6% in 1981, from $9.5 million last year to $8.9 million.

The company introduced a Blueberry Waffelos line extension and Dinky Donuts in 1981. The latter was the object of some competitive wrangling between Ralston Purina and General Mills, which put its Donutz brand in one of the same test markets, and then, nationwide. Ralston filed a trademark infringement and unfair competition complaint in late March, 1981. The suit was settled out of court in September, 1981.

In April, 1982, Ralston's children's cereal agency, McDonald & Little, Atlanta, resigned the $12 million account. The agency had been purchased in 1981 by Ted Bates Worldwide, and Bates' Campbell-Mithun subsidiary handles several General Mills adult and family cereals.

After an extended agency review, the company reassigned the children's cereals brands and several other products in July. Don Tennant Co., Chicago, was awarded Cookie-Crisp cereals and Dinky Donuts; Avrett, Free & Fischer, New York, was assigned Waffelos. As part of a realignment, Ralston Purina moved the Special Dinners cat food brand and Chicken of the Sea tuna account to TBWA Advertising, New York, which had handled the latter brand on a project basis during the year. The assignment represented the first major piece of domestic Ralston Purina business for TBWA, which handles some company products in France and Germany.

Jack in the Box restaurants suffered from adverse publicity in 1981 that temporarily affected sales and earnings. In August, 1981, U.S. Department of Agriculture inspectors discovered Australian horsemeat in meat shipments headed for Jack in the Box restaurants.

The 800-unit chain subsequently switched to American-grown beef and increased ad support to emphasize the chain's quality products.

versy, the chain continued to aggressively launch new products and increase advertising and sales promotion to support them.

Measured media spending for Jack in the Box during the year jumped 11%, to $9.8 million in 1981 from $8.8 million in 1980.

New products—the focus of the advertising—included the Bacon Cheeseburger Supreme and the Club Supreme, which came out in 1981. Through mid-1982, Jack in the Box rolled out the Hot Beef & Cheese Supreme, a Crescent Breakfast line and individual salads. The chain compared its new products to McDonald's and Burger King in a campaign started at year's end and directed at the leaders.

The company announced its intention to again start franchising Jack in the Box in 1982. The program would include existing units as well as new restaurants. Remodeling and renovation programs also were put into place during the year.

Continental Restaurant Systems, the company's chain of approximately 85 diverse full service restaurants, reached record sales and earnings levels in 1981 with average annual unit sales at more than $1.5 million. The company targeted its Carlos Murphy's restaurant concept, launched in 1979, as a major growth vehicle for the division.

	1981	1980
Sales	$2,365,938,000	2,203,324,000
Earnings	174,821,000	192,407,000
Advertising*	106,838,750	105,430,400

*AA estimate

Revlon Inc., New York, the 50th largest national advertiser, increased its advertising by approximately 1% in 1981 to $106.6 million. The company placed its worldwide ad expenditures at $198.9 million, an 8.4% increase over the $183.5 spent in 1980.

Sales increased to about $2.37 billion in 1981, up by approximately 7% over the previous year's volume of $2.20 billion. Sales in the first half of 1982 climbed a fraction of a per cent, rising to $1.13 billion from $1.12 billion over the same period in 1981.

Despite the sales gains, however, earnings declined for the first time in the company's history in 1981, by about 9% from the 1980 level.

The drop continued in 1982 as first half earnings declined 27% to $67.7 million from the $92.2 million recorded in the first half of 1981.

The decrease in earnings in 1981, from $192.4 million to $174.8 million, has been attributed primarily to adverse currency developments and foreign business troubles. These developments prompted Wall Street to question the company's credibility and to remove the stock from buy recommendation lists, analysts said at the time.

Still, net return on sales was 7.4% and return on equity was 18.6%, ratios that allow the company to boast a bit.

The healthcare/beauty aids marketer continued to show a greater annual growth rate in sales of its healthcare products than in beauty products this year. But the latter's domestic business contributed high operating profits.

Sales of Revlon's healthcare group rose by 4%, or $978 million, to $1.11 billion in 1981, accounting for about 47% of total sales, compared with 45% in 1980. Operating profits in 1981 were $152.2 million, down by 11% from 1980's $171.3 million.

Beauty products now account for 53% of total sales, compared with 55% in 1980. In 1981, the beauty product category registered a $1.25 billion volume for the company, compared with $1.23 billion in 1980.

But operating profit for the beauty business dropped to $207.5 million in 1981, down 3.4% from the previous year's $214.9 million. Operating profit from outside the U.S., Canada and Puerto Rico was $21.8 million, down from $36.6 million in 1980.

The domestic division, however, contributed $820.7 million in sales, or 35% of total corporate sales, up 6.3% from 1980. Operating profit rose from $178.3 million in 1980 to $185.8 million in 1981, accounting for an estimated 52% of total operating profit.

A worldwide breakdown shows that 31% of net sales comes from cosmetics and fragrances, 22% from beauty care and treatment, 18% from ethical pharmaceuticals, 15% from diagnostic products, 6% from vision care and 8% from other health products and services.

In 1981, the U.S., Canada and Puerto Rico accounted for $1.52 billion of total sales; Europe, Middle East and Africa, $533.9 million and other areas of the world, $307.7 million. During 1981, Revlon spent $17 million revamping some of its overseas operations.

While the company opted to retain full ownership of its operations in larger countries, it became a distributor in secondary and tertiary countries including Austria, the Low Countries and Switzerland.

Although the company continued to be committed to research and development, boosting expenditures in this area from $69.4 million in 1980 to $91.3 million in 1981, new product introductions within cosmetics, fragrances and beauty care seemed limited to line extensions.

Where new product activity was not linked to line extensions, it was low key and not widely advertised and promoted. For example, Ivoire de Balmain, a new prestige fragrance, was introduced with only $123,200 spent in measured media advertising, low for even this segment of the fragrance business.

The company did increase spending behind Scoundrel, however, from $2.9 million to over $4 million, while Chaz remained about even at just over $2 million.

Charlie also saw a measured media boost from under $1 million to over $2 million.

Revlon remains the No. 1 marketer of color cosmetics in the U.S., but it is said to be under pressure from Estee Lauder in department stores and Noxell's Cover Girl and Maybelline in other outlets.

The company also continued its new strategy of promoting its Flex products as the Flex haircare system and added Flex extra body and Flex Net Unscented Soft Hold. The new positioning of the line was viewed as a strategy to boost the line's market share, which slipped from 6.8% to 6.3% in 1981, although Flex conditioner remains the No. 1 after-shampoo conditioner sold in the U.S. Measured media spending was increased for Flex from $4.3 million to more than $7 million.

Revlon also introduced the Foot Groomer as the first product in a new line called PediCare implements, and it prepared for the introduction of Glis'n haircolor shampoo in the U.S., a forerunner of Clairol's I Like My Grey, now in test.

Domestically, the company's professional products group introduced Sensor MP-200, the first microprocessor hair computer to offer, Revlon claims, permanent conditioning and perfect perming in a single unit.

Internationally, Revlon added Eterna 27 Daily supplement, for dry and aging skin, and Sensations Perfumed Body Spray, the first in a new line of personal care products. Sensations is thought to be another entry in the deo-cologne market, similar to Lever Bros.' Impulse and Bristol-Myers' new entry, now marketed only overseas.

From its healthcare group, Revlon reformulated its Co-Salt as NoSalt in 1981, while Tums antacid and Oxy acne treatments recorded record sales and boosted their respective market shares. Technicon introduced RA-1000 as the first of a new line of test-selective analyzers, and Meloy Laboratories was the first manufacturer to be awarded gamma interferon for clinical evaluation. In early 1982, Meloy became the first to deliver gamma interferon for use in clinical studies on human cancer patients.

During 1981, Meloy, in conjunction with other units of the Revlon Health Care Group, became the first domestic manufacturer to deliver human leukocytes for use in government sponsered clinical trials.

Continuous Curve received Food & Drug Administration approval for its extended-wear contact lenses for myopia and astigmatism, and in March received FDA approval for hyperopia as well. Barnes-Hind brought out Soft Care Sterile Disinfectant Solution and Soft Mate Comfort Drops, as it endeavored to offer a wider selection of soft lens solutions, a market segment it has been slower to pursue than the competition. In the meantime, the division was adversely affected by decline in demand from the market for hard contact lens solutions, pricing pressures and rising material costs.

Revlon and Thompson Medical Co. mutually agreed to discontinue acquisition talks, presumably because of Thompson's disappointing first quarter in 1981 and a slowdown in the sales growth of its diet control products, according to analysts.

However, later in 1981, chairman Michel Bergerac indicated that the company would refrain from any major acquisitions in areas that would complement existing businesses or further diversify the company. He said Revlon will concentrate instead on improving the positions of existing businesses.

R.J. Reynolds Industries

	1981	1980
Sales	$11,691,800,000	$10,354,100,000
Earnings	1,504,300,000	1,269,400,000
Advertising*	321,279,800	298,524,100

*AA estimate

R.J. Reynolds Industries, Winston-Salem, N.C., is the eighth largest national advertiser in the U.S., with ad expenditures of $321.3 million in 1981, a 7.6% increase over the $298.5 million recorded in 1980.

Worldwide sales of the tobacco, food, oil and shipping giant totaled $11.69 billion in 1981, an increase of 12.9% from $10.35 billion in 1980. Earnings from operations also shot up appreciably, jumping by 18.5%, from $1.27 billion in 1980 to $1.50 billion in 1981. Over the same period, net earnings rose by 14.5%, increasing to $767.8 million in 1981 from the $670.4 million in 1980.

For the first half of 1982, RJR's sales totaled $5.99 billion, a 4.3% increase from a year earlier. Consolidated earnings were $766 million, up 3% from the same period in 1981. Net income for the first half was $480 million, up 24% from 1980.

As high as these performance figures may be, they should be even larger in 1983 with RJR's recently proposed acquisition of Heublein Inc., the billion-dollar food and beverages giant. Their combined ad spending, for instance, should exceed $500 million, which would in all likelihood make RJR the third largest national advertiser, behind Procter & Gamble Co. and Sears, Roebuck & Co.

The $1.3 billion deal would give RJR foodservice, grocery products, wine and spirits operations to go along with its existing roster of units. It would also make the company an even more powerful influence in the consumer marketing world.

The company's influence, of course, is already considerable. Throughout 1981 and into 1982, RJR continued a concerted effort to strengthen the company's traditional power base—tobacco—and improve its capabilities in its other operations. Much of the strategy to achieve these goals has focused on heavy capital expenditures and reworked marketing efforts.

Tobacco, naturally, remains king at RJR, as it has since 1875, when Richard Joshua Reynolds left a partnership with his father in tobacco farming in Virginia and moved to Winston, N.C. There, he started a plug chewing tobacco company with $2,400 invested in a plot of ground, a factory and equipment.

Today, R.J. Reynolds Tobacco Co., which handles domestic tobacco production and marketing, is the industry's sales leader. In 1981, this subsidiary of RJR Industries recorded sales of $3.97 billion, an increase of 12.7% from $3.52 billion in 1980. Earnings from operations totaled $914.3 million, compared with $800.8 million in 1980, a rise of 14.2%.

In the international market, the R.J. Reynolds Tobacco International subsidiary recorded less sizable sales increases, while earnings from operations remained relatively stable. In 1981, the international operation had sales of $2.16 billion, an increase of 3.3% from $2.09 billion in 1980. Earnings from operations were $178.5 million, compared with $177.2 million, or less than a 1% increase.

Together, domestic and international tobacco operations accounted for 51% of total company sales in 1981, compared with 54% in 1980. As far as earnings from operations breakdowns are concerned, tobacco's share was 69% in 1981 and 73% in 1980. The declining shares point to the growing strength of RJR's other subsidiaries, although tobacco remains the key to the company's over-all health and vitality.

Among the subsidiaries attempting to gain a larger share of the corporate pie is RJR's food and beverage operation, a segment that is growing in prominence within the corporate family. Food and beverage sales—through Del Monte Corp., which RJR acquired in 1979—totaled $2.33 billion in 1981, an increase of 10.7% from $2.11 billion in 1980. In both years, sales from these operations accounted for about 20% of total corporate sales. Earnings from operations in 1981 totaled $100 million, an increase of 11% over the $90.1 million recorded in 1980.

Showing some improvement in 1981 was another of RJR's nontobacco businesses—transportation, through the Sea-Land Industries Investments subsidiary. Sales of the shipping company, which has gone through a good deal of reorganization and streamlining in recent years, totaled $1.62 billion, or 14.8% higher than $1.41 billion in 1980. Earnings from operations showed marked improvement, rising by 56.4%, from $65.8 million in 1980 to $102.9 million in 1981.

RJR's energy operations, through Aminoil USA, displayed even greater improvement. Sales of the international oil and gas exploration and drilling company totaled $1.37 billion in 1981 (about 12% of corporate sales), compared with $985 million in 1980, an increase of 39.1%. Earnings from operations also spurted upwards, reaching $246.8 million in 1981, compared with $182.9 million in 1980, an increase of 34.9%.

In 1981, RJR moved to seek out more business opportunities by forming R.J. Reynolds Industries Development Corp. This new unit brings together existing RJR operations—including RJR Archer, a packaging subsidiary, and Service Systems Corp., an institutional food service company—and adds the responsibility to seek "opportunities for growth by establishing a [RJR] presence in new or related consumer-oriented products and services."

Yet, despite the growth of these segments, tobacco remains the key to RJR's over-all vitality and health. As RJR chairman J. Paul Sticht told securities analysts at a meeting in November: "The tobacco business is alive and well, not only in the U.S., but around the world as well... R.J. Reynolds will continue to actively and aggressively participate both in the U.S. and the rest of the world."

What effort RJR has already put behind its tobacco operations seems to be paying off, at least for now. A few years back, industry observers were forecasting that Philip Morris USA would soon topple R.J. Reynolds Tobacco from the No. 1 spot. Indeed, from 1977 to 1979, Reynolds' market share—in a business in which a single share point is of tremendous significance—slipped by nearly half a percentage point while Philip Morris was charging fast.

But, although PM continues to make strides, Reynolds' over-all market share has shown some upward movement, ending at 33% in 1981, compared with PM's 32%. And the company has managed this uptick during a period characterized by many observers as the most competitive in recent memory.

Leading the way at Reynolds, as it has done year after year, was the Winston brand, which saw its market share move upward slightly to 13.3% from 13.2% in 1980. The nation's No. 2-selling brand—behind PM's Marlboro—was aided by the national rollout of another low-tar extension, Winston Ultra, which gained a 0.5% share during the year.

In advertising, executed under a "Men of America" theme, Winston was supported by $38.4 million in measured media spending, up slightly from $36.8 million in 1980. A total of $20.5 million went to magazines, $2.9 million to newspaper supplements and $15.4 million to outdoor. In 1980, the measured media breakdown was as follows: $23.7 million to magazines and $13.1 million to outdoor.

Salem, the nation's leading menthol (ahead of Brown & Williamson's Kool) and the No. 3 brand over-all, had a relatively stable year in 1981, with its market share remaining at the 8.7% level recorded in 1980.

Most of the styles under the Salem brand—regular, Salem Lights and Salem Ultra—continued to maintain about the same shares.

But the company is counting on the introduction in late 1981 of Salem Slim Lights to add to this year's over-all total. Salem Slim Lights are a thinner 100mm product positioned for

the female market, a demographic segment that continues to capture cigaret marketers' fancy.

In measured spending, Salem (advertised under a "High country" theme) was supported by a total of $29.7 million in support, down from $37 million in 1980. A total of $13.6 million went to magazines, $1.9 million to newspaper supplements and $11.4 million to outdoor (a small amount went to network and spot tv for a mail order promotion). This compared with a 1980 breakdown of $22.7 million to magazines, $4.6 million to newspaper supplements and $9.7 million to outdoor.

One area of excitement for Reynolds in 1981 was the growth of its long-standing Camel brand. In 1981, Camel captured a 2.5% share, up from 2% in 1980 and 1.1% as recently as 1977. Combined with Camel nonfilter's share of 2.3%, the brand had an over-all figure of 4.8%.

The spurt in sales made Camel the No. 5 brand in the nation, giving Reynolds three of the nation's top five brands.

Measured spending for Camel totaled $19.7 million in 1981, compared with $22.1 million in 1980. Of the total, $8.9 million went to magazines and $10.8 million to outdoor, compared with $14.0 million to magazines, $289,700 to newspaper supplements and $7.9 million to outdoor in 1980. About two-thirds of the spending support in 1981 went to fast-rising Camel Lights, which converted its pack design to one using the familiar Ol' Joe camel found on the traditional nonfilters.

Meanwhile, Reynolds' fourth leading brand, Vantage, saw its share slip to 3.7% in 1981 from 3.8% in 1980. This came after the brand experienced gains in the last several years.

To recover from this slippage, Reynolds this summer introduced Vantage Ultra Lights 85mm and 100mm, both 5mg tar smokes.

Measured spending for the brand, used to support a "Vantage pleasures" campaign, totaled $29.9 million in 1981, second highest among the company's brands. Of that total, $19.8 million went to magazines, $3.7 million to newspaper supplements and $6.4 million to outdoor. The spending levels were down from those of 1980, when Reynolds spent $32.5 million to support Vantage, with $23.0 million going to magazines, $7.1 million to newspaper supplements and $2.4 million to outdoor.

More heartening to Reynolds was the rise of the More brand, which saw its market share rise from 1.2% in 1980 to 1.5% in 1981, moving from No. 20 to No. 15 among brands in the process.

All of the gain for the 120mm brown-wrapped brand came with the introduction of More Lights, a 100mm beige-colored spinoff targeted to women. It is interesting to note that this line extension was in tune with what Gerald H. Long, president-chief operating officer of R.J. Reynolds Tobacco sees as the three trends cigaret marketers are following closely: Continued growth of low-tar cigarets, the success of 100mm styles and the growth of women as a percentage of the smoking population.

Measured media spending reflected the concerted effort Reynolds put on the brand, as $20.1 million went to support More in 1981, with $12.6 million going to magazines, $2.5 million to newspaper supplements and $5 million to outdoor. In 1980, the brand received $12.7 million in support, of which $8.3 million went to magazines, $2.7 million to newspaper supplements and $1.7 million to outdoor.

In contrast to More, Reynolds' ultralow tar brand, Now, saw its market share remain at the 0.7% level in 1981. The 1mg tar cigaret continued to jockey for position with its competitors, primarily American Tobacco's Carlton, in a category that has been the subject of close attention over the last few years.

To support Now, Reynolds spent $17 million in 1981, with $12.3 million going to magazines, $4.6 million to newspaper supplements and $55,000 to outdoor. This compares with 1980 spending of $26.1 million, of which $15.3 million went to magazines, $5 million to newspapers supplements and $1.7 million to outdoor.

Doral, the seventh brand in the Reynolds family, dropped significantly in market share, from 0.6% in 1980 to 0.3% in 1981. Reynolds dropped the regular Doral line in 1981, leaving intact only Doral II. There was no measured media support for the brand in 1981.

The fortunes of these various brands are, naturally, a function of the highly intense competition of the tobacco industry. But that competition has turned particularly perfervid in the battle over Brown & Williamson's successful and controversial Barclay cigarets, a battle in which Reynolds has played a trench-fighting role.

The dispute has centered on B&W's 1mg claim for the low-tar smoke, which was introduced in 1981 with record support. Reynolds filed a complaint last year with the Federal Trade Commission that the 1mg claim was not accurate.

The FTC ruled that conventional testing was not possible for Barclay's unique filter system. But, the FTC said, consultants had advised the commission that the cigaret's tar level is indeed higher—somewhere between 4mg and 7mg—than the advertised 1mg. B&W, in turn, continued to charge that Reynolds and other competitors used bait-and-switch tactics in advertising their ultralow tar brands—in Reynolds' case, Now. Observers note, however, that although such tactics may have been used earlier, Reynolds has for some time been promoting only its 2mg Now 100s and not the less than 1mg packs that were the supposed objects of the "switching."

In addition, B&W has won a temporary restraining order to halt FTC action against Barclay and is attempting to get the FTC to revise its method of reporting cigaret tar levels.

Beyond that battle, Reynolds continues to refine its over-all cigaret marketing strategy, and one area on which it has focused is its media mix. Measured media spending figures reflect the company's decision in 1981 to reallocate dollars from magazines, where it had been the top national advertiser, to outdoor. RJR Industries, which had been the top magazine spender in 1980, fell to second place, behind rival Philip Morris Inc. The company did, however, retain its No. 1 ranking as the top newspaper and outdoor spender.

In spite of all this activity in the cigaret end of its business, however, RJR management has devoted a considerable amount of its attention to its food and beverage operations and Del Monte Corp. The basic strategy here has been to transform production-oriented Del Monte, which has one of the strongest consumer brand identifications extant, into a consumer-oriented producer and marketer of high quality, value-added food products.

In the past, Del Monte products have had limited advertising, and most activity was concentrated in the trade. "But no more," Richard H. Ward, chairman-chief executive officer, told securities analysts in November. "As the first step in revitalizing our canned food business, we have set out to get to know the consumer as never before. Based on that knowledge, we are already well launched on a number of projects—adding new products and repositioning others."

To put its new efforts into motion, Del Monte has carved out RJR's food and beverage business into four operations—dry grocery and beverage products, international grocery products, fresh fruit and frozen foods.

The dry grocery group includes all of Del Monte's nonfrozen food products, as well as products marketed by the former RJR Foods unit before the merger with Del Monte—Hawaiian Punch, Chun King and some regional brands. In all, they contribute just under half towards Del Monte's sales.

Management reported that the group has rebounded from a "disastrous" 1980, when earnings plummeted from 1979 levels.

What may help in the years to come is the introduction of a Mexican line of prepared foods under the Del Monte brand, which was expected to be rolled out into the Los Angeles market in late August or early September.

The line, the company said, would be supported by the largest single-market advertising and promotional drive ever in the category. A successful roll-out of the 23-product line has already taken place in Denver, Phoenix, Oklahoma City, Dallas and the Pacific Northwest.

If indeed the heavy ad spending does come—one Del Monte official said the company is planning on $8 million to $10 million during a nine-month period—it would mark a significant increase in the Del Monte ad budget.

In 1981, for instance, Del Monte spent $5.1 million in measured media to support all Del Monte brand products, most of that going to Lite canned fruits. This compared with $7.2 million the company spent in 1980 to support the various lines.

On the other hand, such was not the case with products that came out of the RJR Foods stable. Spending for Hawaiian Punch more than doubled in 1981, going from $8.7 million in 1980 to $17.9 million. The bulk of the spending went toward the presweetened mix and the ready-to-serve drink.

For Chun King, Del Monte spent $7.0 million in 1981, compared with $2.9 million in 1980.

The second group in Del Monte's family, international grocery products, accounts for about a fifth of the subsidiary's total sales. Top executives said the unit has been affected by adverse worldwide economic conditions and foreign exchange losses.

The third group, fresh fruit, is one the company is banking on for future growth. Now accounting for just under a fifth of company sales, this segment is slated for expansion in the marketing of bananas and pineapples. "Our high hopes for future growth in this segment are based on the still largely untapped markets for fresh pineapple in the midwestern, southern and eastern U.S. and Europe," said Mr. Ward. The company is committing $35 million to develop a 6,000-acre pineapple plantation

The possibilities go on and on

The design possibilities of the *Downing Unlimited*™ exhibit are simply unlimited. Hidden framing and hinging create a single expanse of color without visual interruptions. Large-scale graphics, including photomurals, are displayed completely and cleanly. The *Downing Unlimited's*™ unique hinging system and reversible panels make an endless number of configurations possible, even curves and a variety of three-dimensional shapes. The exhibits you can create with a *Downing Unlimited*™ are, well, simply unlimited.

in Costa Rica to help achieve this expansion.

Del Monte's fourth group of food operations, frozen foods, provide what could be the most interesting developments in this end of RJR's family. With the purchase of Morton Frozen Foods in January, 1981, the company has a base from which to develop a major frozen foods business. Observers said RJR purchased Morton less for its product than for its production facilities and distribution network.

The company already has specialty lines, Patio Mexican and Chun King frozen meals, which could also add to this much-watched category. In addition, it is looking at using the expertise of its O'Brien, Spotorno, Mitchell (OSM) unit to develop frozen products, possibly in the high-end, single-dish category in which Stouffer's has risen to prominence. OSM is one of the leading suppliers—to airlines, among others—of institutional frozen entrees and side dishes.

While the company looks ahead to these developments, it has pulled back slightly from the move to bring retort pouches to the consumer market. Almost immediately after acquiring Continental Kitchens, purchased from ITT Continental, Del Monte stopped the test-marketing of single-serving entrees and deli specialties.

Company officials still profess hopes for bringing retort pouches to market, but production costs and some consumer resistance has tempered some of that optimism.

*Fiscal year ending June 30
**AA estimate

Richardson-Vicks, Wilton, Conn., the nation's 40th largest advertiser, increased its ad expenditures by an estimated 11% in 1981, to $149 million.

Worldwide sales climbed 17% to $1.09 billion, from $929.2 million in 1980. Net earnings decreased by 6% to $79.3 million from $84.2 million in 1980. The loss of income was attributed to the discontinued operations of then Richardson-Merrell, as the company divested itself of the Merrell Pharmaceuticals division in early 1981.

That downslide in earnings continued for the third quarter of fiscal 1982 (the company operates on fiscal years ending June 30.) Net income from continuing operations dropped 31% in the three months ended March 31, 1982, to $13.4 million from $19.3 million during the same period in 1981. Sales during the quarter also fell, from $267.3 million in third-quarter 1981 to this year's $241.5 million, a decrease of 10%. An unfavorable fourth quarter and lower earnings for the full fiscal year were expected by the company.

Several factors were blamed for the decrease in sales and earnings. Among them were the recession, the low incidence of colds and flu during the the winter months and unfavorable foreign exchange rates.

The company is setting its sights on three areas for future growth—continued market leadership in consumer care products, a strong push in the specialty nutritional products field and an entry into the do-it-yourself arena. These commitments were underscored in 1981 by the introduction of several new products in the consumer care divisions, the distribution of specialty nutritional items into unexplored channels and the creation of a home care products division.

Consumer product sales increased 16% in fiscal 1981 to a total of $954.4 million. That was led by the Vicks Health Care division, which posted a 30% sales gain. The division is led by NyQuil and Formula 44D, both of which were battling a mild cold and flu winter in 1981 and increased competition.

NyQuil's ad budget was increased by 20% in 1981, to $8.8 million from $7.3 million. The brand has a 14% to 16% market share and a 20% dollar share in the cough and cold remedy market, but most of the growth continues to be in the area of multi-symptom items.

To that end the company introduced Headway, designed as a remedy for colds, sinus ailments and allergies. The product's ad budget was $4.5 million in 1981, with the bulk spent on network tv. In addition, several cough medicines are being tested in various cities, including Cremacoat and Surround, billed as treatments for coughs and sore throats.

Both Formula 44D and Sinex nasal spray were moved to new agencies in 1981 and received increased spending. Young & Rubicam took over the Formula 44D account, and its $7 million budget increased to $8.8 million in 1981. Sinex was moved to Benton & Bowles, as its 1981 ad expenditures totaled $4.7 million, up from $3 mllion in 1980. Both products had been at BBDO.

Also in the healthcare division are the Plus line of nutritional products, which the company acquired in 1980. The company believes this area of its business represents a significant growth opportunity. Plus' established channel of distribution has consisted of health food stores, which account for 30% of all sales in the specialty nutritional product area. R-V thinks there is room for inroads in the health food store segment and in drugstores and supermarkets, which are developing in-store nutrition centers. The company's healthcare division is test marketing a new line of vitamins—called Lifestage—for these mass market outlets.

In the Vicks toiletry division, Oil of Olay products continued to be the leaders. As with the cold products, the brand has increased its ad budget as competitors try to nibble away at its 40% share of the skincare market. Oil of Olay lotion received the largest sum of the company's ad dollars, $37 million, a 38% increase over the $26.8 million spent in 1980. The newest entry in the field is Silkience, as its marketer, Gillette Co., tries to duplicate the success it has had with its Silkience shampoo and conditioner.

Clearasil's advertising expenditures decreased by 5%, from $3.3 million in 1980 to $3.2 million in 1981. Most of the brand's future growth is expected to come from foreign markets. The company did go to court over claims by Norcliff-Thayer's Oxy-10 and Oxy Wash. Comparative radio ads said the performance differences between Oxy and Clearasil were "amazing," "disconcerting" and "terrifying." The spots were pulled and the companies settled out of court.

Meanwhile, R-V began testing Biactrin facial cleanser, with ads by Y&R claiming it "treats while it cleanses for fewer pimples."

Elsewhere, Carrafiello-Diehl & Associates, New York, was named as the agency for the national rollout of Denquel sensitive teeth toothpaste. The company was able to iron out its difficulties with the Food & Drug Administration over one of Denquel's ingredients.

The home care products division, created in the first quarter of 1982, consists of Formby's wood care products, Cosa Mesa Lubricants and E.A. Thompson, which was acquired in July, 1981. Thompson markets waterproofing coatings. Sales in the newly created division exceeded $30 million by the first quarter of fiscal 1982, with Formby's registering a 54% sales increase over 1980. The brand was backed by $4.4 million in ad dollars in 1981, the majority of the

money spent on network tv.

The J.T. Baker Chemical Co. subsidiary introduced Bag-A-Bug spray and trap for gypsy moths in 1981, following Bag-A-Bug trap for Japanese beetles, released in 1980.

Richardson-Vicks joined other companies in releasing these products at a time when consumers are concerned about tree and shrub devastation by the moths. The Bag-A-Bug spray and trap received $1.4 million in ad dollars, mostly on spot tv and magazines.

Sales	$1,808,000,000	$1,738,800,000
Earnings	179,300,000	237,100,000
Advertising*	119,768,600	100,000,000

*AA estimate

Schering-Plough Corp., Kenilworth, N.J., the 48th largest advertiser, increased its national advertising to $119.8 million, up 19.7% over 1980.

Sales rose only 4% to $1.7 billion, far less than the 21% increase Schering-Plough saw last year. This percentage loss in sales stemmed primarily from the company's U.S. and international pharmaceuticals, whose profits slipped 30% from 1980.

For the first six months of 1982, sales continued to slip, reaching $969 million, down from $972.5 over the same pe-

Executive Recruitment in Advertising Public Relations & Marketing

In Syracuse, we're giving away thousands of free consumers.

It's true. Your ads reach so much extra spending power in Syracuse, it's like reaching thousands of extra consumers free.

For example, Syracuse spends over twice the average amount per person on scotch.* Sixteen percent more than average per person on food.** Our median income is $775 above average.** And the story goes on and on.

What's the best way to reach this profitable audience? Only The Syracuse Newspapers can promise you the kind of coverage you need. The Syracuse TV audience is fragmented by one of the highest cable penetrations of any major market. And we have two new studies that prove it. Just call Dave Kaczorowski at 315-470-2085 for more information about opportunities in the Syracuse Market.

Represented nationally by Newhouse Newspapers

riod in 1981. Earnings fell by 7.9% over the same period, to $109.7 million.

Despite these figures, Schering-Plough's suncare, cosmetics and footwear divisions remained strong, with the company's consumer products divisions accounting for $588.2 million in volume in 1981, up 18% from 1980. U.S. home products was the only consumer division to see a decrease in sales, stemming primarily from the poor showing of the Arno adhesive tape business and the depressed building industry.

According to company sources, Schering-Plough sold the Arno business to Mystik Corp. in early 1982 because its marketing strategies were too diverse from the bulk of Schering-Plough's mass-advertised products.

Among cosmetic products in 1981, sales of the company's Maybelline lines increased by 14.5% to $163.8 million, outpacing the market growth rate of 8% from 1980 to 1981. Maybelline introduced two new products and has a third scheduled for late 1982.

In one successful introduction, the company brought Dial-A-Lash, a new concept in mascara, to the market in late 1981; with that product, Maybelline's mascara unit share reached 40.8%.

The company also introduced Colors That Cling eye writer pencils, whose ads were investigated by the National Advertising Division of the Council of Better Business Bureaus for use of the word "creaseproof" in copy describing the product. Maybelline won the case and continued with the campaign, which contributed to the subsidiary's 29.8% eye makeup unit share.

In its upcoming introduction, Maybelline plans to enter another cosmetics segment with Daydreams fragrance. A $3.5 million media campaign is scheduled to support the product beginning Oct. 15 with the theme "[the] fragrance for memories that linger." Marschalk Co., New York, is handling the account.

In all, Maybelline holds the No. 1 unit sales position of the cosmetics market. It has a 19% unit share for lip colors, 10.9% for foundations and 9.6% for nailcare.

But its move into the skincare market with Moisture Whip has not fared as well as the division as a whole. Despite a major advertising push in 1980 and 1981, the line has received only lukewarm response.

Moisture Whip totaled only $5 million to $6 million in manufacturer's volume, according to industry sources, and still is well behind market leader Richardson-Vicks' Oil of Olay. Company sources admit the line has not performed up to expectations but claim a healthy sales upswing for the product since the first of the year.

In the company's suncare division, Coppertone continues to hold its No. 1 position in the market, which grew by about 13% in 1981 to $225 million, industry sources say. The company claims a 50% share of the market. The suncare division spent $7.6 million on measured advertising in 1981, up 11% from last year.

Schering-Plough introduced three new suncare products in 1981, one in each one of its three primary lines. Coppertone added Coppertone Lite, a nongreasy formula that moisturizes as well as protects, and Tropical Blend introduced a pina colada fragrance. For Faces Only added a face and lip sun protection compact to its sunscreen segment, which holds a 16% share of the market. For Faces Only showed zero growth in 1981, according to ADVERTISING AGE sources, although a company official maintained that the line has shown good gains.

Schering-Plough's other big push, which came in its proprietary drug and toiletry division, was for new forms of two of its established products. Correctol laxative is being marketed in a liquid form, and Di-Gel tablets were reformulated to be sold in a more convenient, blister-pack form. Schering-Plough spent more on advertising for Correctol than any other single product in any of its consumer divisions, nearly doubling its 1980 spending of $2.7 million to $5.1 million in 1981.

The Scholl division increased its shoe line with the national distribution this summer of Sashay sandals. Also, the company showed share increases in its traditional Exercise Sandal.

In April, 1982, Scholl sold its leather shoe business to Miller Shoe Co., Cincinnati, which included 54 retail outlets. Schering-Plough said the sale was made because leather shoes did not fit into "long-term growth objectives."

The footcare division showed an 11% increase in sales to $128.4 million and spent $6.9 million on advertising for its footcare and footwear, up 48% from last year.

New over-the-counter products for Schering-Plough include Sensacort, a nationally distributed hydrocortisone cream supported by $785,600 in advertising, and Chlor-Trimeton D "Repetabs." In the ethical drug category, new entries include Proventil, an inhalant bronchodilator, and Dermolate, a treatment for scalp and anal itching supported by $1.2 million in advertising.

Wesley-Jessen, the vision care division acquired in September, 1980, by Schering-Plough, increased its sales threefold, to $9.3 million from $2.3 million in 1980. The company introduced four new types of contact lenses, including soft bifocal lenses, but the bifocal sales have been suspended because of a dispute with the Food & Drug Administration as to the effectiveness of the product.

Wesley-Jessen is awaiting a final determination on the matter by a federal court.

Elsewhere, Schering-Plough began construction on a pharmaceutical manufacturing facility at its headquarters in Kenilworth, N.J., completed a steroid and antibiotic plant in Manati, Puerto Rico, a research laboratory in Elkhorn, Neb., a coated-tablet facility in Memphis, Tenn., and a distribution center in North Little Rock, Ark., and completed the acquisition of Dnax Ltd., a biotechnology research company.

Jos. Schlitz Brewing Co., Milwaukee, the 85th largest national advertiser, cut ad spending by 15% to $56.8 million in the brewer's last full year as an independent company. Schlitz was acquired in June by privately held Stroh Brewery Co., which made it a wholly owned subsidiary.

Schlitz spent $56.8 million in 1981, compared with $66.4 million for the previous year, and saw a decline in sales, net earnings and barrelage. Sales for Schlitz in 1981 were $881.7 million, compared with the previous

year's $896.7 million. The No. 3 brewer lost $20.6 million in net earnings, compared with a gain of $27 million the previous year. Part of the 1981 loss was attributed to a $45.1 million one-time loss resulting from the closure of the aged Milwaukee brewery.

And in barrelage, Schlitz sold 14.3 million bbls. in 1981, down from 14.9 million bbls. in 1980.

Management was quick to point out that last year's 4% barrelage decrease was a healthy sign that the brewer had dramatically slowed its steady decline. By contrast, the 4% dip was far below 1980's 11% drop from the previous year and 1979's 14.2% plunge, the company said.

The Stroh-Schlitz linkup creates a larger No. 3 brewer and a market share of 13%—with the smaller, Detroit-based Stroh providing a 5% share coupled with Schlitz' 8%.

But the Stroh-Schlitz acquisition move saw its share of bloodletting. Officials from both companies had privately discussed a series of merger options this year.

When amicable discussions broke off, Stroh stunned the Schlitz hierarchy by unleashing a surprise offer to shareholders of $16 per share.

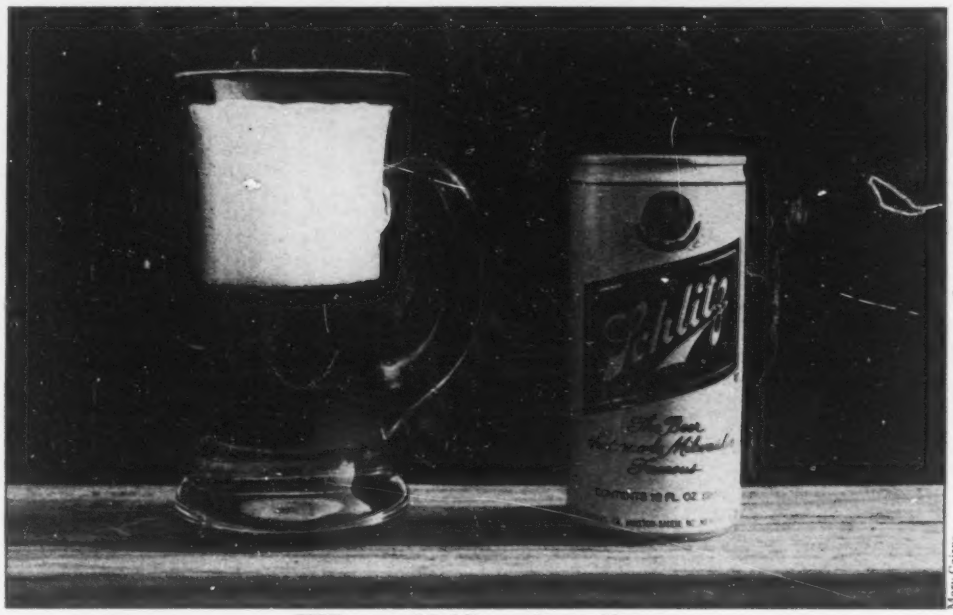
Schlitz management viewed the takeover as unfriendly and filed suit to stop it. But Stroh persevered and achieved the necessary 67% control needed to garner acquisition backing from a consortium of New York and California banks. As the bulk of stock seeped into Stroh's possession and the government ruled it would not fight the merger, the Schlitz brass dropped the suit and succumbed to the inevitable. In a peacekeeping move, the Stroh board sweetened its bid to $17 a share.

In approving the deal, the Justice Department ruled Stroh would have to sell either Schlitz' Memphis, Tenn., or Winston-Salem, N.C., breweries. That ruling is meant to decrease market share concentration in the southeastern areas where both companies' brands do well. But neither Anheuser-Busch or Miller Brewing Co., which together have more than 50% of the national market, can purchase the brewery.

Bearing the brunt of the Stroh-Schlitz merger is La Crosse, Wis.-based G. Heileman Brewing Co., which was thwarted last year from merging with Schlitz, when the Justice Department ruled it would oppose the action because of antitrust considerations. At that time, the government said a Heileman-Schlitz coupling, which had been sanctioned by both boards, would produce anticompetitive market shares in the northern Midwest.

Heileman, which greatly needs to expand its presence in the Sunbelt, was also stopped this year from acquiring Pabst Brewing Co. and is seeking other acquisition alternatives.

Stroh's takeover of Schlitz has wrought a series of high-level staff changes. Longtime chairman Daniel McKeithan has been replaced on the Schlitz board by Stroh chairman Peter Stroh. Roger Fridholm, newly-selected president of Stroh, was named to the same office at Schlitz. Mr. Fridholm is also the president of brewer F.& M. Schaefer, Stroh's East Coast subsidiary.



Mary Cairns

JWT—out of Schlitz and out of beer.

The most visible change is the departure of chief executive Frank Seilinger, the spokesman for the flagship Schlitz brand. Mr. Sellinger retired from the company July 31 but retains consultant status. Mr. Sellinger, who operated as Schlitz chief executive officer, vice-chairman and president, had his responsibilities pared down to only vice-chairman in June. Anthony Amendola, executive vp-marketing, also left the company after participating in a series of unfruitful talks with Stroh management. Neither side could agree on Mr. Amendola's range of responsibilities with the new Schlitz subsidiary, prompting the marketing veteran's departure.

Other key marketing department personnel—including the brand directors of Schlitz/Schlitz Light and Erlanger—have left the company. Also, an estimated 400 to 500 workers are to lose their jobs as Stroh moves headquarter operations to Detroit.

Even before the merger, Schlitz had undergone a senior-level management shakeup. In November, 1981, Mr. Amendola joined Schlitz as executive vp-marketing and Arthur Tonna was promoted to executive vp-corporate operations. Also in this shuffling, Jerome Vielehr resigned as president, and Mr. Sellinger took on the duties of that office. Earlier that month, Robert Rechholtz resigned as vp-marketing to take a similar post with the Adolph Coors Co.

Mr. Sellinger's departure marks an end to the three-year Schlitz ad campaign that featured the master brewer as the focal point of the theme, "Behind every Schlitz is a man who knows his beer." That push replaced the "Taste my Schlitz" campaign, which played up the company's attention-generating "Taste-tests."

JWT had planned a new Schlitz campaign to debut in August that would resurrect the highly successful "Gusto" theme of years past. The new push had the theme, "Gusto is here," but the Stroh brass spiked the effort. JWT and Schlitz parted company in August after that campaign was killed.

JWT executives stated they would not take part in an across-the-board agency review conducted by parent Stroh management. As a result JWT dropped the estimated $20 million Schlitz, Schlitz Light and Erlanger business.

Also taking part in the review are incumbent Schlitz agencies BBDO, Benton & Bowles and MCA Advertising. BBDO handles Old Milwaukee and Old Milwaukee Light, Benton & Bowles handles Schlitz Malt Liquor and MCA handles Schaefer beer. Also up for review is Marschalk, which handles Stroh's and Stroh Light. At presstime, no final decision has been made.

Stroh intends to market its Stroh premium brand as the national flagship beer. The combination of a growing Stroh and a steadier Schlitz gives the brewer a one-two premium beer punch.

Although the Schlitz brand had its strongest ad presence in years, its share of market still continued to erode. An estimated 6.4 million bbls. of Schlitz were sold in 1981, compared with 7.5 million bbls. the previous year.

In addition, Schlitz became more dependent on popular-price Old Milwaukee and its cousin, Old Milwaukee Light. In 1981 Old Milwaukee held firm with an estimated 5.1 million bbls. and remained the leader of the popular beer segment. Old Milwaukee Light, which was introduced nationally in 1980, tallied sales of 300,000 bbls. in 1981. Wholesalers in key areas were bolstered by the sales of

both brews and claimed it served to cushion the decline in Schlitz brand sales.

Ad spending for Schlitz beer dropped by 12%, from $19.6 million in 1980 to $17.3 million in 1981. Spending for Old Milwaukee only dipped 3%, from $5.5 million in 1980 to 1981's $5.3 million. Old Milwaukee Light saw a jump of 81%, going from $1.4 million in 1980, when it was nationally introduced, to $2.6 million in 1981.

Advertising for both Old Milwaukee brands capitalizes on the long-running "It dosen't get any better than this." Old Milwaukee Light uses the theme; "Old Milwaukee got the taste of light right."The spots continue to target young, male drinkers—considered to be the prime market for popular-price beers. BBDO, New York, handles.

Schlitz Light remained dormant throughout 1981, with only minuscule amount of ad spending, as the company continued to shuttle ad dollars toward revitalizing the flagship Schlitz. Schlitz Light sold 200,000 bbls. in 1981, compared with 400,000 bbls. the year before.

But one of the last efforts of an independent Schlitz Brewing was to reformulate the premium light beer and bolster it with a new tv campaign having the theme, "Schlitz Light stays light all night long." The beer is being targeted to upscale drinkers.

Superpremium Erlanger also slumbered last year and, as a result, dropped from 1980's 300,000 bbls. to 200,000 bbls. Ad spending dropped from $12.1 million in 1980 to only $3.3 million last year. Wholesalers continue to be dismayed over Erlanger's death rattles because the beer started with considerable promise when introduced in 1979. Now adding to that fear is concern that Stroh will scrap Erlanger in favor of its own new superpremium, Signature.

Schlitz Malt Liquor continues to lead the malt liquor segment and has remained steady at 2 million bbls. for each of the past two years. Ad spending remained the same at $4.6 million.

A Schiltz subsidiary, Geyser Peak Winery, is the nation's fourth-largest producer of premium wines. But the winery does not fit into parent Stroh's plans and has been put up for sale with an asking price of $30 million.

*Fiscal year ends July 31
**AA estimate

Joseph E. Seagram & Sons, New York, a subsidiary of the Seagram Co. Ltd., Montreal, and the 41st largest national advertiser, invested $145 million on advertising in 1981, a decrease of about 5% from 1980.

Worldwide sales for Seagram Co. Ltd. reached a record-breaking $2.77 billion in fiscal 1981, which ended July 31, 1981, climbing 9.4% over fiscal 1980. Net income before unusual credits and currency translation was $1.56 billion and includes the gain on the sale of the company's U.S. gas and oil holdings in 1981, the 1981 reversal of deferred income taxes related to United Kingdom stock appreciation relief and the 1980 gain on the sale of its office building in New York.

Operating income for Seagram Co. Ltd. rose 14.1% to $273.6 million. The company's 20% share of the newly merged Du Pont-Conoco corporation is valued at more than three times the earnings previously produced by Texas Pacific's U.S. oil properties, which Seagram sold in 1980 for $2.3 billion.

In 1981, the liquor industry's growth rate continued to fizzle, from 6% in recent years to almost zero in 1982. As a result, Seagram is turning to exports and shifting emphasis to wines and lighter drinks.

The company has become the country's second-largest wine advertiser, spending $20.9 million in 1980, despite a 10.1% cutback in advertising expenditures.

Even though whisky market sales have dipped, Seagram's 7 Crown has held its No. 3 position on *Business Week's* annual ranking of the nation's leading liquor brands, where it fell from No. 1 in 1979. Case sales for 7 Crown dropped to 5.7 million from 5.8 million in 1980, a 2.2% decrease. To increase sales, the company began a $1 refund offer on the 1.75 liter size bottle. Measured media ad spending in 1981 totaled $7.8 million.

Although Canadian whisky sales swelled by 2.5% in 1981, Seagram was not riding that wave. Case sales of Seagram V.O. dipped 3.6%, from 3.8 million in 1980 to 3.7 million in 1981. Despite measured spending of $13.2 million V.O. has stagnated at No. 4 on the *BW* survey.

The company attempted to raise that figure with an ad proclaiming, "There are over 3,000 imported whiskies in America. Only one can be a best seller. That's V.O. There's a reason why. Taste!" These advertisements, after a challenge before the National Advertising Division of the Council of Better Business Bureaus, were modified to read, "Taste! You be the judge. Discover why more V.O. is bought than any other imported distilled spirit in America. . ." The company is also inviting the consumer to taste V.O. with the enticement of a $1 mail-in coupon offer in 1982.

Kessler blended whisky has moved up two places on the BW list to No. 25, after it dropped from No. 22 the previous year. Nevertheless, case sales declined by 3.2%, from 1.5 million in 1980 to 1.45 million in 1981.

The trend toward lighter drinks and white liquor has helped Seagram gin, however. Sales over the past decade have grown 137%. With case sales of 2.7 million—a rise of 8% over 1980—Seagram gin rose one place on the *BW* ranking to No. 10, following a drop from No. 8 in 1979. Measured media spending for the brand totaled $3.3 million in 1981.

Wolfschmidt vodka shares the No. 31 spot with two other Seagram brands, Lord Calvert Canadian and Chivas Regal. Wolfschmidt's sales have shot up 6% to over the 1 million case mark—1.03 million—in 1981, while Lord Calvert declined 2.3% from sales of 1.05 million in 1980 to 1.03 million in 1981. Chivas Regal has risen one position on the rating from No. 32, despite a 2.3% drop in case sales.

One Seagram brand that did well over 1981 was Crown Royal, a premium Canadian whisky. Case sales of Crown Royal increased to 900,000 from 775,000 in 1980, a 15% increase and landing it at the 35th position in *BW's* list of top brands. It also received considerable measured media support in 1981—a total of $8.7 million.

Beyond its traditional brands, Seagram is introducing a new product in 1982 to buoy sagging spirit sales. Perhaps taking its lead from Gilbey's Baileys Irish Cream, which has enjoyed an amazing 150% rise in only one year of availability, Seagram is marketing Leroux Irish Cream, a 34-proof Irish import. Seagram's General Wine and Spirits Co. unit is advertising the liqueur as "so rich it's almost sinful."

Von Konig Silbervasser, a product backed by $1 million in ad support in 1980, was pulled from the market this year. The company's plans for this clear, light spirit to replace vodka and rum turned flat in three test markets. A Seagram representative noted that Von Konig Silbervasser's "profit potential was not high enough to warrant further interest on our part."

To counter the effect of plummeting grain alcohol sales, Seagram is looking toward international markets. Seagram's North American sales growth currently lags behind the international sales, which accounts for 34% of Seagram's revenues. The company, in fact, is said to be expecting that half its sales will derive from international operations by 1990.

The appointment of Edward F. McDonnell to president of Seagram International, a new post, reflects this emphasis on foreign markets. Formerly vp of the international group of Pillsbury Co., Mr. McDonnell will supervise market activities outside North America.

Seagram operates in 25 different markets outside North America. Its worldwide advertising and promotion budget escalated to $242 million in 1981. In one venture, the company's joint agreement in Japan with Kirin Brewery is paying off, as Robert Brown whisky approaches 1 million in case sales. Elsewhere, Seagram's Natu Nobilis whisky, marketed in Brazil, has shot up 40% over 1980.

These successes have led Seagram to expand in other foreign markets. The company purchased a 15% interest in the Bianchi Winery in Argentina and acquired Caves de Raposeira in Portugal, a producer of white and rose wines. It has entered into a joint venture in Korea with the Oriental Brewery Co. Ltd., and is beginning another joint venture in Thailand. The company also allied itself with Wilson Distillers in New Zealand in early 1982.

While it looks to expand the markets for its liquor brands, Seagram has been building up its wine resources to become the nation's sixth-largest winery, with a volume growth of 17.4% in 1981, to 17.5 million gals. The continuing surge in wine sales has led the company to consolidate its wine divisions. A new unit, Seagram Wine Cos., has been formed to unite the separate divisions of Browne Vinters, Gold Seal Vineyards and Paul Masson Vineyards. The unit is designed to direct all U.S. wine operations, excluding the Chateau and Estate and Fromm and Sichel companies.

The Seagram Wine Cos. report as a separate unit to William M. Wilbur, president of Joseph E. Seagram USA, the new business arm of Seagram that supersedes the House of Seagram as the company's North American marketing arm.

Stephen E. Herbits, formerly president of Browne Vintners, was appointed president of the Seagram Wine Cos., with overall responsibility for U.S. wine sales, marketing and production. However, Mr. Herbits resigned last month. His successor is Michael Cliff, former president of Gold Seal Vineyards, who had been executive vp-operations and development of the unit.

The popularity of wine has made Seagram's proprietary brands a profitable basket of cheer for the company. Partager, a French wine introduced as a competitor to American jug wine, was priced so low that the initial supply sold too quickly, and its availability was cut back.

Partager is the first French wine among the top 10 brands in the U.S., despite the fact that U.S. wine imports dipped 12.5% in 1980.

Testing has also begun for Nectarose, a French proprietary rose, which, along with Partager and Barton and Guestier, the company believes will put French wines back on the table.

The company is also counting on growth of Black Tower, a German import selling approximately 25,000 cases in 1981. To help reach a goal of 1 million case sales within five years, a coupon offer for a $1.50 refund

on 750ml or one liter units is being offered this year.

As it tries to market these imports in the U.S., Seagram is introducing California wines overseas, recognizing that French and German wine sales are souring in Europe. It is also aiming for the United Kingdom market.

The company has marketed Paul Masson wines in the United Kingdom for three years with little promotional support. In 1981, however, Seagram is implementing a big advertising drive in the London area handled by Abbott Mead Vickers.

Domestically, Paul Masson's total volume grew 17.4% to reach 17.5 million gals., despite a 2.9% cutback in advertising to $12 million. The success of the Paul Masson line led the company to introduce a new product, Masson Light, in 1981. The brand has 33% fewer calories than regular wines, making it the lowest calorie wine on the market in 1981. Masson Light recieved the company's heftiest ad drive to date.

This year Seagram is introducing Catawba Dry and Light, with one-third fewer calories and only 9.5% alcohol, compared with 13% for traditional Catawba. The product is available in 750ml and 1.5 liter sizes.

The jump in wine sales has encouraged the company to invest in new products in the rum market, hoping sales figures for rum will parrot the growth in the wine market.

Two new products are being added to the Myers's rum line, which showed a 20% increase in 1981. Augmenting Myers's Original Dark will be Myers's Platinum White and Myers's Golden Rich, both white spirits. Seagram's Calvert Distillers is also testing a new product, Captain Morgan Spiced rum to boost sales.

Ronrico rum, which declined 4.2% in sales in 1981, was targeted for the young adult market in a promotional campaign. The company signed with Rockabill Inc., a music company, to have Ronrico sponsor the Marshall Tucker rock band in a series of summer concerts. The promotion included radio contests for tickets and magazine ads featuring the band.

In other Seagram ventures, Westmount Enterprises was formed early this year as a product development and venture capital division. The unit, headed by president David J. Blum, is focusing on the specialty food and nonalcoholic beverage categories.

Seagram's 1980 sale of its subsidiary, Texas Pacific Oil Co., to Sun Oil for $2.3 billion left the company ripe for acquisition. Wall Street speculation was bubbling over the target when, in December of that year Seagram signed a $3 billion revolving credit agreement with 31 U.S., Canadian and European banks.

In March Seagram made its move: A $2.03 billion tender offer for St. Joe Minerals, the leading producer of lead in the U.S. with holdings in coal and zinc. The takeover was scotched, however, when in April Fluor Corp., with a $2.6 billion offer, went away toasting a merger.

Two months later Seagram seized upon another target: Conoco, the country's ninth-largest oil company and second-largest coal producer. Seagram bid $3.7 billion for Conoco, precipitating a long bidding battle between Mobil, Du Pont and Seagram.

By August, Du Pont emerged the victor, winning Conoco for $7.8 billion—$3.8 billion in cash and the remainder in stock. The deal is the largest in corporate history, making Du Pont-Conoco the seventh-largest industrial corporation in the U.S.

Seagram was not iced out, however: The company traded in 27.9 million shares of Conoco it acquired through its tender offer for 47.6 million shares of Du Pont. Seagram now owns a 20% interest in the combined Du Pont-Conoco, making Seagram the single largest shareholder.

Sears, Roebuck & Co., Chicago, the nation's second largest advertiser, increased ad spending 16.3% in 1981 to $544.1 million, as the nation's No. 1 retailer directed attention toward strengthening its merchandising base and expanding into the financial services industry.

Operating revenue for the retail giant increased 8.6%, jumping to $27.36 billion from $25.16 billion the previous year. Net income was $650 million compared to 1980's $610 million, an increase of 6.6%.

Sears gained back some of the retailing momentum it had lost in recent years, as revenues from the merchandising operation increased by 8% in 1981 to a record $18.2 billion. Merchandising sales represent 64% of the company's revenue total. The group's sales had been flat for the past two years.

Ad spending for the merchandise group increased 17.2% to $633 million in 1981 from the previous year's $540 million. The company attributed the increase mainly to rising newspaper and broadcast rates. Catalog costs of approximately $30 million brought the merchandise group's total to $663 million.

Not included in the company's total ad spending is $343.4 million spent in newspaper advertising, up from the previous year's $330.1 million. These figures reflect local rather than national advertising.

Sears is pumping renewed life into the merchandise group in part by giving older stores a new, more vibrant look. Aged departments are being freshened with a new look, complete with contemporary fixtures, and revamped departments are carrying more brand names.

For the first time, Levi's shops are becoming part of the scenery, and other brand names are expected to follow. In addition, clothing apparel will be housed in smaller boutiques, and sporting goods will be showcased in separate "athletic" departments.

Continuing to roll is the Cheryl Tiegs line of women's sportswear, which has tallied an estimated $200 million in sales since its introduction 15 months ago. Sears is reportedly seeking a male sports counterpart to represent men's fashion but has been hard pressed to find a marketable personality.

Sears is also planning to cut back on unprofitable lines, but is still going strong with its Craftsman tools and auto-battery business, where it controls 70% and 40%, respectively, of those markets.

A major ad agency change took place within the apparel group. Sears opted to consolidate its three separate lines under one agency, thereby breaking up a triumvirate that included Chicago's Foote, Cone & Belding, women's apparel; Stern Walter/Earle Ludgin, children's clothing, and McCann-Erickson, men's apparel. The estimated $35 million account ultimately went to Needham, Harper & Steers. In addition, J. Walter Thompson USA was named to handle all the supplemental tv and radio buys.

Robert Wood II, vp-advertising and sales for the apparel division, said the agency consolidation was a response to an emerging consumer trend that has spawned a "blurring of the lines" between the three clothing units. More customers were buying goods from all three categories, and Sears thought it was best that one agency handle that type of marketing chore, he said.

Sears' most spectacular efforts centered on its effort to become a significant force in the financial services arena. In late 1981, Sears proposed friendly takeovers—ultimately successful—of Dean Witter Reynolds Organization, the nation's fifth-ranked brokerage house, and Coldwell Banker & Co., the country's largest real estate broker. Sears paid $607 million for Dean Witter and $179 million for Coldwell Banker & Co.

The company also forged ahead in the business machine segment by opening 45 free-standing business systems stores selling computers, copiers and other electronic products.

The addition of Coldwell Banker and Dean Witter sparked a corporate restructuring within Sears. The new entities are the Coldwell Banker Real Estate Group, previously known as the Seraco Group; Dean Witter Financial Services Group, previously known as the Financial Services Group, and the Allstate Insurance Group, previously known as the Allstate Group.

The Allstate Insurance Group continues to generate cash. Revenues jumped by 10% to $6.8 billion in 1981 from the 1980's $6.2 billion. But ad spending decreased 26%, dropping from $24.6 million in 1980 to last year's $18.1 million. During 1981, the Allstate Group generated $1 billion in new funds to the parent company, compared with $933 million in 1980.

Sears made some major executive changes. Archie R. Boe, former chairman and ceo of the Allstate Group, was elected president of the corporation. Edward Telling, chairman and ceo of Sears, also held the office of president before Mr. Boe was elected. Donald Craib succeeded Mr. Boe as Allstate's chief. Also, J. Pat Galloway was named executive vp-East of the merchandise group, succeeding William Bass, who was named senior exec vp-field.

SmithKline Corp.

	1981	1980
Sales	$1,965,341,000	$1,771,938,000
Earnings	370,000,000	307,994,000
Advertising*	89,265,000	81,438,800

*AA estimate

SmithKline Corp., a Philadelphia-based healthcare company, is the 60th largest national advertiser in the U.S. Last year, the company spent an estimated $89.3 million on advertising, a 10% increase from 1980.

During 1981, SmithKline's sales reached $1.99 billion, up 12% from $1.77 billion in 1980. Of that amount, U.S. sales totaled $1.16 billion, a 21% increase over 1980.

International sales, which made up about 42% of total sales, reached $823 million, representing only a 1% increase over 1980. Net income was up 20%, from $308 million in 1980 to $370 million in 1981.

Among SmithKline's holdings, it is the ethical pharmaceutical group that has been on a fast track for the past five or so years. Last year, sales in this area went from $1.07 billion in 1980 to $1.22 billion, a 14% increase. The 1981 figure surpasses the total of all other operations combined, including consumer drug products, animal health products, eye and skin-care products and clinical laboratories. Combined sales for these other properties came to $764.6 million last year.

Highlights of 1981, according to president Henry Wendt (and, as of early this year, chief executive officer as well), included gaining approval to market the much heralded Tagamet in Japan, the successful completion of the clinical studies for the company's new antiarthritic compound Ridaura, intensified efforts in the anti-infectives category and the groundbreaking for a $20 million molecular biology center outside Philadelphia, scheduled to be completed in 1983.

Also, in March, SmithKline took some of those Tagamet profits and acquired Beckman Instruments to form the SmithKline Beckman Corp. Beckman Instruments, involved with bioengineering and *in vitro* diagnostic products, had current assets of $460 million as of December, 1981, and for the past five years has had an annual growth rate in total assets of 27%.

As for the lucrative area of ethical drugs, SmithKline's U.S. sales last year reached $648 million, up 26% from 1980 figures of $513 million. International

SmithKline's flagship brand fights the symptoms of slipping sales.

sales, up 4%, to $573 million from $552 million in 1980, were hurt by the increasing strength of the dollar in foreign currency translations, the company said.

The leaders within the ethical pharmaceutical group are the gastrointestinal products. Sales grew 20% last year, reaching $776 million.

The product that is responsible for some 90% of this amount is the anti-ulcer drug Tagamet, the brand name for cimetidine. In lay terms, Tagamet soothes those who suffer from ulcers by blocking the stomach acids that help create them.

Research for the product, begun around the middle 1960s, centered on histamine, a body chemical tending to be a sidekick to tissue irritation. Dr. James W. Black, an English physician, realized that antihistimines then on the market could alleviate symptoms of allergies and hay fever, but they could not prevent histamine from producing stomach acid that helped create ulcers. His theory was that the body had two, not one, receptors through which histamine worked. His research concentrated on finding the second receptor, the H2 receptor, through which stomach acid is produced, and developing an antihistamine to block it. Tagamet proved to be that drug.

Introduced into the U.S. in 1977, Tagamet is now used in more than 125 countries by some 20 million ulcer sufferers. Sales grew 84% during that introductory year. In 1980, it became the No. 1-selling drug in dollars in the U.S., bypassing Hoffman-La Roche's Valium. Last year, it held that lead in dollar sales and worldwide sales, and had currencies been more stable, would have been up 31%. Nevertheless, it is considered the largest-selling prescription drug in the world.

In January, 1982, Tagamet was introduced into Japan through SmithKline & Fujisawa KK, a joint venture company created through SmithKline and Fujisawa Pharmaceutical Co. Its use to treat gastric ulcers, as well as duodenal ulcers, has been approved in the country.

According to John Groom, vp of SmithKline and president of international pharmaceutical products, there is a higher incidence of gastric ulcer in Japan than in the U.S. Another factor that indicates future healthy sales of the drug in Japan, according to Robert Benezra, vp in charge of pharmaceutical research at Alex Brown & Sons, Baltimore, is that Japanease doctors fill prescriptions as well as prescribe them and depend on this for their yearly income. The market, says Mr. Benezra, is second to the U.S. in terms of pharmaceuticals, even with one-half the population of the U.S. Sales in Japan in 1982 are expected to exceed $60 million. "We believe," Mr. Benezra said, that with "Japan playing its part, that Tagamet will bring some $890 million in sales this year."

There is, however, one small cloud on Tagamet's horizon—competition from a product called Zantac, produced by Glaxo pharmaceutical company, one of the largest in Great Britain. Like Tagamet, Zantac is an H2 receptor antagonist, and it is Tagamet's only competition overseas. (Glaxo is awaitingFDA approval in the U.S.)

Beyond Tagamet, another major ethical drug SmithKline markets is Dyazide, a cardiovascular product that is No. 1 in its category. Sales in this group were up 20% for SmithKline, from $162 million in 1980 to $194 million last year. U.S sales were up 23% and for the fifth year in a row, Dyazide itself—a potassium-sparing oral diuretic—has held its lead in the U.S.

The antibiotics area grew 8%, although it was Ancef, an injectable cephalosporin, that did particularly well, coming up with a 36% sales increase in the U.S. Ancef (cefazolin), was introduced by SK&F in 1973 and is now, according to the company, the most widely used injectable cephalosporin in U.S. hospitals because of its relatively low cost and its effectiveness.

Two new products in this area are being developed. One, Cefizox, is effective in countering many infections that are resistant to existing antibiotics. It is awaiting FDA approval. The second, Monocid, would be the "world's first once-a-day-injectable cephalosporin antibiotic." The single dosage would help curb the administrative costs associated with having to inject medication several times a day. This product is also awaiting FDA approval.

In the over-the-counter and consumer healthcare arena, SmithKline saw sales of its Menley & James Laboratories unit climb to $183 million in 1981, up 5% from 1980, compared with a 33% increase from 1979 to 1980. According to the company, one of the reasons for the low growth rate in the consumer products category is that last year was the mildest cold season in 20 years. Another is that retailers and wholesalers, wanting to keep costs down, are also keeping inventories low.

Although the company credits Contac, the group's flagship product, with an "excellent year," actual dollar market share dropped from 15.3% in 1980 to 13.9% in 1981 and unit share was down from 16.6% to 15.1% in 1981. Advertising support for Contac cold capsules was down 21%, from $13.6 million in 1980 to $11.1 million in 1981, according to Leading National Advertisers. Contac Severe Cold Formula was a major introduction in the fourth quarter of the year. This product, for colds with flu-like symptoms, is positioned in the growing multisymptom segment of the cold market. Contac's chief rival continues to be Richardson-Vicks' NyQuil, which was supported with an ad increase of 20% last year and leads the cough and cold remedy category with an 18% dollar market share and a 14% unit share.

Ecotrin, a medication for arthritis, was up 45% in unit and dollar sales last year, while within the consumer product sinus category, the performance of Menley & James' Sine-Off was mixed.

Sine-Off's dollar market share was up from 25% in 1980 to 26.4% in 1981, but its unit share was down from 26% in 1980 to 25.8% in 1981. Ad spending for Sine-Off tablets and spray leaped 172% from $1.2 million spent in 1980 to $3.3 million in 1981. Sine-Off Extra Strength No Drowsiness Formula capsules, a line extension, was introduced in 1981.

MenJ also competes in the allergy category with Teldrin, a product that has shown consistant growth since it was first marketed over-the-counter in 1978.

Sales of Dietac, timed-release diet capsules, were down last year, even with an 31% increase in ad spending, from $9.5 million to $12.4 million.

SmithKline's healthcare concerns are not limited to the human consumer. Those of the canine variety had a fortunate year last year, as the company's Norden Laboratories came out with a "canine-origin" vaccine under the Vanguard label that is effective against Parvovirus, a quickly debilitating intestinal disease that is particularly devastating to younger dogs.

Norden also makes vaccines for cattle and pigs. Sales for this division reached $142 million in 1981, up 5% from the year before. In addition to the Parvovirus vaccine, Filaribits, a tablet for protection against heartworm disease, also did well.

Eye and skincare products, marketed through SmithKline's Allergan Pharmaceuticals subsidiary, had an "outstanding" year, according to the company. Sales went up 26%, from $110 million to $139 million. At com-

parable currency exchange rates, the company noted, the growth would have been 33%.

Allergan's No. 1 product continues to be Soflens Enzymatic Contact Lens Cleaner. For the second year in a row, more people cleaned protein deposits off their soft contact lenses with this product than any other. It is the world's leading contact lens product, according to the company. Clinical Laboratories, SmithKline's ring of regional laboratories in the U.S. and Canada, enjoyed a sales increase of 38%, from $70 million in 1980 to $96.7 million in 1981. During the latter part of the year, the subsidiary acquired two properties, Upjohn Co.'s King of Prussia, Pa.-based Clinical Laboratory Procedures and Pathologists Service Professional Associates, near Atlanta.

Sales in the industrial industries instruments area, which includes instruments for nondestructive testing, ultrasonics assembly and ultrasonic cleaning, dropped in 1981, from $141 million to $140 million. Reasons for the disappointing year are attributed to the sluggish economy and high interest rates. Even with the drop, SmithKline continued its leadership in the area of ultrasonic technology.

The medical diagnostics operations, mostly in the U.S., were revamped in 1981. The medical ultrasonics business was sold to Xonics Inc. Sales were down from $68 million in 1980 to $63 million in 1981.

The big question for SmithKline is whether lady luck will glance at SmithKline twice. There is some cause to believe that she indeed has. A lot of attention has been stirred recently by the new SmithKline product Ridaura, an oral gold compound medication for use in treating rheumatoid arthritis.

But the company does not expect this to be another Tagamet for several reasons. One, the drug is for a specific audience. There are approximately 6.5 million people in the U.S. and about 10 million overseas who suffer from the crippling disease. So the potential market base is smaller to begin with. Nevertheless, according to one industry consultant's estimate, eventual annual sales for the product will be around $400 million. An FDA advisory committee has recommended Ridaura for approval and it is targeted for release in the U.S. early next year.

According to advertising tracking sources, SmithKline pulled some ad support from newspapers, magazines, spot and network radio last year and increased ad spending in farm publications, spot and network tv. More exactly, spending in newspapers dropped 30%, from $33,000 to $23,000; magazines, 21%, from $7.3 million to $5.8 million; spot radio was eliminated, and network radio slid 39%, from $2.3 million to $1.4 million.

On the other hand, spending was up 15% in network tv, from $22.5 million to $25.9 million; 26% in spot tv, from $3.8 million to $4.8 million, and 89% in farm publications, which went from $513,400 to $969,500.

According to SmithKline chairman Robert F. Dee, the company's major focus will continue to be on ethical pharmaceuticals. Research and development is also vital. Three-fourths of the corporate research and development budget is earmarked for new drug search. The goal, he says, is "$4 billion" in sales by the middle of the 1980s, and "we plan to double that figure by 1990."

Sterling Drug

	1981	1980
Sales	$1,792,925,000	$1,701,433,000
Earnings	130,303,000	123,337,000
Advertising*	89,700,000	89,600,000

*AA estimate

Sterling Drug, New York, the nation's 59th largest advertiser, spent an estimated $89.7 million on U.S. advertising in 1981, up modestly from $89.6 million in 1980.

The company reported worldwide advertising expenditures of $241.7 million in 1981, an increase of 3.7% from last year's figure.

Worldwide sales in 1981 totaled nearly $1.79 billion, up 5% from $1.70 billion in 1980. Net income for the year rose to $130.3 million, an increase of 6% over 1980. U.S. sales stood at $1.03 billion, up 8% from $956.4 million in 1980. Sterling, which markets products in the U.S. and 125 other countries, derives about 44% of profits from abroad.

Worldwide sales for the first six months of 1982 fell 3% to $856 million from the same period a year earlier. Earnings dropped 5% in the first half to $56.9 million. Chairman-chief executive officer W. Clarke Wescoe said the declines occurred primarily in foreign sales—accounting for close to half of the company's total sales—because of currency translation against the strong U.S. dollar. However, all four of Sterling's groups operating abroad reported sales increases in local currencies.

Domestically, Sterling operates within five business segments: Pharmaceutical specialties, proprietary products, household products, chemicals and other products and environmental control. Foreign operations are conducted through four business groups.

Sales for pharmaceutical specialties, which also include results of Sterling Organics (U.S.), were $207.3 million, up 13.6% from $182.5 (restated) million in 1980. Operating profits increased 12.7% from $24.2 million to $27.3 million in 1981. Principal products of this group include Demerol and Talwin potent analgesics; Danocrine, for treatment of endometriosis and fibrocystic disease of the breast in women; Amipaque, Hypaque, Telepaque and Bilopaque radiopagues; NegGram antibacterial; pHisoHex antiseptic skin cleanser; Isuprel and Bronkosol bronchodilators, and Marcaine and Carbocaine anesthetics.

In October, 1981, the Food & Drug Administration tentatively approved Sterling's claim that its Winstrol brand stanazolol was effective in treating osteoporosis. And early this year, the company's Conagraf brand of Durapatite, a product that aids in bone restoration following tooth extraction, received FDA approval; it will be marketed by Cook-Waite Laboratories, Sterling's dental division.

Proprietary products posted sales of $222.7 million in 1981, up 4.4% from $213.4 million in 1980. Operating profits increased by 2.3%, from $40.5 million last year to $41.4 million. Products in this group are marketed chiefly by Glenbrook Laboratories, a unit of the pharmaceuticals group. Also included in the proprietary segment are results of the consumer products division of Winthrop Laboratories and two self-medications made and marketed by the Lehn & Fink products group.

Sales of Glenbrook Laboratories' leading product, Bayer aspirin, saw no improvement last year because of increased competition in the field, the company reported. Market share estimates among analgesics last year put Bayer at about 8.5%; Bufferin at 7.3%; Excedrin between 7% and 8%; Anacin at 12.3%, and Tylenol on top with nearly 31%.

Sterling's response to the competition is clear in both advertising strategy and new product development. The company continues its campaign against nonaspirin pain relievers in comparative ads, one of which lists unpleasant side effects of acetaminophen products.

Meanwhile, Federal Trade Commission recommendations issued early last year would demand closer scrutiny of such ad claims and tactics. The controversy was revived in November, 1981, when Johnson & Johnson's McNeil Consumer Products Co., marketer of Tylenol, sued Sterling for claiming in advertising that regular Bayer aspirin is just as effective in relieving headache pain. Sterling then retaliated with a countersuit.

In other competitive moves, Sterling's Glenbrook Labs in January introduced a new Bayer aspirin tablet touted for its thin, smooth coating. Ad copy described it as "easy-to-swallow aspirin."

Ad expenditures for Bayer aspirin and Bayer for children were down from $23.4 million in 1980 to $22.4 million in measured media totals. Network tv, magazines and network radio received the major portions of the budget.

In the competitive $1 billion cough and cold remedy market, Sterling has tried to make inroads with its Remedex line of liquid medicine and capsules. Marketed by Glenbrook, the brands received $724,500 in measured media spending last year, primarily in spot tv. The market, which grows at 1% to 2% annually at best, should continue to favor multisymptom items such as the highly successful Comtrex remedy from Bristol-Myers or Contac severe cold formula from SmithKline.

In other product categories from Glenbrook Labs, Midol received $4.5 million in measured media spending, up slightly from $4.4 million in 1980. Phillips Milk of Magnesia liquid and tablets, combined, were supported by $3.3 million in spending, mostly on network tv, while Diaparene baby powder received $1.6 million.

Sterling's Lehn & Fink products group accounts for nearly all of the company's domestic business in household products, cosmetics and toiletries. Sales increased 8.1%, from $362.4 million in 1980 to $391.7 million in 1981.

Operating profits increased from $56.5 million to $66.3 million, a 17.4% gain that the company attributed to a groupwide containment program.

Measured media allocations for Lysol products were reduced from $19.2 million to $17.6 million last year, following cuts of almost equal size the previous year.

Lysol spray disinfectant received roughly half of the overall budget, with spending of $8.7 million allocated to mostly network tv. Lysol liquid deodorizing cleaner was next with $4.2 million in ad support, an increase over both 1979 and 1980 levels. Lysol basin/tub/tile cleaner was backed with $2.1 million in network tv, spot tv and magazine ads.

In the moist towelette business, Lehn & Fink's Diaparene disposable baby wash received $168,400 in magazine ad support, while Wet Ones towelettes

for baby garnered $768,300, primarily in network tv. A $2.5 million multimedia drive for the new Diaparene line of Cushies extra-thick towelettes broke in March of this year.

The adult market for wet tissues has proved to be a tough sell; American Can abandoned its Fresh'n when test marketing turned up little interest in the product. Lehn & Fink's Wet Ones for adults, packaged in pop-up containers, were supported by $148,700 in measured media in 1981, the year in which Cederroth A.B. of Sweden announced the U.S. introduction of its brand of wet anal tissue.

Lehn & Fink's Bowl Power in tank toilet bowl cleaner received $1.9 million in network and spot tv ad support last year. The product was introduced in 1980 amid fierce disputes over calcium hypochlorite, a chemical ingredient reputed to corrode plumbing fixtures. Lehn & Fink subsequently ran ads denouncing the publicity, and was joined by a number of competitors in public denial of the claims made against the chemical agent.

The Love My Carpet rug and room deodorizer line, in its original fragrance and two additional scents, was backed with $2.6 million in measured media totals last year, down substantially from the nearly $5 million total registered in 1980. Perk liquid floor finish received a hefty $5 million, primarily in network tv. Mop & Glo floor shine cleaner saw ad spending cut from $2 million to $1 million, while Minwax wood finish products gained national distribution and received a $1.3 million budget.

The d-Con line of rodenticides and insecticides were top performers among household products, led by such brands as Flea Stop, introduced at the beginning of 1981, and Four/Gone aerosol insecticide, still dominant in its category. Advertising for Four/Gone, however, was slashed from $2 million in 1980 to $1.7 million in 1981. D-Con roach traps again had measured media slashed, from just under $500,000 in 1980 to $177,500.

Lehn & Fink's cosmetics division put the greatest share of advertising behind Ogilvie home hair products, which accounted for $1.7 million in measured media spending. Ogilvie's Whisper Wave nonammonia permanent, which debuted last year, received $149,200 in magazine support. Earlier this year, Ogilvie introduced its Heavenly Body protein shampoos and conditioners, slated for a print advertising campaign. Dorothy Gray skin treatment products were backed with $638,800 in magazine advertising, a substantial increase over 1980 levels of $250,000. A five-product Hydro Light skincare line, launched last summer, received $421,000 of the total.

The Stri-Dex product group, facing increasing competition from acne remedies such as Clearsil, Norcliff-Thayer's Oxy line and Noxell Corp.'s Noxzema 12-hour acne treatment, operated on $1.4 million in ad spending last year, up slightly from $1.3 million in 1980. Stri-Dex pads received $971,600 in spot tv, up from $699,000 in 1980. The product holds the No. 1 position in its category, but will have to contend with Commerce Drug's new Propa PH pad with 10% benzoil peroxide, introduced last year.

Winthrop Labs' consumer division invested $4.3 million in ad support for Neo-Synephrine nasal sprays and capsules; $2.8 million for Campho-Phenique antiseptics, and $1.3 million for pHisoDerm skin cleaner, which is targeted mainly at teen age audiences via network radio.

Time Inc.

	1981	1980
Sales.....	$3,296,382,000	$2,800,013
Earnings.....	148,821,000	141,203,000
Advertising*.	141,133,000	139,430,000**

*AA estimate
**Restated

Time Inc., New York, the 43rd largest national advertiser, increased its advertising expenditures in 1981 by 1% over 1980 to $141.1 million, excluding the publishing of direct mail promotion or pro rata costs of advertising within its own magazines. The 1980 figure of $139.4 million was restated to reflect discontinued operations, namely Time-Life Films and the *Washington Star*.

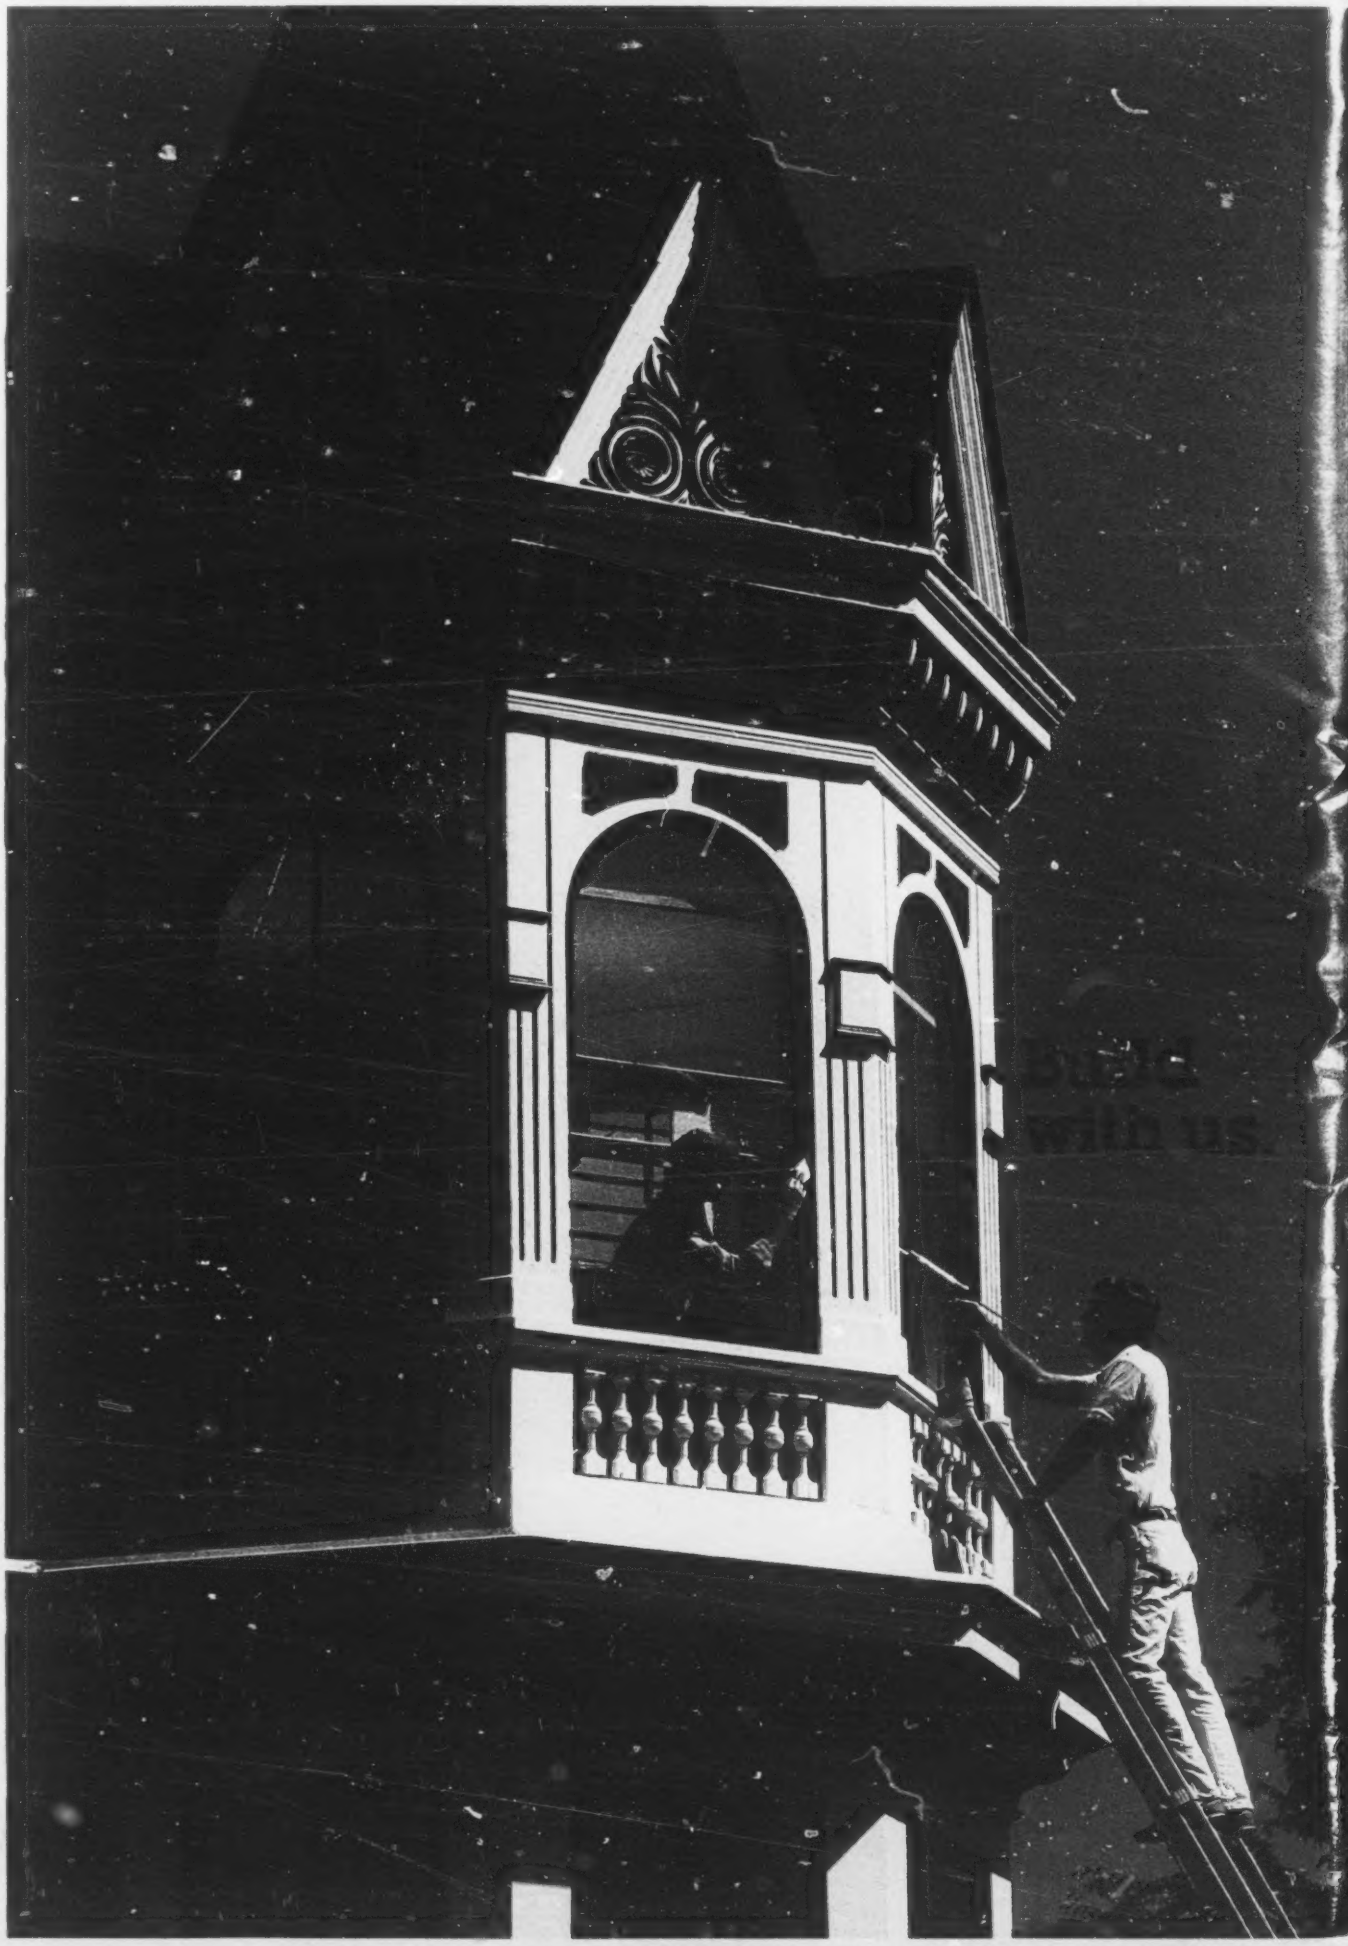
In 1981, Time Inc. had revenues of $3.30 billion, an increase of 18%, while net earnings totaled $148.9 million, up 5.4% over 1980.

In the first half of 1982, Time reported income from continuing operations of $74.7 million, compared with $92.6 million reported in the first six months of 1981.

Revenues were $1.7 billion for the first half of 1982, against $1.6 billion a year ago.

Magazines, paper operations and the increasingly important video group continue to contribute the lion's share of the company's earnings. Last year, for the first time, video passed publishing as a source of company profits and is expected to further increase that lead at the end of 1982.

One of the few disappointments last year was the performance of Time-Life Books, as it continued to show depressed earnings. There has been industry speculation that the Time-



Life Books might be discontinued—following a pattern that Time Inc. started with its folding of the money-losing Time-Life Films and the *Washington Star* last year—but company executives deny that such a move is contemplated.

Time has been both aggressive and successful in the cable tv industry. Its American Television & Communications Corp. (ATC) subsidiary is one of the country's largest cable operators, with nearly 2 million basic subscribers in 127 cable systems in 33 states. Its Home Box Office business continues to grow as well, with the number of HBO subscribers expected to reach 10 million by the 1982 third quarter. Cinemax, HBO's sister service, is reaching 1.5 million subscribers in its first year and a half.

The company's magazines—*Time, Life, Fortune, Sports Illustrated, Money, People* and *Discover*—had revenues of $870 million in 1981, with $524 million in net ad revenues, 18% ahead of 1980. Operating profits jumped 81% to a record $102 million from $56.5 million. The increase was attributed to the 18% gain in ad revenue—which came from both price and volume increases—and a 14% rise in circulation revenues.

The Books Group, which includes Little, Brown & Co; Time-Life Books and Book-of-the-Month Club, reported revenues of $518.6 million in 1981, a 4% increase over 1980. But earnings fell by 47.6% to $21.1 million.

The forest products business brought in $1.16 billion last year and a profit of $106.8 million. The forest group's major division was Inland Container Corp., whose revenues increased by 13% to a record $657 million, while its profits were up 4.7% to a record $56 million. The Temple-Eastex building products division, however, continued to be depressed in 1981. Temple-Eastex' pulp and paperboard division, on the other hand, achieved revenues of $295 million, up 12%, and profits of $48 million, up 26%. Temple, in marketing wood building materials, showed a profit of $3 million on revenues of $210 million, an improvement from its loss of $4 million in 1980.

Time's Selling-Areas Marketing Inc. (SAMI), a marketing data subsidiary, reported a 16% revenue gain last year, a record. SAMI provides grocery product marketers with data on the movement of their products from warehouses to retail outlets. SAMI added three new markets to its basic reporting system in 1981, bringing the total number to 42. These markets represent nearly 80% of all U.S. foodstore sales. SAMI also provides its clients with information on product availability within each market through a companion service: SAMI Retail Distribution Index.

While most of Time Inc.'s performance figures were up, its measured media spending—exclusive of newspapers—was down, as the company spent $77.3 million in 1981, down 11% from the $86.8 million invested in 1980, according to Leading National Advertisers. The cuts came in spot tv, network tv, spot radio and network radio. The largest chunk—$36.5 million—of the spending was put into magazines, continuing a pattern the company set in 1980, when magazines replaced spot tv as the recipient of the greater share of Time Inc.'s advertising dollars. Spot tv wasn't far behind, however, as it accounted for $30 million of spending.

Network tv's piece of the advertising pie decreased in 1980 to $6.9 million from $8.8 million the year before. Network radio picked up $181,000 from Time Inc.—a decrease from 1980's $704,400—and outdoor advertising buying accounted for $143,000 of the company's total, a large jump from the $34,200 spent in 1980.

In 1981, Time's magazines accounted for 26% of the company's revenues, the same share they contributed the year before, and approximately 34% of operating profit.

Time, which was for the 12th straight year the leading magazine in worldwide revenues, also took over the No. 1 spot in advertising revenues for U.S. magazines in 1981, displacing *TV*

BEST AVAILABLE COPY

Guide. Last year, the company's flagship weekly pulled in a record $340.8 million in ad revenues, including $253.4 million in U.S. revenues. It carried 2,908 U.S. ad pages last year.

Time lifted its domestic rate base to 4.4 million from 4.25 million last year and the international edition was raised to 1.29 million from 1.27 million. The subscription price for the domestic edition was also raised —to $40 from $35 a year. Its advertising budget of $8 million went to spot tv ($5.7 million), magazines ($955,000), newspaper supplements ($947,000) and network tv ($379,000).

Sports Illustrated continued to set advertising and circulation records, and its ad revenues of $154 million were good enough to rank it fourth among all domestic magazines last year. Ad pages increased to 2,885 from 2,647. *SI* invested almost all—$7.6 million—of its total $8.5 million ad spending in spot tv last year. The rest was doled out as follows: $792,000 for magazines, $51,000 for newspaper supplements and $9,000 for network tv. As for *SI* offshoots: *SI* Books spent $400,000, *SI* calendars spent $190,000, *SI* games spent $380,000 and *SI* mail order promotion spent $637,000—all on magazines.

People joined *Time* and *Sports Illustrated* in the top five magazine rankings last year, bringing in $136 million in ad revenues. Ad pages increased to 3,604 from 3,431. The predominantly newsstand and checkout seller raised its rate base twice in the last year and is now at $2.4 million. The cover price was raised to $1 from 95 cents this past March. The weekly magazine solidified its position as the No. 1 ad spender among the company's magazines, as it shelled out $10.1 million last year. Most of that went to spot tv—$6.9 million. The rest of the spending was as follows: $3 million for network tv, $116,000 for network radio, $35,000 for newspaper supplements and $15,000 for magazines.

Fortune had its best year ever in 1981, the company said. Now in its fourth year as a fortnightly, the business magazine maintained its 670,000 rate base. *Fortune* took in $70.4 million in ad revenues from 2,738 ad pages last year. The magazine raised its subscription rate to $33 from $30 last July. Time allotted $1.5 million for *Fortune* advertising last year, broken down in this way: $1.4 million for spot tv and $142,000 for magazines. *Fortune* spinoffs—a book club, games and a mail order promotion—received $293,000, $7,500 and $10,600, respectively, to buy magazine space.

Money continued to set impressive records. Ad revenues jumped by 48% last year to $23 million, while ad pages increased to 1,180 from 968. *Money* increased its subscription rate to $21.95 from $19.95 in July of last year. The rate base is now 950,000, a gain of 125,000 since February, 1981, with Time Inc. executives predicting the magazine will soon shoot over the 1 million mark. Newsstand sales for the $2 cover-price magazine jumped by 32% last year, making it the fastest growing title in the Time Inc. stable. *Money* spent $789,000 on advertising last year, all of it in spot tv.

Life had ad revenues of $23.2 million in 1981, up 20%, and 713 ad pages, an increase from 1980's 661 pages. Last year, the subscription rate went to $19.95 from $18, while the cover price remained at $2. *Life* spent $1.1 million on measured advertising last year: $386,000 for spot tv, $316,000 for newspaper supplements and $378,000 for network tv.

The latest edition to the lineup of Time's magazines, *Discover*, debuted in October, 1980, and has since become the largest magazine in the fast-growing science field. Its rate base has grown to 835,000 from its original 400,000. Last year, the monthly brought in $5.3 million in ad revenues on 377 pages. Its subscription price was increased to $20 from $18, while its cover price stayed at $2. Of the $1.2 million spent on advertising, $1.1 million went to spot tv and $43,000 was spent on magazines.

Some of the biggest interest in the magazine division last year was created not by what the existing publications did, but what a proposed new magazine may or may not do. Time Inc. is closely studying the prospects for a weekly cable tv magazine that would be *Time*-size and system-specific in its listings. If it is pulled off—and industry executives agree that the process would be a tough one—the project could be one of the largest magazine launchings in history.

Time's video group, the fastest-growing division at the company, had revenues of $618 million last year, more than a four-fold increase over the 1980 total of $128 million. Operating profits were up 68% to $123 million. The group includes Home Box Office, American Television & Communications Corp. and one-third interest in USA Network, an ad-supported programer. HBO had 8.5 million subscribers at the close of 1981 and is expected to have well over 10 million by the end of 1982's third quarter. HBO is now offered in more than 3,600 cable systems, and Time Inc. executives say that it is experiencing its lowest level of disconnects since the network went national, a situation they attribute in part to the HBO's decision last January to move to 24-hour programming.

Meanwhile Cinemax, launched two years ago, has 1.5 million subscribers, and ATC is expected to soon pass the 2 million mark in basic subscribers.

HBO spent $6.2 million advertising its pay channel last year as follows: $2.4 million in spot tv, $2.4 million in magazines, $1.2 million in network tv and $139,000 on outdoor. Combined advertising for the HBO and Cinemax cable networks totaled $320,000 last year, almost all of it in magazines. ATC ad spending totaled $17,000, all of it in magazines.

At the company's other divisions, the Book-of-the-Month Club, a wholly owned subsidiary, had its best year in 1981, racking up record revenues and net income. BOMC spent $3.9 million on advertising last year in this way: $3.1 million in magazines, $494,000 in network tv, $256,000 in newspaper supplements and $16,500 in spot tv.

Time-Life Books, which had a disappointing performance in 1981, spent $21.7 million on advertising, of which $15.7 million went to magazines, $3.2 million to spot tv, $2 million to newspaper supplements and $895,000 to network tv.

The wholly owned trade publishing house, Little, Brown & Co. posted record earnings and revenues in 1981 and spent $2.5 million on advertising during that period, all of it in magazines.

Time's suburban newspaper interest, Pioneer Press, had another record revenue year in 1981. The division publishes 30 community newspapers and a quarterly magazine, *2Q*.

Among the high level personnel changes at Time Inc. last year were: Christopher Meigher to director of circulation; Larry Crutcher to vp-magazines; Carlyle Daniel to president of SAMI; Richard Stolley to managing editor of *Life*; Pat Ryan to managing editor of *People*, the first woman managing editor at Time in many years; Dave Roberts to circulation promotion director; William Kelly to publisher of *Money*; Richard Thomas to worldwide ad sales director of *Time*; Dan Zucchi to publishing director of the cable magazine project and Trygve Myhren as chairman of ATC and Joe Collins as president.

Toyota Motor Sales

	1981	1980
Sales*	$17,014,984,000	$15,840,384,000
Earnings*	146,428,000	162,631,000
Advertising**	106,186,700	87,628,000

*Worldwide; 1980 figures restated; fiscal year ending June 30
**AA estimate

Toyota Motor Sales, Torrance, Cal., the 51st leading national advertiser, is estimated to have increased advertising 21.2% in 1981 to $106.2 million from $87.6 million in 1980.

The sole stockholder in the company is Toyota Motor Corp., a new corporate entity formed on July 1, 1982, with the merger of Toyota Motor Co. and Toyota Motor Sales Ltd. of Japan.

Toyota Motor Sales Ltd. reported worldwide sales of $17.01 billion in 1981, an increase of more than $1.17 billion, or 7.4% over 1980; however, Toyota attributed a 10% decline in net income to the vagaries of the yen and a less favorable foreign exchange position than in 1980, as well as depressed domestic sales.

In the U.S., which accounts for 30% of the company's exports, Toyota maintained its position in 1981 as the best-selling import car and truck.

The Japanese auto maker continued the sales pace set six years ago when it overtook Nissan's Datsun import for the No. 1 spot. Toyota sold 714,020 units in 1981—576,491 cars and 137,529 trucks—to put its share of the import car market at 24.4%.

The company ranks second in worldwide production of motor vehicles, behind General Motors and followed by Nissan and Ford. Toyota's share of the total U.S. market is 6.7%.

The Corolla again was Toyota's sales leader in 1981, accounting for more than 40% of the company's U.S. sales volume. First introduced in 1966, the Corolla has gained wide acceptance among drivers both in Japan and overseas. In 1979, it became the first Japanese automobile to exceed the 7-million-unit mark in aggregate model production, and for four years in a row, starting from 1974, it held the record as the world's top production model, a position it regained in 1980 and maintained in 1981.

In 1981, the Corolla received $17.3 million in measured media support, including $2.9 million in magazines, $7.4 million in network tv and $3.9 million in spot tv. As with Toyota's other lines, the Corolla was advertised under the theme line, "Oh! What a feeling."

Promotion of Toyota's small, fuel-efficient pickup trucks received heavy emphasis last fall, with the company spending close to 10% of its total media budget on the truck lines, a 10% boost over 1981 spending. Among measured media, the company put more than $20.8 million behind the trucks, most of it going to spot tv. That amount was the most the company used to support any of its various lines in 1981.

Meanwhile, as competition in the import truck market began to build, Toyota quietly introduced its own sub-$6,000 truck to meet similar entries by Nissan and Mazda, but by mid-1982 sales were 5% behind last year.

Another line receiving heavy support was Celica, which includes, among others, the 2.8-liter, six cylinder Celica Supra, with models priced between $13,598 and $14,598. The Supra is the top of the Toyota line, followed by the luxury Cressida at $12,699 and the Corona models in the $7,549 to $9,199 price range.

The Supra and the high-performance Celica models, priced from $7,159 to $8,829, were featured in major enthusiast magazines at introduction time with a six-page gatefold devoted to the Supra, starting on the inside front cover, and a two-page Celica spread on the inside back cover.

All of the various Celica models received more than $12.1 million in measured media support in 1981, including $3.1 million to magazines, $5.9 million to network tv and $2.9 million to spot tv.

The remainder of the Toyota line for model year 1982—the front-wheel-drive Corolla Tercel ($4,998 to $6,428), Starlet ($5,578) and Corolla models ($5,448 to $7,128)—were featured in ads that stressed traditional product benefits with a blend of humorous situations and scenes that showed the vehicles in action.

To help introduce the 1982 model line Toyota picked up sponsorship of international professional women's tennis circuit events into the current year, replacing Colgate-Palmolive Co., which had supported the circuit since 1977. Toyota's agreement with the International Tennis Federation and the Women's Tennis Assn. includes an option for 1983.

Covered are 40 events in 13 countries, including Wimbledon, U.S. Open and Clay Court championships. The company put up $900,000 in prize money for these events, as well as $250,000 for sponsorship of the "Toyota Series Championship" in December.

Elsewhere, in a display of commercial dominance for "Super Week on ABC," Toyota was featured in every ABC network prime time position over a four-night period last year. The effort dominated coverage of Toyota's target audience (young adults) and provided high degrees of frequency and impact at a time when no similarly targeted tv specials were available.

A highlight of Toyota's 1982 model season was increased use of pro football broadcasts. The company ran ads during all National Football League games telecast on CBS-TV, including the championship playoffs and the Super Bowl.

The past year also saw Toyota and Ford Motor Co. table plans for the joint production of a car they could produce in the U.S. But in the first half of 1982, General Motors and Toyota began discussing similar possibilities for building a small car at one of GM's idle U.S. assembly plants, perhaps a front-wheel version of the subcompact Corolla.

Toyota's new $50-million headquarters facility in Torrance, begun in 1980, is expected to be ready for occupancy in October. A new regional headquarters and parts depot opened in Cincinnati during the past year, and a similar complex is scheduled to open soon in the San Francisco area. These recent projects represent a capital improvements program totaling more than $80 million.

	1981	1980
Sales	$5,265,500,000	$4,992,200,000
Earnings	71,200,000	44,916,000
Advertising*	95,235,900	88,975,000

*AA estimate

Trans World Corp., New York, the 57th largest national advertiser, spent $95.2 million on advertising in 1981, a 7% increase from 1980.

The company showed a 5.5% increase in sales over the same period, reaching $5.27 billion. Pretax income in 1981 totaled $71.2 million, up 58.6% over the $44.9 million recorded in 1980. (In 1980 and 1979, Trans World's pretax income had fallen considerably from $92.5 million in 1978.)

Four of the company's subsidiaries, Canteen Corp., Century 21 Real Estate, Spartan Food Systems and Hilton International Co., all enjoyed increased revenues from 1980.

Hilton had its best year ever, with 1981 pretax income of $73.4 up 11.5% from 1980.

One of the company's subsidiaries, Trans World Airlines (TWA), lost money, reflecting the economic slump air carriers have suffered over the last two years. TWA's advertising spending, however, increased by 8.2% over 1980. The airline spent $55 million on advertising, with $10 million in spending measured by Leading National Advertisers and $40 million in newspapers. It also spent $208,100 in measured spending on its air freight division.

TWA ranked fifth among airlines in its revenues from passenger miles with $25.8 billion, up 8.6% from 1980. Yet the company continued to operate at a loss, with a pretax deficit of $28.2 million, or $1.2 million worse than last year. Its system capacity declined 9.4% because of reduced operations stemming partly from Federal Aviation Administration flight restrictions and the stagnant airline market.

To increase ridership, TWA used flight incentives in most of its ad campaigns. It jumped into the airlines' price wars with its "Anywhere on TWA for $149," which later increased to $179 when TWA introduced its Supersaver fare for $149. It also followed American Airlines by offering a frequent-flier bonus. Any passenger who traveled 60,000 miles became eligible for two free round-trip economy tickets to any TWA international destination.

The rest of TWA's ad dollars were spent on the Ambassador Class to Europe campaign, which boasted that TWA had "wider seats and more legroom than any other airline" in its revamped transcontinental Boeing 747 carriers.

The airline also reportedly renegotiated its commission contract with Ogilvy & Mather, New York, where a large jump in estimated billings would mean the increased profit would be split between the agency and client. Such a move, according to reports, would be beneficial to TWA.

Mary Hershey

Trans World Corp.'s Century 21 saw some expansion, despite a depressed market.

Hilton International Co., the corporation's biggest money earner, acquired eight more hotels in 1981 to make a total of 85 Hilton owned or operated facilities in 43 countries. However, occupancy rates for the hotels were down by 2% to 71% for the year.

A total of $1.7 million was spent on measured advertising, with $530,700 used to continue Hilton's push to acquire domestic hotels under the Vista International banner. A Philadelphia Vista is scheduled to open in late 1982. The hotel's major campaign in 1981 was aimed at business travelers under the theme, "Where the world is a home." McCann-Erickson, New York, created the campaign.

Only one of Trans World's two foodservice wings, Spartan Food Systems, showed great improvement over last year. Revenues of Spartan, owner of Quincy's Family Steak Houses and a Hardee's restaurant chain franchisee, reached record highs, reaching $9.2 million in 1981, a 43.7% increase over 1980. The company added 12 Hardee's units and closed one to bring the total number of its holdings in this fast-food restaurant to 242 units. Quincy's has charted rapid growth with a year-to-date restaurant total of 115, up 68 units from 1980.

Trans World's other foodservice company, Canteen Corp., had only a slight profit increase, 4.5% over last year. Because of the depressed manufacturing industry, fewer people ate at Canteen's industrial outlets, causing a loss in revenue. To hit on this crunch, Canteen expanded its "By-the-Ounce" program, which allows employes to buy only the amount of food they want. The company also expanded its cooperative vending program and introduced a chain of deli restaurants, Gulliver's delis. There are currently five outlets, with five to 10 more restaurants expected to open in 1982, and 10 to 12 additional units planned for 1983.

Canteen has three subsidiaries, Milnot Co., processor and distributor of a canned milk-based product and other foodstuffs; Dunhill Personnel System, an employment placement agency, and Rowe, a cigaret vending service. Advertising is done in-house.

Century 21 Real Estate, which maintained its position as North America's No. 1 franchise real estate organization, managed a slight profit despite the depressed real estate market. The corporation's pretax profits were up 6.4% from last year for a 1981 total of $9.2 million.

In an effort to buy back individual franchises, Century 21 acquired the formerly independent New England region in 1981, and in early 1982 it merged two independently owned Ohio regions into one company-owned region. It now owns 14 of the 29 franchises.

$5.04 billion. But after a brief earnings recovery in 1980, UAL plunged into the red in 1981, losing $70.5 million in 1981, compared with a gain of $21.0 million in 1980. The loss stemmed from persistent earnings problems at United Airlines; its net loss for the year was $104.4 million. Like other carriers, United was faced with a myriad of operating difficulties during the year, including air fare wars and the air traffic controllers' strike.

At the same time, hotel operations, including Westin and Mauna Kea Properties, set records in 1981 with net earnings up 12% to $35.4 million versus $31.5 million in 1980. GAB Business Services experienced a $1.6 million loss for the year, compared with 1980's net earnings of $4.6 million.

In the first quarter of 1982, the slump continued, and it began to affect Westin Hotels. The company reported a net loss of $129.3 million, attributing the record losses to discounts and schedule limitations resulting from the air traffic controllers' strike. Net earnings were down for hotels, compared with 1981's first quarter because of the recession.

The company looked to all parts of its operations to reduce expenses, but advertising and promotion budgets were not reduced, largely because of the competitive nature of the airline industry. In fact, the total estimated increase of 17% is the largest UAL advertising increase in the last two years, according to Advertising Age estimates. Advertising became even more important to all the airlines during 1981, as each tried to attract customers, tell travelers about new routes and discount prices and, with the air controllers' strike, inform potential fliers that the airlines were still operating.

The industry's turbulence led to a raft of agency changes, including shifts at American, Eastern, Republic, Northwest and others. United's top management stressed its satisfaction with Leo Burnett USA, its agency since 1965, and the relationship appeared solid despite the profit problems. At the company's annual meeting, Richard Ferris, UAL president and chief executive officer, said he "couldn't be happier" with the agency's work.

The airline did make several important cost-cutting measures in 1981 and early 1982. In August, 1981, United pilots agreed to a new contract that reduced crew sizes on certain airplanes and increased productivity. The airline's machinists signed a new contract in March, 1982, providing advantageous terms to the carrier. Thousands of United employes were furloughed, however, as the airline made personnel cuts when traffic dropped.

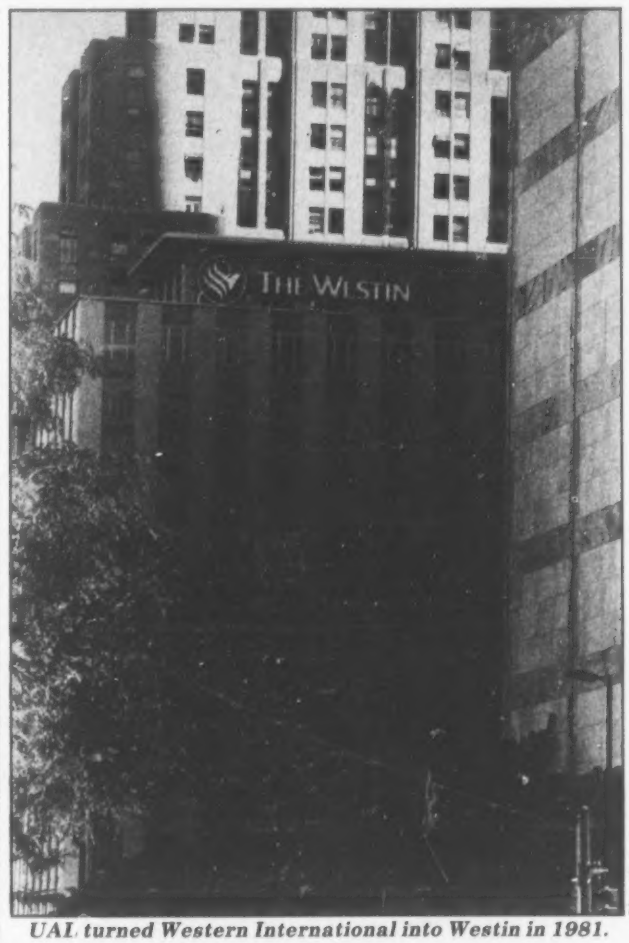
The carrier added four DC-10s and grounded a number of less fuel-efficient aircraft in its attempt to improve operating costs. In the fall of 1982, the airline planned to start flying the new Boeing 767, a plane nearly 35% more fuel-efficient than the ones they are replacing. In June of 1982, however, United and Boeing entered negotiations to cancel or substantially delay deliveries because of threats to safe harbor leasing provisions of the 1981 tax act and poor profits.

Because of the air traffic controllers' strike, there were 19% fewer scheduled aircraft departures. Increased use of larger aircraft kept the year-to-year decline in available seat miles to 11.7%. Scheduled revenue passenger miles were 9.4% below 1980, the company reported. The company maintained its status as the nation's largest airline in terms of operating revenues and revenue passenger miles flown. United's actual load factor was 59.6% in 1981, compared with 58.4% in 1980, while its break-even load factor was 63% in 1981 versus 59.7% in 1980, according to a Salomon Bros. report.

United's advertising, for the most part, involved both offensive and defensive measures relating to new routes, fares and services. The airline carried over into 1981 a campaign started in 1980 adapting its long-running "Fly the friendly skies" theme, and using the line, "That's what friendly skies are all about." For most of the year, though, the airline advertised prices and destinations.

Then, in January, 1982, the company launched a new campaign directed at business travelers. A continuing series of spots featuring prominent businessmen and women posed and answered the question, "Why do 100,000-mile fliers choose United Airlines?" Among the first presenters were Frank Capra Jr., president, Avco Embassy Pictures; Jean Nidetch, founder, Weight Watchers International; Hugh G. Glenn, president, Omega Watch USA, and Charlie O. Finley, former Oakland A's owner.

The airline continued to support its primary leisure travel destinations, Hawaii and Florida, with various advertising and promotion programs. Spots showing in-flight Royal Hawaiian Service and island destinations were aired during the year.



Mary Herlehy

UAL turned Western International into Westin in 1981.

In January, 1981, United introduced Al E. Gator, an animated spokesman, to promote its "Sunbird" service to Florida from several Northern cities. The character, a dapper-dressing alligator with a southern drawl, appeared in both television and print advertising in 1982, too.

Much of the year's advertising revolved around new routes. Taking advantage of the deregulated skies, United moved to strengthen its Chicago and Denver hubs by offering new service to Tulsa, Oklahoma City and Wichita, Kan., in June, 1981. Service from Chicago to Cincinnati was added in July. The carrier announced plans to start service to Albuquerque, N.M., San Antonio, Louisville, Ky., and Syracuse, N.Y., but in the fall of 1981 was forced to retrench because of capacity restrictions brought about by the air controllers' strike. In June, 1982, United received government authority to fly between the Pacific Northwest and Japan, and said it would start the service in April, 1983.

United did reenter the southwestern market in early summer, 1982, after Braniff Airlines entered bankruptcy, leaving the prime Dallas market open to competitors. United started service to that city from Chicago and Denver, and also carried through its earlier intention to fly to San Antonio.

Throughout 1981, United, hit hard by new, low-cost carriers in many of its primary markets, struck back by matching fares on competitive routes. In Chicago, for instance, the airline slashed prices on selected flights to cities where it competed with Midway Airlines. Its most ambitious response, Friendship Express service, surfaced in late spring in the Cleveland market, where New York Air had initially carved out a healthy market share by offering low fares.

In the fall, United expanded the Friendship Express concept to routes in the West—principally from hubs at Los Angeles and San Francisco. Using peak and off-peak pricing, United began the service on Oct. 1 from Los Angeles to San Francisco.

Advertising in western markets concentrated heavily on the introduction of the new low-fare concept. In April, 1982, the carrier launched a business class service—first class-type seating, advance seat reservations and complimentary meal and cocktail services—on all Friendship Express flights between Los Angeles, San Diego, San Francisco and Portland and Seattle, and between Phoenix and San Francisco. The airline said it made the move back to additional services because of a desire by some business people for the amenities.

Principally, though, the airline paid more attention in its advertising to the endless array of discount fares generated by its competitors, and, in some cases, itself. The heavily traveled transcontinental routes were a hub of price promotion activity throughout the year, as United contended with traditional rivals, TWA and American, and a relative newcomer, Eastern.

United followed the lead of competitors in May, 1981, when it announced a program to reward frequent fliers. The airline called its program, "Mileage Plus." The promotion gave travelers a chance to gain discounts on round-trip tickets if they flew United and logged their mileage.

The company turned its at-

tention and ad dollars to one major new business during the year—overnight package delivery. Touting its growth potential, United announced that it would enter the $2 billion-plus market in September, 1981, under the United AirExpress name. United used its own planes and contracted ground service operations to independent freight forwarders. The airline said it would launch a multi-million-dollar ad campaign in September, 1981, to back the service in major markets. The air traffic controllers' strike forced United to cut back on the number of evening and early-morning flights in major markets that make up the bulk of the overnight package delivery business. Eventually, some of the flights were restored.

By the spring of 1982, the United AirExpress campaign was in full swing. Television and print ads showcased humorous talking packages eager to "fly the friendly skies." The airline said it would spend $13 million in 1982 to advertise and promote the AirExpress service.

The air traffic controllers' strike left an indelible mark on United's business in the second half of 1981, and, the airline contended, into 1982. Government-mandated cutbacks hit United particularly hard at hubs in Chicago and Denver, where it had a 24% and 16% reduction in departures, respectively. United moved ads to cope, trying to inform put-off passengers that the airline was still flying a reduced, but normal, schedule. Yet, as Mr. Ferris told shareholders at the company's annual meeting: "Some passengers simply decided not to fly. Others changed their routings .... The geographical imbalance left United at a competitive disadvantage."

Making good on its promise, the company's Western International Hotels division implemented a corporate name change to Westin Hotels in 1981. The Westin name was placed on 23 operating hotels and included on five hotels under development. Throughout the year, Westin advertised the new name and redesigned corporate logo. The chain then extended the introductory campaign to feature the "Westin Man" and "Westin Woman" in its 1982 advertising. The campaign from Cole & Weber, Seattle, carried the subtheme, "First-class, worldwide."

The company said that the recession would not affect its plan to add 22 new hotels by 1985. The chain's average occupancy rate was 77%, three points lower than 1980, but still considered above the industry's average rate.

In 1981, Westin opened three new properties: The Westin Hotel, Cincinnati; the Shangri-La, Hong Kong, and the Camino Real, Ixtapa, Mexico. It also completed a major addition to the Williams Plaza, Tulsa. In 1982, Westin slated new additions at the Arizona Biltmore, Phoenix; the Carlton, Johannesburg and the Westin Hotel, Seattle. A new hotel was scheduled to open at Vail, Colo., later in the year.

To complete its expansion plans, Westin announced several new projects. In 1983, openings were forecasted for the Westin Hotel, Galleria, Dallas; the Westin Hotel, Copley Place, Boston; the Westin Hotel, Ottawa, and the Camino Real, Tijuana, Mexico.

Other planned projects included Westin properties in Birmingham, Ala., and near O'Hare Airport, Chicago.

*North American figures for Unilever NV
**AA estimate

Unilever U.S., New York, which includes Lever Bros., Thomas J. Lipton Inc. and National Starch & Chemical Corp., is the nation's 27th largest advertiser, spending an estimated $188.9 million in advertising in 1981, up 19% from 1980.

Combined sales of the three companies, and including Canadian operations, totaled $2.84 billion in 1981, an increase of about 1% over 1980. Operating income in 1981 rose about 8.8% over 1980 to $145.6 million.

As suggested by the performance figures, economic activity for Unilever U.S. remained sluggish, as it was in Europe for parent Unilever NV, based in Rotterdam, the Netherlands, and London.

But in one bright note, National Starch & Chemical had a good year in 1981, with sales of $668.3 million, up 21.1%, and earnings increased 28.3% to $41.4 million.

Thomas J. Lipton Inc. both maintained its market position and improved its profits. And Lever Bros. management continued its efforts to restore this division to financial health.

Lever Bros., which six years ago set out to save money on media planning and buying by creating an in-house shop, abandoned its plan in early 1982, and returned all but network tv buying to its regular agencies of record. A Lever executive said changing factors in the media area persuaded the company to make the transfer. Originally, Lever hoped to add $3 million to profits by moving in-house and, in fact, in 1981 the company saved about that amount through this operation.

Michael R. Angus, named Lever Bros. chairman-chief executive officer in early 1980, continued his policies of shoring up profitability and long-term investments.

On the production side, the company opened a $43 million soap plant in Hammond, Ind., in October, 1980, that reduced by 10% the cost of making Lever bar soaps. In February, 1981, the company completed the shutdown of margarine production at the Hammond plant and parceled out production to independent contractors.

On the marketing front, Lever faced stiff competition on all sides. The margarine category, which sustained heavy losses in its food division in 1980, held steady in 1981. Lever's No. 1 brand, Imperial, had a healthy resurgence in sales.

Promise brand margarine, introduced in 1972 as a premium-price polyunsaturated brand, held onto its 1% market share. Measured media advertising support totaled $3.6 million, according to Leading National Advertisers estimates, all put into spot tv. McCann-Erickson handles the account and handles Unilever margarine in Europe as well.

Over-all, Lever's other margarines got about $1.8 million in measured media support. Most of these dollars were channeled to spot tv. Autumn 100% Natural margarine received $678,000, down 21% and Promise received $1.2 million, up 10% over 1980 spending.

Lever's other principal food product, Mrs. Butterworth's syrup, continued to grow.

Faced with economic conditions similar to those in 1980, Unilever officials reportedly have their eye on the American foods market, particularly the high end, and are looking to acquire a branded food producer with healthy profit margins.

Unilever's last purchase in the U.S. was Lawry's Foods in 1979, which is now merged with Lipton.

Lipton products once again soaked up much of the domestic advertising budget, receiving about $34.2 million in measured media in 1981, up 12.1%. The bulk of the sum was spent for network and spot tv and magazines.

The most heavily supported Lipton products included Lipton tea bags ($9.2 million), Lipton soup mixes ($7.6 million), Cup-a-soup instant soup mix ($4.7 million), iced tea mix ($1.9 million) and flavored teas ($3.9 million).

Lawry's products got about $2.7 million in measured media, virtually all of it in magazines and spot tv. Lawry's seasonings got the lion's share of advertising at $2.2 million.

Lever's household products division, which accounts for about two-thirds of the company's volume, registered some gain in sales and profits in 1981. Unit figures increased only nominally, however, and all of the division's five marketing categories showed improved growth last year. These major marketing areas are detergents, soap bars, light-duty liquids, fabric softeners and automatic dishwashing liquids.

The division's four major brands—Wisk, All, Dove and Caress—continued to make up the bulk of the division's volume. Wisk liquid detergent got more than $11.5 million in measured media; All, about $10 million; Dove products about $9.5 million, and Caress soap bar, slightly more than $6 million. Advertising was concentrated in magazines, network and spot tv.

Lever Bros.' new Sunlight, a light-duty dishwashing liquid, continued its national rollout in 1981, which is expected to be completed in 1982.

Lever officials believe Sunlight can become one of the top five brands once it reaches full national distribution in the premium-price dishwashing liquid market.

Lever's biggest national entries in the category now are Dove and Lux, each holding about 3.5% of the market. Sunlight is the first major introduction of a dishwashing liquid since the mid-1970s. Sunlight received more than $1.4 in measured ad support, spread between magazines and spot tv.

Lever changed the 25-year-old Dove soap wrapper from blue to white, noting new package in tags to regular tv spots since mid-December of last year. The theme continues: "If you use Dove for seven days, your skin will look and feel softer."

The performance of Shield, launched nationally in early 1981, pointed the way to further inroads on the deodorant soap segment. Although Shield is not positioned as a "refresher" soap, but rather as a strong odor-fighter, it has achieved a 4% share in just more than a year on the market. Some of Shield's sales appear to be coming from other brands in the segment, including Procter & Gamble's Zest (8%), Coast (6.7%) and Safeguard (6%).

The deodorant soap was supported by more than $10 million in magazines, newspaper supplements, network and spot tv.

The competition for market share was fierce in Lever's personal products division. P&G's formal announcement of advanced-formula Crest sparked verbal response from both Lever and rivals Colgate-Palmolive and Beecham.

Initial competitive response from Lever included the addition of new copy on packaging for Aim, claiming that it is "unsurpassed in cavity protection." Lever wrote to all American Dental Assn. members, stating, "While the new Crest should be better than the old Crest, there is no reason to expect that it is better than Aim."

Lever also tested Close-up with fluoride in Burlington, Vt., and a mint flavor Aim. Close-up with fluoride has since been expanded nationally. Measured ad support for Aim was just over $19 million; Close-up was backed by more than $12 million, and Pepsodent received $2 million, all spread between magazines, network and spot tv. Market share figures are Aim, 10%; Close-up, 7.3%, and Pepsodent, 2.7%.

Early in 1982, Lever began testing new copy for Signal mouthwash in Portland, Ore. BBDO spots say, "Goodbye to bad breath; hello to fresh breath; do the Signal switch." Nationally, the "Kiss me, I got the Signal" theme continues with over $4 million in advertising for magazines and network and spot tv.

In the deodorant/antiperspirant market, the personal products division went national with Impulse deodorant/fragrance body spray in May, 1982, with a $13 million campaign. Impulse was tested in Rochester, N.Y., where it gained a 9.9% share of the deodorant/antiperspirant market.

Elsewhere in 1981, Interpublic Group of Cos., after three years of negotiating, purchased Unilever's holdings in the advertising agency SSC&B: Lintas International.

Union Carbide

	1981	1980
Sales*	$10,168,000,000	$9,994,100,000
Earnings*	649,000,000	672,600,000
Advertising**	90,000,000	74,311,166

*AA estimate

Union Carbide Corp., Danbury, Conn., the 58th largest national advertiser, increased domestic advertising spending by 21.1% to $90 million in 1981. This came in a year when sales gains in the company's consumer group, including Eveready batteries, Glad plastic bags and wrap and Prestone automotive products, helped to offset heavy international losses resulting from deep recession and currency devaluations in overseas markets.

Sales worldwide rose slightly to $10.2 billion, a scant 1.7% over 1980, with U.S. sales making up 69% of that figure. Earnings were $649 million, a decline of 3.5% from 1980, while operating profits rose 7.6%. However, sales of consumer products rose 6.2% to $1.9 billion.

Union Carbide manufactures chemicals and plastics, which contributed 37% to 1981 sales and 23% to income; gases and related products, 17% of sales and 26% of income, and metals and carbons, 17% of sales and 24% of income. Batteries and home and automotive products added 19% to sales and 17% to income, while specialty products contributed 10% and 10%, respectively.

International operations, which accounted for 31% of Union Carbide's 1981 sales and 28% of operating profit, suffered a 23% drop in earnings from 1980.

In 1981, Union Carbide spent 81.5% of its measured media dollars in tv, compared with 75% last year. It increased radio spending to 10.5% from 8% in 1980. Ad expenditures in print were cut to 7%, compared with the previous year's 16%, and outdoor advertising was maintained at 1% of total measured budget.

Last year, the Eveready and Energizer battery brands, holding a 50% market share, and Eveready flashlights and lamps continued to get the lion's share of Union Carbide's ad budget, measuring $28.6 million, up from $23.4 million in 1980. Of that expenditure, 84% went to tv, up from 77% in 1980.

A large portion of this hefty tv expenditure went to support Union Carbide's Energizer brand of alkaline batteries, introduced in 1980 and already a brand leader. During the peak battery-buying holiday season, tv ads regularly reminded consumers that "of all leading brands, nothing outlasts the Energizer."

One tv spot featured the Sony Walkman II as one of the many devices whose use and enjoyment are enhanced by the Energizer's long life.

Advertising on tv and in Sunday supplements encouraged consumers to "Save with the cat," the brand's symbol for more than 40 years. One print offer featured a free black cat bank or a 50-cent refund with proof of purchase. Last year, Union Carbide expanded Hispanic advertising for batteries from radio only to a combination of radio, tv and out-of-home.

The battery products division also supported reintroduction of Eveready's general purpose carbon-zinc line of batteries. Glad plastic bags and wrap received $15.8 million in measured media support, all in tv, in 1981, up 30.6% over 1980's spending level.

Glad is the market leader in the $1 billion plastic bag market, followed by Mobil Corp.'s Hefty line. In addition, Glad products are the third largest dry grocery product, behind Pampers and Tide, sold through U.S. retailers.

Tom Bosley, star of tv's "Happy Days," continued as the Glad spokesman and was featured in spots for two new products-Glad Handle-Tie kitchen garbage bags and Glad 3-ply trash bags. Glad Snap Lock storage bags underwent further market testing.

Measured spending for Prestone automotive products was up 18% to $5.2 million in 1981 and all but $122,200 went to tv, in spite of a slight decline in antifreeze sales volume.

As usual, the annual Prestone II antifreeze campaign coincided with the start of fall sports programing, including the World Series, "Monday Night Football," and various promotions related to National Football League's Superbowl.

Union Carbide's reformulated Gas Miser additive disappeared from view, despite promises of multi-million-dollar ad budgets made when the product was relaunched in 1979.

The Simoniz line of car waxes and polishes was supported by measured media spending of $691,600 in 1981, way down from the $2.2 million spent in 1980. Of that expenditure, $559,300 went to back new Simoniz SuperPoly car wax line.

U.S. Government

	1981	1980
Sales	—	—
Earnings	—	—
Advertising*	$189,026,000	$174,964,514**

*AA estimate
**Revised

Growth in the 1981 federal advertising budget, the first Ronald Reagan has influenced, slowed to 8.3% from the 18.5% rate of 1980, and the estimated governmentwide total reached $189 million. While government sponsored ads are still less pervasive in the U.S. than in some other western nations, the federal total was enough to make the U.S. Government the nation's 26th largest advertiser.

Reaganites were able to make only mid-course corrections in a 1981 spending plan worked out by Democrat Jimmy Carter and the Congress the year before. But David Stockman's team at the Office of Management & Budget immediately attacked government "flickery and flackery" with a public relations show of its own: A much ballyhooed "freeze" on government audiovisual and printed promotional products.

Millions in savings were later claimed, and dollars for some government ad assignments—almost entirely public service campaigns—were apparently squeezed from agency and department spending plans.

But military recruitment ad spending, the engine that propelled Uncle Sam into Advertising Age's top 100 advertisers' list, continues to grow.

The other major advertisers on the government list are two "quasi-public" government enterprises, the U.S. Postal Service and Amtrak, whose budgets are not under direct White House supervision. Both reported ad spending increases last year.

Military recruitment ad budgets, including Defense Department market research funds, rose last year by $20 million, or 15.8%, to $147 million, meaning that three of every four government ad budget dollars went to support armed services recruiting. This includes media buys, production costs, agency fees and other expenses associated with major ad efforts.

The budget brakes are taking hold in 1982, however, and military ad spending this year is expected to increase at a more modest 6.5% to $156.8 million. The biggest ad budget increases among the services this year were for the Army (account handled by N W Ayer, New York) and for the Defense Department's umbrella ad campaign that jointly promotes all the major armed services (Grey Advertising, New York). The Navy (Ted Bates & Co., New York) and the Marines (J. Walter Thompson USA, Washington), by contrast, took congressionally ordered ad budget cuts this year.

Military ad planners have hopes of expanding their ad budgets next year. The 1983 armed service budget requests, pending before congressional appropriations panels, propose a $20 million increase (12.6%) to $176.2 million.

The big gainers would be the Navy and Marines, who would recover from their 1982 budget losses.

The bulk of 1981's $20 million increase in recruitment spending, $13.6 million, reflected a congressional decision to stop funding the umbrella, joint service advertising campaign with cash taken from the individual armed service ad budgets.

Instead, the lawmakers approved $13.6 million specifically for joint service ads while making no reductions in individual armed service ad budgets.

The military ad budget line-up (1981/1982) looks like this: Army, Army Reserve, Army ROTC, $72.6 million/$82.1 million; Navy, $19.8 million/$17.1 million; Marine Corps and Marine Corps Reserve, $15.3 million/$14.1 million; joint service campaign, $13.6 million/$18.4 million; Air Force (D'Arcy-MacManus & Masius, New York), $15.1 million/$14.5 million; Army & Air National Guards (Needham, Harper & Steers, Washington), $7.6 million/$7.9 million; Coast Guard (Uniworld, Washington), $800,000/$300,000.

The 1983 budget requests by the military are: Army, Army Reserve, Army ROTC, $85.3 million; Navy, $23.3 million; Marine Corps and Marine Corps Reserve, $19.1 million; joint service ads, $21 million; Air Force, $15.3 million, and Army & Air National Guards, $8.7 million. The amount for the Coast Guard is uncertain.

Since the Pentagon has been easily meeting its recruitment quotas in the recession-plagued economy, its requests for more ad dollars for next year are likely to face a skeptical Congress looking for ways to cut defense spending.

U.S. Postal Service (Young & Rubicam, New York) ad spending rose from $13 million in 1980 to $15.2 million last year, as USPS tried to hold position in the intensely competitive overnight delivery service.

More than half the total is believed to have been in support of USPS' Express Mail service, though postal officials offered no specific spending figure.

Even at that rate, however, USPS is in deep water trying to keep pace with competitors like Federal Express, which is estimated to have spent $4.4 million on tv advertising in 1982's first quarter alone.

Emery Worldwide spent even more, an estimated $4.9 million in the first quarter of the year, and United Parcel Service is waiting in the wings with a new Gold Label Express service that might be backed with $20 million in ads.

Postal Service executives said their ad spending plans are up for 1982, and will likely exceed $18.5 million for the year. USPS also uses its ad budget to support its offerings to stamp collectors, its Priority Mail service, and it uses public service ads to encourage Zip code use and early mailing during the holidays.

Amtrak saw passenger volume in 1981 decline to 20.6 million boardings, down from its 21.4 million peak in oil embargo year 1979. But ad spending (Needham, Harper & Steers, New York) rolled upwards to $17.2

million from $13.8 million in 1980.

Despite the volume slip, higher fares pushed revenues to $496.5 million last year from $428.7 million in 1980. But the passenger railroad still survives only because of large scale government subsidies, which climbed to $712 million in 1981 and are scheduled to reach $735 million in 1982.

Additional amounts of federal aid are permitting Amtrak to complete the modernization of its fleet of single-decker cars in the East: 75 of the $1 million-per-copy cars were delivered last year and another 75 are to be received in 1982. Last year saw the last of 284 new double-decker cars, worth $312 million, delivered for service west of Chicago. Ads appearing in western markets this summer urged travelers to try "the Superliner experience" on the new double-decker cars.

There was a change at the top for Amtrak this year, with president Alan S. Boyd, its chief for the past four years, departing to head a new venture exploring the prospects for privately owned, very high-speed short haul passenger rail service. Replacing Mr. Boyd is W. Graham Claytor Jr., the former chief of the Southern Railway. He has been in private law practice since holding a series of Cabinet posts in the Carter administration.

Federal government dollars also help promote the Public Broadcasting Service's national tv offerings. But federal aid to public broadcasters, funneled through the Corp. for Public Broadcasting, is under tremendous budget cutting pressure from the White House.

CPB last year made $3.5 million available for tune-in advertising, $1.3 million for a direct buy in *TV Guide*, and the remainder for a co-op ad program with participating local tv stations. CPB tune-in ad support for 1982 is not expected to top $2.5 million.

Government purchases of measured media last year grew to $86.3 million from 1980's $84.2 million, with $36 million of the governmentwide buy going to spot and network television and $23 million to network and spot radio. The Army, with the biggest media budgets, was the biggest broadcast advertiser among the government units for the year, with $14.1 million spent in network tv and $7.7 million in network radio. Amtrak and the Postal Service were active in broadcast advertising last year as well.

Cable tv is beginning to make its appearance on the government buy list, with the Marines budgeting $470,000 for the new medium this year. Cable experiments last year involved the Navy ($180,000), Coast Guard ($80,000) and Postal Service ($34,000).

Magazines had led the government's media buy list in the 1970s, when tv and radio buys were not allowed by Congress. But in 1981 they slipped to third place, with governmentwide puchases put at $19.3 million from $26 million the year before. But magazine spending by the Army, off in 1981, is rebounding this year, and the joint military recruitment ad program is sharply expanding its magazine schedule to about $4 million this year from 1.2 million a year ago.

Newspapers picked up $2.2 million in purchases from the Army and $1.6 million from the joint military ad campaign last year, but newspapers are not on the national budget plan for those accounts in 1982. Amtrak, with its need for destination advertising, remains a regular newspaper advertiser with spending at $2.6 million last year.

Actual media spending is higher than reported here since the military distributed $18.2 million in funds to regional and local recruiting commands. Much of that was used for media purchases not reported as part of the national media schedule.

The federal budget crunch fell most heavily on the remainder of the government's advertising program: The small public service campaigns conducted by scattered agencies throughout the government. Some were snuffed out in the "freeze" of 1981; still more are likely to fall by the wayside before this year is out. Once active Energy department conservation ad campaigns are gone. The Consumer Product Safety Commission, which had spent up to $500,000 a year through various ad agencies on safety campaigns, is winding up its programs this year. The Consumer Information Center, which promotes the availability of free and low-cost government booklets, canceled plans to produce a new flight of public service ad materials.

When the 1983 tax season rolls around next spring, the Internal Revenue Service will be recycling old ads urging Americans to file early. There's no money in the budget to produce new ones.

But there is talk of a few scattered new starts: A White House supported campaign on the importance of productivity; a Transportation Department drive to increase seat belt use (rather than require automatic air bags). Many of these small accounts have been a source of business for agencies both in and out of Washington.

Some of the government's longest running public service campaigns are managed by the Advertising Council, and are awarded to the council by the government without competitive bids. The council, which first took on government assignments as an ad industry public service during World War II, supplies the government with volunteer agencies that provide creative services at no cost. The government pays for production and distribution costs.

The Ad Council reported it received $1.3 million in 1981 for its government campaigns.

Agency changes among the major government accounts are rare. In competitive bidding this year, Uniworld, Washington, unseated Henry J. Kaufman & Associates, Washington, on the Coast Guard account. The Navy consolidated a minority recruiting assignment at Bates, dropping Burrell Advertising, Chicago, from its agency roster last year.

The Marine Corps, conducting a competition this year, is expected to retain JWT, the long-time incumbent, on its account. Regularly scheduled competitions are likely next year on the National Guard (Needham) and military recruitment joint advertising (Grey) accounts.

Volkswagen of America

	1981	1980
Sales*	$16,118,505,500	$18,390,000,000
Earnings*	57,968,700	177,300,000
Advertising**	$1,000,000	70,000,000

*Volkswagen Group, worldwide

**AA estimate

Volkswagen of America, Warren, Mich., a subsidiary of Volkswagenwerk AG, Wolfsburg, West Germany, increased its advertising spending in 1981 by 16% to $81 million, making it the 67th largest national advertiser.

The parent company's sales for 1981 were $16.1 billion, compared with $18.4 billion in 1980. Earnings plummeted 67% to $58 million from $177.3 million as a result of a number of factors. These included varying trends in individual markets; strengthening of international competition; the depressed state of auto sales in South America, and losses in the Triumph Adler office equipment subsidiary. Substantial investment costs for new product lines and costs associated with modernization of plants also accounted for declines in the company's 1981 results.

Volkswagen of America last year saw sales decrease to 272,412 units from 293,595 in 1980. The line last year included domestically produced Rabbits and pickup trucks, Rabbit convertibles, Jettas, Dashers, Sciroccos and Vanagons. Its 1982 line features a restyled Scirocco and a new flagship model, the Quantum, which replaces the Dasher.

Volkswagen also introduced limited edition Rabbits and pickups and Vanagon GLs and announced a price rollback of up to $625 on Rabbit, pickup and Jetta models.

In order to stem its declining fortunes in the U.S., VW has turned away from a policy that for some years saw the company striving to project itself as a domestic car company. The company this year undertook a reorganization in the U.S. that, among other things, is designed to reestablish its image as a German car maker.

Concurrent with the strategy shift was the formation of a new Volkswagen division, headed by James R. Fuller, formerly vp in charge of the Porsche-Audi division.

In a recent interview, Mr. Fuller reinforced the company's redirection when he observed, "We're a German company that happens to build cars in the U.S."

The company's current advertising emphasis focuses on its imported cars—the Jetta, Quantum and Scirocco. It is designed to capitalize on a segment that in the U.S. market is stronger than the economy car segment.

Although the division plans to continue promoting the Rabbit along with the price reduction that has been in force for four months, the goal of its new campaign is to stress that the U.S.-produced Rabbit has the same personality as cars built in Germany.

In addition, a divisional position is gradually emerging that will be more brand-oriented than model-oriented. Also a major goal of the effort is to present VW autos as providing all-around performance, not simply fuel economy.

For the first five months of 1982, sales of domestically produced Rabbits dropped to 38,311, compared with 72,775 for the same period last year. As a group, imported Volkswagens had unit sales of 26,709 for the first five months of 1982, a decrease from 37,785 units for the same period in 1981.

Porsche-Audi division sales for the first five months of 1982 showed Audi at 18,492, compared with 20,221 for the 1981 period, and Porsche with 5,569 units sold, compared with 4,919 in the same period a year earlier. In 1981, Porsche sales increased to 11,241 from 10,490 in 1980. Audi sales also increased to 50,817 from 42,483 in 1980.

When the 1983 model launch occurs this fall, VW plans to place additional emphasis on the Rabbit.

The Rabbit line will be bolstered with a new model, which is expected to be the GTi, a performance model now available in Europe.

Volkswagen's 1982 models were introduced in late October of last year. Support included network and spot tv, in addition to magazine spreads. Tv commercials pointed out VW's high technology features by using the umbrella theme, "Nothing else is a Volkswagen." And because research indicated that VW meant technology, the company keyed on that in ads.

While the campaign registered outstanding research scores, by early spring of this year it became apparent that too many car advertisers were relying on technology as their ad focus. To break away from the pack, VW returned to advertising that once again restored the personality of VW cars.

To encourage increased local spending on the part of its dealers, the company established a new advertising matching fund with contributions from the national budget going to local market areas.

In the last quarter of 1981 and the first quarter of 1982, the Porsche-Audi division celebrated 50 years of front-wheel drive for Audi vehicles. The anniversary was promoted through tv and magazine ads, along with major market newspaper ads.

Two major advertising introductions for the Audi line in 1982 were for the 1983 Audi 5000 turbo diesel and the 1983 Audi Quanttro. German engineering, luxury and innovative styling are embodied in both models. The campaigns involved network tv, radio, newspapers and national magazines.

Porsche national advertising continued with the technical paper series for the 924, 911 and 928 models. The introduction of the newest Porsche, the 944, broke last spring via network tv, magazines, cable tv, radio and newspapers. The ads invited potential buyers to test drive the new model.

According to Leading National Advertisers, VW invested slightly more than $20 million to advertise its Rabbit line in 1981. The figure was more than $4 million above the 1980 ad spending level. LNA totals for other models in 1981: Audi, $11.6 million; Jetta $7.9 million, Scirocco, $1.5 million; VW trucks, $4.5 million; Porsche, $6 million, and Vanagon, just over $1 million. In addition, $2.5 million went for general promotion, plus $4.2 million for VW passenger cars.

Hiram Walker Resources Ltd.

	1981	1980
Sales*	$2,945,300,000	$2,563,400,000
Earnings*	250,100,000	238,500,000
Advertising**	42,285,000	31,863,800

*Fiscal year ends Sept. 30
**AA estimate

Hiram Walker Resources Ltd., Toronto, Ont., the 95th largest national advertiser, raised advertising expenditures to $42.3 million in 1981, a 32.7% increase over 1980.

In a year of high interest rates, inflation, declining sales volume for distilled spirits, reduced mining income and the acquisition costs of oil and gas properties, Hiram Walker's sales increased by 14.8% and earnings advanced 4.4% over 1980 levels.

Hiram Walker Resources Ltd. is a holding company, formed in 1980, that owns Hiram Walker-Gooderham & Worts Ltd., Home Oil Co. Ltd. and Consumers' Gas Co. Ltd.

The natural resource segment, Home Oil, was expanded in 1981, leading to substantial acquisitions of gas and oil properties from the Davis Oil Co. (the $737 million worth of properties are primarily in Wyoming, Oklahoma, Louisiana and Texas), resulting in Hiram Walker's owning 1.8 million net acres, making it the largest Canadian holder of U.S. exploration and production acreage. The company's natural resource assets are about evenly divided between the U.S. and Canada.

In 1981, Hiram Walker's total assets were broken down this way: Forty-three per cent in natural resources, 31% in distilled spirits and 26% in gas utility. This compares with 1980 figures of 30%, 40% and 30%, respectively.

Earnings for 1981 are not completely comparable with those of 1980, as the Home Oil Co. results were only consolidated for nine months in 1980.

However, while sales from natural resources increased 32.6%, from $112.5 million in 1980 to $149.2 million in 1981, earnings dropped 10%, from $92.1 million in 1980 to $82.9 million.

Earnings from distilled spirits advanced 4.8% in 1981, up from $250.9 million in 1980 to $263.1 million, on sales of $211.5 million, up 6.8% from $198 million in 1980.

The greatest increase in Hiram Walker earnings came from a gas utility, Consumers' Gas, with an 18.4% jump from $90.7 million to $107.4 million in 1981.

Hiram Walker announced net income of $96.4 million for the six months period ended March 31, 1982, a 35% decline from $148.7 million for the same period in 1981. Funds from operations for the first six months show an 11% increase to $271.3 million from $244.2 million for the same period in 1981.

In the six months period ending March 31, Consumers' Gas earnings increased due to the cold winter and more customers, distilled spirits earnings declined because of lower sales volume and depressed economic conditions, and Home Oil earnings were down due to higher taxes and reduced demand for oil.

As one of the world's largest distillers, Hiram Walker manufactures products in Canada, the U.S., Scotland, France, Mexico and Argentina.

Hiram Walker markets more than 100 of its own liquor brands worldwide and acts as an agent for marketing additional international brands. The U.S. accounts for 58% of sales, Europe 26% and Canada 16%.

Principal brand names sold in the U.S. are Canadian Club, Gooderham's Rich & Rare, Hiram Walker cordials and fruit flavored brandies, imported liqueurs (Praline, Drambuie, Tia Maria, Kahlua and Venetian Cream), Two Fingers tequila (White and Gold), Two Fingers Limitado, Ten High bourbon, Lauder's scotch, Ballantine's scotch, Old Smuggler scotch, Imperial Blended whisky, Walker's Deluxe bourbon, Walker's Northern Light Canadian, Royal Canadian, Hiram Walker's Crystal Palace gin and vodka, Booth's High and Dry gin, Courvoisier and Salignac cognacs, Hiram Walker's brandy and imported wines represented by Frederick Wildman & Sons Ltd.

In the U.S., W.A. Taylor & Co., Miami, a wholly owned subsidiary of Hiram Walker Resources, has responsibility for the importing and marketing of premium distilled spirits.

The Taylor Co. product line includes Courvoisier, brand leader in the cognac category; Drambuie, Tia Maria, Venetian Cream and Peter Heering, all imported liqueurs, with the first three among the top 10 best-selling brands in the category; Old Smuggler scotch, the sixth best-selling scotch in the U.S.; Booth's gin, the fifth highest-selling domestic gin; Laird's Applejack, the oldest distilled spirit in the U.S. and the leading brand of applejack/apple brandy, and Maker's Mark whisky, a premium bourbon.

Advertising expenditures for W.A. Taylor increased 11%, from $9 million to $10 million in fiscal 1981, which ended Aug. 31 of that year.

In the past decade, whisky's share of the distilled spirits market has declined from 65% to 49%, while nonwhiskies—vodka, rum and liqueurs—increased from 35% to 51%.

In the period from 1980 to 1981, in response to the growing market preference for white goods and liqueurs and the decrease in brown goods consumption, Hiram Walker made a substantial capital investment to restructure plant and distribution facilities.

In late 1981, construction was nearly completed on a $70 million plant at Fort Smith, Ark., to blend and bottle the popular liqueurs. The Fort Smith plant is to replace the liqueur bottling and blending operation that was closed—a fully integrated facility the company had in Peoria, Ill. The 1980 sale of the Peoria plant's distillery portion marked the end of Hiram Walker as a U.S. distiller.

Taking advantage of the shift in liquor preferences, Hiram Walker boosted 1981 advertising expenditures for cordials by 43.7% to $2.3 million from $1.6 million—all in magazines, except $3,000 outdoor. Maintaining leadership of America's cordial line with 35 brands, Hiram Walker recently added several new products to the growing Schnapps category: Cinnamon Schnapps, Spearmint Schnapps and a 90 proof Peppermint Schnapps.

Though the liquor industry remained flat, Hiram Walker continued to have a share of the top-selling brands—those selling 1 million or more cases. As a result of a 12% investment interest in the Bacardi group of companies,

Hiram Walker participated in the 10% growth of the rum market. In 1980 and 1981 Bacardi was the No. 1-selling liquor, with a 3% increase from 6.3 million cases sold in 1980 to 6.5 million cases sold in 1981.

Hiram Walker brandy sold 1.4 million cases in 1981, up 4% from the 1.3 million cases sold in 1980.

Walker's U.S. Kahlua sales position jumped from 25th to 18th (Kahlua is the largest-selling liqueur in Canada) with a 4% increase from 1.5 million cases sold in 1980 to 1.7 million in 1981. Advertising expenditures for Kahlua climbed 75% from $2 million in 1980 to $3.5 million in 1981— $2.8 million in magazines and $760,000 in outdoor.

Measured media expenditures for Praline liqueur increased 37% from $1 million in 1980 to $1.4 million in 1981, all in magazines.

In March, 1981, magazine ads for Praline were pitched around the broadcast restrictions placed on the liquor industry. A toll-free number gave callers a musical response for party themes and recipes using Praline liqueur. The ads were placed in women's and life-style magazines via McCaffrey & McCall, New York.

Original Venetian Cream, introduced in 1980 by W.A. Taylor Co., was the beneficiary of a $1 million ad campaign via J. Walter Thompson USA, New York, in November and December.

This compares with the budgets of other entries in this hot liqueur category—$2 million Christmas budget for category leader Baileys Irish Cream and $1.7 million spent in the last quarter of 1980 by Renfield Importers for its Carolans.

While the time-consuming process of combining alcohol and cream in a single bottle has held sales volume down in the past, *Impact*, a liquor industry newsletter, reported 1980 case sales at 353,000, up from 17,000 cases sold in 1979.

Impact estimates 1981 case sales of well over 1 million, and estimated sales of 1.6 million cases in 1982. Baileys is expected to continue as the far and away front-runner, with 58% of the market, while Venetian Cream holds an estimated 6% market share in 1981 and 1982. Carolans had an 11% share in 1980 and 6% in 1981.

Measured media expenditures in 1981 for Venetian Cream totaled $956,000, with $796,000 in magazines, $48,000 in newspaper supplements and $111,000 outdoor.

Tia Maria media expenditures escalated 36% to $2.6 million from $1.9 million in 1980, with $2.3 million in magazines and $289,000 outdoor.

Drambuie media outlay was $1.9 million in magazines, $99,000 in newspaper supplements and $140,000 in outdoor, for a total of $2.1 million, up 17% from $1.8 million in 1980.

Peter Heering liqueur media expenditures dropped from $197,000 in 1980 to $144,000 in 1981.

In 1982, a new campaign was introduced for Canadian Club, one of Hiram Walker's best known brands and the subject of the much publicized "find the case" promotions held in different locations throughout the country. The new campaign describes CC as right for the 1980s, upscale and prestigious. The ads focus on those special moments when "Only the best will do." The campaign uses research findings that show consumers see CC as a premium whisky. All ads bear the signature "Canadian Club. The best in the house."

While Canadian Club decreased 3% in case sales, from 3.8 million in 1980 to 3.7 million in 1981, it remained the fourth-largest selling liquor brand in the U.S. (Canadian Club is the largest-selling brand in Canada.)

Media expenditures for Canadian Club increased by 30% in 1981 from $8.7 million in 1980 to $11.3 million—$7.5 million in magazines and $3.8 million in outdoor.

Two Fingers tequila media expenditures dropped in 1981 from $565,000 in 1980 to $423,000. Magazine accounted for $307,000 and outdoor $115,000. A pinup-type poster offer generated thousands of requests from the 18-to-24 target audience.

Royal Canadian, the No. 1-selling brand of Canadian whisky in Michigan, is being expanded to Ohio, Pennsylvania, Oregon and Washington. Media expenditures went from $341,000 in 1980 to $476,000 in 1981—$356,000 in outdoor and $120,000 in magazines.

Lauder's scotch is one of the fastest growing bottled-in-U.S. scotches. Along with Old Smuggler scotch, which jumped 45% in cases sold in 1981 over 1980, Lauder's is one of the few scotch whiskies to show growth in the category.

Media expenditures for Lauder's went from $570,000 in 1980 to $644,000 in 1981, up 13%—magazine received $382,000 and outdoor got $262,000.

Walker's Imperial blended whisky and Ten High straight bourbon whisky were 30th and 21st, respectively in 1981 sales of top liquor brands. Ten High dropped from 1.6 million cases sold in 1980 to 1.5 million in 1981. Imperial decreased from 1.1 million cases in 1980 to 1 million in 1981.

In 1981, Hiram Walker purchased Callaway Vineyard & Winery, Rancho California, Cal. Significant national expansion is planned in about two years for the brand, which is currently limited to West Coast distribution.

In major personnel moves, H. Clifford Hatch Sr. assumed the responsibilities of president and chief executive officer of Hiram Walker Resources Ltd. earlier this year. Mr. Hatch remains

chairman, while W.P. Wilder moves into the newly created position of deputy chairman and continues as a member of the board as well as chairman of the Consumers' Gas Co.

Meanwhile, in early 1982, Hiram Walker Distributing Co. of Des Plaines, Ill., paid a $20,000 fine in order to settle a charge made by the Federal Bureau of Alcohol, Tobacco & Firearms for illegal payments to underwrite newspaper advertising for Foremost Sales Promotions, Chicago.

Warner Communications

	1981	1980
Sales	$3,237,153,000	$2,059,414,000
Earnings	228,493,000	137,091,000
Advertising*	159,000,000	82,326,000

*AA estimate

Warner Communications, New York, the 37th largest national advertiser increased its advertising by a whopping 93.1% over 1980 to an estimated $159 million in 1981.

The major share of increases in advertising spending came from Warner's consumer electronics division, which includes Atari Inc. However, a substantial amount was also devoted to the release of major films, including "Arthur," "Outland," "Sharkey's Machine," "Superman II" and "Rollover."

The company reported that worldwide advertising spending more than doubled to $364.4 million in 1981, from $179.7 million in 1980.

Revenues for the year increased by 57.3% to $3.24 billion from $2.06 billion in 1980. Operating income jumped by 65.2% to $226.5 million from $137.1 million in 1980.

The pace continued into 1982, as net income during the first six months of 1982 jumped by 58.6% to $146.1 million from $92.1 million a year earlier. Revenue showed a 43.7% gain to $1.84 billion in the first six months from $1.28 billion over the same period in 1980. The record results were largely the result of the consumer electronics division, led by Atari, which nearly tripled its operating profit to $111.8 million from its 1981 level.

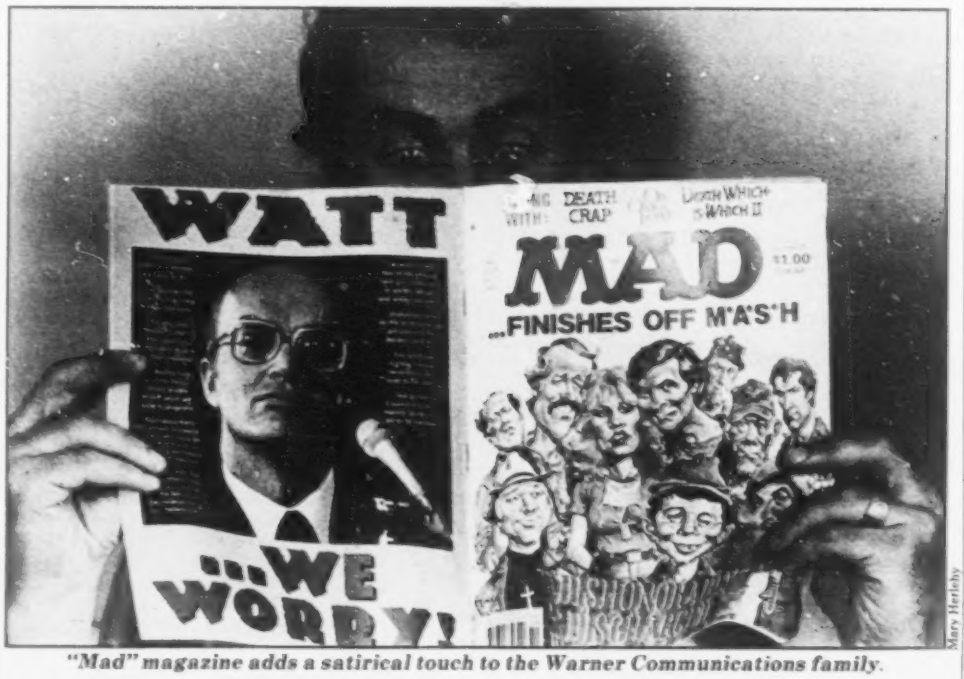
The dramatic revenues in 1981 also came from the consumer games divisions, but the newly acquired Franklin Mint contributed substantially as well. By contrast, the traditionally strong recorded music and music publishing division showed only modest increases. Also the filmed entertainment division bounced back from a dismal 1980 performance to record all-time high revenues of $755.2 million.

For the second year, the revenues of the consumer electronics division, led by the runaway success of Atari, doubled to reach $1.23 billion. Net income more than quadrupled to $286.6 million. Atari's consumer and coin-operated videogames were the major reasons these gains were recorded. Not surprisingly, the advertising support given to Atari rose spectacularly. Measured media spending for the entire division amounted to $27.9 million. Of this amount, $20.3 million went to network tv, while $3.9 million went to spot tv. The company expects this expenditure to more than double in 1982.

Warner said Atari's Video Computer System (VCS) game hardware units and home computers were completely sold out at retail in 1981. However, the company's ability to produce cartridges was strained throughout the year as software sales to both new hardware buyers and old owners rose more rapidly than expected.

In response to the problem, the company expects to increase software capacity at both its El Paso, Tex., and Fajardo, P.R., plants. Some of the software demand problem might also be met by other companies that have begun to manufacture compatible cartridges. In fact, the company sees this development as a further stimulant to hardware sales.

Atari expects to introduce 12 new cartridges during 1982—one a month. Included in this are the home version of "Pac-Man," a game that has already won phenomenal acceptance in the coin-operated area, "Defender," "Berzerk" and "Super Breakout."



"Mad" magazine adds a satirical touch to the Warner Communications family.

Bright spot in the nation's sunbelt.

The company says the introduction of all these games is being supported by heavy national tv advertising. By the end of 1981, Atari's two best-selling cartridges had shipped amounts in excess of 70% of all the vcs units ever sold. By the end of 1981, Atari had shipped more than 1 million units of 13 different cartridges.

Atari's coin-operated videogames division also had a record year with best-sellers being "Centipede," "Tempest" and "Deluxe Asteroids." However, none could match the spectacular success of "Asteroids" in 1980. The division's growth has been built entirely on internally developed products until now, but in 1982, it is beginning to selectively license games from outside developers.

The year 1981 also saw the emergence of Atari's home computers, which were backed by extensive advertising. The measured media spending of the division amounted to $4.7 million and was equally distributed among magazines, national and spot tv.

In May, the Atari 400 was packaged for the mass market, and its price was lowered. The result, Atari noted, was a product that sold itself at retail with little or no instore demonstration. Late in 1981, the Atari 800 was also packaged for the mass market, with similar cost savings allowing its price to be lowered.

To aid in the computer sales, Atari also established the Atari Program Exchange (APX) in Sunnyvale, Cal., and Cambridge, Mass. The company expects to add a few more in 1982. These exchanges make Atari computers available and provide training to programers in order to allow them to develop more effective home computer programs.

Beyond electronics, Warner in March, 1981, acquired Franklin Mint for nearly $220 million in securities and cash. One of the largest direct response marketing companies in the world, Franklin Mint generated $359.4 million in revenues for Warner and net earnings of $30.9 million in 1981. During the year, Franklin Mint offered more than 230 items, which were supported by more than $110 million in advertising and promotion. The measured media spending for the division, including Franklin Library, was $19.2 million.

Of the various product lines marketed by Franklin Mint, porcelain collectibles were the largest. Popular porcelain offerings included collections of miniature vases, hand-painted sculptures, series of theme-oriented thimbles and plate collections depicting woodland animals and flowers.

In the movie front, 1981 was a mixed year. The revenues of the filmed entertainment division bounced back after a dismal 1980, but operating income continued to decline. The division's income of $24.8 million was only 40% of the 1980 earnings of $60.8 million.

Warner Bros., the principal operating subsidiary of Warner Communications in the field of motion pictures and television, released 18 feature films in 1981. Of these "Superman II" generated worldwide rentals in excess of $96 million; "Any Which Way You Can" earned rentals of approximately $34 million, and "Excalibur" earned more than $23 million. "Private Benjamin," "The Shining," "Altered States" and "Outland" also fared well.

However, there were some releases that did not fare so well. These included "Wolfen," "Under The Rainbow," "Looker," "So Fine," "Rollover," "Sphinx" and "The Hand."

The motion pictures did not lack for advertising support. The measured media spending amounted to $30.0 million, most of which was concentrated on network and local television.

Warner expects two 1981 releases to have a positive impact on 1982 results: "Chariots of Fire," which won seven Academy Awards, including best picture, and "Sharkey's Machine."

It also has a strong lineup of new releases for 1982. They include "Firefox," starring Clint Eastwood; Woody Allen's "A Midsummer Night's Sex Comedy"; "The World According to Garp," and Norman Jewison's "Best Friends," starring Goldie Hawn and Burt Reynolds.

Despite the mixed results in the U.S., international revenues reached a record high for Warner in 1981. The total of $139.9 million was helped by the worldwide success of "Superman II," "Private Benjamin," "Excalibur," and the foreign-only release of "Supersnooper," a coproduction with Columbia Pictures Industries.

With the rapid expansion of cable tv and the pay television field and an increased demand for product by conventional tv, Warner Bros' library of feature films has taken on additional value. As of Dec. 31, 1981, Warner Bros. had approximately $371 million of signed contracts for lease of feature films, cartoon programs, syndicated series and "made-for-tv" movies to pay television and tv. This will be recorded as revenue in 1982 and beyond.

Last year was also a good year for Warner's television programming. It produced two of the top 10 series on tv—"The Dukes of Hazzard" and "Alice"—both on CBS. Other shows that made their debut in 1981 included "Bret Maverick," "Private Benjamin," and "Love, Sidney." Warner Bros. Television has 31 films and miniseries in advanced stages of development, including nine hours of "The Thorn Birds."

Warner's traditional area of strength—its recorded music and music publishing division—had alltime high revenues of $811.3 million in 1981, slightly ahead of the $805.7 million in 1980. Operating income increased only slightly, from $82.9 million in 1980 to $85.0 million in 1981.

Warner said its WCI label, traditionally the industry leader in rock music, has also become a strong force in black music, country music and jazz, as illustrated by *Billboard's* year's end album charts. WCI releases led the industry with 29% of the top-selling records in 1981. Among the most popular records were albums by AC/DC, Foreigner, the Rolling Stones and Stevie Nicks. Other artists, including Eddie Rabbitt, Grover Washington Jr., Steve Winwood, Phil Collins, Genesis and Al Jarreau, also had extremely successful years.

In spite of its relatively successful year, Warner remains concerned about the proliferation of home taping and its impact on revenues. WCI research indicates that American consumers bought 250 million blank tapes to record copyrighted music material. The value of this copyright material was estimated to be in excess of $2.8 billion at retail. The record division's measured media spending came to $379,900, most of which was placed in magazines.

Meanwhile, even though total revenue figures do not reflect major gains for Warner's cable communications division—it had revenues of $177.2 million and no operating income—the year was a significant one for its joint venture with American Express. Indeed, both Warner Amex Cable Communications (Warner Amex), the operator of cable systems, and Warner Amex Satellite Entertainment Co. (WASEC), a producer and supplier of satellite-distributed programing for cable, had good years.

The number of Warner Amex cable system subscribers increased by nearly 128,000 to 860,000, and total pay subscriptions doubled to 545,000. With the addition of 26 franchises, the number of homes under franchise grew by 675,000 to 3.4 million—a 91% increase in two years. There has also been a rapid expansion of Qube, Warner's two-way interactive cable system. First launched in Columbus, O., Qube has now been installed in Warner Amex cable systems in Cincinnati, Pittsburgh, Dallas and Houston. Qube has been an advantage to Warner Amex' franchise struggles and has given it a strong edge in close franchise contests.

The Qube system opens up a multitude of uses for cable. A Qube subscriber can respond to multiple choice queries, indicate specific preferences or even ask for additional data when needed. Every few seconds a master computer scans the user homes and tallies the responses.

Warner-Amex has used Qube for exotic as well as mundane purposes. It has been used for choreographing dances, videogames, scoring boxing bouts, calling football plays. It has also been used for electronic funds transfers, fire and security alarms, shopping at home and video newspaper delivery.

For WASEC, 1981 was a year of consolidating old product lines and offering new ones. Both "Nickelodeon" and "The Movie Channel" registered strong subscriber increases. "Nickelodeon," a channel designed specifically for children and young adults, increased its audience by 136% to 6.3 million subscribers in 1981. "The Movie Channel," the first pay channel offering filmed entertainment on a 24-hour basis, had 1.7 million subscribers, nearly nine times its subscriber total of 1980.

In August, WASEC launched a contemporary video/music network called MTV: MusicTelevision after a year of planning. MTV was launched with about 30% of its national ad availabilities sold.

Among those buying spots were Majestic school binders, Dolby Labs, Atari, Warner-Lambert, Gap Stores, Jovan, Warner Bros., 20th Century-Fox, Universal Pictures, Avco Embassy and United Artists. At the end of 1981, MTV was being provided to nearly 2.5 million subscribers.

The publishing division's revenues of $84.2 million were its best ever, up 17% for 1980, while operating income of $14.9 million was second only to 1979's record results.

In its second year as a hardcover publisher, Warner placed three titles on the national best-seller list: Richard Simmons' "Never Say Diet"; Andrew Greeley's "The Cardinal Sins," and Jackie Collins' "Chances." "Never Say Diet" sold more than 500,000 copies and was on the nonfiction best-seller list for over a year.

It was also a year of revenue increases for DC Comics, buoyed by the licensing fees from "Superman II." For Warner Books, the total measured media spending for the year amounted to $553,400.

Warner Cosmetics had substantial sales growth in 1981 as a new three-part cosmetics line was successfully introduced. However, the heavy expenses associated with the development and introduction of new product lines precluded any profit for 1981.

Each of Warner's fragrance lines had increased 1981 sales. Polo ranked among the top five women's fragrances. Chaps was rated No. 4 among popularly priced men's fragrances. The company spent $3.5 million in measured advertising for Chaps, mostly on network tv; $332,300

Warner-Lambert Co.

	1981	1980
Sales	$3,379,092,000	$3,479,207,000
Earnings	9,222,000	192,716,000
Advertising*	270,400,000	235,202,000

*AA estimate

Warner-Lambert Co., Morris Plains, N.J., the 12th largest national advertiser, increased its domestic advertising nearly 15% to an estimated $270.4 million in 1981.

Worldwide sales fell 3% to $3.38 billion, while earnings plummeted from $192.7 million to $9.2 million because of what the company said was "a negative impact from currency adjustments" and nonrecurring charges resulting from the implementation of the company's "strategic plan."

Sales in the first six months of 1982 totaled $1.65 billion, down 4.1% from $1.72 billion in the first half of 1981. First-half earnings rose to $90.8 million in 1982, a dramatic increase over the $57.7 million loss the company suffered in the first six months of 1981. Warner-Lambert reported a loss in the first quarter of 1981 after writing off $194.8 million before taxes. The writeoffs resulted from the company's restructuring, the sale of some product lines and the phaseout of a consumer products plant in Long Island City, N.Y.

In fact, as part of a strategic review of its operations, the company discontinued or disposed of several operations and reorganized and consolidated others.

Ward S. Hagan, chairman and chief executive officer, told securities analysts in mid-July that Warner-Lambert would experience double-digit growth for the year. Consumer products, he said, had shown "encouraging gains" during the second quarter after a slow start; prescription product sales were up 14% for the first six months, as were international sales, despite the foreign currency translation.

Mr. Hagan said he expects IMED Corp., acquired in June, to be one of the fastest-growing operations in the company. IMED, purchased for a reported $465 million, is in the $1.7 billion pharmaceutical market. Sales at IMED are expected to exceed $100 million in 1982, achieving net after-tax earnings of $20 million, Mr. Hagan told the analysts. He also predicted sales would increase 46% a year through 1985 at IMED because of new instruments and entry into the general care areas of hospitals.

In 1981, the Warner-Lambert's "strategic plan" included the divestiture of American Opticai's vision care, soft contact lens and industrial product lines; they were sold in the second quarter of 1982. It also included the sale of Warner-Lambert's hospital disposable and surgical dressing product lines, the phaseout of operations at the Long Island City consumer products manufacturing plant and the phaseout of certain low-volume consumer products.

The healthcare business, which accounted for 61% of worldwide sales last year, is composed of two segments: Ethical products and nonprescription products. Ethical products sales increased moderately, benefiting from the introduction and wider acceptance of new pharmaceutical products in domestic markets. These products include Meclomen, an anti-arthritic; Centrax, a minor tranquilizer; Procan SR, an antirhythmic, and ERYC, an antibiotic. Higher revenues from the diagnostic, empty capsule and hospital product lines also contributed to over-all sales growth.

Last December, Warner-Lambert won approval from the Food & Drug Administration to market its Lopid, a prescription medicine for lowering the level of triglycerides in blood. At the time W-L received approval, a company official was quoted as saying, that the drug was a "groundbreaker" and the company's "most significant new product entry." The FDA, in approving Lopid, said it was similar to another cholesterol-lowering drug, which has been the object of some controversy.

In yet another move, Warner-Lambert acquired the worldwide rights to develop and market two experimental anticancer compounds developed by Viratek Inc., a unit of ICN Pharmaceuticals.

Sales of W-L's nonprescription healthcare products totaled $803 million in 1981, up 5% over 1980. The principal products in this segment are mouthwashes, cough/cold medications, denture products, vitamins, antacids and a pregnancy test for self-diagnosis.

In keeping with the growing trend toward self-medication as a means to control health costs, W-L said it will be emphasizing nonprescription products and is exploring new opportunities in other parts of the world.

The company maintained its leadership position in the $300 million-plus U.S. mouthwash market. Its Listerine and Listermint continue to hold the No. 1 and No. 3 spots, respectively in the category. Procter & Gamble's Scope is the No. 2-selling brand.

Listerine ended the year with slightly higher market share, and plans call for Listermint to be marketed in the U.S. later this year in a new lightweight, shatterproof container for added safety and consumer acceptance.

Listermint has been well accepted in new international markets. A fluoride-containing Listermint, originally marketed in Canada, has performed well in new international markets. In

Homesick New Yorkers! Warner-Lambert's Entenmann's is now in 33% of the U.S.

1981, it was introduced in six additional countries in Asia and Latin America.

Among other nonprescription products, W-L claimed to be the market leader in five major domestic personal healthcare product categories.

These were Sinutab, sinus relief preparations; Efferdent, denture cleanser cleaner tablets; Rolaids, convenience antacid; Halls cough drops, and e.p.t., early pregnancy test for home diagnosis.

Measured media spending in 1981 for the products in these six categories—including Listerine and Listermint—totaled nearly $51 million: Sinutab, $5.78 million; Efferdent, $6.3 million; Rolaids, $11.4 million; Listerine, $11.2 million; Listermint, $7.5 million; Halls, $5.2 million, and e.p.t., $3.2 million.

Sales of Halls cough drops were exceptionally strong in many countries. In the U.S. sales increased by more than 25%. The company attributed the increase in part to the addition of a new ice-blue flavor.

Efferdent accounted for more than 50% of total sales in the category last year. Although the market seemed to stabilize, W-L reported that its e.p.t. in-home early pregnancy test, dramatically increased its leading share of market.

The sale of W-L cough/cold preparations also improved in 1981, aided by the reintroduction of Benylin cough syrup in the large U.S. over-the-counter (otc) market.

The decision by the FDA to permit nonprescription sale of Benylin followed a seven-year battle by the company to substantiate the effectiveness of the product.

W-L scientists developed a novel test protocol to prove that Benylin acts on the cough center of the brain.

In 1979, the agency said it planned to withdraw the drug's new drug application, saying it wasn't effective. That move would have taken it from the market altogether. At the same time the FDA offered to review any new data about the product. Parke-Davis, W-L's pharmaceutical division, conducted the additional tests, which resulted in FDA approval.

Benylin was reintroduced with a $4.8 million ad campaign last October, in time for the 1981-1982 cough/cold season. Initial sales, the company said, exceeded anticipated levels.

Myadec, W-L's leading product in the $330 million vitamin market, reported a steadily increasing market share since the start of tv advertising in 1980.

In the sugarless gum arena, W-L claimed to have regained the No. 1 position with its Trident gum. But those figures apparently are based on warehouse withdrawal figures for the four-week period ended Feb. 6.

Those figures show that Trident held a 10.7% share of the total gum market and Life Savers' Care*Free had 8.8%. But for the 52-week period ending the same date, Trident still trailed Care*Free. The same source shows Care*Free with an 11.7% share and Trident with 10.3%.

Regardless of actual positioning, it is clear that Trident has improved its market share. Sales growth was aided by increased tv advertising. Last year, W-L spent approximately $10.2 million in measured spending to support Trident, more than 50% of which was spent on network tv.

W-L has begun an active campaign to expand Trident marketing in Latin America and Asia, where interest in dental care is rising and gum sales are brisk.

Another W-L gum product, Chewels sugarless liquid-center gum, was reformulated with an improved taste.

This step, the company said, "increased sales dramatically in the U.S."

In the soft bubble gum market, Bubblicious registered strong worldwide growth. Unit sales in the U.S. increased 10%. A fifth bubble gum flavor, watermelon, was added to the Bubblicious line.

Last year, W-L introduced a liquid-center bubble gum in Brazil. Another liquid-center bubble gum, Punch 'N Juicy, entered the U.S. market in the first quarter of 1982.

Measured spending for W-L's six gum products totaled more than $37.9 million. Individual product spending was as follows: Chewels, $7 million; Dentyne, $6.9 million; Bubblicious, $5.7 million; Freshen-Up, $4.7 million; Clorets gum and mints, $3.5 million, and Trident gum, $10.2 million.

In the breath mint category, W-L is placing new emphasis on sugarless mints this year. Two major sugarless products that have been extensively tested for consumer appeal are expected to reach full U.S. distribution during the year.

The first, a new square Trident mint with "unique formulation," is being launched in the U.S. and selected European markets this year following a successful introduction in Canada.

"The product outperformed the competition in consumer tests," the company said.

The second, a sugarless version of Certs, is performing "extremely well" in U.S. test markets, the company said.

In another move, the company plans to expand its limited international business in nutrition-oriented snack foods. The venture, which began several years ago with the acquisition of distribution rights in Canada for Blue Diamond almonds, is now being further developed within Canada through the introduction of a new natural snack product.

That line of bagged snacks—raisins, etc—was introduced into the Midwestern U.S., under the Bountiful brand.

In the baked goods business, Entenmann's, which W-L acquired in late 1978, had sales of $333 million in 1981, a 19% increase from 1980. W-L credited the higher sales to growth throughout its established territories and from expansion into additional areas of the Midwest, Southeast and Northeast in 1981.

A distribution arrangement with another bakery made it possible to introduce Entenmann's products in parts of Maine, allowing the distribution network to reach approximately 33% of the U.S. population.

Entenmann's has also expanded its Snack & Treat merchandising program to the southern parts of the U.S. Snack & Treat displays offer such products as creme-filled cupcakes, Popem's donut snacks and other regional products.

Entenmann's first bread-related product, an English muffin, is being tested in parts of the Northeast.

While Entenmann's is aggressively seeking new markets and products in an effort to build the company's product lines and position, the company has been faced with the chore of denying rumors linking it to the Rev. Sun Myung Moon.

Last year, rumors, which apparently began in Boston, began linking Entenmann's to the "Moonies."

Although the company does not know why it has been linked to the cult, Boston-area delivery men and salespeople have been harassed, and a Rhode Island church proposed a boycott of the products.

In order to stop the rumor from spreading, W-L undertook a public relations campaign and held a press conference at Boston's Ritz-Carlton Hotel. It also sent a mailing to New England retailers and some 1,600 churches detailing the ownership history of Entenmann's.

The company's other products segment, which includes shaving and pet care products, reported sales of $250 million in 1981, down from $252 million in 1980.

Worldwide sales of Schick shaving products increased last year.

In the U.S., the company focused its efforts on its Schick Super II and Personal Touch twin-blade systems. Personal Touch, the leading product in the women's shaving sector, increased its market share and was launched into several new Latin American markets.

In international markets, Schick maintained its leadership position in Japan and increased its market share in Southeast Asia, Peru and Chile. Measured spending for Personal Touch totaled nearly $2 million. Schick Super II received $5.8 million in support.

Growth of the worldwide pet care business was led by U.S. operations, which achieved about a 25% sales increase. The Tetra line of fish foods and aquarium supplies maintained its dominant market share worldwide and strengthened its position in key markets.

In the U.S., Tetra sales benefited from market expansion and the introduction of several new tropical fish foods, including a variety of extruded products for larger fish.

Wm. Wrigley Jr. Co.

	1981	1980
Sales	$607,834,000	$557,632,000
Earnings	28,431,000	30,689,000
Advertising*	63,526,300	51,843,340

*AA estimate

Wm. Wrigley Jr. Co., the nation's 81st largest advertiser, and the nation's largest gum maker, spent an estimated $63.5 million on advertising in 1981, up 23% from 1980. Sales in 1981 were up 9% from 1980, from $557.6 million to $607.8 million in 1981. Sales increases are a direct result of domestic price increases on certain brands and packages during late 1980, as well as increased unit volume and sales of its subsidiary, Amurol Products Co.

Net earnings, on the other hand, were down for the second year from the all-time high of $36.4 million in 1979. Earnings were $28 million in 1981, compared with $30.7 million in 1980, a 7% drop. Earnings in the first three months of this year have dropped again. This drop, according to the company, is a result of high first quarter sales last year following price increases and lower earnings reported by Amurol—which had a record 1980.

Earnings declines of the past two years are a result, according to William Piet, assistant vp-corporate, of the strength of the dollar in relation to foreign currencies in 1981 and the effect of worldwide inflation on the cost of wrapping materials and ingredients, among other things.

Even with the declining earnings, however, investment analyst Richard G. Elam of Bacon, Whipple & Co., Chicago, reports the outlook for the company is "outstanding"—for a variety of reasons. One, the company is managing its assets more intensively, he said. Two, the company has adopted a method of accounting so that foreign currency gains and losses will no longer be such a big factor on the bottom line earnings figure. Three, the company has started several "productivity programs," including streamlining management and consolidating the somewhat mind-boggling array of gum varieties overseas.

William Wrigley Jr., with $32 in his pocket, moved his original soap business to Chicago from Philadelphia in 1891. In the following year, the business went from soap to baking powder to gum, which was originally used as an incentive item. By 1910, Wrigley's Spearmint gum was the nation's No. 1 brand.

Back in the early 1970s, Wrigley—with its Big Three: Spearmint, Doublemint and Juicy Fruit—had an estimated 60% of the total gum market. Competition, however, mostly from Warner-Lambert Co. (maker of Dentyne, Trident and Freshenup) and Life Savers (Bubble Yum and Care*Free) helped force that share down to under 35% by the mid-1970s. The drop in market share was also due, according to one industry analyst, to "fossilized management," which kept the price of gum down and allowed no new product introduction until 1974. Now, however, that head-in-the-sand philosophy has been shed.

From 1974 to the present, Wrigley has introduced several new brands, including Freedent, Big Red, Orbit sugar-free gum and Hubba Bubba bubble gum. Freedent, introduced in the U.S. in 1975, was the first new product for the company in 25 years. Formulated especially for denture wearers, the gum, according to an independent survey, has an approximate 8% of the market. Last year, the company discontinued its cinnamon flavor in favor of putting the gum out in the 17-stick Plen T Pak format. Now this brand joins Big Red and the Big Three (Spearmint, Juicy Fruit and Doublemint) in the increasingly popular 15 to 17-stick package, a category that accounts for over 40% of chewing gum checkout sales.

Last year, ad spending for Freedent was up 54%, from 1980's $4.5 million, to $6.9 million, with most of it going to network tv. Big Red, with a current 6% of the total chewing gum market, was introduced in 1976 to compete with W-L's Dentyne. It had disappointing sales until the company repositioned it as a breath freshener. Since the strategy change, the gum has enjoyed an annual sales increase of some 20%. It is now, according to Ronald Cox, vp-marketing, the fastest growing brand of chewing gum on the market today.

Mary Cairns

Analysts stick to the belief that Wrigley has bright prospects.

Ad spending last year reflected confidence in the product, up 40% from 1980's $6.7 million, to $9.4 million.

Not all the brands have been such stars, however. Orbit, Wrigley's effort in the sugar-free gum category, introduced in 1977, never got past third place in its category. After an increase of 137% in ad spending in 1980, up to $4.2 million, last year's measured media spending was only $730,200, an 83% drop.

According to Mr. Cox, the challenge in the future will be in the sugar-free area. Orbit presently sits in the No. 4 position after W-L's Chewels.

Not at all disappointing was last year's performance by Hubba Bubba, a nonstick bubble gum introduced in 1979 as an adversary to the No. 1 bubble gum, Bubble Yum. In 1980, Hubba Bubba struggled with W-L's Bubblicious for second place, but by 1981, with some 25% growth in sales, it had settled into the No. 2 position. But with only a 2% market share between the top three bubble gums, the positions are tenuous.

Of an estimated $1.5 billion in retail dollars in the total gum market, bubble gum makes up some one-third.

Wrigley's initial foray into the liquid-center gum market was not a big hit. Originally, the company entered the category with a liquid-center regular gum called Over Time. That product never got out of the test market stage. However, last year Wrigley's Amurol subsidiary brought out Tidal Wave, "a flash flood of flavor from the very first bite." This one is for kids and its a bubble gum. Ad support for the new product in 1981 was $95,800, mostly in spot tv.

As for Wrigley's Big Three, which account for the majority of the sales growth in 1981, they account for between 50% to 55% of the sugar-based gum market currently, having withstood a direct challenge from Life Savers' Replay. After a year of national distribution, that line has less than 2% of the market, while Wrigley's share has expanded to between 44% and 47%. Replay's attempt to break Wrigley's hold probably cost Orbit some ad support. As one company executive put it, "We had to circle the wagons around the big guys."

Ad spending for the Big Three was up 38% in 1981, from $26.2 million in 1980 to $36.3 million in 1981. Of the three, only Wrigley's Spearmint gained a new ad campaign last year. It's new line is: "Wrigley's Spearmint keeps you humming," introduced this June. The account was moved from NH&S/USA to BBDO for the new effort.

Ad spending for the whole company, combining the Leading National Advertiser six-media figures, was up some 23% from 1980, from $49.7 million to $61 million in 1981.

Amurol Products, Wrigley's subsidiary in bubble gums, sugar-free gums, novelty confections, sugar-free candies and dietetic products, had an excellent 1981, almost doubling its sales. According to the company, this success is largely due to Big League Chew, a shredded bubble gum that added two more flavors, strawberry and grape, to its lineup, and Popeye, a fluorescent, green (spinach) and, like its predecessor, shredded entry.

Big League Chew received ad support for the first time last year, some $809,000 of it spread among network radio, network and spot tv, with spot tv getting the lion's share.

Xerox Corp.

	1981	1980
Sales	$8,691,000,000	$8,196,500,000
Earnings	598,200,000	564,900,000
Advertising*	84,150,000	67,650,000

*AA estimate

Xerox Corp., Stamford, Conn., the country's 64th largest national advertiser, spent $84.2 million on advertising in 1981, or 24% more on worldwide advertising than in 1980. Close to $32 million was registered in measured domestic spending, an increase of nearly $10 million over the year before.

Sales reached $8.69 billion in 1981, a 6% increase over 1980. Earnings in 1981 totaled $598.2 million, or 5.9% higher than in 1980. Xerox's worldwide information processing capabilities and growing competition from the marketplace, particularly in the area of office automation, prompted the corporation to launch a worldwide print and television campaign in 1982. Needham, Harper & Steers, which directed the campaign, used a six-page, two-fold color introductory ad with the theme "How to tell the real Xerox from a Xerox copy." The print ad marked the first time since 1974 that Xerox ads have run in color. The campaign, divided into two parts, gives Xerox "an opportunity to express specific strengths, which we hope will build the basis for a preference," said Joseph M. Cooper, manager of corporate advertising and promotion. One part of the new campaign underscores Xerox's capability in areas such as technology, breadth of line, service and compatibility of systems. The second part focuses on specific products, or features of those products. Certain of those products, including new additions to the Xerox family, were supported by both print and tv.

Xerox also continued to run its "Brother Dominic" series of commercials in which a monk introduces 20th Century Xerox technology to the medieval setting of a monastery.

From 1981 to 1982, Xerox introduced a steady stream of new products to fill a wide array of needs. Among the debuts was the November, 1981, presentation of Xerox's first automatic electronic office typewriters. The four Xerox Memorywriters, as they're called, are positioned to fulfill the conventional office typewriter role. They also can be added to a number of electronic work stations. The basic model costs $1,430.

This new family of electronic typewriters was joined by a Xerox information processor, the 820, and its June, 1982, second-generation counterpart, the 820-II. Both products are desktop word processors/personal computers and marked Xerox's entry into this burgeoning field. NHS ads stressed the multiuse and multiuser features of the computer. Both can be connected to Ethernet—Xerox's standardized communications network.

To accommodate the instantaneous worldwide communications needs of its prospective clients, Xerox last year introduced two new international facsimile units. The Xerox Telecopier 495 is a high-speed unit that sends and receives a one-page letter in 30 seconds from any point on the globe. The 455, a desktop model, sends its messages at a rate of one minute per page, employing a technique Xerox calls "white line skipping."

One product Xerox introduced in 1981 the "first information processing system for office use by professionals." The Xerox 8010 Personal Information System combines a myriad of activities that include computing, text editing, graphics creation, communications and records-keeping, in addition to being compatible with the Ethernet network. The unit is designed to be used by anyone from engineers and librarians.

Among other Xerox products, two new printers have joined the high speed 9700 commercial use printer, which has been marketed since 1978.

One, the Xerox 8700, a medium-speed printer, enables data processing centers and in-house printing, publishing departments and others to use the new graphics printing system technology. The other was the Xerox 2700, described as a multifont laser printer that serves the needs of small businesses and minicomputers.

Finally, January, 1982,

marked the arrival of a new desktop copier, the Xerox 2830, which can make multiple oversize copies from single originals.

Xerox has become almost synonymous with photocopy to many people. Ironically, it is an area in which the company has been losing ground in terms of market share.

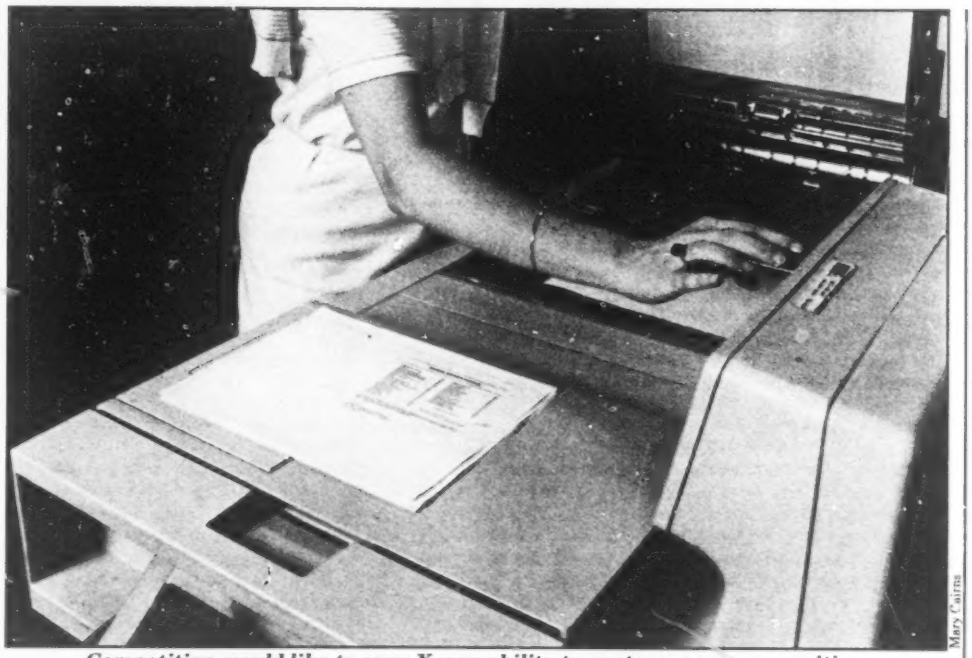
There are still more than 200 billion copies made annually on Xerox equipment, the company said, but growing competition has caused Xerox to reduce copier prices and designate increased market share in this segment as a top corporate priority.

David T. Kearns, recently named chief executive officer, said in the spring that he intends to reverse his corporation's market share erosion in reprographics and increase market share in office systems.

Because Xerox has been running into competition from the Japanese in the smaller duplicator market, two primary areas of emphasis are likely to be Xerox's mid- and upper-range copiers.

To that end, the company is working on technological advances in the mid-volume copier/duplicator market, according to Mr. Kearns.

The 51-year-old Kearns became ceo in May, after having served as president and chief operating officer since 1977. He replaces C. Peter McColough, 60, who will continue as chairman, but who relinquished ceo status in accordance with a company policy that requires senior management to reduce day-to-day involvement.



Mary Cairns

Competition would like to copy Xerox ability to capture name recognition.

One relatively new area of development for Xerox is its retail store operations. The first store opened its doors in the spring of 1980, and the corporation expects to have close to 50 by the end of 1982. The retail operation also extends to Europe, where Rank Xerox Ltd. has opened stores in England and France.

The Xerox store markets a variety of office products. Unlike one of its competitors, International Business Machines Corp., which sells only its own equipment, Xerox carries a wide array of business products from companies such as Apple Computers, Hewlett-Packard, Panasonic and Phone-Mate.

Xerox stores cater to the small business and professional buyer with their assortment of small and midsize copiers, word processors and personal computers.

Xerox's entry into the retail market could be more significant in the future, considering that the business machine market is expected to grow by 15% a year through the end of the decade. This would place sales on an industrywide basis at $5.5 billion, according some estimates.

Other competitors in retail store arena include Tandy Corp.'s Radio Shack; Computerland, an independent chain, and Sears, Roebuck and Co. In order to compete in this congested retail store environment, Xerox tapped Young & Rubicam Special Markets for its U.S. retail store account.

The retail store ad strategy allows local units to focus on their own offerings of office and business products, and the media strategy places heavy emphasis on on newspaper, backed by radio.

100 Leaders

(Continued from Page 1)

well mean that troubled brewer will drop off the 100 list, though Stroh itself could make an entry onto the list.

Meanwhile, as cable television becomes a stronger and more deeply entrenched advertising vehicle, more of the 100 Leaders are likely to turn a significant share of their advertising dollars to that medium.

Several of the 100 Leaders have already done so, including Bristol-Myers Co., Campbell Soup Co., Eastman Kodak, Procter & Gamble and Anheuser-Busch. They have made commitments to cable ranging from experimenting with simple spot commercials to program sponsorship to program production.

Several of these companies have expressed interest in expanding their involvement in cable, and more are sure to join in coming years.

Unfortunately, there is not yet a reliable system for measuring cable tv advertising spending, and cable tv hasn't yet become a "measured medium" in our report. It is our hope, however, that by next year's issue we will be able to add cable to our measured media list to bring the total to nine media we regularly track.

A few observations about this year's list: There are no discernible trends as to the types of companies that increased or reduced their ad budgets for 1981. A total of 23 of the 100 Leading National Advertisers increased spending by more than 20% this year; 13 companies cut their spending.

Both Eastern Airlines and International Telephone & Telegraph maintained 1980 ad spending rates. Of the top 25 advertisers, only Ralston Purina Co. trimmed its ad budget, down to $193 million from $207 million in 1980.

Twelve other companies cut back their ad spending: Seagram Co. Ltd., Quaker Oats Co., American Brands, Miles Laboratories, American Motors, Mars Inc., MCA Inc., Jos. Schlitz Brewing Co., Morton-Norwich Products, Borden Inc., Noxell Corp. and American Broadcasting Cos.

One product category that received considerable advertising attention in 1981 is videogames.

The interest in videogames has grown in 1982 and will surely see further expansion in 1983. It is estimated that ad spending for the games could exceed $100 million in the fourth quarter this year.

Columbia Pictures Industries, Mattel Inc., North American Philips Corp. and Warner Communications, among others, have active videogame units.

These companies undoubtedly will pour more ad dollars behind promotion of the flashing lights and blips and bops in the future.

The top 10 largest advertisers welcome two new companies in this year's report, Nabisco Brands and Mobil Corp. Nabisco, whose advertising rose sharply as a result of its merger with Standard Brands in 1980, is ranked No. 7; last year Nabisco Inc. was No. 51 and Standard Brands was No. 98. Mobil moved from No. 18 to No. 10 after raising its ad spending by 7.2% to $293 million.

General Motors and K mart traded places—GM is No. 5 and K mart is No. 6. R.J. Reynolds dropped from No. 7 to No. 8, and AT&T held on to the No. 9 position.

At P&G, the company many watch for suggestions of consumer ad trends, tv spending increased by 6%, but all of that increase went to network, up 9%; spot was cut by 6%. Also cut were spending in magazines and radio. Some of this money is being funneled into cable. P&G is Cable News Network's largest sponsor, and it is also sponsoring a program on Continental Broadcasting Network.

Among P&G's most heavily promoted products in 1981 were laundry products, for which the company spent $115 million; others included seven soap products, which received $45 million, and the top-selling toothpaste in the U.S., Crest, which received $45.5 million in 1981, a 59% increase over 1980 support for the brand.

Other heavily supported products included Barclay cigarets, which parent company B.A.T. Industries introduced in January, 1981 with a budget of $150 million. General Foods, which traditionally puts its heaviest support behind individual coffee brands, spent measured support to the tune of $21 million on Maxwell House coffees. More than $18 million went to new Master Blend, and Sanka received $17.3 million.

There are six new companies in this year's Leaders issue: Canon U.S.A., Exxon Corp., International Business Machines , North American Philips Corp., Hiram Walker Resources Ltd. and Xerox Corp.

Because of the merger of Nabisco and Standard Brands, only five companies actually dropped from the list: Carnation Co., Mazda Motors of America, A.H. Robins Co., Squibb Corp. and Levi Strauss & Co.

The more you learn, the more you should reexamine your own convictions.
Frank Reynolds "There usually is more to a story than is immediately visible on the surface. And it's very important to try to understand the full dimensions of it. Not to question people's motivations, but to understand their motivations."
ABC News helps you understand. That's why The San Francisco Chronicle described Frank Reynolds and the people at ABC News as "... the brightest news-gathering outfit on the air."

Christmas sales outlook—'tis the season to be wary

With this report, Advertising Age begins its coverage of the coming Christmas selling season, a key period for marketers and one filled with uncertainty because of the state of the nation's economy. Senior reporter Pat Sloan wrote this retailer forecast, with reports from all AA domestic bureaus.

Although the financial community expects consumer spending to pick up in October, most major retailers are not so optimistic, owing to their inability to discern anything—anywhere in the nation—that would indicate an imminent rebound in consumer confidence.

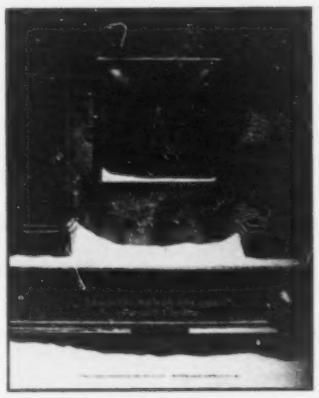
While Wall Street is betting on the July tax cut, coupled with a continued decline in interest rates and an active stock market, to shake the consumer out of his malaise, retailers may still be hard put to benefit from any potential windfall.

Fearful of being stuck with excess inventories, stores are being chary with their open-to-buy, ordering later and less than they did last year at this time. Both stock and projections have been cut by as much as 25% to 30% at many stores. And if stores are reluctant to write orders, neither are manufacturers eager to over-produce now in hopes that a month down the road increased consumer spending will send retailers scurrying back to the market with pencils and order forms in hand.

Says one New York retailing executive who, because of his extreme pessimism, asked not to be identified: "It's going to be tough. No one has made plans. We're all barely making last year's figures. And when you add in inflation, it's worse."

This sentiment, with slight variations, is being echoed in all areas of the country where particular economic problems are having a significant impact.

In Texas, for example, where retailers are feeling the effect of Mexico's currency devaluation, "August is when we fell out of bed," says Robert Sakowitz, chairman of the Houston-based specialty stores bearing his name. "Our sales were up double-digit from last year until Aug. 1. Then sales went soft because of the peso."



Johnnie Walker scotch may throw economic caution to the wind in its Christmas advertising, but can retailers afford to?

Mr. Sakowitz, however, says he is confident Christmas sales will be up. Sakowitz plans to put added dollars into advertising with a series of "strong, point-of-view" ads as well as fashion promotions.

Marshall Field & Co.'s Houston operation also has suffered from the peso decline. "We are down 5% against plan here," says Sandy Sacks, exec vp-southern region. "There's enough of a negative trend among retailers to indicate a tough Christmas, but you've got

Comparative bid vs. Big Mac

Burger King's 'challenge' set for heavy drive

By RICHARD KREISMAN and CHRISTY MARSHALL

Desperate to resuscitate its growth momentum, Burger King Corp. is hitching its company fortunes to a massive comparative marketing campaign, replete with "Pepsi challenge"-style taste-test research, that takes on both industry-leader McDonald's and Wendy's International. Both advertising and in-store promotion will trumpet the findings of the tests.

The Miami-based chain is launching the drive the week of Sept. 27, at the start of the new tv season, with commercials claiming that in coast-to-coast taste tests, "Whopper beats Big Mac."

In Burger King stores, crews will be donning caps with the same message, and asking customers such questions as, "Did you know more people preferred charcoal-broiled hamburgers to fried?" and, "Did you know the Whopper beat Big Mac in coast-to-coast taste tests?"

The drive is closely patterned after the successful Pepsi campaign, and Burger King reportedly consulted with the indepedent research teams that worked on that trend-setting effort. Like soft-drink companies, fast-food marketers are dealing with a slow-growth industry, where market share gains are the driving force behind any expansion.

Burger King, which catapulted into the No. 2 position in the mid-'70s, has stumbled in the past two years in new unit expansion and new products. Earlier in the year, rumors (denied) circulated that parent Pillsbury Co. was looking to sell the chain.

According to a company memo,

Bic Pen drops its comparative campaign. . .Page 2.

Burger King is hoping the campaign will reinforce what it believes to be McDonald's quality-image problems and capitalize on its own status as a preferred choice for quality and taste. The tv push will be directed at adults and singles, the market segment where No. 3 Wendy's has made of late.

The chain reportedly is concerned about possible legal actions stemming from the campaign, and has "gone to great lengths" to avoid them, one large franchisee said. One competitor, aware of the campaign, but not the copy specifics, said he had heard the chain was "having clearance problems with

Gorog seen as new MPA chief

By STUART J. ELLIOTT

New York—An investment banker and economic policymaker in the administration of former President Gerald Ford is expected to be named president of the Magazine Publishers Assn.

Advertising Age has learned that William F. Gorog of McLean, Va., is the unanimous choice of the five-member search committee that since February has been seeking a successor to Kent Rhodes.

When contacted last week, Mr. Gorog declined comment on his selection. "I feel that it just is a little premature," he said.

In a letter to the 36 persons on the MPA's board of directors, George Green, the association's chairman and a member of the committee, said: "I support his candidacy without reservation." The board is scheduled to vote on Mr. Gorog's nomination at a special meeting Sept. 14.

"It's a *fait accompli*," said one board member of the likelihood the

last minute news

Diet Coke market expands; 9 stars in new spot

Atlanta—Coca-Cola USA is expanding Diet Coke into Rochester, Denver, Seattle, San Diego and Jacksonville, Fla. A new spot using nine celebrities—Bob Hope, Joe Namath, Telly Savalas, Carol Channing, Ben Vereen, Glenn Ford, Susan Anton, Sally Kellerman and Robert Vaughn—has been added to the pool of spots. The commercial by SSC&B features Diet Coke's premiere that was held at New York's Radio City Music Hall in July. Coke and SSC&B execs also denied a published report that Tom Selleck had signed a $2 million contract to be Diet Coke's spokesman.

Ford, Chevrolet spots urge buyers to take a look

Detroit—Both Ford and Chevrolet will imply in their new fall advertising campaigns that they've been overlooked by new car buyers. Chevy's theme is: "USA-1 is taking charge." Copy says consumers will find technology and quality "in places you may not have checked lately." The Ford division theme is: "Have you driven a Ford. . lately?" JWT, Dearborn, Mich., is Ford's agency. C-E, Warren, Mich., handles Chevy.

'USA Today' announces 18 charter advertisers

Washington—With daily publishing to start Sept. 15, Gannett's *USA Today* increased its list of named charter advertisers last week from nine to 18. Execs at the paper predicted the 40-page debut issue will have 12½ pages of advertising when it appears in Washington, Baltimore and nearby markets, but still were uncertain late Friday which advertisers would be in the inaugural edition. Fourteen ad pages per 40-page issue is the maximum allowed under the paper's low-clutter format. The named advertisers are: Brown & Williamson, Philip Morris, Glenmore Distil-

Agency plans full-service Dallas office

Ex-McCann chief Agnew back as JWT/West head

By JENNIFER PENDLETON

Los Angeles—James K. Agnew, former president of McCann-Erickson, New York, and a long-time J. Walter Thompson Co. veteran, will rejoin JWT on Oct. 1 as exec vp and head of JWT/West, based here.

Mr. Agnew's appointment is seen as a first step in the agency's long-range plans to build its admittedly underdeveloped western operations, a goal that will include the conversion of JWT's Dallas service office to full-fledged agency status, operating as an arm of JWT/West. JWT/West currently has billings of about $100 million.

■ JWT executives declined to be specific about when the Dallas office will convert to a full-service agency, but said it would be likely to take place this fall.

Mr. Agnew, 43, who also will be a member of the board of directors of JWT/USA, rejoins the agency after two years as a partner in charge of marketing and strategic planning at Maguire Partners, a Los Angeles-based commercial real estate developer.

Before that, Mr. Agnew spent eight years with McCann, finally as president-chief executive officer in New York from 1979 until his departure in July, 1981. Before that, Mr. Agnew was exec vp and general manager of McCann's Los Angeles office. He had been with JWT from 1962 to 1973, with assignments in New York and Paris.

Mr. Agnew succeeds Frank Maniero, who is leaving Sept. 17 to join Activision, Mountain View, Cal., as vp-marketing.

Mr. Agnew, JWT chairman-ceo Burt Manning and president-chief operating officer Walter J. O'Brien outlined agency goals for the western division in an interview here.

Describing JWT/West as offering perhaps the greatest chance for growth of any other unit in JWT's system, Mr. Manning said the agency intends to build the operations significantly, placing special emphasis on Los Angeles, which currently has one-fourth the business of JWT's San Francisco office. JWT's Los Angeles office currently has billings of $25 million.

■ Mr. Manning and Mr. Agnew said there are no plans for dramatic personnel changes at either the San Francisco or Los Angeles offices, but the agency will be evaluating staff and likely will add personnel to fill talent gaps.

Next spring, JWT will name a new general manager of the San Francisco office to replace Ram Ruy, current deputy manager, who will return to manage JWT's Calcutta office at that time. Dick Macedo, who has been general manager of the Los Angeles office, will continue in that post.#

John McEnroe will charge for the Bic disposable shaver this fall.

Bic changes courts, turns to McEnroe

By PAT SLOAN

Apparently bested by Gillette Co. in a dispute over a comparative tv commercial for its disposable shaver, Bic Corp. is serving up a new campaign that avoids comparisons and relies instead on tennis ace John McEnroe.

Both ABC and NBC were reported to have pulled a Bic commercial that pitted the Bic disposable shaver against Gillette's Trac II, following the initiation of a challenge procedure by Gillette (AA, May 24). The spots in question, created by Bic agency Wells, Rich, Greene, magnified beard hairs 110 times eight hours after shaving and prompted the Bic claim that there was no difference in the shave of a twin-blade Gillette Trac II and a single-blade Bic, but a big difference in price.

Gillette charged the commercials were "false and deceptive," and, in the meantime, continued running its own comparative spots that touted the twin blade as "a closer, smoother and safer shave than Bic."

Whether Gillette's move was offensive or defensive is disputed within the $700 million market, but in any event it appears to have forced Bic's hand. The new McEnroe spots are the first major campaign for Bic since the comparative effort and, sources say, are indeed its replacement. Bic executives would not confirm this, nor would they comment on the legal fate of the previous spots.

■ Bic is not a novice when it comes to using sports celebrities as endorsers. Two years ago, the company hired football and soccer stars for a "10 tough guys" commercial in which the same Bic shaver tackled their beards with success. With Mr. McEnroe, Bic will also take advantage of a tough guy image. The 30-second commercial shows the tennis star arguing with an umpire who says, "Mr. McEnroe, that's a very close shave." Mr. McEnroe verbally volleys back, "You must be joking! That ball was in," before the ump replies that he was referring to his face, not his serve. "Of course," Mr. McEnroe says, "I shave with Bic."

The commercials do retain a focus on the economy of shaving with Bic, with an oblique reference to the competition. "Why pay more for fancy handles and tricky tops when I get lots of close shaves with Bic," Mr. McEnroe asks.

In addition to tv, the campaign later will include print ads and p.o.p materials featuring Mr. McEnroe.#

Paley gives up CBS baton

New York—William Paley, who broke into broadcasting first as a radio sponsor (via his father's La Palina cigars) and later as a broadcaster, has been a tough man to work for and a tough act to follow—especially since he has not been ready to be followed until now.

But it's official, the Paley era at CBS Inc.—its only era—draws to an end next April. Thomas Wyman then formally adds the CBS chairmanship to his current titles of president and chief executive officer.

The big guessing game in media, advertising and financial circles—one that has been played in earnest since it was disclosed that Mr. Paley was planning to move on (AA, Aug. 30)—centers on how major the changes in CBS' directions will be under the new captain.

Most industry sources expect some changes by Mr. Wyman, if for no other reason than that every chief executive wants to make his mark. But for now, at least, CBS said there are no other title or position changes in the works.

Mr. Paley, nearly 81, last week told the CBS board meeting that he has "complete confidence" in his handpicked successor as he turns over the reins to the company he founded and in 54 years turned into a $4.1 billion giant. The ex-Pillsbury and Polaroid executive apparently won over Mr. Paley since joining CBS in 1980 with his strong yet people-sen-

Sports top newspaper ad spending

NEW YORK—Newspaper advertising spending for sporting and leisure time equipment showed the largest gain in June, increasing 160% to $1.9 million, according to figures compiled by Media Records Inc. for ADVERTISING AGE.

Other categories showing significant increases during the month of June were cosmetics, up 105% to $241,000; soft drink beverages, up 75% to $439,000; new passenger cars, up 74% to $8.7 million, and alcoholic beverages, up 37% to $2.8 million.

Over-all, 12 of the 16 categories tracked by Media Records recorded spending gains in June, with the only significant decrease shown by cigarets, down 36% to $5.8 million. Airline spending decreased 1% to $10.2 million for the month, while cold and headache remedies both remained out of newspapers during June.

This Flash Report of newspaper advertiser investment is derived from tabulations that cover 33 dailies and 25 Sunday editions in 14 cities: Atlanta, Baltimore, Boston, Chicago, Cleveland, Dallas, Denver, Los Angeles, Miami, New York, Philadelphia, Pittsburgh, San Francisco and Washington.#

Get Choosey.

Customers and prospects are choosey about the mail they read. You should be equally selective about the promotional or sales messages you send them. WX Communications specializes in the kind of personalized direct mail your customers are sure to read.

Our letters look like they were each individually typed by a secretary. But with our million dollar system of word processing and computer equipment, we mass produce these letters and still retain that individual quality! And WX Communications offers much more. If needed, we can develop an effective marketing plan for you or design creative packages and even arrange for quality printing.

Send for our FREE comprehensive booklet on word processed letters and the other WX Communications services. Write to:

Berdis takes pen in hand

By MORRIE GELMAN

HOLLYWOOD—Bert Berdis of Dick & Bert fame, after 10 years, is going back to being more of a writing man than a voice man. Now that he's split with his partner Dick Orkin and joined Barzman & Co. here (AA, July 19), the pen is going to be mightier than the vocal cords.

The surprising split of one of radio's most celebrated and honored commercials production teams apparently had a lot to do with a desire to do new tricks, from the Bert side of the equation at least.

Mr. Berdis is not abandoning the voice that helped launch dozens of zany and memorable radio campaigns, but the opportunity to write for a great many different voices, in part, led him to a competing radio commercial production shop as a partner and creative associate with Alan Barzman and Jim Kirby.

This was a great part of the lure, Mr. Berdis confirmed in an interview, that took him to Barzman & Co., which might change its name to reflect the addition of a prominent partner. Already, letterheads at the company that read Barzman & Co. are stamped with the notation, "Now With Bert."

Mr. Orkin, who continues with Dick Orkin Creative Services, earlier indicated he intends to remain in the commercials production business.

"After 10 years of writing spots for Dick & Bert, which was basically two-man stuff," Mr. Berdis explained, "I had certainly written about all the permutations and combinations I could write. It seemed to me we were just duplicating our efforts."

He pointed out, too, that Mr. Barzman knows "everybody" in Hollywood and has a "penchant" for getting talent not normally associated with voice work to do voices. Mr. Berdis cited the opportunity to write for the voices of Alice Ghostley, Tom Bosley and Artie Johnson, among other performers, as an important advantage in his new situation.

While Mr. Berdis affirmed he likes voice work, he thinks of himself as a writer and "agency guy, first," referring to his previous career as a creative director and copywriter at such ad agencies as Grey; McCann-Erickson; Ketchum, and NH&S. "It was just tiresome to do the Dick & Bert stuff" after a time, he acknowledged, but quickly added that "Dick is one of the all-time great radio voices that ever happened," but after 10 years "you just find yourself wearing out." Mr. Berdis likes the idea of writing for a variety of voices and also doing other things such as writing for tv, doing vignettes or writing for groups of people or for female voices, and using music more. He conceded he could have pursued all of these possibilities while at Dick & Bert, but, he claimed, the opportunities were "very, very limited."

Now that he is on board at Barzman, Mr. Berdis is out to give the company a higher profile nationally. Barzman & Co., he said, while established on the West Coast, is less widely recognized in the Midwest and certainly not in New York. One of the new partner's priorities was to take his act on the road to Chicago, Detroit and New York City "and tell my friends in the ad agencies, 'Look, this is what I'm doing now.'"

Mr. Berdis says his split with Mr. Orkin amounted mostly to a way of "rejuvenating each other's juices."#

Slow down on the lettuce, folks

Anderson Clayton Foods broke a new campaign on the Emmy Awards telecast, with a Bloom Agency spot that has rabbits investigating a lettuce shortage caused by the popularity of Seven Seas dressings.

Sponsors in a quandary

Court battles, strike threats upset tv sports

NEW YORK—For tv advertisers, sports aren't fun anymore.

Cable and the networks are in court battles over who can broadcast sports events, tv's lucrative professional football schedule is endangered by a players' strike and now it appears that the procedure for selling college football games for broadcast has been irrevocably changed.

A federal district judge in Oklahoma City last week ruled that only individual schools, not the National Collegiate Athletic Assn., have the authority to sell rights to their games.

How fast those changes take place can only be determined by the courts. Network sources said last week that if the NCAA could not obtain an injunction to stay the ruling by Judge Juan Burciaga, there could be an interruption in this week's slate of games.

Each week, ABC and CBS select the games they wish to broadcast and then pay the teams selected. If the NCAA is unable to get an injunction to stay the ruling pending an appeal, the colleges presumably would be able to cut their own deals with the networks.

"That's where it gets crazy," said one network executive. "The whole thing could turn into a wide open market." The bidding for the crucial contests could up the ante for broadcasters wanting to telecast a particular game.

The open market could also intensify player recruiting efforts by universities. Since the networks have traditionally opted to televise games between winning teams, the pressure to produce a winner would also be greater on the schools. A source observed, "the next step

Chevy, Ford narrow fight

By RALPH GRAY

DETROIT—Nobody's expecting a whole lot from the new car season this fall. Not Roger Smith, chairman of General Motors. Not Lee Iacocca, chairman of Chrysler Corp. And certainly not the industry observer who was asked, "Where's Pent-Up Demand?" and replied, "about 10 miles from Hopeless Despair."

But that won't dampen the intensity of the matchup between No. 1 Chevrolet and No. 2 Ford. Both will concentrate on those (few) prospects who are undecided about which car to buy. By implication, there's less emphasis on pulling the pent-up demand types away from their aging autos.

While Mr. Smith says the industry is "poised for an upturn—in fact it has already begun," Mr. Iacocca has said, "If there are positive signs out there, come and tell us quick. Nobody's buying [latest sales were off 29%]. Let's hope positive signs start to blossom and things start to get better, but I don't see it."

Actually, Mr. Smith doesn't see it that soon, either. He expects the annual sales rate to hit 14 million vehicles by the end of the 1983 model year. The annual rate now is 9 million or so. Mr. Smith isn't predicting 14 million in sales, just that

Economy dried up ad funds, CBS Cable says

Cable tv shakeout begins

By SUSAN SPILLMAN

NEW YORK—For the cable tv industry, the past year has been like the first week of network tv's fall season: New programs are unveiled with a flurry of promotion, ambitious plans are presented confidently, but everyone is really waiting to see which of the more than 40 available cable services will be the first to fail.

CBS Cable answered that question last week. It informed its 535 affiliates representing 5 million subscribers that it will pull the plug on the critically acclaimed ad-supported cultural service in 90 days.

Calling its demise a "major disappointment," CBS Broadcast Group president Gene Jankowski nonetheless tried to downplay its significance with the comment, "The venture's $30 million loss is less than what it sometimes cost to cancel a couple of prime time series. Let's keep this thing in perspective."

The folding of CBS Cable, however, more likely won't be kept in that perspective. As the first major failure in an industry that until recently has been hyped as an instant cash machine, it is generating heavy scrutiny and raising a number of serious questions: Can a narrowcast service survive with advertising support alone? How many channels can the marketplace support? Will the demise of CBS Cable have a domino effect or was it simply the result of one network's bad business plan?

CBS obviously miscalculated by producing network-quality programing for a non-network-size audience that it expected adver-

Reagan nominating Douglas for 5th seat on FTC

WASHINGTON—President Reagan is moving to bring FTC up to its full five-member strength by nominating economist George W. Douglas for a seven-year term. He has co-authored articles with FTC's economist chairman, James C. Miller III. If approved by the Senate, he will succeed Paul Rand Dixon, who retired last September.

FCB picks up two airline accounts in Germany

FRANKFURT—Foote, Cone & Belding here has been awarded the German business of Iberia Airlines. Also, FCB's Berlin unit, Uniconsult, gained the $400,000 account of U.S.-based Capitol Air, which just obtained German landing rights. Previous agency for Iberia is Durana Ketchum; billings undetermined. The moves follow the agency's loss of the British Airways account (*see earlier story on Page 3*).

Anesh, Viseltear, Gumbinner shuts down

NEW YORK—Anesh, Viseltear, Gumbinner, an agency founded in 1977 billing nearly $7 million in 1981, has closed its doors. Paul S. Gumbinner, president, will be joining Altschiller Reitzfeld Solin/NCK in an unspecified capacity, bringing with him two former clients, Dandy Confectionery Co. (Stimorol gum) and Nassau Beach Hotel. Combined billings: $2 million. AVG's roster also had included Jordache Intimates, Lancome (projects), Oscar de la Renta for Men and WPIX-FM.

Aims to double sales in five years

Canada Dry pins hopes on ginger ale, water lines

By JENNIFER PENDLETON

San Diego—Ginger ale will take its place as the preferred "adult alternative" to sugary colas and other carbonated soft drinks if Canada Dry has its way.

That ambition, plus others designed to turn the New York-based company into a significant soft drink force, were outlined at the two-day meeting here attended by more than 200 Canada Dry domestic and international bottlers.

During the meeting, the first since Canada Dry was acquired by Dr Pepper Co. in February, executives unveiled the company's 1983 marketing program, which includes increased total ad spending to $15 million, an approximately 20% rise over 1981 levels. Bottlers got their first look at Canada Dry advertising from Young & Rubicam, which succeeded Grey Advertising as the company's agency early in the year. Y&R is the Dr Pepper agency.

In addition to a long-term plan to develop Canada Dry ginger ale and its diet counterpart as a major soft drink, the company outlined plans to:

- Reposition Canada Dry club soda as "the perfect diet soft drink."
- Expand its salt-free seltzer nationally.
- Further develop the market for its mixer line with ad spending increases to $4.3 million.
- Expand Barrelhead root beer into the Midwest and West with a new ad campaign targeted at the 12-to-24 age bracket.

Canada Dry executives are convinced the most likely opportunity for growth will come from the adult market, as the population continues to age and consumer tastes shift to less sweet and more health-oriented products. With that in mind, all Canada Dry advertising, aimed primarily at 18-to-49-year-olds, will use the signature, "Aren't you ready for Canada Dry?"

It is Canada Dry ginger ale that will receive the primary emphasis in 1983, as the company aims to double its sales volume in five years and catapult ginger ale to a place in the top 10 of soft drinks. Canada Dry is also making a concerted effort to build distribution of its ginger ale in food stores and vending machines.

Canada Dry ginger ale today has a 35% share of the total ginger ale market, which has a 3.3% share of the aggregate $9.8 billion soft drink business; Canada Dry ginger ale makes up a 1.1% share of the total soft drink market.

Canada Dry ginger ale will be presented as a mainstream adult soft drink with appeal to consumers who are "making a move" to the best in life. "I'm making my

Territory tests

R.T. French Co., Rochester, N.Y., is testing Cattlemen's steak sauce in some tough territory—across the Southwest and the Southeast (AA, Aug. 23). But, as ad copy notes: "It's a taste as big as Texas." Tv is being used. J. Walter Thompson USA handles.

Competitors to fight Burger King drive

By CHRISTY MARSHALL and RICHARD KREISMAN

Miami—Burger King's new "challenge" commercials will tell customers four things: Its burgers are broiled, not fried; they come "anyway you want;" they are 20% bigger than McDonald's, and the Whopper "tastes better."

As Advertising Age was being shown the comparative effort late last week, unveiled to BK franchisees earlier (AA, Sept. 13), both McDonald's and Wendy's were trying to obtain the specific BK copy claims.

William Youngclaus, McDonald's vp-marketing, said, "There will be some reaction next week [week of Sept. 19]...We are working on a battle plan." Wendy's last week alerted franchisees to concentrate on the "basics of operations and advertising," said William Welter, senior vp-marketing. "We're telling our people not to overreact...We're not changing our advertising plans."

According to both chains' executives, they can first protest to the networks and then seek court action.

Burger King breaks the effort on Sept. 27, backed by the greatest media weight in its history. For the quarter, spending will be up 25%, said Kyle Craig, senior vp-marketing director. The comparative campaign is slated to run eight to 12 weeks. Mr. Craig added that the claims are fully substantiated and have complete network clearance.

One spot opens with a Burger King employe offering condolences to the two competitors. "Y'see," she says, "the Whopper beat the Big Mac for best taste over-all among consumers of both burgers. In a similar test we beat Wendy's single. Now that may have surprised McDonald's and Wendy's, so we just wanted to say, it's okay guys. Winning isn't everything. But it sure is fun."

The tv campaign is supported by print ads headlined, "Guess who won?" and "Sorry, McDonald's. Sorry, Wendy's." J. Walter Thompson USA, New York, handles.#

Buffalo talks stall

Buffalo, N.Y.—Unable to convince union employes during four days of tense and hectic negotiations that it was better to settle for some jobs than be stuck with none, Rupert Murdoch's News America Publishing group faltered late last week in its attempt to purchase the *Buffalo Courier-Express*.

Mr. Murdoch's efforts to buy the morning daily depended on reaching agreements with those unions by a midnight, Sept. 16 deadline. Those agreements would have included a staff cut of about 40%, a condition Mr. Murdoch said was necessary before he could take over the money-losing newspaper.

■ That deadline passed without an agreement and Cowles Media Co., owner of the *Courier-Express*, announced it would go ahead with its earlier announced intention to close the paper Sept. 19. But Sept. 17, representatives from the Murdoch organization and the paper's unions decided to meet again, and Cowles said there was a slight chance that an accord still could be reached.

Cowles earlier had warned *Courier-Express* staff members that Mr. Murdoch was the only potential buyer and that his plan to run the paper with a reduced staff was the only one that would keep it alive.#

Ad Age picks winners, losers

ABC-TV will win vigorous season

By COLBY COATES

NEW YORK—Network tv, after a couple of off years, is headed toward a prime time season of renewed vigor that will see ABC nip CBS by the narrowest of margins for the over-all household ratings crown.

ABC and CBS will spend much of their time trying to knock each other off (witness ABC's last-minute decision to run its Prince Charles-Princess Diana made-for-tv movie two days ahead of CBS), while NBC, finally making good on its phoenix-from-the-ashes routine, will steal audience from both networks, playing a key role in determining the over-all winner.

A primary reason for ADVERTISING AGE's decision to pick ABC as the winner is that the network seems to have garnered what should be the two biggest miniseries of recent years: "Winds of War" and "The Thorn Birds." (A lengthy National Football League players' strike could affect our pick as well, enabling CBS to play ball-control on Monday night.)

Currently, "Winds of War" is set to roll with 16 hours during the February sweeps. However, there is a chance that ABC, with hours of unused product on the shelf, might add a couple of hours for an added boost. As for "Thorn Birds," current thinking says it will air in next May's sweeps period.

But sources suggest that if the ratings race is as close as everybody thinks it will be as the season winds down, ABC might pull "Birds" from the sweeps and air it during the last few weeks of the season.

CBS, on the other hand, does not seem to have the miniseries firepower, and there is a belief that its made-for-tv movie package might not be quite as strong as it's been in recent years. When CBS wrested the ratings crown away from ABC a few years ago, that win was due mainly to the over-all excellence of the made-for-tv movie

BUYS TENDER LEAF FROM NABISCO

P&G into tea market

By JENNIFER ALTER

In a quiet move that could have loud reverberations, Procter & Gamble Co. has acquired the Tender Leaf tea brand from Nabisco Brands.

The brand comes with related manufacturing equipment and will become part of P&G's Folger's Coffee division. Terms of the purchase, labeled by P&G as "minor," were not disclosed.

Although Tender Leaf sales are thought to be only in the $10 million-to-$15 million range, the move is significant for several reasons.

First, the company is believed to have under its wing some very innovative product technology which could easily be applied to tea. It is described as a "desorbate" process by Hercules Segalas, a senior vp at Drexel Burnham Lambert, who says he has seen some 12 such P&G patents in the past five or six years; the technology provides for the capture of "true" flavor.

The acquisition will give P&G a vehicle through which it can bring these innovations to the marketplace, and Mr. Segalas said he expects a tea product to be in test market by spring, 1983.

"It's a case of a technical development looking for a brand," Mr. Segalas said. "It isn't like Orange Crush, where they bought the company to learn the business."

Although Tender Leaf is a relatively minor factor in the $1.25 billion tea business—it's been unadvertised for the past several years—consumers maintain a strong and favorable awareness of the brand. Nabisco picked up the brand when it merged with Standard Brands.

More generally, the move is yet another indication of the company's strong interest in the beverage area. It began its building process in 1963 with the acquisition of Folger Coffee Co., and has speeded up its activity in the past few years with the purchase of Crush International (soft drinks) and Ben Hill Griffin Inc.'s citrus processing operations.

As the fifth-largest brand on the market, Tender Leaf is especially

Advertisers hoping for short NFL strike

Nets try to hold grid dollars

NEW YORK—The tv networks, faced with a $400 million pro football fumble due to the players' strike, are struggling to keep possession of all those ad dollars.

The immediate problem for advertisers is the loss of ad weight in September. The tv networks have very few availabilities now in programing that would be attractive to male-oriented products and services. Other media are rushing in to offer time and space to the affected advertisers, and Turner Broadcasting System is poised to offer a schedule of "all-star" games by the striking players.

There is evidence that the tv community is thinking of the strike as a two-week problem, for they are not willing to do much talking about plans beyond that time frame. However, the picture is a good deal brighter for the nets in October; they believe skillful allocation of dollars in weekend sports, some male-slanted prime time programs and national spot can help take up the slack.

Turner's plans. . .Page 80.

Some agencies have expressed concern about keeping their clients' money in the marketplace during the strike. Said one harried executive, "It's getting toward the end of the year. Some clients might just decide to keep the money and make their yearend profit-and-loss statement look a whole lot better."

The nation's two leading brewers, Anheuser-Busch and Miller Brewing, are big spenders on pro football, but the size of their total ad budgets means the loss of NFL telecasts is not critical.

"We find the strike to be an inconvenience, but it is not an insurmountable problem," says Jerry Solomon, exec vp-sports and programing for D'Arcy-MacManus & Masius, the Anheuser-Busch agency. He noted A-B is also on college football games, the ESPN

McDonald's sues to halt BK effort

MIAMI—McDonald's Corp. went to court last week to try to stop Burger King's new comparative ad campaign from going on the air today. The action was expected (AA, Sept. 20).

The nation's No. 1 fast-food chain was seeking a preliminary injunction in U.S. district court here, contending that Burger King's advertising (*see earlier story, Page 4*) is "false and misleading." A hearing conducted Friday was continued by the judge until today, allowing the BK campaign to begin airing Sept. 26.

Wendy's International, whose products also are cited in the BK comparative drive, Friday challenged both fast-food chains to a taste-test competition which would be monitored by an independent

Woolworth to close all 336 U.S. Woolco stores

NEW YORK—F.W. Woolworth Co. will close all of its 336 Woolco discount stores in the U.S. as part of a major restructuring move and will concentrate on profitable divisions, including some of its growing specialty retail operations. In the first half of fiscal '82, Woolco units had an operating loss of $21 million on $1 billion in sales. Last year it lost $19 million.

Bristol-Myers tries Quadrin cough medicine

NEW YORK—Bristol-Myers is testing new Quadrin multisymptom cough formula in Omaha. Available in 3-oz. and 6-oz. bottles, Quadrin contains a cough suppressant, decongestant, analgesic and expectorant. Ad plans include tv, newspaper, trial-size displays, sweepstakes and shelf-talkers. Agency undetermined at press time.

Hardee's reportedly will stay with B&B

ROCKY MOUNT, N.C.—Hardee's Food Systems is sticking with Benton & Bowles as its agency for the consolidated Hardee's/Burger Chef business, estimated at $70 million including promotion, an agency source said. O&M, which had pitched for the account (AA, Aug. 23), will continue to handle Burger Chef until conversion to the Hardee's banner. Hardee's would not confirm, saying an announcement would come this week.

Yoplait Breakfast Yogurt going into test

MINNEAPOLIS—General Mills is testing Yoplait Breakfast Yogurt, containing fruit, nuts and wheat grain, in Portland, Ore., and possibly other

Kodak may tip answer to Sony's Mavica

By GAY JERVEY

Having pioneered "decision-free" disc photography, Eastman Kodak Co. is about to face fresh competition from Japanese competitors on several fronts—discs; another wave of increasingly plebian 35mm cameras, and the revolutionary filmless electronic-imaging system pioneered by Sony's Mavica.

The colossus of Rochester will be making some new waves of its own, however. Next week at Photokina, the industry's annual gathering in Cologne, West Germany, Kodak reportedly will show prototypes of tv converters for film disc display. This will clearly signal the company's much discussed, but until now never really confirmed, entry into Mavicaland.

For some time, Kodak has admitted only to studying filmless electronic imaging, while specifically hinting at a hybrid system that not only can capture the original image on film but also display it electronically.

Kodak is also likely to divulge plans to introduce in the U.S. a cheaper, fewer-frills version of the disc, the 2000 (AA, March 1). It is currently available in Europe and uses flash cubes rather than the extended life, battery-powered flash found in the top three models now marketed here.

According to a source, Kodak last July took out a patent for a compact, nonsingle lens reflex 35mm of the Snappy (from Canon) variety. The introduction of such a camera could provide Kodak with a viable means of entering the 35mm market without abandoning its mass-market roots.

Photokina will be nothing if not active. Sources say Sony will be displaying a more-developed prototype of the Mavica than has been seen to date. First announced last fall, the Mavica is a still camera that looks and feels like a 35mm, but is much more sophisticated. It records images on a tiny whirling magnetic disc that is loaded like a film cartridge and contains enough room for some 50 snapshots.

Thus, sources say Photokina will provide a final dress rehearsal before Sony details its plans for a spring U.S. rollout, to be officially proclaimed at the Photo Marketing Assn.'s annual trade show next March in Las Vegas.

Despite the Mavica's predicted high price—some $650 for the camera itself and another $220 for the accompanying disc player—it generally received welcome reviews. Analysts cited not only its pioneering possibilities, but also Sony's track record, having brought forth such marvels as the first portable fm radio, the Betamax videocassette recorder and the now omnipresent Walkman.

Reasonable—and in some cases reputable—facsimiles of the Kodak disc camera now also appear imminent. For one, Minolta is whispered to be introducing a disc prototype that reportedly will match Kodak's in technology and be priced at around $100. Other manufacturers, such as the Rahway, N.J.-based Continental Cam-

Business athletes star for Kent

First ad in the campaign that kept the $25 million Kent and Kent III cigaret account at Foote, Cone & Belding is designed to appeal to both men and women by "conveying confidence and independence," the advertiser says. Magazines, supplements and outdoor are scheduled.

Suits to follow agency closing

By JOHN J. O'CONNOR

New York—Anesh, Viseltear, Gumbinner's abrupt shutdown has left a group of unpaid, angry free lance illustrators, retouchers and photographers mulling lawsuits, complaints to the state attorney general's office and copyright infringement actions.

"They feel they have been the victims of a scam," said an artist's agent who has been attempting to locate other free lancers who are said to be owed money. The agent, who asked to remain anonymous, said the group reluctantly is looking at suing Kayser-Roth and Oscar de la Renta Ltd., both former clients of the closed agency (AA, Sept. 20). The amounts owed the half-dozen or so free lancers so far identified range from $3,000 to $30,000, the agent said.

At the same time, at least two publications say they have not been paid for current Oscar de la Renta menswear ads. A spokesman for *American Heritage* said the magazine had not been paid for eight de la Renta ad pages (worth $67,000) in the current issue. He said the publication was trying to settle the matter through discussions with the client and AVG.

Ironically, de la Renta is only the second advertiser to appear in *American Heritage* since the publication announced earlier this year that it would accept advertising for the first time in its 28-year history. Ads are limited to a single advertiser per issue (AA, June 14). *Bride* has not been paid $6,000 for a de la Renta ad in the current issue, an executive at that magazine said.

A Kayser-Roth executive, who asked not to be identified, said he was told of the agency's closing by Ned Viseltear on Sept. 20. "He told me that the agency had decided to fold and that 'everything was nice and clean,'" the K-R exec said. After the phone call, the executive said he wrote Mr. Viseltear a letter

Is Kuralt leaving CBS-TV?

By DIANE MERMIGAS

Whether or not Metromedia persuades Charles Kuralt to jump ship and anchor its new prime time newscast, the burgeoning New Jersey-based broadcaster has made clear its intentions to compete head-on with the commercial networks and to beat them by their own rules.

The 25-year CBS News veteran, who reportedly is unhappy about having been replaced in March by Bill Kurtis as co-anchor for the "CBS Morning News," recently met in Boston with Bob Bennett, Metromedia's senior vp of tv broadcasting & production, and Mark Monsky, vp-news for Metromedia's WNEW-TV, to hear about the company's plans for a new one-hour, prime time newscast expected to debut early in '83.

Sources say Mr. Kuralt is "intrigued" by the plan. However, the vacationing Mr. Kuralt was unavailable at press time for comment on whether he is interested in the post or in seeking release from his CBS contract, which has more than a year to go.

Mr. Bennett and Mr. Monsky

Burger King thinks it's found the sizzle

By CHRISTY MARSHALL

MIAMI—After experiencing what parent Pillsbury Co. called "strong sales vitality" this summer, Burger King Corp. believes it has finally put some sizzle back in its business. To keep the momentum going, the company has devised a strategy that it hopes will fry archrivals McDonald's and Wendy's.

Senior vp-marketing Kyle Craig attributes Burger King's record summer (over-all sales up 14%; average restaurant sales increased about 8% over last year) to new products (*e.g.*, bacon double cheeseburger) and its "Aren't you hungry?" advertising campaign. That creative effort was Burger King's first phase—"Now we are going for more," Mr. Craig said. The latest tactical attack centers on a comparative campaign going up against the other two hamburger chains (AA, Sept. 13), aimed at getting what Mr. Craig calls "a greater share of belly."

After a period of flat sales and a management shakeup, confidence is now running high at Burger King headquarters here. "We know we're better," Mr. Craig told franchisees in a specially made film to introduce the comparative campaign. "We're not afraid to tell people we're the best and why we're the best. We've decided we're not only going to fight the bully, we're going to invite the whole school to see us whip him in public view."

Symptomatic of the fast-food industry, Burger King's sales had been soft during much of this recession. In an attempt to get the chain back on track, the company has been involved in several executive-suite personnel moves. Last March, Jerry Ruenheck was named president-chief operating officer of Burger King Corp., passing along the presidency of Burger King USA to Jeffrey Campbell, previously head of marketing. Mr. Craig succeeded Mr. Campbell. Two months later, Norman Brinker, former president of Pillsbury's restaurant group, was named chairman-chief executive officer of Burger King, replacing the ousted Louis Neeb.

"Burger King has been relatively flat in real volume unit terms during the recession," said Michael Culp, analyst at Bache Halsey Shields Stuart, adding it was the same throughout the industry. "It [BK] is not abnormally weak, but I think they lost momentum in the last couple of years. They have had very high turnover in Miami, which is very upsetting to the franchisees. The replacement of Lou Neeb recently reflected dissatisfaction with the direction of the business."

According to Win Wallin, president of Pillsbury, the management in place now is secure. He added he was very pleased with Burger King's performance over the summer, although acknowledging at the company's recent annual meeting of stockholders that "returns are not totally acceptable" (AA, Sept. 20). He said Pillsbury's first priority for BK is "to improve the fundamentals of the business."

Throughout its system, Burger King has just completed its Shape-Up program, what Mr. Craig calls an operational awareness program designed to retrain and rally the troops. As a result of the Shape-Up program, Mr. Craig said "the attitudinal momentum out there is the best I have ever seen."

In fiscal year '82 (ending May 31), Burger King's sales were in excess of $2.3 billion, while earnings have been estimated at $130 million, up 10% from the prior fiscal year. The company now has 3,255 units in 50 states and 20 countries. In the coming year, it plans to add 200 to 250 stores in what it terms domestic "key sites." International plans are for about 75 new units

(Continued on Page 81)

McDonald's ad awareness down, survey shows

By JOSEPH M. WINSKI

The advertising of McDonald's Corp., which is bracing for a tough comparative ad campaign from archrival Burger King (AA, Sept. 13), already may be losing some of its hold on public awareness.

In August, 39.9% of Americans named McDonald's advertising as the fast-food advertising that first comes to mind, down from 43.4% who named McDonald's advertising in July and 49.2% who did so in June. The last two months' declines—3.5 percentage points in August and 5.8 points in July—are statistically significant under the methodology of adWatch, a joint monthly survey of consumer awareness by ADVERTISING AGE and SRI Research Center Inc., Lincoln, Neb.

AdWatch polls a random sample of 1,250 American adults by telephone; last month's polling was conducted from Aug. 1 through Aug. 21. AdWatch measures awareness of industry advertising by asking: "Of all the advertising for [one of 20 product categories] you've seen, read or heard in the past month, which comes first to mind?"

August was the first month since adWatch began in April that McDonald's score fell below 40% of

adWatch

total respondents. While the company still dominates fast-food advertising awareness, with a score more than five times that of runner-up Burger King's 7.4%, its margin has narrowed from nearly 9-to-1 in June, when it recorded its best score. Burger King's awareness level also fell in August, from 9.0%. Burger King had posted a significant 3.5 percentage point gain in July.

In actual numbers, McDonald's advertising was named by 116 fewer respondents in August (499 mentions) than in June (615 mentions).

Moreover, in over-all advertising awareness—not limited to any industry or product category—McDonald's fell to No. 5 in August, down from No. 3 in July and its lowest ranking since adWatch began. In August, 0.96% of the 1,250 respondents said McDonald's advertising first came to mind, compared to 2.4% who said so in July.

Since about late May, McDonald's national advertising has been handled by Leo Burnett U.S.A., which received the account when McDonald's dumped longtime agency Needham, Harpers & Steers.

■ AdWatch measures over-all advertising awareness by asking consumers, "Of all the advertising you've read, seen or heard in the last month, which ad comes first to mind?" In August, as in the preceding four months, Coca-Cola (3.76% of all responses) and Pepsi-Cola advertising (2.80%) ranked No. 1 and No. 2 in over-all awareness.

Philip Morris Inc.'s Miller beer (including Lite) advertising was No. 3 and Anheuser-Busch's Budweiser (including Budweiser Light) was No. 4.

New to the top 10 in August were *Time* magazine, No. 6, and Kibbles 'n Bits, a relatively new dog food from Quaker Oats Co., No. 7. Four auto makers—Chrysler, Ford, General Motors and Toyota—tied for No. 8. All had previously ranked in the top 10 at least once.

Dropping from the top 10 in August were Philip Morris' 7UP (No. 5 in July), Dr Pepper (from No. 8) and Bell Telephone (AT&T) and Consolidated Foods' Shasta soft drinks (tied for No. 9 in July).

Again in fast-food advertising, Wendy's, No. 3 in the category, recorded a 6.4% awareness rating in August, up from 4.8% in July and its highest monthly score. Wendy's launched its "You're Wendy's kind of people" campaign in July, after dropping its controversial "Ain't no reason to go anyplace else" line. The agency is Dancer Fitzgerald Sample, New York.

Another apparent beneficiary of a new campaign is Anacin, No. 2 in awareness in the medicine & drugs category. Anacin, a Whitehall Laboratories product, recorded a 3.8 percentage point rise in awareness to 10.6% in August, and narrowed the gap between it and No. 1 Tylenol to 6 points from Tylenol's 10.7 point lead in July. Tylenol's awareness level fell slightly in August, to 16.6%—its lowest adWatch score—from 17.5%.

Anacin in July began its "Fight back with Anacin" campaign featuring actress Patricia Neal. The campaign is the first Anacin work by William Esty Co.; advertising for the brand previously was han-

INNOVATIVE BINDERY SERVICES!

Out-of-the-ordinary affixing and labeling applications for the graphic arts industry, performed on a volume basis, sensibly priced and delivered on time.

HIGH SPEED AFFIXING

Product Sample Packets
Affixed to any carrier. Close register and in-line folding. High volume capabilities. Foods, cosmetics, seeds, etc. Bulk no barrier.

Plastic Card Affixing
Credit cards, I.D. cards, calendars—affixed to direct mail pieces with easy off adhesive. Inside affixing and in-line fold. Name matching.

Backbone Stripping
A perforated strip is mounted to backbone of bind-in inserts for the perfect bound magazines. Booklets, foldouts, full spread layouts. etc.

Bindery Hangars
For inserts bound into saddle-stitched magazines. Hangar is a counter balance on saddle, with fold to front or back. Perforated for tearout. Plain or printed.

Coin/Token Affixing
High speed application for cards, folders, envelopes and letters. Any coin or token may be used. In-line folding ok. Tight security.

Inserts and Onserts
Unlimited assortment of tipons affixed to magazine signatures, newspaper supplements and direct mail pieces. Inside tipping and in-line folding is common.

PRESSURE-SENSITIVE LABELING

Wafer Sealing
Adheres to all ink surfaces and no restriction on size or bulk. Diecut shapes and color matching. Quick and economical.

Carton Overlabeling
Update the printing with a pressure sensitive label. 4/c and diecut if needed. Misprints, special offers, price and ingredient changes. Close register.

Token Cards
Pressure sensitive token lifts off easily for relocation. Eliminates diecutting and patching.

Micro Fragrance Labels
Multiple affixing.

Seals, Emblems, Logos
Affixed to any carrier, inside or out. In-line folding.

"One Minute from Chicago"

WHO PUT THE MELLOW IN COFFEE?

It could be important to your marketing program. Because the same techniques that developed Mellow Roast Coffee for General Foods also put Arm & Hammer Baking Soda into over thirty million refrigerators, developed Hi-C Drink Mix for Coca-Cola, and Le Shake Yogurt, recently acquired by Kellogg.

They could be just what you've been looking for to restage that fading star, or create a successful new product's plan. Gerald Schoenfeld, Inc. now offers the "Better Concepts Program", innovative techniques developed for America's major marketers.

Question: While you're developing new products, who's watching the scores?

The answer to better concept scores—scores that exceed all bench marks—is better concepts.

Whether it's developing new products from scratch or treating old products like new, better concepts are the key.

To find out more about the "Better Concepts Program" call or write, Sonia Kallen, (212) 986-9257.

Gerald Schoenfeld inc.

341 MADISON AVENUE, NEW YORK, N.Y. 10017 (212) 986-9257

adbeat One Club goes to bat for homeless

HOMELESS NEW YORKERS have a new champion in the One Club for Art and Copy. The New York group has established a Homeless People's Project. Headed by Norman Tanen, associate creative director at Backer & Spielvogel, the One Club hopes to bring the plight of the street people to the attention of the public via print, radio and tv. The project also has aligned itself with the Coalition for the Homeless and is working to raise $10,000. . .

CAN YOU RECOGNIZE THIS DIABETIC? That's the question patients will see on posters in their doctors' offices below the photos of famous people that suffered from the disease. The program is sponsored jointly by the American Diabetes Assn. and Pfizer Inc. and was created by Impact Medical Communications, New York. The posters, featuring such deceased notables as Jackie Robinson, Jack Benny and Thomas A. Edison, will be sent to 70,000 physicians, hospitals and pharmacies. . .

AMERICANS OLDER THAN 55 are expected to double the amount of money they spend on drugs, home healthcare equipment, supplies and services in the next 10 years, according to a study by Find/SVP, a research company. The new 320-page study, called "The Non-Institutional Senior Market for Healthcare Products and Services," analyzes the market and discusses changes. The study costs $985 and is available from Find, 500 Fifth Ave., New York 10110. . .

DO YOU LOVE NEW YORK? Not everyone does. For instance, take Scott Carouge, an art director at Dancer Fitzgerald Sample, and his wife, Jackie Merri Meyer, an art director at Macmillan Publishing. They've expressed their feelings for the Big Apple in a book "I Loathe New York; A Humorous Look at the Rotten Apple." The 96-page book is being published by Collier Books, retails for $3.95 and is full of cartoons depicting the harsh realities of New York City life. It touches on such sore spots as crime, cockroaches, the high cost of living and the crazies. . .

ROMANCE NEVER FAILS: To entice concertgoers, the American Symphony Orchestra is appealing to their sense of love and adventure with a mailing by Ogilvy & Mather Merchandising, New York. "How to spend eight romantic Sunday afternoons in New York with the American Symphony Orchestra" suggests such diversions as a carriage ride in Central Park, sharing a freshly baked chocolate chip cookie or visiting Carnegie Hall for the 3 p.m. concert. . .

E.T. LICENSING: Papercraft Corp. and Jonathan Advertising, New York, are developing consumer and trade advertising campaigns featuring E.T. Also, E.T. will send messages home this fall via a line of Hallmark greeting cards, according to an agreement with Merchandising Corp. of America. Hallmark also has E.T. reproduction rights for its line of Springbok adult puzzles and stickers. Also, Topps Chewing Gum, New York, said it plans additional "E.T." picture cards later this year, along with "Smurfs" cards. Topps said that besides "E.T." and baseball cards, products featuring "Annie," "Wacky Packages" and football contributed to its $38.3 million sales for the first half ended Aug. 28. .

NEW PRODUCT INTRODUCTIONS climbed 11% during April and May compared with the same period a year earlier, according to the Nielsen Early Intelligence System. The 1,217 products introduced during the bimonthly period included substantial activity in health & beauty aids—up 23% from a year earlier. The slowest activity was in frozen food items, which declined more than 13%. . .

AN EARFUL: The new gimmick in costume jewelry is a little accessory called Earband-It from K-Judy Ltd., Redmond, Wash. Meant to be worn with earrings, the band clips on the middle edge of the ear. The bands are made of electroplated gold and sell for about $3.50 and $4.

Calvin aiming designer briefs ads at females

By PAT SLOAN

NEW YORK—Just a hint of an appendix scar mars the torso, clad in men's white briefs, from which extends a pair of well-developed thighs. The photograph of this tawny and brawny male hangs above a secretary's typewriter. It is not of her boyfriend or even a celebrity.

The photo is an ad for Calvin Klein's latest fashion venture, men's underwear. Why this anonymous male model for office pinup? "I like his looks," the young woman explains. Better than those of that other underwear manikin, baseball star Jim Palmer? "Well, I like his body, tanned and strong. That's the way to put it," she says.

Calvin Klein's underwear could be in the forefront of a trend toward designer briefs for men.

And, perhaps, because she likes the way he looks and how those briefs look on him, she says she will buy Calvin Klein underwear for her boyfriend.

That is the point when it comes to marketing men's underwear, and it's not lost on those who sell it. Women buy 70% of all white underwear. And though men have more of a say when it comes to buying fashion underwear, women still account for between 50% and 55% of all sales in this segment of the category.

Men's underwear generates about $900 million in sales industrywide each year, with the average price of a garment estimated at about $5. Over-all, growth of the category has been on par with inflation. However, fashion underwear has outperformed the category in general, yielding annual sales increases of better than 15%.

One of the first major marketers of men's clothing and basic underwear to tap the fashion market was Jockey International, the privately owned Kenosha, Wis.-based company that accounts for an estimated $65 million to $75 million in sales of underwear at wholesale, according to sources.

Jockey styled a fashion line back in the 1970s, and in 1975 began using sports celebrities to endorse the line and become pinup boys. Included in that group is Mr. Palmer of the Baltimore Orioles, who today peers out from print ads and bus-stop shelter posters in Jockey fashion briefs.

Since 1979, Jockey has increased its ad spending about 73%, according to Bill Herman, vp-advertising and sales promotion. Measured media spending is put at more than $2.3 million in 1981, through Bozell & Jacobs.

For Jockey, the plans are to push aggressively ahead in the advertising of its fashion styles while adding new lines and colors. One of its most recent additions is Yves Saint Laurent bikinis, basic briefs and boxer shorts.

Besides YSL and Klein, however, the designer field is slim. Christian Dior markets a line and Pierre Cardin might, but that, said Bob Garey, president of Calvin Klein Menswear, is the extent of the competition now. All together, designer underwear sales account for a small portion of total underwear sales—much less than 8%, by Mr. Garey's estimates.

Department and fashion-specialty stores are where these products are sold, beside the stores' own label underwear as well as that of Jockey's. And as big as Jockey is, sources say, the greater portion of underwear sold in department stores is private label.

Jockey and private-label brands therefore will be Klein's toughest competition. Klein's product, of course, is priced higher: A private label three-pack could fetch about $10; a three-pack of Jockey briefs sells for about $11; three Calvin Klein basic briefs command $14.50.

Although more costly and sold in few stores at this point, Mr. Garey said the product has sold well. "Bloomingdale's, where the underwear was first introduced in August, has reordered five times in four weeks," he noted. Burdine's in Florida has sold more than 40% of its stock already in just one store, and, as a result, will add the line in additional stores.

In San Francisco and Los Angeles, where the underwear is not yet in stores, customers have placed orders after seeing ads in *People* and *GQ*, the company says.

The ads appeal to women, Mr. Garey said. But they and the product are designed to appeal to "any man who wears underwear. All of our styles, even the bikinis, will fit 95% of the male population."

Nevertheless, he said, to say that Calvin Klein may do for underwear what he did for jeans may be an "overstatement at this point." Retailers are extremely cautious with all inventories right now, he pointed out, and the company is waiting to see how the product sells on a continual basis before making any judgments.

Through Calvin Klein's in-house agency, CRK, somewhat less than $500,000 will be spent on print ads and bus-stop shelter posters to ensure that demand is created and maintained. Besides *People* and *GQ*, *Esquire* and *Architectural Digest* also are being considered.

The ads, conceptualized by Mr. Klein and shot in Greece by photographer Bruce Weber, already have been dubbed controversial by some who see them as sexually suggestive, whether the eye of the beholder is female or male.

Said Mr. Garey, "Yes, it's been controversial because of the shot and because of the guy. And because underwear has not been shot in the most interesting way. But it's beautiful and it could have an impact on the designer underwear business."#

McDonald's ad awareness falls

(Continued from Page 4)

dled by Whitehall's house agency.

In soft drinks, Coca-Cola regained the top spot from Pepsi-Cola, although the awareness scores of both fell in August—Coke's to 24.0% from 25.4% and Pepsi's to 23.3% from 25.8%. Pepsi had led the category for three straight months.

The leader in paper products changed hands for the third month in a row. In August, the leader was Procter & Gamble's Bounty, with an 8.0% awareness level. July leader Charmin, also from P&G, fell to No. 2 with 7.8% of all responses. Scott, the category leader in June, remained third for the second straight month with a 6.6% score.

Other new category leaders in August were Folger's in coffee, dropping Maxwell House to No. 2; Prell in soap/shampoos, replacing Coast, and Riunite in wine/liquor. Paul Masson moved from unlisted to No. 2 in wine/liquor; July leader Gallo fell to No. 3.

The battle for top awareness in beer remained close, with No. 1 Miller edging out Budweiser by 1.1 percentage points, 13.6% to 12.5%. Miller won by 1.5 percentage points in July, after Budweiser had captured the top spot in May and June. Coors (6.6% awareness level in August) was third for the fifth straight month.

In cameras & equipment, No. 3 Polaroid continued to slide, although its August decline, to 5.8% from 6.2%, was the smallest in its five-month decline. Polaroid's awareness level has dropped 10.2 percentage points since April, the most of any advertiser followed by adWatch.

Toyota's awareness level rose a significant 3.04 percentage points in August to 11.8%, enabling it to move up to No. 2 in cars/trucks, breaking the Ford-Chevrolet-Toyota pattern that had prevailed for the first four months. Ford remained No. 1 in August with a 14.1% score, up from 13.4%, while Chevrolet dropped to No. 3 despite increasing its awareness level to 11.4% from 10.2%.

Skoal chewing tobacco made its debut in the top three in tobacco products, finishing third with a 2.3% score. Salem dropped out of the top three. Skoal was the first noncigaret advertiser to break the top three in the category.

Also appearing among the top three for the first time were General Mills' Total, No. 3 in cereal; Lipton, No. 3 in coffee/tea, and Coca-Cola Co.'s Minute Maid, No. 3 in packaged, canned and frozen foods. They knocked General Foods' Fruit & Fiber cereal and Sanka decaffeinated coffee and Stouffer's from No. 3 in their categories in July.#

Ad agencies expert at forecasting tv fare's fate

An Advertising Age roundup

Now that the three tv networks have pruned their crop of nearly 100 prime time series pilots down to 25 new fall 1982 series, the viewers will decide what becomes popular.

And the agencies charged with buying tv time have committed millions of client dollars in these new entries and returning series, based on their crystal ball gazing into the fourth quarter.

Philip Burrell, vp-network programing, **Dancer Fitzgerald Sample**, saw the autumn schedule shaping up as one with "heavy casualties." As to which network may emerge victorious, Mr. Burrell foresaw CBS slightly ahead of ABC in a very tight Nielsen race.

Examining such factors as content of pilots or other episodes previewed, audience flow from leadins, scheduling and demographic appeal, Mr. Burrell thought the fall hits—in terms of commercial success rather than quality—should include CBS' "Newhart" and "Gloria," ABC's "Matt Houston," "It Takes Two," "Family Ties" and "Tales of the Gold Monkey."

He thought likely failures would include "Tucker's Witch" on CBS, "Ripley's Believe It or Not" on ABC and NBC's "Voyagers!" Mr. Burrell is more definite about these shows, which he said are "doomed": CBS' "Square Pegs" and "Seven Brides for Seven Brothers," ABC's "Star of the Family," "New Odd Couple" and "The Quest" and NBC's "Knight Rider," "Silver Spoons," "Powers of Matthew Star" and "Devlin Connection" (with the two latter entries delayed from last fall).

Shows given a fair chance of survival and dubbed as long shots in the DFS analysis include CBS'

(Continued on Page 72)

AA picks

(Continued from Page 1)

package. Then, too, CBS' series strength is concentrated mainly on two nights: Sunday and Friday. In both cases, some slippage is a possibility. A key indicator will be the performance of the opening Friday hour. Will "The Dukes of Hazzard" suffer from the departure of its two stars, or are humans on that show of secondary importance to General Lee (that hot rod those crazy Duke boys tear up the countryside in)?

Circumstances beyond ABC's control, however, could thwart a return to the top. If there is a long NFL strike, ABC can kiss Monday night goodby, leaving the night wide open to huge CBS numbers. Baseball, in this case the World Series, also could harm ABC.

If the Series runs a full seven games on NBC, ABC would get lousy numbers on at least two Tuesday and Wednesday evenings, traditionally two of the network's biggest nights. If it doesn't go seven games and two less-than-glamorous teams are matched up, then ABC catches a huge break.

As for NBC, it still will finish in third place. But instead of being a laughable third, the network appears poised on the brink of a major move.

As for new and emerging tv stars, it seems, at this point, that some "old" stars will garner most of the attention. Patty Duke Astin, Sally Struthers, Bob Newhart, William Shatner, Erin Moran and Scott Baio should prove to be ratings winners. New faces that bear watching include Catherine Hicks, Tim Matheson, Stephanie Zimbalist (a second-generation tv star) and Stephen Collins. "Bring 'Em Back Alive" will be dead by the end of the season, but certainly won't harm Bruce Boxleitner's rising star.

The new programs that are sure to make the ratings grade include: "Newhart," "Tales of the Gold Monkey," "9 to 5" and "Gloria."

Rated as having virtually no chance for survival are: "The Quest," "Voyagers!" "Powers of Matthew Star," "Seven Brides for Seven Brothers," "Knight Rider" and "Square Pegs." Other losers include: "The New Odd Couple," "Star of the Family," "Tucker's Witch," "Devlin Connection" and "Silver Spoons."

Returning shows that should breathe their last include: "Benson," "Knots Landing," "Greatest American Hero," "Father Murphy," "Private Benjamin," "Love, Sidney" and "CHiPs."

The marginal entries, the ones that, depending on luck, might have a shot at survival, include: "Taxi!" "Filthy Rich," "Cheers," "Matt Houston," "St. Elsewhere" and "Remington Steele."

These stories on the new network tv season (*see also Pages 62, 63 and 64*) were written by AA senior reporters Colby Coates and James P. Forkan in New York and reporters Bob Marich in Los Angeles and Diane Mermigas in Chicago.

Estimated shares, prices for prime time tv programs

(Eastern time) (1982-83 season)

Source: Nielsen Television Index

Nielsen updates tv data based on Census results

NORTHBROOK, ILL.—When 1980 Census data were released last year, they unleashed a series of revisions in virtually all statistics used by government and business.

Tv certainly was no exception, and it fell upon A.C. Nielsen Co. to update most of its data, ranging from the tv household universe estimate to the smallest demographic minutiae, *e.g.*, all persons aged 2-to-5 years in tv households.

In estimating population trends, Nielsen considered such elements as average life expectancy and death rates, projected birth rates and immigration figures.

Since it generally is easier to predict average life expectancy, Nielsen believes that the estimates for all persons aged 12 years and older are more likely to be accurate than for those younger than 12 years of age because of the nation's birth rate.

As a result of its population tracking, tv's record keeper unearthed a number of trends that are detailed in the accompanying chart.

For example, Nielsen says that the number of households will continue to increase, albeit at a slightly softer rate.

Growth in the all-important 18-to-49 demographic will continue mainly through 1990. After that, it will slow down significantly, and the 25-to-54 group will become much more important to advertisers.

Until 1990, the 50-plus group will expand at a slower rate than the 18-to-49 group; thereafter, the former category will accelerate as the post-World War II baby boom enters the older population segment.

Meanwhile, the 2-to-11 age group, which bottomed out in the early 1980s, will begin to show moderate increases until at least 1995, when it again will start to decline.

Another all-important advertiser target, the teen-age category, will continue to shrink until approximately 1990. By the year 2000, however, that trend should reverse markedly.

These population shifts affect tv in the following ways: Until the year 2000, the average number of people per tv household will have declined nearly one person per household.

The sharpest decline will be among men and women 18 to 34; Nielsen estimates a 33% dip in that key segment. The latter half of the 18-to-49 demographic, 35-to-49 years, will continue to expand until about the middle of the 1990s before leveling off.#

Nets look to stem audience erosion

NEW YORK—For the advertiser, it is the demographic rating, not the household number, that makes or breaks a prime time buy.

CBS-TV took a leadership role and refused to give demographic guarantees for the upcoming season. In part, the network was reacting to the problems it and the other networks had in meeting demographic projections in the previous season.

The tv networks, with a few exceptions, took their lumps last season, particularly in the delivery of the key female targets, 18-to-49 years and 25 to 54.

For example, at the end of the 1980-81 season, CBS and ABC were in a tie for the lead among women aged 18 to 49. But after the 1981-82 season, both networks lost ground, though ABC managed to hold onto a shade more of its female audience. NBC already was running at a major ratings deficit, with that decline widening at the end of last season.

However, ABC long has been the leader in the 18-to-49 segment, while CBS always skewed a bit older. Thus CBS' losses in the 25-to-54 segment were even more harmful.

Though all three networks lost ground, ABC's decline was smaller even though CBS still eked out a victory.

As for the male portion of the audience, ABC was the only network to improve its standing at the end of last season. What had been a narrow gap between CBS and ABC widened, with CBS showing about a 10% loss. All the more dramatic was third-place NBC's 17% loss in male viewing.

In the 25-to-54 male breakout, CBS, the leader in 1980-81, suffered a 7% decline while ABC was the only network to post gains. As a result, CBS surrendered its lead. And NBC was in trouble with a 16% drop between the 1980-81 and '81-'82 seasons.

As for the coming season, two basic scenarios could unfold.

On one hand, the networks could reverse the audience erosion trend with the likelihood that ABC would firm up its leadership roles in the 18-to-49 segments, with CBS doing likewise in the 25-to-54 area. Both networks would be affected by a stronger schedule of NBC programs, with ABC probably suffering a bit more than CBS since NBC has loaded its schedule with younger skewing programs. At the same time, NBC traditionally skews toward older audiences in rural counties, which means NBC could make inroads at CBS' expense.

The other scenario, the grim one, calls for continued audience erosion, meaning the demographic leaders at the end of the 1981-82 season would be about the same as the end of the 1982-83. Nevertheless, all three networks would be under more advertiser fire as there would be an across-the-board loss. Leadership positions would stay relatively the same, but underdelivery would continue to mount.#

View from Chicago stations

(Continued from Page 63)

sidered to be genuinely funny. Many local advertisers believe the show has a good chance to take over the 9 p.m. (ET) time period when "M*A*S*H" vacates it in late winter.

The most difficult new show to sell is "Seven Brides for Seven Brothers," which is viewed as a dud. Advertisers, however, are high on "Square Pegs," which they view as another "Happy Days" and a sure win with young viewers. They also are high on "Bring 'Em Back Alive," which they consider good tongue-in-cheek, high-adventure fun. But they wonder how much of this new genre, inspired by "Raiders of the Lost Ark," viewers can tolerate.

■ They consider local Chicago boy Bruce Boxleitner, star of "Bring 'Em Back Alive," to be one of the more exciting new series stars.

Advertisers have high hopes for "Tucker's Witch," as long as the network downplays the supernatural elements of the show and highlights the chemistry between Catharine Hicks and Tim Matheson, who should be popular with younger viewers after appearing in the film "Animal House."

Advertisers welcome the addition of "Filthy Rich" as a replacement for "Mama Malone" because it is a funnier show with proven ratings from its limited run this summer. "Gloria" also is proving a popular sell with local advertisers, who consider it perfectly paired with "Archie Bunker's Place" on Sunday nights.

Movies continue to be a big draw for CBS. Advance local sales of the miniseries "The Blue and the Gray," which airs during the November sweeps, have been phenomenal.

Local advertisers expect CBS to handily win Sunday, Monday and Friday nights. They believe "Magnum, P.I." will continue to make a strong showing on Thursday to improve the network's performance that night.#

Starry-eyed

NEW YORK—Such tv names as James Arness, Lorne Greene, James Garner, Barbara Eden and Angie Dickinson may have lost their series, but the celebrity still is a sought-after commodity by the networks, *e.g.*, in the form of guest stars such as Helen Hayes, due on the Oct. 2 "Love, Sidney" on NBC, Lana Turner and E.G. Marshall on CBS' "Falcon Crest," Marie Osmond, Ernest Borgnine, Meredith Baxter-Birney and others in a two-hour "Love Boat" on Oct. 2, Greer Garson on a subsequent "Love Boat," Sugar Ray Leonard on ABC's "Benson" and Mr. T (famous for his "Rocky III" role) due on NBC's Oct. 2 "Silver Spoons," which on Oct. 9 will feature John Houseman as a guest star.#

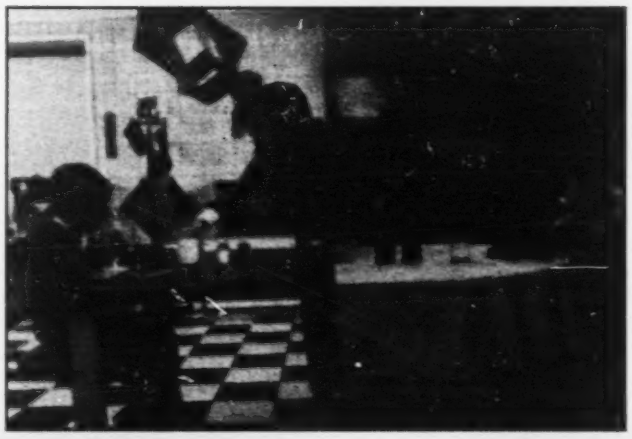
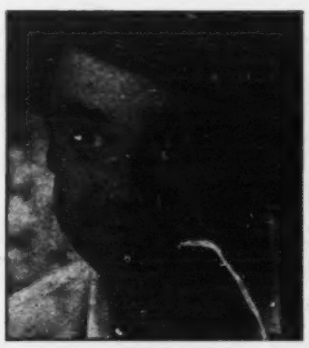
One for all, all for one

C.F. Mueller Co. is introducing the first new product in its 117-year history—Pasta Shapes & Sauces. The five-item line is debuting in Buffalo/Rochester and Miami. In this Ogilvy & Mather spot, Mom discovers she doesn't have to prepare separate side dishes for her husband and son anymore, since they both will eat the new product.





AFTER 'SABOTAGE' DEATHS

J&J yanks ads; Tylenol reeling

NEW BRUNSWICK, N.J.—Johnson & Johnson pulled all advertising for its No. 1-selling Tylenol pain reliever in response to at least six deaths in the Chicago area late last week. The "sabotage" deaths are linked to cyanide-laced capsules of Extra Strength Tylenol.

The company would not speculate on when it would resume advertising for the brand, which is the top-selling over-the-counter drug nationally and J&J's most heavily advertised product.

The situation will surely curtail the company's success in Tylenol's two fastest-growing segments—extra strength and capsules. A source at a major Chicago drug retailer speculated that Extra Strength Tylenol was "as good as dead."

The Food & Drug Administration Friday said that although it believes the problem is confined to the Chicago area, the public should not use the product until the situation is clarified.

FDA believes tampering occurred at the retail level, with products removed from the shelves, the cyanide added, and then returned to the shelf. The agency said the cyanide found in capsules from bottles produced in two different plants—one in Pennsylvania and one in Texas—makes it "unlikely" that the contamination occurred at the manufacturing level.

The Proprietary Assn., the leading trade association for marketers of otc products, expressed alarm that the Tylenol tragedy has become a "carrier" in news media for "slanderous" attacks on the safety and effectiveness of otc products.

Tylenol has been whipping its competitors in the $1.2 billion analgesics market, with recent shares of about 35% for the line and about 25% for Extra Strength.

Nearly all of Tylenol's advertis-

last minute news

Campbell Soup goes national with Prego sauce

CAMDEN, N.J.—Campbell Soup Co. is introducing nationally Prego spaghetti sauce, which has been available in about half of the country. The company also is adding a new flavor, marinara spaghetti sauce, to the line in New York and Philadelphia. Leber Katz Partners, New York, handles.

N.Y. intro for low-tar Lucky Strike breaks

NEW YORK—American Tobacco today will break introductory advertising here via Laurence, Charles & Free for its new low-tar version of Lucky Strike filter cigarets, currently in about one-third of the nation. American said the brand has gained a 0.5% to 1% share in other markets.

Marschalk resigns Maybelline business

MEMPHIS—Schering-Plough's Maybelline has been resigned by Marschalk, New York, which has handled creative only for Moisture Whip lines on a fee basis. Marschalk said it saw no "long-term growth potential" since media was handled by S-P's house shop here. A review is planned.

Geer, DuBois gets rest of Premiere Wine

NEW YORK—Remy Martin Amerique's Premiere Wine Merchants moved to Geer, DuBois from Della Femina, Travisano & Partners as a direct result of Della Femina's having competed for the $6 million Hennessy cognac account that Schieffelin & Co. decided to keep at Lord, Geller, Federico, Einstein (AA, Sept. 27). Remy Martin marketing director Steve Francesco also said De Luze Classique Bordeau wine, the test

(Continued on Page 8)

Pepper plots local approach

By TOM BAYER

Dr Pepper Co.'s "Pied Peppers" will dance their way into history come Jan. 1.

To secure a bigger share of the soft drink market in 1983, the No. 3 seller will shift to a back-to-basics marketing strategy that focuses on a broader audience with heavy sampling, locally tailored media plans and a new ad theme: "Dr Pepper made a Pepper out of me."

Gone will be the dancing celebrities converting Peppers left and right, singing the "Be a Pepper" strain. And gone will be the broad network tv buys that carried the Pepper evangelism.

In place of the dancing Peppers whose choreographed glee has been widely imitated in marketing other consumer products, Dr Pepper and agency Young & Rubicam have created a rousing explosion of energy to focus attention on the product and encourage trial and conversion. A subtheme of the drive is: "Try it. Try it. Try it."

Charles L. Jarvie, president-chief executive officer of the Dallas-based company, told bottlers last week that the 1983 marketing plan had been developed from the bottom up. "This is a local business, and we've learned that the approach of taking a national plan and fitting it to local markets isn't the best approach for Dr Pepper," Mr. Jarvie said.

Explaining Dr Pepper's localized plans, Bill Tolony, western region sales manager, said that "tv networks are simply not as effective or efficient in delivering our target audience." For example, the company has frequently advertised on

More ratings data before makegoods, net says

NFL subs failing to score

By JAMES P. FORKAN

NEW YORK—The tv networks reluctantly have begun penciling in still more National Football League replacements as the players' strike showed signs of stretching into a third week.

Their reluctance is all the more pronounced by the arrival of Nielsen ratings that indicated the substitutions, whether in prime time or "sports prime time" (weekend daytime), have a long way to go in filling the NFL's shoes.

"Outlaw Josey Wales," a rerun Clint Eastwood western, generated a 16.1 homes rating for ABC as its Sept. 27 "Monday Night Football" filler. That was down nearly 4 rating points from the 19.9 averaged by the previous week's NFL prime time show, the last Monday night game before the strike. The week before that, the NFL notched an incredible 24.9 rating, the highest numbers tallied by a season-opener "Monday Night Football" telecast.

TBS sponsors line up. . .Page 2.

During the week ended Sept. 26, the sudden insertion on Thursday night of "The Cheap Detective" movie for the NFL game, and the lack of adequate promotion, translated into a puny 10.9 rating for ABC. The week before, by contrast, ABC's Thursday NFL special scored a 17 rating.

ABC so far has been forced to advance the air date of at least one major movie title, "Coal Miner's Daughter," from November to Oct. 4 (AA, Sept. 27). As Paul Schulman, who heads Gardner Adver-

SILENT ON ELECTIONS

GOP takes to air in 'economy' pitch

By RICHARD L. GORDON

WASHINGTON—A seven-day tv blitz by the Republican National Committee opens this week, reminding voters that Ronald Reagan is "keeping his promises" and that inflation rates are down. But there's not even a mention of the November elections.

Polling has convinced the GOP national committee's ad stragegists that voters who feel positive about the President also intend to vote for Republicans on Election Day. "The correlation is so strong that we don't even have to mention the elections," said Kathryn Mattoon, RNC director of political communications/advertising.

The RNC drive complements the separately managed ad campaign of the Republican National Congressional Committee, which uses a harder-sell pitch to convince voters to elect Republicans to the Democratic-controlled House of Representatives.

The 30-second tv spot breaks in New York City, Washington, D.C., Philadelphia and about 40 smaller markets Oct. 7, with a $700,000 media budget, part of an over-all $5.5 million ad drive this year.

In the spot, done by Hal Larson Etc. and ALN Productions, both San Francisco, a middle-aged woman, unpacking groceries in a kitchen, tells viewers: "Well, things are lookin' up. Inflation's coming down. Oh, prices are still too high. But they're not going up every week, the way they did before we elected President Reagan. . .Mind you, there's a lot more to do. . .But he's made a beginning."#

Woman says President Reagan is keeping his promise to bring inflation down in 30-second spot to run in over 40 markets.

BBDO, O&M lead race for Dodge ad account

By RALPH GRAY and JOHN O'CONNOR

Two ring-wise veterans of the automotive agency business answered the bell for the $100 million Dodge car and truck account.

Lee Iacocca, chairman of Chrysler Corp., who announced that he would split his Chrysler Corp. business, now solely with Kenyon & Eckhardt, would identify only BBDO as one of the contenders, but Ogilvy & Mather is the second. Ross Roy Inc., Chrysler's merchandising agency, denied reports it was the third.

Some insist BBDO was inches away from signing a contract, but others noted that Mr. Iacocca loves to do the unexpected.

Asked if BBDO had the inside track, Mr. Iacocca said. "No. We're doing a search with three different agencies, and BBDO is one of them."

It's almost a rematch of the Lincoln-Mercury agency competition that followed Kenyon & Eckhardt resignations to take on Chrysler. Now Chrysler is splitting off Dodge from K&E.

Campana succeeds Givens as top Chrysler marketer... P. 74.

BBDO, which lost the Dodge account in 1979, and O&M were candidates for L-M. Both lost and O&M was also dropped by Mercedes-Benz in the process.

That won't be repeated this time, since O&M has the green light from $7 million-client Peugeot to go after the Dodge business. O&M will retain Peugeot because there isn't a conflict—Chrysler owns 15% of Peugeot and works closely with the French auto maker.

When Mr. Iacocca declined to name the other candidates, O&M emerged at the head of the speculation list, and others included N W Ayer, Detroit; Ted Bates Worldwide, New York, and Benton & Bowles, New York.

■ The list started to shrink almost immediately. Ayer, with a General Motors corporate account, said it wasn't interested. B&B wouldn't talk, but industry observers doubted its participation. Bates' William Esty subsidiary has Nissan

Turner sponsors line up, if. . .

By MAURINE CHRISTOPHER

Though still buffeted by court challenges, the Turner Broadcasting System has been working overtime to get advertisers lined up for WTBS' hoped-for coverage of the National League baseball playoffs and the National Football League Players Assn.'s all-star games.

If Turner's Atlanta Braves were to capture the western division baseball crown in the down-to-the-wire pennant drive over the weekend, TBS' major tv and cable sponsors were standing by to carry the playoff games on WTBS and its catv lineup of more than 4,200 systems across the country—assuming, of course, that the courts don't intervene. This client list includes Anheuser-Busch, Eastern Air Lines, Coca-Cola, Toyota, Gulf, Canon cameras and Red Man chewing tobacco.

At press time, there was even the possibility of a single tie-breaker game that would determine the division championship for the playoff series.

Priced at about $10,000 per 30-second spot, the playoffs should boost the superstation's billings by more than $2 million. In addition to those advertisers, the Braves have attracted 40 to 50 scatter buyers during their best season ever. Gerry Hogan, vp-sales, said a little "football money" had switched to the Braves after the NFL players went out on strike.

As if the suspense on the playing field weren't enough, ABC-TV—holder of the regular network tv rights to this year's baseball playoffs—and 10 baseball teams took TBS into U.S. district court in New York in an effort to enjoin WTBS from satelliting those games to its more than 22 million homes.

There are some at ABC who are rooting against the Braves, for if they don't make the playoffs, the judge need not issue what could become a precedent-setting ruling. The judge last week heard arguments from a number of witnesses, including owner Ted Turner.

It is WTBS' superstation status that complicates matters. While home team tv stations always are allowed to carry their teams' league playoffs, WTBS raised new questions. ABC and the owners charge that the wide WTBS coverage would violate ABC's contract with organized baseball.

A day before the baseball suit got under way, TBS was slapped with still another complaint, involving football. Nine teams representing the 28 members of the NFL filed suit in New York state supreme

Bruns out at Bates in policy tiff

By GAY JERVEY

NEW YORK—After 18 years at Ted Bates Worldwide, Robert A. Bruns last week resigned as the agency's president. His reasons, officially at least, boiled down to divergent business philosophies between himself and agency chairman Robert Jacoby.

No successor has been named and, for the time being at least, Mr. Jacoby will assume Mr. Bruns' responsibilities.

Mr. Jacoby expressed surprise at the resignation, explaining that while he and Mr. Bruns did disagree on certain notions—namely which size clients to pursue and how to do so, and how to best expand the agency's personnel—he had no feeling of irreconcilable differences.

Mr. Jacoby continued, "We had a difference of opinion over my desire to expand and our capabilities in the creative area, particularly in our ability to buttress our abilities in image advertising—to hire more creative people and people with experience in production. We want to keep our strength in Unique Selling Proposition [USP] and other means of brand differentiation, but I did want to hire

Creative hybrid puts 'fist in glove'

Search goes on to pin down what is uniquely Canadian

By Carolyn Hulse

In his July 5 column in *Macleans* magazine last summer, senior editor Peter C. Newman called "the great scavenger hunt for the Canadian identity" a useless quest. "Canada," he continued, "is a nation of 24 million characters in search of an author; a country of ornery individualists who refuse to be categorized."

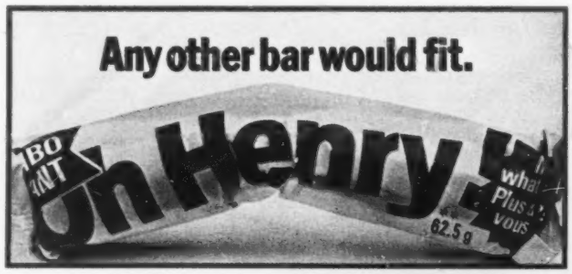
"For many of us, Britain represents the state of the art, while U.S. ads seem almost entirely given over to talking heads. In the U.S., you don't look for an idea; you look for the right spokesman."

While Canadians are endlessly absorbed in self-examination, seeking to discover just what it means to be Canadian, Americans often dismiss the question, smug in their belief that Canadians are "just like us." U.S. companies are regularly accused of treating this enormous country as a "back yard" or a "51st state."

Some more savvy observers speak of "English Canadians" and "French Canadians," but few show any real understanding of the ways in which cultural distinctions permeate every level of social, economic and political life in Canada, and, more important, have resulted in the evolution of unique Canadian sensibilities.

Advertising in Canada necessarily reflects this diversity, as well as the struggle to pin down a coherent image of the "typical" Canadian. "We find ourselves in the middle of a mental tug-of-war," says Bob Byron, national creative director with J. Walter Thompson Co., Toronto.

"We try to reconcile the literal, energetic assertiveness of the U.S. with the lateral, stylish wit and look of the U.K. American advertising tends to be a steel fist, British advertising a velvet glove. When we combine the best of both, putting the fist in the glove, we can be terrific. When we lean towards the best of one, we can be very, very good. When we can't make up our mind, we are obviously in between, usually offensive, likely innocuous and possibly invisible. But maybe, just maybe, that's what Canada and Canadians are like," muses Mr. Byron.



Transit advertising, a British and Canadian forte, often relies on the art of understatement and delights in the unexpected. (Agencies: Vickers & Benson for Oh Henry! and Ogilvy & Mather for Ontario Egg Marketing Board.)

But one creative director's view of Canadian advertising as a happy marriage of British and American style is not another's. Anthony Houghton, creative head of Ogilvy & Mather, Toronto, believes Canadian creative "is more influenced by British creative than Canada's geography would lead us to expect. For many of us, Britain represents the state of the art, while U.S. advertising seems almost entirely given over to 'talking heads.' I get the impression that in the U.S., you don't look for a creative idea; you look for the right spokesman."

However, continues Mr. Houghton, Canadian advertising has not yet matched its British forebear in quality. British advertising is "very sharply focused, very single-minded, and really goes whole hog. Canadian creative is much softer, more laid-back. It is often characterized by beautifully produced and wonderfully lit production of rather empty ideas. While it does constitute a creative 'look,' there is a growing impatience with wonderful production values, dazzling art direction and luscious cinematography—an attitude which could lead us to some pretty good stuff in the next two to three years."

Harrison Yates, senior vp-creative director of McCann-Erickson, Toronto, agrees that the influence of the British has been primary, largely because of their "better feel [as opposed to Americans] for developing a brand's character." And, as Canada's own creative style evolves from this, Mr. Yates sees it becoming more and more nonverbal, with technique assuming the same importance as the idea. But, like Mr. Houghton, he warns against technique overwhelming idea.

"In this business, ideas have always been at a premium, but this is particularly true in Canada," agrees Peter Lanyon, creative director of Cossette Communication-Marketing, Toronto. "Since we do not have the budgets U.S. agencies have, and the recession has further limited what we do have, we must rely on strong, simple and original ideas, rather than on expensive American production techniques. We can seldom afford exotic locations, a cast of thousands or expensive Hollywood celebrities; this is why Canadians have always been strong with simple ideas in tabletop and studio shoots."

In the "strong and simple" area, Mr. Lanyon says, Canadians have always been strong with simple ideas in tabletop and studio shoots.

Recession game plan

(Continued from Page M-9)

me hard-nosed creative that works," is the client refrain heard most often by Don Holman, president of McCann-Erickson, Toronto.

Mr. Anfield agrees that, in Ontario at least, there has been an increase in "more specific, hard-sell, product benefit-oriented activity."

Since the aversion to "prettiness" is accompanied by a far greater reluctance to spend production dollars, it is inevitable that print advertising should be rediscovered, says Mr. Clopet. "During the tv age, many Canadian shops lost the art of great print; in the '80s, print training programs will return and with them will come the reemergence of creative superstars like David Ogilvy and Leo Burnett."

Mr. Anfield adds that in Canada creative strategy better be "pro-market," geared to regional and cultural sensibilities, even when adapting a U.S. campaign may be cheaper.

• **Creative targeting.** As fragmentation continues and costs of traditional media soar, agencies need to have a "thorough understanding of new and changing media as we redefine how to reach people one on one," says Mr. Clopet. As a corollary, he adds: "Better research techniques need to be developed which evaluate long-term vs. single-exposure advertising."

• **Supplementary services.** Agencies will have to differentiate between themselves by offering special services (audiovisual, direct response, public relations, new product development) which formerly went to outside specialists.

Many agencies are aggressively broadening their financial commitments in these areas as they seek to become "total communications companies."

• **Better management.** "Effective management for the '80s will combine the entrepreneurship of Europe with the business acumen of the U.S.," predicts Mr. Clopet.

"There will be an end to American companies sending up second-stringers without international managment experience. If someone 'back home' is the one declaring what's good for Canadians, multinationals risk presently non-existent breakaways."

Mr. Anfield notes that "solid, businesslike approaches, plus well planned management and shareholder succession," are key factors in making clients feel secure. Account management, he adds, must be able to provide "a marketing-oriented approach to problem-solving."

Mr. Holman reports that McCann is under "more pressure from clients to have senior people involved—mature, experienced professionals who understand the marketplace."

• **Risk-taking.** "Canada is perfect testing ground for new, even chancey ideas," says Mr. Clopet, "because the levels of bureaucracy are less complicated than in the U.S. and failure doesn't have such dire consequences."

One area ripe for experimentation and investment is the new videotechnology (Canada being a world leader with its Telidon teletext system).

But aside from a handful of agencies like Foster, Ogilvy, McCann and Hayhurst, which have been daring enough to commit time, money and personnel without immediate consequence, the rest are content to be "monitors," letting others do the spending and learning first.

But there are dangers in this sit-back approach, warns Mr. Kovas: "We are entering a period of very rapid transition. We're going to see a staccato-like series of events take place with the rapidly changing technologies of the '80s, and the agencies, big or small, that stay out as close to the leading edge of that as they can will come out of the '80s stronger and bigger than ever; and the ones that don't, which try to do business the way they used to in the '70s, are going to be left at the gate."

Greene helps serve Alpo as sponsor

By JAMES P. FORKAN

NEW YORK—Lorne Greene, who recently signed a three-year extension of his Alpo ad spokesman contract, also got the dog food company—Allen Products—to buy one-fourth sponsorship of his newest tv series, "Lorne Greene's New Wilderness" (AA, Sept. 20).

Laughing, Mr. Greene said in an interview, "I couldn't really go so far" as to try for a finder's fee in landing his series' first client.

American Television Syndication is handling station clearances and ad sales for the barter-syndicated series, with John Andariese, a Total Video principal, assisting ATS in making presentations to specific agencies and accounts, according to ATS exec vp Daniel Mulholland. Between breaks in the recent tennis action at the U.S. Open tennis tourney in Flushing Meadow, N.Y., the actor himself chatted with some execs from N W Ayer and Benton & Bowles, who presumably represent such potential "New Wilderness" sponsors as AT&T and General Foods, respectively.

Mr. Greene said that Allen Products and its agency Weightman Inc. first approached him about doing Alpo commercials seven years ago, offering an annual fee of six figures. He replied at the time, "I don't do commercials," because he felt that 30-second spots tend to cram too many words and too much repetition into too short a time frame. "I can't talk like that," he noted.

But he went on to tell them of a commercial he had seen years earlier in London for Guinness. He found it memorable, he remembered, largely because it contained but one word of copy, "Guinness." While the agency and its client did not want to go that far, they assured Mr. Greene they would cut down on the copy in their commercials. And with that assurance, he signed up.

Mr. Greene has in recent months also signed ad spokesman pacts with National Home Life Assurance, Valley Forge, Pa., and Canadian Lottery System.

Industry experts 'guesstimated' that Mr. Greene probably started out for Alpo with a $200,000-a-year endorsement fee. As time went by, if the agency and client were shrewd, these sources said, they should be paying roughly $500,000 spread across three-year spans. If not, his annual fee now may be closer to $350,000, they added.

As for Mr. Greene's new tv series, an advertiser like Alpo, buying a one-quarter sponsorship including alternating opening and closing billboards, pays $33,500 per 30 to air in each of the 52 shows (26 originals, 26 repeats), or just over $1.7 million, according to ATS, which is projecting a 12 Nielsen homes rating average. The syndicator expects hefty penetration among adults aged 18 to 54 (slightly more on the female side) in the estimated 6.8 million households.

Welch Foods also has signed as a participating sponsor.

The series began its syndication run with more than 90 tv outlets booked, or 65% coverage of U.S. tv homes, Mr. Mulholland said. Three CBS-owned stations, in New York, Los Angeles and Chicago, are in the lineup and they probably will air the series Sundays as the lead-in to "60 Minutes."

Group W's properties in Boston and San Francisco also will carry the show, Mr. Mulholland said. Clearances should grow in the '83 first quarter, he felt.

Canada's CTV Network also has bought the wildlife series and slotted it on Tuesdays at 7:30 p.m., with Kraft as a half-sponsor, said Mr. Greene himself a native of Canada.

The production company for the show is Greene & Dewar New Wilderness Productions, headed by Los Angeles-based Charles (Chuck) Greene, the actor's son, with credits that include "Untamed World" and "Friends of Man," and Toronto-based Stephen Dewar, Canadian director/producer/writer.#

Economy hits TM hard

LOS ANGELES—Times Mirror's 1982 second-quarter report shows two operating groups, Newspaper Publishing and Newsprint & Forest Products, hard hit by the recession. *Los Angeles Times* classified linage was down 25% compared with the same quarter a year ago, and as a result, the paper has ordered a reduction in travel, overtime, parttime and temporary staffing, as well as a hiring freeze.

Kraft, GF, P&G head grocery list

CHICAGO—Kraft, General Foods and Procter & Gamble maintain the strongest corporate presences in grocery stores.

That's the word from supermarket checkout scanner data gathered in the four test markets where Information Resources Inc. monitors consumer purchase habits. Each of those companies markets four of the 25 brands most commonly purchased from April through June of this year. According to IRI's first Topical Marketing Report, "Who's Who in the Supermarket," the next strongest marketer is Frito-Lay, which can claim two products in the list of top 25 brands.

Companies boasting one product each of the top 25 are: Campbell Soup Co., Coca-Cola Co., PepsiCo, Oscar Mayer & Co., Stokley-Van Camp, Ralston Purina Co., H.J. Heinz Co., Kimberly-Clark, Nabisco Brands, Ragu Foods and R.J. Reynolds Industries (*see chart*).

The Marketing Report is based on data collected from a sample size of 10,000 in IRI's four BehaviorScan markets: Pittsfield, Mass.; Eau Claire, Wis.; Marion, Ind., and Midland, Tex.

IRI, which offers clients the capability to couple the scanner data with various tv, newspaper and direct-mail marketing strategies, now is adding a magazine advertising option. *Woman's Day* and *Family Circle* will publish special editions for the four markets, beginning Nov. 16 and Dec. 4, respectively.#

Company/product	Percentage of households buying during April-June, 1982
Campbell Soup Co.:	
Campbell's soup	71.8
Coca-Cola Co.:	
Coca-Cola	47.5

Restaurants post 13.3% sales rise

By JOHN C. MAXWELL JR.

Last year's sales of $31.6 billion in the purchase-meal industry were up 13.3% over 1980, in line with our projections.

Almost all gains were related to price increases, and we doubt that the industry was up more than 1% in units. Volume so far in 1982, particularly in sit-down restaurants, is also weak. Some fast-food restaurants are faring better.

We expect 1982 and possibly 1983 to be rather nondescript years, again with almost all growth coming from price rather than volume. However, on a longer-term basis, we continue to believe that this will be one of the growth areas of the economy, with increases in the number of working wives, the pace of life styles, etc., all pointing to better volume numbers once the economy squares itself away.

Expenditures for food in relation to disposable income have been rather stable over the past few years at slightly more than 16%, but more recently have dropped to 15.7%. Away-from-home eating has been showing little or no growth at about 4%, with the decline in the total mainly reflecting less spending for eating at home. Again, we believe that this is due particularly to the weak economy.

Looking at the situation from a slightly different view, the breakdown of total consumption expenditures indicates that 24% of total consumer expenditures went for food in 1981, up from just less than 21% in 1980, with most of the increase being taken from other nondurables that exclude foods. This points to the comparative stability of food consumption, as it is obvious that one has to eat.

In 1981, the broad hamburger area held its share lead, taking almost 51% of the market and gaining 14.1% from a large base. Steak and full-menu restaurants continued their share slide, although they were up in volume, with chicken and seafood up slightly in share. Ethnic areas, mainly Italian and Mexican, gained in volume but only held their own in share.

Among the top 10 companies, Red Lobster moved into ninth place, with the others staying in nearly the same positions they occupied in 1980. Hamburger establishments such as McDonald's (with the biggest dollar gain), Hardee's (tied with Red Lobster for the biggest share gain) and Wendy's gained share, while Kentucky Fried Chicken did an outstanding job in the chicken area. International Dairy Queen also put in good share gains. Establishments that moved ahead of their 1980 standing include Pillsbury's Steak & Ale, which moved from 27th place to 21st; Domino's Pizza, from 37th to 29th; Gino's, from 23rd to 18th; Dunkin' Donuts, from 20th to 16th; Ponderosa, from 19th to 13th, and Taco Bell, from 14th to 11th.

Jack in the Box fell out of the top 10 to 15th. Most other companies moved very little compared with 1980.#

Mr. Maxwell is with Lehman Bros. Kuhn Loeb Research in New York.

Study finds sex roles behind times in ads

DALLAS—The times may be changing and women may have come a long way, baby, but male and female sexual roles haven't changed in magazine ads in 20 years, according to a two-year study by the University of Texas at Dallas and Center for Research in Business and Social Policy.

The study, which reviewed ads in *Ladies' Home Journal*, *Playboy*, *Time* and *Vogue* from 1960 to 1979 (2,000 ads in all), looked at sexual differences in age, activity, occupation and product use, and it found gaps in all areas between current changing sexual roles and traditional roles used in the ads.

The most unrealistic aspect of sexual portrayals in the ads, the study says, is the failure of the ads to show the growth in employment of women during the years studied by showing more women in work settings.

(Of those women who were pictured in a work atmosphere in the ads, a higher number were pictured as managers than is true of today's labor force, the study says.)

Women in the ads were younger than the men pictured. Moreover, the women pictured often were younger than the female readership of the magazines, the study reports.

And women 40 years old and older were "virtually unrepresented," while men older than 40 appeared often in the ads, the study says. Male/female age differences were greatest in ads for alcoholic beverages.

Food and magazine ads contained the most traditional sexual roles in a variety of activities, while ads for goods and services sold to businesses had the least.

The study recommends that advertisers present the changing roles of men and women in their ads because the traditional portrayals used in many of the ads studied threaten product loyalty, sales and profits. To create more realistic ads, the study suggests the use of more women older than 30 and 40, more women on the job, more men using home products and beauty aids, more men and women in occupations in which the other sex is predominant and more women using products other than fashion and cosmetics.

Copies of the study, titled, "How Advertisers Portray Men and Women: The Reality Gap and its Social Consequences," are available from the Center for Research in Business and Social Policy, Richardson, Tex. 75280. The study costs $40.#

Threat to suburb dailies seen

By MORRIE GELMAN

PALO ALTO, CAL.—A Stanford University professor here told the local Sigma Delta Chi chapter that the "glory days" of strong suburban daily newspapers "probably have passed."

James Rosse of the Stanford economics department pointed out, during a panel discussion, that suburban newspapers generally face a long-term threat from a combination of new electronic media, specifically computers, cable tv and other technologies capable of delivering saturation coverage in a well-defined community.

He made the point that many suburban papers already face competition from weeklies, throwaways and total market coverage papers. He believes that weeklies can "whittle away" the revenue base of suburban dailies, making them more vulnerable. The *Palo Alto Times*, he said, citing his home base, "probably was stronger relative to its market" than its successor, *Peninsula Times-Tribune* will be in the future.

On the subject of advertising and competition, Mr. Rosse, director of the newly formed Center for Economic Policy Research, said competitive newspaper markets are "extremely unstable," adding that "when one paper loses its circulation edge, a vicious cycle of lower advertising revenues and declining circulation quickly develops" in its wake.

Maintaining that he "hates" to draw such a conclusion (yet insisting that it's true), Mr. Rosse decided that "people buy newspapers to read advertisements."

To measure editorial quality, Mr. Rosse, in his studies, divided total editorial expense by the number of inches of news published. The results, which he described as "extremely consistent. . .and really incredible," ranged from as low as 15¢ to 20¢ per inch in newspapers which merely filled their pages with wire service copy to $10 or more for the *New York Times*.

He said rapidly rising newsprint prices and technological change were key reasons for the recent rash of failures among large-city papers.

In competitive cities, Mr. Rosse contended, "not a lot is explained" simply by whether a newspaper publishes in the morning or the afternoon. Afternoon newspapers tend to be "better off" in the West, he figures, since they have more time to report the day's news from places such as New York and Washington.

Northern California newspapers such as the *Hayward Review* and *San Rafael Independent-Journal* are relatively insulated from tv, enjoying a monopoly position in local markets, and have good density of circulation, according to Mr. Rosse's calculations. These make for "a powerful combination" of advantages, he observed.#

Chevron tries cash-sale discount

SAN FRANCISCO—Chevron USA, which for the past few months has watched sales slip as its competitors offered discounts for cash gasoline purchases, last week joined the oil marketing crowd. It joined the ranks of major oil companies, such as Exxon Corp., Mobil Corp. and Standard Oil Co. of Indiana, by offering two-tiered pricing, effective Nov. 1.

For the first time, Chevron stations will have separate pumps for cash and credit-card customers—a discount made possible with the imposition of a 3% processing fee on credit card sales on dealers.

While the domestic arm of Standard Oil of California is not allowed to dictate retail prices to its dealers, company sources say the move is designed to motivate dealers to more aggressively compete for lower-price cash business. The Los Angeles-based "Lundberg Survey," a gasoline marketing newsletter, estimates Chevron's market share in California has declined 2% during the January-to-July period. Industry sources tie the decline to Chevron's prices, which have been higher on the average than many competitors.

A company spokesman said Chevron is likely to start a consumer advertising campaign alerting the public to its new discount-for-cash policy in the near future, but so far firm plans have not been made. To date, Chevron is committed to providing dealers with point-of-purchase materials about its new pricing policy. J. Walter Thompson, USA here is Chevron's agency.#

Sale of Gannett daily

(Continued from Page 6)

the deal mostly is the government restriction on cross-ownership. Under fire for its ownership of two major outlets for opinion in San Francisco, Chronicle said that selling KRON is "largely prompted by the Federal Communications Commission policy on diversification of media ownership."

Chronicle Broadcasting's cross-ownership with the *Chronicle* is "grandfathered" into being allowed; FCC regulations barring joint ownership of broadcast and newspaper properties in the same market excluded existing combinations such as *Chronicle*/KRON.

For Gannett, San Francisco is certainly several steps up from Oklahoma City. In terms of Area of Dominant Influence (ADI) market designation, San Francisco is the fifth-largest market in the U.S. and Oklahoma City is 39th.

Gannett publishes 89 newspapers nationwide and owns tv stations in Atlanta, Denver, Phoenix, Little Rock, Louisville and Fort Wayne.

Gannett recently negotiated for the $75 million acquisition of the Metromedia station in Minneapolis, WTCN-TV, an NBC-TV affiliate, which, because of FCC limitations on the number of stations that can be owned by any one group, is forcing the sale of the Little Rock station, KARK-TV, also part of the NBC network.#

Biggar to head Nestle

WHITE PLAINS, N.Y.—Jean Caste, president-chief executive officer of Nestle Co., has added the title of chairman as that company, and other Nestle S.A. food companies in the U.S., undergo changes that will bring in a new top management team by next year.

David Guerrant, chairman and president, Nestle Enterprises, the holding company that oversees Nestle U.S. food operations, will retire at the end of 1983. At midyear, James M. Biggar, Stouffer Corp. president, will succeed Mr. Guerrant as president-chief executive officer of Nestle Enterprises. At that time, too, Mr. Caste will transfer to Nestle S.A., Vevey, Switzerland, to assume broader responsibilities, including those of food operations in the U.S., Canada and Puerto Rico.

The changes, to be completed before the end of 1983, appear to herald a stronger, centralized U.S. operation for all Nestle food businesses, including Stouffer Foods, Beech-Nut Nutrition Co. and Libby, McNeill & Libby.

C. Alan MacDonald, president, Stouffer Foods division, has been named exec vp-chief operating officer, Nestle Co., and he will move up to succeed Mr. Caste upon the latter's departure next year. Succeeding Mr. MacDonald at Stouffer is Robert McGuigan, formerly senior vp-sales and marketing. Stouffer is based in Solon, O.

Ian W. Murray, president of Chicago-based Libby, will become president, Nestle Enterprises, Toronto, next April, succeeding M. Erik Hansen, who is retiring.#

Phillips new VW chief exec

TROY, MICH.—Volkswagen of America, plagued with a big sales drop, replaced president James W. McLernon with a marketing expert, Noel Phillips.

Mr. Phillips was a former exec vp-sales and marketing of VW from 1978 to 1980. He becomes chief executive officer effective Nov. 1. He had been managing director of the McCarthy Group, a South African vehicle distributor.

Mr. McLernon joined VW in 1976 from Chevrolet, where he had been a manufacturing executive. He was hired to build VW's first automotive assembly plant in the U.S., in New Stanton, Pa. At a time when VW needed extra capacity and could sell just about all the cars it made, Mr. McLernon moved from president of VW Manufacturing to head of VWoA. But sales of the fuel-efficient Rabbit tailed off 41% this year after a disappointing 1981, and Mr. Phillips was rehired. Mr. McLernon didn't reveal his future plans.#

J&J begins its drive to keep Tylenol alive

By NANCY GIGES

Less than two weeks after the grim "Tylenol murder" story began to unfold in Chicago, Johnson & Johnson management is putting together a "fight back" marketing plan that it hopes will save the $500 million brand.

The decision evolved last week, as many were questioning whether the Tylenol pain reliever line had any future. At the start of the week, J&J executives would not even address that question, noting instead that they first had to devote their efforts to helping investigators solve the mystery of the cyanide-laced Extra-Strength Tylenol capsules.

But by midweek, David Collins, president of McNeil Consumer Products, the J&J subsidiary that markets Tylenol, was typifying the company's determination to have Tylenol survive. Mr. Collins, stating his belief that his company can re-establish confidence in the brand, said, "Tylenol was built on the quality of the product, the quality of the manufacturer. The confidence of the American consumer built this product. Nothing has changed. What has changed is that we have an insane individual or individuals out there who have elected to contaminate this product."

The company is actively reviewing its options. Late Friday, J&J said it plans to run an extensive newspaper campaign this week to communicate its offer—to retailers and consumers—of exchanging Tylenol tablets for capsules. At press time Compton Advertising had begun preparing copy, but size of the ads had not been determined. A McNeil spokesman said ads would run in at least the top 100 markets.

J&J also plans to introduce new tamperproof Tylenol packaging soon. Some executives believe this new package should be ready within two months.

When will regular advertising resume? What sort of message will J&J convey to consumers? These questions are not yet resolved. But some have suggested that the logical brand-specific advertising will involve the new packaging.

The replacement promotional program was mentioned in a letter to McNeil from the Food & Drug Administration that was drafted last week. The letter expresses FDA's understanding and approval of McNeil's strategy for handling the problem.

J&J's much-lauded success in marketing Tylenol is

Dodge account heading back to BBDO

DETROIT—One of the largest—and strangest—account reviews in U.S. advertising history will culminate tomorrow when BBDO regains Chrysler Corp.'s Dodge car and truck account, now valued at well over $100 million.

The decision to award the business was reached late last week, a Chrysler source said, but the announcement was put off until Tuesday. BBDO, which will be getting the largest account in its history, succeeds Kenyon & Eckhardt, which continues as the company's major agency. K&E handles the Chrysler and Plymouth car lines, whose combined ad volume is in excess of $150 million.

Until late last week, BBDO had been in a tight horse race against Ogilvy & Mather for the coveted Dodge business. "I wouldn't have classed either one of them as a front-runner," a Chrysler official said.

But Ogilvy bowed out last Thursday with the explanation that its "long-term interests" lay with its other car accounts. The agency handles the $30 million Ford Motor account in the U.K. It also handles the $8-to-$10 million Peugeot account in the U.S.

Chrysler's latest effort to split off the Dodge division from its Chrysler-Plymouth division triggered the agency search. The company periodically merges, then tries to unmerge, its car units. This time, separate marketing staffs will be set up. No changes are contemplated in field marketing staffs, which continue merged.

O&M's departure seemingly left the field clear for BBDO, which had handled the Dodge account for 38 years before losing it in 1979. At that time, Kenyon & Eckhardt was awarded all Chrysler business in what was the largest account move in history.

But Chrysler's account has since grown to an estimated $250 million and Chrysler chief Lee Iacocca decided the time had come to split it off again.

Calls went out to BBDO, O&M and N W Ayer, Detroit. Ayer declined, citing its General Motors business.

O&M apparently was anxious to land a Detroit car account, having lost out on Ford's Lincoln-Mercury business, relinquished by K&E in 1979 in gaining Chrysler. Young & Rubicam beat out O&M for Lincoln-Mercury. In addition, O&M paid an additional penalty: Mercedes-Benz fired it for going after another car account. O&M later landed Peugeot, which has a relationship with Chrysler. This did not bar O&M from pitching Dodge

last minute news

Chattem Labs puts its account at Marschalk

CHATTANOOGA, TENN.—Chattem Labs has assigned its $8.5 million account to Marschalk Co., New York. Brands include Love Baby Soft toiletries, Pamprin, Corn Silk powders, Sun-In hair lightener and Mudd facial mask, previously split between W.B. Doner & Co., Baltimore, and Jan Zwiren Agency, Chicago. Clifford A. Botway Inc., New York, loses media buying. Marschalk last week resigned its fee-only creative assignment for Maybelline's Moisture Whip to take the business (AA, Oct.4).

Court refuses to block Burger King spot

MIAMI—A U.S. district court refused Friday to grant McDonald's Corp. a temporary injunction that would have banned Burger King from broadcasting a commercial in which a little girl appears and claims that McDonald's meat patties are "20% smaller" than Burger King's. McDonald's must now move ahead with a pending attempt to gain a permanent injunction against the airing of Burger King's entire ad campaign.

NFL strike: Advertisers stay sporty

By JAMES P. FORKAN

NEW YORK—As National Football League fans' withdrawal symptoms worsened, advertisers and ad agencies angled for bargains in postseason baseball and other sports coverage last week, and broadcasters struggled to cope with their switches, pullouts and makegoods.

ABC executives said an undisclosed number of "Monday Night Football" sponsors, probably including Miller Brewing Co., were moving into other sports programming, with Major League Baseball playoffs and weekend sports fare among the options. That was the most popular route being taken. Other clients were sticking with the Monday movie substitutes, while others hewed to the wait-

Marketer vows to fight charges

Amana ads hit by FTC; first Miller false ad case

WASHINGTON—After a year in power, the Reaganite Federal Trade Commission opened prosecution of its first major advertiser last week with a complaint alleging deceptive advertising for Amana microwave ovens.

Amana was charged with misrepresenting the results of safety tests and a consumer preference survey in a print and radio campaign in late 1980 and early 1981. It was agreed on both sides that FTC is breaking no new ground with this case, a fact that fits with FTC consumer protection bureau director Tim Muris' drive to return to "nuts and bolts" ad regulation.

But Amana, in a statement, said the commission is "wasting resources that should be directed toward things that make sense," and it promised to fight the charges.

Similar cases involving abuse of test and survey data were brought by FTC against a string of national advertisers in recent years, including one against another microwave oven marketer, Litton Industries. As in the past, FTC lawyers leveled their charges without first having consumer research data proving that consumers were deceived by the Amana claims.

There was a flurry of memos exchanged within the commission last week as chairman James C. Miller III's colleagues, while supporting the complaint, twitted him for backing off from loudly proclaimed criteria requiring proof of consumer injury in ad cases.

Consumer protection chief Muris, the point man for chairman Miller in arguing that FTC needs survey evidence to show deception, said there is no inconsistency. He told ADVERTISING AGE, "We've never said the commission would not be able to make reasonable inferences about the meaning of an ad. What we have said is that, in close cases, the commission should have survey evidence."

FTC released two Amana print ads, prepared by Amana agency Foote, Cone & Belding, Chicago, along with the complaint. The first carried the head, "Only one microwave oven is built better than it has to be." Body copy claimed that, in four safety tests involving Amana and "five other major brands" of microwave ovens, only Amana passed all tests.

The complaint said the claim is false because "the independent laboratory tested ovens of six manufacturers in addition to Amana. Ovens of one other manufacturer —Panasonic—passed all the tests."

The second print ad, which appeared in appliance trade publications only, carried a similar bold

P&G tests Citrus Hill o.j., Ivory liquid soap

By JENNIFER ALTER

Procter & Gamble is maintaining the aggressive new product pace that has been going full steam under chief executive John Smale.

With about 25 new items in various stages of market testing currently (some 13 of those products have entered the marketplace this calendar year), the Cincinnati company is opening up tests on its expected orange juice (AA, Sept. 27) and another new liquid soap, this one bearing the well-known Ivory brand. The latter move seems to verify the viability of that new segment of the $930 million soap business, of which P&G already holds a 45% share.

The most significant of the two products by far is new Citrus Hill orange juice, which will be going into a $2.5 billion fruit juice market considered ripe for P&G's marketing and advertising muscle.

Hardly a year after acquiring the citrus-processing operations of Ben Hill Griffin Inc., P&G is moving into test market in most of Indiana and Iowa with Citrus Hill o.j. in frozen concentrate and chilled forms. Touted as "100% pure orange juice" which maintains "the natural good taste of. . .orange juice," Citrus Hill is based on a "unique new technology," according to the company.

Citrus Hill is said to provide a combination of the four key orange juice attributes: Taste, aroma, appearance and texture. The company said consumers prefer Citrus Hill's natural taste, sweetness and natural texture to other leading orange juice brands.

Priced competitively with other advertised orange juices, Citrus Hill will be available in 6, 12 and 16-oz. cans and 32 and 64-oz. cartons. As P&G's first envoy into the land of refrigerators and freezers, the product is being distributed by the sales force of the company's Folger's Coffee division.

Retailers are being told the company ultimately plans to double the amount of advertising dollars spent on orange juice. Advertising, via Cunningham & Walsh, Chicago, is slated to begin by early November.

Forty-five second tv spots feature a character named "Luke," a seasoned citrus grower on location at his groves. Extensive direct mail, including coupons for free samples, also is planned.

Citrus Hill enters a category

WRG to close in Dallas

By TOM BAYER and JOHN J. O'CONNOR

Despite its bullish statements about being committed to the Dallas market, Wells, Rich, Greene will shutter its WRG/Southwest office there in about a month, leaving nine clients to decide whether they want their business serviced from the New York office.

WRG chairman Mary Wells Lawrence said the agency was "consolidating" the Dallas and New York offices after having invested in "new, sophisticated services" that now can be provided through offices here and in Los Angeles. The agency's news release also linked the Dallas office closing with the earlier formation of WRG/West, its Los Angeles-based entity that came about with the merger of WRG/Townsend, Newport Beach, Cal., and Johns, Cohen & Pasqualina, a subsidiary of WRG's Gardner Advertising (AA, Aug. 2).

The Dallas advertising community—which got turned off by WRG's "arrogance" when it moved to that Sunbelt metropolis in early 1979—is viewing the

(Continued on Page 81)

East Coast on rye . . . West Coast on wheat

Regional food tastes are still flavoring the U.S.

By Mary McCabe English

Traditional wisdom once held that trends started in the East and moved West, with California the last stop. Today, of course, the revised "traditional" wisdom holds that trends usually start out West, jump to the East Coast and then backtrack across the country's midsection. This goes for food, as well as for fashion, music and that contemporary catch-all—life styles.

A good case in point is the health food movement. Say alfalfa sprouts, wheat germ or granola, and chances are that locales like Pittsburgh or Cincinnati won't spring to mind.

A decade ago Mexican food was a well kept Western secret; today Mexican food is one of the "hottest" food trends hitting the country's collective taste buds.

Or take some of the "exotic" vegetables and fruits that can be found in grocery stores all over the country today—tofu, bean sprouts, alfalfa sprouts, kiwi fruit and ugli fruit. "All of these got their start in this country in California. And although they've caught on to some extent all over, they still do best there," says Robert O'Neill, executive editor of *Progressive Grocer*.

There are exceptions to the West-to-East pattern. An obvious one is the delicatessen-style food that used to thrive almost exclusively in the Philadelphia-New York area, but "today, no supermarket in the country will open without a deli," says Ernest Obermayer, publisher of *Supermarket News*.

Yet no matter where food trends start, contemporary marketing strategy, the ubiquitous sophistication of today's communications technology and the tremendous mobility of the American public combine to give them a quick trip across the country in any direction once they've taken off.

However, these factors have not erased certain regionalisms that influence the way people purchase and use food in various parts of the country. For example, in its December, 1981, "Monthly Report on Eating Out Attitudes and Behaviors," the Gallup Organization in Princeton, N.J., noted wide divergence in regional bread preferences.

"Rolls are twice as popular in the East as in other sections of the country, with 16% of all easterners reporting they like their favorite sandwich on either a hard (10%) or soft (6%) roll," Gallup reported. "Rye bread is another East Coast favorite, being named by 26% in this area, in contrast to 18% in the Midwest, 15% in the West and 8% in the South." The report also showed that white bread is most popular in the South, and whole wheat bread is a West Coast favorite.

No matter where food trends start, marketing strategy and the mobility of the public give them a trip across the country.

Southerners appear to consume more fish and shellfish than folks in other parts of the country. That, at least, was the data that turned up in a U.S. Department of Agriculture (USDA) report, "Consumer Demand for Red Meat, Poultry and Fish," based on average weekly, at-home, per-person consumption for 1981, and scheduled for release this fall.

"Essentially, we found that total meat consumption patterns didn't vary much, as far as quantity was concerned, from region to region," said one spokesman for USDA's food economics branch. "We found more variation in the quality and cuts of meat used in the various parts of the country."

The USDA report found that total weekly meat consumption was greatest in the Northeast—4.75 lbs. Using the Northeast as a yardstick, the beef category, in particular, showed little variation in regional consumption patterns. One exception was the loin and rib roast subcategory, in which the Northeast's consumption level was 0.03 lb. per week. Using that figure as the yardstick of consumption, the North Central figure was 39% lower, the South 6% higher and the West 51% higher.

Nonbeef categories also indicated greater regional differences.

Another study, conducted by Market Research Corp. of America (MRCA) for the National Marine Fisheries Service (NMFS) found that although residents of the country's coastal areas, particularly New England, consumed notably more fresh fish than anyone else, consumption of frozen fish varied little across the U.S., based on 1981 retail purchases in a sample of some 7,500 households.

For example, dividing the country into nine regions, the "National Seafood Consumption Survey" found annual per capita consumption rates ran from 13 lbs. in New England to 0.1 lb. in the West North Central states for fresh fish. However, the rates for frozen, unprocessed fish varied only from 0.6 lb. in New England to 0.3 lb. in the Pacific states and for frozen, processed fish, only from 0.7 lb. in the Mid-Atlantic, East North Central and West North Central states to 0.4 lb. in the West South Central states.

The study tabbed total annual per capita seafood consumption at 3.5 lbs. among New England states; 3 lbs., Mid-Atlantic; 2.7 lbs., South Atlantic; 2.5 lbs., Pacific; 2.1 lbs., West South Central; 1.9 lbs., East South Central; 1.8 lbs., East North Central States; 1.7 lbs., Mountain; and 1.5 lbs., West North Central.

This information was announced at a National Fisheries Institute convention last April as part of MRCA's preliminary findings. As of this writing, this and additional information from the study had not yet been made available for general circulation, according to Hoyt Wheeland, chief of NMFS's data management and information systems division in Washington.

Going from the staple to the exotic, Americans' love affair with foreign food continues to grow, but even in this category Americans show regional preferences, especially on the East and West Coasts.

Gallup's monthly eating out report noted in July that "although there have been no overall changes since 1979, in the proportions preferring each ethnic food, considerable changes have occurred in the various regions of the country." Specifically, "Italian food has become even more popular in the East, while it has declined somewhat in the Midwest and South. In contrast, Chinese food is now the favorite of a smaller proportion of Easterners than in 1979, whereas it has increased in popularity in both the South and West.

"Midwesterners seem to have

Habits

(Continued from Page M-47)
tend to stick with familiar national brands—usually the same ones their parents bought.

"I'm sure there's a logic in a lot of these patterns," comments Mr. Bishop, "but once they're detected, they can be acted on."

Hard data on consumption of different products, though, used to be several weeks old before it filtered back through the distribution system to a store manager's desk. Explains the Chicago industry observer, "With scanner data, you can really analyze product movement very specifically. If I want to measure the inner city vs. the suburbs, and find out how this product moves compared [to a basis of] 1,000 cash register transactions, I can even do that store by store and then tie that in with census and demographic data."

"The next step is to develop a [shoppers panel] for a particular store and then interpret the data from the panel store and apply it to other stores within the marketing segment," adds Mr. Bishop.

The variety of products available in grocery stores today is astounding. Keeping up with the changing needs of the American consumer, however, is not as cut and dried as it once was. Giving the customer what he or she wants is definitely presenting some interesting challenges to grocery marketers these days.

East Coast on rye

(Continued from Page M-47)
acquired a taste for Mexican food, as it is now the favorite of 24%, compared with only 17% in 1979.

"Eating foreign dishes at home has grown [nationwide] by about 45%, compared to what we found in our 1972-73 study," says Jack Abrams, vp of MRCA's Menu Census Services in Northbrook, Ill., referring to the company's "National Household Menu Census Study" results for the first half of its 1981-82 reporting period. "The biggest increases have come from growth in carry-in, 30%, and frozen, about 50%. Pizza, for one, has shown almost 200% total growth, with almost 300% growth in carry-in. Even homemade pizza has grown fourfold."

Sales of "healthy" foods are also up—more so in some parts of the country than others.

Yogurt, for example, enjoys its greatest sales index in metropolitan New York, Los Angeles and Chicago, according to one industry source.

"The yogurt explosion began in New York, in the Northeast and New England, moved West and then filled in the middle of the country," says William Camacho, marketing director of Dannon yogurt, Long Island City, N.Y. "I think the product is basically weakest in the Southeast, where it has yet to be discovered, so to speak. It is most popular in sophisticated, metropolitan areas."

Mr. Camacho notes that although there has been tremendous growth in yogurt consumption over the last 10 years—"Per capita consumption saw a 120% increase from 1971 to 1981," he says—there is plenty of growth potential.

"Basically, fewer than half of [American consumers] eat yogurt with any regularity .... About 30% of the population are regular users," Mr. Camacho says. "In the U.S. in general, yogurt consumption is still only one-tenth of what it is in France, so we know that there's a tremendous number of new users still out there."

Herbal tea is another food product riding the crest of Americans' health consciousness. Once limited to health food stores, herbal teas are now available in neighborhood supermarkets across the country, but probably do their greatest volume "on the West Coast and in cities like Boston and other areas with large university concentrations," says a spokesman for one tea manufacturer.

"We're distributed all over the country, but you could say that people on the West Coast seemed to pick them up faster," says William J. Mangan, executive vp of R.C. Bigelow Inc., Norwalk, Conn., which began marketing a half dozen herbal teas in the late 1960s and currently has nine varieties on the market, and expects to add a tenth to grocery shelves by year's end.

"The Northeast area around Boston, with all its universities, is a good area, too," Mr. Mangan remarks. "It was a youthful market that really started the spread of herbal teas, just like health foods in general. I guess you could say it followed a typical growth pattern. It was big on the West Coast and in the East, in areas of low median age. It moved into the Midwest more slowly. The South was a little slow, too. You have great iced tea drinkers down South, so that made it take a little longer for herb teas to catch on, but you'll find them in the Southern markets too."

On the other hand, Arnold Belasco, vp of Royal Crown Cos., Atlanta, says that company's sugar-free, caffeine free cola, RC 100, has been "an instant success" just about everywhere it has been marketed since its April, 1980, introduction in eight U.S. markets as a cola first.

"RC 100 is very strong in Chicago, which happens to be our largest market. There's no doubt about that," Mr. Belasco says. "But it's also very strong on the West Coast. It's very big in Los Angeles and the East Coast, a little weaker in New York, maybe. However, that's only because of the extreme discounting on all soft drinks in New York. Those are trend cities—very strong 'diet' cities in general—but I really can't think of any part of the country where the product has not taken off. I think it's obvious now that caffeine-free, sugar-free products are a growth area nationwide."

Campbell Soup Co.'s new line of seven low-sodium soups, rolled out last February, hasn't been on supermarket shelves long enough for the Camden, N.J.-based company to have any answers about its geographic strengths, but one company spokesman says preintroduction research failed to turn up marked differences in regional attitudes toward the new line.

"We did not discern any appreciable differences in people's buying habits or attitudes in the research we did around the country prior to rolling out this new line," says company spokesman Scott Rombach. Incidentally, Mr. Rombach notes, there are regional preferences for some of Campbell's other soups. Black bean soup, for example, is big in Philadelphia and some parts of Los Angeles, and pepper pot soup is a Philadelphia and New York favorite.

Despite the popularity of many foods nationwide and the various factors that homogenize today's consumers, several industry sources agree that regionalism will continue to shade U.S. food consumption, at least for the near future.

"You will always have the question of receptivity," says professor Charles S. Goodman, a member of the marketing faculty at the University of Pennsylvania's Wharton School of Business in Phildelphia. "No matter how many times you showed the Santa Cruz life style to Dubuque, for example, it's doubtful that they'd accept it.

"Yes, we have all this modern communications technology and, I think, even more than communications, it's today's mobility. Yet, I don't expect Philadelphians will ever act like Californians, or vice versa. They will move toward each other, but I would be shocked if you could ever make a statement about Philadelphia like the one a young lady in Santa Cruz made to me a couple of years ago about Santa Cruz. She said, 'In Santa Cruz, it's a more serious crime to eat meat than to use drugs.'"

As the French (or Philadelphians) might say, *Vive la difference!*

Coming

Next week Magazine focuses on Market/Advertising Research.

That's right! Since January 1, BAR has been monitoring the satellite advertising activity on the CNN, ESPN, USA and WTBS cable networks. 24 hours a day, every day.

Report formats parallel BAR's network television and radio services.

Each week BAR publishes logs of all program and commercial activity. The data is also arranged by parent company and by individual brands, products and services advertised.

Monthly and quarterly summaries apply rates to each commercial. This produces estimated expenditures, which are displayed by brand, by parent company and by product classification. All estimated expenditures are cumulated year-to-date.

Subscriptions are on an annual basis. For more information, call George Seekamp in New York (212) 221-2630, Kevan Egan in Los Angeles (213) 956-5471 or Chuck Beeson in Chicago (312) 280-8262.

NBC turning the corner?

Series numbers high

By JAMES P. FORKAN

NEW YORK—NBC is thriving on baseball fever.

The World Series, called "the Six-Pack Series" since the teams are from Milwaukee (Miller and Pabst) and St. Louis (Anheuser-Busch), started well for the perennially third-place network, surprisingly so for those people used to saying that it takes a New York-California series to add luster to the ratings.

NBC estimated that the first game, on Oct. 12, was seen, totally or partially, by 61 million people, giving NBC the night with a 27 rating vs. ABC's 19.4 and CBS' 13.4. That was good news for Miller, the solo NBC World Series beer advertiser (AA, March 29), just as it was on ABC's playoffs; A-B in recent years has opted for local-team broadcast sponsorships.

The overnights for the second game showed Chicago, not surprisingly, averaging a 45 share compared with a 40 in New York; last year, of course, New York interest was higher, given the Yankees-Dodgers pairing. But Los Angeles posted a 51 share for the second game this year.

Nationally, the series' Game 2 grew to a 29.1 rating and 45 share (higher than last fall's second game, on ABC) to give NBC its second nightly victory in the new season. ABC ran a distant second that night, with the tv movie "Having It All" performing best at 17.1 and 26; "Gold Monkey" fell behind CBS' "Seven

Agencies impressed

By DIANE MERMIGAS

CHICAGO—NBC's prime time appeal in big cities in the early weeks of the new tv season could signal a shift in network demographics from rural to urban viewers, a shift like the one that launched ABC's meteoric climb out of the ratings cellar a decade ago.

"I think it's a result of NBC making a concerted effort this season to offer us many more adult, sophisticated, higher-quality series like 'Fame,' 'Hill Street Blues,' 'Cheers' and 'Remington Steele,'" said Kay Durkin, director of network broadcasting, Ogilvy & Mather here.

"I think NBC is being more adventuresome in its programing and taking more chances. They have been very clever in their promotion of series. In all, they're taking the kind of approach that appeals more to viewers in big cities," she said.

That's just one of many observations made by media executives at the nation's top advertising agencies based on the first several weeks of the new network season. Nearly every media executive polled by ADVERTISING AGE had something encouraging to say about NBC's programing efforts and prospects for advancement this season, even though the peacock network continues to trail the competition in national Nielsen ratings.

However, they all agreed it still is too early in the

Sending a message

American Postal Workers Union is using a tv campaign to "show America the dedication and integrity" of postal workers. Moving everything from valentines to packages is done more efficiently than in any other country, the spots say. Agency is J. Walter Thompson USA, Washington. *(See story on Page 80.)*

Everybody gains in battle of the burgers

By RICHARD KREISMAN

Three weeks after launching its controversial advertising campaign, Burger King says its sales are up 4% to 5% over last year, a figure similar to the gain the chain made this summer. The campaign's targets—McDonald's and Wendy's—also show sales gains since the campaign broke in late September.

"Our sales were up last week and the prior week," said a spokesman for Wendy's, which has filed a $25 million suit against Burger King for punitive damages from the campaign. "I suppose it'll be harder to prove that the campaign has been directly damaging, because our sales are better than ever."

McDonald's sources said the chain's over-all sales have been up slightly in the past few weeks. That's in the face of the Burger King campaign and a spate of bad publicity after members of the Center for Disease Control reported that McDonald's products were linked to an intestinal illness in a few isolated incidents.

Kyle Craig, Burger King senior vp-marketing, last week said, "It's too early to tell whether we will experience substantial incremental growth from the campaign. We do know that the advertising and all of the publicity has brought an unprecedented amount of interest in the hamburger business."

Mr. Craig said the Miami chain has "a couple of other" comparative spots waiting in the wings.

On the legal front, McDonald's Corp. and Wendy's International attorneys continued to take depositions concerning the Burger King campaign and the chain's supporting research. But at press time, no further court actions had been taken to stop the Burger King spots.

Tylenol competitors boom

By NANCY GIGES

As Johnson & Johnson begins its rebuilding program for Tylenol, sales of competing analgesics are booming, according to buyers across the country. Bristol-Myers and American Home Products already are back-ordered for their nonaspirin products, Datril and Anacin-3, respectively.

Fear that the Tylenol poisonings in the Chicago area (AA, Oct. 4, et seq.) might provoke a wave of drug tampering episodes across the country spread last week when a Colorado man suffered eye burns after using a bottle of Pfizer's Visine AC eyedrops that had been contaminated with acid. Authorities determined the incident was limited to one store where two bottles were found to have been crudely tampered with.

Although one local official called for a nationwide recall, Pfizer said there was no need for a recall and urged purchasers to make sure that the antitamper seals on Visine bottles were intact. The company also is considering running consumer advertising with a similar message.

The company that has suffered most, J&J's McNeil Consumer Products Co., which markets Tylenol, declined to confirm reports that it would resume some tv advertising this month.

J&J continues to say it has no details on when Tylenol advertising will resume. One source said the company was contemplating advertising to reassure consumers that the company's manufacturing process was not involved in the tragedy, to say that tamper-resistant packaging was on the way and to stress the J&J heritage of safe products.

J&J stopped all advertising for Tylenol Oct. 1 as soon as it received word of the first poisonings.

Last week, the company ran a one-time newspaper ad in 300 major markets (excluding Chicago, where all Tylenol products are off the shelves) to advise consumers on how to exchange their Tylenol capsules for tablets or a refund. Tylenol capsules were withdrawn temporarily from the national marketplace as word of the seven deaths appeared. The all-copy Tylenol ad gave consumers alternatives for a replacement, either via mail or from a retailer. The

Liggett plans ad campaign for generic cigaret

DURHAM, N.C.—Liggett & Myers Tobacco is expected to break an advertising campaign for its generic cigaret brand late this year or early next year, according to a reliable source. Selling for roughly $1 less a carton than branded cigarets, the generics have been a boon to the company and have grabbed about 1% of the U.S. market. Bloom Advertising, Dallas, is expected to handle.

Grey gains bulk of $25 million Beecham move

NEW YORK—Beecham Group, having completed its acquisition of J. B. Williams Co. from Nabisco Brands (AA, Sept. 20), has moved between $25 million and $30 million in spending from Williams' house agency, Parkson Advertising, and Chestnut Advertising. A Beecham agency, Grey, gets the lion's share: Geritol, Aqua Velva, Lectric Shave, Vivarin, Rose Milk lotion, Femiron, Deep Down, Acu-Test, PVM appetite suppressant, Serutan laxative, Mega vitamins, Vitabank and new Popeye chewable vitamins. Cunningham & Walsh, also a Beecham agency, gets the $3 million Sominex account. Parkson retains Nabisco spending; Chestnut yields creative for Geritol, Sominex and Popeye.

Net schedules loose as NFL talks

By JAMES P. FORKAN

New York—Amid some promising signs of a National Football League strike settlement, the tv networks have begun edging away from their initial strike replacement programing.

At NBC, sports president Arthur Watson has shelved Canadian Football League coverage for at least two weekends. NBC spokesmen emphasized that no CFL decision has yet been made beyond that. Other industry sources said that NBC undoubtedly is hoping that the NFL strike will have been resolved by then, now that both sides are working with an impartial mediator.

NBC has not penciled in its CFL substitutes for Oct. 24, but on Oct. 17 it carried live the Charlotte 500 auto race coverage, a gymnastics event and boxing, all following the usual "NFL Today."

At ABC, there are some hints that its programers might not go with movies alone to fill in for Monday night football during November. In advisories to affiliates and the tv press, ABC has taken to referring to "alternate programming" being under consideration for at least some of those Monday nights. In past weeks, ABC has indicated "Monday Night Movies" would be the tentative replacement. In its first move away from movies as NFL subs, ABC went with "Monday Night Football Superstars" for Oct. 18 (AA, Oct. 11). Although the NFL has warned the players due on that "Superstars" special that they, like the Turner all-stars, would be violating their league contracts, the league indicated it would not press the point in the courts.

Now that the NFL has apparently relented and will no longer try to legally block the NFLPA from playing in the Turner league or in ABC's "Superstars," some sources have begun speculating that further erosion of the NFL contract's Section III may occur, *e.g.*, by those interested in the new spring-summer United States Football League.

NFL broadcast sponsors hold off on switch to print. Page 78.

To replace its next scheduled non-Monday NFL telecast, due in Oct. 24 prime time, ABC said it will revert to a Sunday movie.

CBS on Oct. 17 inserted a boxing/billiards package bought from Top Rank and Claridge Hotel & Casino, Atlantic City. J. Gerald Nagler, senior vp, Lewis & Gilman, Philadelphia-based ad and pr agency for the Claridge, said the package, arranged "at the 11th hour" late last week, called for four 10-round bouts live as of 1 p.m. (ET), then the taped billiards competition featuring Willie Mosconi and Minnesota Fats.

Now that the two sides in the NFL dispute have been working with a mediator, 73-year-old San Francisco lawyer Sam Kagel, and have agreed to a news blackout on the bargaining, industry sources seem more optimistic about a quick settlement, perhaps even in time to resume play late this month.

One tv sports expert leaning toward optimism, Steve Leff, exec vp, Backer & Spielvogel, sees the presence of a mediator as possibly leading to a settlement before the end of this week. Nevertheless, Mr. Leff expressed some concern about perceptions of pro football on the part of both the fans and the media. Although he has not yet seen strong evidence of such "negative ruboff," were the fans to prove extremely irate at the players, pro football's usefulness as a media buy might be sharply diluted, he added.

In the unlikely event that the NFL canceled the 1982 season entirely, Mr. Leff warned, the view of the fans might be an even more important consideration.

Neal Pilson, CBS Sports president, is among those hopeful that

(Continued on Page 78)

Objective for '83: More Peppers

Current "Peppers" urge others to "try it, try it, try it" in Dr Pepper Co.'s 1983 tv commercials (AA, Oct. 4), a campaign the company says will be local in nature as opposed to its previous heavy emphasis on network tv. In these scenes, new triers proclaim "Dr Pepper made a Pepper out of me." That theme will replace the current dance-filled "Be a Pepper" theme. Agency for the Dallas-based company is Young & Rubicam, New York.

New RJR brands alight at Ted Bates

By JOHN J. O'CONNOR

New York—Ted Bates Advertising/New York, former creative agency for Brown & Williamson's Kool and Viceroy brands, is back in the cigaret agency ranks, thanks to an accelerated new brand course taken by R.J. Reynolds Tobacco.

The RJR assignment to Bates actually is one of five new brand development projects that RJR has parceled out. The others have gone to agencies already on the Reynolds roster, namely the Bates-owned William Esty Co.; Leber Katz Partners; BBDO, all based here, and Tatham-Laird & Kudner, Chicago.

According to a source, Bates got the nod from RJR not only on the basis of its past track record as a B&W shop, but also because Bates acquired Esty, the agency for Winston and Salem cigarets. On top of that, RJR is said to be impressed with Larry Light, Bates exec vp-client services, who previously was exec vp-director of marketing, media and business development at BBDO, agency for RJR's Camel cigarets.

The surge of new product development within the industry stems from the fact that cigaret companies have nearly exhausted line extensions for their brands. Therefore, totally new brands with special characteristics appealing to specific segments of the smoking population are much in need for the years ahead.

Chrysler holds up on BBDO

By RALPH GRAY

Detroit—Now that Chrysler Corp. brass have selected BBDO as agency for the $100 million Dodge car and truck account, the agony has begun. When will Chrysler make it official?

It didn't happen last week as scheduled. Negotiations with BBDO and internal review continue at an "inexorable" pace, a Chrysler exec said.

One reason for the delay may be Chrysler's desire to have its internal marketing staff reorganized first. Joseph Campana, new vp-marketing, is setting up separate Dodge and Chrysler-Plymouth marketing staffs. It is believed the staff changes will be announced prior to the BBDO announcement.

But the more the delay, the worse for Kenyon & Eckhardt, Birmingham, Mich., which will give up the Dodge account while keeping the Chrysler-Plymouth and corporate portions. It's hard to hold admen who may be cut.

It's also making it harder for BBDO to step into K&E's shoes with Dodge dealer groups who may opt for local agencies in the interim. And those agency execs who've been contacted for hiring by BBDO on an "if-come" basis

(Continued on Page 81)

'Time' promoting household income report

By STUART J. ELLIOTT

NEW YORK—Hailing a new report on household income, *Time* marketing executives use superlatives usually reserved for the magazine's cover stories on hit movies.

"It's a valuable marketing tool not available in other places," said Dave Borie, director of marketing development. "This comes as close as anything can to representing the real world out there."

The report, prepared by the Consumer Research Center of the Conference Board, was sponsored by *Time*.

The report is based on income information that had been collected by the U.S. Bureau of the Census. Details are to be released this week.

According to the executives, the report is unusual in several respects, including:

- Classification of data by two age cycles. In addition to the usual U.S. government breakouts (younger than 30, 30 to 39, 40 to 49, etc.), there also are those used most by marketers (younger than 25, 25 to 34, 35 to 44; *see chart*). "For the first time, the breaks are the same as are extant in our industry," Mr. Borie said.
- Ability "to switch from households to people and back," said Jack Stradal, *Time* marketing supervisor. Most government data are reported by households, while marketers usually use per-person figures.
- Accuracy of the data, since they are based on actual census information, compared with the vagaries of syndicated research.
- The report "is not intimidating," said Mr. Stradal, since it's a 28-page booklet, rather than the usual "2-in.-thick book with which you spend all your time going through the index."

Time sponsored the report, said Mal Ochs, director-marketing information, because, "If we can get enough people to know these data exist, [they'll see] a good reason for selective marketing."

The magazine is a big booster of that type of selling, as its readers are upscale in income and education. It makes extensive use of special demographic editions to, in the words of Mr. Ochs, "sell where the market is."

The report notes there is "a marked polarization in the distribution of the nation's income. More than 42% of all households have annual earnings of less than $15,000 and they account for 16% of the total income flow to consumers. Conversely, homes with more than $35,000 of earnings constitute only 15.5% of all households but account for 37% of all income."

Or, as Mr. Ochs put it, "Clearly, you've got to get up there to get the money."

And in terms of education, the Conference Board report states, households headed by a college graduate "account for 18.5% of the population but for 28.5% of the total money available to consumers. Those who failed to complete high school represent about 31% of all homes but have only 20% of total income."

Mr. Borie hopes the report will help debunk some of what he considers to be myths of marketing, "the first of which is that income distribution has changed over time, from a social point of view everybody is 'middling out.' But that isn't true."

Another myth is the belief there are more persons per household at lower income levels, Mr. Borie said. The report shows the opposite: In households with income less than $5,000, there are 1.76 persons. That figure rises with income, peaking at 3.57 in households with incomes of $50,000 and up.

Time's marketing executives await updates of the report's data, due next year, which will address issues such as household expenditure patterns.

Mr. Ochs believes future reports will reveal spending differences between a household with two wage earners, each making $20,000 a year, and one with a single wage earner making $40,000 a year.

The report will be distributed to *Time's* sales force worldwide, the executive said, and it will be used in presentations and other projects.

Copies of the report are available from: Consumer Research Center, The Conference Board, 845 Third Ave., 10022.

Income by age of household head

	Under 25	25-34	35-44	45-54	55-64	Over 64
Households (in millions)	6.4	19.2	14.5	12.7	12.7	16.9
Persons per household	2.23	2.94	3.66	3.26	2.32	1.72
Ave. household income	$14,227	$20,713	$26,052	$28,169	$23,504	$12,628
Distribution of households	7.8%	23.3%	17.6%	15.4%	15.4%	20.5%
Distribution of income	5.3%	22.9%	21.7%	20.6%	17.2%	12.3%

5 Year Rate Protection *Guaranteed*

Long-Term Rate Control Unmatched in the Industry

To celebrate our 25th year of publishing and the birth of our newest magazine DIGITAL RETAILING—when you select any of our three publications (DEALERSCOPE HOME ENTERTAINMENT MARKETING DIGITAL RETAILING) for your media schedule starting with the January issue you get more than your money's worth!

You get unprecedented control over future insertion costs. With our 5 year solid guarantee you get long term rate stabilization. You pay only the January 1983 rate card costs for the next five years. Regardless of increases. Regardless of circulation growth.

Here's how it works. Buy a 12 page schedule for 1983 in one of our publications, and you qualify for the same page rate for *the next four years* in that publication.

This is not a 5 year contract. Your one year contract earns the rate. You can run any combination of spreads or multiple pages. The only requirement is twelve pages in one of our publications during the first year.

At a time when costs everywhere are escalating, you have the unique opportunity to lock in and control your trade advertising dollars from 1983 through 1987! And only DEALERSCOPE gives it to you!

DEALERSCOPE

1958 25 1983 ANNIVERSARY

AT&T, ARA Services join as '84 Olympic sponsors

LOS ANGELES—The private group staging the 1984 Summer Olympics here has signed American Telephone & Telegraph and ARA Services as official sponsors of the games. The Los Angeles Olympic Organizing Committee said AT&T, besides being a corporate sponsor, also is sponsoring the Olympic Torch Relay, the ceremonial carrying of the Olympic flame from Athens to the games' opening. Philadephia-based ARA Services takes the food management and transportation management corporate sponsor categories.

Magazine readers per copy, Simmons vs. Mediamark

Greatest differences

Magazine	Simmons	Mediamark	% diff.
Saturday Evening Post	3.64	9.06	148.9
Runner's World	2.98	6.65	123.2
Sports Afield	6.56	13.8	110.4
Parents	2.41	4.97	106.2
Decorating & Craft Ideas	3.28	6.75	105.8
Working Woman	2.23	4.59	105.8

Smallest differences

Star	3.06	3.00	2.0
The New Yorker	4.88	5.03	3.1
New York	2.72	2.82	3.7
Jet	9.04	8.49	6.1
U.S. News & World Report	4.39	4.73	7.7

Reader numbers far apart

By STUART J. ELLIOTT

NEW YORK—You say *Sports Afield* has 6.56 readers per copy and I say it has 13.80 readers per copy. You say *Esquire* has a total audience of 2.3 million and I say it has a total audience of 4.4 million. Well, 6.56, 13.80, 2.3 million, 4.4 million...

Unlike the song, though, Simmons Market Research Bureau and Mediamark Research are not about to call the whole thing off. Until they do, magazine advertisers must continue to cope with what often are two widely divergent sets of data on readership and audience.

A comparison of the latest figures from SMRB (AA, Sept. 27) and Mediamark shows significant variation in many instances.

"There is a basic level of difference to be anticipated between Mediamark Research's data and ours," said Adam Richard, exec vp of SMRB here. The reason? The two companies have different methodologies: Through-the-book for SMRB and recent-reading for Mediamark.

By its nature, the recent-reading technique tends, in most cases, to produce higher readership scores. Of the 85 major magazines measured by SMRB and Mediamark, the latter shows more readers per copy for all but four of them (*The Star, Harper's Bazaar, Jet* and *Popular Hot Rodding*).

In some cases, the differences between the companies' data on readers per copy are chasm-size. SMRB says *The Saturday Evening Post* has 3.64 readers per copy. Mediamark puts the total at 9.06. In other instances, however, the differences are small *(see chart)*.

There are major variations as well in most of the total audience numbers reported, at times upward of 100%. For example, regard these categories; SMRB figures are first, followed by Mediamark:

Women's books—*Better Homes and Gardens*, 21 million vs. 34.2 million; *Family Circle*, 18 million vs. 28.3 million; *Good Housekeeping*, 17.8 million vs. 28.7 million; *Ladies' Home Journal*, 14 million vs. 20.4 million; *McCall's*, 15.1 million vs. 22.2 million; *Redbook*, 8.7 million vs. 15.6 million; *Woman's Day*, 15.8 million vs. 25.8 million.

Mass circulation—*Reader's Digest*, 39.1 million vs. 54.3 million; *TV Guide*, 36.3 million vs. 47.2 million.

There is also little agreement on the largest gains and losses in readers per copy, in percentage terms, when comparing SMRB's list of 46 major magazines with the same titles as reported by Mediamark.

SMRB shows these five titles with the biggest gains: *Sport*, +20.2%; *Fortune*, +14.9%; *Ebony*, +8.7%; *National Enquirer*, +4.8%, and *Mechanix Illustrated*, +4.7%.

At Mediamark, the magazines showing the biggest gains are: *Organic Gardening*, +17.2%; *National Enquirer*, +11.1; *Forbes*, +8.6%; *Star*, +6%, and *National Geographic*, +5.3%.

SMRB's five titles with the largest declines: *True Story*, −18.9%; *Parents*, −16.3%; *Vogue*, −15.3%; *The New Yorker*, −14.2%, and *Redbook*, −13.8%.

The five magazines with the largest declines at Mediamark: *True Story*, −29.6%; *The New Yorker*, −22.1%; *Popular Mechanics*, −16.7; *Sunset*, −16.6%, and, tied, *Good Housekeeping* and *Seventeen*, −15%.#

Your key to the 50-and-over market

new age℠

Now there's a way to get your cents-off coupon... your product sample... your brand message... into 12 million age-specific 50-and-over households.

How? With NEW AGE℠, a new cooperative direct mail promotion vehicle from Donnelley Marketing. NEW AGE℠ combines the impact of direct mail with the economy of cooperative couponing. Like Donnelley Marketing's Carol Wright® program, product category exclusivity is guaranteed.

First mailing: June 1983. To reserve your product category now call your Donnelley Marketing Account Executive.

Market/Advertising Research

Richard Edel

Agency's seek and research mission

By Jack J. Honomichl

In 1879, N.W. Ayer & Son, the famous advertising agency then based in Philadelphia, was soliciting a new account, Nichols-Shepard Co., a manufacturer of agricultural machinery. Ayer prepared a media schedule that was challenged by the would-be client, according to L. C. Lockley, writing in "The Journal of Marketing" (April, 1950). Substantiation came from an Ayer survey of state officials and publishers throughout the country asking for information on grain production and media circulation by counties. The client was impressed, and Ayer got the account.

In that respect, at least, things haven't changed much over the past 103 years. When agencies pitch new business, the presentation is often larded with information about the would-be client's marketing problems. But now a large, inhouse staff of professional researchers is usually available to gather up the sales ammunition. "We usually end up setting the tone for the whole presentation," says one agency research director, "because we're the ones who have the facts."

Young & Rubicam claims to have started the first formal agency research department in 1929, when a well known statistical professor from Indiana, George H. Gallup Sr., came to New York at the behest of Ray Rubicam to start a department.

Y&R's claim may be disputed, but there is no doubt that research—advertising, media and marketing—has been an integral part of U.S. advertising agencies' service capabilities for a long, long time. The roots are deep.

But, currently, there may well

(Continued on Page M-10)

Jack J. Honomichl writes a regular column on marketing research in Advertising Age *and helps coordinate Magazine research reports.*

Research mission

(Continued from Page M-9)
be what one research director termed "an identity crisis," with some agency research department heads casting about for new and more important ways to serve their constituencies and a clear-cut "mission." This has been induced, in part, by the growing sophistication of their clients' research departments; clients aren't so dependent on agency research backup as they once were. In short, it's gotten much more difficult to snow a client with research.

Also, one of the most sensitive areas of research, testing of tv copy and advertising effectiveness in general, has been under heavy attack, and the implication is that an agency's research staff should somehow alleviate the problem, which continues to fester.

In any case, advertising agencies today fund a sizable segment of the U.S. research industry. For instance, according to recent data compiled by Advertising Age Magazine, the 25 largest agencies (in terms of gross income derived from U.S. operations alone in 1981) now have 1,550 employes working directly in research, of whom 1,162 are considered professionals.

This count does not include about 200 other employes who work in agency libraries or "information centers" as backup to the research staffs. Neither does it take into account the hordes of parttime employes and consultants hired by the agency. So, looking at just the 25 largest U.S. agencies, they collectively employ 5.4 professional researchers per $10 million of gross income.

But the disparity among the 24 largest U.S agencies in terms of their apparent emphasis on the research function is surprisingly high (*see chart*). The number of research professionals employed per $10 million in income ranges from a high of 9.0 (Needham, Harper & Steers) to a low of 2.6 (Ogilvy & Mather).

This same variance shows in the percentage of the total agency's payroll going to research staffers. Among U.S. agencies with $13.5 million in gross income or more, the mean is close to 4%. But the range is from a high of more than 7% in one agency to a low of less than 1% in another. Such a swing can't be explained away by caliber of staffs or salary levels; it simply demonstrates that some agencies place much more emphasis than others on the research function and that aspect of service to clients. That is also true when it comes to expenditures for research and development, agency support for broad-based original research that might prove useful to all clients, as well as the advertising community in general.

Beyond various dimensions of size, it turns out that there are other significant differences among major agency research operations. For instance, in some agencies almost all the top research personnel are female; in others, the opposite is true. In some agencies, there is a titular head of research operations, a prominent front man (or woman) who has a grandiose title (but not necessarily much line authority); in other agency setups, the research staffs scattered around in branch offices and subsidiaries are, for all practical purposes, autonomous.

Some agencies have through the years built up internal data collection capabilities—focus group facilities, WATS phone centers or mall locations for central interviewing—while others farm out almost all their work. Other agency research departments stress their role in helping to make good, effective advertising; in others, the emphasis is on the planning of marketing strategy. Some agencies have a monolithic, highly structured point of view towards some research methodologies (for instance, one tv copy testing service vs. another); in other agencies that does not exist.

In short, these agency research organizations are not nearly as homogeneous as one might expect, and the differences transcend those that might be expected because of their particular client base.

For example—and not surprisingly—agencies seemingly tend to see the research services they offer to clients as being well received and valuable, but the client's evaluation is not necessarily as rosy. Evidence of this comes from an Advertising Age Sounding Board survey conducted in January, 1979, and reported in the Feb. 12 issue of that year. These data are based on a survey of more than 100 marketing and advertising executives on the client side and top agency executives.

When asked how clients feel about the importance of agency services, the results showed that from the client's point of view advertising research is important—with 50% saying they consider it "very important." The importance of marketing research, relatively, is much less —with 25% considering it "very important" and 54% saying it's "of less importance."

But, in terms of evaluating how agencies deliver on client expectations, a definite gap exists. From the agency point of view, 23% say clients are "extremely satisfied" with agency contributions to advertising research, and none say clients are "unsatisfied." The client point of view, in sharp contrast, shows that only 4% say they are "extremely satisfied," and 23% are "unsatisfied."

This is not to say that down deep top executives of major agencies do not recognize this gap and feel it is important enough to take action. It is interesting to note that since 1979, two major agencies—Young & Rubicam and Ted Bates—have brought in new top research management, replaced to a large extent almost all their research professionals, greatly expanded their research staffs and started to invest in r&d.

Beyond these conspicuous cases, there appears to be a considerable amount of shuffling around at major agencies in response to current criticism and pressure. Here are some examples:

- Leo Burnett USA, as part of a reorganization in mid-1980, moved senior research staff members physically into the creative department to promote day-to-day cooperation and rapport. The results have been very positive, says Calvin W. Gage, Burnett's research director. At Y&R's New York office, senior researchers have been assigned to creative group heads, although they haven't physically moved their offices.
- Almost all major agencies now emphasize "life style" research, a continuous monitoring of societal changes and shifts in attitudes and purchasing behavior, to give their agency and clients an early warning system on the future—and, presumably, to give their research departments a futuristic image. One researcher, who headed a large agency research department in New York, sees this emphasis on "macro" research—the "big picture"—as a way to compensate for the declining interest clients are displaying toward workaday research from their agencies. And it's good publicity for the agency too.
- Many of the large agencies are starting to play up "strategic planning" in both job titles and operative roles. Presumably this stance—in part semantic manipulation—adds prestige and luster beyond what can be obtained via research alone. (This has been going on in British agencies for some time. According to certain agency officials, it's tough to find a "researcher" in London agencies these days; the term now is "strategic planner.")
- A growing response to criticisms about traditional copy testing is evident too. One conspicuous illustration is the funding by Foote, Cone & Belding (AA, May 11) of a new, on-air tv commercial testing procedure it believed was most suitable for evaluating the impact of highly emotional copy treatments, with emphasis on nonverbal communications, rather than the traditional day-after-recall techniques, which tend to place most emphasis on a respondent's ability to feed back —that is, verbalize—key copy points, or a selling proposition. In an unprecedented move, FC&B executives put together a road show and made public presentations of the findings to meetings of advertising executives in several major cities.

Another illustration is the PACT report, supported by a group of 20 or so major agencies, which attempts to publicize a standard point of view regarding tv copy testing procedures, which—ideally—would influence all agencies and their clients and settle some dust.

Quite independent of how large agencies shift and mold their research operations in the future to position them in a changing climate, the fact remains that they have been, and continue to be, a large and important part of the U.S. research industry.

Beginning on the opposite page are profiles of the 10 largest agency research operations. The scope of their operations speaks for itself.

How clients feel about the importance of agency services

	Absolutely necessary	Very important	Of less importance	Not Very important	NA	
Advertising research	23%	50%	23%	2%	2%	= 100%
Marketing research	4	25	54	10	7	= 100

Who's who in advertising research?

The 10 largest agency research operations queue up

The following is a comprehensive listing of the 10 largest advertising agency research operations compiled by Advertising Age Magazine.

BBDO, New York, while ranking fifth among U.S. agencies in gross income ($127.9 million in 1981), ranks first in emphasis on research in many respects.

The parent plus a passel of subsidiaries, including the recently acquired Tracy-Locke, employ 143 people in research, 106 of whom are professionals. (These numbers do not include seven employes in the information resource center, which is touted as "the most extensive collection of secondary research resources in the business.") Of the professionals, 96 are in marketing/advertising research, and 10 are in media research.

This translates into 8.3 professionals per $10 million in gross income, far above the industry average of 5.4.

In terms of the percentage of its gross income spent on research operations, BBDO is believed to have one of the largest, if not the largest, of all large U.S. agencies.

Pringle
BBDO

At BBDO there is the traditional research group, headed by either a research director or an associate research director, assigned to each account.

The senior research person also is a member of a brand planning group, which includes a top-notch individual from creative, account management, media and senior management; this group, which overlaps the traditional agency account structure, has major coordinating responsibility for a given brand.

BBDO

In addition, at BBDO in New York, there is a marketing sciences group of 25 people, headed by R. Dale Wilson, responsible for marketing model development, computer operations and new product forecasting and analysis.

A third group, marketing horizons, is responsible for monitoring changing life style trends and "futures research." A fourth group, special projects, is charged with the development and improvement of techniques used by BBDO research, broad-scale consumer attitude and life style research, and BBDO position papers on research questions.

Inhouse facilities include "hotline," a 10-station WATS phone facility in the New York office, as well as "ad-lab," a focus group facility.

With regard to hiring research staff, an agency statement says, "We value integrity and the kind of personal strength that makes integrity possible. We value hard-working people, people who love advertising and the challenge it offers. We value intellect and creativity and find it difficult to distinguish between the two." BBDO does some recruiting directly from graduate schools. Transfer from research into other agency functions is discouraged.

Lewis G. Pringle, 41, is executive vp-director of research services at BBDO. He joined the agency in 1968 and was elected to the board in 1978. Mr. Pringle is a graduate of Harvard University and received his Ph.D. from the Massachusetts Institute of Technology.

Ted Bates Worldwide, New York, was the fourth largest U.S. agency in 1981, with a gross income of $129.1 million (excluding William Esty Co., a recent acquisition).

Fiedler
Ted Bates

Bates has seven subsidiaries, most notably Campbell-Mithun and Esty.

In all, these eight organizations employ 99 people in research, 79 of whom are professionals. (About one-half of this staff is with Bates in New York.)

For all Bates properties, this

Ted Bates

works out to 4.0 professionals per $10 million in income. However, the calculation for Bates/NY alone is 6.5, and for all the other properties combined 2.9.

(These counts do not include nine librarians employed by these agencies).

As for Bates/NY, the research staff is 2½ times as large today as it was in 1980, when John A. Fiedler came from Leo Burnett USA to be senior vp-executive research director. Further, the professional staff today, with a couple of exceptions, is new to Bates since 1980.

As for philosophy, the new stance goes like this: "The mission of Bates research is implicit in the agency's philosophy and discipline, the USP (unique selling proposition). Explicitly, our goal is to help get better copy quicker."

Bates research in New York is divided into four operating units: (1) four professional groups, each headed by a vp-research director, which have client assignments; (2) the marketing sciences and services group, overseeing research development activities and liaison with the academic research community; (3) research operations group, responsible for the fielding of research studies, coding and tabulating; and (4) the information services group, which has direct computer access to more than 50 major databases.

In addition to the line organization, the Bates department is simultaneously organized into five specialized task forces ("probably a misapplication of matrix management," according to Mr. Fiedler): Motivation research group, headed by Rudy Schroeer and Jack Bookbinder; test marketing experimental design group, headed by Paul Keller; copy research group, headed by Sheri Nadel; and market structure and segmentation research group, headed by David Gantman.

The Bates department periodically issues a report, "New Product Scan," which monitors all new products in test market and national launch. It has worked closely with Stanford Research in the design and execution of their values and life styles research program.

In addition, the agency has worked with the music and marketing departments of Columbia University on studies regarding the effect of music in advertising.

Also, in conjunction with State University of New York, Purchase, Bates has begun experimental research in the area of psychophysics (brainwave activities).

Mr. Fiedler, 40, received his MBA degree from the University of Chicago and is a member of the Bates board.

Leo Burnett USA, Chicago, is the largest agency in Chicago and the sixth largest in the U.S., with a gross income of $124 million in 1981, can lay claim to the largest agency research staff under one roof—136, of whom 100 are professionals.

(This figure does not include three librarians or about 54 parttimers associated with the department.)

That works out to 8.1 professionals per $10 million gross income, the third highest among

(Continued on Page M-18)

Researchers in advertising agencies

How 24 large U.S. advertising agencies rank: The number of research professionals employed per $10 million in gross income (U.S. only)

	Total number professionals employed	Number of professionals per $10 million income
1. Needham, Harper & Steers	53	9.0
2. BBDO	106	8.3
3. Leo Burnett	100	8.1
4. Foote, Cone & Belding	79	6.8
5. Ted Bates/New York	40	6.5

*This analysis was based on gross agency income, U.S. only, for the year 1981, as reported in the ADVERTISING AGE, 1982 edition, U.S. Agency Income Profiles. The research staff counts were furnished directly to the author. The analysis is complicated by the number of subsidiaries included in some agency totals, and for the 10 largest agency profiles, this is explained. When possible, data on some of the largest subsidiary agencies are shown separately. Compton Advertising, which is one of the 25 largest agencies, would not contribute to the summary.

Advertising agencies

(Continued from Page M-11)
major agencies.

The Burnett operation is distinctive in other respects. For example, since mid-year 1981, researchers assigned to creative actually have offices in the creative department to promote close, day-to-day cooperation and report.

Also, Burnett pioneered, 25 years ago, the use of central location interviewing. (Today, the Burnett facility is located near Woodfield Mall, a giant shopping center in a Chicago suburb. A focus group facility is in the agency's main office in Chicago's Loop area.)

According to an agency official, "Virtually all of our research is conducted inhouse, except for field work done outside Chicago."

A Burnett life style program, started in 1967, monitors societal changes and their relevance to advertising problems.

"While we deal with a great range and variety of research," says an official, "five areas account for the majority of our projects: Focus group discussions, copy research, life styles analysis, the planning evaluation of new product introductory programs and experimental work to improve our understanding of how advertising works—and to find better tools for studying the ways people are affected by advertising."

Organizationally, Burnett assigns each account a research group headed by a vp-group research director (who is physically located in the creative department), who is backed up by associates and analysts.

Gage
Leo Burnett

In addition, there are four groups of specialists: (1) qualitative research (focus groups, depth interviews); (2) new product research (tracking studies, study of new product introductory copy); (3) consumer and marketing research programs (life style program and the modeling of relationships between advertising and sales/purchase behavior); and (4) copy development research (r&d on copy testing procedures).

Burnett research recruits staff from universities. Also, the agency's client service department, as part of its training program, puts recruits into research for a year or so.

The head of Burnett research is Calvin W. Gage, 51, senior vp-director of research, who joined the agency in 1955. He has a master's degree in American studies from the University of Minnesota.

D'Arcy-MacManus & Masius, New York, has research departments in each of its seven U.S. offices, and they employ 70 people, 47 whom are professionals.

Because DM&M gross income for the U.S. in 1981 was $73.9 million, this works out to 6.4 professionals per $10 million in income, well above the industry average of 5.4 for large agencies. (DM&M owns a research company, Mid-America Research in Mount Prospect, Ill., which specializes in central location interviewing through four mall sites. Mid-America staff is not included in this analysis.)

Each of the DM&M research staffs operates autonomously, and there is no one person within the DM&M organization who is the titular head of research.

However, the research directors from these seven locations are members of DM&M's research operating committee, which meets quarterly to ex-

ANNOUNCING

5 major advances in distribution reporting

. . . and they're exclusively from

NRTI.

1 UP TO 50% FASTER TURN AROUND: Our totally on-line system reduces the time it takes to deliver data by days or even weeks. Data has never been so actionable.

2 HIGHEST ACCURACY EVER POSSIBLE: Quality control in the field and in the processing reduces errors as never before. Using illustrated and simplified forms, our field personnel gather information faster and more thoroughly, while over 75 CRT's enable us to edit and process the data accurately and efficiently.

3 COVERAGE OF ALL AREAS: NRTI offers the broadest market coverage of any distribution reporting firm. We gather information in over 8,000 stores in every SAMI area, every major market and even C and D counties.

4 EXPANDED CLASSES OF TRADE: In addition to food, drug, liquor, mass merchandise and convenience stores, NRTI now offers reports on warehouse, building supply and hardware stores as well as TBA's and garden centers.

5 INCREASED FORMATS: The standard NRTI report formats include data on distribution, retail prices, facings and in-store promotional activity. Also available are our more sophisticated formats: management summaries, price frequency reports, authorized distribution, shelf inventory, price comparison reports and quality of SKU distribution.

Get the fastest, most accurate, most comprehensive distribution data from the only people who can give it to you. . . NRTI.

change ideas and consult on problems of common interest.

DM&M, not surprisingly, finds virtue in the decentralization of research, namely that each office tends to have a different type of client base—package goods, durables, industrial—and hence each can adjust accordingly.

DM&M's operating philosophy stresses "upfront research—used developmentally—on behalf of all clients—as the most effective and efficient deployment of resources," according to an agency official.

The DM&M units do share a central information services department—including a central library (librarians are not included in the staff counts above), and there is information retrieval through crt's.

Also, a "New Products Prediction Model" called RAM, which was developed by DM&M/Chicago, is available to DM&M clients. Two of the DM&M offices have life style researchers and there are arrangements with several universities as consultants in special areas, including statistics, psychology and sociology.

DM&M research directors are: Tom Kutsko, Atlanta; Lucien DiSalvo, Bloomfield Hills, Mich.; Marshall Ottenfeld, Chicago; George Scott, Minneapolis; Patricia Greenwald, New York; and Philip Baker, St. Louis.

Ziff
Doyle Dane Bernbach

(The San Francisco post is open.)

Doyle Dane Bernbach, New York, comprising

eight different operating groups in the U.S., had a gross income of $115 million from U.S. operations in 1981, ranking it eighth in size among agencies.

There are 82 people (mostly headquartered in New York) working in research—71 in advertising and marketing research, 11 in media research.

Of these, 62 are professionals, or 5.4 per $10 million in income. (This does not include eight staff members in the agency's research library, which features on-line terminal access to various databanks.) This staff is organized into two groups, with one reporting to a vp-manager of research (Sy Collins), and the other reporting to a vp-manager of marketing services.

Under research, there are six group research directors, each a vp, and each of them has a staff of professionals with titles such as associate group director-research supervisor. Each group has a list of client assignments, except for one that specializes in international research and special agency projects. (Some members of the marketing services staff are involved in secondary research, and these are included in the counts above.)

In addition to conducting day-to-day studies—from brand image to media mix and weight studies, from legal support to product test and a variety of copy development tests in conjunction with DDB's creative staff—the DDB research group has developed several techniques it believes are innovative.

They include METER, a tv pretesting technique called multiple exposure television effectiveness research; CON-TEST, a system to test alternative advertising strategies; GOALS, a five step systematic, disciplined approach to the generation of advertising leverage strategies, and two unique systems for measuring the intrusiveness of radio commercials and the readership of print ads (which includes a mock newspaper where test ads can be tipped in).

The top research executive at DDB is Ruth Ziff, executive vp and director-research & marketing services. Before joining DDB in 1979, she was vp-manager of research at Benton & Bowles. Ms. Ziff is a member of the agency's management review board and a director of DDB. She received a Ph.D. in sociology from the City College of New York and, in 1973, was named

HTI.
The Great American Answer Machine.

It's the answer to your market research questions.

Finding the answer can be a dilemma because most market research companies share a common problem: before they can find your answers, they first have to find the people to ask the questions.

At HTI, we've got the people: 125,000 cooperating households. That's what makes **The Great American Answer Machine** one of the most practical, flexible, and economical ways to solve your research problems.

HTI offers professional input from the inception to conclusion of your study. Each facet of the project is carefully managed. You'll find modern systems and creative solutions to your research problems. There's really no better way to get the answer to your market research questions than through **The Great American Answer Machine**.

THE HTI PANEL

Micro-USA is a perfectly balanced, continuously updated, rigorously controlled, nationally representative sample. We've innovated unique sampling procedures and maintain a separate panel of single households.

MAIL PANEL RESEARCH

We offer flexibility in conducting the appropriate research design among the specific respondents required, at reasonable cost.

INSTA-VUE

Insta-Vue offers you large-scale, low-cost cooperative monthly mailings. It's the perfect research design for a mini-study, for low-incidence screening and developing profiles, or for tracking over time.

THE NEW HTI TELEPHONE RESEARCH CENTER

We can interview our panelists—or the general population—via the HTI Telephone Research Center. HTI has some of the most sophisticated, high technology equipment and rigorous quality control systems available.

VIDEO PROBE INDEX

This unique service provides continuously updated syndicated tracking information on Cable TV, Pay TV, Video Cassettes, Video Discs and other new electronic media.

THE BABY PANEL

We've just given birth to a first: our new panel of mothers, expectant mothers, and children.

And there's more. Our services include analytical report writing and statistical capabilities, computer printing, and executive presentations. The HTI machine is manned by some of the most professional, most dedicated researchers anywhere. That's why **The Great American Answer Machine** can work so well for you.

pany, JWT Group, which includes, among other properties, Hill & Knowlton, the world's largest public relations agency, which has a sizable research department of its own, and Simmons Market Research Bureau, the staffs of which are not included in this analysis.)

JWT/USA employs 106 people in research in six offices; 83 of these are professionals, so that works out to 5.4 professionals per $10 million in gross income, average for the large agencies. "The research operation at JWT, as the name research and planning signifies, goes well beyond data collection," says an agency official.

"It is functionally integrated into the agency's target planning system. Department professionals work with the account team on a continuing basis in the planning, development, execution and evaluation stages of marketing and communications strategies for our clients."

Researchers are organized according to account groups, with client assignments, and the lead researcher is a member of the agency's target planning team.

JWT says its commitment to research "is mostly strongly demonstrated through its longstanding investment in a continuing r&d program." As examples of this, JWT cites the following: A study of the public's perception of television violence and its effects upon the performance of advertising; a "new demographics" for defining the changing role of women and responses to traditional and contemporary portrayals of women in advertising; tracking studies of consumer responsiveness to generic products, and a study of the potential value of long-form commercials available upon demand via "Cableshop." In addition to account group assignees, JWT research staffers are organized into groups of functional expertise: Media research, statistical analysis, sampling, marketing models, forecasting, information retrieval. Some consultants are used on an as-needed basis.

JWT has semiannual, two-day seminars, which are attended by the senior research professionals from its U.S. offices as well as its affiliated U.S. and Canadian operations to share research expertise and ideas.

Sonia Yuspeh, who joined JWT in 1972, is senior vp in charge of research and planning. In 1982 she was appointed chairwoman of the agency's U.S. research and development committee. She also chairs the New York office Strategy Plans board. Ms. Yuspeh has a master's degree in sociology from Cornell University.

Plummer
Young & Rubicam

Young & Rubicam, New York, the largest agency in terms of U.S. gross income ($222.8 million in 1981), is—along with a group of branch offices and wholly owned subsidiaries, including Marsteller, Inc.—the largest employer of research personnel: A total of 136, of whom 122 are professionals. (This number does not include a library staff, business managers and clerical support staff; under the Y&R organization in New York, secretaries are on another budget.) This works out to an average of 5.5 professionals per $10 million in gross income. However, for Y&R properties excluding Marsteller, it is 6.1; for Marsteller alone, it is 3.2.

It wasn't always this way. Since Joseph T. Plummer came from Leo Burnett Co. to be executive vp-director of research at Y&R/USA in 1979, the Y&R research staff has nearly tripled in size. Also there has been a greater investment in basic r&d plus a reorganization that emphasizes close working relationships with creatives. (A researcher is assigned personally to each senior creative chief.) The research emphasis, according to an agency statement, has shifted from "How did we do?" to "Are we touching the consumer?"

YOUNG & RUBICAM

"This shift from 'counting noses' after the fact to 'sticking our necks out' upfront has had an important impact on creative strategy, creative development and agency new business efforts," says a Y&R official.

The Y&R research department was founded by George H. Gallup in 1929, and that, says Y&R, makes it the oldest agency research group in the U.S. Today, the organization includes the traditional account research groups (seven) assigned to clients. This staff is headed by John Eighmey.

In addition, there is a consumer research services group, under the direction of Max Bonfeld, which works in the area of copy testing, survey design, modeling and computer application and consumer values/life style research. Also, a group called creative research services, headed by Susan Gianinno, works on creative problems and manages the discussion lab, an inhouse focus group facility.

Paul Murphy is director of research for all Y&R specialty companies (excluding Marsteller Inc., whose research head is John H. Morris), who can turn to Y&R/USA staff for "additional horsepower" on research projects, as required.

Mr. Plummer, 41, an executive vp of Y&R/ USA, is also a member of the board. He received his Ph.D. in communications from Ohio State University.

Slow pay eases with economy

By CHRISTY MARSHALL

NEW YORK—The perennial by-product of a troubled economy—slow-paying clients—appears to be on the decline. As NH&S/USA exec vp-chief financial officer Ed Haymes noted, slow pay is "usually a function of interest rates," which are down.

"When interest rates were very high earlier this year, there were times when certain clients were slow," he said. "That required more monitoring than usual. But we have found just about all of our clients pay pretty much within our terms. And we do spend a lot of effort to make sure we are paid within a reasonable time." As a result, Mr. Haymes said, slow pay is "not a problem whatsoever" at this time.

At Benton & Bowles, president John Bowen also said his agency has no problem with slow pay, but he attributes this to the "blue-chip-ness" of the agency's client roster. Doyle Dane Bernbach and BBDO both said they, too, are currently free from worry about clients who might seek to hold on to their cash while agency bills go unpaid for 30, 45, even 60 days or more. At SSC&B, vp-treasurer William Overlock said there hasn't been any significant slowdown in payments.

Some agencies have had real problems with slow payers in the past. One of these, J. Walter

Wensberg exit raises doubts on Polaroid

By GAY JERVEY

Once again, Polaroid Corp. has lost one of its best and brightest.

Peter Wensberg, a 24-year Polaroid veteran, resigned to join Atari Inc., the videogame/home computer marketer that very recently snared Theodore Voss from Polaroid. Mr. Wensberg had risen to become Polaroid's No. 3 man, premier marketing executive and dark-horse candidate for the presidency of the company when William McCune retires.

Mr. Voss and Mr. Wensberg are the last in a line of top Polaroid brass—largely viewed as the company's most aggressive and savvy—who have left the company in recent years. As such, analysts see this as a final, damaging defection.

Analysts, by now accustomed to unsettling news from Cambridge, Mass., viewed this latest defection as one more indication that Polaroid is struggling to find a focus, and will not soon maneuver its much-needed turnaround.

Industry watchers are unanimous: Mr. Wensberg's loss will be felt, particularly in the marketing area. He had just finalized plans to shift Polaroid's 1983 ad strategy subtly by running a generic campaign—this time, without long-standing Jim Garner and Mariette Hartley—to promote the emotional benefits of instant photography. "We want to get back to stuff we used to do in the 1970s," he said just last week from his Polaroid office, "to make more of a statement about what instant photography really means."

Mr. Wensberg joined Polaroid in 1958, rose through the advertising and marketing ranks and, in 1980, became exec vp-director of industrial and technical photography, the area seen as Polaroid's most promising growth area. Last summer, he assumed the worldwide marketing responsibilities vacated when Mr. Voss left to become vp-advertising at Atari.

Earlier this year, Richard Young, Mr. Voss' immediate predecessor as vp-worldwide marketing, and considered by many to have been the choice as Polaroid's next president, took early retirement to benefit from the company's generous plan. Shortly thereafter, Murray Swindell, a 20-year veteran and vp-North American marketing under Mr. Young, similarly left—with almost two year's pay, plus a pension—despite reportedly being offered a promotion and higher responsibilities.

Mr. Wensberg will now become president of an apparently top-secret new division at Atari. It goes by the code name, "Project Falcon," will market an electronics line and is touted as the next major Atari earnings leg.

Several sources close to Atari believe that Mr. Voss will be gestating not one product, but rather a combination of cable/home computer terminals, publishing operations and tie-ins with other data bases, such as major newspapers.

Mr. Wensberg said that Atari is anxious for him to start, so he should be there within two weeks. "I am leaving Polaroid with many fond memories," he said.

Sources believe the financial lure was a powerful one; several suggest that his new post could earn him about $500,000 a year. There are also murmurs that differences between Mr. Wensberg and I.M. Booth, now regarded as the favorite for the presidency, probably made leaving less painful.

No doubt, the fact that Mr. Wensberg and Mr. Voss had been friends for years figured in the move. It was, in fact, Mr. Wensberg who hired Mr. Voss for his first Polaroid job over 17 years ago. The two continued to work in tandem and worked closely with Polaroid agency Doyle Dane Bernbach.

At any rate, analysts have greeted this latest news with what has become a sadly perfunctory, bemused shrug. "I must say I have never seen a company with so much top, top management turnover in so little time," said Smith Barney's Peter Enderlin.

Or, as another put it: "Just when you think you've heard it all from them, something else happens."#

DeLorean still owes ad shops

By GAY JERVEY

NEW YORK—Although it is hardly its biggest worry at the moment, DeLorean Motor Co. has yet to finalize payments to its former ad agency, Avrett, Free & Fischer (now Avrett, Free & Ginsberg), and, reportedly, to its media buying service, Time Buying Services, which bought and paid for several DeLorean print ads. The latter refused repeated attempts for confirmation.

This fact surfaced last week along with news of auto entrepreneur John Z. DeLorean's arrest on drug charges, apparently a desperate attempt to salvage his company and the dream that ultimately proved so self-destructive.

Last March, ADVERTISING AGE learned that DeLorean owed $500,000-plus to Time Buying Services, which bought and paid for several DeLorean print ads that were created by Avrett (AA, March 22).

Also at that time, Jim O'Halloran, president of O'Halloran Advertising, Wilton, Conn., said he was out $40,000 for DMC Yellow Page dealer ads he placed some time ago.

Today, Mr. O'Halloran concedes he has not seen a cent, and thus

(Continued on Page 86)

Dobyns-helmed show to challenge '60 Minutes'

NBC sets news mag...

By DIANE MERMIGAS

Lloyd Dobyns, whose often sardonic and irreverent approach to news set the pace for NBC's "Weekend" in the 1970s, will be the sole host of a new one-hour prime time news magazine the network plans to premiere the first week in February.

"What we'll be looking for is a 'Weekend' type format and, because of that, we think Dobyns is the best one for the job," said NBC News president Reuven Frank.

Mr. Frank has requested that NBC free Sundays at 7 p.m. (ET) for the new show, which would put it opposite CBS' popular "60 Minutes." The time slot is "protected" by federal regulation to include only news, public affairs, informational or children's programing.

NBC program chief Brandon Tartikoff said the ratings performance of "Voyagers!" (currently in that slot) will determine if the new show will be scheduled on Sunday.

"If 'Voyagers!' is getting a 24 share, I think we'd have to look into our souls and ask if we really want to make a change there, since most anything we or ABC put in that time slot seldom performs as well. But I'm not averse to having another news magazine air on Sunday," Mr. Tartikoff said.

Mr. Dobyns will leave his job as

(Continued on Page 84)

...and wins with World Series

The World Series gave NBC-TV a brief taste of glory, catapulting the struggling third-place network to the top of the prime time ratings in the third week of the new season, ending Oct. 17.

NBC averaged a 20.4 rating and a 32.2% share of the national tv audience for the week. CBS averaged a 17.3 rating and 27 share over ABC's 15.6 rating and 24.7 share. Season to date, CBS has averaged a 17.9 rating, ABC a 17 rating and NBC a 16.7 rating in prime time.

The second game of the World Series, played Oct. 13, was the top-rated prime time show of the week, attracting a 29.1 rating and 45 share of the available viewers. The third World Series game, Oct. 15, placed second, with a 25 rating and a 41 share, followed by the first game Oct. 12, which attracted a 27.9 rating and a 32 share. Although the fifth game (Oct. 17) attracted a 55% share, A.C. Nielsen Co. did not include it in its weekly reports since only the final hour spilled over into prime time.

The Oct. 19 sixth game garnered a 24 rating and a 44 share, and the final World Series game—in which the Anheuser-Busch Cos.-owned St. Louis Cardinals emerged victorious—on Oct. 20 attracted a 38.2 rating and a 56 share, or 31.8 million tv households.

CBS' Oct. 11 telecast of "The Country Music Awards" was the only other special programing that placed in Nielsen's Top 10 for the

Kodak awareness soars on its disc

By JOSEPH M. WINSKI

Apparently still benefiting from a heavy introductory campaign for the disc camera, Kodak advertising climbed substantially in consumer awareness last month.

Of a random sample of 1,260 adults questioned in September, 358—or 28.4%—said Kodak advertising was the first that came to mind among all advertising for cameras and related products. Sixty-three of the 358 specifically named "Kodak disc" advertising.

adWatch

Kodak's September score was up 9.3 percentage points from August and the largest monthly gain of any advertiser mentioned in the first six months of adWatch, a survey of consumer awareness of advertising conducted by Advertising Age and SRI Research Center Inc. of Lincoln, Neb.

Awareness changes of more than 2.7 points are considered statistically significant.

Kodak, whose advertising is handled by J. Walter Thompson USA, has been No. 1 in awareness in its industry for each month, but its September performance boosted its margin over No. 2 Canon to 15 percentage points, the most ever. Canon's awareness score rose to 13.4% in September, from 11.8% in August. No. 3 Polaroid's advertising was mentioned by 5.4% of the respondents, down slightly from August.

In another significant increase last month, McDonald's reversed two straight months of substantial declines with a 5.6 point rise in awareness. McDonald's advertising was named as that first coming to

(Continued on Page 68)

world news roundup

Ottawa—Burger King last week was ordered by Canada's Dept. of Consumer Affairs to substantiate comparison claims between the chain's Whopper and McDonald's Big Mac before the J. Walter Thompson USA commercials are aired here. Department investigator Ron Siwicky says he does not believe Burger King's survey proves the claims, which, he added, could constitute misleading advertising.

Milan—Procter & Gamble has 30 days to withdraw Pampers advertising in Italy that compares the disposable diaper's absorbency with that of "normal" diapers. A judge here ruled that the campaign constituted unfair competition since it was unclear what a normal diaper was and because the three-second moisture test was irrelevant to the product's actual use.

Hong Kong—Readers Digest's majority-owned *Asiaweek* plans to boost its guaranteed circulation from 35,000 to 45,000 next year, still behind competitors *Time*, *Newsweek* and the *Far East Economic Review*. In the latest Asian/Pacific readership survey, *Asiaweek's* average-issue audience increased 29%, compared with 42% for the *Review*.

London—Fiat tapped Ogilvy & Mather subsidiary Davidson Pearce last week to handle its $12 million U.K. account. Fiat also appointed Kenyon & Eckhardt affiliate Butler Dennis & Garland to handle its $6 million Lancia account.

Weekly digest of D.C. news

'Post' to test its spinoff

By RICHARD L. GORDON

Washington—The *Washington Post*, which scoffs at suggestions it has "national newspaper" aspirations, said publication of a spinoff "national weekly edition" may begin as early as next February if response to a test subscription offer is favorable.

The *Post's* planned product will compete for many of the same national ad categories targeted by Gannett's daily *USA Today*—liquor, automotive, corporate—but will be just the opposite in editorial focus. Where *USA Today* boasts its nationwide coverage, the tabloid *Post National Weekly Edition* will solely cover official Washington: Government, politics, diplomacy and economics.

Where Gannett shoots for a quick climb to 800,000 readers and eventually more than 2 million, Alice Rogoff, publisher of *Weekly's* prototype issues, and special assistant to *Post* publisher Donald Graham, is targeting a fairly rarefied audience of "educated people with some sort of vocational tie to Washington politics."

But, like Gannett, the *Post* is heralding its new publication as a "history-making new venture in journalism." Whatever its historical status, its introduction fits with the growth strategy of Washington Post Co. president Richard D. Simmons.

Mr. Simmons has said he planned to seek new ways to market his company's existing information resources.

- *Post* officials noted that neither the *New York Times* nor the *Wall Street Journal* publish a weekly selection of their most important articles for selected readers.

Mr. Graham expects initial circulation of the *Weekly* to be "well under" 100,000. Miss Rogoff said she's awaiting results from a 700,000-piece, direct-mail subscription offer this month before hazarding any guesses about the publication's sales potential.

A one-year subscription is priced at $39; the newsstand price will be $1.

Unlike Gannett, which has in-

"We had to get back to what Volkswagen, and. . .Volkswagen advertising, stood for," declared marketing manager John Slaven in an interview in Doyle Dane Bernbach's New York office *(see separate story, Page 88)*.

VW implements its 'heritage' strategy

By RALPH GRAY

La Jolla, Cal.—The ghost of Beetles past is being exorcised by Volkswagen of America's newest marketing exercise: Aim high.

Although VW prices are "more competitive" than last year, the company will go after upscale buyers rather than the downscale-like buyers of the erstwhile Beetle. "In an economy where car sales are dependent on financing, you just can't sell a lower-income group," said Carl H. Hahn, chairman of parent Volkswagenwerke of West Germany.

Mr. Hahn, newly named chairman, was in the U.S. to launch VW's 1983 models. VOA suffered tumbling sales in 1982, so VW is going back to basics, to its heritage (AA, July 5). The idea of a German-German car has returned. "We don't want to build the best American car. We want to build the best European car in America. That's our basic philosophy," Mr. Hahn said.

"We will immediately implement a brand management vitality for all our models," said James R. Fuller, vp of the Volkswagen division of VOA, "not just in advertising and not in product definition, but in marketing position. We will emphasize the qualities that made VW legendary and the standard of the small-car market many years ago—the character of German engineering," he said.

Mr. Fuller is counting on a hot-performing model, the GTI, which is being billed in new advertising as a "wolf in sheep's clothing." Ads stress the German origin of the Rabbit, which is built in the U.S. One tv spot says, "In Germany, the most popular high-performance car is a Volkswagen GTI."

The introductory campaign is about 60% tv, but in two months will be equal parts print and tv. VOA ad spending was $70 million to $80 million for model year '82 and will be up a bit better than inflation for '83, execs said.

"This is not just an ad campaign," Mr. Fuller said. "It is part of a strategic plan that takes into account our product-pricing path and the position of all of our products." All print ads and most tv commercials will show price, but that's incidental to a lot of squealing tires, airborne cars and other performance images.

"We have to be consistent in our new strategy and we think it will take a minimum of three years to fully accomplish our awareness goals," said Mr. Fuller. Or, as Mr. Hahn

(Continued on Page 88)

U.K. rules not stopping foreign links in cable

By HOWARD SHARMAN

LONDON—The U.K. market for cable tv, which would be thrown open to all comers if the British government accepts the recent recommendations of the Hunt Committee, still would ban U.S. and other foreign investors from a controlling interest.

But that as yet has not deterred foreign investors from getting involved in this market. "This is a very encouraging and enlightened report," said Roy Faibish, exec vp, Cablecasting Europe, a Canadian company.

The committee, set up in the summer to consider questions related to the wiring of the U.K., programs to be shown, advertising or pay tv and controls that might be needed, has come down strongly in favor of a fast and relatively unrestricted expansion of cable tv.

Among the recommendations were the following: Programing from abroad should not be restricted as it is on the existing networks; there should be no division between cable system operators and program providers; there should be no limit on the amount of advertising carried (the committee even foresaw some channels being nothing but classified ads), and franchises should be awarded for areas of up to 500,000 homes and for 10 years, with subsequent renewals being for eight years.

The only monitor on the new cable system would be a central authority to award the franchises to companies or consortia and to oversee operations of franchisees.

Despite the restrictions on foreign ownership, the report has not reduced the ardor of foreign companies to get involved in this market. Mr. Faibish says the conditions Lord Hunt has proposed for the startup of cable tv are much more encouraging and liberal than those in the U.S. and Canada in the 1960s and early '70s.

"We are looking at consortia opportunities and are considering the whole of the U.K.," Mr. Faibish says. He believes that it will take between two and three years to get a cable running past all of the homes in a franchise area of 100,000 homes, and it probably will be at least a year before a franchise authority is set up to assign franchises. This implies that it will be at least 18 months before any homes are connected to new cable systems and as much as four years before systems are in operation.

Looking at the recommendations of the Hunt Committee, Mr. Faibish believes that the British cable system will develop more like the Canadian model than the U.S. model. The Canadian system not only must carry regulations proposed by Lord Hunt, but also offer more safeguards to the national broadcaster, the Canadian Broadcasting Corp., than the U.S. system, which does not protect the networks.

"I don't think that in any cable system above 10,000 homes you should be able to get a cable franchise without offering a local channel, and it will be the Canadian model of cable broadcasting which we will be putting forward in the U.K.," Mr. Faibish says.

The role of advertising in the development of cable tv in this country is still unclear. Lord Hunt suggests that there should be no control on the amount of advertising on cable channels, and cable clearly offers a huge theoretical opportunity to advertisers.

But agency opinion here is that national advertisers will not be interested in the medium until 25% to 30% of homes are connected to cable, and that position is still a long way in the future. Mr. Faibish tends to agree with this view, saying, "Advertising will only make a marginal contribution to cable, it will not be a significant factor."

The initial growth of cable is likely to depend on consumers taking up cable's basic package and being prepared to pay extra for whatever subscription channels are offered.

Even before the report was published, companies were being formed to bid for possible franchise areas. Granada, the ITV contractor in the northwest of England, has expressed interest and says it is looking at the possibility of setting up a film channel, provisionally called Granada Home Cinema Service, which looks as though it could be modeled on the successful Home Box Office.#

There's a lot more to *Organic Gardening* than organic gardening.

Sure, you'll find seed and outdoor power equipment advertisers in the pages of our magazine.

For them, this is "home."

But don't be surprised to find chain saw and truck advertisers, too. Or sellers of soap and kitchen appliances.

Because, for them, this is "pay dirt."

These advertisers know that *Organic Gardening* doesn't stop at the garden's edge. It moves with its 1,300,000+* subscribers into their kitchens. On to their home workshops. Out to their garages.

It ranges widely. Helping readers to build a more self-reliant life for themselves. So, inevitably, it attracts an ever wider range of advertisers. Alert executives who know that fertile soil can turn out to be fertile sales territory.

In America's largest gardening magazine. *Organic Gardening*.

Want more facts? Call Sanford T. Beldon, Publisher, at (215) 967-5171. Or write to him at *Organic Gardening*, Emmaus, PA 18049.

That's why they planted their ads with us.

THE SERVICE MAGAZINE FOR THE NEW SPIRIT IN AMERICA.

A Rodale Press Publication

corrections & clarifications

• *Folio* 400 figures reported on P. M-60 of this issue, printed earlier, have been revised by the magazine. Total revenues in 1981 for *Better Homes and Gardens* should be $172 million, a rise of 9% over 1980. For *Sports Afield*, total revenues in 1981 amounted to $14.9 million, an increase of 13.9%. In addition, according to *Folio*, revised 1981 total revenues for Rodale Press publications show that *Prevention* grew by 6.0% and *New Shelter* by 47.3% over 1980. Rodale, however, said *Prevention's* total revenues increased 70.4% and *New Shelter's* rose 14.5% during that period. Rodale also noted that *Prevention* had total revenues of $39 million in 1981.

• A Los Angeles ordinance to drop city business tax exemptions for newspapers, radio and tv was expected to generate $2.9 million annually and would tax ad gross receipts of printed publications, radio and tv stations. The amount was reported incorrectly (AA, Oct. 18, P. 77).

Latz-Purina exits TBWA

EUSKIRCHEN, WEST GERMANY—Because Quaker Oats is acquiring the European companies of Ralston Purina, the latter's German arm, Latz-Purina, has terminated its relationship with TBWA, Frankfurt.

Quaker & Partner, into which Latz-Purina is being merged (AA, Oct. 19), will keep all its pet food business at its present shops: Foote, Cone & Belding, Frankfurt, and McCann-Erickson, Cologne.

L-M coupon insert set

DETROIT—Lincoln-Mercury will sponsor a combination consumer information pamphlet and coupon booklet in the April *Family Circle*.

Top half of the 20 pages will carry information on buying and servicing cars; coupons from various brand advertisers will be on the bottom. A sweepstakes promotion is included. SR&B/Rainbow Corp., Troy, Mich., is handling.

Johnson leaves Colgate

NEW YORK—M. Carl Johnson III has been named exec vp-marketing and sales, Campaign Communications Institute of America.

Mr. Johnson was category manager, oral products, Colgate-Palmolive Co.

Public confidence in economy grows

(Continued from Page 36)

pent-up buying power. As they entered the fourth quarter of 1982, Americans generally were in better financial shape than they have been for a long time. One in three (32%) reports being better off financially than a year ago, compared with only 28% during the second quarter. With inflation easing, 36% say they expect it to be easier to get by and pay bills next year—the highest proportion in more than a year. Almost half (45%) expect to be still better off next year, while 52% had more income this year than last. Looking ahead, 43% expect their income to go up in the year ahead, while only 8% expect a decline in income, with the balance expecting no change in income.

Go, no-go

So, as the last quarter of 1982 opened, retailers and manufacturers might look to the encouraging facts that consumer buying power is mounting steadily and that a sudden spontaneous urge to make major purchases is showing up across the country. If that urge really lets loose, it could shove the economy back into high gear. But there's a great difference between urge and consumption. Eight in 10 consumers continue to tell us that they are *not* planning to increase their over-all debt in the year ahead. Three in four consumers we talk with say they expect their savings will increase or remain constant in the year ahead.

The direction that sales actually will take in the final quarter of 1982 depends heavily on what marketers do to shift the existing balance between the consumers' strong urge to spend and their equally strong urge to conserve cash and defer major purchases.#

Newspaper spending for cars gains

New York—New passenger automobiles showed the largest percentage gain in newspaper advertising spending for July, a month when most categories either recorded declines or slight increases, according to the latest figures from Media Records.

Ad spending for new cars was up 52% to $7.7 million, while other top gainers included cosmetics, up 39% to $146,000; publishing and media, up 22% to $4.9 million, and radio, tv, phonographs and records, up 21% to $7.8 million.

Those categories showing the greatest declines were coffee and tea, down 60% to $116,000; airlines, down 40% to $4.7 million; cameras and photo supplies, down 40% to $359,000, and cigarets, down 37% to $5.5 million.

Over-all, nine of the 16 categories counted showed increases from the year before, while six recorded declines and one remained unchanged at no spending for the month.

This Flash Report of newspaper advertiser investment, compiled for Advertising Age by Media Records, is derived from tabulations covering 33 dailies and 25 Sunday editions in 14 cities—Atlanta, Baltimore, Boston, Chicago, Cleveland, Dallas, Denver, Los Angeles, Miami, New York, Philadelphia, Pittsburgh, San Francisco and Washington.#

Any business magazine that sells an average of 100,000 subs a year net can sell just about anything.

Business and industrial products, prestige consumer goods, real estate and financial services. Inc. sells them all, because Inc. adds subs faster than any other business magazine. In four short years, 400,000 controlled circulation became 400,000 paid—an average of 100,000 subs added every year. Inc. is the partner of small companies everywhere. Yankee Group foresees video shopping arcades

By SUSAN SPILLMAN

NEW YORK—As early as next year, Valley Girls hanging out at the local shopping malls simultaneously may be indulging in two of their favorite obsessions—shopping and videogames.

That concept, currently in prototype form, may well appear in retail locations by 1983, said Mark Kriss, research manager for The Yankee Group, a Boston-based think tank.

Though not exclusively aimed at the trendy teen agers, video shopping arcades will provide entertaining and straightforward product information at a lower cost to retailers, Mr. Kriss said at a Yankee Group seminar here, called "The Home Talks Back," in which the future of interactive technologies was discussed.

Mr. Kriss envisions that video shopping arcades placed in shopping malls, airports, hotels and other high-traffic locations eventually will provide consumers with complete assistance in selecting and purchasing all sorts of products from the latest fashions to European vacations.

Already, technology exists that will enable a customer looking for a birthday gift, for example, to press a video terminal button and access a list of product categories, call up a video demonstration and get information about any item.

According to Mr. Kriss, at some point next year, BuyVideo, a Sunnyvale, Cal.-based venture that makes such a terminal, expects its video shopping computer to be available in public locations during the first quarter of next year.

This Christmas, Atari will be using a similar method to push its line of personal computer products. Atari's ERIC system, consisting of a 72-in. screen and color monitor, will be installed in J.C. Penney and Sears stores this fall. Sensors will cause the system to begin chatting with a customer as soon as he or she approaches. A series of questions will pop up on the screen to help the customer determine his or her needs. For example, the system might ask, "Are you interested in programing music?" If the customer responds positively, the display will illustrate Atari's capabilities in this area. The ERIC system, however, will not permit customers to charge products over the terminal.

Computer software retailers are likely to be the first to introduce video shopping terminals to the masses because their products are so compatible with the technology and their customers are already familiar with it, Mr. Kriss said. However, a company like American Express is a likely candidate to use such a system to sell vacations at its travel bureaus, he added.

Another business poised to cash in on the $8 billion video arcade boom are state lotteries. Mr. Kriss believes video lottery machines may represent the next generation of revenue-raising products for state lotteries and predicted that such terminals will be available in at least one of the 15 lottery states within 12 months. Widespread availablilty, he added, would occur over the next five years. Companies already developing video lottery terminals include Scientific Games Inc., a subsidiary of Bally Midway; International Game Technology, Syntech International and Omega Products.

Lotteries and all forms of legal betting have been experiencing hefty profits in their own right. Combined revenues from racetrack, off-track casinos and public lotteries reached $23.8 billion last year and represent an area that cable tv stands to capitalize on as well. Sports betting via cable represents a logical evolutionary step for the medium and can lay the groundwork for other teletransactional services such as bill paying, funds transfers and stock or bond transactions, he said.

Telephone horse betting now is legal in two of the 29 states that have horse racing. And in one of those states, Kentucky, track owners have made a winning pair out of phone betting and cable. Louisville Downs established the Kentucky Entertainment Network last summer that features live televised harness races over two cable systems reaching 90,000 homes. Subscribers open accounts at the track and can call in their bets just before the race. Already 4,000 cable viewers have active accounts and the track averages 600 cable bettors per night. Cable viewers are responsible for about 15% of the track's revenues.

"The videogame industry is laying the foundation for transactional services of every kind," said Mr. Kriss. "They are going to provide a lot of money for many companies, but entertainment will be the key to introducing new services."

BAR/ADVERTISING AGE NEW TV PRODUCTS BULLETIN

For Period August 30, 1982, through September 27, 1982

Magazine revenue up despite ad drop

By STUART J. ELLIOTT

NEW YORK—Magazine revenues rose 6.7% through the first nine months of this year, according to Publishers Information Bureau figures, though ad pages fell 1.1% (AA, Oct. 18).

And *Business Week* retained its hold on the No. 1 spot in ad pages from January through September, despite a drop in its margin.

The PIB member magazines had revenues of $2.39 billion in the first three quarters of this year, compared with $2.24 billion in the same period last year. Ad pages totaled 85,844, compared with 86,758 for the same period a year earlier.

In September, revenues increased 6.8% to $307.4 million. Ad pages declined 1.9% to 11,403.

Of the dozen magazines with the most ad pages so far this year, just four carried more pages than they did during January to September, 1981. The others posted declines.

Business Week led the list with January to September ad pages of 3,161, down 6.7% from the corresponding 1981 period. *The New Yorker* followed with 2,633, down 3.4%. Thus, the *Business Week* lead over *The New Yorker* dropped to 528 pages, a decline of 20.2%.

The rest of the top dozen: *TV Guide*, 2,570, up 1.6%; *People*, 2,419, down 1.1%; *Forbes*, 2,019, up 4.6%; *Vogue*, 1,899, up 6.4%; *Sports Illustrated*, 1,895, down 4.6%.

Also, *Newsweek*, 1,865, down 14.4%; *Time*, 1,807, down 7%; *Fortune*, 1,797, down 0.1%; *New York*, 1,681, up 10.5%, and *Cosmopolitan*, 1,656, down 2.9%.

Among the "Seven Sisters" women's books, only one, *Family Circle*, gained pages; up 3% to 1,218. The largest percentage decline was felt by *Ladies' Home Journal*, which dropped 13.6% to 643.

The rest of this category: *Better Homes and Gardens*, 988, down 4.1%; *Good Housekeeping*, 1,403, down 1.6%; *McCall's*, 721, down 12.5%; *Redbook*, 773, down 8.3%, and *Woman's Day*, 1,014, down 2%.

Several magazines enjoyed double-digit percentage gains in ad pages, including: *Us*, up 42%; *Working Woman*, up 31.1%; *Working Mother*, up 19.7%; *Sporting News*, up 14.8%; *Discover*, up 13.3%, and *Black Enterprise*, up 13.2%.

Several suffered double-digit percentage declines, such as: *Industry Week*, down 17.1%; *Reader's Digest*, down 13.1%; *Nation's Business*, down 13%, and *Life*, down 12.6%.#

Civilized brand of football

(Continued from Page 60)

to handle a rape case. This victim was a child who knew her assailant but couldn't bear to look at him in the courtroom without going into hysterics.

Having lost that tough case to a legal aid attorney to whom she is attracted, Ms. Farreli moved on to prosecute her first murder case. Jed Carter (played by Dennis Lipscomb), a parolee who has written a book, is accused of killing a waiter in an alleyway in an argument over an unsatisfactory meal.

This part of the script is based on an actual case that made the headlines in New York not so long ago after novelist Norman Mailer befriended writer-prisoner Jack Abbott.

Ms. Harper as Liz Farrell, Eugene Roche as the district attorney whom his young assistants revere, and Mr. Lipscomb as the ice-cold, unrepentant killer, in particular, were excellent. The New York streets and court scenes provided a touch of reality as did many of the minor characters.

If I were voting at NBC, I would give the Harper-Silverman team a series order so Ms. Farrell and her associates can be ready to come in as a substitute when the inevitable fallout starts in the 1982-83 prime-time lineup.#

Italicized brands indicate new category leaders this month.

Question (asked of 1,260 adults): Of all the ads for (category) you've read, seen or heard in the last month, which ad first comes to mind?

Kodak awareness soars on disc

(Continued from Page 3)

mind among all fast-food advertising by 45.6% of those questioned. That score continues to be the highest, by far, among all advertisers in the 20 categories monitored.

McDonald's advertising recently has highlighted a promotional game offering chances to win Atari videogames and home computers. Since January, McDonald's general-market advertising has been handled by Leo Burnett USA. Burnett's first full-fledged McDonald's campaign broke in late May.

In fast-food, No. 2 Burger King had an awareness score of 8.4% in September, up from 7.4%. Wendy's again was No. 3 with a 4.4% score, down from 6.4% in August.

Respondents in the September poll were interviewed by telephone from Sept. 1 through Sept. 21. That was before Burger King and agency JWT launched a controversial comparative campaign claiming its hamburgers are bigger and taste better than those of McDonald's.

McDonald's ranking in over-all top-of-mind awareness—not limited to a particular category—also improved in September, to No. 3 from No. 5 in August. Asked to name which advertising first came to mind of all they had read, seen or heard in the previous month, respondents identified McDonald's advertising 1.5% of the time, up from 0.96% in August.

■ Coca-Cola and Pepsi-Cola ranked first and second, respectively, in top-of-mind awareness for the sixth straight month. In industry awareness, however, Pepsi regained the top spot, capturing 27.8% of all responses to Coke's 24.3%.

New to the Top ten in September were Sears, Roebuck & Co. and Procter & Gamble's Crest toothpaste, which tied for No. 10 with Ford and General Motors.

Other September highlights:

In **pet food**, Quaker Oats' Kibbles 'n Bits was the new No. 1 in category awareness. It was the first time the relatively new brand had made the top three in its group.

In **beer**, Miller (including the Lite brand) was No. 1 for the third straight month. Miller had captured the top spot from Budweiser/Budweiser Light in June.

Maxwell House and Folger's continue to alternate as leaders in **coffee & tea**. In September, it was Maxwell House No. 1 again, with a score of 15.7%, to Folger's 12.1%.

Bounty posted a significant 4.1 point rise in **paper products**, and was No. 1 for the second straight month with a score of 12.1%, the highest so far in the category.

Atari, perhaps helped by its McDonald's tie-in, jumped 5.4 points to a 19.4% score in **home electronics**, giving it a commanding 15-point lead over No. 2 Intellivision, from Mattel.

Tylenol rose 3.2 points in **medicine & drugs** to a category-leading 19.8%, while No. 2 Anacin yielded some of its large August gain, dropping to 8.8% from 10.6%. No. 3 Bayer rose to 6.8% from 4.6%. The survey was concluded before seven deaths in the Chicago area were attributed to cyanide that had been put into Extra-Strength Tylenol capsules.#

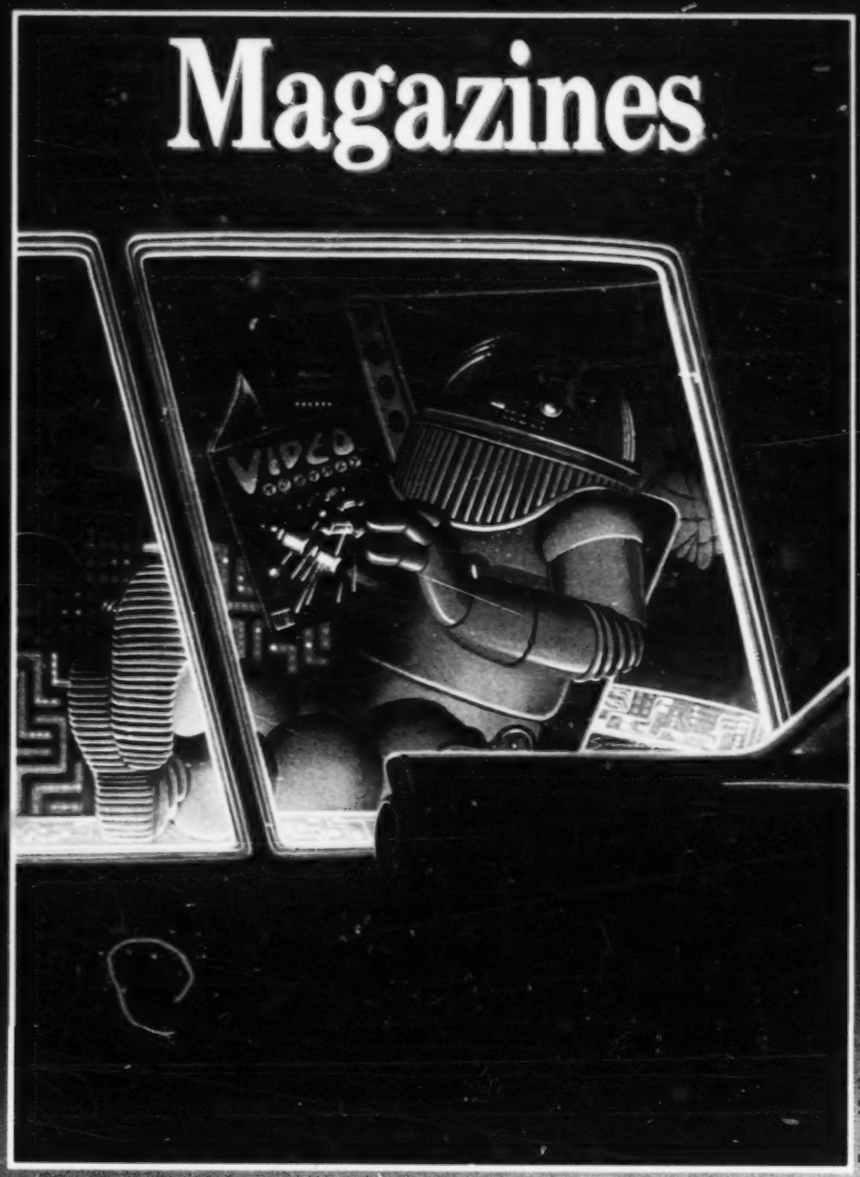
Shell tv spots introduce booklet about fire safety

HOUSTON—Shell introduced its 32nd answer book, "The Fire Safety Book," backed with a 30-second network tv spot. The effort coincided with National Fire Prevention Week. The spot, via Ogilvy & Mather, features a dramatic re-enactment of a house fire in which a family used the "safety crawl" to escape. The book will be in November issues of *Good Housekeeping* and *Reader's Digest* and is available in participating Shell stations.

Magazines



Raymond Smith

Of more than passing interests?

By B.G. Yovovich

Where do special-interest magazines go from here? Their achievements during the last decade certainly have been impressive. At the same time that industry giants with the names of *Life*, *Look* and *The Saturday Evening Post* were dying, and *Esquire* and the traditional women's books were having serious problems, a slew of new categories of special-interest magazines were springing into life and prospering: Dozens of city and regional magazines; science magazines; magazines for working women and for women executives; magazines for entrepreneurs, and magazines for small businessmen—not to mention hundreds of trade publications and titles aimed at other, even more highly specialized audiences.

But the 1980s give every indication of producing a very different kind of magazine environment, one in which the growth and prosperity of the 1970s could prove difficult to match. Many of the fastest-growing special-interest magazines of the 1970s are beginning to come up against the limits to growth that specialization generally implies. Competition within the magazine industry also seems to have sharpened, with new magazines finding it harder and harder to break into increasingly crowded newsstand and magazine racks.

Developments outside the magazine industry also are having their effects, including changes in consumer attitudes and life styles that threaten to erode support for some of the successes of the 1970s. And always on the horizon looms the challenge from narrowcast cable tv programs.

"The 1980s will be a period of shakeout and consolidation," predicts publishing consultant Christine D. Urban of Urban & Associates, a Sharon, Mass.-based company. "In the 1970s, the successful magazines simply had to take advantage of the growth. In the 1980s, the special-interest magazines will have to earn their growth."

Any discussion of the prospects for special-interest magazines in the 1980s has to begin with an examination of the forces that fostered their explosive growth in the 1970s. The production side, for example, saw two technological developments combine to play particularly important roles. On the one hand, advances in offset printing technology lowered the fixed costs of printing and made it easier for small circulation publications to survive.

At the same time, computer technology—especially the availability of computerized mailing lists that spurred the growth of the direct mail industry in the 1970s—helped make it easier and less expensive for publishers to identify potential subscribers for their special-interest magazines.

Special-interest publications also benefited from marketers' efforts to implement more precisely targeted marketing strategies. With their sharply defined audiences and their ability to produce detailed readership profiles through subscriber surveys, special-interest magazines were perfectly positioned to take advantage of advertisers' increased interest in getting more precise audience data—in sharp contrast to the difficulties that the broadcast media have had in trying to categorize and identify their audiences.

Finally, special-interest magazines also benefited from the multitude of social changes that occurred in the 1970s. The focus on self and the self-indulgent values connected with the much-heralded "Me Decade" created an environment that fostered a willingness among consumers to buy magazines that would enable them to pursue their hobbies and interests. The decade's cultural pluralism and the rise of a variety of new life styles—the growth in the number of women business executives, the increased interest in fitness and the heightened interest in science and technology—also created entirely new magazine audiences, and made possible the birth of entirely new categories of specialized magazines.

More recently, however, things have tightened up considerably and, maintains Ms. Urban, "Most of the factors [that contributed to growth] have reached their peak and stabilized."

For example, further technological improvements may promise additional reductions in production costs, but the economies realized are expected to be far less dramatic than those of the 1970s.

Recent trends in consumer interests, values and life styles also suggest a change from the heady growth of the 1970s and portend a new set of challenges. Take today's typical consumer. He or she exhibits a very different profile from the 1970s' large group of young, unmarried indi-

(Continued on Page M-60)

Specialization

(Continued from Page M-9)

viduals who were experimenting with a variety of new hobbies and interests. In particular, with more working women and the ever-tightening time constraints faced by baby boom members starting families, special-interest magazines are facing more intense competition for readers' increasingly limited leisuretime.

Marcella Rosen, senior vp-media director with N W Ayer, points out that recent magazine research shows that the average consumer continues to buy the same number of magazines as in the past, but is spending less time with each one.

"If affluence grows," adds J. Kendrick Noble, a media analyst with Paine Webber, "the number of magazines bought per capita probably will grow, but people will become more specialized within the magazines that they buy, buying magazines not for the entire issue, but for specific articles" or features that they are especially interested in.

On the other hand, argues Ed Weiner, media director at Geers Gross, there were significant numbers of consumers in the 1970s "who read everything from *Field and Stream* to *Car and Driver* to *Stereo Review* to *Popular Photography* when they were trying to develop their personal interests.

After they've shopped around, they may discover that they "no longer are committed to four or five different interests" and are likely to cut down on the number of special-interest magazines that they buy.

"My definition of a true specialty magazine is one whose readers do what the magazine is about, like a *Popular Photography*," explains Harvard media researcher Benjamin M. Compaine, whose book "The Business of Consumer Magazines" was published earlier this year.

On the other hand, magazines like *Discover* and *Sports Illustrated*, whose readers do not directly participate in the subjects covered in the magazines, are what Mr. Compaine calls limited-interest publications."

"In the 1970s, the big growth was in specialty publications," says Mr. Compaine, but considering the anticipated continuation of time constraints, "perhaps the 1980s will turn out to see more growth in limited-audience publications."

One consequence of such a shift could be the increased vulnerability of such magazines to economic and social changes. Because consumers are generally less involved and less committed to subjects covered in limited-audience magazines (when compared with specialty magazines), "Most of the limited-audience magazines are heavily dependent on newsstand sales, and tend to be more of an impulse buy," points out Ms. Urban.

"Their sales tend to be more cyclical and more volatile, whereas real specialty magazines may have a smaller, narrower audience, but it is more committed to the publication," she said.

Experts also expect shifts in consumer life styles to spur changes in many of the relatively new special-interest publications.

"Look at what *Apartment Life* did when it changed to *Metropolitan Home*," points out Laurel Baer, vp-media director at Marsteller Inc. "Or take something like *Rolling Stone*. It started out relating to kids and what kids do, but as its audience got older and the kids weren't there, it had to change."

"A person can be part of a special-interest group for only a short time," adds Roger Baron, vp-media director at D'Arcy-MacManus & Masius, San Francisco. "How long are parents interested in how to change a baby? The greatest interest is when they have just had their first child.

"*Savvy* or other magazines that go to young women executives are of greatest interest to the woman who has just been promoted and is suddenly finding herself with management responsibility. These kinds of magazines are likely to have a lower level of loyalty than you might expect from a *New Yorker*, *Reader's Digest*, or even a women's service magazine that a person can live with for 20 years."

As a result, say some media experts, magazines that enjoyed prosperity during the 1970s by appealing to women who had just become junior executives may find it difficult to sustain their growth, as the demographics of the 1980s dictate a steady decline in the number of women moving into entry-level management positions.

Of course, changes in consumer life styles and interests in the 1980s are likely to spur creation of entirely new kinds of magazines.

"Take a woman who is 32 or 33, who has been working for 10 years and is a vp with Chase Manhattan, and now has decided to begin raising a family," says Mr. Weiner of Geers Gross. "She's had a radical change in her life style, and the big question is: How have her needs changed from when she was a fulltime career woman? What's going to make her feel good about herself?

"She now needs to know how she can pick schools for her children or daycare one or two days a week so that she can get out of the house or maybe do some parttime consulting work." And she is likely to find that existing magazines do not address her new needs and interests.

Media experts also see room in the near future for consumer-oriented magazines about computers, particularly publications that would provide a more layperson alternative to the buff-oriented computer magazines currently available.

At the same time that the audience environment is changing, there also are new advertising challenges facing special-interest magazines.

"Special-interest magazines have a deep but narrow audience segment, and it is easy for them to get boxed in and limited in the kind of advertising that they attract." says Ms. Urban. "If they can't break out of that box, it pretty much puts a cap on their growth."

According to Ms. Urban, publications like *Architectural Digest* whose readership profiles are distinctive and desirable to advertisers will be able to "break out of the box." After one gets past the few such exceptional publications, however, "you get down to 500 titles that offer pretty much the same thing."

"That explains why the smart magazine groups are trying to sell their magazines as a cluster," says Ms. Urban. "If you want to do more than just get the natural advertising that comes with the depth you offer in covering your narrow segment, then it behooves you to get together with other magazines that have depth in their own segments . . . [in order to get] more leverage with general advertisers.

"The network approach will become even more important in the 1980s."

Despite all the constraints and new challenges confronting special-interest magazines, there is good news for them as well. Demographics and increased consumer educational levels suggest increases in the population groups that traditionally have been the heaviest consumers of magazines. Most media observers also see the increased time constraints as working to their advantage when compared with the effects on other media.

"Tv is a non-self-selecting medium," points out Mr. Weiner. "You can't say, 'I don't want to watch the next 10 minutes, let's get on with it,' the way you can just skip pages in a magazine."

"One of the great advantages of magazines is their ability to communicate great amounts of detail about a subject and many facets of a subject," adds Roger Baron of D'Arcy-MacManus. "I don't see the broadcast media being able to offer the kind of in-depth coverage that the true hobbyist is going to want to get."

Special-interest magazines also should continue to benefit from "the long-term trend in society toward wanting special-interest information," says Mr. Noble of Paine Webber. "The trend can be traced back for centuries, and is the result of the increasing complexity of civilization and the increasing affluence of the population, which makes it possible for them to be able to afford to pay for useful information."

"The over-all outlook for specialty magazines over the decade of the 1980s is encouraging," concludes Mr. Compaine. "Magazines have proven their resilience in the face of changing life styles and competition. Theirs is a history of dynamism, and the long-term outlook for the industry is good."
